

R. Paradise 591

Chapter 591: So Coincidentally

A strange bird flew over the original site of Konoha. The centre of Konoha was razed to the ground, forming a giant pit surrounded by a circle of building debris.

Su Xiao looked down at the scene below. At this moment, the scene of Konoha could only be described as tragic.

In the anime, Zetsu experienced something wrong with the current situation of Konoha. More than 99 of the ordinary villagers died, and the Genin died. The survival rate of the Genin was less than 50. This was under the protection of the Psychic Beast Slug of Tsunade.

The mortality rate of the Jonin was not high, and the building debris swallowed only a small part of the Jonin.

In the ruins of the building at the edge of Konoha, a white creature came out of the broken stone, wrapped in a pink-haired ninja.

Sakura came out of the split slug and breathed heavily.

After a few greedy breaths, Sakura raised her head. The scene in front of her made her a little confused. Of course, after seeing the huge pit where Konoha was located, her eyes widened, and her pupils contracted.

Tears flowed down from her dusty cheeks. Her home, where she had lived for more than ten years, had been destroyed.

"What the hell is going on? Why are you doing this to us? What did we do wrong?"

Tears fell on the back of Sakura's hand, and a strange bird flew over her head.

Sakura subconsciously raised her head. She saw a man sitting on the back of the strange bird. He had a cigarette in his mouth, and his expression was calm.

"Roar!"

A roar came, and an ugly 'monster' appeared.

This monster was Naruto. The eight Chakra tails behind him shook, and the shape of his torso and head changed greatly. It was like he had fresh body tissue, like a fox demon with blood and flesh.

Naruto was between the eight tails and the nine tails. His consciousness was no longer there, and his blood-red vertical pupils were full of cruelty. It was the eyes of Kurama.

"Just a little bit more. As long as the seal is removed, I will be free."

Naruto spoke. His appearance was no different from a fox demon.

In the sky, Su Xiao saw Naruto in the eight-tailed state. He was not interested in fighting with this monster. It was suicide. Moreover, he had already felt that it was not Naruto who was controlling the body at this time but the nine-tailed.

Naruto in the wild state and the nine-tailed were two different concepts. Although Naruto, in the wild state, was powerful, it was brute force. He would only rush forward and tear the enemy apart in battle.

The nine-tailed beast was different. The tail beast was an intelligent creature, and it had survived countless teenagers. It had rich combat experience.

Su Xiao did not want to fight with the Kyubi, but some people thought that our brother Tendo was running fast and rushing straight to the Kyubi.

The real warrior dared to face the Kyubi, but unfortunately, the Kyubi was too strong.

Finding that Tendo was rushing over, the Kyubi raised its head and did not make a charging action at all, and its stomach began to swell.

The blood plate opened its mouth wide, and the Biju Cannon sprayed toward Tendo.

"Shinra Tensei!"

Bang!

The Biju Cannon bounced off and flew into the distance.

With a bang, the Biju Cannon exploded in the forest near Konoha, and the ball of fire soared into the sky, causing the ground to tremble.

"Is this power of the Kyubi? Just so-so..."

Before Tendo could finish his words, another Biju Cannon shot toward him. Shinra Tensei could use it once every five seconds, and Tendo could not bounce off this Biju Cannon.

Boom!

The soil splashed, and Tendo was blown far away. His upper body is directly inserted into the Naruto Rock, just in the nose of the stone statue.

Tendo's legs twitched and did not move. It looked like he had bad reception.

Although Tendo was blown away, the other five Peien had arrived and surrounded the Kyubi.

Without any nonsense, Peien and the Kyubi fought together, the explosion continued, and the original site of Konoha was destroyed again.

The strange bird that Su Xiao rode also rushed to the battlefield. The main mission had been completed, and he did not need to continue to fight.

He jumped down from the back of the strange bird and looked at Su Xiao, who had just broken free from the Naruto rock. There was some doubt in his eyes.

Su Xiao waved to Tendo. Although the distance was a little far, Tendo could see Su Xiao's mouth shape.

I wish you good luck, goodbye.

Su Xiao was ready to return to the reincarnation paradise.

Although swallowing the Kyubi could increase the level of the blue steel shadow, people had to be self-aware. Su Xiao was clear that he was not the opponent of the Kyubi, at least not now.

Although the Konoha Village was destroyed, many of Konoha's Jonin and the Anbu survived. These people would not ignore the Kyubi. Even if they could defeat the Kyubi, they would face the siege of Konoha's Jonin later.

Su Xiao had a lot of harvest in the Naruto world, and staying wasn't very sensible.

Sitting on the ruins, just as Su Xiao was about to return, a boulder in the distance was pushed away, and a little girl with a sorry appearance climbed out of the ruins. This little girl only had one arm left.

"Cough, cough, what bad luck. That must be Shinra Tensei from Nagato. Why did he put it on top of my head? It's very impolite."

Gulu patted the dust off his body with one arm. This arm was pierced through by steel, but she didn't care.

Gulu's movements suddenly stopped. She felt that someone was staring at her. She turned her head hard and saw the appearance of a person not far away. Her mind was spinning.

"Isn't this one from the auction... who is it? Darkness? Night? By the way, Byakuya!"

Gulu slapped his thigh, and a small cloud of dust floated up.

"Isn't this Byakuya? What a coincidence. Hello, hahaha, haha, ha."

Gulu laughed very awkwardly. At this time, it was as if 10,000 wild donkeys ran through her heart. Her delicate fists clenched, and her mouth began to whisper.

"He doesn't know about the demon hunting trap. He must not know. He only has 19 health left. How can he fight?"

Gulu stood in the same place and thought. Not far away, Su Xiao flicked the ash.

"I heard that you have a good ring."

Hearing this sentence, Gulu looked at Su Xiao with one big and one small eye, and his expression was a little broken.

"Rumors. Zetsu is a rumour."

"Is that so? How did Sheila die?"

Su Xiao smiled. Gulu was now in a sorry state. At first glance, she was being chased for a long time. Moreover, the other party had old injuries. This meant that Gulu had no recovery.

Gulu sighed. A long dagger appeared in her hand. This long dagger was sharp and thin, with dark purple light on its surface.

Seeing Gulu's dagger, Su Xiao felt a chill in his heart. This was a dark purple quality weapon with +10 and above enhancement, and it was inlaid with gems.

With Gulu's strength, it was normal to have a weapon of this grade. Moreover, this dagger was very suitable for Gulu. She had once obtained a light gold quality dagger. After weighing it, she still chose this dagger.

This long dagger was not only dark purple but the handle of the dagger was inlaid with four light gold gems!

The four light gold gems were respectively: Rapid Nicola(reduces air resistance and increases attack speed by 20), Sharp Calamity(increases weapon attack power by 10), bloodthirsty elf(attack recovery causes 11 of damage HP), spirit broken(attack with 18 real damage).

Chapter 592: Remember This Face

Su Xiao slowly pulled out the dragon flash on his waist. A great opportunity was right in front of him. It was stupid not to take advantage of it.

"You also want to rob the One Hunting Ring?"

A simple black ring appeared. Gulu used a dagger to pick up the One Hunting Ring and picked it up.

A strange thing happened. After the One Hunting Ring entered Gulu's mouth, she put the One Hunting Ring on her tongue.

Seeing this scene, Su Xiao was a little puzzled. Why didn't Gulu wear the One Hunting Ring? Was the single attribute of this thing not strong? Or maybe the ring attribute of Gulu was stronger.

"Although the probability of getting it is not high, it has the value of trying."

"The probability is not high?"

Gulu had the One Hunting Ring in her mouth. She didn't know why she smiled. When she smiled, her big watery eyes were like two crescent moons. Gulu, who killed people like flies, smiled a little stupidly.

"I understand. You will not threaten me to hand over the One Hunting Ring like those idiots. You will kill me and open the One Hunting Ring from the scarlet card. This kind of thinking..."

Gulu laughed a few times, and her shoulders trembled with laughter.

"You'd better not meet the pervert of our regiment commander. With your style of doing things, he will beat you half to death and force you to join us."

Speaking of this, Gulu seemed to think of a bad memory. She joined the regiment like this. After being beaten half to death by the regiment commander, he gave her two choices.

One was to join the adventurous group, and two was to strip her naked and then throw her into a group of hungry secondary demons.

Gulu didn't want to play a scene in the private group, so she joined the adventurous group very simply.

But after she joined, something unexpected happened to her. So far, she had never seen the captain of the adventurous group. Moreover, she found that the adventurous group was not an organization like the adventurous group but a nominal organization.

Apart from having a brigade number on her, there was no other responsibility. There was no need to gather in a derivative world. It didn't matter if she used the name of the adventurous group to do evil.

Gulu was still laughing, and Su Xiao was ready to fight.

"Wait."

Gulu put the dagger in front of her and looked serious.

She put away the dagger first, the One Hunting Ring that she spat out, and took out candy from the storage space.

Su Xiao still thought that Gulu was going to play a big trick, but who would have thought that the other party would take out a candy?

"It's useless to look at me like this. If I don't give you the candy too much, I won't die."

After peeling off the candy, Gulu happily threw the candy into her mouth.

"What should I do? I'm in a bad state. I will die if I fight with you, but I don't want to die."

On one side, Gulu's cheeks were propped up by Candy. Her big eyes turned, and she suddenly saw Kyuubi and Peien fighting in the distance.

"There's a way."

After a long sigh, Gulu began to break her thoughts again.

"You bastard, wow, I'm so unwilling. I have bad luck."

Gulu seemed to have decided to hunt the rings in her hands.

