

R. Paradise 541

Chapter 541: Sand Scorpion

The yellow sand whistled, and the sun burned the earth.

Sand Village, Wind Shadow Building, inside a conference room.

In the center of the conference room was a large round table a few meters wide. Around the round table sat a dozen Sand Ninjas. These were all experienced Ninjas of the Sand Village.

Sitting at the head was a youth, about seventeen or eighteen years old, with a head of red hair and the word "love" on his forehead.

"Cough ---"

A Ninja in the conference room coughed and said, "Recently, our interactions with each country have become more frequent, and our trade has gradually become connected, especially with the Fire Country. This has made our country's economy much more prosperous. Because of the newly opened river channel, the water shortage in our country has been greatly alleviated, and 70 of the population's drinking water has been solved."

After a Sand Ninja reported, a smile appeared on his face.

"70 population?"

"That river must be heavily guarded."

"Yes, that is our River of Hope."

The atmosphere in the conference room was relaxed, and most of the Ninjas had smiles on their faces.

Elder Chiyo, sitting on the side, looked at the 5th generation Wind Shadow, Gaara, and nodded with satisfaction. She was very satisfied with this generation of Wind Shadow.

"Also, in terms of training new people, since we introduced Konoha's education courses, there has been a good improvement."

"It's almost time for the middle Ninja exam. The results of the exam are expected."

"Well, it's indeed good news. They are the future of the village."

The atmosphere in the conference room was good, and most of the Ninjas looked relaxed.

"But..." A Sand Ninja with a mustache and hair covering his right eye spoke.

"What's wrong, Yura?"

Baki also spoke up. Baki's position in the Sand Village was not low, only second to Chiyo.

The Sand Ninja Yura pondered for a moment, and the atmosphere in the meeting room gradually disappeared. Everything he said before was good news, but now he had to say bad news.

"Have you heard of this organization?"

Yura looked around.

"I have heard a little about it."

"It is said that it is an organization gathered by a group of rebels. They have been very active recently. Some time ago, the great name of the Kingdom of the River was assassinated by them."

The Ninjas present nodded one after another. The first one, I, Gaara, did not speak, only quietly listened.

Although Gaara is a Wind Shadow, many Ninjas in the Sand Village still do not agree with him. A village can not be without a Shadow. In addition to the attitude of Konoha, Gaara will become a Wind Shadow.

"The Akatsuki organization is made up of more than ten members..."

The Sand Ninja Yura began to narrate the information he knew. For some reason, he felt a stabbing pain in his brain as he spoke, which made his vision darken.

A seal appeared in the brain of the Good, and with the mention of the Akatsuki, some trivial memories appeared.

"What's wrong, Yura?"

As a superior Ninja of the Sand Village, Yura had a good network.

"It's fine."

Yura continued to narrate the information, but his mind became dizzier.

Crack.

A crisp sound came from the brain, and a certain seal was broken. A large number of memories poured into his mind.

...

In a desert in the Wind Country.

Three figures walked slowly in the desert. The three wore wooden bamboo hats, and a circle of cloth was around them.

The bell rang, one of them had a red string on his bamboo hat, and a small bell was tied to the red string.

Su Xiao did not care about the bell in front of him. This thing could ease his agitated mood. After all, it was not easy to travel through the desert.

The three of them were riding on the Deidara Bird, but after arriving in the desert, they could only walk.

The sandstorm was too strong, and the temperature in the sky was very high. The three of them would not take long to get out of the water. In conclusion, flying in the desert was an act of courting death.

The waves were intended for Thousand Heavy Snow txt to download.

Pulling the clay bird to control the soil needed to consume Chakra. Entering the Wind Nation was different from entering the Water Nation. A vast ocean surrounded the Water Nation, so there was no need to worry about enemies appearing.

"Scorpion, how far is it?"

Su Xiao took out a bottle of water, drank half a bottle, handed the remaining half to Bobowang, and Bobowang drank it in a few gulps.

Bobowang stuck out his tongue, and his face was full of despair.

It wanted to take off the 'real skin coat' on its body now.

"We will arrive at the Sand Village in about half a day."

With Scorpion, they did not need a guide. Scorpion grew up in this desert country.

Su Xiao stepped on the sand under his feet. The sand was very soft, leaving a deep footprint. The sand made walking more difficult.

"It's so hot, annoying sand, bah."

Deidara blew sand into his mouth as he spoke.

"Is it okay for you to only rely on that bag of clay? The opponent this time is Pillar Strength."

Su Xiao looked at a small bag in Tita's hand. The three would chat when they were on their way. Otherwise, it would be too boring to travel.

"My ninjutsu is all art, and I prepared '18 times' in advance this time. After all, the opponent this time is a tail."

Deidara patted the ninja bag on his waist, which contained special clay.

Just as the three of them were moving forward, Hiruko suddenly stopped, and the Scorpion inside seemed to find something.

Noticing this scene, Su Xiao pressed one hand on the hilt of the sword on his waist.

"Enemy?"

"No, there is good news. The chess pieces I set up in the Sand Village long ago are in effect."

"Chess pieces?"

Deidara looked at Scorpion, puzzled.

"It is the technique that I exchanged with Orochimaru."

"Oh? So we don't have to go in directly?"

"No, the plan is changed. We will sneak in."

Su Xiao did not know what the two were talking about. He seemed to see his doubts. Scorpion thought for a moment and said: "I planted an eye in the Sand Village long ago. I sealed his brain, and he did not know his identity as a spy, so others would not suspect him. Before this mission, I removed the seal. If everything goes well, he is the key to this mission."

A spy who doesn't know he is a spy can often play an unexpected role.

"A spy who doesn't know his identity? I hope he can help us enter the Sand Village. It is indeed not a good way to fight head-on."

With the strength of Su Xiao and the other two, it was still a little difficult to attack the Sand Village.

"When the time comes, I have to contact him. This chess piece is useful for the current situation, but help me after the mission ends, Byakuya."

"What?"

"Get rid of this chess piece."

Su Xiao looked sideways at Scorpion.

"..."

"I will settle my matters later."

Deidara also looked at Scorpion.

"This is not a smart choice and does not match your art."

"Who knows."

The three continued to move forward, and the team fell into silence.

Su Xiao felt that Scorpion was determined to die. This situation appeared when he entered this desert.

"I will help you deal with that chess piece later."

"Thank you."

Su Xiao and Deidara looked at each other, and Dida nodded calmly.

"Scorpion, Deidara and I will be in charge of capturing the pillars. You will preserve your strength and deal with the pursuing enemies. What do you think?"

Scorpion did not say anything.

Five hours after the three of them crossed the desert, a staircase shaped circular wall appeared in front of them. This circular wall protected the Sand Village. It could reduce the sand and prevent other countries' ninjas from sneaking in.

At this time, there were Sand Ninjas on the staircase wall. One of them narrowed his eyes and saw a figure in the distance.

Chapter 542: Sneak Into

"This is..."

A Sand Ninja in the middle of the wall became alert. Not long after, he saw the clothes of the three people in the distance.

"Black trench coat, red cloud pattern, could it be..."

The Sand Ninja's eyes widened.

"We must inform Captain Yura at top speed."

Yura was the leader in charge of the defense of the village. Otherwise, with his identity as a superior Ninja, he was not qualified to participate in the high-level meeting of the Sand Ninja.

The Sand Ninja who found Su Xiao and the other two were about to turn around to inform the main force. He found a person standing behind him, which made him happy.

"Captain Yura, before you let the vigilant members of the Akatsuki organization..."

"I know."

Yura said in a low voice.

"Don't worry, and things will end soon. Gather the troops and let them guard One-Line-Sky."

The so-called One-Line-Sky was the only entrance to the walls around the Sand Village. One-Line-Sky was not more than five meters wide and dozens of meters high. It was easy to defend and hard to attack.

Yura looked at the three people in the sandstorm. His eyes were calm, so calm that they made people shiver.

"But, Captain Yura, don't you need to inform the other troops? Just based on us..."

It doesn't matter.

Yura motioned for the Sand Ninja to gather the troops, and the Sand could only do as he was told.

Si ---

A wisp of purple smoke floated up from the direction of One-Line-Sky. Su Xiao, who was in the sandstorm, noticed the purple smoke.

"Scorpion, it seems that your chess piece is good. It has helped us open the way."

"En, we can enter directly. The time is just right."

At this time, it was already sunset. The desert was dim. The golden sunlight on the horizon made the surrounding sand look like gold.

The three of them went straight to One-Line-Sky. A Sand Ninja stood in front of One-Line-Sky, his green superior Ninja vest stained with blood.

Scorpion, who was hiding inside Hiruko, stepped forward.

"Thank you for your hard work, Yura. Do you remember me?"

The voice of the Scorpion hiding in Hiruko was low and hoarse. This was intentional by the Scorpion.

"Yes, Lord Scorpion."

Yura knelt in front of the Scorpion with one knee, his eyes full of worship.

"It seems that the effect of the curse technique is not bad. Orochimaru is quite good in this area."

Deidara looked at Yura. He was examining the other person's eyes. Overall, there was no problem with Yura now.

"If you remember, you are a loyal subordinate. Let's go."

The three of them walked into One-Line-Sky. There was a faint pungent smell in One-Line-Sky, surrounded by the corpses of the Sand Ninjas.

One-Line-Sky was more than ten meters long. After arriving at the other end of One-Line-Sky, the Sand Village appeared before him. It had a desert style. Most of the houses were low, and the whole village was yellow.

