

## R. Paradise 601

Chapter 601: Qian Qian

This was also the reason why Su Xiao wanted to enhance the alchemy bomb, and now it failed.

Thinking of this, Su Xiao sighed. Although it was very cool to throw out a large number of alchemy bombs with a flick of his sleeve, and this thing was used to block the enemy's route very well, if this ability could not keep up with his pace, he would immediately stop throwing in.

Picking up an alchemy bomb, Su Xiao shook his head. Although he could find a way to enhance the alchemy bomb by spending paradise coins, it was not worth it. The alchemy bomb was stored as a bomb, and the bomb had many uses.

A long time ago, Su Xiao felt he had too many abilities to develop simultaneously. After noticing this, he immediately abandoned several unimportant abilities.

So far, his fighting methods were getting simpler, and his fighting strength was getting stronger.

His main fighting methods were his Saber Techniques. Whether it was the Boundary Break Line or the energy shield, they all used Saber Techniques as the core.

As for the sniper rifle was used to deal with special situations, not his main fighting method. Moreover, he had already solved the cost of the firearms category.

The development path after that became simple: to gather resources to strengthen Saber Techniques.

Thinking of this, Su Xiao got up and left the whole room. He went straight to the trial field. There were still a lot of paradise coins left. He could summon the mirror image to practice.

Two days later, in the arena.

In a wetland simulated by the arena, a woman in a tight black suit ran quickly in the muddy swamp.

The mud splashed, and there were several cuts on the woman's high-tech tight clothes, which were bloody.

The woman leaned against a withered tree and gasped for breath. Blood dripped down her chin.

Pa, pa, pa, pa.

The sound of stepping on mud could be heard, and the woman not only groaned.

"Again? Can't you let me recover?"

The woman was just about to continue to run when she suddenly thought of something and could not help but smile bitterly.

"By the way, this is not the derivative world. This is the arena, fighting with this kind of murderous guy. I still think that I will die."

Zheng.

The blade light flew, the woman subconsciously rushed forward, the dead tree was cut off, and a man with a long knife and a red mask stood not far away.

The corners of the mask on the man's face were clear. Standing there seemed to have flaws all over his body. After the battle, he found his sword skills extremely exquisite. These flaws were used to lure the enemy.

"It's just the arena. There's no need to be so murderous. I surrender."

"Personal habit."

Su Xiao threw the mud on the flying knife. The sense of teleportation appeared. He returned to the restroom of the arena.

[The individual battle has ended. ]

[Result: Victory. ]

[Eleven consecutive wins! ]

[The Hunter's ranking has increased. It has risen to 2255 in the 2362 rankings. ]

Although it was 11 consecutive wins, the ranking did not increase much. He had spent 40 thousand paradise coins in the trial field to summon the mirror image to train before coming to the arena. Moreover, he had been fighting here for two days, from 9,600 to 2,255.

In the past two days, other than eating and sleeping, he had been fighting. Although the intensity of the battle was high, his spirit gradually relaxed.

Even if he lost in the arena, he would not die. In two days, his winning streak was ended once, which meant that he lost once.

That defeat was not because of strength but because the opponent used a move of mutual destruction. In the end, the opponent won, and his winning streak ended.

Although the winning streak was ended, Su Xiao was not surprised. He was not a god and would not win all the time.

Matching the opponent again, Su Xiao entered a new round of competition.

This time was the public arena. As soon as he entered the arena, he found that there was a tide of cheers coming from the surrounding audience.

"Qian Qian, good luck!"

"Qian Qian, I love you."

These shouts continued, and Su Xiao's brain hurt a little. He met the arena star.

The arena was a fighting arena that was open to the public. It was natural for the arena star to appear. Humans would worship people who were better than themselves. It was natural to become an arena star if they were beautiful and strong.

It had to be known that not only was there a contractor in the reincarnation paradise, but there were also more employees. According to incomplete statistics, the number of employees in the reincarnation paradise was 17 times that of the contractor.

The contractor couldn't chase stars, and most employees had no combat power. They were ordinary people and contractors and had a lot of free time. It was a good pastime to come to the arena and spend some money to chase stars.

Su Xiao looked at his opponent. Sure enough, she was beautiful to the point of soul-stirring. She was about 1.5 meters tall, with a single ponytail, a slender figure, and a large mechanical arm on one, giving people a delicate and fierce feeling.

"Hello, I am very strong, be careful..."

Qian Qian manipulated the mechanical arm and waved to Su Xiao, but before she finished speaking, Su Xiao had already stepped on the ground and rushed forward.

Su Xiao and Qian Qian were about twenty meters apart. With his physical fitness, the kick on the ground made him start to glide at a low altitude at high speed.

"You must be joking."

Looking at Su Xiao, who was holding a long sword and gliding at a low altitude, Qian Qian's hair stood up.

"Fire: 3."

Weng ---

The mechanical arm on Qian Qian's arm started to move and punched Su Xiao.

Boom!

The air wave spread, and a layer of light blue energy shield blocked the front of Su Xiao.

Kaba cracks appeared on the energy shield. This was only an energy shield with 80 points of strength. It was normal to have cracks.

Because of the force of the energy shield, cracks appeared on the ground under Su Xiao's feet.

Just as he stepped on the ground, Su Xiao immediately turned sideways and withdrew the energy shield at the same time.

At this time, the enemy's strength had not been completely offset by the energy shield. The energy shield suddenly disappeared, and the mechanical arm smashed forward with inertia.

The more he used the energy shield, the more familiar he became with the energy shield, and the more Su Xiao felt that it was a divine skill.

Qian Qian's body rushed forward. Her expression was surprised. Her eyes turned and saw Su Xiao on the side.

"Give me a full..."

Qian Qian was just halfway through her words when she felt a chill in her chest, and the weight of her body suddenly reduced.

With a plop, Qian Qian's body, which had been cut in two, fell to the ground. The audience was dead silent.

"Young Mistress Qian was... cut in the chest?"

"My idol..."

"Masked man, your sister! I wish you a lifetime of being single!!"

Ignoring the audience's voices, Su Xiao swung the blood on the long sword and slowly walked toward the enemy, who was cut into two.

In his opinion, fighting was fighting. There was nothing else. Once involved in the battle, gender, race, and body were unimportant. Should she be treated gently? Don't joke around. The women in the reincarnation paradise were not weak at all. He had seen too many women with terrible fighting strength, and there were countless strong female people.

"It hurts."

Qian Qian turned over, but a smile appeared on her little face stained with blood.

"How ruthless. You're different from those who show mercy. What's your name? Can you leave a contact number?"

Qian Qian was smiling. She was a competitive star. She liked to fight. Her opponent showed no mercy in a battle where she was willing to sacrifice her life and death. In her eyes, it was respected. She did not underestimate her because of her short stature and delicate physique.

""... "

Su Xiao did not speak and just raised his sword.

"Surrender. Surrender. It seems that I have met the cold male god."

After a slight surrender, the blood on Su Xiao's sword turned into light spots.

Chapter 602: Compensation

[The individual battle has ended. ]

[Result: Victory. ]

[Twelve consecutive wins! ]

[The Hunter's ranking has increased. It has risen from 2255 to 2100. ]

Su Xiao sat cross-legged in the resting warehouse and took out the timer. It showed 71 hours and 52 minutes. There were still eight minutes before he returned to the real world. It was not enough time to play another game.

He began to wait to return to the real world, and eight minutes passed in the blink of an eye.

[The hunter has reached the limit of his stay time in the reincarnation paradise. ]

[I checked that after the hunter advanced to the second rank, he succeeded in passing through the next derivative world. The time conversion function has been activated. ]

[prompt: The hunter can convert the time of stay in the real world to the time of stay in the reincarnation paradise. The maximum time of exchange is 1/2. ]

Seeing this hint, Su Xiao's face showed joy. After he passed the second stage of the derivative world, he could convert the time of stay in the real world into the time of the reincarnation paradise.

The time of stay in the reincarnation paradise was very precious. Of course, the more, the better. He could fight in the arena or sell alchemy bombs here.

He could also go to the trading market during his free time to see if anything was good.

He was nothing more than watching anime or wandering around in the real world, and he could gradually become stronger in the reincarnation paradise.

Without hesitation, Su Xiao's stay time in the reincarnation paradise increased from 0 seconds to 84 hours so that he could continue to stay in the reincarnation paradise.