Gulu's petite body bent, and the Lord of the Hunting Rings were held in her hands.

"Go!"

Gulu threw the Lord of the Hunting Rings with all her strength, and the Lord of the Hunting Rings flew to the battlefield between Peien and the Kyubi.

"I wish you the death of Kyuubi."

Leaving this sentence, she ran out of Konoha Village at full speed with a depressed expression. With her character, she would not hand over the One Hunting Ring even if she was interrogated.

Although her extreme character did not mean that Gulu wanted to die, her strength was hard to come by, and she still wanted to live happily.

If she could use the One Hunting Ring to kill the enemy, it would be different. That battlefield was extremely dangerous and would be affected if she got close.

Hunter's Ring floated in the air, and Gulu smiled happily.

Su Xiao looked at Hunter's Ring in the distance and raised his left arm silently.

Zi ---

The broken line shot out and quickly flew in the direction of Hunter's Ring.

Just as the rings flew near the battlefield of the Kyubi and Peien, the boundary line also arrived.

With a sound, the hook at the tip of the boundary line passed through the demon hunting ring and entangled the boundary line. This was almost the farthest distance that the boundary line could send out.

Withdrawing the boundary line, the Lord of the Hunting Rings appeared in Su Xiao's hand.

Gulu, who was running wildly, was stunned.

He almost hit a tree on the edge of Konoha.

"What kind of operation is this? I was too careless."

Gulu stopped in place. This result made her very unwilling.

"No, I can't stand this grievance. Is this guy Spiderman?"

If Su Xiao risked death to get the One Hunting Ring, it would be fine, but the result made him a little tangled.

"Hey!"

Gulu shouted and stared at Su Xiao.

"Remember this face for me."

Gulu pointed at herself.

"Remember it firmly."

After that, Gulu, who had run far away, disappeared into the forest near Konoha. As soon as she entered the forest, the anger on Gulu's face disappeared.

"I found another interesting toy. This toy looks very strong. It won't be like Qian La, who would cry and hand over the One Hunting Ring before making a move. Cold and fierce man, I hope you will still be fierce after falling into my hands. Don't disappoint me, Byakuya."

Gulu, who was breaking her thoughts, resolutely crashed into a tree.

Bang, Gulu crashed into a big tree, and it seemed that she couldn't be pulled out.

The minds of the people in the regiment were not normal, so of course, Gulu included.

...

Su Xiao held the One Hunting Ring in his hand, thinking about the gains and losses of this matter.

First of all, he offended Gulu. As for whether he offended the adventurous group, the answer was that he did not offend them. He killed the people of the adventurous group, but the adventurous group did not send people to kill him. There was no follow-up on that matter.

Not only did he offend Gulu, but if Gulu spread the news that she got the One Hunting Ring, maybe a large adventurous group would chase her.

Considering the fake number given to her by the reincarnation paradise, the large adventurous groups could not find her unless it was a chance encounter.

Overall, the benefits were greater than the disadvantages. Moreover, there was some luck in getting the One Hunting Ring. Gulu had been chased to the point of death. She was also attacked by Shinra Tenra Tensei. Otherwise, she would not give up the One Hunting Ring.

Or this was not due to luck. The Water Country was the starting point of Su Xiao's arrival in the Naruto world. If Gulu was in the Water Country, the possibility of meeting her was very high.

After that, Su Xiao attacked the Sand Village and wandered around the world. Finally, he attacked Konoha. The power of the Naruto world was not much. His indifferent actions greatly increased the possibility of encountering Gulu.

Su Xiao chose to return to the reincarnation paradise.

[Checking to the hunter that the hunter has obtained the qualification to return. Not in battle, you will return to the reincarnation paradise in two minutes.]

Su Xiao waited for the return and checked the attributes of the One Hunting Ring.

[Demon Hunting Ring(Set 1/3)]

[Origin: Any LV 20 or above the derivative world.]

[Rarity: Dark Purple(Set)]

[Type: Ring]

[Durability: 59]

[Equipment requirement: Strength 40, Agility 40.]

[Equipment effect 1: Resistance(Passive) reduces all abnormal state duration by 30(such as dizziness, curses, and other negative states)]

[Rating: 260]

[Description: One of the Demon Hunter set. After gathering three pieces, the set effect will be activated.]

[Set effect 1: Demon Hunter(Passive), Strength +15, Agility +10, Stamina +10]

[Set Effect 2: Melee Human(Passive), Damage increased by 40, maximum HP +20.]

[Set Effect 3:(invisible)]

[Price: 73,000 Paradise Coins]

Chapter 593: Return

Although the attributes of a single set of demon hunting equipment were good, it differed from gathering three pieces.

After seeing the effect of the set equipment, even Su Xiao could not help but feel his heart beating faster. He finally knew why a large adventure group robbed this thing.

The effect of the set of demon hunting equipment could only be described as strong to the point of abnormal. Not to mention the high bonus of strength, agility, and body attributes, just the increase of 40 of melee damage was enough to make any close combat crazy. Moreover, there was a bonus of 20 of the biggest life value.

Attack power, speed, survival ability, and the demon-hunting suit included these three points, and the close combat fantasy set was worthy of its reputation.

And these was only the first two effects of the set. The third set effect was unknown; it needed to collect three demon hunter sets to see.

In the past, the effect of the two attributes showed that the third set attribute was not weak and was likely to be stronger than the first two.

"It seems I have to pay attention to the news of the demon hunter set in the future."

Su Xiao's body gradually faded, and the sense of teleportation appeared.

[I found the hunter in the large-scale storyline event, 'Peien Attack Village'.]

[Return will lead to the interruption of the large-scale storyline event.]

[has been forcibly interrupted.]

[Because of forcefully interrupting the large-scale storyline event, there is no reward.]

Nagato could not take the Kyubi away, and Su Xiao knew this from the beginning.

Even if Nagato could defeat the Kyubi, Konoha's Ninjas would swarm him. Even if he defeated many of Konoha's Jonins, Danzo would not let him take the Kyubi away, and Danzo also had his eyes on the Kyubi.

So from the beginning, Su Xiao knew that the result of the attack on Konoha would be a failure. His goal was just to let Nagato flatten Konoha.

The reward for completing the large-scale plot event 'Peien Attack Village' must be amazing, but with Su Xiao's current strength, he would not be disappointed that there was no reward for the plot, and it was already a pleasant surprise to be able to get the pale gold treasure chest.

When the familiar stick came, Su Xiao's eyes darkened. When he regained consciousness, he was already in the exclusive room. On the side was Bobowang, who was holding the back of his head.

[Transfer completed. Hunter returned to the exclusive room.]

[Exclusive Room is for Zetsu to be safe. No one can enter except the hunter.]

[Hunter returned to the reincarnation paradise and began to calculate the reward of the derivative world.]

Derivative World: Naruto

Difficulty: LV.3 ---?(open world, different regions are different in difficulty).

Obtained Origin of the World: 39.9.

Completed mission number: 3. (Main Mission X2, Hunting Mission x1)

[Comprehensive evaluation: S -. (Note: The evaluation is divided into E - to S +. The comprehensive evaluation is calculated according to the sum of the world source and the number of completed tasks.)]

Begin to collect the world source...

The world source is collected, and the rewards are calculated.

[Reward: 25 attribute points (already included in the derivative world), 26,000 paradise coins.]

The overall rating was S -, and now the hunter level was LV 10. The hunter level was +4, upgraded to LV 14.

The settlement was completed, and the reward had been automatically deposited into the hunter brand.

...

Returning to Zetsu's exclusive room for safety, Su Xiao's tense nerves gradually relaxed.

The green light appeared, and the recovery function of the reincarnation paradise was activated. It cost 1,100 paradise coins, and Su Xiao's injury recovered.

He stayed in the Naruto world for nearly two months and experienced many battles during this period.

The derivative world could not rest at ease, and he had to be on guard against danger at any time when he rested, so as soon as he returned to his exclusive room, Su Xiao fell asleep, and so did Bobowang.

After sleeping for a long time, Su Xiao got up in a daze, staggered to the bathroom, and yawned from time to time.

After washing up, Su Xiao, who had water droplets on his head, walked out of the bathroom with a cigarette in his mouth.

"Don't sleep."

Su Xiao kicked Bobowang, but Bobowang did not respond. He found this situation. After putting on his clothes, he left the exclusive room alone.

As soon as Su Xiao left, Bobowang's furry ears moved. He looked up and opened his eyes. He looked at the sofa in the exclusive room.

The gaze seemed to say, "Bobo has been unhappy with you for a long time. Today, I finally found an opportunity. Prepare to die!"

The door of the exclusive room was suddenly pushed open. Su Xiao looked inside, and Bobowang was still sleeping on the carpet.

Nodding, Su Xiao closed the door and left. Bobowang pretended to sleep for a while and got up. He slowly walked to the sofa that was worth 150 paradise coins. This was just the daily 'fight of wits and courage of a man and a dog.

...

In the attribute strengthening hall, paying 100 paradise coins, Su Xiao got the right to use an attribute strengthening warehouse.

[Welcome to the attribute strengthening warehouse, your naked attributes are as follows.]

Strength: 50

Agility: 50

Stamina: 43

Intelligence: 50

Charm: 5

[Hunter can freely allot attribute points: 25 points]

[Detected that the hunter's main attribute is strength, agility, and intelligence. Please prioritize upgrading the three main attributes.]

Su Xiao was silent. Since he had decided to develop the four attributes simultaneously, his physical attribute was slightly lower.

