

R. Paradise 461

Chapter 461: Carlo

The mixing of the potion was not just material. Even if the sun gift fruit was dark purple in quality, it was not enough.

Fortunately, Su Xiao had the Philosopher's Stone in his hand that had passed the park certificate. He could replace it with the Philosopher's Stone if he needed other materials.

Su Xiao thought about the ratio method in his mind. There was only one chance, so he had to be careful.

After thinking for ten minutes, Su Xiao took out a dagger, and the sun gift fruit was cut open by him.

After cutting open the Sun's gift fruit, Su Xiao found a fruit core in the center of the fruit.

Looking carefully, Su Xiao was stunned. The fruit core of the Sun's gift fruit was the Seed of Origin!

Even now, Su Xiao still does not know the function of the Seed of Origin, but one thing he was sure of was that the Sun's gift fruit could be eaten, and the Seed of Origin could not be eaten.

After peeling off the fruit meat of the Sun's gift fruit, Su Xiao began to make the potion.

Because the conditions were simple and crude, there was a great risk of mixing. Fortunately, the materials were sufficient, and it would not affect the quality of the potion.

The shelf life of the Sun's gift fruit was too short, and it could not be mixed after the survival trial.

Light flashed in his hand, and just as Su Xiao was concentrating on mixing, the nose of Bobowang loosened, and he looked at the Seed of Origin.

Bobowang gulped down a large mouthful of saliva. It also knew that the Seed of Origin could not be eaten, but the instinctive desire made it very painful.

"Gulp."

Saliva sound ×1.

"Gulp..."

Gulp Liquid sound × 2

The movement on Su Xiao's hand stopped, and his eyes looked at Bobowang. This time, it was a lot quieter.

Two hours later, there was a crisp sound in Su Xiao's hand, and a strand of red powder fell from his fingertips. The energy in the Philosopher's Stone was exhausted.

Su Xiao held a test tube in his hand, and the test tube was filled with a pale golden liquid.

"Oh."

The pale golden liquid was churning in the test tube, but there was no heat at all. This was the change between Su Xiao's usage of Mana value and the stable materials.

Let this change develop into a peaceful development.

Sweat dripped from Su Xiao's chin. His Mana value was consumed like flowing water. If not for more than a thousand Mana values, he would have been unable to hold on.

After a long time, the potion in the test tube stopped churning. A special fluctuation came. This was the reincarnation paradise that had confirmed this bottle of strengthening potion.

Su Xiao checked the properties of the potion.

[unnamed]

[Origin: Survival Trial]

[Quality: Dark purple]

[Type: Enhanced Medicine]

[Effect: After drinking, permanently HP +200, Mana +200, Strength +1, Agility +1, Intelligence +1, Fire Resistance +25, Cold Resistance +25, Reflex +4.]

[Rating: 260 +]

[Description: An advanced product of Alchemy Pharmaceuticals, extremely precious.]

...

After Su Xiao saw the potion's effect in his hand, a smile appeared on his face. Fortunately, he did not directly eat the Sun's gift fruit before. Otherwise, it would be a big loss.

This potion was passed through the reincarnation paradise's public certificate, which meant that this thing could be sold to the outside.

But any contractor who obtained this thing would not choose to sell it, and Su Xiao was no exception.

Drinking the pale gold potion in one gulp, the warm feeling instantly filled Su Xiao's abdomen.

A large light suddenly appeared in front of Su Xiao, and there was a vague figure in the light.

This figure was somewhat illusory. It seemed to be a projection. She wore a long golden dress and looked like a woman.

The golden skirt was elegant, and her whole body was burning with golden flames.

"Mortal, kneel."

A cold voice came, and Su Xiao frowned.

"Kneel!"

The woman spoke again, and in an instant, a flame rose around Su Xiao as if to burn him.

The flame's temperature was extremely high, and the air was burned through. Just when Su Xiao thought he would die, a blue flame rose from his body.

"Destroy..."

The golden flame woman murmured, shook her head, and had a trace of fear in her eyes.

"Leave my planet, and you are not welcome here."

The body of the golden flame woman began to change from the original human form, gradually turned into vines, and climbed toward Su Xiao.

Boom!

Su Xiao opened his eyes and looked around. Other than Bobowang, there were no other creatures around.

Looking at the empty test tube in his hand, Su Xiao guessed that he had entered some fantasy. The woman with golden flames was probably not a human but a certain consciousness.

Yes, it was consciousness. Su Xiao had a hazy and clear feeling as if he was the nemesis of the other party. The consciousness was afraid of him, so it formed an illusion to intimidate him.

Su Xiao looked at his attributes. The strengthening effect of the potion had appeared, and the increase of his HP could not be seen, but his Mana value reached an astonishing 1363 points.

Strength, agility, and intelligence each increased by one point, and at the same time, there was also the resistance of fire and ice attributes.

Resistance was a good ability, such as fire resistance. Although he could not be immune to the burning of the flames, it could let him survive in flames for a longer time. In the future, when he was injured in the fire attribute attack, the degree of injury would be reduced.

And among these enhanced abilities, the most precious was the reflex speed of 4. For close combat, the reflex speed could be called a dream.

Su Xiao lay in the cave, thinking about the scene he saw before and connecting the clues he knew.

There were more and more clues now, which pointed to one thing.

Su Xiao had a headache. He was not good at reasoning. If it were some contractors with strong reasoning ability, they might have found the truth from the clues.

It had to be admitted that Su Xiao did not have that kind of talent. He belonged to the warrior type.

This was not a big problem. Su Xiao knew that there was someone who must know its secrets, and he would contact that person, and that was Old Baal.

For insurance purposes, Su Xiao would leave the Red Earth Region six days before the survival trial, and without Old Baal's compass, Su Xiao could not leave the Red Earth Region in a short time, and it was inevitable to contact the other party.

After resting in the cave for a night, Su Xiao took Bobowang to find Old Baal the next morning.

Today was the day of the battle between the Yosenman Tribe and the Zerg. Don't misunderstand. The two sides were not in a decisive battle, just fighting for land daily.

The Yosenman Tribe had gathered a large number of red-skinned natives. Although these natives had the same skin color, their clothing differed slightly.

The Yosenman Tribe did have not only one large tribe but also some small tribes around them.

Old Baal was the leader of the Yosenman Tribe. While commanding the large tribe, the small tribes around him also had to listen to his commands.

In the stone house of Old Baal's family, Old Baal sat on a blanket. In front of him sat a dozen or so leaders of small tribes.

"Batganawa...(unknown language)."

Old Baal seemed to be announcing something. The leaders of the small tribes listened attentively.

"Roar!"

The leaders of all the small tribes roared. These fellows should have reached a certain consensus.

Bobowang was shocked and rolled his eyes. His eyes were: This group of people are stupid!

The leaders of more than a dozen small tribes left the stone house, and old Baal walked to Su Xiao.

Today, Old Baal wore formal clothes, feathers on his head, and a yellow feather cloak.

"My friend, the time to fulfill your promise has come. Come with me to the nest of the Zerg. The compass will belong to you as long as you help me get the 'Regeneration Egg.'"

Although Old Baal tried to stabilize his mood, Su Xiao still felt the excitement of the other party.

Behind Old Baal stood the leader of a small tribe. This was a colleague who went deep into the nest of the Zerg, and it was Old Baal's quick decision.

The leader of this small tribe was tall, about thirty years old. What was important was that his left cheek was dry, and there were roots of plants growing inside.

"This is Carlo, my most trusted subordinate, who can communicate with each other."

Carlo's expression was dull, and his teeth were a little unclear.

"Hello, I know a... adventurer's voice a bit."

Chapter 462: Worm Nest

Although the deed in Carlo's mouth was very vague, Su Xiao still caught it accurately.

He was not surprised, or he had long thought that old Barr knew his identity.

When he first came into contact with old Barr, Su Xiao noticed a situation. The other party must have come into contact with humans, and they had come into contact more than once.

This island was called Devour Island. There were no traces of human civilization on the island, only red skin natives, but old Barr knew the human language, and there must be something hidden.

In other words, there was an essential difference between Devour Island and the derivative world. The derivative world was completely controlled by the reincarnation paradise and could reset the timeline.

Devour Island was different. The reincarnation paradise only had the right to dabble in this place. It did not have too strong control and could not reset the timeline.

Therefore, it was very likely that Old Baal had contacted many contractors. After all, the Yosenman tribe lived on Devour Island, and the contractors were only passers-by here.

If he thought about it like this, then the existence of Devour Island was somewhat terrifying. After the arrival of batches of contractors, there was still not much change here, and the original order was still maintained.

...

The atmosphere in the stone house was a bit awkward. Old Baal's turbid eyes glanced at Carlo.

The blank expression on Carlo's face split into a smile, not explaining anything.

"Cough ---, where were we just talking about?"

Old Baal coughed to ease the awkwardness.

"Go deep into the insect nest."

Su Xiao did not want to dwell on the issues of contractors. Old Baal had already confirmed that he had ulterior motives, but he was not being kind. The two sides were about the same. They were not good people.

However, from the conversation just now, Su Xiao found out that Carlo did not seem to be Old Baal's subordinate.

The relationship between the two was more like equal than superior and subordinate. Old Baa; even showed the intention of taking care of Carlo.

"Yes, deep into the insect nest."