The stay time was more than doubled, which made Su Xiao not only ponder.

The higher the rank, the longer he should stay in the reincarnation paradise. He, who was not concerned for the real world, would choose to stay in the reincarnation paradise.

In this way, a contractor in the real world would be fewer and fewer. In addition to various regulations, the contractor's interference in the real world was not as big as he imagined.

The real world was different from the derivative world. The real world was very special to the reincarnation paradise. Once there was a problem in the real world, it would affect the reincarnation paradise to select a new contractor, which would cause the cycle of evil nature.

After lighting a cigarette, Su Xiao no longer considered these problems. Although his stay was longer, he also had to cherish this precious time.

He dragged his tired body and left the arena. Although many contractors were returning to the real world, the reincarnation paradise was still lively. There were a lot of employees and contractors above the first rank.

Su Xiao's life in the Reincarnation Paradise was very regular. In addition to the rest time, he spent most of his time in the trading market, trial field, arena, and arena. The arena occupied most of them.

When the mana value recovered to full, Su Xiao would make intermediate alchemy bombs to sell in the trading market, which was a considerable income.

To stay in the Reincarnation Paradise more often, the happiest person was Bobowang.

This guy's life was very comfortable. According to Su Xiao's observation, Bobowang's rest time was the same as his. The first thing he did when he woke up was to eat a big meal. After that, he would go to the cold drink shop to sit. Sometimes, he would go to the equipment strengthening hall to observe the expressions of contractors and others. This was the bad taste of Bobowang.

Most of the time, Bobowang ate and slept. In the recent period, the hair of this fool was brighter, and his physique unexpectedly grew a circle.

In the exclusive room, Su Xiao stared at Bobowang. Bobowang sighed and looked at the treadmill on the side from time to time.

"Recently, you have gained 20 pounds of weight. It is time to lose weight."

"Aw---"

Bobowang let out a long howl. His gaze seemed to be saying, "Master, I am a lone wolf from the north. My long fat is to resist the cold. Please listen to my explanation."

"Do you want to run?"

Su Xiao took out a custom-made large pair of sixty-four yards slippers. Bobowang subconsciously bent down. Although he was lying, he still had to pretend nothing had happened.

After hesitating, Bobowang walked up to the large treadmill and ran weakly.

Su Xiao nodded and told Bobowang not to be lazy and leave the exclusive room.

Bobowang sighed. Although it was lazy, it never slacked off when Su Xiao told it to do things, so Bobowang gritted his teeth and ran hard.

...

In the trading market, Su Xiao sat behind a stall with many intermediate-level alchemy bombs.

After answering the contractor's price, he picked up the tablet computer to play puzzle games.

Half an hour later, he vaguely felt someone was standing in front of the stall. He did not look up. It was normal for someone to stand in front of the stall.

"Byakuya, you are really hard to find."

Su Xiao, who was playing the puzzle game, paused. The character in the game died.

After looking up, a man in a gray suit stood in front of the stall. The strong muscles of the man tightened the suit. A scar extended from the man's cheek to his neck, like an ugly centipede lying on his face.

"You are?"

Su Xiao did not know the other person. He had never seen this person.

"Hello, my name is Stan."

"Stan?"

Su Xiao tried to recall this name. Suddenly, he thought of a person, the leader of the Blood Gate adventure group, Stan.

"It's a little familiar... Are you the leader of the Blood Gate adventure group? Do you need me for something?"

Su Xiao looked calm and did not show any flaws. He had killed the people of the Blood Gate adventure group, and it was the first time he fought with Jiraya.

"Of course, I have something to do. Look at this."

Stan handed over a projection device, which was a battle video from the first-person perspective, and the shaking of the picture was very serious.

The roar in the video was continuous. Deidara stepped on the clay bird and flew at high speed. In the distance, a man was holding a sniper rifle. It was Su Xiao.

After a few shots, the angle of the video was equal to the ground, and the shaking also disappeared.

"This is the reason why I am looking for you. The person you killed is called Zi Mo... He is a seed member of my Blood Gate. I know your mission is in conflict, but this is unimportant."

Stan took out a pack of cigarettes as he spoke, and after taking out two, he handed one to Su Xiao.

Su Xiao smiled and did not take the cigarette. It was better not to touch the enemy's things. This was the reincarnation paradise.

Stan smiled. After throwing the cigarette on the ground, he lit the cigarette in his mouth.

"Friend, your sniping ability is good."

Stan went up and down to look at Su Xiao.

"Are you here to seek revenge?"

"Of course not. If I seek revenge from you, I will not show up at all."

"That is?"

Su Xiao felt that this matter was very interesting. Unlike what he saw in movies and television dramas, this guy who came to 'revenge' was very polite.

"I came to ask for compensation from you. You have to know that cultivating a seed member requires a lot of resources. The dead have no value. The death can only mean that Zi Mo is not good."

Speaking of this, Stan touched the scar on his face.

"Before, I also wanted to seek revenge on you. Considering that your strength is not weak, sending ordinary subordinates can't kill you, and there will be all kinds of expenses during the period, so asking you to compensate for Zimo's death is the wisest choice for my group."

After listening to Stan's words, the smile on Su Xiao's face was even more brilliant.

Stan could not be underestimated. This guy was not only powerful, ruthless and ruthless but also had a high IQ.

"By the way, we had some history before. In the trial world, there was an armoured vehicle. Do you remember? After Grand Master Tie died, my subordinates began to investigate. At that time, I heard of your name, but that matter had nothing to do with you, so I didn't come to find you. Now it seems that we might be born criminals."

Both of them were laughing, but there was hidden killing intent in them. Stan did not say a harsh word, and the useless threat was equivalent to brainless in Stan's eyes.

Then he said, "I spent about 500,000 paradise coins cultivating Zimo. Considering the difference in price and your ability to bear it, you have to compensate 100,000 paradise coins. After that, Blood Gate will not come to you again. If you want to join, I welcome you."

The dead had no value. Stan only cultivated it because he liked Zimo's talent. This was business and had nothing to do with personal feelings.

Chapter 603: Wild

"100,000 Paradise Coins..."

Su Xiao looked at Stan. Stan spat out a mouthful of green smoke, indicating Su Xiao to think about it slowly.

"I have killed a lot of contractors. It is the first time someone came to ask for compensation."

"What is your answer?"

"Not a single point."

Su Xiao was still smiling. The smile on Stan's face faded, but after a few seconds, he smiled even more happily.

"Haha, you have guts. Since you don't want to pay the price... then forget it."

Stan did not hesitate to get up and leave. His expression became ferocious and terrifying as soon as he turned his head. The scar on his face became bloodshot like a poisonous centipede.

"I haven't met such a bold solo player in a long time."

Stan took out a compass, and the compass flashed with a golden light.

After Stan walked away, Su Xiao took out a cigarette and lit it. It was possible to break the money and avoid disaster if it was an ordinary solo player.

There were props to track contractors in the reincarnation paradise. Although the price was high, a large adventure group like Blood Gate must have them.

Su Xiao did not care about the tracking device. No. 13013 was a fake number. It would be weird if he could track it.

It was just that if not for very unlucky, it was unlikely to meet the Blood Gate adventure group in the derivative world. Moreover, the large adventure group did not cover the sky. For example, the Barbarian Sky adventure group, comparable to the Blood Gate and the God Emperor, was still wiped in the Rain Village.

From this, it could be seen that the threat of the Blood Gate adventure group was not as significant as imagined. Perhaps before meeting Su Xiao, the Blood Gate had been wiped.

Even if he encountered it, he could run if he could not beat it. Bobowang was not good at other things, and the running speed Zetsu was first-class.

Now Su Xiao was indeed no match for Blood Gate, but it was impossible for him never to be a match for Blood Gate.

And he had long expected to make enemies with another contractor, but if he fought in the derivative world, it was inevitable.

Not thinking about this, not long after, the alchemy bomb on the stall was sold out, leaving 30,000 paradise coins. He began to make a large number of [1 Potion].

The cost of [ # 1 Potion] was not low, 6,000 paradise coins +300 points.

In the next few days, the people of Blood Gate did not appear again. It seemed like Stan said, 'Since you don't want to pay the price, then forget it '.

Time passed quickly, and soon Su Xiao's stay time in the reincarnation paradise reached the limit.

...