After walking out of One-Line-Sky, Su Xiao found that the Sand Ninja did not completely build One-Line-Sky. Mountains surrounded the Sand Village. The Sand Village carved a circular wall on the foundation of the mountains, and One-Line-Sky was the construction of the mountain.

"Then, let's do it, Byakuya."

Deidara threw out two palm-sized clay birds. He made a seal with his hands. White smoke rose, and the body of the clay birds became bigger, three meters beyond the wingspan.

Su Xiao jumped on the back of a clay bird, and the spider queen appeared in his hand.

Deidara jumped on another clay bird.

"In the village, the best attack position is in the sky, huh."

Deidara looked sideways at Scorpion.

"How is it, Brother Scorpion? This is an artistic style, en."

Scorpion looked at the new clay bird under Deidara's feet. It was obvious that this thing did not conform to his aesthetic standard.

"Don't let me wait too long, Deidara."

Deidara chuckled and did not reply.

"Clean up the guards first."

Su Xiao stepped on the clay bird under his feet, and Deidara controlled the two clay birds to fly up.

"You go left, and I go right, clean up the sentries first."

Su Xiao looked down. He saw some ninjas on the roof of the Sand Village. These ninjas were not strong. They were Genin or Chunin.

"Okay, I'll leave the right side to you."

The Sand Village was split into two by Su Xiao and Deidara, and the two began to clean up the guards.

However, before cleaning up the guards, Su Xiao still had to do one thing. He took out two special-class alchemy bombs and integrated the two special-class alchemy bombs into the clay bird.

The body of the clay bird began to stiffen, and it recovered after a few seconds.

Su Xiao nodded to Deidara in the distance. Deidara released the control of the clay bird.

Su Xiao pressed his hand on the back of the clay bird and tried to control the alchemy bomb inside the clay bird. The clay bird that was already falling gradually stabilized.

He controlled the clay bird to fly to the left, and the clay bird under his feet immediately flew to the left.

This was a technique that Su Xiao and Deidara had researched when they were free. He could now control this clay bird to fly, but there was a time limit.

This clay bird was injected with chakra by Deidara. After this chakra was exhausted, this clay bird would go out of control.

Su Xiao could control this clay bird for an hour. After that, this thing would explode because there was no chakra harmony. Fortunately, an hour was enough.

It was much more convenient to control the clay bird alone. After that, Deidara needed to fight. Su Xiao had no problem attacking, but he needed to find an opportunity to get close to the human pillar force to subdue the human pillar force.

More importantly, Su Xiao wanted to take the opportunity to absorb the chakra in the body of the tailed beast to improve the level of the green steel shadow. This was his ultimate goal.

The clay bird flew to a high place. Su Xiao opened the 'light red external detection lens 8 times(active) and took out a black iron pipe in the storage space.

This was the silencer of the sniper rifle. Although the spider queen had its silencer function, the silencer function was not perfect, and the gunshot could still be heard.

Putting the silencer on the barrel, the silencer was thicker than the barrel. Su Xiao usually would not load this thing. The spider queen's bullet movement was too strong, and it would cause damage to the silencer that was loaded later.

Su Xiao made this silencer and spent 2000 paradise coins to find an artisan in the reincarnation paradise. After shooting dozens of times, it would be scrapped and lose the silencer function.

Now was not the time to be stingy with paradise coins. He was attacking the Sand Village.

Weng ---

From inside the spider queen, Su Xiao put his head in front of the scope, aiming at a sandman below.

Holding his breath, he pulled the trigger.

Puff.

The slight sound of gunfire came, the bullet left the muzzle, and the head of the middle Ninja in the scope exploded.

Turning the muzzle, Su Xiao found the next target.

On the other side, Deidara also began to clean up the sentry posts. He threw spider-shaped clay bombs from the sky.

Boom, boom ---

A few slight explosions came. Compared with the way Su Xiao cleaned the sentry posts, the sound caused by Deidara was bigger.

These were special clay bombs. Although there were still explosions, the explosions were very small, but the power would be reduced.

A Sand Ninja whose cheek had been blasted to pieces crawled up from the ground, his mouth wide open as he tried to shout.

"Not good."

Just as Deidara was about to throw the bomb, a bullet flew towards the Sand Ninja's head.

Blood splattered with a bang, and the Sand Ninja fell to the ground.

"Not bad."

Deidara looked at Su Xiao in the sky and nodded to Su Xiao.

At the edge of the Sand Village, the scene of Su Xiao and Deidara clearing the sentries fell into Yura's eyes.

"As expected of Lord Scorpion's companion, this kind of fighting style."

Yura was shocked by Su Xiao's high-altitude assassination, and this was simply a silent killer.

"This guy, Deidara."

Scorpion was a little dissatisfied, and Deidara almost made a mistake just now.

Five minutes later, the sentry posts at the top of the Sand Village were cleared up and could be infiltrated.

Deidara controlled the clay bird to dive down. After reaching a certain height, he jumped onto a round roof. This was the Wind Shadow Building.

"Successfully infiltrated, very good."

As soon as Deidara landed, a gust of wind blew past.

Sou ---

A bullet flew over. The sandstorm was scattered, and a figure appeared. He staggered two steps and stood firm.

"Oh? Was it discovered?"

Deidara looked at the figure in front of him. It was a human pillar, Gaara. There was a sand barrier set up by Gaara in the air, which was difficult to find.

Chapter 543: Gaara Who Was Approached

"Intruder... this kind of clothing, Xiao?"

Gaara stood before Deidara, carrying a one-meter-tall sand gourd on his back.

"It seems that the infiltration is not going smoothly. Let's change it to a strong attack."

Just as Deidara finished speaking, a strand of yellow sand swept toward him. The yellow sand seemed to have turned into a living creature, intending to entangle him.

The yellow sand just swept in front of Deidara, and the whistling sound of wind breaking came.

Bang, a bullet passed through the yellow sand, splashed, and the yellow sand that swept towards Deidara scattered on the ground, gradually approaching Gaara. Gaara looked up at the sky.

"Two intruders."

The yellow sand floated up, and the sand shield around Gaara formed, which was to defend against Su Xiao's bullets.

Su Xiao put away the sniper rifle in the sky. The effect of the sniper rifle against Gaara was not obvious. The sand on the other side was different from the hair of Jiraya. The sand could greatly reduce the kinetic energy of the bullets.

If Gaara was shot in the head, he had not to try, although the probability of this was smaller than buying the lottery ticket.

Gaara was already fighting with Deidara below, controlling the clay bird under his feet to dive low.

Deidara stood on the back of the clay bird, his body was low, and he shuttled through the air quickly. Arm-thick yellow sand chased after him like a maggot in his bones.

The speed of the sand chasing Deidara was extremely fast, and Deidara had no choice but to dodge in the air.

Su Xiao observed the current situation. After the clay bird under his feet fell more than ten meters away from the ground, he quietly jumped down from the clay bird.

At this time, the sky was already a little dark. Coupled with the black windbreaker Su Xiao wore, Gaara temporarily did not notice Su Xiao. He was concentrating on dealing with Deidara.

When Su Xiao fell five meters away from Gaara, Gaara, who was below, noticed him.

Su Xiao, who was falling, held a long sword. When Gaara noticed him, he immediately activated the green steel shadow. At this time, he had been discovered, and there was no need to hide.

"Enemy attack!"

A loud shout came, and some Sand Ninjas found that Gaara was fighting with the enemy.

Dang, dang, dang...

The village alarm clock rang, and some ragged Sand Ninjas rushed out of the houses.

"Where are the enemies?"

"High up in the sky, two intruders."

"Lord Wind Shadow is fighting with the enemy."

Although these Sand Ninjas quickly gathered together, most didn't have any means of dealing with empty air. As for helping Gaara fight, everyone hesitated.

In their hearts, Gaara was still a monster. Even if Gaara became a wind shadow, these Sand Ninjas still had a grudge.

There were two people who were different from these Sand Ninjas, one man and one woman, Kankuro and Temari.

Both Kankuro and Temari were the descendants of the fourth-generation wind shadow. In other words, they were Gaara's older brother and sister; among them, Temari was the oldest.

"Kankuro, who is Gaara fighting with?"

Holding a big iron fan in his hand, his face was red, his blonde hair scattered, and he had a faint fragrance on his body.

"I'm not sure. Let's go help."

"Wait."

Temari's words surprised Kankuro.

"You go and gather the troops. I will help Gaara fight the enemy first."

Temari left these words and jumped like a building on high ground.

"Damn it."

Kankuro gritted his teeth. He also wanted to help, but it was the right choice to gather the Ninja Army as soon as possible. The enemy's origin was unknown, and he must have some strength to dare invade the Sand Village.

Not to mention the reaction of the Sand Village, Su Xiao was hanging in the air motionless at this time, and Gaara below was surprised.

If you looked carefully, you would find that Su Xiao's left arm was connected to a thread, and the other end of the thread was wrapped around the clay bird above.

"Chance."

With the opportunity created by Su Xiao, Deidara, who was not far away, threw out several bird-shaped clay bombs. These bombs dove at Gaara at high speed.

Su Xiao did not want to get close to Gaara. Now the time was not right. If he got close, he would be injured by Deidara. His action just now was to attract the attention of Gaara.

Several bombs birds rushed to Gaara, and Gaara, who was on guard against Su Xiao, was attacked in the stomach and back.