Before, for the three main attributes to reach 50 points, his physical attribute was only strengthened by one point. This time, he was ready to strengthen some physical attributes.

The physical attributes were closely related to the ability to resist and endurance, and Su Xiao had already experienced the benefits of the physical attributes in the Naruto world.

After some deliberation, Su Xiao's distribution method was: Strength +5, Agility +5, Intelligence +5, Stamina +10.

[attribute distribution complete, strengthening begins.]

The attribute strengthening capsule began to run because it was a full 10 physical attributes this time, so the pain when strengthening was not obvious.

The strengthening soon ended. Su Xiao moved his body. Although the muscle lines were not obvious, they contained a terrible power.

Now Su Xiao's naked attributes had become:

Strength: 55

Agility: 55

Stamina: 53

Intelligence: 55

Charm: 5

...

Su Xiao raised his eyebrows and felt that there were more than 5 attribute values.

This was not the key point. His harvest in the Naruto world was not small. If he wanted to convert the harvest of resources into strength, he would have to be busy for a while.

His stomach was a little hungry, so he went straight to Xia's restaurant. When he came to the front and back of the restaurant door, he found that the door was closed, and there was a sign hanging at the door.

This restaurant has been closed for a day.

"Could it be that it has closed down?"

Su Xiao seriously suspected that Xia's restaurant had closed down because the business was too bleak.

"Don't curse me. This is the sign from yesterday."

Xia's voice came from behind. At this time, Xia was wearing a sports suit and looked a little depressed.

The door opened, and Su Xiao walked into the restaurant and found a seat to sit down.

"What do you want to eat?"

Xia seemed to be a little disappointed.

"Anything is fine. Looking at your expression, you seem to be a little disappointed."

Hearing what Su Xiao said, Xia, sighed.

"I... went to the arena yesterday."

Xia felt a little wrong.

"Twenty-seven consecutive defeats. Is there a mistake? Why can't I beat someone with a lower physical fitness?"

Su Xiao shook his head. The twenty-seven consecutive defeats were indeed somewhat astonishing.

"Look here."

Su Xiao stretched his palm in front of Xia.

"Why... ah! What are you doing? You scared me."

Xia screamed. The reason was that Su Xiao's hand suddenly pinched her cheek, and Xia was very speechless.

Let go of Xia's smooth and tender cheek, Su Xiao said: "This is not an attribute problem. You rarely go to the trial field?"

"Go... went once, I am very poor, so you understand."

"Then you can only continue to go to the arena to be abused. You have to get used to fighting first. The workers rarely enter the derivative world. Even in the derivative world, they rarely fight. You don't know how to fight."

"Well, thank you for your advice."

Xia walked to the back kitchen and waved his hand from time to time.

Most of the workers would not fight. Even if they entered the derivative world, they would spend paradise coins to find someone to protect them.

Su Xiao was different. Fighting was already a part of his daily life. He had long been used to fighting and getting injured. It was as normal as eating and drinking water.

Not long after, a plate of exquisite food was placed in front of Su Xiao.

"Hey, although it is a bit presumptuous to say that, can you teach me to fight? For example, practice with me."

Su Xiao, who was stuffed with food, raised his head.

"No."

"Hey, you rejected Zetsu so straightforwardly. I am very sad."

"I will kill the opponent instinctively, so sparring with me will cause a psychological shadow to you. The arena is more suitable for you. By the way, you can go to Bobo to spar. If it is you, it will agree."

"Bobo? Then husky knows how to fight?"

Su Xiao smiled and did not answer directly.

"You can try it, but it is very lazy. You have to use delicious food to tempt it."

Bobowang would usually hang out in the reincarnation paradise. As for whether he could find Bobowang, it depended on Xia's ability.

Su Xiao did not know how to practice with others. His knife could only kill people. That was all.

After the meal, Su Xiao returned to his exclusive room. As soon as he entered the door, he saw the 'corpse' on the sofa.

Bobowang looked up. Although he felt guilty, he did not show any fear.

"Sure enough, you were pretending to be asleep before."

Su Xiao kicked Bobowang and sat on the bed. Bobowang ran out of the exclusive room. Su Xiao did not take the slippers to whip it. Bobo was very happy. It was ready to be whipped before.

Before leaving, Su Xiao gave Bobowang 2000 paradise coins. This was Bobowang's pocket money and let it buy a sofa that was pleasing to the eye.

There were two treasure chests in Su Xiao's hand. One was purple, and the other was light gold. He had not opened a light gold treasure chest before. He inevitably had some expectations in his heart.

This was the treasure chest of the flag wood Kakashi, and the gold content was extremely high.

Chapter 594: The Will of Fire

Holding two treasure chests in his hand, according to the usual practice, Su Xiao should hang a cigarette and take out Fate Redemption to light it up to redeem his bad luck.

Su Xiao was a little puzzled about the matter of luck. He was not a gun warrior. Why would he have intermittent bad luck?

Yes, it was intermittent bad luck. His luck was good and bad at times.

After opening more than N treasure chests, Su Xiao always formed some rules, luck was 'equal', such as today's bad luck, and tomorrow, his luck might be bursting.

After this, Su Xiao held a cigarette in his mouth, but he did not light it but picked up the purple treasure chest.

Luck should be left for the pale gold treasure chest, so he might as well use this purple treasure chest to overdraw his bad luck.

[Yes/ No Open the treasure chest(purple)]

Choosing to open it, Su Xiao thought in his heart that there should not be a situation like flashing.

[You get 2000 paradise coins]

[You get 1000 paradise coins]

...

Su Xiao was stunned. Although he was mentally prepared, this kind of harvest made him unable to accept it for a while.

After thinking for a moment, Su Xiao did not choose to open the light gold treasure chest but quickly left the exclusive room and went straight to the trading market.

Near the trading market, in the shop opened by a worker.

Although this shop was not big, it was crowded and lively.

The shop was called 'Luck and Strength'. The goods sold here were very special, the treasure chest and the scarlet card.

Some contractors who did not like to gamble on luck would sell the treasure chest or the scarlet card to get the paradise coins and the equipment needed.

Some contractors liked to gamble on luck, so this place was somewhat similar to the casino, and it was also similar to stone gambling.

There were many people who broke their fortune after opening the treasure chest, and there were also many people who became rich overnight.

Su Xiao squeezed to a cabinet counter, and the employee salesperson at the counter was busy sweating.

This counter only sold green treasure chests. Su Xiao wanted to try an idea.

After waiting for a few minutes, the working girl who was panting stood behind the counter and said politely, "Customer, how many treasure chests do you need?"

"Three."

"5,000 paradise coins for one."

Su Xiao thought to himself. The green treasure chest was 5,000 paradise coins for one.

After spending 15,000 paradise coins to buy three green treasure chests, Su Xiao returned to his exclusive room.

Three green treasure chests were placed in front of him, and Su Xiao opened them.

[You have opened the treasure chest(green).]

[You have obtained 800 paradise coins...]

[You have opened the treasure chest(green).]

[You have obtained 1100 Paradise Coins

You have opened the treasure chest(green)

You have obtained a solid hand shield(white)

There was no doubt that the three green treasure chests were damaged, but Su Xiao did not care. He was overdrawing his bad luck.

Putting the light gold treasure chest in front of him, Su Xiao took out Fate Redemption and lit the cigarette in his mouth. After spitting out a light golden smoke, he opened the light gold treasure chest without hesitation.

The exquisite treasure chest with light golden lines on the surface slowly began, and the light gold treasure chest gave people a sense of purity.

The golden light appeared, and at this time, Bobowang, who was holding a bag of snacks in his mouth, had just opened the door.

Seeing the golden light from the treasure chest, the bag of snacks in Bobowang's mouth fell to the ground with a click. It was full of heartache and seemed to miss something wonderful.

The golden light filled the exclusive room, and Su Xiao not only turned his head.

[You opened the treasure chest(light gold)

[You have gained 8,000 Paradise Coins.]

[You have obtained 11,000 Paradise Coins.]

[You have obtained Soul Crystal(Middle) x5.]

[You have obtained a Paradise of Affection(Dark Purple).]

[You have obtained the will of fire(pale gold)]

[Kiss the Heavens]

[Origin: Shadow Ninja]

[Rarity: Dark Purple]

[Type: Key Type: Consumable]

[Effect: After use, you can enter the world of Fire-Shadow Ninjas. The period is the middle Ninja exam.]

[Hint: Checking that the hunter has entered the record of entering the world of Fire-Shadow Ninjas. The timing is in conflict, so he can not use this item.]

[Rating: 168]

[Hint: When using this item to negotiate with female storyline characters, Favorability: 4.]

[Description: Carrying a small yellow book with you is not a good habit.]

[Price: 21,000 Paradise Coins.]

[Fire Intent]

[Origin: Shadow Ninja]

Quality: Light Gold

[Type: Pendant(Accessory type equipment is a rare item)]

[Durability: 73]

[Equipment requirement: Willpower is more than 15 points(requirement met)]

[Hint: Will attribute is invisible. It is a hidden attribute.]

[Equipment effect: Heart Like Iron Stone(passive) greatly increases willpower, the endurance of pain, resistance to mental control(immune to mental control skills below 80 points of intelligence)]

[Rating: 310(Note: Light Gold equipment score - 261 points.)

[Description: Will originates from faith.]

[Price: 99,000 paradise coins.]

...

After seeing the soul crystal in his hand, Su Xiao smiled.

This was the treasure chest he had opened with the highest value, and the items he got were very good.

Because of the timeline of the Naruto world, Su Xiao could not enter the Naruto world on the day of the day. Every derivative world had progressed.