Light and shadow flashed in front of his eyes. When Su Xiao regained consciousness, he was in the living room of the seaside villa.

There were still three and a half days left in the real world. After thinking for two minutes in the living room, Su Xiao packed up his luggage.

...

One day later, XJ Province, Uighur autonomous region, Chogori Peak.

Chogori Snow Mountain, the second peak of the world, also known as K2, with an altitude of 8611 meters, countless climbing enthusiasts died here.

The cold wind blew up the snowflakes. There was a nearly vertical mountain wall 3,800 meters away from Chogori Peak. White snow covered the mountain wall. If one looked closely, a bare-chested man holding an ice pickaxe was hanging down on the mountain wall without any protection.

Hot air rose from the man, and the cold climate did not affect him.

"Aw---"

A 'wolf howl' came from the top of Chogori Peak. A rather large 'wolf' stood at the top of the mountain peak, raising its head and howling. The cold wind blew the black and white hair.

"This idiot climbed to the top. Did the cold climate unlock its IQ?"

Su Xiao held the ice pickaxe in his hand and continued to climb up.

Half an hour later, at the top of Chogori Peak.

Su Xiao stood at the top of the second peak of the world and looked down. It was white.

Taking a big bag off his waist, Su Xiao took a gliding shirt from it and put it on. After confirming that the parachute on his back was okay, he looked at Bobowang on the side.

"See you at the foot of the mountain."

Su Xiao jumped down, and Bobowang, on the top of the mountain, screamed...

The real world was suitable for relaxing the body and mind, and the time spent staying was speedy.

[Hint: The new derivative world is about to open. The hunter will return to the reincarnation paradise. Please make sure there are no witnesses around. ]

[Teleportation... Teleportation complete. ]

Su Xiao returned to his whole room and just regained consciousness. A hint of an email popped up. He opened the email.

The item is ready, come and get it.

The content of the email was straightforward, and the signature was a mechanical sister.

Quickly rushing to the mechanical street, Su Xiao looked at the remaining paradise coins. There were 35600 points left, except for the 30 thousand service fee. He only had 5600 paradise coins left.

However, the materials were ready, and there were eight bottles of [1 Potion] in the storage space, plus the rest of the recovery products before. It was enough for him to deal with the new derivative world.

...

Mechanical Street, Exploding workshop.

Su Xiao smashed the iron door in front of him. He had been hitting the door for ten minutes. If there were no protective measures, the iron door would have been smashed by him.

"Who is it? It has been ten minutes, and you still don't give up. Are you trying to kill me?"

The iron door opened, and the mechanical sister, who was only wearing a bra and a pair of trousers, stood at the door with a somber expression.

"Hey ---You can't let me sleep. To complete your order, I haven't slept for almost four days."

The mechanical sister turned sideways, and Su Xiao entered the room.

"I succeeded. Could you give me the processing fee? I will continue to sleep. The things are on the workbench."

The mechanical sister activated the temporary contract. After Su Xiao confirmed that the contract was okay, he paid the mechanical sister 30 thousand paradise coins.

As soon as he received the paradise coins, the mechanical sister fell on the small bed in the corner and slept instantly.

Su Xiao came to the working table of the mechanical sister. The metal work table was five meters long, and the door was full of various tools.

A sniper rifle came into Su Xiao's sight. His first feeling was wild. From the blood-red pattern on the gun's body, he could vaguely see that this was the spider queen.

At this time, the appearance of the spider queen changed considerably. The gun was originally dark, and the surface had blood-red lines. Now the appearance was black as the main body. The gap of the gun body faintly emitted blue light, and the blood red lines on the scope.

Initially, the size of Spider Queen was not small, but now it was even more exaggerated, almost catching up with Su Xiao's height.

His finger pointed at the gun, and the information about Spider Queen appeared.

[Spider Queen]

Origin: Reincarnation Paradise

[Rarity: Dark Purple]

[Type: Heavy sniper rifle]

[caliber: 17.36 mm]

[Ammunition: 10]

[Durability: 72/72]

[Attack Power: 60,134]

[Equipment Requirement: Strength: 52, Stamina: 49]

[Equipment Effect 1: Light - Red Outer Detection Mirror: 428 times(passive), able to adjust distance, automatically calibrate the wind speed, distance, and other factors. The target aimed at the target will be the final hit point of the bullet(the maximum distance of the target is 1036 meters) ]

[Equipment Effects: 2: Precise Bullet(Passive), Improved shooting accuracy by 17. ]

[PreparationEffect 3: Crush(Passive), Increases the chance of crushing enemies by 30. ]

[Rating: 260 + ]

[Description: If you want to keep one alive, please do not use it. After using it, you can only see the enemy's fragments. ]

Price: 7,000 paradise coins

...

Su Xiao picked up the new Spider Queen, and the feeling was heavy. If there were no storage space, it would be a problem to carry it alone.

Pulling the gun and tying it up, the inside of the bullet chamber was empty. The 17 to 36 mm bullets used by Spider Queen were a bit exaggerated. Generally, the sniper rifle was 7.62 mm or 12.7 mm bullets.

The caliber increased again. Su Xiao was not only worried about one problem but also the exchange fee for 17.36 mm bullets. If it were only 17.36 mm bullets, it would be fine. The Spider Empress used special alloy ammunition.

[Yes/ No exchanged for 17.36 mm bullets(special), each 150 paradise coins. ]

Su Xiao's eyes darkened. This was too expensive.

He endured his heartache to exchange for 30 bullets, which cost 4,500 paradise coins. This could buy standard blue equipment.

Chapter 604: Gentlemen's Alliance

[The new derivative World will open in one minute. Hunter, please prepare the equipment. ]

Su Xiao sat in the deluxe room with a calm face. The harvest of the Naruto world was relatively abundant. His strength was significantly enhanced, and he was more confident about the new derivative World.

[Time is up. The derivative World: The full-time Hunter opened. There is no abnormality in this World. The space coordinates are stable, and the time-space power is 0.019 - ounce. ]

[According to the time-space power consumed, the lowest comprehensive evaluation of the contractor's World needs to reach D + level. ]

The power of space surged, and with a bang, Su Xiao was in darkness.

After an unknown period, the feeling of falling appeared. Su Xiao opened his eyes. At this time, he was high in the sky and was falling quickly.

"This is so f\*cking exciting!"

The shouts came from not far away. Su Xiao turned his head and looked.

At this time, it was nighttime. In the night, he vaguely saw many figures falling in the high sky not far away.

"What's going on? It's flying in the air. It's too strange."

"Reincarnation Paradise, damn it."

"Hey, a few nearby, ten thousand paradise coins, I can save your lives, agree to sign the contract."

Not far away, there was a cry, a pair of wings opened, and at the same time, Su Xiao received a temporary contract.

The main content of the temporary contract was that he paid ten thousand paradise coins or items of the same value, and the contractor, who could fly, helped him land.

"MDZZ, crazy about money. Who doesn't have some emergency measures?"

No one signed the contract. The contractor, who had the ability to fly, smiled and flew into the distance.

If someone had a tiny brain, they would not sign the contract. Reincarnation Paradise would not deliberately kill the contractor. This was common sense.

After falling quickly for more than ten seconds, Su Xiao saw a large city below. The city was brightly lit. The streets were filled with cars. It was a modern city.

Although the night view of the city was beautiful, his falling speed was getting faster and faster. Fortunately, there was a parachute in his common material.

"Woof ---"

Not far away, Bobowang shouted. The rapid air flow produced by the fall blew up the lips of its mouth, revealing its white canine teeth. The two lips were like wings, flapping non-stop.

"A strange start."

As soon as Su Xiao finished speaking, his descent speed suddenly slowed.

[Drip, the spatial fluctuations have returned to normal. ]

[Hint: Due to being involved in the dimensional turbulence, there is a slight error in the transmission. ]

[Dimensional turbulence is a normal cosmic phenomenon. Correcting the transmission error requires a lot of time and energy, causing the lowest comprehensive evaluation to reach A -, and the transmission error is not updated. ]

[Reserved Teleportation Location: Full-time Hunter derivative world, Youxin City. ]

[Current position: Full-time Hunter derivative World, Qilu City. ]

[Error: 1353 kilometers. ]

[Warning, warning, the hunter is in a high-speed falling state. ]

[Because this fall is an irresistible factor, according to the initial regulations, 15794, the reincarnation paradise must ensure that the hunter, contractor, and the worker safely arrive at the derivative World. ]

At the same time this hint appeared, Su Xiao felt a force hold him, and the speed of his falling gradually slowed down.