The topic changed. Old Baal took out a crude map. This map was considered a national treasure level in the Yosenman Tribe.

"The main battlefield between us and the insect race is here."

Old Baal pointed at a spot on the map. It was a large plain.

"This is our current location."

Old Baal pointed at where the Yosenman tribe had landed on the map.

"This is the location of the Zerg."

Old Baal pointed at the location of a forest three mountains away from the Assenman Tribe.

"What are these black dots around the Zerg?"

Su Xiao looked at the area around the Zerg.

"This is the explosion area."

"The explosion area?"

Su Xiao was slightly surprised.

Old Baal lowered his eyes and seemed to think of some bad memories. He said in a low voice, "Yes, the explosion area, where you will die if you step wrong. This is the only way to enter the nest."

The symbol of the nest on the map was a black skull. Around the skull, it was full of black dots representing the explosion area.

"The Zerg have a soldier type called the explosive ants. They will hide on the ground and only reveal their heads. If you step on their heads, pray for your good luck.

If it is a new explosive ant, it will explode immediately after being stepped on. If it is an explosive ant that has existed for more than a week, as long as you do not move your feet, it will not explode. This thing will only survive for a month at most."

After listening to the introduction of Old Baal, Su Xiao felt that this explosive ant was a biological landmine.

The new explosive ants had a keen sense of perception, and they would explode when they stepped on it. For more than a week, the explosive ants hiding underground were not so sharp.

"Is it very powerful?"

"It's very big. At least I can kill you and me."

Old Baal continued to describe his plan.

"After the war begins, we'll go around here."

Old Baal pointed to a mountain behind the Zerg.

"After that, we passed through the explosion area. After passing through the explosion area, we still need to pay attention to the surveillance of the Flying Mantis.

It is a kind of insect that can fly and spray strong acid, but the number is rare..."

Su Xiao raised his hand and interrupted Old Baal.

"After passing through the explosion area, that compass belongs to me."

Su Xiao's request made Old Baal hesitate.

"No, I have to get the renewal egg."

"Then the cooperation ends here."

Su Xiao did not hesitate to get up and walk out. It might be too late if Old Baal obtained the so-called Regeneration Egg.

"Wait."

Old Baal pondered.

"No problem."

Carlo, who had always been silent, spoke.

Carlo did not have a strong sense of presence. If he had not taken the initiative to speak, no one would have noticed him. He was like a potted plant.

At first, people might have glanced at him, but they would not have noticed him after that.

Su Xiao had already walked to the door of the stone house and stopped.

"After passing through the explosion area, the compass belongs to you."

After the deal was completed, Su Xiao, Old Baal, and Carlo went deep into the insect nest. After passing through the explosion area, Old Baal handed over the compass.

Although the deal was completed, Su Xiao was not relaxed in his heart.

Old Baal surprised him. His bottom line was to obtain the compass after entering the bug nest.

He was determined to obtain the compass. Without the compass, he would not be able to find the cliff stone bridge quickly.

If he could not find the cliff stone bridge, he would not be able to leave the Red Earth Region.

"When are we leaving?"

While the three of them were negotiating, the large army outside had already set out. Old Baal's fourth son led this war.

"Let's go now."

The route and action plan had already been planned, but the plan could not keep up with the changes. Old Baal's plan was mostly to adapt to the situation.

"The Regeneration Egg is next to the Zerg Queen. Remember, don't be seduced by her."

"Huh?"

Su Xiao looked at Old Baal in confusion.

"You will understand when you see the Zerg Queen, that kind of tempting feeling..."

Old Baal said no more, and several people quickly left the Yosenman tribe.

The distance between the Yosenman Tribe and the Zerg was not close, but the three people had their ways of traveling.

Carlo and Old Baal each rode a creature similar to a horse. This creature was called the hoof, a predatory animal, and had great endurance. After taming it, it was a very good tool to travel.

The three people had to circle a big circle around the main battlefield and enter the nest from the back of the nest.

After circling for two hours, Su Xiao arrived at a wetland, the rear of the Zerg.

In the distance, there was a faint sound of shouting and killing, and the Yosenman Tribe and the Zerg had already fought.

A faint fishy sweet smell came. Looking into the distance, several oval-shaped buildings came into view.

These buildings were all green. If one looked closely, one would find that these buildings were trembling slightly, and blood vessels could be vaguely seen on the surface.

There were five insect nests, one big and four small.

The small one had a diameter of about ten meters. The largest insect nest was like a castle. It was more than ten meters high and covered an area about the size of a football field.

"We are going deep into the largest insect nest. The eggs are there."

Old Baal jumped down from the back of the hooves and looked at the insect nest.

The five bug nests all had their functions. The biggest one was the queen's residence, called the mother nest. Many sting scorpions or higher insects were protecting the queen.

The remaining four bug nests were: ovum pool (for violent soldiers), biological detection organization (alert), anti-air tower (for air units), and evolution site (producing high-level insects).

Old Baal's goal was to invade the mother's nest and seize the eggs.

However, the three of them were still a distance away from the bug nest, and they needed to pass through the explosion area first.

Chapter 463: Ring Break

Su Xiao looked at the flatland in front of him. The vegetation here clearly showed signs of being eaten by animals.

"This is the explosion area?"

"Yes, this is it."

Old Baal looked at a pit in the distance. "Do you see that pit?"

"What?"

"My most respected brother was killed there. He was a warrior who stole the egg of Baham."

Su Xiao's pupils slightly contracted. Someone dared to steal the egg of Baham, but he did not think about it. He also beat the baby Baham a few times before.

"Carlo, how many more times do we have left today?"

Old Baal looked at Carlo.

"Five times."

"Alright, then you take the lead."

As soon as Old Baal's voice fell, Carlo walked like an explosion area.

Carlo's expression was dull, and he did not care that he would step on the explosive ants, so he walked straight forward.

Old Baal followed, Su Xiao followed behind Old Baal, and Bobowang walked at the end.

"Click"

A crisp sound came from the front, and Carlo, walking at the front, stopped.

Pu!

A wave of air spread out, and the airwave blew Su Xiao's clothes. A broken leg whistled past him, and it was Carlo's leg.

Carlo stepped on the explosive ant. Although there was an explosion, it did not make too much sound, as if he stepped on a gas sac.

Slapping the soil on his head, Su Xiao looked to the side.

A big pit with a diameter of three meters appeared, and the inside of the big pit was Carlo, who was only left with his upper body after being blown up.

"My luck is not very good."

Old Baal sighed and went forward to drag Carlo out of the pit. He took out the stomach sac of an animal from the back waist, which was a water bag.

He opened the water bag.

Old Baal poured out a light red liquid from the water bag and directly onto Carlo's withered face.

The plant roots in Carlo's cheeks began to tremble. His eyes suddenly opened.

Ka.

As if a plant was regenerating, the lower half of Carlo's body gradually regenerated.

After more than ten seconds, Carlo got up and continued walking forward.

Su Xiao noticed that Carlo had become shorter. The former Carlo was at least three meters tall, and now it was at most two and seven meters tall.

Although Carlo and Old Baal were suspicious, Su Xiao did not ask.

The team continued to move forward. No one spoke, Carlo was scouting ahead, stepping on the explosive ants from time to time.

Su Xiao, who followed behind, held a small bag in his hand, which contained gunpowder. This was obtained after dismantling the spider queen's bullet.

He sprinkled a small amount of gunpowder on the route along the way. Although he could not see the gunpowder with his sight, Bobowang could smell the gunpowder, so he had a safe route when he returned.

After two-thirds of the way into the explosive area, Carlo stepped on the explosive ants again and stopped moving after recovering.

"I used up all the numbers."

Carlo had already been blown to pieces five times, so he stood there like a log, no longer taking a step forward.

Old Baal asked tentatively, "How many times do you want to use it?"

"No, I will die. It will hurt."

Carlo refused flatly, and Old Baal was a little helpless.

"My dear ally, look..."

Old Baal looked at Su Xiao.

"I can't help it. I can't sense the location of the explosive ant."

Su Xiao did not lie. He could not sense the location of the explosive ant.

Old Baal hesitated for a while. He walked in front of everyone. The reason why Old Baal cooperated with Su Xiao was to borrow Su Xiao's exquisite sword skills.

At this time, the Zerg had already noticed the invasion of several people. After a distance, the Zerg Queen would send subordinates to attack several people.

At that time, the mother nest will be completely sealed. If you want to enter the mother nest, you can only break it by force. Old Baal tried many ways but failed.

Until he saw Su Xiao's sharp slash on the battlefield, Old Baal decided to cooperate with Su Xiao.

This time, Old Baal, this old fox, scouted the way. This older man was not as honest as Carlo. He bent over and had to check for a long time with each step.

Su Xiao, who followed behind, was a little puzzled. There were so many people in the Assenman Tribe. Why did Old Baal not bring many people to explore the way?

It was not that Old Baal did not want to find people to explore the way. Although he was the leader of the Assenman Tribe, the inside of the Assenman Tribe was not a metal bucket. Many people covered his position.

If the people of the tribe knew that he had already intended to obtain the Regeneration Egg, he would not be able to continue being the leader.

Although the Regeneration Egg was a way to live for the Blood Vine warriors, it would be disregarded by others.

The destination of the Blood Vine warriors was to return to the sun, commonly known as self-destruct ---.