For example, Su Xiao left in the plot of the Peien Village, so he could not enter the middle Ninja exam before this point in time.

Although he could not enter, other contractors could. The number of Hidden Fire Ninjas in the derivative world was countless. The number was determined by the reincarnation paradise and participated in the space battlefield. Su Xiao, who was the judge, had known this for a long time.

As for the light gold equipment of the meaning of fire, although it did not seem to increase the combat power directly, it greatly enhanced the battle.

The battle in the reincarnation paradise was not a game not who had high attack power and who had more HP could win. There were many factors in the battle. Su Xiao had killed many enemies who had better attributes than him.

Willpower was related to experience. For people like Su Xiao, the willpower attribute would be very high, and the willpower attribute would be very low when they were spoiled and spoiled since childhood.

Standing in the mountains of corpses and sea of blood with a straight face relied on the willpower attribute.

And willpower had other functions, such as resisting mental control skills. What Su Xiao was most afraid of was being controlled.

After taking down Mikasa's mind +5 pendant, with the energy shield, the attributes of this pendant were somewhat weak.

Taking the Will of Fire, this pendant was very simple, the main body of a black rope and a pendant. The main body of the pendant was somewhat of a type of metal, and it was also somewhat similar to stone. It was fiery red, and the shape was the same as the pattern on the forehead guard.

Wearing [The Will of Fire], Su Xiao hesitated momentarily and then took out [Demon-Hunter].

Su Xiao now wore the ring as [Mithril Saint], and the attached ability was:

Equipment effect: Mithril Ignition(active). After using this skill, all the control effects of the wearer are removed. (The control skills released below 35 points of attributes)

[Hint: Mithril Ignition(active) consumes 100 mana values.]

[Hint: Mithril Burn(Active) Cooldown: 18 hours.]

...

Mithril Ignition could only remove control skills released under 35 points of attributes. It was indeed very strong in the early stage. At this stage, there were very few enemies that Su Xiao met whose main attributes were below 35 points.

As for the control skills below 35 points of attributes, it was unknown whether they could control Su Xiao or not, so [Mithril Saint] was useless.

Although the One Hunting Ring with a single piece could not trigger the effect of the set, the attributes of the One Hunting Ring itself were also good.

[Equipment effect: Resistance(Passive) reduces all abnormal state duration by 30(such as dizziness, curses, and other negative states)]

Compared to mithril burning(active), resistance(passive) was stronger at this stage.

In this way, [Misaka's mind+and [Mithril Saint are eliminated, the two can be sold, and the price is not low especially Mikasa's mind.]

Chapter 595: Clearance

After opening the treasure chest, Su Xiao checked the number of Paradise Coins he had.

Paradise Coins: 4,900 points.

Although there were a lot of Paradise Coins, for the current Su Xiao, this could not do anything at all. He needed to convert some materials into Paradise Coins.

Many things could be sold for a lot of money. Some items needed to be sold:

[Chakra Cultivation Method(Beginner Level)

Mithril Holy Ring(Purple)

San Heart +5(Blue)

Intimate Paradise(Dark Purple)

After selling all these things, they would get at least hundreds of thousands of paradise coins.

Su Xiao now needed paradise coins very much, such as upgrading to a sword master. Each level not only required soul crystals x10 but also 50,000 paradise coins.

Not only the sword master but other abilities also consumed a lot of paradise coins. Paradise coins were good things, not too much.

"Let's go to the trading market."

Su Xiao took Bobowang to the market.

"Did Xia look for you?"

"Woof."

"Oh? Then you and her spar."

Bobowang nodded and raised his head. His gaze seemed to say, "Bobo beat up that woman, beat her until she cried for her parents."

At this time, in Xia's restaurant, Xia was lying on a dining table with nothing to live for. Her white index finger drew circles on the table.

"I can't beat a husky and be completely abused. How shameful. Where did it learn that dodging pace? It is not scientific."

Xia thought of the previous sparring. She did not even touch Bobowang's hair, the opponent was too sensitive, and the timing and angle of the counterattack were very tricky.

Bobowang followed Su Xiao every day, and he did not know how many battles he had seen. The battle was not only Su Xiao's daily life but also Bobowang's daily life.

If not for he was lazy, if Bobowang fought with the first rank contractor, if not for the first rank contractor who was too strong, he would not be Bobowang's opponent.

Although Bobowang was stupid and cute, it did not mean he was weak.

In the trading market, Su Xiao came to the stall that he often used. This time, there was no one. This stall was located in the southeast corner of the trading market. The number of people was not much, but there was also a lot.

Su Xiao did not like to be surrounded by a large number of the contractor. If he were sincere, he would buy it. If he were not sincere, he would leave. At least he would not stay in front of a stall for a long time unless he took a fancy to the things in the stall and was ready to bargain with the stall owner.

After paying the rent, Su Xiao began to edit the price of the items.

First, [Chakra cultivation method (although this thing is blue, it allows the contractor to convert the value of the mana with Chakra, thereby using ninjutsu.

Some people sold the [Chakra cultivation, and the final transaction price was 200,000 paradise coins.

The second item was [Heavenly Paradise (Dark purple, although this thing is dark purple quality, it is a key consumable.

After hesitating, Su Xiao put [Heavenly Paradise (dark purple is priced at 80,000 paradise coins.

The third one was [Holy Ring (Purple, this thing is a "small artefact" for novices. The disadvantage is that life is shorter, so Su Xiao bid for 50,000 paradise coins.

[Protection(Active): Quickly generate an invisible shield to defend against attacks. The shield's durability is equivalent to the maximum lifetime value of the wielder: 80(+5 +10). Lasts for 30 seconds(+5 +20 seconds).]

[Hint: Activating the shield requires 10 of mana.]

[Hint: The cooldown time of the shield is 10 hours.(+5 +14 hours)]

Protection was Su Xiao's trump card. After using the energy shield, the shield of protection was useless. Now Su Xiao had 1583 points of mana values, 10 was 158 points of mana values(0.3 has been five).

With these 158 mana values, Su Xiao was more willing to use them to generate an energy shield.

It was not a protective shield.

The difference in strength between the two was too great. The duration of the shield was also different. The energy shield lasted for ten minutes before it began to drift away. The defence gradually weakened, and it lasted for about 20 minutes before it completely dissipated.

The shield of protection only lasted 30 seconds, and there was still a 10-hour cooldown time. The energy shield did not have a cooldown time.

More importantly, the shield of protection had a process of unfolding, and the energy shield was instantly formed.

Therefore, the shield of protection could not be compared with the green steel shadow energy shield. This equipment did not mean much to Su Xiao.

But there was one thing that could not be ignored that was that Mikasa's mind - this equipment was very strong, and not everyone had the green steel shadow energy shield.

After considering for a moment, Su Xiao priced Mikasa's mind at 70,000 paradise coins. For blue quality equipment, this price was already sky-high.

Chakra cultivation method(primary): 200,000 paradise coins.

Heavenly Paradise(dark purple): 80,000 Paradise Coins.

Mithril Ring(purple): 50,000 Paradise Coins.

Mikasa's Heart +5(blue): 70,000 Paradise Coins.

The price was marked. Su Xiao named the stall a premium product stall and opened it. This was a very suitable name.

As soon as the stall opened, a worker who passed by stopped, looked at the items on the stall, and then looked at Su Xiao.

"Brother, is this ring sold for 40 thousand?"

"Not selling."

"Let's discuss it..."

The worker was just about to bargain when Su Xiao spent 10 paradise coins to block the other party.

These workers collected the equipment at a low price and then raised the price to buy it. Su Xiao would not be a fool.

He could sell the equipment to a contractor who was used for battle at a lower price, and Zetsu would not sell it to merchants at a low price.

As for the reason why he did this, Su Xiao was not clear. He just felt that the equipment should be used for fighting, not to be sold back and forth.

After the worker muttered a few more words, he found that Su Xiao had blocked him.

"You are awesome."

The worker stamped his foot and left. He did not provoke or leave any harsh words. He just wanted to take advantage of the situation and not be a sinner.

In Reincarnation Paradise, no one would provoke others, even those large adventurer groups, unless there was a conflict of interest.

Those who could survive were not stupid. Those idiots who liked to 'pretend to be a pig to eat a tiger' had been eliminated in the trial world. The style in the reincarnation paradise was: Don't mess with me. I have nothing to do. If you mess with me, I will kill you. Just like this, a contractor who liked to pick a fight, at least Su Xiao had seen it before.

"Good stuff."

An older man squatted in front of the stall.

"This ring is a bit cheaper."

The older man's hair and beard were all white, and his face was rosy. Looking at his age, he was at least 80 years old, but there were no wrinkles on his skin.

"50,000, no bargain."

"As expected, forget this is a birthday gift for my grandson, so there is no need to waste time."

The older man paid the money, and the Mithril Ring on the stall(purple) disappeared, and 50,000 paradise coins entered the account.

Looking at the older man walking away, Su Xiao was quite surprised. Just now, the older man said it was a gift for his grandson, and it was extremely rare for both of them to enter the reincarnation paradise.

Five minutes after the stall opened, more contractors gathered around. None of them was extremely valuable, whether the chakra cultivation method or the other two items.

The threatening message appeared. These messages seemed to be brain-dead, but it would be troublesome and even death if a newcomer angrily scolded him.

There was a kind of person called a contractor who could chase the victims to the ends of the earth as long as he got the number of the victims until all the paradise coins and equipment of the victims were squeezed dry.

It was still the same sentence, and the interests triggered the conflict.