The height gradually decreased. Su Xiao saw the street below. Because of the unknown force, he could not move.

Just as he was about to land, a brand-new red car rushed. This car was in the shape of a beetle, and a woman was sitting in the driver's seat. The passenger was the husband of the woman.

"Cathy, don't be nervous. Maintain the current state."

As soon as the man's voice fell, a figure smashed on the hood.

Bang!

At the same time, Su Xiao smashed on the hood. One hand was like a hook, directly penetrating the iron sheet to avoid being bounced off by inertia.

Suddenly someone fell from the sky and smashed the hood. The man in the co-driver was shocked.

"Cathy, stop the car!"

"Ah!!!"

The novice driver screamed and subconsciously turned on the shower.

"Step on the brake!"

The man in the passenger seat roared, and with this roar, the novice female driver stepped on the accelerator to the end!

The engine of the Beetle car roared, and the whole vehicle rushed out with a whoosh.

Kaba!

The car's hood was pulled down, and Su Xiao left the speeding vehicle.

He was in mid-air, and when he was about to land, he pressed the hood down and stepped on it.

Zi, zi, zi ---

The hood rubbed against the road, and sparks flew everywhere. He seemed to be stepping on a skateboard.

After more than ten seconds, the hood stopped sliding. Su Xiao sighed and landed safely.

Bobowang ran from the distance and looked at the hood under Su Xiao's feet. His eyes seemed to say: "Master, is it exciting? I want to play too."

"Let's leave here first."

A few police officers were rushing over on the opposite side of the street. Su Xiao turned and entered an alley, ignoring the shouts of the 'officers'.

In the alley, Su Xiao sat on a trash can.

"Qilu City? I have never heard of this place. It's a headache. The World of hunters is too big."

He knew a little about the situation in the World of full-time hunters. This World could only be described as grand. It was between middle-level force and top-level force.

The World of hunters was so big that it made people speechless. In anime, the whole story unfolded in the six continents, and the six continents were just a tiny corner of the dark continent. No one could explore the area of the whole World until now.

The place where Su Xiao was located was the Lulubian Continent, which is one of the six continents. There are human civilizations on the six continents, and transportation is convenient. If not, there will be a disaster.

It had to be known that the thermal weapons in the six continents were very advanced, with all kinds of weapons like nuclear bombs.

Su Xiao was not interested in the dark continent outside the six continents. It was not that he could not get benefits there, but the dark continent was too terrifying. A race in the dark continent that could not survive could dominate the six continents.

At this stage, the six continents were equal to the hunter world. As for the force of the hunter world, Su Xiao had studied it before.

The storyline creature in the hunter world - the king of ants, was powerful. If he fought with the other party, he would lose to Su Xiao.

But if the time was right, Su Xiao might be able to kill the king of ants.

The strength of the king of ants lay in the physical quality. From the original situation, the king of ants was dying after being hit by a nuclear bomb, so its defense was not strong enough to make Zetsu look at it.

However, the speed of the king of ants was too fast. Su Xiao was likely to be killed before he hurt the other party.

Fortunately, this was not the problem he should be concerned about. At this time, the Ant King had not been born yet. Although the enemies that appeared were also influential, they were not strong enough to crush him.

In other words, although he had the risk of death in the Hunter World. During this period, he could fight most of his opponents.

[Enter the World; Full-time Hunter]

[World Difficulty: Lv. 5 ---?(semi-open World) ]

Origin of the World, 0,

World Description: A vast and dangerous world. Wealth, food, treasures, secret realms. As long as you dare to explore them, these are not dreams. A group of people is chasing after their desires all over the World. These people have a common name: Hunter.

Hunter: Hunter has a licensing system. The Hunter Association will hold a strict examination every year. The qualified people will get the Hunter license. After getting it, they can use the Hunter license according to their wishes. They have all kinds of rights(like using the public facilities of 95. countries for free). Hunter is divided into many types: gourmet hunters, treasure hunters, beast hunters, and so on.

Perception: A ability to manipulate life energy at a deep level. It is divided into four major lines: wrapping, Zetsu, training, and transmit. The four significant lines are mainly sent and divided into six branches. They are the strengthening, release, change, operation, materialize, and unique systems. Different types of fighting styles are different.

Primary mission: Arrive at Youkexin City.

Hunting mission: Cleaning up the gentleman alliance.

[Hint: When the hunter enters within a kilometer of the offender, the hunting function will automatically be activated. ]

[Warning: Please do not mention the 'Paradise' in this World. If the warning is invalid, it will be executed! ]

[Hint: Detected that the hunter has not mastered the language of this World. Using 100 paradise coins to master the language of this World automatically. ]

[World, begin! ]

Chapter 605: Broken

Su Xiao frowned. He first looked at the details of the primary mission.

[Main mission: Arrived at Youke Xin City. ]

[Difficulty Level: Lv. 2]

[Mission summary: Because of the wrong location of teleportation, the hunter must arrive at Youke Xin City before the auction begins. ]

[Quest information: Youke Xin City is a prosperous and rotten city controlled by many gangs. ]

[Quest deadline: 6 natural days]

[Quest reward: 1000 paradise coins. ]

[Quest punishment: Deduct 1000 paradise coins and forcibly return. This derivative world has no benefits. ]

...

As expected, the initial primary mission was straightforward. The reason was that there was an error in the transmission location, and the error of the reincarnation paradise could be made. However, the time-space power consumed needed contractors to bear it, or most of the contractors could not bear this burden, so the reincarnation paradise did not repair the error but released a simple primary mission, giving a small benefit, 1000 paradise coins.

Not all contractors were like Su Xiao, and the comprehensive evaluation was generally between A - to S. Most contractors were D + to A.

Because of this, the speed Su Xiao becoming stronger was so fast. Contractors, who experienced the same number of derivative worlds as him, were not as strong as him.

Closing the main mission, Su Xiao opened the hunting mission with a frown. This hunting mission gave him a horrible feeling.

[Hunting mission: Cleaning up the Gentlemen's Alliance. ]

[Mission summary: Use any means to eradicate the Gentlemen's Alliance. ]

[Mission information: The Gentlemen's Alliance is composed of five offenders. The hunter needs to clean up these five offenders. ]

[Mission deadline: Before leaving this derivative world. ]

[Mission reward: Golden Medal of Honor ×1. The derivative world will choose one more chance. (Before entering the derivative world next time, the hunter can choose one of the three derivative worlds to enter). ]

...

"Five?"

After reading the mission information, Su Xiao habitually took out a cigarette.

A total of five offenders combined into a small alliance. This was undoubtedly challenging the limit of the rules of the reincarnation paradise. They should not be called the gentleman alliance, and it was more appropriate to call it the death alliance.

And Su Xiao thought of a terrible situation. These five offenders might notice the hunters' existence, so they were in a group. Not only that, but if the five offenders were scattered everywhere, it would be a headache to think about.

The hunting mission must be completed. Su Xiao did not want to go to war to be a 'referee'. He did not want to experience that kind of experience the second time.

Su Xiao decided to go to Youke Xin City first. The gentleman alliance would move in that direction. At this time, there were the most benefits.

"Don't look, Bobo, let's go."

Su Xiao had just taken two steps when his footsteps suddenly stopped.

"Oh? It seems that your luck is good."

[Warning, warning. Detected traces of offenders within a kilometer. Hunting function activated. ]

A simulation map appeared in front of Su Xiao now. This simulation map was a detailed terrain of one kilometer nearby. There were two red dots moving quickly on it. This was a violation of the rules, and there were two.

Su Xiao turned over and rode on Bobowang's back.

"East, 30 ° direction."

Bobowang immediately understood Su Xiao's meaning and rushed out of the alley.

The streets of Qilu City were brightly lit. This was a gambling city. The traffic at night was more than in the daytime. When Bobowang ran on the street, it was inevitable to attract pedestrians' attention.

A girl wearing a cap looked at Su Xiao with surprise in her eyes.

"This is... too arrogant, but this feeling of being full of blood should be strong to the point of being abnormal."

This girl is a contractor. Not only her but there are also three contractors on the opposite side of the street.

Because of the deviation in the teleportation location, at this time, the 146 contractors who entered the hunter world were gathered in Qilu City.