Old Baal did not want to self-destruct and die, so he risked coming to the Zerg to obtain the Regeneration Egg.

Old Baal stopped after taking a few steps. He seemed to be hesitating.

"The number of explosive ants is abnormal."

Old Baal squatted on the ground and observed the soil before him.

"There's no other way. I can only use that move. I hope my body can still withstand it."

As he spoke, Old Baal stretched out his withered palm.

Ka.

Old Baal's five fingers naturally fell off and fell to the ground.

After his five fingers landed, they immediately sank into the soil. In less than a minute, five vines broke through the soil.

After the five vines grew to dozens of centimeters high, they gradually took human form.

'Pop'

The vines' roots broke, and the five vines formed a human shape, turning into five small people woven from vines, staggering forward.

At this time, Old Baal was breathing heavily, gulping down large mouthfuls of red liquid, and a heatwave spread around him.

The small vine man leading the way was much safer to advance.

Ten minutes later, only two small vine people were left, and the three people walked to the end of the explosion area.

The explosion area was only the outermost area of the insect nest, and the road after that would be more dangerous.

Old Baal's fingers had been regenerated, but Su Xiao found that the temperature near him was getting higher and higher.

Su Xiao subconsciously stayed away from Old Baal. He suspected that this older man would explode at any time.

At this moment, Old Baal's gaze could only be described as savage, like a cornered wild beast.

"Continue forward, charge straight ahead."

Old Baal stared at the enormous mother nest in the distance. The entrance to the mother nest had already been sealed.

The sound of armor colliding could be heard, and many sting scorpions surrounded them.

There were hundreds of sting scorpions, and these sting scorpions could not stop a few of them.

It was not without reason that Old Baal had chosen to invade the mother nest at this time. At this time, the insect race needed to storm out in front of the battlefield, and the rear would be empty.

"Roar!"

The sting scorpion covered in a black shell roared, its entire body emitting a sour smell.

"I need to cool down, so please."

Old Baal took out a compass and hesitated before throwing it to Su Xiao.

After catching the compass, Su Xiao smiled. He had a way out. After that, he would fight if he wanted to.

He would retreat if he wanted to, but there should be a lot of benefits in the insect nest. He would not retreat now.

"This is the attitude of cooperation."

Su Xiao pulled out the dragon flash on his waist, and the sting scorpion rushed from all directions. The sour smell on the body of the sting scorpion was even more pungent. Su Xiao killed the sting scorpion within three meters with a few strokes.

Broken limbs and green blood splashed, but this was nothing to hundreds of sting scorpions at all. Su Xiao also found this, so he stopped slashing.

"Get down."

Under the surprised eyes of Old Baal. Su Xiao sheathed the dragon flash and took a deep breath.

"Ring break."

Clang.

The Beheading Dragon flashed out of its sheath, and a white blade light spread out. The blade light was very thin, forming a circle and rapidly spreading around.

The circular blade light dissipated after spreading out for more than ten meters, and the surrounding sting scorpions were all in a state of silence.

Chapter 464: Nemesis

Plop, plop...

The sound of falling came one after another, and hundreds of stingy scorpions fell to the ground. Green blood stained the surrounding land.

The land near the bug nest was very special, covered by green moss.

This was a facility of the Zerg called decomposing bacteria. The creatures that died on the decomposing bacteria would soon be decomposed, and the nutrients obtained would be transmitted back to the mother nest.

Killing hundreds of sting scorpions in one move, not to mention Old Baal and others, even Su Xiao himself was a little surprised.

He suddenly had a feeling that he was not fast enough to rush over. Although it consumed a lot of physical strength to cut this sword, the power was beyond imagination.

Steady breathing, Su Xiao was inevitably excited in his heart. The higher the level of the sword technique, the more magical it was.

He could now use some supernatural moves, and it was self-created.

There was a gulu sound. Thousands of sting scorpions climbed out of the egg pool, and the egg pool withered by a third.

"One more time."

Old Baal lay on the ground, looking at Su Xiao with excitement in his eyes.

"Impossible. This kind of move can not be used continuously."

Although the move just now was very strong, it had a lot of burden on the arm, and it could not be used more than three times a day.

"Then what should I do? I am at least 160 degrees now, Carlo."

Old Baal looked at Carlo. Carlo spat out a mouthful of steam. He had already exceeded 200 degrees.

Old Baal smiled and looked at Su Xiao again.

"Byakuya, please, my ally."

Old Barr took out two crystal clear crystals from his arms. Those were soul crystals (middle).

"Take me into the bug nest. I have no ill intentions towards you. I want to live. I know you are a contractor, and you come from a mysterious place."

Old Baal directly revealed his cards. He did not want to. According to his original plan, he wanted to kill in the nest with Su Xiao.

He somewhat overestimated the endurance of his body. Now his body temperature was more than 160 degrees. The blood vine warrior's body temperature would explode above 210 degrees.

Help me get the Regeneration Egg,

I will let you see what many contractors dream of seeing!

Old Baal finally showed his sincerity.

[Note: You have triggered a secret mission: Sun Tribe.]

[Sun Tribe]

[Difficulty Level: Lv.16]

[Mission summary: Understanding the secret of the Blood Vine Warrior.]

[Mission information: Understanding the secret of the Blood Vine Warrior requires the guidance of Old Barr]

[Mission deadline: 3 days.]

[Mission reward: This is a chain mission. The reward will be given according to the completion rate of the mission.]

[Mission penalty: None.]

...

After seeing the hidden task triggered, Su Xiao's eyes flashed. The rewards of the hidden task were very rich. And the gold content was very high, and the rare items would be rewarded.

Old Baal must have had ulterior motives before, and under the pressure of the situation, Old Baal had to be honest.

"Not bad."

Su Xiao took the two soul crystals in Old Baal's hands (middle).

"Traitor."

Carlo glared at Old Baal. Old Baal was instantly enraged.

"Bullshit! Don't you want to live? If you want to live, then don't pretend to be me. The honor of the tribe, go to hell. If you weren't my' eldest son, 'I would have killed you long ago."

Old Baal slapped Carlo in the face, sending the green leaves on Carlo's face flying.

"Afraid of death."

Pa.

Another big slap, Old Baal glared at Carlo.

"As long as I can live with my tribesmen, I can throw away any bullshit honor. The Sun Tribe has pursued honor, and now they are all dead."

Being slapped a few times by Old Baal, Carlo was even more stunned. Su Xiao suspected that this child was beaten silly by his father.

The precarious cooperation relationship was a little closer. Although Old Baal still had many secrets, the two sides had officially allied and had witnessed the reincarnation paradise.

The sword radiance was unstoppable. When Old Baal slapped Carlo, Su Xiao had already begun to clear the sting scorpions around him.

"Cross."

Su Xiao cut two swords out of thin air, and a cross blade formed in the air.

The blade light slashed forward, and the sting scorpions along the way were broken.

"Go."

Su Xiao rushed forward quickly, Old Baal grabbed Carlo and followed behind, Bobowang brought up the rear.

Along the way, the knife light flashed. Su Xiao killed thousands of sting scorpions and directly killed a road of blood.

A sting scorpion pounced at Bobowang, Bobowang just wanted to counterattack, and a wooden thorn attacked.

Pu, the wooden thorn pierced into the body of the sting scorpion, and the body of the sting scorpion exploded. If looked carefully, the body structure of this sting scorpion had changed from an animal to a plant.

Old Baal breathed heavily, and a smile appeared on his old face.

"Are you alright?"

Old Baal's body temperature was getting higher and higher.

"Woof."

Bobowang barked, and the Ice Goddess covered Old Baal's body.

Old Baal's body temperature quickly dropped, which had reached 190 degrees. Not long after, his body temperature dropped to 150 degrees.

Old Baal was stunned, looking at Bobowang with surprise in his eyes.

Su Xiao, who was the team leader, stopped the sword radiance that was about to be released. It seemed that Old Baal was going to show more sincerity.

The team was harmonious, but don't be naive. This kind of harmony might only last until obtaining the Regeneration Egg.

Su Xiao felt that his son, Carlo, was even more untrustworthy compared to Old Baal.

Although Old Baal was an old fox, he had a clear purpose. Carlo was different. Su Xiao vaguely saw the will to die and madness in the eyes of the other party.

Old Baal recovered his combat strength. His fighting method was to produce a wooden thorn from his arm. All the creatures that he stabbed would have their body structure changed.

From living creatures to plant structures, the lethality was extremely strong.

More importantly, any sting scorpion that Old Baal stabbed would surround him and listen to his commands after leaves growing on their bodies.

After the old Baal and Carlo recovered their fighting strength, the speed of the surprise attack increased, and the sting scorpion could not stop several people from breaking out.

Two minutes later, Su Xiao took the lead and rushed to the front of the mother nest. Standing in front of the mother nest, Su Xiao shouted to the old Baal behind him, "Block them."

"No problem."

Old Baal put his hands together, and the more than a dozen plant sting scorpions around him formed a protective circle, biting together with the sting scorpions that rushed over.

Su Xiao pressed his hand on the wall of the mother nest, the wall of the mother nest had a touch of a meat wall, and there were still meridians on the surface.

A knife cut on the outer wall of the mother nest, green liquid splashed, and unexpectedly, although the dragon flash broke the defense, the wound was not deep.

Su Xiao's body relaxed, and the hand holding the knife naturally hung down.

"How much longer do you need?"