The bomb birds swooped down, and the yellow sand wrapped Gaara.

Boom, boom, boom!

The sound of the explosion resounded throughout the village.

The village had already gathered up the Sand troops. At this time, the situation here was somewhat abnormal. No matter how much Kankuro urged, the gathered Sand Ninja did not go to support Gaara. The internal problems of the Sand Village were exposed.

In these Sand Hearts, Gaara was a pillar of strength, a monster. Although Gaara had been very peaceful for the past two years, the fact that he had attacked the same village Ninja in his early years was a fact that could not be erased. Who knew if Gaara would explode and hurt people?

Moreover, Gaara was the Wind Shadow +Pillar, and his primary responsibility was to defend against foreign enemies. It was not that these Sand Ninjas did not want to help defend against the enemy, but they did not dare to approach Gaara amid the battle.

The smoke and dust of the explosion dispersed, and a large sand ball appeared. Gaara hid inside the sand ball, unscathed.

"Formation A."

Su Xiao shouted and put away the boundary line at the same time. He fell to the sand ball below.

Deidara was just ready to throw a clay bomb. After hearing Su Xiao's shout, he stopped and began to prepare more clay bombs. If Su Xiao did not succeed, he would go on stage again.

Su Xiao dived down, and just when the sand ball below had not dissipated, he stabbed at the sand ball.

With a swoosh, a dragon flash deeply entered the sand ball. It was not that Gaara's sand ball defense was weak, but the green steel shadow energy destroyed the chakra in the sand, which led to the defense of the sand ball being greatly reduced.

A long sword suddenly stabbed into the sand ball. Gaara was shocked. The sword stabbed at the place beside him and did not hurt him.

"A ninja who knows how to use a knife."

Gaara saw the situation outside the sand ball through the eye of sand floating in the air. Gaara stretched out his palm in the sand ball and yellow sand swept toward Su Xiao's body, entangling Su Xiao, who had not yet landed.

"Sand Coffin..."

The yellow sand quickly tightened, and Su Xiao felt pressure in his chest, but he continued to stab forward with the long knife in his hand, although the knife must not be able to stab Gaara.

Just as Gaara was ready to use the sand to strangle Su Xiao's ribs, something strange happened.

Puff, a light blue spike, pierced out of the sand ball, drops of blood seeped out of the sand, and the yellow sand that had bound Su Xiao was scattered on the ground.

Su Xiao stabbed the dragon flash into the sand ball and used the 'shadow thorn'. He accidentally developed this move when he developed the ring break before, the sword edge and the energy spike formed by the green steel shadow.

The sand ball that wrapped Gaara dissipated, and more than a dozen energy spikes half a meter long appeared at the tip of the dragon flash. These spikes pierced half of Gaara's body, and one of Gaara's arms hung down weakly.

"Sand..."

Gaara wanted to control the sand to attack Su Xiao, but Su Xiao had already rushed forward and kicked Gaara in the abdomen.

Crack.

Like porcelain breaking, cracks appeared on the surface of Gaara's body. This was the armor of sand, and the principle was to use the sand injected with chakra to cover the whole body.

Shadow thorn broke. These energy thorns did not dissipate immediately but stayed in Gaara's body.

The original work shows that although Gaara's strength was not weak, he was a spicy chicken in close combat before he turned into a beast.

Kicking Gaara off the ground, Su Xiao rushed forward with his sword. If Gaara suffered the frontal attack of Su Xiao, the armor of sand was useless.

"Little devil, quickly tail beast, this guy is not right!"

A sharp roar appeared in Gaara's ears. It was the voice of a crane.

Gaara ignored this voice, and he could not tail the beast. Once the tail beast, he would immediately lose control.

Su Xiao held the sword with one hand, the killing intent in his eyes boiling, and he slashed at Gaara's chest.

With Su Xiao's character, if not for the need to capture him alive, this sword would be aimed at Gaara's neck.

The current Gaara was very strong? The answer was not too strong. It was not that Gaara was not strong, but the tail in his body was dragging him down, making him unable to use his full strength.

The long sword cut through the air and cut in front of him. Gaara's pupils contracted. Although he was injured, he did not lose his combat power.

Just as Gaara was about to counterattack, the whistling wind came.

Bang.

Strong wind hit Su Xiao, and Su Xiao, rushing forward, was sent flying. He adjusted his center of gravity in the air and landed smoothly.

The hand holding the big iron fan stood not far away. Although she was only nineteen years old, her figure was very plump.

The one who attacked just now was Temari, which helped Gaara a lot to solve the awkward situation where Su Xiao got close to him.

Su Xiao was not Gaara's opponent in front of him, and Gaara was not Su Xiao's opponent behind him.

"Sand Village can not allow Xiao to behave atrociously."

Temari stared at Su Xiao, and the hostility was obvious.

"Deidara, help me buy five minutes. I will deal with this woman first."

In the high sky, Deidara no longer prepared the bomb but dived down. Su Xiao no longer paid attention to Gaara, and there was no problem with Deidara holding him back.

"Is it not good to live?"

When Su Xiao spoke, he stepped on the ground and rushed to Temari at high speed.

Chapter 544: Hold Hostage

The wind whistled, and the explosion's flames illuminated the Sand Village as if it were daytime.

Deidara and Gaara fought. The battlefield of the two people was not on the ground but high in the sky. Gaara also could fly. The sand he injected with chakra could float in the air. The specific principle was unknown.

The two people in the sky could not decide the winner for the time being. Even if Deidara lost, the scorpion at the edge of the Sand Village was not easy to deal with.

Su Xiao no longer paid attention to the two people in the sky while rushing forward. The hand bow not far away from him had waved the big folding fan.

"Itachi."

The big iron fan that was more than one meter long waved, and a storm appeared in front of Temari, and inside the storm were dense vacuum blades.

The strong wind did not have any lethality, and those vacuum blades were the killing moves hidden in the strong wind.

Su Xiao lowered his body and exerted force to prevent himself from being blown away. His dark pupils contracted slightly. He was catching the vacuum blades in the strong wind.

"One, two, three... fifteen."

After Su Xiao sensed the number of vacuum blades, he held the Dragon Flash horizontally in front of him, and there were fifteen vacuum blades hidden in the strong wind that slashed at him.

The vacuum blades came head-on, and Su Xiao's neck and cheek vaguely felt a tingling pain, which was his perception warning.

The green steel shadow energy wrapped the Dragon Flash, and Su Xiao slashed forward a few times out of thin air.

Ding, ding, ding, ding...

The blade of the dragon flash burst out a spark. A vacuum blade flew past Su Xiao's cheek and entered the stone wall behind him.

With a flash of a blade, Su Xiao slowly approached the hand bow. Although the pace was not fast, the hand bowed and did not dare to step back.

"This... How is this possible?"

Temari was a little dull. She knew this move well. It was normal for the enemy to dodge or defend this move, but it was the first time that she had encountered the vacuum blade being cut off.

Su Xiao walked forward slowly. With Temari's fighting style, he would die within half a minute if he got close to her.

Temari stared at Su Xiao. She just wanted to retreat, and an inexplicable sense of crisis appeared. You will die if you retreat at this time.

This idea seemed to be imprinted in the mind of Temari. She stopped in place, and the distance between the two gradually shortened.

Temari's judgment was correct. If she was careless, Su Xiao could rush to her in half a second by using 'shave'.

Su Xiao continued to move forward slowly, and Temari's forehead was sweating. The enemy seemed full of flaws, but Temari could not find the opportunity to attack even after searching for a long time.

The atmosphere was suppressed to the limit, and Temari's seemed to be pinched by a big invisible hand.

"Ninjutsu - wind sand dust."

Temari finally couldn't bear it anymore. She waved the big folding fan in her hand, and the wind rolled up the yellow sand and rushed to Su Xiao.

There was a dim yellow in front of him, but Su Xiao had a smile.

"Hum."

There was a cry of pain in the yellow sand. When the yellow sand dispersed, the hand Ju was standing not far away. There was a hole in the clothes on her chest. A small amount of blood spilled out. The white skin on her chest was revealed without a doubt, and the hand was full of benefits.

With one hand on her chest, her pupils of Temari were trembling. She was a ninja who was good at mid-range combat. The most taboo thing was to fight against the enemy, and now she was trapped.

If you looked carefully, you would find a circle of invisible 'boundaries' around the two people. The 'boundary' was formed by the boundary line using the surrounding buildings, and the shape was like a large octagonal cage.

When Su Xiao approached Temari, Temari focused all her attention on Su Xiao, and it was inevitable that she would be careless about the vigilance around her.

"Temari."

The quickly rushing Kankuro roared. Behind him were more than a dozen Sand Ninjas, and these were his confidants.

Temari looked at the people behind him with joy.

Boom!

The explosion suddenly sounded, yellow sand splashed, and a Sand Ninja was blown up into the sky because he directly stepped on the bomb. His legs were blown away higher than his torso.

After the Sand Ninja that was blown into two pieces fell to the ground, it wailed incessantly. The footsteps of the others all stopped, wrapping around Ichiro.

"Don't get close, and it's the bomb that the enemy in the air set up."

The judgment of the hand was wrong. These were the alchemy bombs that Su Xiao had just dropped nearby. These alchemy bombs were hidden in the sand, and the moment they were stepped on, they would explode. There was no time to defend.

Kankuro and the others were facing a dilemma. If they did not support Temari, their phones would quickly lose. If they supported them, they might be killed by the explosion.