If it were in the past, Su Xiao would not be so big, but now was a good time to clean up the violators. It was best to solve all five people in Qilu City, and it was a heaven-sent opportunity for a deviation in the teleportation location.

After Bobowang ran for two minutes, Su Xiao motioned for Bobowang to stop because the two violators stopped just in the next street area.

The broken line popped out. Su Xiao went to the roof of a building more than 50 meters high and quickly ran to the other side of the top. He concealed his breath and looked down.

There were many pedestrians on the street, a black car parked on the road, and two people sitting in the car. On the glass window of the passenger seat, Su Xiao saw a few drops of blood.

Just entering the derivative world, he robbed the car, which was very different from the contractor's style.

Although they were hundreds of meters apart, Su Xiao felt the breath of the two people.

One of them had a violent breath, like a barrel of gunpowder that could explode at any time. The other person's breath could only be described as disgusting. Su Xiao, who had sharp senses, seemed to smell the stench. No, it was the smell of corpses.

The two people in the car were talking about something. Because the distance was too far, Su Xiao could not hear it.

A sneaky figure approached the black car. It was Bobowang, who had opened the 'you can't see me'.

At this time, Bobowang disguised himself as a stray dog. Other than his weight, he could not see any other flaws.

Bobowang walked past the wheel, wagged his tail, and a listening device stuck to the car door.

The violator in the passenger seat suddenly turned his head. After dropping the glass, they puzzled, looking at Bobowang, who had cracked lips, a pale face, and faint cracks on his skin.

"What's wrong, withered corpse?"

The owner of the driver's seat had just joined the Gentlemen's Alliance and was on guard against everything.

This 'newcomer' had a muscular build, and when he breathed, the air in front of his mouth and nose twisted, and the temperature in his body was extremely high.

"It's nothing. It's just a stray dog passing by. Number 5, don't be nervous. When contractor sees us, he can only kneel and beg for mercy."

The dry corpse's voice was hoarse, like two pieces of sandpaper rubbing against each other. It sounded very uncomfortable.

"I'm not called No. 5..."

The newbie violator was about to speak when the dead body turned his head.

"You must use a code name when joining the Gentlemen's Alliance. How can you forget the boss' words so quickly? You have to abandon your former name and code name. You will have a new name after that. Now you are No. 5. By the way, you are the third No. 5."

No. 5 did not say anything, but there seemed to be flames burning in his eyes.

"Boss is too slow. How long do we have to wait?"

The dry corpse took out a piece of raw meat. He stuffed the raw meat into his mouth and began to chew carefully. Blood flowed out from the corner of the dry corpse's mouth.

Su Xiao heard the conversation between the two. He hesitated. Should he make a move now or wait for the boss of the other party to come and catch him in one fell swoop?

According to normal circumstances, Su Xiao could deal with one offender, and the two began to struggle. As for the three, they were likely not opponents.

After thinking for a moment, Su Xiao decided to make a move and kill these two guys first. If he waited for half a day, it would be funny if the five people who violated the rules gathered together. At that time, he would not even make a move.

Spider Queen appeared in his hand, and Su Xiao used Spider Queen, who had upgraded for the first time.

He pulled the bolt and loaded the bullet. Because of the close distance, he adjusted the 'light red external detection lens' to 4 times.

Restraining his killing intent, Su Xiao picked up the spider queen and put his head in front of the scope.

The cross-shaped star was aimed at the offender in the main driver's seat. To test the power of the Spider Empress, he chose the torso.

With his proficiency in firearms, he no longer needed the aiming function of the Spider Empress. His judgment was more accurate.

He held his breath and pulled the trigger with his finger.

Bang!

The gunshot cut through the night sky and the butt of the gun was on Su Xiao's shoulder. His body slightly leaned back. The recoil of this gun was too strong. He could barely control it with 58 points of strength attribute.

Cracks appeared on the concrete roof under his feet. The recoil was evident.

A bullet flew out of the muzzle and broke through layers of airwaves. Because the speed was too fast, the shell began to turn red. Fortunately, the bullet was made of unique metal. Otherwise, it would affect the flight trajectory, which was also expensive.

The bullet first broke through the roof of the car. There was no resistance, as if the metal roof did not exist.

Almost instantly, the fiery red bullet drilled into No. 5's chest, and dense cracks appeared near the wound. The bright red muscle tissue was visible, and No. 5 was like a smashed porcelain jar.

With a bang, the broken body splashed in the car, and No. 5's torso was directly broken and exploded. A pale rib was inserted in the shoulder of the corpse.

The bullet's momentum did not decrease, leaving a dark hole on the road after penetrating the bottom of the car.

Fresh blood slipped from the face of the corpse. His eyes widened to the extreme, and he swallowed his saliva with difficulty. He looked down at the head on his legs and was a little confused.

#### Chapter 606: Infected Body

When the dead body was stunned, Su Xiao, who was at the top of the building opposite the street, turned the muzzle and aimed the cross in the mirror at the body of the dead body.

The power of the spider queen was so incredible, not to mention the enemy. Even Su Xiao himself was pretty surprised.

After the first verification, the result was that there was no need to hit the enemy's head when sniping, and the trunk was the best choice.

Not to mention that the trunk was many times larger than the head, an enemy was broken, which would cause a solid deterrent to other enemies, such as the current dead body.

As a violator who had been in the reincarnation paradise for a long time, it was not that he had never seen a corpse. He had seen a miserable death, but it was the first time he had seen such a straightforward death as No. 5.

In just 0.5 seconds, the dead body threw No. 5's head to the side, raised his right arm, and slammed his elbow on the door.

With a bang, the passenger seat door flew out, and at the same time the door flew out, the dead body came out of the car and was covered with the door.

Su Xiao slightly adjusted the position of his aim and confirmed that the time was just right to pull the trigger.

Bang!

The air wave spread from the gun of the spider queen, blowing Su Xiao's black hair.

The bullet left the chamber and created layers of airwaves.

The moment the dead body landed, a weird sense of crisis appeared.

With a bang!

The pale yellow body fluid splashed, and the dead body shattered like a water balloon, spraying on the horse road.

Seeing this scene through the scope, Su Xiao frowned. Although the dead body was 'broken', there was no killing hint.

The pale yellow body fluid gradually gathered and rose, forming a human shape.

The cracks on the withered corpse's skin became even more apparent. He turned his head to look at the roof opposite the street, and a strange smile appeared on his face.

"You want to kill me? Dream on..."

Just as the withered corpse finished speaking, a muffled sound came from the roof opposite the street.

Before hearing this muffled sound, 17 - 36 mm bullets had already penetrated the withered corpse's chest and abdomen. The withered corpse exploded into a pool of liquid once again.

This made the withered corpse discover one thing. At close range, he first felt the bullet through his body and heard the gunshot.

With a bang, the dead body that exploded into a pool of yellow liquid did not recover its form again, and Su Xiao found that the situation around him was not right.

There was no screaming and noise within three hundred meters. According to normal circumstances, the nearby civilians must have reacted after the gunshot incident.

The current situation is bizarre. Within a radius of three hundred meters of the dead body as a radius of three hundred meters, all the civilians stood in the same place and did not move.

This was the downtown area, and there were less than a hundred people in the nearby three hundred.

At this time, neat and monotonous footsteps were heard, and the nearby civilians moved closer to the vicinity of the dead bodies. In less than half a minute, 176 civilians were standing on the horse road.

These people wore different clothes, had dull faces, and lowered their heads.

The pale yellow body fluid on the street rolled over and over, and the dead body was restored.

"Kill him."

The withered corpse raised the withered arm. At the same time he gave the order, the more than one hundred civilians raised their heads simultaneously and stared straight at Su Xiao.

If the child looked closely, he would find that the pupils of these civilians were turbid and brown. The pale skin was a sign that would only appear after a long time of death.

"Roar!!"

All the civilians let out beast-like roars. These people seemed to have turned into beasts. The muscles on their bodies bulged, and their fingertips became sharp.

More than a hundred civilians charged almost at the same time, rushed across the road, climbed up the vertical wall with their sharp claws, and quickly surrounded the roof where Su Xiao was.

A car drove three hundred meters into the dead body, and the driver talked and laughed with the female companion in the passenger seat.

Suddenly, his female companion showed a painful expression, her mouth was wide open, and she seemed unable to breathe.