Old Baal's body temperature soared again, directly reaching 200 degrees. His lips began to crack, and his eyes were like two small suns.

"Twenty seconds."

Su Xiao was adjusting to his state.

"I can only give it my all. I hope I can hold on."

Old Baal kicked away a scorpion that pounced at him. He straightened his arm and pushed his palm forward.

"Light of the Sun."

Old Baal's palm released a bright light, and an astonishing heat spread out.

Pa! Pa! Pa! Pa!

The sting scorpions in front of Old Baal exploded. Flames rose, and in an instant, the two to three hundred sting scorpions in front of him turned into charcoal.

However, the sting scorpions around them were already densely packed. The Zerg Queen sensed the danger and began to attack wildly.

Clang!

The sound of the knife came. Although Old Baal did not see Su Xiao's attack, he knew how strong the knife was from the sharp feeling behind him.

A wound with a diameter of five meters appeared on the outside wall of the nest, and Su Xiao rushed into the nest first.

If Old Baal was looking for the Regeneration Egg, Su Xiao was here to rob the Zerg. Old Baal was just a guide for him, and both sides needed it.

Three people and a dog rushed into the nest, and the sting scorpion outside stopped outside the nest, not daring to take a step out of the thunder.

...

In the depths of the mother nest, a beautiful woman was closing her eyes to sense. This beautiful woman had a golden number 8 on the back of her hand.

This was the mark of the competition king, representing her ranking in the arena.

The beautiful woman was called Ada. Ada opened her eyes, and a gold coin flipped between her. She looked at a gorgeous insect egg not far away.

"Zerg Queen, they've come in. One of them is similar to me."

Ada was not the Zerg Queen, and the queen was resting.

"My friends, please help me stop them."

The queen's voice was very gentle, which gave people a good feeling.

Ada shook her head.

"Even though you put it that way, that fellow is a little strong. Moreover, he is covered in blood and energy. He is not to be trifled with. I do not wish to become enemies with a fellow like him for no reason. There is no conflict between the two of us."

The Zerg Queen was silent for a while before she spoke after a long time.

"I have agreed to that matter."

"Bingo, I'll be back soon. If I don't come back, I'm dead or have escaped. You can choose to escape back to the void."

The queen inside the insect egg sighed.

"You must come back, my friend. You are the human who keeps her promises the most."

Ada stood up and let out bell-like laughter. Although Ada was ranked eighth in the arena, she did not feel arrogant and was very modest.

"Who knows? However, I am the Luck Goddess."

Halfway through her words, Ada might have felt that she was in the middle of her sentence.

"Eh ---, the fake Luck Goddess, haha ---"

Ada was not lying. She was an elder of the Luck attribute, the nemesis of Black Chief!

Chapter 465: Elite Scorpion

Boom!

An explosion came from the mother's nest.

Su Xiao walked in a corridor of a biological structure. The feeling under his feet was like stepping on rubber, and there was mucus dripping from above from time to time.

Feeling around, the structure of the mother nest was very complicated. Just like a large ant nest, it was everywhere. If you did not understand the terrain, you would get lost soon.

Five minutes ago, he was separated from Old Baal and Carlo. Rather than being separated, it was more appropriate to be separated by the Zerg.

Su Xiao pulled out a nail leg stuck in his lower abdomen and drank a bottle of secret alchemy medicine.

"Can you determine the location?"

Su Xiao looked at Bobowang.

Bobowang's nose twitched, and the smell of the mother nest made Bobowang sneeze. The dog's face made a helpless expression.

There were too many insects in the mother nest, and the number of sting scorpions was at least a few thousand. The dangerous ones were not stinging scorpions but a type of insect called Flying Mantis.

The Flying Mantis looked similar to sting scorpions. And their bodies were even thinner, and they had a pair of fleshy wings that could fly low.

It would be fine if they encountered this insect in the mother nest's passageway, but it was very troublesome in the open.

The extended attributes of this kind of Zerg were not strong, but they could spray strong acid, and the lethality of strong acid was very strong. The flying mantis scattered Su Xiao and others.

Su Xiao continued to move forward. Although there was no sense of direction in the nest, he walked in that direction where there was fighting.

Two minutes later, Su Xiao came to the open space.

There were many eggs in the open space. These eggs were milky white, and creatures were squirming inside.

In the center of the open space, Su Xiao saw a few broken branches of plants, and there were traces of being burned nearby.

Old Baal and others had fought with the Zerg here before, and they were injured. There was red blood on the ground.

Now Old Baal and others had left. Old Baal and the others left in a hurry from the big hole that was burned on the side.

Su Xiao wanted to meet with Old Baal. The reason was very simple. He did not understand the terrain here.

The sound of water dripping came, Su Xiao's pupils contracted, and he jumped back subconsciously.

Puff.

Green liquid gushed out, and a shadow rushed down from above, and the big pincers of the tail were deeply stabbed into the nest's ground.

This was a sting scorpion, different from ordinary sting scorpions. This sting scorpion was a few times larger, and its carapace was purple.

Su Xiao felt that this sting scorpion was very wrong. He immediately used the information of the other party.

The information was as follows:

Name: Elite sting scorpion

[Type: Insect Clan]

[HP: 100]

[Mana: 290]

[Strength: 42]

Agility: 45

Stamina: 29

Intelligence: 11

Charm: 1

[Skill 1: External Bones Level 7, HP +260, Defense +9]

[Skill 2: Acid Blood Level 5, Blood has a strong corrosive effect.]

[Skill 3: Individual, Mutant of the sting scorpion, responsible for protecting the Queen's safety and having a brain.]

[Skill 4: Tail Sting Level 12. When the tail stabs forward with all its strength, it will cause a huge wound to the enemy. At the same time, it will have a broken bone and bleeding effect.]

Skill 5: Combat instinct. Using instinct to fight, the whole body is a weapon.

...

Without a doubt, the elite sting scorpion was very strong. More importantly, this guy had independent thinking and would not rampage like the other sting scorpions.

The elite sting scorpion had a total of five skills. In Su Xiao's view, the most troublesome was 'combat instinct.'

The body structure of the sting scorpion was born for fighting. After obtaining this skill, its combat effectiveness would be off the charts.

The green steel shadow was activated to the maximum, and now there was no need to think about saving physical strength.

The elite sting scorpion pulled out the tail pincer from the ground, shook the green liquid on it, and moved sideways, trying to go around Su Xiao's side, knowing how to sneak attack and know how to tactics.

The elite sting scorpion stared at Su Xiao with its eyes wrapped in transparent shells.

There was cruelty and anger in those eyes.

Seeing this kind of gaze, Su Xiao looked more serious. This thing had wisdom, and the degree of danger would be multiplied.

Su Xiao suddenly had an idea in his heart. This thing might be the personal guard of the Zerg Queen. Otherwise, it would not be so strong.

He might be very close to the Zerg Queen if it were really like that.

Su Xiao did not guess wrong. The elite sting scorpion was indeed the guard of the Zerg Queen. The Zerg Queen was there just now, and she had fought with Old Baal and others.

Bobowang found that the battle was about to begin, and his figure was agile as he hid in the egg. His aura was fully activated, and he was deep in the battle like the healer.

Just as Su Xiao was ready to fight this elite sting scorpion, the sound of fast running came from the side passage.

Looking closely, it was Old Baal and Carlo. The two were in a sorry state. And their bodies were steaming hot, and their body temperature was above 190 degrees.

After seeing Su Xiao, Old Baal had a happy expression. After noticing the elite sting scorpion, Old Baal and Carlo both braked simultaneously.

Old Baal and the other two were being chased, and the ones chasing them were ten elite sting scorpions and five flying mantises.

Su Xiao calmly put away the knife, and after making a color to the cloth woad on the side, one person and one dog broke into a run. It could be said that they were in sync.

He could deal with five elite sting scorpions within five, which would be troublesome if more than five.

Old Barr opened his mouth and looked at Su Xiao blankly.

When Old Baal reacted, Su Xiao and Bobowang had already run far away.

"Allies, wait for me."

Old Baal shouted with a trembling voice. Su Xiao ran too decisively. He just wanted Su Xiao to help him block these sting scorpions. Old Baal thought too much.

Su Xiao would not help him block them.

The threat of elite sting scorpions was behind him, and Old Baal ran.

Su Xiao was in front, Bobowang was behind, Old Baal and Carlo were slightly behind, and finally, they ran together and hissed.

The mother nest became a mess in an instant. Su Xiao threw out a special-class alchemy bomb from time to time, but the elite sting scorpion was not afraid and rushed forward with the bomb.

Su Xiao threw another bomb and screamed from the back.

There were two forks in the road in front, Su Xiao found one and rushed in, but he did not expect that there were three forks in front of him when he just rushed to the fork.

Elite sting scorpions were chasing behind, and Su Xiao could only choose randomly again.

Old Baal also faced the same situation, so the three people who had just met separated again. This time the situation was even worse. Su Xiao and Bobowang ran away.

Fortunately, Bobowang could sense Su Xiao's position. As long as he did not encounter any danger, Bobowang could find Su Xiao.

Even if he encountered danger, it was nothing. Bobowang could enter the enemy. Pretending to be a sting scorpion was just a drizzle.

After running for a distance, Su Xiao stopped. He came to a special position.

If the nest just now was a biological structure and was the style of the Zerg, then the scene now had a huge change. There was a corridor with a steel structure around it.