"Earth Release: Earth Shock."

A Sand Ninja pressed one hand on the ground, and the nearby ground shook a few times before stopping. It seemed that these Sand Ninjas thought that the bomb in the sand was a trigger.

After the shock, the surroundings were dead silent, and there were no explosions.

Su Xiao activated the alchemy bomb from the new one, and he no longer paid attention to the Sand Ninjas.

Boom!

Another explosion came, and a Sand Ninja stepped on thunder, but this Sand Ninja was strong and vigorous, and the bones of one of his legs were broken.

After discovering this situation, Kankuro no longer approached, took off the puppet behind him, and prepared to support the long-range helper, Temari.

The other Sand Ninjas were also the same. Earth and fire attacks attacked Su Xiao.

A transparent shield appeared on the surface of Su Xiao's body. The protection was activated, and he rushed straight to Temari.

Su Xiao rushed over aggressively, and Temari immediately counterattacked. It was too late to make a seal at this time, and she could only use the non-seal Ninjutsu.

"Big hook."

The big hook was like the enhancement of the hook, the wind pressure was bigger, and the number of vacuum blades increased.

Ding, ding, ding, ding...

The sound of metal colliding came, and smoke and dust rose around Su Xiao. Not only the vacuum blades but the attacks of the sand also hit him nearby.

Hu ---

A figure broke out of the dust. It was Su Xiao who resisted the big scythe and the three Ninjutsu.

The shield around his body was full of cracks, it could break at any time, but it did not matter. He rushed to the three meters of the hand.

Behind the hand was the barrier formed by the boundary line, which gave her nowhere to retreat.

"Secret skill..."

Temari waved the big folding fan in her hand, and Su Xiao cut the fan.

Ding ---

Dragon flash left a blue cut in the air, and the one-meter-long ninja fan in hand was broken.

This ninja fan was not used for close combat, so the sharp dragon flash cut it off.

Temari clenched her teeth, and her eyes were full of helplessness. Not far away, Kankuro was burning with anxiety.

"Temari!"

Puchi.

The long knife cut through, and a deep cut that could reach the collarbones of Temari.

Su Xiao's sword could cut off the throat of the hand, but he did not do that. This woman was very useful.

Being cut by Su Xiao was not a small matter. The green steel shadow energy invaded the body, and the unbearable pain appeared.

"Ah ---"

The hand made a scream, and the chakra in his body seemed to tend to go berserk. Su Xiao took the opportunity to rush to the back of the hand. He grabbed the back of the hand, and the face of the hand was pale. He looked pitiful and did not look like a female ninja.

Kankuro stopped those ready to attack Su Xiao with Ninjutsu, and the attack would hurt the hand.

The scream of the hand was heard by Gaara, who was fighting with Deidara in the air. He looked at the battlefield on the ground from the corner of his eyes.

Su Xiao pinched the back of the neck of the hand. The blade of the dragon flash was pressed against the white neck of the hand. The blade was moving at a slow speed. With the sharpness of the dragon flash, the skin on the throat of the hand bow was instantly broken, and the blood-stained blade.

"Hu... Hu..."

Temari opened her eyes wide and gasped for breath, and the fear shrouded her.

Chapter 545: Frightened Shukaku

Seeing this scene, Gaara's pupils contracted. With a wave of his hand, a stream of yellow sand rushed to Deidara, and the other hand was aimed at Su Xiao.

"Sand Coffin."

The yellow sand rose from under Su Xiao's feet and quickly climbed up his arm holding the knife.

The green steel shadow energy wrapped Su Xiao's arm holding the knife, and the chakra in the sand was destroyed. Gaara could only continue to conduct the chakra to maintain the sand and not dissipate it.

Su Xiao's right arm had a huge contraction and pulling force, but this could not stop him from slowly cutting the throat of the hand Ju.

"Shout, let him save you."

Su Xiao put his head close to Temari's ear. Temari clenched her silver teeth, not saying a word. She felt that the demon was whispering in her ear, and at the same time, she guessed Su Xiao's purpose.

"Gaara, don't worry about me, the enemy in the sky..."

Before Temari finished shouting, Su Xiao grabbed the left hand of Temari and exerted force, and Temari's body began to go limp.

Temari was Gaara's sister, and now the two had recovered from the intimate relationship between brother and sister, Gaara would never watch Temari die.

"Well ---"

Gaara bit her muscles and began to fight with Su Xiao.

"Sand pillar."

Gaara held his palm, and a sand pillar rose under Su Xiao's feet to push him away. At the same time, a strand of yellow sand wrapped around Temari and took her out of the death god's hand.

In the air, Temari gasped for breath. When she saw Su Xiao, who had been pushed away, her eyes were fearful and hateful. Perhaps she would have a shadow when she met Su Xiao again in the future. Imagine what kind of experience it was to be slowly cut through the throat with a knife.

Su Xiao was pushed into the air. His left hand pulled back the broken line below. It was he who deliberately let go of Temari. Otherwise, Temari would have died long ago.

Su Xiao suddenly became soft-hearted? Of course not. His purpose in coming to the Sand Village was not to kill many Sand Ninjas but to catch the pillars.

Adjusting his center of gravity mid-air, a clay bird rushed to his feet and carried him to the sky.

Gaara controlled the sand to put his hand on the ground, and he breathed a sigh of relief in his heart.

"Hey, where were you looking when you were fighting with me?"

Deidara's voice sounded. There was a hint of helplessness in Gaara's eyes, but there was nothing he could do. He had to save the hand.

"Explode!"

Boom!

The flames instantly engulfed Gaara, and the sand was blown away.

This was Su Xiao's purpose, to attract Gaara's attention and create an opportunity for Deidara. It was obvious that he succeeded, very successful.

The explosion's flames receded, and a somewhat distorted sand ball floated in the air.

Su Xiao controlled the clay bird to fly near Deidara.

"How is it?"

[Directly explode to the main body, and the One-Tailed Man Pillar is almost unable to hold on. If I didn't hold back, that blow would kill him. After all, you helped me buy a lot of time, en.]

Deidara threw out another clay bomb as he spoke. He originally wanted to fight hard with Gaara, but because Su Xiao created an opportunity, Deidara seized the opportunity to injure Gaara seriously. This was cooperation.

Boom, boom...

Explosions resounded through the Sand Village, and the Sand Ninjas were not idle. They pushed out a large crossbow, and arrows wrapped with explosive talismans shot at Su Xiao and Su Xiao.

This time, the sky was even more lively, like fireworks.

Su Xiao controlled the bird to avoid the arrow, and the airflow produced by the explosion made his windbreaker flutter.

Deidara had turned into a 'bomb machine' and bombarded the ball of sand where Gaara was.

An arrow shot at Deidara. Su Xiao cut out a sword light, and the sword light instantly cut the arrow. Because he had not mastered the sword light for a long time, Su Xiao was not used to using the sword light in fierce battles.

The arrows were shot in a hurry, and the blades were everywhere. No matter how many arrows were shot by the Sand Ninjas, they could not do anything to Su Xiao and Su Xiao.

Boom.

Deidara threw out the last clay bomb in his hand, and the sand ball floating not far away was shaking and sleepy.

I can only use it eighteen times,

Well.

Deidara was just about to use a big move. Su Xiao had already controlled the clay bird to rush to the sand ball.

"I'll do it. 18 times to deal with the Sand Village is good."

Deidara hesitated for a moment and nodded. This was indeed a good choice.

Deidara flew high in the sky to avoid the arrows, and the matter of capturing the human pillar force was handed over to Su Xiao. Gaara had been blown half to death by him.

The clay bird rushed to the sand ball, and Su Xiao jumped down from the clay bird and directly jumped to the sand ball in the air.

Several sand thorns were born on the already tattered sand ball. Because Gaara was injured too heavily, the speed of these sand thorns was very slow.

Before the sand thorns stabbed Su Xiao, he had already slashed.

Zheng.

The sand thorn was cut off, the chakra in it was destroyed, and the fine sand drifted away.

Su Xiao stood on the sand ball, and the sand thorn was born from the soles of his feet. He did not care about the sand thorn but stabbed it into the sand ball.

A groan came from the sand ball, and the knife stabbed Gaara.

Su Xiao pulled out a section of the Dragon Slaying Flash and began to drag it, cutting a circular hole on the top of the sand ball.

The moonlight penetrated the dark sand ball. Gaara was covered in blood in the sand ball. He could not stand up, but he still raised his head.

Su Xiao's face was reflected in Gaara's eyes. Gaara wanted to raise his hand to control the yellow sand, but the green steel shadow energy was raging in his body.

"Hello, One-tailed Pillar Force."

A smile appeared on Su Xiao's face, revealing a few white teeth.

Gaara's heart twitched, and an emotion called fear appeared.

Su Xiao jumped into the sandball. If someone observed, they would find light blue smoke floating on his left hand, and its terrifying suction force appeared.

The nucleus of Devour:

[Skill effect: Able to absorb high-level creature energy to nourish the blue steel shadow energy, increasing the level and quality of the blue steel shadow according to the absorption level and quality.]

...

Su Xiao jumped into the sandball. Inside the sand ball, a layer of red chakra appeared on Gaara's body. It was the unique chakra of tailed beasts, high-level creature energy.

"Kid, let me out, quick!!"

Shukaku almost roared at Gaara, but it was already too late. Su Xiao pressed his left hand on Gaara's face.