A moment later, the female companion lowered her head, and her figure was agile as she got out of the car. Her pupils had turned brown.

The driver was surprised. Suddenly, he also showed a painful look. A few seconds later, the black pupils turned brown.

The man and the woman joined the civilians and rushed to where Su Xiao was.

At the top of the building, Su Xiao put away the spider queen. A mechanical eye flew out of his sleeve. He wanted to find out the current situation.

The Eye of the Apostle floated in the air. Su Xiao did not check the information on the dead bodies but the information of the civilians.

[is comparing the intelligence attribute of both sides..., the comparison is completed. Our intelligence is 27.5 times the number of enemies. Gain 100 of the enemy's information. ]

The information is as follows:

Name: Infected IV Type(Mutated Dead Body)

Health: 93

Mana: 20/20

Strength: 32

Agility: 21

[Physique: 35]

[Intelligence: 2]

[Charm: 3]

[Skill 1: Infected(Passive): No pain, no wisdom, immune to mental control. ]

[Skill 2: Death Virus(Passive): If you attack the enemy's body and cause a wound, physical attributes will be judged. If you fail, you will be infected with the Death Virus. ]

[Skill 3: Death(Passive). Apart from the head, organs, limbs, and other injuries can not eliminate the infected. ]

[Skill 4: Mutated(Passive). After becoming an infected body, there is a 3 chance of producing an elite individual. ]

[Hint: The most excellent existence of a mutated dead body is 8 hours. ]

...

Seeing this information, Su Xiao frowned. This was simply an enhanced version of the T virus. The virus would be infected near the dead body if the physical attributes were low. This might be an aura-type skill.

A large number of infected bodies climbed to the top of the building. These infected bodies were different from slow zombies. Their limbs were on the ground, and their bodies were sharp. They could quickly jump a few meters away.

More than a hundred infected bodies surrounded Su Xiao. When they sensed this scene, the dead body showed a happy smile on his face.

"You dare to snipe me from three hundred meters away. You are courageous, but you are also stupid."

The dry corpse hooked his finger, and a sensitive body with muscles all over its body approached the dry corpse.

This infected body was at least three meters tall, and the bulging muscles all over its body had already torn apart its clothes.

"Is there only one elite individual? Not very lucky."

As he spoke, the withered corpse jumped onto the back of the elite infected, and the four limbs of the elite infected let out a low roar, seemingly somewhat dissatisfied.

"Oh? It's a special elite individual. No wonder there is only one."

The withered corpse's palm pressed on the back of the elite infected body, and the pale yellow liquid seeped into the select infected body. A moment later, the elite infected body with some resistance calmed down.

The withered corpse moved slowly. In his opinion, the sniper was surely dead after being surrounded by more than a hundred infected people. All he had to do was go to the roof to see if there was a scarlet card.

"Damn it, another number 5 died. The boss won't blame me, will he?"

Thinking of the boss of the Gentlemen's Alliance, the body of the withered corpse trembled.

"I don't think so. This was an accident, probably..."

Just as the withered corpse was struggling to explain to his boss, the sound of a saber came from above. A ring of saber light scattered, and large pieces of broken limbs flew.

With a clatter, an infected body cut into three pieces was smashed not far from the withered corpse. This infected body was twitching, and a light blue light flashed at the wound.

"What is going on..."

Clang!

The blade light slashed from top to bottom, and the pupils of the withered corpse contracted to the extreme.

Chapter 607: Ask For Help

The light blade slashed forward, and the withered corpse immediately controlled the elite infected body to block it.

The elite infected body stepped on the ground with its front paw, and its body stood upright, just in time to block the withered corpse on its back.

The light blue blade cut into the chest of the elite infected body, and black and red blood splashed. The select infected body let out a scream.

This stunned the withered corpse, and it turned into joy. The mutated dead body should have no sense of pain and intelligence, but this elite infected body had not only resistance but also pain. This was a scarce thing.

But the dry corpse was not in the mood to pay attention to this for the time being. He wanted to know what the situation was on the roof. How could the infected body he created die in an instant?

When the dry corpse was full of doubts and hesitated about whether to go to the roof to find out the situation, Su Xiao had already stood at the roof's edge with a dragon flash in his hand.

"Melee?"

The dry corpse was a little confused, but at the same time, when he saw Su Xiao, the dry corpse suddenly remembered a sentence that his boss had said: 'met the lone wolf, especially the lone wolf with no weakness. If the other party attacked you for no reason, contact me immediately.'

After thinking for a moment, the withered corpse controlled the elite infected to retreat.

Aware that the withered corpse wanted to escape, Su Xiao jumped from the roof. He was in mid-air, slashed a few times in the direction of the withered corpse, and several light blue sword lights flew.

The withered corpse controlled the elite infected body to jump left and right. The sword light slashed on the horse road, leaving a deep cut.

After dodging the three sword lights, there were two sword lights that crossed into a cross and slashed at the corpse.

The dead body just wanted to control the elite infected body to avoid it, but the select infected body suddenly stopped, and blood appeared on the neck.

A sharp metal line entered the neck of the elite infected body, which was the broken line arranged by Su Xiao.

The body of the elite infected body just stopped, and Su Xiao had already landed.

Su Xiao stepped on the asphalt road, cracks appeared on the ground, and as soon as he landed, he used

Su Xiao had already appeared in front of the withered corpse in less than a second with a whoosh.

The long sword was about to cut down, but Su Xiao stepped onto the ground. After leaving a footprint on the floor, he pulled away from the corpse.

A yellow smoke spread out from the dead body. Su Xiao's left arm touched the smoke. This smoke was attached. The clothes on his left arm were corroded through a thousand holes. The skin of his left arm seemed to be burned by sulfuric acid. Fortunately, his physical attributes were high enough, and the yellow smoke could not burn through his skin for a while.

[You are eroded by the high concentration of the dead body virus, physical attribute determined... ]

[Determined passed, immune to mutation. You will receive 30 points of virus damage per second, lasting for one minute. ]

Si ---

The green smoke on Su Xiao's left arm was floating, and the sharp pain came.

Just as the virus was about to continue to erode his left arm, the green steel shadow energy surged out and devoured the virus in a moment.

Those who violated the rules were usually very difficult to deal with. If one of them had not been killed in a flash, the current situation would have been even more troublesome.

"Friend, there are no grudges between us. There is no need to be stubborn."

Smoke rose from the dead bodies, and the surrounding ground was corroded.

A large group of infected people approached the vicinity. They were the civilians who came to watch the commotion when they heard the noise. The deadly virus also infected these people.

"..."

Su Xiao looked at the dead body in silence and moved his left arm. After confirming there was no problem, he rushed like a dead body.

The face of the dead body was a little ugly. The enemy had no possibility of negotiation at all. He raised his sword and cut. There was no nonsense.

"Boss, if you don't come, you can help me collect the corpse."

The withered corpse sent a cry for help in the team channel. The other two offenders had replied, but the boss of the Gentlemen's Alliance had not responded.

The other two offenders were rushing at full speed but were too far away.

On the battlefield, many infected bodies rushed to Su Xiao.

The blade flashed, and with the sound of limbs being cut off, many infected bodies were cut into pieces. Facing these infected bodies, Su Xiao, who was good at close combat, was like cutting vegetables.

Su Xiao kicked away an infected person who rushed over and cut out the sword light from the gaps between several infected people, and the sword light whistled to the dead body.

The dead body immediately controlled the elite infected person to dodge, but the speed was a bit slower.

The sword light quickly cut off one of the arms of the dead body, and the face of the dead body twitched. If he did not dodge in time, he would have been beheaded.

The melee ability of the dead body was weak to the point of slag. He belonged to the class of the summoner. As long as living creatures were around, the cannon fodder was endless.

If his boss had not ordered him not to make too much noise, the first thing he did when he entered the derivative world was to create a large number of cannon fodder.

The extensive cheat infection fell, and these infected people were not killed by Su Xiao because there was no killing hint when killing these infected people.

At the moment when these civilians were infected, they had already died, and what drove them to move was the virus in their bodies.

The dry corpse wanted to retreat under cover of the infected body, Su Xiao immediately slashed a sword light, and the dry corpse was controlled.

The dead body wanted to escape many times, but they were all blocked by the sword light or the boundary line that appeared and disappeared.

Twenty seconds later, the second batch of infected bodies was slaughtered.