Chapter 596: Huge Sum of Money

Ignoring the rubbish messages, Su Xiao sat behind the stall in silence.

The contractor pointed at the items on the stall. Some people asked for the price, but few people sincerely bought them.

A small figure entered the crowd. For the adults around, this figure was much shorter.

"No wonder so many people gathered. There are so many good things. Let me see..."

The petite figure subconsciously bit her thumbnails. Out of the corner of her eyes, she saw this habitual action. Su Xiao turned his head to look at the person who had come. It was an 'acquaintance'.

"Little Daze."

The figure was Little Daze, whom he met in the survival trial. Little Daze had always disguised its identity and was not weak.

Little Daze seemed to have taken a fancy to a certain item in the stall and looked up at Su Xiao.

"Oh? It's you."

Their eyes met, and Little Daze revealed a smile. Two small dimples appeared on its face.

Su Xiao did not speak. The two might be enemies if they met again in the derivative world. The reason was that Little Daze liked to disguise, and Su Xiao knew the other party's background.

With Little Daze's personality, it was likely that it would take the initiative to find Su Xiao.

"Looks like there's no chance."

Little Dazet turned around and left, not asking about the price.

He continued to set up his stall, and an hour later, the Paradise of Intimacy(dark purple) sold for a price of 7,500 Paradise Coins.

There was still [Chakra Cultivation Method(Beginner level and [Mikasa's Heart +], which was not easy to sell.

"Get out of the way."

A rough voice came, and a strong man who looked like a chimpanzee squeezed into the front of the stall.

The chimpanzee man rubbed his nose with his thick fingers and then wiped the unknown black object on his finger on a suited man beside him.

The corner of the suited man's mouth twitched violently, and his hands trembled a little.

"I have mysophobia, you bastar*..."

"Don't care about these details. The things that are spread out are not bad."

As he spoke, the black gorilla man rubbed his nose again. The pale-faced suited man subconsciously stepped aside. The two of them should be teammates. Otherwise, they would have fallen out long ago.

Seeing the black gorilla man's actions, the suited man and the other nearby contractor also spread out.

"Hehe, why aren't you squeezing anymore?"

The black gorilla man moved his shoulders and looked at Su Xiao.

"Brother, give me a sincere price for this."

The black gorilla man pointed at the [Chakra Cultivation Method]

"199900 Paradise Coins."

Su Xiao gave in to 100 Paradise Coins. The black gorilla man bared his teeth and showed teeth.

"100... so sincere. 180,000. This is my highest price. "

""190,000 is the lowest."

""185,000?"

""190,000.""

""180,000?""

""190,000."

190,000 paradise coins were the lowest price. Su Xiao would not give in. It seemed that he saw this, and the black gorilla man nodded.

"I'll buy it. I can also use the Milk Wine in the future, haha."

The trading market was bustling with activity. Many contractors stopped in front of the stall. After seeing [Mikasa's heart and attributes, they were somewhat tempted, but they did not stop after seeing the price.

Su Xiao was not in a hurry. [Mikasa's heart + the Perfect Unity type contractor. As long as that kind of contractor appeared, he would be willing to be cut for this equipment.

After waiting for three hours, Su Xiao already wanted to close the stall temporarily. The kind of person he was waiting for finally appeared.

A bare-chested, muscular man walked to the front of the stall. When the strong man saw [Mikasa's heart+ attribute, his eyes were a little straight, but the price of seventy thousand paradise coins calmed him down.

"Hello, friend, this equipment is cheaper."

The strong man spoke in a low, muffled voice. Although he looked rough, he was more polite.

"This is the equipment made for the main tank."

Su Xiao was waiting for the main tank. The protection skill was that the higher the HP of the shield, the higher the strength.

[Er ---That makes sense, but this is blue equipment. Even if it has been strengthened to +5, it will be eliminated after some time. Moreover, from the level of its enhancement, it can be seen that you have used this equipment before, and if you sell it now, it means that it has been eliminated.]

The strong man looked slightly stupid, but his IQ was not low. He continued,

[This thing, apart from the main tank, can only be used in the late second stage. Yes, I am the main tank, but this thing can only be used for the third stage, so its price will be reduced in the long term. How about 50 thousand?]

The strong man bid not low, 50 thousand paradise coins.

"That makes sense."

Hearing Su Xiao's words, the strong man smiled faintly.

"However, I will still sell it for 70,000."

"Why"

"I want to sell these, can't I?"

"Hey, from a reasonable point of view, there doesn't seem to be anything that can't be done. These are your things."

The honest and strong man scratched his head.

"What should I say next?"

After the simple and honest strong man whispered, he suddenly grinned and turned his head. A black 'earplug' came out of his ear. There was a faint roar coming from the 'earplug'. What idiot?

"That... friend, wait for me for a while. Don't buy this equipment."

The strong man smiled and ran quickly. Su Xiao saw this scene and shook his head. It was obvious that this strong man was a simple and honest person. Someone told him from a distance.

Half an hour later, a masked man stood in front of the stall.

"I am the teammate of that stupid cow just now. I didn't have time to come here before. To avoid the death of that group of people in the battle, we bought this thing. The buyout price is 60,000. I don't want to sell it."

The masked man was cold and warm, and he was a good teammate.

"Deal."

Su Xiao changed the price of the item. 60,000 paradise coins entered the account, and all the products were sold. The paradise coins reached a shocking 46,900 points.

410,000 paradise coins, Su Xiao's first thought was to buy dark purple sword-type weapons to upgrade the dragon flash and the dragon flash to light gold quality.

Unfortunately, dark purple quality sword-type weapons were very few. Even if he had enough paradise coins, it would depend on luck to buy dark purple quality sword-type weapons.

He contacted the Black Fan Chamber of Commerce for the first time, and the answer he got was expected. There were dark purple weapons, but there were no sword-type weapons for the time being.

This result was as expected, dark purple equipment was not common in the first place, and very few people took out this kind of other equipment. Usually, it was self-use, unless they got dark purple equipment that was not suitable for themselves.

Su Xiao contacted the Emperor again, the other party was a big adventure team leader, but the result was still not there.

Dark purple sword-type weapons were so hard to find, that pale gold...

Su Xiao sat up from behind the stall. He began to wander around the trading market. He wanted to try his luck and see if he could buy dark purple sword-type weapons. People must have dreams and say that they could not be realized.

Unfortunately, Su Xiao only saw a dark purple hammer after a few rounds.

When Su Xiao was about to leave the market, a stall in the centre of the market attracted his attention.

There were many contractors gathered near the stall, which was a rare item.

Su Xiao approached the stall and easily squeezed into the crowd with his strongest attribute.

"Who stepped on my foot? Stand out if you have the guts!"

"Hey, let me see what is on the stall, don't squeeze."

Su Xiao stood in front of the stall, and there was only one item on the stall. The stall owner had a helpless expression, similar to when Su Xiao was selling the items.

"This thing... is not bad."

Chapter 597: Proficient Scroll

There were a lot of people gathered near the stall, but there were very few sincere buyers.

There was a scroll on the stall. The attributes of this scroll were good, but the price of the stall owner was too high, as high as 500,000 paradise coins.

"This guy is crazy about money."

"He should be a lucky newcomer. He is only proficient in level abilities. This price can be barely accepted if it is a specialized ability."

"Who knows? Maybe it's just a show-off. I don't intend to sell it."

The contractor and the others discussed animatedly. The stall owner's face darkened. He was not putting on a show. He was indeed planning to sell this Basic Ability Scroll.

"This thing is at most 150,000 Paradise Coins. It can't be worth 500,000."

"150,000? Bro, give me 150,000 Paradise Coins. How much do you want? I'll help you get as much as you want. "

Hearing the discussions of the onlookers, the stall owner seemed to be a little shaken. Perhaps the price he bid was higher?

[Firearms Proficiency]

[Origin: Any derivative world that uses firearms to fight]

[Level: Master Level]

[Classification: Skill-related ability(Skill-based ability level: Basic, Proficient, Specialist, Master, etc... The higher the level, the higher the growth rate.]

[Effect: After use, you can master firearms proficiency Lv. 1.]

Many contractors used guns in the Reincarnation Paradise. The power of guns was great and was relatively easy to master. It was a high return for low investment. Most importantly, gunners were long-range attacks and had a high survival rate.

Su Xiao also used firearms. He was a loner. He could not have any shortcomings in a certain area. Otherwise, he would not live for long.

Therefore, he had used the habit of using guns a long time ago. He used the revolver rifle, the semi-automatic pistol, and the sniper rifle.

The sniper rifle performance was the best, but Su Xiao relied on the gun's attributes. So far, his marksmanship was not very good.

This scroll was an opportunity. The Spider Queen would be eliminated sooner or later. Finding a high-level sniper rifle that could replace the Spider Queen's ability was difficult. Without the Spider Queen's ability, not to mention one kilometre, even if it could hit the enemy for a hundred meters, it would depend on luck.

Su Xiao pondered for a moment. This thing was between 100,000 to 120,000 paradise coins. He could accept it. No matter how high it was, he could invest resources in firearms, but not all of them. Close combat was his main way of fighting. Firearms were just auxiliary, in case the enemy kited him.

When the enemy kited him, he took out a sniper rifle and shot the enemy—what a carefree thing.

Standing in front of the stall, Su Xiao pondered for a moment.

"10,000 paradise coins."

This was a discounted price, neither too low, and it was not a loss to buy it.

"Impossible, at least 300,000 Paradise Coins."

The stall owner was determined.

"Is it? Good luck to you."

Su Xiao turned around and wanted to leave.