Hu ---!

The light blue smoke wrapped Gaara. A vortex appeared in Su Xiao's palm. The chakra in Gaara's body was forcibly sucked out. To be exact, this was not Gaara's chakra but Shukaku's chakra.

The visible light red chakra poured into Su Xiao's arm. After the chakra passed through his arm, it slowly approached his chest. There was an extremely complicated energy ball in his body, responsible for storing and converting energy.

"Ah"

Shukaku screamed. It felt like a huge threat. This human was not only absorbing its chakra but also absorbing its origin power.

Losing some chakra was nothing, but if the origin power were absorbed, then the battle power and survival time of Shukaku would sharply decrease.

Shukaku tried to struggle, but unfortunately, a light blue smoke wrapped around it, making it unable to move.

The Chakra that Su Xiao absorbed was stored in the energy ball near his heart, and the Bijū Chakra began to transform as soon as it entered the energy ball, turning into colorless energy.

As soon as this colorless energy appeared in his body, the green steel shadow energy in his body became active to the extreme, almost wrapping up this colorless energy in an instant. This time, the blue steel shadow did not devour other energy but swallowed like a hungry wolf.

The blue steel shadow rose three levels in a row, which was not all. Su Xiao continued to absorb the Bijū Chakra.

"Human, wait, let's discuss how sealing me in your body. I can share the chakra with you, which is a move stronger than the Sage mode."

Chapter 546: Spare Your Life

Shukaku tried to negotiate with Su Xiao, but Su Xiao remained unmoved, sealing other creatures into his body and retaining the consciousness of the other party? That was simply a fantasy for him.

"Bastard! Where did this monster come from? How can there be such a thing in the world? Even Otsutsuki can't absorb my origin."

The crane's voice became smaller and smaller, and Su Xiao's green steel shadow level continued to increase.

After the initial adaptation period, Su Xiao increased his hand's strength, and the nuclear devouring suction rose sharply. This time, the crane could not speak.

The pleasure of absorbing the energy of high-level creatures was indescribable, and it could also improve himself when absorbing energy.

Su Xiao finally understood what Marvin Waltz said before. He could not lose himself when absorbing energy. Otherwise, he would become a blade demon.

Su Xiao absorbed energy in the sand ball, but it was dead silent outside the sand ball. Deidara flew hundreds of meters high, and the Sand Village stopped shooting arrows.

It was not because Deidara flew too high that the Sand Ninjas stopped shooting arrows, but because something suddenly appeared near the sand ball in the sky.

"What the hell is this? Am I dreaming?"

A Sand Ninja took two steps back, and the kunai in his hand fell to the ground. Even though he had been through hundreds of battles, his calves were trembling.

"This thing is... the Susanoo of the Uchiha clan? Impossible, the Susanoo is not so huge, and what is with this terrifying pressure?"

The Sand Ninja Baki swallowed with difficulty and looked up at the sky in a daze.

At this time, there was a hundred meters tall blue shadow in the air. The shadow was wearing armor, and its eyes had a red light. There was a long knife at its waist.

"Choose me..."

The shadow made a call that only someone could hear and tried to merge with the sand ball below.

Bang!

A force bounced off the huge shadow. The shadow seemed to have no subjective consciousness but subconsciously wanted to integrate into someone in the sand ball.

"The demon of the sword, everything can be cut, everything will wither."

The shadow tried to integrate into the sand ball again but still bounced off. As long as Su Xiao's consciousness was not lost, the inheritance of the 'shadow of the law - crazy 'lineage would not integrate into his body.

The inheritance was not a good thing. After becoming the sword demon, it might cause the mind to be lost in the fierce battle, and it would not stop until it killed all nearby creatures or was killed. Otherwise, there would not be the name of the demon of the sword.

Not long after, the shadow in the air dissipated. This was a test. Su Xiao withstood this test. This shadow would not appear in the future unless he were completely lost when he absorbed the energy.

At this time, in the sand ball, the light blue smoke in Su Xiao's hand rose, and the uniquely high-level chakra of the Bijū continuously poured into his body.

This chakra was quickly converted into nutrients by the energy near his heart. The quantity and quality of the cyan steel shadow continued to rise, and the level also increased accordingly.

Su Xiao spat out a light red mist from his mouth, which contained the Bijū Chakra.

"Spare... spare me, if you continue, I will die, please spare me."

Shukaku's begging sound made Su Xiao stunned, the blue light in his eyes receded, and he concentrated and entered the space of consciousness where Shukaku was sealed.

In the space of consciousness, Shukaku was locked in a cell, and the iron bars of the door had a seal. This prison door seemed to be strong, but Shukaku had twisted it, and it could not be compared with the seal of Kyūbi.

Because the body of Shukaku was sealed, Gaara needed to use his consciousness to suppress Shukaku and even could not sleep. Otherwise, Shukaku would take the opportunity to rob the body.

Looking at the Kyūbi Jinchūriki, that guy did not know that he had the Kyūbi in his body when he was a child, and the seal of the two was obvious.

Su Xiao stood in front of the prison where Shukaku was imprisoned. If the former Shukaku was a 'plump', it was as thin as a match. The purple patterns on its body began to dim, and its two ears drooped down powerlessly, like a stray dog beaten up.

"You bastard..."

Shukaku just wanted to speak,

He found that Su Xiao was looking at it with burning eyes, and the light blue smoke rose from his left hand.

"This is a tailed beast? A new species, what kind of life form is it?"

Su Xiao looked at Shukaku and seemed to be ready to tear it apart and study it.

Shukaku was about to explode, but it did not dare to attack. Three-quarters of its origin power was extracted, and its chakra was almost all sucked away. If it continued to be absorbed by this human, it would die.

"I will spare your life for the time being."

Su Xiao's body turned into blue smoke and disappeared.

"This terrifying human."

Shukaku lay motionless, with a withered appearance, did not know what Nagato would think after seeing this withered tail.

Su Xiao, who was in the sand ball, opened his eyes, and a blue light flashed in his eyes. Gaara, who was not far away from him, had lost consciousness.

He punched the sand ball, and the sand ball shattered. The yellow sand gradually slid down from the back of the clay bird. It was the clay bird who had been flying with the sand ball. Otherwise, the sand ball would have fallen to the ground.

Su Xiao stood behind the clay bird and roughly sensed the changes in his body.

The green steel shadow energy surged in his body. Su Xiao felt that the current green steel shadow was much stronger than before in terms of quantity or quality.

Now that he was in the sky of the Sand Village, Su Xiao did not have time to check the changes of Qing Gangying, so he had to retreat first.

Holding the unconscious Gaara in his hand, Su Xiao controlled the clay bird to fly high into the sky.

"Gaara!"

A heart-wrenching cry came from below. It was Temari with bandages around her neck. If Gaara did not want to save her, she would not lose so quickly.

"Stop them."

Baki's eyes were red. If the fifth generation Wind Shadow were taken away, the Sand Village would lose a lot of faces.

A large number of arrows shot into the sky, wrapped around the arrows and exploded, the roar was endless. Unfortunately, Su Xiao and Deidara flew too high, far beyond the accurate range of the arrows.

"Annoying guy, I will give you a big gift before leaving. No, it is art."

Deidara took out the 18 times that he had already prepared. He made a seal with both hands, and with a bang, white smoke rose. The 18 times the size of the explosion doll became bigger, and it fell at high speed towards the Sand Village.

"Something is coming down."

"Organize defense!"

Many defensive type ninjutsu were used, and the Sand was fully defending against Deidara's bomb.

Eighteen times smashed on a layer of earth wall, the glaring white light spread, and the explosion did not make any sound at this moment.

The white light smashed the earth wall above the Sand Village, and the Sand was hidden in the building below.

Boom!

The explosion spread and the strong wind caused by the explosion blew Su Xiao's short hair, and the Sand Village below was covered by a big fireball.

"What a beautiful explosion, hmm."

A smile appeared on Deidara's face, and blood dripped onto the back of the clay bird under his feet.

"Cough, cough, cough."

Deidara coughed dryly. He tore off the clothes on his collar. There were obvious marks on his chest and abdomen. Gaara caused this. Deidara had at least broken seven or eight ribs.

Compared to Deidara, Su Xiao's injury was not worth mentioning. His right arm was a little red and swollen, and there were a few small wounds on his body.

After Deidara threw the bomb, the Sand Village did not fight back. Two out of five of the buildings in the village were blown up, and the injuries and deaths of the Ninjas could not be counted for the time being.

"Let's go."

Deidara laughed, Su Xiao carried the unconscious Gaara, and the two left.

The two attacked the Sand Village directly, and the result was that they escaped after taking the human pillar.

The Sand Village was in such a sorry state because there were traitors inside and they were caught unprepared.

The second reason was that there were too few high-end forces in the village. Only Gaara and Chiyo could not fight in the air. Moreover, she sensed that the scorpion was nearby, so she did not make a move and was ready to deal with the appearance of the scorpion at all times.

The third reason was that the Sand Village was not united enough. It perfectly describes the current Sand Village with a plate of loose sand. If Su Xiao and the other two attacked Konoha, the result would be very different.

But these were not important. After this battle, Su Xiao and the other two would be alerted by many villages. After all, this kind of madman who dared to attack the village in public was rare. At least in recent years, there had not been any.

Chapter 547: Attitude Issues

In the Sand Village, five minutes after the explosion.

The pungent smell of smoke filled the air, and the buildings at the edge of the Sand Village collapsed. The surrounding circular mountain walls were full of cracks.