Su Xiao swung his long sword, and the blood on the blade was flung away. Several claw marks were on his body, and he was inevitably injured in a battle with many infected bodies.

The second batch of infected bodies had just been killed, and the dead bodies had prepared the third batch, but he knew that this ordinary infected body could not stop Su Xiao.

The expression of the dry corpse began to be ferocious. He had a chance to escape, but he did not dare to run. The broken arm and the knife marks on his body reminded him at all times that even if the enemy were surrounded by the infected, he would be willing to pay a terrible price to the enemy with his back against the enemy, not to mention that there was a hard to detect metal wire around him. The metal wire almost cut off his head several times.

In less than half a minute, more than 70 of the third group of infected people were dead and injured. Su Xiao seemed to break out of the encirclement in less than 10 seconds.

The dry corpse knew that if this knife man got close, he would not even have a chance to beg for mercy.

In such a situation as Zetsu, the dry corpse was angry. He pressed his hand on his chest and showed a painful expression.

Just as the withered corpse was about to fight to the death, a message appeared in the party channel of the Gentlemen's Alliance.

Red Clown: "Withered corpse, what characteristics does the enemy have?"

Seeing this message, the withered corpse retracted the ability that was about to be activated and quickly replied in the party channel.

[Male, around 20 years old, the weapon is a knife and a sniper rifle. The melee ability is powerful. Boss, save me. No. 5 is dead so that no one can stop him. I can't use my strength at all. Now activate the coordinates. ]

The withered corpse breathed a sigh of relief. It seemed that after the red clown spoke, the pressure Su Xiao gave him was swept away.

The red clown: "What is the reason for the hostility?"

Dried Corpse: "No reason. This guy killed No. 5 in one shot without saying a word. Then he started to hunt me down."

"Dried Corpse, you played too much. If there is no reason, why would the other party go all out to kill you?"

"Don't make sarcastic remarks. This guy is a madman. If he doesn't say a word, he will cut him. There is no possibility of negotiation!"

The red clown: "Shut up, withered corpse, hold on for two minutes. I will go over."

"Thank you, boss."

Yan Yao: "Tsk, what a waste of Boss' teleportation opportunity."

Closing the team channel, the pressure in the dry corpse's heart was swept away, but at this time, a long knife appeared in front of him.

The dry corpse's expression was stunned. Two seconds ago, there were hundreds of infected bodies surrounding the enemy. How did the enemy break out?

Chapter 608: Red Clown

The long sword slashed, and the withered corpse controlled the elite infected body to meet the enemy.

Su Xiao held the sword with one hand. At this time, his right arm was a little sore. This was the aftereffect of continuous use of the ring break.

As he slashed down, the elite infected person, who almost looked like a monster, raised his claws to block. The sharp bone claws flashed with a metallic luster, and the appearance of the elite infected person at this time could no longer be seen as a human.

The long sword cut on the bone claws, and bone fragments splashed.

Su Xiao raised his eyebrows. The power attribute of this thing was not inferior to his. No, the power attribute of this thing was higher than his.

"Roar!"

The elite infection roared, its bloody mouth opened, and the jagged teeth were like sharp daggers.

The blood plate bit Su Xiao and the dead body behind the elite infection pressed its hands on the back of its head, its eyes closed, controlling the action of the select disease.

Su Xiao stretched his palm forward, and an energy shield with 120 points of strength appeared.

With a bang, the head of the elite infected body hit the energy shield. At this moment, Su Xiao removed the energy shield.

The green steel shadow energy rushed into the blade. Su Xiao took a step forward and cut the neck of the dead body.

He did not attack the elite infected body. The dead body controlled this thing. After killing the dead body, this thing was easy to deal with.

Puchi.

The blade cut through the neck of the dead body, and the head of the dead body flew up.

The head flew in the air without showing any expression of fear or surprise. There was only anger and disdain in the eyes, and there was a vague meaning of conspiracy succeeding.

After cutting off the head of the dead body, Su Xiao only paused for a little and made a second cut.

This knife cut to the chest of the dead body because the dead body whose head was cut off did not die.

Su Xiao was already used to this situation. The ability of the violators was strange, and he had met all the violators who were more challenging to kill.

A face appeared on the dead body's chest, full of pain and disbelief.

"What the hell is this?"

The green steel shadow energy invaded the dead body through the wound. The pain almost made the dead body lose consciousness.

Puchi.

The dead body's trunk was cut off. At the same time as the trunk was cut off, a brownish-yellow ball of flesh broke out of the dead body and directly drilled into the elite infected body.

The elite infected body stopped, and the eyes changed.

"I'm going to kill you. This is my last chance to change my body. I'm looking for a few derivative worlds, and forced me to this situation."

No Elite Infected Body should be the dry corpse standing upright. After feeling this vital body, the dry corpse shook his head. This body was too unstable.

At this time, a purple light appeared beside the dry corpse. A purple light dot floated in the air, and the light dot gradually enlarged.

"Here it is."

The dry corpse stared at Su Xiao fiercely as if he had already seen the enemy's death.

"So it is like this, living in a parasitic way."

The index finger of Su Xiao's left hand moved, and the broken line wrapped around the dry corpse's leg. He pulled hard, and the very shallow wound was now on the dry corpse's calf.

The dry corpse did not care about this degree of injury at all. Just as he slammed his claw at Su Xiao, the green steel shadow energy spread along the broken line and invaded the body of the dry corpse from the wound.

"Ah!!!"

The shrill scream came far away, and the dead body fell to the ground with a thud. The green steel shadow energy was his nemesis. His body was too weak.

Su Xiao stepped forward and pierced the neck of the dead body.

The green steel shadow was wrapped in the sword light, and the shadow thorn was generated. More than a dozen light blue energy thorns broke out of the body of dead body, like a blooming thorns flower.

"This, this..."

The dry corpse's mouth was wide open, and his pupils were trembling.

Su Xiao stepped on the dry corpse's shoulder with one foot and slowly pulled out the dragon flash.

The long sword was cut down, and the large head of the corpse was cut off.

A brownish-yellow meatball came out of the elite infected body, and a face appeared on the meatball.

"This is impossible, and the boss is coming. Why..."

Su Xiao stepped on the brownish-yellow meatball with one foot, and the juice splashed.

[Hint: The hunter has successfully cleared No. 107 offenders, and the hunting mission has been completed(2/5). ]

[Warning: Discovered violator is about to approach! ]

Su Xiao knew that violators would approach without the reminder from the reincarnation paradise. The purple light dot beside the dead body quickly expanded and became a space crack.

A man in a purple suit with a gentle smile walked out of the space crack.

The man looked around until he saw the meatball that was crushed.

"Oh? The dead body is already dead, and he lost another subordinate, although he is foolish."

If not for the head of the contractor in his hand, the man was very polite.

"It seems that you kill the dead body."

The man looked at Su Xiao. Su Xiao did not say anything and directly cut out a sword light.

The sword light passed through the body of the man in the suit. Su Xiao was not surprised because he did not feel the other person's breath.

"Don't be so murderous. I am just a projection sent here. By the way, you can call me Red Clown."

The red clown threw the head in his hand. His body was more than a hundred kilometers away, and under his feet was a headless body.

Looking at the red clown, Su Xiao confirmed that the other party was indeed a projection and returned the dragon flash to the sheath. He was ready to leave this block first.

"Wait, Mr. Hunter."

The smile on the red clown's face began to become neurotic. Su Xiao stopped and turned to look at the red clown.

"This name is quite appropriate. Chasing after us, this unreasonable contractor, I don't know what the reincarnation paradise called you. Maybe it is also a hunter?"

Su Xiao's eyes narrowed slightly. This offender might know something.

"Don't worry. I won't reveal your identity to the public. Even if I wanted to, I wouldn't be able to. I failed hundreds of times."

The red clown seemed to think of something interesting. He took a small knife and pressed his thumb against the blade's tip.

"Mr. Hunter, how about we play a game?"

The red clown cleared his throat.

"From now on, I will bring my subordinates to kill you. I will tell you a secret about the violator if you can kill me, but..."

The red clown said this as if he could not hold back his excitement. The knife pierced his thumb.

"If you lose before you die, you must tell me some secrets about the hunter. How about it so that the game is fair."

Su Xiao did not know the purpose of the red clown for a while, but it was good that the other party could kill him. Even if the other party did not come to him, he would find a way to find the other party.