It turned from a Zerg drama into a sci-fi style.

The hint of the reincarnation paradise suddenly appeared. Su Xiao was stunned. There was a sky spaceship wrapped in the nest.

Chapter 466: Unlucky

Su Xiao walked forward slowly. The area of the spaceship was not small. It seemed that it had not been activated for many years.

Some electronic devices were damaged, and there were electric sparks from time to time.

The Zerg came from the void, and it was normal to have a spaceship in the nest.

According to Su Xiao's understanding, the void was a very vast place. There were all kinds of races living there. Some of them were advanced, and some of them were strong.

...

Walking in the spaceship, there was no Zerg here. Moving forward for hundreds of meters, Su Xiao came to the main cabin of the spaceship.

"Get out, and this is my home."

The electronic voice came. Su Xiao looked up. The voice came from a screen full of snowflakes.

"Are you the smart system of the spaceship?"

"No, I am the Zerg Queen."

The voice was a little angry, and it seemed to be very dissatisfied with Su Xiao's behavior of entering the spaceship.

"Those two aboriginals are your companions. Regeneration eggs are very important to me. It is impossible to provide them to you.

And stop this stupid, meaningless war. I can annihilate you at any time. If not for the mistake of driving the spaceship, I would not have landed on this planet at all."

The voice of the Zerg Queen 'female driver' was very confident. It seemed that she did not regard the Yosenman Tribe as an opponent. She did not know who had fought with the other for hundreds of years.

"Oh? Since you are so strong, why don't you destroy the Yosenman Tribe?"

The Zerg Queen was a little speechless.

"The war has been going on for hundreds of years. As a Zerg, you can't destroy the Yosenman Tribe. What are you afraid of?"

"You don't need to know."

Hearing the answer of the Zerg Queen, Su Xiao shook his head.

"You are afraid of a woman with golden flames all over her body, right?"

As soon as he said this, the voice of the Zerg Queen was hurried.

"Where is the blue pool..."

"Ha?"

Su Xiao was stunned, and many thoughts came into his mind.

Just now, the Zerg Queen said, 'blue pool.' The Zerg could not say this word in the void. It seemed that the other party had contact with the contractors.

"It's getting more and more interesting. I am suddenly very interested in you."

Su Xiao said a very ordinary sentence, but the Zerg Queen was instantly furious.

"You hateful male humans, why are these damn words very similar to what the crazy sword devil said? Is it my fault for being born charming? Why did you bring the army to attack my home for no reason? That damn sword devil said that the woman I like couldn't run away.

I have also escaped for hundreds of years, crazy, abnormal, a pervert who killed billions of creatures without batting an eyelid!"

This series of roars made Su Xiao more confused, but he noticed some information. This Zerg Queen should be fancied by a powerful existence in the void and then went to rob.

The Zerg Queen escaped. During the run, because of the soul of the female driver, the spaceship had an accident and finally landed on this planet and trembled.

There was one thing that Su Xiao could not figure out before that was how could the void Zerg not destroy the Yosenman tribe.

Now it seemed that the void Zerg came to avoid disaster, they did not dare to make too much noise at all, and they did not dare to expand on a large scale.

"You are dead. I will destroy you..."

Chi Chi.

The sound of the screen disappeared and turned into noise. Su Xiao had found the core energy of the spaceship and took it down.

Su Xiao looked at the core energy in his hand. This thing was useless to him, so he sold it decisively.

Seeing the number of the source of the world, Su Xiao frowned. The price of this thing was quite high. Just this 12 percent of the source of the world was worth him to come to the Zerg.

...

At the core of the nest, a 'girl' with purple patterns on her neck was gasping.

Unlike what he had imagined, the Queen of the Bug Race looked like a human. She did not have a shell on her body, but her ears were slightly sharp, and she had two tentacles on her head.

The Queen of the Bug Race calmed her breathing. Her amber eyes were filled with helplessness.

She was called Ya.

She was 806 years old. To the Bug Race, she was around 20 years old.

"Other than Ada, humans have nothing good."

Ya suddenly hugged her shoulders as if thinking of something, and some memories flashed through her mind.

The lightning pierced through space, the army that laughed wantonly like bandits, the mother planet that had been cut open by a single sword, the tens of billions of intelligent insects that had shrunk to the ground and did not dare to move.

Resistance would be slaughtered, and even if they did not resist, more than half of them would be slaughtered. What kind of bullshit rule was this?

"Crazy."

Ya's eyes were filled with hatred, and the words of her enemy echoed in his ears.

"You are too weak. You are so weak that there is no use other than playing with you. The strong live, the weak die.

No matter where it is, this is the rule. By the way, tell your king that her claws are too long."

The strong live, the weak die. This was the rule of the insect race. However, Ya never thought that the strong live, the weak die to such a level of brutality and slaughter billions of creatures.

"It is said that the bastard disappeared. Great, I hope he dies in the Black Abyss."

The Zerg Queen raised her head.

"That damned rat named Sir Mouse is on this planet. After that rat leaves, we have to move immediately. We have accumulated enough energy."

...

In the middle of the nest, in the spaceship.

Su Xiao had just sold the core energy, and there was a 'customer' coming to the spaceship. It was two elite sting scorpions.

At this time, he was fighting with two elite sting scorpions. The battle had lasted for a few minutes.

Su Xiao's chin dripped blood, but the two elite sting scorpions were only slightly injured.

It was reasonable to say that Su Xiao could easily deal with two elite sting scorpions, but it was not the case.

It was not that the strength of the elite sting scorpion was too strong, but after the beginning of the battle, Su Xiao began to be depressed.

Thirty seconds after the battle began when Su Xiao was about to kill an elite sting scorpion, an iron plate on the top of the spaceship fell. He could only avoid it, so he missed the opportunity.

In a minute of the battle, the spaceship console near him exploded. This thing did not explode for two or three hundred years, but it exploded when he was about to crush the head of an elite sting scorpion.

The battle lasted for one minute and twenty seconds, and there was a slight disintegration phenomenon in the spaceship. Su Xiao just happened to be near the gap of the disintegration, and he fell.

The battle lasted two minutes and six seconds. The ship's emergency repair program was activated, and a wrench flew out, just hitting Su Xiao on the head.

The most important thing was that Su Xiao had already realized that the wrench was flying, and he also made an evasive move, but the wrench began to fly in an arc, and the flying speed was extremely fast.

The whole ship began to target Su Xiao. No, the whole world was targeting him.

One or two times might be an accident, but how could it be an accident thirty times in a row?

Su Xiao stood in the same place with his sword and glanced around.

An elite sting scorpion rushed forward, and the big pincer of the tail attacked Su Xiao.

Su Xiao blocked the dragon flash in front of him.

Ding.

The scorpion tail smashed on the dragon flash, and a force came through the dragon flash. His body pressed down, and his center of gravity maintained balance.

While blocking the sting scorpion, he kicked the leg of the sting scorpion.

With a click, green fluid splashed, and one of the sting scorpion's legs was kicked off.

Another sting scorpion rushed over. Su Xiao turned his body to the side, dodging the other sting scorpion, and grabbed the tail of the sting scorpion with his left hand.

With all his strength, the elite sting scorpion was thrown out by him, slammed into the wall of the spaceship, and the metal wall was smashed into a huge pit.

The whistling wind came from behind, Su Xiao's mouth twitched, and he immediately jumped away.

Clang!

Several tons of iron bars fell in the air. He would have been pressed under the iron bar if he did not dodge in time.

Chapter 467: I've Never Seen Such an Unlucky Person

Su Xiao glanced at the remaining HP, and a potion bottle slid out of his sleeve.

He opened the potion and poured the potion into his mouth. Just as he was about to swallow it, he felt a burning pain.

"Cough, cough, cough."

The potion poured into his mouth was sprayed out, and Su Xiao choked.

Having experienced this situation before, Su Xiao had never heard of it before. He choked on the potion while drinking it.

Just as Su Xiao coughed, the two sting scorpions moved forward. The two elite sting scorpions cooperated silently, and their vitality was extremely tenacious.

Su Xiao realized that the current situation was not right, very wrong. He could not continue like this. Otherwise, he might die in the hands of the two elite sting scorpions.

His aura began to change, and at this time, there was the sound of a foot stepping on the metal ground around him.

Five elite sting scorpions slowly walked out, adding the two now, a total of seven.

"It seems that I can only use that move."

Su Xiao glanced at the remaining Mana values, and there were more than 1000 points, enough.

The green steel shadow energy wrapped in dragon flash began to change. It seemed to be vibrating at high speed.

The Mana values in Su Xiao's body were quickly consumed, 100 points, 200 points, and 300 points, until after consuming 1000 points, the consumption of Mana values stopped.

Buzz ---.

The ear-piercing buzzing sound came, turning the dragon flash into a high-speed vibrating electric blade.

Su Xiao had tried to develop the blue steel shadow energy, but the development direction was sharp.

The blue steel shadow did not have sharp attributes, and his idea was to make the blue steel shadow energy vibrate.

Countless attempts failed. The reason was that the energy vibration frequency of continuous transmission was different, causing the energy to dissipate very quickly.

Just a while ago, Su Xiao had an idea. Since he could not continue to transfer energy, what would happen if he sent a large amount of energy?