"Help... help."

"Come on, my leg."

A huge rock trembled and was pushed to the side with a rumble.

"Temari, are you alright?"

The chakra lines stretched out from Kankuro's ten fingers.. He was in the middle of a post-war rescue operation.

"Cough, cough, cough..."

Temari coughed again and again. When she looked up and looked around, her first thought was, "Where is this? Is this the Sand Village?"

There were several burnt corpses scattered around Temari. The surrounding ruins were all stimulating her nerves. She seemed to think of something and grabbed Kankuro's arm suddenly.

"Where is Gaara?"

Hearing Temari's question, Kankuro lowered his head and gritted his teeth.

"Lord Wind Shadow was... taken away by the thieves of Akatsuki."

A female Sand Ninja whose half body had been blown up gasped with difficulty. Her bloody hand reached out to Temari. Temari quickly stepped forward and grabbed the hand of the female Sand Ninja.

"You must... save... Big Wind Shadow..."

As she spoke, the female Sand Ninja lost her breath, her arms powerlessly hanging down. This was Temari's close friend, his best friend.

"Ah!"

Temari looked up at the sky and shouted. Tears rolled down her cheeks. After a long time, she calmed down.

"Kankuro."

"What?"

Kankuro seemed to find something wrong with Temari.

"Find a way to ask for help from Konoha. They can satisfy any request. The thieves of Akatsuki must pay the price."

"Well, Baki has asked for help. With the treaty, Konoha will not sit idly by."

There was also a light of hatred in Kankuro's eyes. The figure standing in the sky with a long sword had been imprinted in his mind. The moon behind the other side seemed to be blood red, dyed red by the sand.

Konoha Village, in the office building of the Hokage.

Two hours after asking for help in the Sand Village, the 5th Hokage received the news.

"Shizune. Did the Sand Village provide other information?"

Tsunade wore a loose green dress, but her breasts could not be covered. Although she was not young, her appearance was not the slightest bit old. She looked like a mature woman in her twenties or thirties.

"Tsunade, this is the specific information about the attack on the three people in the Sand Village."

The secretary handed over three pieces of information.

"Is this a trap?"

Tsunade had participated in the second world war, so she didn't have a good impression of the village.

"These three guys..."

A white-haired man sitting opposite Tsunade spoke. It was Jiraya who had just returned to Konoha.

"What's wrong, Jiraya?"

Tsunade looked at Jiraya in confusion.

"I fought these three before."

"What!"

Tsunade sat up straight and picked up the three documents on the desk.

At this time, there were other people in the Hokage, a blonde youth, a pink-haired female ninja, and a white-haired ninja.

The three of them were: The plot's protagonist, Uzumaki Naruto, the medical ninja Senbonzakura, and finally Kakashi, who was a copy of the ninja.

The three of them did not speak, only quietly watching.

At this time, Naruto was somewhat different from when he was a teenager. Although he was still a little impulsive when encountering something, he would not make a fuss. After three years of cultivation with Jiraya, he was more mature.

"Sand village traitor scorpion, Rock village traitor Deidara, and... the ninja Byakuya who doesn't use ninjutsu? Is this guy a reserve member of Akatsuki?"

Tsunade threw down Su Xiao's file and carefully looked at the files of Scorpion and Deidara. They were both very famous rebels.

The information the Sand village sent to Konoha was only the attack and the wind shadow being caught.

The specific information was not introduced because it was too shameful.

Jiraya also picked up Su Xiao's information on the table.

"Tsunade, this guy is not a reserve member."

Tsunade looked up at Jiraya. Although the ninja who used the 'endure knife' was not weak, ninjutsu and physical skills were the mainstream fighting style of the ninja.

Jiraya hesitated for a moment and unbuttoned his clothes, revealing the wound still bandaged.

When the bandage was untied, a half-meter long and bone-deep wound appeared. This wound was very ferocious, and there were traces of blood on the wound.

"This is what that guy left for me. My heart would have been cut if I didn't dodge in time."

Tsunade frowned after seeing the wound on Jiraya's chest. The green light on her hand flashed, and she pressed one hand on Jiraya's chest.

"This kind of injury..."

Haruno Sakura, who was on the side, was shocked when she saw the shocking wound. She was a medical ninja and knew how serious this injury was. The fact that she did not die meant that she had a strong vitality.

"Your ribs are broken. Why didn't you tell me earlier?"

Tsunade looked unhappy.

"You have almost recovered. You are too busy after becoming Hokage, so I didn't bother you."

Jiraya smiled and scratched his head.

"Idiot."

Tsunade cursed in a low voice and kept moving her hands. Her face turned red after a long time, and her wounds recovered a little.

"Tsunade, how are you going to deal with this?"

Jiraya was also hesitating whether he should personally go to support the Sand Village. He still had other important matters to attend to.

As if seeing through his thoughts, Tsunade whispered to Jiraya: "How was the investigation of the previous matter?"

"There are some clues. The lair of the Akatsuki is likely to be in the Rain Village. Of course, this is only my deduction."

"Rain Village?"

"Yes."

Tsunade was deep in thought. It was impossible to send troops directly to Rain Village. It would create diplomatic conflicts.

"This mission..."

"No."

Tsunade interrupted Jiraya.

"Continue to investigate the Akatsuki. As long as the organization exists, it is possible to attack Konoha. I feel that the Sand Village is just the beginning, and our support is just expressing our opinion. The distance is too far."

Jiraya nodded, and Tsunade thought the same thing. Even if they supported the Sand Village, they would not necessarily fight. This was an attitude problem.

"Got it."

Jiraya got up and left. Although it was important to support the Sand Village, he still had more important things to do. The Sand Village was an ally, but it was only an ally. It was not as important as his own family.

"We will go to help, but..."

Tsunade looked embarrassed. Most of the special Ninja teams in the village were out on missions, and those who did not leave had to stay in Konoha. After all, the neighboring village had just been attacked, and Konoha had to be more alert. Moreover, many mysterious forces have appeared in the Fire Country recently.

"Granny Tsunade."

Naruto opened his mouth, and Tsunade seemed to have a manhole on her forehead. Her gaze seemed to say: If you dare to call me granny again, I will hang you up and whip you.

Women cared about their age, and the Hokage was no exception.

"What is it?"

Tsunade's tone was not very good, and Naruto smiled as if he knew he had said something wrong.

"Let us go to the 7th class."

Naruto had just returned to Konoha, and he had been cultivating outside for three years. He was preparing to show off his skills.

"This..."

Tsunade hesitated. She had heard from Jiraya that the Akatsuki organization was plotting a Bijū. From the fact that the Ichibi Jinchūriki was kidnapped, this news had been confirmed.

There was a difficult problem in front of them. Now that no one was in the village, many superior Ninja teams went out and did not return. Class 7 seemed to be the best choice.

Tsunade knocked on the desk and made a bang.

"Sure, you guys will be the vanguard. Now, hurry to the Sand Village."

"Yes."

Kakashi nodded and left the Hokage's office with Naruto and Xiao Ying.

"Tsunade, is this okay?"

Shizune seemed to be worried.

"What is not a problem?"

Tsunade looked at Shizune with a smile on her face.

"It's to send Naruto to help."

After listening to Shizune, Tsunade shook her head.

"It will take three days to get to the Sand Village from Konoha. Even if Kakashi doesn't sleep or rest, it will take about two days. We only sent people to the Sand Village with the same attitude. The Akatsuki won't be so arrogant to stay near the Sand Country after catching Jinchuriki."

Chapter 548: Bobowang Won't, Why Can I Do

Wind Country, Desert Region.

The yellow sand raged, and Su Xiao and the others had already left the Sand Village area.

There were five people there because there was a captive and a Sand Ninja in the team, and the Sand Ninja was Yura, the spy of Scorpion.

At this time, Bobowang was carrying the half-dead Gaara, and Gaara's breathing was getting weaker and weaker, and the Shukaku in his body was also discouraged.

"Is this guy dead?"

Deidara reached for Gaara's neck to check if he still had a pulse.

"He hit too hard, Byakuya."

Scorpion also felt that Gaara was dying.

Su Xiao motioned for Bobowang to stop. He also felt that Gaara would die on the way, and the verification of the swallowing was too brutal.

After hesitating, Su Xiao took out a bottle of beginner alchemy secret medicine. The cost of this thing was low, and the recovery of life value was relatively low.

He did not know whether the medicine certified by the reincarnation paradise was effective for the plot characters. He could only try it now.

Opening the bottle of the beginner alchemy secret medicine bottle, Su Xiao took out a syringe, injected the liquid into the syringe, and injected it into Gaara's vein. At this time, Gaara could not drink the medicine, so this was the only way.

The medicine was injected into Gaara's body, and Gaara's body suddenly twitched. Su Xiao immediately grabbed my sore throat.

After more than ten seconds, Gaara's breathing was a little more stable, unlike before.

"This way, I won't die for the time being."

Su Xiao threw down the syringe in his hand. The experiment proved that the medicine certified by paradise effectively on the plot characters.

"You also know about medical Ninjutsu?"

Deidara was a bit surprised.

"A little."

After the injection, Gaara, who was in a coma, slowly woke up. The broken line tightly entangled him. With his weak body, he could not resist.

Ignoring Gaara, Su Xiao walked to Yura's side, patted Yura on the shoulder and said with a smile,

"You helped me a lot when I sneaked into the Sand Village."