"Wait."

It was not the stall owner who spoke but a contractor watching the fun.

"130.000 paradise coins."

The stall owner was stunned, and Su Xiao was also stunned. What did this contractor mean?

Su Xiao noticed the stall owner's surprised look and suddenly understood something.

"The highest is 120.000."

"Deal."

A scroll appeared in the contractor's hand.

[Firearms Proficiency]

[Origin: Any derivative world that uses firearms to fight]

[Level: Master Rank]

[Classification: Skill-related ability(Skill-based ability level: Basic, Proficient, Specialist, Master, etc... The higher the level, the higher the growth.)

[Effect: After use, you can master Firearms Proficiency, Lv. 10.]

It was almost the same as the scroll on the stall, but this scroll was of a higher grade. The initial level of mastery was Lv. 10.

The other party sent a trade request. After Su Xiao spent 12 thousand paradise coins, the scroll appeared in his hand.

Seeing this scene, the stall owner was confused.

"This is... dragging?"

In the eyes of the stall owner, who could not believe it, Su Xiao turned and left.

"Young man, take your time to try your luck. Master-level scrolls are very embarrassing. It is very easy to sell if it is a specialist or a master. As for Master level... very few people buy it. Most professional gunners do not like it. Most of them are close-combat lone rangers to make up for

long-range abilities. This time, our luck is good. We can meet the lone rangers who are in the main melee."

That contractor left with a smile on his face, leaving the stall owner who was worried about his gains and losses.

"This scroll... 150,000. Is anyone buying it?"

The stall owner tried to bid, but the price did not change. It was still 500,000 paradise coins. He was afraid that Su Xiao and that contractor would drag it out.

The surrounding contractor shook their head one after another. Ten minutes later, the crowd gradually dispersed. Only then did the stall owner know he had lost a chance to use a scroll.

The initial Lv. 10 scroll is only worth 12 thousand paradise coins, then his Lv. 1 scroll...

Thinking of this, the stall owner cursed in his heart.

Su Xiao walked out of the trading market. He found a cold drink shop nearby and spent 5 paradise coins to order two glasses of ice orange juice.

He gave Bobowang a glass of ice orange juice. Su Xiao drank the ice orange juice in the glass in one gulp and chewed with the ice in his mouth.

At this time, the glass in Su Xiao's hand cracked, and the chair leg under his butt suddenly broke.

In a moment of carelessness, Su Xiao almost sat on the ground.

"Sure enough, the side effect appeared."

Su Xiao pulled over a new chair, which resulted from overdrawing his luck.

Before, he opened the green treasure chest without using Fate Redemption and tried to overdraw his bad luck. Whether he succeeded or not was unknown. It was normal for the three green treasure chests to have that kind of result. Otherwise, no one would open the treasure chest and cause bankruptcy.

From the current situation, overdrawing bad luck seemed to be a success. . This was the great outbreak of the pale gold treasure chest before.

Was this situation normal? The answer was unknown.

Su Xiao seemed to have vaguely grasped some clues about the clues that he had been unlucky.

Was it because he had overused his luck before entering the reincarnation paradise, causing him to have the 'Chief Halo'?

There was no clue, but Su Xiao would not try to overdraw his luck before opening the treasure chest in the future. There might be unknown risks.

Regarding the problem of his luck, Su Xiao could only explore it slowly, but from the current situation, as long as he did not actively overdraw his bad luck or luck, his luck would be maintained at a balanced point.

Fortunately, there was no risk in using Fate Redemption. Fate Redemption was not to overdraw his luck but to absorb other people's luck and store it, temporarily adding it to him.

Leaving this matter behind the back of his mind, only if he did not court death, his luck was at most a bit worse than ordinary people.

Taking out the scroll [Firearms Proficiency], Su Xiao hesitated momentarily and chose to use it. However, he had a clear understanding that this was an auxiliary ability. It needed to be completed in one go. If he needed to invest in it for a long time, he would immediately give up.

[You used the Firearms Proficiency Scroll, knowledge transmission...]

Su Xiao sat on the chair, and a large amount of knowledge of firearms appeared in his mind. The structure of the pistol, the structure of the rifle, the structure of the sniper rifle, the impact of the wind speed and other effects on the bullets.

A lot of knowledge poured into his brain, which reminded Su Xiao of the situation of using the alchemy scroll.

About two minutes later, Su Xiao's eyes regained clarity.

"A wonderful feeling."

The current Su Xiao was familiar with firearms, and it seemed that he had been using various firearms for a long time.

Chapter 598: The Horror Gap

Opening the skill list, Firearms Proficiency was not included in the Class List of Shadow of Extinction. Instead, it was in the ordinary skill list.

[Firearms Proficiency: Lv. 10. (Passive)]

Skill Effect: Increases Firearms Weapon Attack Power by 20(Critical Strike, Projectory Prediction, etc.. It does not increase the original lethality of firearms). The proficiency of various firearms usage has greatly increased.

[Note: Because the proficiency of firearms has reached Lv. 10. Hunter, please choose the branching ability of the level Lv. 10.]

[A. Handgun expert: Enhances the proficiency of the pistol.]

[B. Fire Assault: Enhances the proficiency of intermediate and close-range weapons such as submachine guns and automatic rifles.]

[C. Eagle Eye: Enhances the ability of the environment to interfere with bullets.]

Of the three choices, Su Xiao naturally chose C, and the third was prepared for the sniper rifle.

Su Xiao got up, and Bobowang, chewing ice on the side, turned his head.

"Still want to continue drinking?"

"Woof."

"I'll go to the skill upgrade hall."

Bobowang raised its head. It often wandered in the Reincarnation Paradise, so it was more familiar with the terrain here than Su Xiao.

Su Xiao got up and left. Bobowang stayed alone in the cold drinks store. The store manager was not surprised. She knew this dog. This dog was a regular and was named Bobo.

The beautiful store manager stepped forward.

"This is your master. He looks very strong."

"Woof."

Bobowang showed a look of contempt. His gaze seemed to be saying, "Of course, don't you see whose master that is?"

"No wonder you are so generous. Your master gave you a lot of pocket money."

The store manager was a little envious. She was a worker. If she wanted to survive in the reincarnation paradise, she could only work hard to run this cold drink shop.

...

The skill upgrade hall is a skill upgrade warehouse.

[Welcome to the skill upgrade warehouse. Please choose the skill that needs to be upgraded.]

Su Xiao chose [Firearms Proficiency], and the prompt appeared.

[Upgrade: Firearms Proficiency Lv, 10(Passive). Requires 2000 paradise coins, Yes/No.]

The price was within the acceptable range, and there was no need to consume soul crystals. Only the specialized ability force began to consume soul crystals, so Su Xiao chose to upgrade.

After spending 2000 paradise coins, the surroundings became dim. He was in dark darkness, and much knowledge about firearms poured into his brain.

At the same time, a light shadow appeared in front of him. The light shadow shot with various guns and dismantled the guns, but the speed was accelerated hundreds of times.

Five minutes later, Su Xiao woke up.

[Firearms Proficiency(Passive) has been upgraded to Lv. 11.]

Su Xiao would not be satisfied with just upgrading one level. He continued to upgrade his skills. The previous situation was repeated.

[Firearms Proficiency(Passive) has been upgraded to Lv. 12.]

[Firearms Proficiency(Passive) has been upgraded to Lv. 13.]

[Firearms Proficiency(Passive) has been upgraded to Lv. 14.]

[Firearms Proficiency(Passive) has been upgraded to Lv. 15.]

[Firearms Proficiency(Passive) has been upgraded to Lv. 19.]

[Firearms Proficiency(Passive) has been upgraded to Lv. 20!]

After upgrading to Lv - 20, a prompt appeared.

[Firearms Proficiency has been upgraded to Lv - 20. Would you like to choose a new branch ability or strengthen the original branch ability?]

Su Xiao chose to strengthen the original ability. The sniper rifle is used more than the pistol or automatic rifle. Now the sword light was increasingly skilled, and the pistol from the middle and square side was gradually replaced.

Su Xiao was not sure if the Firearms Proficiency could continue to upgrade. He tried it, and the Firearms Proficiency could be upgraded.

[Upgrade ' - Firearms Proficiency Lv, 20(passive)' requires 5,000 paradise coins. Yes/No.]

5,000 paradise coins made him hesitate. So far, he had invested 140,000 paradise coins in the field of firearms.

This investment was worth it because he planned to upgrade the knowledge of firearms to the extreme in one go, and the future resources would not be inclined to the knowledge of firearms.

At the very least, he had to reach where he pointed, not where he pointed. After wandering in the reincarnation paradise for so long, there was no shame in improving at all.

He continued to upgrade, and the paradise coins slid down like water.

[Firearms Proficiency(Passive) has been upgraded to Lv. 21.]

...

Two hours later, because he accepted too much knowledge, Su Xiao, who was a little dizzy, chose to continue to upgrade Firearms Proficiency(passive).

[Firearms Proficiency(passive) has been upgraded to Lv. 30!]

[Firearms Proficiency(passive) has been upgraded to the maximum level. Do you want to choose a new branch ability or strengthen the existing branch ability?]

"Strengthen the existing."

Su Xiao rubbed his forehead. His intelligence attribute was higher, and the sequelae of upgrading skills were disappearing quickly.

There were sequelae in upgrading various abilities in the reincarnation paradise, such as upgrading firearms proficiency(passive) would have a headache, and upgrading the sword master would be very tired.

This was a normal situation. The ability would not appear out of thin air. Su Xiao paid paradise coins or other expenses. The reincarnation paradise increased the speed of his ability to master, which was an equivalent exchange, not out of thin air.