The answer was to consume a lot of Mana values, but the green steel shadow energy successfully vibrated!

Seven elite sting scorpions surrounded Su Xiao, almost desperate. Before the elite sting scorpions rushed forward, Su Xiao took the initiative to rush forward.

Taking two steps to the front of an elite scorpion, Su Xiao slashed out.

The purple quality dragon flash could not easily break through the shell of the elite scorpion, even if it had a high degree of sharpness.

Puchi.

Green blood splashed, and the dragon flash was like a piece of paper, cutting the elite scorpion's body into two pieces.

The blue light flashed, and Su Xiao moved between the elite sting scorpions at high speed.

At the same time that he killed a sting scorpion, the long sword cut on the spaceship's hull, and the special alloy hull was cut open like tofu.

Puchi, Puchi...

The dragon flashed with high-speed vibration energy dissipated ten seconds later, and Su Xiao's Mana was only 106.

Su Xiao threw away the green blood on the dragon flash. The blood formed a half-circle on the ground. Seven scattered elite sting scorpions scattered around him.

The three purple treasure chests emitted a unique light.

Su Xiao put away the three treasure chests that were palm-size. The ones he had obtained before were not opened. The reason was very simple.

If he could not use the storage space, it would become a burden once he opened a large item.

After putting away the treasure chest, Su Xiao frowned. The drop rate of the treasure chest today was a bit high. This was very abnormal.

It seemed that his bad luck had been overdrawn just now.

After dealing with seven elite sting scorpions, Su Xiao did not leave the spaceship but stood on guard.

"How did you find out? I don't even dare to breathe."

A female voice sounded. The first to appear was a white palm with a golden mark on the back of the hand.

"How is it? Are you afraid? I am the eighth-most ruthless person in the arena, so I will give you a chance to run away."

Ada walked out, playing with a gold coin in her hand. She did not take any weapons, and she smiled.

A heavy iron plate fell from the sky and hit near Su Xiao. An impact spread.

The impact blew Su Xiao's coat.

A golden number 9 could be vaguely seen in his collar.

"What a coincidence, so you are ranked ninth."

Ada saw Su Xiao's Heavenly King Mark and scratched his head.

"Although you are ninth, you should run away. I am closer to you."

Ada began to persuade Su Xiao to retreat. She did not want to appreciate Su Xiao's exquisite sword skills. She cherished her skin very much, and it was painful to be cut.

Su Xiao looked up and down at Ada. Although the other party's appearance was not beautiful, it gave people a very pleasing feeling.

"Today's luck is good. To meet the top ten contractors in the arena, I have not matched the top ten opponents in the arena for a long time."

"How long?"

Ada suddenly had an ominous premonition.

"It's just three derivative worlds."

Hearing Su Xiao's words, Ada was speechless.

Three derivative worlds were ranked ninth in the arena before, and the value of this ninth was a bit exaggerated.

When the two confronted each other, Ada seemed to think of something funny and suddenly laughed.

"Sorry, sorry, I am not laughing at what you said. I just have never seen someone as unlucky as you. I just opened the halo, and you have been unlucky 37 times in a row. This is too exaggerated, 37 times, haha ---"

Su Xiao's heart tightened. Sure enough, there was a reason why he was so unlucky before.

"I had an agreement with the Zerg Queen before and promised to help her fight the enemy. Although you are not as strong as a first-rank contractor, an agreement is an agreement and can not be violated."

Ada stopped smiling and looked at Su Xiao seriously. A wave of fluctuation spread.

After the fluctuation spread, Su Xiao immediately received a prompt.

The first halo just appeared, and the second halo followed closely.

A thin golden line connected Su Xiao to Ada. Su Xiao vaguely felt that something of his had been temporarily taken away, and a special breath was eroding his body.

...

Su Xiao's pupils contracted, and he secretly thought it was a strong skill, from 9 to 10 real damage per second.

Ada, who was on the opposite side, was stunned. She was shocked by the amazing effect of her skills.

She swore that since she got this halo, she had never seen this halo cause 10 real damage to anyone, never.

"A very strong ability."

Su Xiao stepped on the ground and rushed to Ada quickly.

Ada's white cheeks turned red. This skill used to be between 0.3 to 4 points of damage to the enemy, and this skill was the reduction effect of the momentum behind it.

Looking at the constant prompts, Ada was full of confidence. She did not have much confidence in fighting Su Xiao before, but now she found that she seemed to be able to do it.

"I can do it, well, no problem."

Ada also rushed to Su Xiao bare-handed!

Not many people dared to approach Su Xiao with bare hands, and Ada was one of them today.

Su Xiao rushed in front of Ada a few steps and slashed at Ada's throat. The high agility attribute and nerve reflex speed made his sword leave afterimages.

Ada's heart was cold. Although she knew that the sword would not hit, the feeling of sharpness on her back made her tremble a little.

Crack.

The metal ground under Su Xiao's feet suddenly broke. One of his feet sank, and the movement of the slash was deformed.

Su Xiao tried his best to keep steady, and the long sword tried to cut Ada at a tricky angle.

A few strands of black hair were cut off, and a sword light left the blade's edge and flew past Ada's neck.

Ada clenched her white fist and punched Su Xiao in the back.

Su Xiao had stepped on air before, and now his body was in the momentum of rushing forward. After being hit by Ada's fist, he rushed forward faster.

Bang.

Su Xiao hit a big pit on the metal wall.

He got up in confusion, and Su Xiao shook his head. He had a feeling that he could not exert strength, but after initial contact, he had thought of a way to deal with Ada.

Fate Redemption appeared in his hand. Su Xiao took a cigarette and lit it with his head on the side.

The battle of the fake European Emperor VS the Fake Goddess was about to begin.

Chapter 468: Emperor's Roar

The incense was lit, and Su Xiao spat out a light golden smoke.

At this moment, the luck around him gradually changed, forming two auras.

[You are eroded by the fog of fate, received 1 real damage.]

[You are eroded by the fog of fate, 0.9 real damage.]

[You are eroded by the fog of fate and received 4 real damage.]

...

Su Xiao was relieved when he saw the first two prompts, but the last hint made his heart tighten.

If luck was like air, now he was fighting with the woman for luck. Su Xiao did not care whether he was lucky, as long as he was not unlucky.

Holding a long sword, Su Xiao slowly approached the enemy.

Ada frowned, and she also found the abnormality.

"It resisted bad luck. It's a little hard to handle."

Ada took out a pair of black gloves from her arms. This black glove was soft and sewn from some animal's skin, and it was faintly emitting dark purple light.

Wearing the black gloves, Ada's body relaxed, and her eyes changed.

"I haven't fought seriously for a long time. Sure enough, luck is not reliable."

Ada tried to approach Su Xiao. She was ranked eighth in the arena, and of course, she was outstanding.

The two sides slowly approached, and when they were a few meters away, Ada suddenly rushed to Su Xiao.

The blade flashed, Ada's figure stopped, and a piece of her collar was cut off.

Su Xiao took a step back. If he was not wrong, Ada was also in close combat, and it was close combat.

Ada continued to approach Su Xiao, and Su Xiao certainly would not let the other party do as he wished.

Zi.

The sound of the metal wire retracting came, Ada's pupils contracted, and she jumped up subconsciously.

The boundary line tightened, but unfortunately, it could not entangle Ada.

Su Xiao did not care about this,

His purpose was to let Ada dodge, and it was better for the other person to jump in the air.

Rushing forward, Su Xiao and Ada always maintained a distance of two to three meters, which was the most advantageous distance to swing his sword.

Determining the landing point for Ada, Su Xiao waved his sword.

The long sword broke through the air and made a sound. If this sword hit, Ada would die.

Puchi.

Blood flew, Ada was cut in the waist by a knife, and his broken body fell to the ground with a thud, and the blood spread.

Although the knife cut Ada in the waist, Su Xiao immediately jumped back, and there was no killing hint when he cut Ada in the waist.

The soft embrace hugged Su Xiao from behind, and then there was a rapid rush.

Boom!

The back of Su Xiao's head hit the ground, his body was upside down, and his brain was buzzing.

Ada hugged Su Xiao from behind and made a backward fall.

At this moment, Ada was not injured at all. After the blow, she immediately wanted to make a continuous attack. Her long legs wrapped around Su Xiao's neck, and her elbows smashed down.

Puchi.

A long knife pierced through Ada's chest. Ada stopped her movements, and her face showed a painful expression.

With a bang, a crystal clear crystal in Ada's arms broke.

Su Xiao, who was dizzy, stood up, and the long knife in his hand kept running through Ada's chest. He could confirm that the previous knife had cut Ada's waist.

"It seems that your luck does not work."

Su Xiao turned his long sword sideways and crushed Ada's heart.

"Who knows."

A smile appeared on Ada's bloody mouth.

Bang.

A knee hit Su Xiao's back, and Su Xiao's body rushed forward a few steps.

Another Ada appeared behind him, and Ada, who he had penetrated, had turned into a scarecrow.

"Fate is so wonderful, isn't it?"

This time Ada was not unharmed, and blood oozed from her chest.

Su Xiao wiped the blood from his chin and quickly thought about the enemy's information in his mind.

Name unknown, female, age between 19 to 22 years old, the height of 1.68 meters, combat style is to reduce the enemy's lucky aura, close hugging and falling, there is a substitute skill.