Hearing Su Xiao's praise, Yura smiled politely.

"Mr. Byakuya, you flatter me. This is my duty."

"Well, thank you for your hard work."

While speaking, a dagger slipped out of Su Xiao's cuff, and a white light flashed in front of Yura.

Puchi!

Blood splashed on the yellow sand, and Yura opened his eyes angrily. A deep cut appeared on his throat.

Yura covered his throat with both hands, blood spurting from between his fingers. He staggered and shouted from the wound.

"Why, why?"

Yura did not understand. He was Scorpion's subordinate, but this man cut his throat.

Yura staggered back two steps and looked at Scorpion for help.

"Lord Scorpion, save me!"

But when Yura saw Scorpion, he was completely in despair. Hiruko did not move.

"What a tenacious vitality."

Finding that Yura would not die in a short time, Su Xiao stepped forward and slashed at Yura's neck again. This time, Yura fell to the ground, his legs kicked, and he knelt ---

Su Xiao took out a white cloth to wipe the blood on his hand.

There was a strange thing. There was no killing hint when he killed Yura. This was not the first time. There was no killing hint when he killed the Sand.

Not only was there no killing hint, but there was no reward from the world source when killing the enemy.

Su Xiao immediately consulted the reincarnation paradise, and the reincarnation paradise explained.

Su Xiao understood what was going on. It turned out that catching a tail was a plot event. He did not expect to catch this kind of good thing.

The plot event was very rare and could be comparable to the war mission. The reward was released after the final statistics.

Su Xiao asked when the plot event would end. He had successfully captured a tail. The answer to the reincarnation paradise was to get rid of all the pursuers.

This time, Su Xiao had a clear goal. He thought that only catching the pillars was enough. Now it seemed that catching the pillars was just the beginning.

If it were Su Xiao before capturing the pillar,

Perhaps he would not be able to deal with the current situation, but now it was different. The level 20 Qing Gangyin had a qualitative change! Even if Kakashi or Chiyo fought with him, he had the strength to fight. The new ability that appeared after Qing Gangyin's level 20 made up for one of his shortcomings.

The whole scene of Su Xiao killing Yura was Gaara's goal. At this moment, Gaara realized that he was going to die soon. This kind of ruthless enemy would not give him a chance.

"The pillar woke up."

Deidara looked at Gaara lazily. The previous battle had made him a little tired. Moreover, he was injured.

"Cut off his limbs. As long as he doesn't die, it's fine."

The scorpion controlled Hiruko to go forward.

"Wait, if I cut off his limbs, he should die."

Su Xiao stopped Scorpion, and Gaara secretly breathed a sigh of relief. Although he was not afraid of death, he did not want to be cut in the limbs.

Gaara just breathed a sigh of relief and felt a slight pain in his spine, followed by a warm feeling and finally numb.

"This is no problem."

Su Xiao threw away the syringe in his hand, and Gaara was injected with enough anesthetic to anesthetize the rhinoceros.

"Where is our destination?"

Only Scorpion was clear about the gathering place among the three.

"The Kingdom of River, River Valley..."

Scorpion stopped speaking and turned to look behind. Su Xiao and Deidara also did the same.

"Oh ---, after enduring 18 times, do you still have the power to pursue?"

Deidara lightly snorted. He did not expect the Sand Ninja to be so tenacious.

"Leave it to me, and then we will meet in the Kingdom of River."

Scorpion stood in place and did not move. Su Xiao and Deidara turned and walked out of the desert. At this time, they had reached the edge of the desert.

Su Xiao and Su Xiao were in charge of catching Jinchuriki, and after the scorpion was broken, this was something that had been agreed on before.

Su Xiao and Deidara walked forward on foot. A day later, the two arrived at the Kingdom of River and waited at a temporary stronghold in the Kingdom of River.

Rather than saying that this was a temporary stronghold, it was just a few big stones.

"Brother Scorpion is a little slow. This is rare. It can't be..."

Deidara suspected that Scorpion had died. Su Xiao sat on a boulder and smoked. He did not speak. Crack, crack, the sound of hardwood rubbing came.

"The pursuers are solved? It seems that the Sand Village has sent a lot of people."

Su Xiao flicked the cigarette between his fingers, and Scorpion arrived.

At this time, Hiruko was covered with scars, and Xiao's trench coat was tattered.

"The Sand Village almost went out."

Knowing this result, Su Xiao was not surprised at all. It was strange that the Sand Village was not provoked after that kind of thing happened.

"They will continue to chase. We have to hurry."

The three continued to move, and a rapid river blocked their way not long after.

The two sides of the river were dark red rock walls, and there was a framework made of red rock on the opposite rock wall, and there was a word "Forbidden" on the rock wall behind the frame.

Deidara and Scorpion jumped down from the rock wall and stepped on the water surface. Su Xiao and Bobowang looked at each other on the river bank.

Bobowang's eyes were clearly saying: 'Master, what should we do? I can swim. It's impossible to step on water. Would it be shameful to swim over?'

Su Xiao also would not step on water. If he jumped into the water now, he would be exposed. There was no chakra energy in his body.

It was true that the reincarnation paradise could disguise his ability, but it was too obvious that he could not erase it. He needed to find a way himself.

Su Xiao, a 'Ninja' who could catch a tail, could not step on water. It was simply a fantasy.

Rumble.

The rock wall opposite the river opened, and a dark cave appeared.

Su Xiao and Bobowang jumped simultaneously over the river and stepped onto the flat ground in front of the cave. Scorpion and Deidara did not notice the abnormality.

Chapter 549: Level 20

After entering the cave, Payne's phantom was already waiting inside.

"You guys are late."

Although Deva Path was only a phantom formed by the Illusion Light Body Technique, his Reincarnation Eyes were soul-stirring.

"Jinchuruki is unexpectedly strong."

Deidara's chest was still hurting. He had been on the way and did not have time to rest.

Rumble, the boulder outside the cave fell, and it was a little dark inside.

"Let's begin."

The hands of the Deva Path formed a seal and motioned Su Xiao to put Gaara on the ground.

As Deva Path struck the ground with one hand, an ominous fluctuation spread.

Boom!

Smoke and dust rose, and a huge statue slowly rose from the ground. This was the Gedo Statue summoned by Deva Path.

Gedo Statue had nine eyes, and it seemed to be made of stone, but in fact, it was not. Gedo Statue was composed of a high concentration of chakra, and the chakra was so dense that it was solid.

Two huge palms reached out from the Gedo Statue, shackles on his wrists.

"Very good, gather."

Several shadows appeared at the fingertips of Gedo Statue. These were the shadows of Ghost Shark and Weasel. The members of the Akatsuki organization had been preparing for a long time.

Including Su Xiao, Deva Path and others, there were seven shadows and three people in the cave.

Everyone stood at the fingertips of the Gedo Statue, just ten positions.

The shackles in front of the Gedo Statue opened without seeing any movements from Deva Path.

"From now on, it will last for three days. Everyone, pay more attention to your bodies. Zetsu, your body will reach the vicinity as soon as possible and monitor the surrounding situation. Use the most wide-range move."

"Got it."

After Heavenly Path gave the order, the shadow closed his eyes and looked like he was following orders.

Black Zetsu hid very deeply. Although he was the oldest, he usually did not show any abnormalities.

After everyone was seated, the fingers under the feet of the ten people showed a green light. Different words appeared in the light. The words below Su Xiao were 'Sky'.

"Sealing Technique - Illusion Dragon Nine Seals!"

Deva Path shouted, and Gedo Statue spat out nine streams of chakra from his mouth. This chakra formed a dragon shape and wrapped around Gaara.

Gaara opened his mouth wide, and the unique chakra gushed out from his facial features.

Su Xiao was shocked, not because of how terrifying the current scene was, but because he had absorbed a lot of Shukaku's chakra...

The fact proved that the recovery of tailed beasts was very strong. Even if Su Xiao swallowed it half to death, Shukaku still recovered a lot of chakras.

Moreover, it wasn't extracting chakra now but extracting the true form of Shukaku in Gaara's body.

"Eh?"

Deva Path seemed to have noticed something unusual.

"Is the tail... very thin?"

Deva Path had seen the true form of Shukaku through the Reincarnation Eye. He probably hadn't seen it before, but its withered appearance made him feel puzzled.

"Thin and weak?"

Deidara didn't know what was going on.

"I'm not sure."

The scorpion did not directly participate in the battle of catching a tail.

"Maybe I was too heavy before?"

Of course, Su Xiao wanted to get away with it. He had been in close contact with Jinchuriki when he fought.

"Byakuya, did you catch Jinchuriki?"

"Yes."

"What was the situation at that time? Be more specific."

Su Xiao described the situation at that time. Of course, he described the 'deleted version'.

"This is what happened. A light red chakra suddenly appeared, and there were vague shouts."

"What shout?"

"I can't hear it. I only heard about the seal type. I don't know what it is exactly."

After listening to Su Xiao's explanation, Deva Path nodded.

Although the long door that controls the heavenly path knows how to seal tailed beasts, there are many ways to seal tailed beasts in various villages. There have been rumors that the strength of the tailed beast is very unstable. As for Su Xiao swallowing the Bijū Chakra,

Nagato didn't think about it and didn't care about it.

"Forget it. The tail can recover in the Gedo Statue. As long as you catch it, maybe the Sand Village strengthened the seal of the tail."