The ability to strengthen firearms consumed a total of 190,000 paradise coins.

The cost was not small, but it was worth it. He had the full level firearms proficiency of Lv. 30. Even if he reached the high level, it would still be useful.

[Firearms Proficiency: Lv. 30. (Passive)]

Skill Effect: Increases firearm-type weapons' attack power by 42(weaknesses attack, bullet path prediction, etc.. It does not increase the original lethality of firearms). The proficiency of various firearms has greatly increased.

[Ability: Eagle's Eye(strengthened twice)]

[Eagle's Eye: Accurately predicting the trajectory and landing point of the bullet. Wind speed, air humidity and other external factors can not cause any interference to you. You are the king if you have the sniper rifle in your hand.]

...

After looking at the attributes of the gun master, Su Xiao sighed in his heart. The difference between the master level ability and the master level ability was far.

The black and white guns appeared in his hands. Su Xiao first observed the two guns, and after a few seconds, he moved.

Crack, crack, crack...

His hands almost turned into shadows. In an instant, the two guns were torn apart and turned into many parts. He moved his fingers. A moment later, the two guns were reassembled again.

If it was before he mastered the proficiency of firearms, he, Zetsu, did not dare to try to do this. The black and white guns were too precise, and it was likely that there would be a situation where they could not be fitted when they were opened, just like the high-technology tablet computer.

He raised his gun and aimed. Su Xiao felt that the moving target within two hundred meters would hit 100 times - Zetsu was not a problem. Even if the enemy moved at high speed, he could predict the trajectory and landing point of the bullet.

Taking out the Spider Queen, a familiar feeling appeared. He checked the situation of the Spider Queen and frowned.

Before, he did not know about firearms, so he did not pay attention to maintenance after using them. Now it seemed that it was a very reckless behaviour before.

If this continued, the lifespan of the Spider Queen was no more than two derivative worlds. If she were lucky, she would be directly scrapped, and if she was unlucky, she might explode.

The more than one meter-long Spider Queen was dismantled, and he began maintaining this gun.

Ten minutes later, the Spider Queen reassembled again, pulled the gun and tied it up. The sound was clear, and it was no longer the dull sound from before.

The ability of the gun had been upgraded. At this time, the skill upgrade warehouse in his body was not worried about being disturbed. He wanted to upgrade the Saber Master with him.

A total of twenty soul crystals appeared in his hands. It looked like a lot, but it could only be upgraded to a Saber Master by two levels.

[Upgrade 'Saber Master Lv. 21(passive)' requires 50,000 paradise coins and soul crystals(medium) ×10. Yes/No.]

Compared to the cost of Saber Master, the cost of upgrading the proficiency of firearms was just a drizzle.

The cost of upgrading a Saber Master was enough to buy a firearms proficiency scroll and upgrade to the maximum level, not to mention the soul crystal(medium) was priceless.

Chapter 599: Mechanical Street

Su Xiao dragged his tired body out of the skill upgrade warehouse. The two levels of sword technique master made his whole body tired and hungry.

[Saber technique master: Lv. 23. (passive)]

[Skill effect: Increases the attack power of sword-type weapons by 99, and the skill of sword technique greatly increases.]

Lv. 10 additional abilities.

[Law of All Things(Advanced): This ability can't be strengthened in the reincarnation paradise. The hunter himself can only comprehend it.]

[Lv. 20 Augmentation Ability]

[Saber Light: Able to carry out mid-range attacks. The degree of sharpness corresponds to the level of the sabre technique. There is no interval of usage.]

After some consumption, there were still 126,000 points left.

The paradise coins came slowly and were spent quickly. Su Xiao got more than 400,000 paradise coins in the Naruto world. After a few hours, there were only 126,000 points left.

However, with the value of these paradise coins, Su Xiao could feel that he had become stronger. If he did not convert the paradise coins into strength, then the paradise coins were only currency.

The reincarnation paradise was different from the real world. Here, not only money but strength.

Su Xiao had digested most of his gains in the Naruto world, and now there were only two things he had not done.

He had obtained an item when he opened the scarlet card. It was called [Item Modification Device].

[Item Modification Device]

[Origin: Rank 2 space battlefield, Liema Star]

[Rarity: Dark Purple]

[Type: Single-Use Consumable]

[Effect: This item can fuse one piece of equipment with two materials, thereby increasing the quality of the equipment. After fusing, the equipment category will not change, and the attributes will greatly change.]

[Hint: Can be added to the highest grade equipment: Purple.]

[Hint: Using this item requires a mechanical transformation skill to reach Lv. 17 or above.]

[Rating: 150]

[Description: This is the Liema Star Technology.]

[Price: 39,000 points of paradise coins.]

The function of this item was to synthesize the equipment and materials to improve the quality of the equipment.

It was most cost-effective to synthesize purple equipment. Su Xiao wore a total of four pieces of purple equipment, namely:

Spider Empress(Purple)

Ox-head Lord Arm Armor(Purple)

Tactical leather boots(Purple)

Black sandalwood, white ivory, pseudo(Purple)

Among these four pieces of equipment, the ones with synthesis value were [Spider Empress] and [Ox-Head Lord's Arm Armor]. The other two pieces would either be eliminated, or their effects were not obvious.

After weighing the pros and cons, Su Xiao decided to upgrade Spider Empress.

The reason was simple. If the characteristics of the [Ox-head Lord's Arm Armor] had changed, then the base would have been scrapped, and the boundary line attached to it was the essence of this equipment.

If he had mastered Lv 30, Su Xiao would not upgrade the Spider Queen. He was afraid that the attributes of the Spider Queen would change, and he would lose the ability to kill remotely.

Now it was different. Even if he did not have the Spider Queen's ability, he could also kill remotely. This was his ability, and it had nothing to do with equipment.

The good thing about the ability to strengthen firearms was this. Now it was not that Su Xiao could use any gun, but that he could use whatever was stronger.

It was not easy to use [Item Modification Device]. He needed to find a contractor who had mastered the mechanical modification skill Lv. 17 and above.

"This kind of contractor can only go there."

Su Xiao walked to the southwest corner of the reincarnation paradise. There were many sub-regions in the reincarnation paradise. Different sub-regions gathered various types of contractors. In the same sub-regions, contractors traded the equipment, skills, materials, etc.

Contractors, not an official organization, spontaneously formed these sub-regions.

...

Reincarnation Paradise, Mechanical Street.

Su Xiao stood in front of the mechanical street. There was a metal plate hanging in front of the street, and it was impressively written:

"How far away is the god system contractor? We only have Spanners and Machinery here. Don't believe in God! Don't teach!!"

Su Xiao couldn't help but chuckle. The Science side didn't like the god system. He was not a science side, so the specific reason was unknown.

Walking into the mechanical street, this place was full of science and illusion. There was a contractor who controlled a few meters tall mech to walk on the street and a contractor who changed into half mechanical.

A strong man, except for his head, who was almost completely transformed into a machine, sat on the side of the street, holding a glass of machine oil in his hand and drinking it with relish.

After seeing Su Xiao, the strong mechanical man raised his glass.

"Byakuya, this way."

Su Xiao recognized this strong mechanical man. The two met each other in the arena. This guy was full of weapons and self-destructed at the slightest disagreement.

This guy's code name in the Reincarnation Paradise was called machine oil. The reason was that he liked to drink machine oil.

Su Xiao stepped forward and refused the special drink that the machine oil handed over.

"The person was found?"

"Looking for a fight, but that guy has a problem with his brain. It is not easy to negotiate."

The machine oil was saturated, and the gap in the mechanical body was red. The machine in the body was operating at high speed.

"I paid him for his business. There is nothing difficult to negotiate."

"That's right, then let's go."

"Wait."

Su Xiao took out some scattered electronic parts, and the engine oil frowned.

"What is this?"

"It is a tablet."

"What is it?"

The machine oil looked at the pile of electronic parts and could not believe that this was originally a tablet computer. This pile of electronic parts seemed to have been forcibly torn apart after being stepped on a few times.

"Cough ---"

Su Xiao coughed awkwardly and explained the previous situation to the machine oil.

"Oh, Erzhu damaged this thing. If you want to restore the game progress, I will study it later."

The engine oil tried to assemble the tablet. After a long time, the tablet computer was assembled.

"Can it be repaired?"

"This..."

The engine oil face looked awkward.

"There is not a problem with repairing this tablet, but there is a problem with the memory card in the middle. How did you tear it down? Come, show me. I am very curious."

Hearing the engine oil words, Su Xiao waved his hand and did not embarrass himself.

"Is there a way?"

"Of course there is. If I can't recover this thing, I don't have to play with machinery. If you don't open this thing without permission, I can help you repair it for free. But now, not only do I have to exchange for the Yate Storage Card, but I also have to restore the data. You can buy the Yate Storage Card. I will help you get the restored data, free of charge."

"Thank you."

The personality of the machine oil was straightforward, similar to the fighting style and crazy gunfire.

They walked into the depths of the mechanical street with the machine oil and walked around for a few rounds before entering an alley.

In front of an old iron door, the machine oil raised the iron fist the size of a sandbag and slammed it against the iron door.

Dang, dang, dang!

Su Xiao saw that there was a layer of rust on the iron door.

"Who is it? Knock at noon."

A lazy female voice came from inside the door. The iron door opened, and a girl in a white shirt with a shirt hanging down to her thighs opened the door. Her white and beautiful legs made people daydream.

This girl had fluffy blonde hair and dark circles under her eyes. She seemed to stay up all night.