Su Xiao looked at a scarecrow not far away, the scarecrow was cut in half at the waist, so it would not be wrong.

Looking at the remaining time of Fate Redemption, there was one minute and 26 seconds left, enough.

Staring at the enemy, Su Xiao rushed forward.

Su Xiao's fighting style was open wide and close. The long sword was horizontal, killing the enemy with the most violent attack.

On the other hand, Ada was very cautious when moving or attacking, and most of the time, she dodged Su Xiao's attack.

The two were tangled together. No, it should be more appropriate for Su Xiao to chase Ada.

Clang.

The spaceship wall was cut with a deep knife mark, and Ada dodged with lingering fear.

Just avoiding Su Xiao's attack, Ada suddenly felt numb under her feet, and her body fell uncontrollably.

A blood-colored metal wire appeared at her feet, and her two calves were cut off.

"Is there a mistake? I have to die again."

Ada was helpless. Although she would not die, she had to bear the pain of death.

The blade flashed, and Ada's head flew up.

After killing Ada, Su Xiao immediately put the Dragon Flash behind him.

Bang.

An elbow hit the back of Su Xiao's neck. Su Xiao was already familiar with Ada's routine.

Being attacked once was nothing. As long as Ada did not hug him, it was fine. Although the other party's embrace was soft, it was also deadly.

Ada wiped the blood on her neck, and there were no scars on her white neck.

"Why aren't you unlucky? This is not scientific."

Ada looked at Su Xiao doubtfully. The other party had not been unlucky for more than a minute, and he even cut her half to death.

Although Ada could replace death, this ability had harsh requirements. Every time it consumed 2 of the maximum HP, each derivative world could only be used 10 times, and each time it needed to pay a soul crystal (small) and other conditions.

If Ada was not lucky, this ability alone was enough to make her bankrupt.

Ignoring Ada's question, Su Xiao continued to rush to Ada. He did not believe that the other party would not die. The other party was not as simple as a first-rank contractor if that was the case.

With the long sword, Ada jumped back immediately and quickly pulled away from Su Xiao.

Su Xiao was stunned. In the past, Ada always took the initiative to move forward. 'Before death' would counterattack him once, and 'after resurrection' would attack him.

The other party took the initiative to retreat only showed one thing: the number of times the other party's resurrection was not many, or it had reached the upper limit of use.

Su Xiao had dealt with similar enemies. The artificial human had the same ability as Ada, but Ada's ability was higher.

Just as Su Xiao rushed to Ada for the ninth time, a large hydraulic tube exploded beside him.

Boom!

The strong momentum pushed Su Xiao back a few steps, and a sharp steel plate flashed in front of his eyes.

[The fog of fate has eroded you, and you have received 9 points of real damage.]

Seeing this blood-red prompt, Su Xiao sighed. The effect of Fate Redemption had ended.

Although the effect of Fate Redemption disappeared, Ada was not feeling well. She did not dare to approach Su Xiao.

Su Xiao's sharp slash made Ada very afraid, not to mention that Su Xiao only cut the vital parts, and the green steel shadow energy made Ada 'want to die'. She was in so painful that she almost lost control.

Chapter 469: Absolute Strength

"If I'm not wrong, your state of increasing luck has disappeared."

Ada took off the black gloves, and the sweat had soaked through her shirt. It could be said that she had great benefits. She did not have the habit of wearing a corset.

"So?"

Su Xiao closely perceived the surroundings. From now on, his enemy was not only Ada but everything around him. It might be a rubber tube or a rivet.

"So I finally don't have to be chased and chopped by you. It hurts so much!"

Ada touched her neck. She had been beheaded three times before.

"Your brain is not normal. Why do you always like to chop off your head? It hurts so much. I almost peed in pain."

Ada took out a gold coin and threw it up high.

"Words."

When the gold coin fell into Ada's hand, it was indeed a word.

"Very good. This way, you won't be able to hurt me."

Zheng.

A sword light flew past Ada's neck. She was almost beheaded for the fourth time. If she were beheaded this time, she would die.

The battle continued, and Su Xiao's enemy turned from Ada to the whole flying ship.

Boom... Boom.

The roar came from the spaceship, and there were sounds of cutting and explosions in the spaceship.

Ten minutes later, a figure flew out of the spaceship quickly, fell on the ground, and rolled a few times before stopping. It was Ada, who was covered in blood.

Ada's arm was cut off, and the green steel shadow energy invaded her body. She twitched in pain.

"It turns out that strength can offset luck, and this is the ninth place in the arena? The ninth is not so strong."

Ada got up and looked at the spaceship that had been broken. Su Xiao almost destroyed the entire spaceship!

Bang.

A piece of iron plate was kicked away, and Su Xiao walked out of the metal ruins.

A metal valve fell on the ruins and smashed on Su Xiao's head. He did not care. In the previous ten minutes, this was a common thing.

"Kill you!"

Su Xiao spat out a mouthful of blood saliva and walked toward Ada.

"Is there a mistake? Why isn't he dead yet?"

Ada threw up the gold coin in his hand.

"Words."

The gold coin fell into Ada's hand, but unfortunately, it was the face of flowers.

Ada's face changed, which meant that her luck was used up.

At the same time, Su Xiao received a strange prompt.

After receiving this prompt, Su Xiao was stunned and turned overjoyed. From the literal meaning, he finally did not have to be unlucky.

"Haha, this handsome brother who disappeared, sorry to disturb you."

Ada turned and fled. She could deal with Su Xiao, who was plagued by bad luck, but she could only escape facing Su Xiao, who was full of luck.

Su Xiao quickly chased, but his physical strength consumption was serious. It was physical work to cut a spaceship, and he had to deal with Ada.

Su Xiao would not be willing to let Ada escape like this. He returned the Dragon Slash to the sheath and pulled out the black and white double guns.

He raised his gun and aimed. Because Ada had run far away, Su Xiao did not start the continuous shooting.

Bang.

A bullet was fired. With Su Xiao's marksmanship, this distance was completely according to fate.

A blood flower burst from Ada's buttocks, and tears appeared in her eyes.

"It hurts ---"

Ada continued to run with a limp.

Su Xiao, who was holding two guns, was slightly surprised. He had just shot randomly.

Bang.

Another bullet was fired, and there was a burst of blood at Ada's waist. A kidney explosion hit her.

It was still shooting according to fate, and it was still hit.

Bang, bang, bang.

Su Xiao fired three shots in a row. Ada, in the distance, directly fell to the ground. All three shots were hit! One of the bullets was too slanted, but the bullet hit a piece of iron plate and shot.

This bullet could hit the target completely by luck.

First of all, the iron plate was the one that Su Xiao kicked away before, and it just happened to be inserted into the wall of the mother nest.

The bullet first hit the iron plate,

After that, an ejection happened to hit Ada's calf.

Ada could not say anything. Although her 'bad luck overdraft halo' was very strong, it was not forcibly adding bad luck to the enemy. That kind of ability could not be mastered at the first level.

Ada was overdrawing the enemy's bad luck. She overdrafted Su Xiao's bad luck for ten hours after that. In other words, Su Xiao's bad luck completely disappeared in the next ten hours.

On the contrary, without bad luck, there was only luck left.

Su Xiao looked at the two guns in his hands and looked at Ada, crawling in the distance.

"It seems that the marksmanship has improved, probably ---."

Su Xiao walked to Ada, and Ada stopped crawling.

"I lost, whatever you want, kill or ravage me?"

Ada knew what would happen after, but she was very calm. She had been in the reincarnation paradise for a long time and knew what defeat meant.

She would not beg for mercy, nor would she hand over her equipment in exchange for a chance to live. After losing all the equipment, she could not survive the survival trial.

Su Xiao aimed the gun at Ada, and the enemy could not talk nonsense before he died.

"Can I not hit the head? It's too ugly to blow a hole, like a rotten watermelon."

Bang.

A bullet pierced Ada's throat. Ada clenched her fist tightly, and blood spurted from her throat.

Bang.

Another shot. This shot pierced through the heart. Ada's pupils began to slacken. She would die in a few seconds.

At this moment, the wall beside Ada exploded.

Boom.

Green mucus splashed, and a black shadow rushed out from the wall. Su Xiao subconsciously retreated. He felt an inexplicable danger.

Su Xiao retreated a few steps and stopped. He stood still in the same place, and his pupils emitted a pink light.

The black shadow pressed his hand on Ada's throat, and a transparent egg entered Ada's wound.

Ada's pupils that had been scattered recovered, and the heart that had been smashed healed and beat again.

"Ada, are you okay?"

The person who came was the Zerg Queen. At this time, her eyes were staring at Su Xiao, and she looked at Su Xiao.

"No... It's just that I almost died."

Ada struggled to stand up, and the joy of surviving a disaster appeared.

"Did you control him?"

"Don't get close to him. The control is very unstable. His willpower is too strong."

The Zerg Queen could not move now. She was trying her best to limit Su Xiao.

Ka.

Su Xiao's hand holding the knife became tighter and tighter, the blood vessels on the Zerg Queen's face burst, and her eyes widened.

"Let's go. This guy is as strong as a knife."

Blood flowed out of the nostrils of the Zerg Queen, and her eyebrows were like needles.

If Old Baal saw the previous scene, he would be crazy. The Regeneration eggs he dreamed of were used on Ada. The good news was that there were two Regeneration eggs.