Su Xiao had helped the Akatsuki organization catch the tail. If the law kept asking, it would be a bit unreasonable.

The task was only the pillar of strength. Who said it was not to absorb the Bijū Chakra? Moreover, there were other people in the Akatsuki who absorbed the Bijū Chakra, such as Ghost Shark.

Now the purpose of Akatsuki was to seal the tail into the Gedo Statue, and with each seal of a tailed beast, the Gedo Statue would open one eye, and the Gedo Statue had nine eyes.

Gedo Statue was the shell of the ten-tailed beast, and after gathering nine tailed-beasts, the ten-tailed beast would be resurrected. To be exact, the nine-tailed beast was stripped from the body of the ten-tailed beast.

And the true face of the ten-tailed beast was the divine tree, and the divine tree was the origin of Chakra.

If Su Xiao could devour the ten-tailed beast, the level of the green steel shadow would be greatly improved. Although this idea was very tempting, it could only be thought of.

The sealing began, and the work took three days.

Su Xiao was buying soy sauce, the ring in his hand was the 'original body', and he just had to stand.

Su Xiao yawned and looked around. It could be seen that the other people around were also very bored, but no one could move.

Hidan, who was opposite him, winked and seemed unable to stay idle for a moment while Deidara tilted his neck, looking like the golem's finger would fall at any time.

Kakuzu, Scorpion, Itachi, Zetsu, Deva Path, and the others were like old monks in meditation, their eyes closed and motionless.

Ghost Shark, on the other hand, was somewhat helpless. Standing there like this was extremely boring.

"Hey, hey, hey, this is too boring."

The lively Brother Hidan could no longer endure it and spoke first.

"Shut up."

Deva Path glanced at Hidan, and Hidan shut up resentfully.

The most unrestrained person present is our Bobowang. Bobowang looks at Itachi and then at Hidan, who is about to die from suffocation.

After Bobowang wandered around, he began to observe Gaara. With Su Xiao here, the other members of Xiao would not say anything.

An hour later, Bobowang also began to be bored. He began to exchange eyes with Hidan on the giant finger as if he wanted to communicate with Hidan.

After Hidan saw Bobowang's eyes, he seemed to find a new continent. He finally found a way to relieve boredom. He didn't know how these two buffoons communicated, but they became one after a while. They winked and played happily. The ghost shark who observed this scene was trying to hide its laughter.

Su Xiao didn't care about Bobowang, who was playing with Hidan. Yes, Bobowang was playing with Hidan.

Opening the skill list, Su Xiao looked at Qing Gangying, who had already V, and the attributes of Qing Gangying had changed greatly.

[Usage requirements: After opening, the user consumes a bit of mana value every minute, and the mana value will automatically close after it is lower.]

[Skill effect: After opening, every close combat attack will burn the enemy's mana values and cause the real damage of burning mana values, and the enemy has lost mana value. The enemy will suffer the sharp pain of burning mana.]

[Additional V ability]

[Controller: Can materialize the high intensity of the green steel shadow energy into three forms.]

[Form 1: Demon]

[Form 2: Ao Ge]

[Form 3: Blue Shadow King]

Chapter 550: Shield

Su Xiao looked at the green steel shadow of Lv.20 and was happy.

The previous explosion effect of mana disappeared, and there was a new ability. When burning the enemy's mana values, not only could it cause the real damage of burning mana values, but it could also add the real damage to the enemy who had lost 8 mana values.

This ability was much stronger than the mana explosion, could only explode once, and had a long cooldown time.

As the green steel shadow level increased, the mana values consumed were more and more terrifying, reaching 50 mana values per minute.

Su Xiao had 1488 mana values and could open the blue steel shadow for 30 minutes.

The power of Qing Gangyin was greatly improved, and it was not comparable to before.

Not only that, after Qing Gangyin reached Lv.20, there were two new abilities. The first was to manifest Qing Gangyin energy to form an energy shield. The shape of this energy shield was formed according to Su Xiao's idea. It could be circular or rectangular.

The strength of the energy shield could be adjusted. Su Xiao could choose to consume 50 points to 300 points of mana to form an energy shield. The higher the mana consumption, the higher the strength of the energy shield.

Although Su Xiao's attack was sharp, his defense had always been weak. Most of the battles relied on the 'protection' or '-Secondary Invincible Shield' to defend against the enemy's attack. If he could not defend, he could only rely on his body.

The two shields had a long cooldown time and could only be used once in battle.

Now that he had an energy shield, it was very different. The energy shield did not have a cooldown time. As long as Su Xiao had enough mana, the energy shield could always be used. This made him have a common defense method when facing the enemy.

The shape, size, thickness, and even the position of the energy shield were decided by Su Xiao. He could instantly generate an energy shield in any position within a meter nearby.

Su Xiao's hand flicked open, and a rectangular energy shield appeared in his hand out of thin air. Because he deliberately suppressed it, the size of the energy shield was very small, only the size of a palm, just floating in his palm.

This energy shield was light blue, the blue on edge was deeper, the whole was a bit transparent, it would not block the sight, there were fine lines on the surface of the shield, if you did not look carefully, you could not find these lines.

The energy shield floated in the air and did not move. Su Xiao could control the energy shield with his mind. This was an object formed by the energy of the blue steel shadow. He controlled it like an arm and a finger, without the slightest bit of difficulty.

But Su Xiao could only control the energy shield within a meter nearby. It was not that he could not control it, but he consumed a lot of mana values. If he controlled the energy shield from two meters away, Su Xiao would consume at least hundreds of mana values every second, which was so exaggerated.

The mana values consumed by Su Xiao to control the energy shield within a meter could almost be ignored.

He pinched the energy shield with his hand and exerted force on his hand.

Ka ---

Su Xiao's mouth twitched. It was not that the energy shield was broken, but this was too hard. The sound just now was from his finger joints.

The energy shield formed after 50 points of mana was converted into the green steel shadow energy. He could break this kind of energy shield with a knife.

If he used 80 points of mana to build an energy shield, it would be difficult to break it.

At 100 points, with his current sword skills, he would need at least 3 to 4 blades.

150 points did not need to be thought about. It was already good that Su Xiao could break it within 10 blades.

It was somewhat difficult to break it at 200 points, conservatively estimated that he would need to cut it for several minutes.

As for the 300 points of the highest intensity, Su Xiao could not break the energy shield of that level.

After the energy shield was formed, it did not exist for a long time. There was a time limit. If not broken by the enemy, the energy shield would be the strongest for the first ten minutes. After ten minutes, the energy shield began to show signs of decomposition until it completely disappeared after half an hour.

So the energy shield could not be used all the time. It was best to block the energy shield at the point of the enemy attack after the enemy attacked in order to defend.

As for whether the energy shield floating in the air would be sent flying,

There was no need to worry about this problem at all. The energy shield was centered around Su Xiao. As long as the enemy's attack was not enough to send Su Xiao flying, the energy shield would firmly block in front of him. After all, it had a spiritual link between Su Xiao and the energy shield.

Even if the enemy's attack was enough to send Su Xiao flying, as long as this attack did not break the energy shield, even if he retreated far away, the energy shield would still block in front of him.

After roughly figuring out the function of the energy shield, Su Xiao was very satisfied.

The mana value between 50 to 300 points generated the energy shield. The speed of production was extremely fast, it did not affect the vision, and the defense was amazing.

But there was also a problem: Su Xiao's mana was not enough.

If it were an energy shield with 300 points of mana value, Su Xiao could only form four of these energy shields, and the speed of mana consumption was extremely fast.

It was fine just like that. When he used the green steel shadow energy attack, he would consume a lot of mana values, and the consumption of 50 points per minute could not be ignored.

As time passed, Su Xiao felt that his total of 1488 mana values was insufficient. If the battle were more intense, he would have a situation of 'but blue.'

Su Xiao finally knew why the talent of his 'bite spirit' was passed down to the shadow of the law because the mana required to destroy the shadow of the law was more than that of the mage. Without this kind of talent ability, it was impossible to use the blue steel shadow to continue fighting.

Su Xiao had the talent to increase mana value after killing the enemy permanently, and the intelligence attribute was very high. Even so, he still felt that mana was short.

"I have to get some equipment to increase mana value when I return this time."

Su Xiao thought his mana value was enough before, but now it seems that it was not the case. If the battle were too intense, he would probably consume all the mana values in ten minutes of the battle.

It was not without benefits to consuming a huge amount of mana, and his combat power had increased significantly. At least it was much stronger than before.

The real damage that increased sharply, just the energy shield, made up for his lack of defense. Any ability could not compare.

The mage's 'eggshell shield' that wrapped the whole body was unsuitable for Su Xiao. That was inconvenient. It did not have an energy shield that could be produced and withdrawn at any time.

The energy shield may not be as simple as defense, and other uses have to be developed by him.

Su Xiao looked at the final form 3: 'Green Shadow King.' He was completely confused about this thing. Not to mention the awakening method. He did not even know what it was.

"You can't directly awaken it for me."

Su Xiao temporarily ignored this ability. Even if he wanted to, there was no way. Before the shadow of the law completely awakened, Green Shadow King would not awaken.

As for how to awaken the shadow of the law, this was not something that Su Xiao could touch on now. It could only be done after level five. Green Shadow King was a big move of the shadow of the law, a very strong big move.

Now Su Xiao had ordinary skills in the shadow of the law. Although they were all very strong, there was no killing move with great power, and Green Shadow King was the killing move of the shadow of the law.