"Machine oil, you bastard*, looking for me in broad daylight. Do you want to die?"

"Oh? You want me to sleep?"

"Tsk, didn't you modify the thing below you?"

"How can it be transformed? That is the symbol of a man."

The engine oil pushed the girl away and walked into the room.

"This is my friend, Byakuya. I want to find you to modify something."

"Well, they all call me mechanical sister. You can also call me that. However, mechanical oil, you have a friend?"

Mechanical sister yawned and turned to close the door. Her room was a little messy, with all kinds of machinery. The most eye-catching thing was a half-dismantled robot.

"Eh ---Consider me a friend. He met me after cutting me into six pieces."

"Huh?"

The mechanical sister was a little stunned.

"Don't mind such a small thing, Byakuya. Tell me about you."

The engine oil raised his head, indicating that they could talk.

Su Xiao took out the spider queen sniper rifle and item modification device. Before he spoke, the mechanical sister quickly stepped forward.

"An item modification device for the Star? Good stuff."

"What materials are needed to modify this sniper rifle with it?"

Mechanical Sis picked up the Spider Queen and began to study the structure of this gun.

As for materials, they are nothing more than metal. Don't hold too much hope. Without materials with high compatibility, it is impossible to improve the quality of this gun. At most, it can improve the basic attributes.

While speaking, the mechanical sister yawned again.

"Is that so? Then how about using the soul crystal to replace the materials?"

"Of course, if there is a soul crystal(small), it can ignore the requirement of perfect replacement..."

Before the mechanical sister finished speaking, Su Xiao took out two soul crystals(middle).

After the survival trial, these are the remaining soul crystals, a total of three. He got 20 soul crystals in the Naruto world, so he did not use these three.

"One for one material, no problem."

"If you don't feel heartache, no problem."

The mechanical sister scratched her head and looked at Su Xiao. Her eyes were clearly: Where did this nouveau riche come from?

"Modify price."

"30 thousand, no bargaining. Otherwise, please hire someone else."

Previously, the engine oil told Su Xiao that the mechanical sister had a strange temper and only offered one price. If someone bargained with her, she would ask the other person to go out.

"Yes, it will be completed in a few days."

"Well ---Let me think, according to the time progress of your contractor, after you return to the real world, you can come to take it before you enter the derivative world. I will help you."

Su Xiao signed a temporary contract with the mechanical sister for the price and time were in the acceptable range.

"By the way, what is your strength and body attribute? It will be bad if you can't use it after the transformation, not to mention the specific attributes, more than 50 points or less."

Su Xiao pondered for a moment: "More than 50 points."

"Then there is no problem. In the next derivative world, I will let you experience the shooting of violent aesthetics. With a bang, the enemy is broken."

The mechanical sister made an explosive gesture, and her cheeks were a little red.

Chapter 600: Immunity

Seeing the expression of the mechanical sister, Su Xiao raised his eyebrows.

"I'll leave it to you. You don't have to consider the problem of recoil."

"OK, I haven't received such good order for a long time. Two soul crystals as materials. If you fail, you will kill me."

The mechanical sister was completely awake. She was still angry just now, and now her eyes were bright.

Su Xiao and the machine oil walked out of the room. The machines slammed the door and locked it to prevent others from disturbing her.

"Let's deal with the tablet computer, but let's make it clear beforehand that I can not accept the maintenance fee, but you have to treat me to dinner."

"You can eat?"

Su Xiao, look at the machine oil, this guy had changed to this extent, and he still could eat?

"Of course, I have not modified some of the important organs. There are two choices to modify them. The first is to transform them into machines, including their heads completely. I only use machines to fight and do not want to become a robot. It belongs to the second type of semi-mechanical modification. It isn't very easy. You won't understand even if I tell you. In short, I can eat normally or have sex with girls."

Machine oil laughed twice and elbowed Su Xiao.

"Machine girl is not bad, but this girl is too dangerous. You can try it with your strength."

"Is it not good to live? You must provoke that woman."

Su Xiao's words did not make the engine oil unhappy.

"That's right. I don't know how many bombs that woman transplanted in her body."

The engine oil laughed a few times and took Su Xiao into the electronics store.

Two hours later, in a restaurant in the mechanical street.

Su Xiao held the tablet computer in his hand and played the puzzle game. His fingers almost left afterimages.

The machine oil sat opposite the table, chewing the steak in his mouth. After seeing Su Xiao's finger, the corner of his mouth twitched.

He also tried the puzzle game, but this game needed very strong logical thinking and extraordinary hand speed.

The modification machine oil did not lack hand speed, but the logical thinking was not strong. He wanted to throw the tablet computer several times.

"Is this thing really interesting? It costs a lot of brain cells."

"Huh?"

Su Xiao paused the game and looked at the machine oil in confusion.

"This game is suitable for relaxing."

"Relax, what?"

The machine oil looked at Su Xiao with a stunning look.

"Before you entered the reincarnation paradise, you were a criminal genius. The two kinds of people with logical thinking are the most obvious. One is the police. The other is the criminal. No matter how you look at it, you don't look like the police."

"Who knows."

Su Xiao took the fork beside his hand and inserted an octopus beard.

After eating and drinking, the half-drunk machine oil greeted Su Xiao and left.

After sitting in the dining room for a while, Su Xiao also got up and left, returning to the whole room.

As soon as he entered the whole room, Su Xiao saw a strange piece of furniture in the entire room, and Bobowang sat on it.

"This is the sofa you bought?"

"Woof."

Bobowang looked proud. The small-eyed god seemed to be asking, "Master, this sofa is not bad, right?"

"Taste... is quite special."

Su Xiao did not recognize that this was a sofa at first moment. He still thought it was an open kennel.

He did not guess wrong. This was the open big dog house.

Ignoring Bobowang, who was rolling in the kennel, Su Xiao walked to the corner of the exclusive room. This place was 'restricted' for Bobowang.

[Welcome the hunter to use the honor store. Please read the following regulations.]

1. The items in the honor store can only be exchanged with the honor medal.
2. The items exchanged by the honor store are locked items and can not be traded with another contractor.
3. The hunter is forbidden from mentioning the existence of the honor store to anyone. Otherwise, he will be executed.
- 4, there are fewer goods in the honor store and a limited supply.
- 5, the exchange will not be returned.

...

Su Xiao had already exchanged several times, and he used his mind to control the honor store, and there was a change in the honor store.

[Hunter has a gold medal of honor, which can be exchanged for below.]

[Main Mission Failure Exemption Authority]

[Effect: Can be exempted from one main mission failure penalty(Package of attributes and paradise coins, forcefully executed).]

[Price: A gold medal of honor.]

...

[Space - Breaking Device]

[Effect: Contains food or recovery type medicine and brings it into the real world(Maximum carrying one, needs to be checked if there is any danger or instability).]

[Hint: The upper limit of carrying recovery items is blue.]

[Hint: This item can only be used once.]

[Price: One Gold Medal of Honor.]

...

[Emergency Medical Box]

[Type: Recovery Quality(Contains three types of recovery items)]

[1. Honorary Recovery Potion 2 ×1]

[Effect: Restore 100 HP and 100 Mana Points within two seconds.]

[2. Adrenaline ×1.]

[Effect: After use, there will be less than 70 pain. Attack and movement speed will be increased by 20. Additional excitement effect can remove exhaustion. The effect lasts for 10 minutes.]

3. First Aid Bandage ×10

[Effect: Recover 3 HP every second after use. The effect lasts for 1 minute.]

[Description: A medical box with rich content, the common supplies of the Void Ranger Squad.]

[Price: One Gold Medal of Honor.]

...

These three items made it difficult for him to choose. After thinking for a long time, he finally chose [Main Mission Failure Exemption.]

No one could guarantee that they were General Changsheng. Once the main mission failed, the punishment of the reincarnation paradise would not consider his identity.

Failure is a failure. The reincarnation paradise will not listen to anyone's explanation. Failure = no value = death!

With this thing, Su Xiao could avoid the punishment of failing a mission. Compared to carrying medicine to the real world or medicine, he felt that [main mission failure exemption right] was more valuable.

Closing the honor store, Su Xiao digested the harvest in the Naruto world. He could still stay in the reincarnation paradise for two days, and now it was time for freedom to move.

He had nothing to do in the exclusive room and suddenly remembered an idea in the Naruto world.

Previously, he tried to combine the alchemy bomb with the explosive clay and failed.

But at that time, he had an inspiration, which was that the process of making the alchemy bomb was material + mana values. What would happen if the mana values were exchanged for the green steel shadow energy?

This was what he had been curious about, and now he was ready to try.

The light in his hand flashed, and he spent 300 paradise coins to replace the materials needed for the alchemy bomb. All kinds of materials were broken down. If it were in the past, he would use the power value to stabilize the materials.

This time, it was different. Su Xiao converted the mana value to the green steel shadow energy and then integrated the green steel shadow energy into the materials.

In Su Xiao's expectant eyes, the materials began to dissolve and gradually turned into ashes...

This change made him stunned. It seemed that he did not believe in evil. He tried again.

After three times, he was sure of one thing. The green steel shadow energy could be used to fight, but it could not be as omnipotent as the magic power. Using the green steel shadow energy to make bombs was too much.

Su Xiao sighed. Not all ideas could be realized. This was a matter of course.

After making ten alchemy bombs, Su Xiao stopped. Although the power of the alchemy bombs was good, the enemies he faced were stronger and stronger. The quality of the special alchemy bombs was green, and it was inevitable to start to be tired and weak in the more intense battle.