The Regeneration Egg was more like a drug than an egg. It was a specialty of the Zerg and was very precious.

Ada and the queen of the Zerg quickly retreated, and a large group of sting scorpions surrounded Su Xiao, but these sting scorpions did not approach him.

If Su Xiao was fatally threatened, the queen of the Zerg was not sure if she could control Su Xiao.

After Ada and the queen of the Zerg walked away, the sting scorpions around them swarmed up.

Clang.

The circular blade radiance spread and the sting scorpions around Su Xiao were broken.

Green blood splashed on his body, corroding his skin.

Su Xiao did not care. This degree of corrosion was just a drizzle. His 44 points of physical strength were not to be trifled with.

Chapter 470: 3 Consecutive

Su Xiao did not chase after Ada and the Zerg Queen after beating them back. It was simply wishful thinking to catch up with the Zerg Queen in the nest unless he knew the terrain here.

"Woof."

A familiar cry came. Su Xiao looked sideways and saw that it was Bobowang, that was dirty all over.

Bobowang ran to Su Xiao. From the traces on the hair, Bobowang should have met the sting scorpion squad and successfully broke into the enemy's interior. He was in charge of the sting scorpion squad.

Thinking about the appearance of Bobowang mixed in a group of sting scorpions charging, Su Xiao's eyes trembled.

"Follow me."

Su Xiao walked to the spaceship and dragged out the bodies of seven elite sting scorpions from the wreckage of the spaceship.

An elite sting scorpion was thrown in front of Bobowang, and Bobowang tilted his head, not understanding what this meant.

"Try it."

Su Xiao pointed to the body of the elite sting scorpion, and Bobowang was stunned, with an expression that said, "you are teasing me."

The reason why Su Xiao did this was that Bobowang had a skill.

Advanced creature(active): Bobowang can evolve by devouring flesh and blood of high-level creatures.

Su Xiao couldn't figure out what the flesh of a high-level creature was. He had asked Bobowang to eat the flesh of the beasts in the Red Earth Region, but it was useless.

And this idiot was very picky about food. Eating raw meat was like taking medicine.

"Eat."

Bobowang looked like he had nothing to live for. He looked at the elite sting scorpion and then at Su Xiao, which meant: Why don't you demonstrate it to me first? The shell is not easy to chew.

Su Xiao showed a gentle smile and took off the shoes in his hand.

Bobowang was about to cry. He looked at the shoes in Su Xiao's hand. It bit the elite sting scorpion with tears.

Kacha, Kacha.

After Bobowang ate two mouthfuls, his eyes lit up. He looked at Su Xiao with some excitement and seemed to say: 'Master, try it. The chicken is crispy and delicious.'

Su Xiao might believe it if he did not see Bobowang's trembling hind legs.

Without a doubt, the taste of the elite sting scorpion should not be good.

Bobowang ate for a while and found that Su Xiao did not fall for it. His stomach was overwhelmed, and he kept retching.

Bobowang, who had eaten half of the sting scorpion, stopped. Although his abdomen was pumped, his body emitted a special fluctuation.

[Your follower 'Bobowang' has devoured flesh and blood of high-level creatures. Strength +2, Agility +1, Stamina +3, Charm +2, Skill: Full Speed Charge(active) micro-increase.]

Seeing this hint, Su Xiao was very surprised. The effect of this skill was unexpectedly strong.

"How do you feel?"

Su Xiao looked at Bobowang. He seemed to know that his attributes had become stronger. He rushed to the body of the elite sting scorpion like a hungry tiger pouncing on its prey.

Unfortunately, the same kind of creature could only take effect once.

The enhancement of attributes was not the key, and the key was the enhancement of skills.

This time, it was to charge at full speed(active). It might be able to strengthen the Ice Goddess Halo in the future.

Skill 2: Gift of the Ice Goddess(Halo): Create the Ice Goddess Halo, restore one ally's HP every second. No consumption. The recovery effect is increased according to the intelligence attribute.

This skill would be particularly powerful once the Ice Goddess Halo was enhanced. Even if it increased by one point, Bobowang would be promoted from a weak chicken nurse to an amateur nurse.

Bobowang's previous devouring of wild beasts was ineffective, but now it was effective to devour elite sting scorpions.

The definition of a high-level creature was somewhat vague, but it did not matter. In the future, all the creatures killed would be given to Bobowang.

The ignorant Bobowang still did not know what kind of strange creatures it would eat in the future.

Walking into the wreckage of the spaceship, Su Xiao was ready to rest here for a while.

The battle with Ada was extremely strange. Ada did not hurt him much, but the unexpected came one after another. He played a real version of death.

But Su Xiao found that his current luck was bursting. No, it should be luck. It could be seen from the previous five shots.

He took off the backpack behind him. The battle in the past few days was too intense. The recovery items that Su Xiao carried had been used up.

After hesitating for a while, Su Xiao took out three purple treasure chests and the chief package.

Although he could not use the storage space, now the recovery items were in a hurry. It was not that he was not prepared enough, but the recovery items he could carry with him were limited. Half of his recovery items were still in the storage space.

Picking up a purple treasure chest, although it did not have the effect of Fate Redemption, now Su Xiao was not resistant to opening the box.

Bobowang, on the side, was a little surprised. It felt that Su Xiao was missing a step.

When Su Xiao opened the purple treasure chest, Bobowang closed his eyes in despair.

The purple light shone, and Bobowang suddenly opened his eyes wide and was almost blinded.

[You got 7000 paradise coins.]

[Acquired Soul Crystal (Medium) ×1.]

[Obtain a hard carapace.]

[Hard Shell]

Quality: Blue

Type: Material

Rating 27

Description: High-grade material for forging and defense gear.

...

The first treasure chest was opened, and the harvest was good.

Su Xiao carried the soul crystal (middle) with him, [The hard shell] was put into the bag behind Bobowang.

Su Xiao picked up the second treasure chest without opening a recovery item.

The treasure chest opened and flashed again!

[You have gained 8,000 paradise coins.]

[You have acquired the curved claws.]

[Curved claws.]

Origin: Devour Island

[Rarity: Purple]

[Durability: 67/67]

[Attack: 47 to 71]

[Equipment requirement: Strength above 30 points, Agility above 15 points.]

[Equipment effect: Scorpion's Roar(passive). When attacking, there is a 5 chance to summon an elite scorpion projection to attack the enemy's will, causing 0.2 seconds of paralysis effect on the enemy.]

[Rating: 136]

[Description: An armor blade made from an exoskeleton.]

[Price: 36,000 paradise coins.]

...

A sword appeared in Su Xiao's hand. The shape of this sword was very similar to the legs of the elite sting scorpion. This sword could be used to increase the sharpness of the dragon flash.

After flashing twice in a row, Su Xiao was full of confidence. After beating back the 'Goddess of Luck,' he was crowned Emperor Ou.

When Su Xiao picked up the third treasure chest, Bobowang was stunned. It deliberately approached Su Xiao and smelled it. It seemed to confirm whether it was its owner.

The third treasure chest opened. Purple light shone, three consecutive flashes!

[You have obtained the Magical Fantasy Stone.]

[Magic Fantasy Stone]

Quality: Dark Purple

[Type: Rare Material]

[Effect: Able to avoid the punishment of a failed upgrade. If successful, the Magic Stone will not be consumed.]

[Rating: 260]

[Description: Magical crystals from the void. Most of them are used to protect weapons and strengthen or attack holes.]

Ruby appeared in Su Xiao's hand. The [Magic Fantasy Stone] effect was simple and crude, and he was exempted from the punishment of a failed strengthening.

If Su Xiao wanted to strengthen the dragon flash to +9, and during the period of failure, the Magic Fantasy Stone would play the effect.

More importantly, if the strengthening were successful, the Magic Fantasy Stone would not be consumed, and the Magic Fantasy Stone would only disappear when the strengthening failed one time, and the weapon would be broken, and the strengthening level would be retained.

Su Xiao had a bold idea. What would be the effect of the dragon flash being strengthened to +10?

Su Xiao gained a lot after the three treasure chests were opened, but he did not get any recovery items.

Su Xiao looked at the top package, which was the last hope.

The chief package was different from the treasure chest, and this thing would not shine, which could be opened by luck.

Opening the chief package, several items appeared in Su Xiao's hand.

[You have obtained sunlight essence.]

[You have obtained Barry's diary.]

[You have obtained the Seed of Origin.]

[Sunlight Essence]

[Rarity: Purple]

[Type: Recovery]

[Effect: Recover 5 HP every second after drinking. The effect lasts for 3 minutes and quickly heals injuries.]

[Rating: 97]

Description: Liquid form 'Sunshine'.

...

[Barry's Diary]

Quality: No

[Type: Paper type book.]

...

Su Xiao was a little stunned. Today's luck was too good, and he was a little unaccustomed to it.

Without hesitation, he drank the [Sunshine Essence].

He wouldn't be in such a sorry state if he fought Ada alone, but before he fought Ada, he killed thousands of sting scorpions and was besieged by the Zerg forces.

After that, he fought with several elite sting scorpions.

Su Xiao had just drank the [Sunshine Essence] and suddenly a roar came.

"Do you want to die so badly? I'll grant your wish."

The voice was not far, and Su Xiao walked quickly to the sound source.

When they arrived near the source of the sound, the sounds of intense fighting could be heard. It was Old Baal and Carlo fighting.