"See you in Youke Xin City."

"Hahaha, you spoke. I thought you were mute. Sorry, I forgot myself."

The red clown seemed unable to hide the excitement in his heart, and this guy's emotions were volatile.

"See you in Youke Xin City. I haven't encountered such an interesting thing in a long time."

The shadow of the red clown gradually disappeared, and the space crack also disappeared.

Su Xiao sighed. If the red clown body dared to enter this space crack, then he had a way to kill the other person quickly. He could force the space crack to close after the other person entered the space crack and then trap the other person in an unknown space. This was the ability that he got in the Naruto world.

Brand effect(pale gold): primary space imprisonment: can seal the space fluctuation within 50 meters. The space skills below level 5 in this area are ineffective. The effect lasts for 30 minutes, and the cooldown time is two natural days.

...

Unfortunately, the red clown seemed to have found something, and his body did not enter the space gap.

"The Gentlemen's Alliance, it seems the real troublesome guy has not appeared yet."

Su Xiao turned and disappeared into an alley.

Chapter 609: Youke Xin

Some of the infected were running on the streets, attacking the civilians nearby indiscriminately.

Dense gunshots were heard all over the city in less than half an hour. About two hours later, the infected people in the town were cleared.

Although the mutation of the virus seemed terrifying, the development direction of the withered corpse was to strengthen the individual strength, not to spread the virus at a fast speed.

The infected bodies created by the dead could spread the virus through wounds, and the second generation did not have this ability.

In other words, as long as the infected bodies were killed, the mutated dead bodies virus could be contained.

Qilu was a city without government jurisdiction. This place belonged to the gang forces and was under the jurisdiction of the ten old men forces.

The ten old men were not small; these ten people were in charge of all the gangs in the six continents and had thousands of fighters under them.

The power of the ten old men was relatively strong in the ordinary world, but it could only be considered middle-level or lower in the power of psychic energy.

The strongest subordinates of the ten old men were beasts' psychic abilities, a total of ten.

From the performance of the ten yin beasts, they were not too strong. Su Xiao had no problem fighting a few of them alone.

It could be seen that the ten old men's forces could only be powerful among ordinary people, and the power of the psychic in front of them began to be tired.

However, there was no doubt that the ten old men were very powerful. They set up the Youke Xin Auction that was held once a year.

The scale of the Youke Xin Auction could only be described as grand. Every year, the auction would start on the first day of the ninth month, continuing until the end of the ninth month and tenth day.

During this period, countless rare treasures would be auctioned, and the total value was beyond imagination.

From the first day of the ninth month to the tenth day, in these few days, not only would a large-scale auction be held at the city center, but the entire Youke Xin City was a trading market where many merchants would gather.

Therefore, even if you are not qualified to participate in the auction, you can go to the small stall of Youke Xin City to take a look. There are also good things here.

This situation led to countless people rushing to Youke Xin at the beginning of the eighth month every year. According to incomplete statistics, during the period between eight to nine months every year, the number of people gathered in Youke Xin was more than five million.

It could be seen in the scale of the Youke Xin auction, whether it was the scale, the price of items, and the number of participants. The Youke Xin auction could be called the largest auction in the world.

Su Xiao's destination was Youke Xin City, and the mission later was unknown.

The deadline to go to Youke Xin was six days, and according to the traffic situation of the Hunter World, this time was very abundant.

Although Su Xiao could ride Bobowang to Youke Xin City, it was a choice that had to be made. Although Bobowang was not small, it was not easy to ride its long distance. It could be said that his waist was sore, and his legs were sore. Moreover, this idiot was often absent-minded when traveling for a long time. It was a common occurrence to crash trees.

Su Xiao consumed some mana values, and the sleeve of his left arm gradually recovered. This was the ability of the Mist windbreaker.

He put the dragon flash into his room and walked out of the alley.

There were traces of blood on the streets. The pedestrians were in a hurry. Some men in black suits with cold expressions would occasionally appear in various parts of the city. These were members of the gangs.

"Quick! Find the cause of the chaos. If you can't find it, you should know the consequences."

"Yes."

There were many gang members on the streets. Qilu City was second only to Youke Xin City as a gambling city. Therefore, the ten old men attached great importance to this place. They sent many people at the first moment of the accident.

At this time, it was already late. After Su Xiao wandered the street for a while, he found that the gang members did not notice him.

Su Xiao removed half a transparent mask from his face and restored his original appearance.

The technology of the hunter world was developed, and it was inevitable that there were monitoring facilities in the streets and alleys. He had long thought of this.

Since the incident with the adventurous group, he would cover his face when he cleaned up the offenders. As the saying goes, being careful is the best way to sail a boat.

...

The chaos in the venue completely subsided at 10 o'clock that night. The statement given by the gang in Qilu City was that someone secretly transported poison gas bombs to Qilu City, which led to the previous situation.

This statement was a little hard to believe, but most of the people gathered in Qilu City were gamblers. Around 11 o'clock that night, Qilu City returned to its former prosperity.

The city's center had a gambling house called 'Gold Hunter'.

This casino had a total of thirty-five floors. Below the tenth floor was the Common District, and above the tenth floor was the VIP area. They needed to hold a certain amount of money before they could enter.

At this time, on the thirteenth floor of the casino, a semi-circular gambling table was full of gamblers.

These gamblers were dressed brightly and were all successful people from various industries. However, they took off their 'masks' in the gambling venue and expressed their greed.

The air was filled with the smell of cigars and wine. A young man was playing with an exquisite lighter on the gambling table. In front of him were some chips.

Before entering the hunter world, Su Xiao exchanged one million ring nuns. The ring nun was the currency of the hunter world. The proportion with the RMB was about 16:1.1 RMB, equivalent to 16 ring nuns.

Although in the reincarnation paradise, one could use park coins to exchange for the currency of the derivative world, there was a limit. After exceeding the quota, the park coins needed to be spent increased dramatically.

For example, 100 park coins could be exchanged for one million ring nun, but if one wanted to trade for one million ring nun, it would cost about seven thousand. If one wanted to exchange for one hundred million ring nun, the cost would be even more terrifying.

In the hunter world, with enough ring nun, one could buy a small nuclear bomb so that the reincarnation paradise would limit the number of ring nun.

Because of this, Su Xiao, who had nothing to do at night, came to the casino. He was ready to make a sum of quit school and use it for the expenses of the hunter world. The number did not need to be too much, and tens of millions of quit school were enough.

At the gambling table, Su Xiao casually threw out a few chips. The game style of this gambling table was effortless. The three types of games, heaven, earth, and, could be placed at any price. If he felt lucky, he could also place a bet on the number 1, 50 middle fingers.

1-20 is earth, 20-30 is peace, 30-50 is heaven.

Two times, and three times, the designated number will be ten times, the number will be doubled, the number will be doubled, the number will be doubled, the number will be doubled, and the number will be 50 to 50 times.

There were other rules. Su Xiao only began to press after understanding the general situation.

The disk in the center of the gambling table began to rotate. There were 50 small compartments, 50 numbers, and a small ball rolled on the disk.

"I will buy it and leave my hand."

The dealer sealed the plate, and Su Xiao bet 100,000 on the light.

"Yes."

The assistant next to the dealer began to settle the chips, and the chips worth 300,000 of the nun were pushed to Su Xiao.

For Su Xiao, the movement trajectory of the small ball was straightforward, but the casino would occasionally pay a thousand, which made his winning speed a lot slower.

Su Xiao did not win quickly but won for a while and lost for a time. Now the Gentlemen's League was in Qilu City, and he did not want to be exposed to the surface.

At about 1 o'clock that night, Su Xiao won about 20 million. The people of the casino did not come to find trouble. This was the result of the casino deliberately going easy. The new gamblers could always win money, no matter where.

In gambling, only the casino was the winner.

Chapter 610: Traveling

The following day, the sun shone into a bedroom.

Su Xiao sat on the bed in the bedroom with his eyes closed. He was meditating.

"Huff"

He exhaled. The higher the level of the sword, the higher the efficiency of his meditation. Although meditation was boring, it was a kind of training for his willpower.

Half an hour later, Su Xiao checked out and left the hotel. He wanted to leave Qilu City.

The transportation in the Hunter World was very convenient. There were many ways to go to Youke Xin City, such as taking an airship, train, etc.

The fastest one was the airship, and the cost of taking it was the highest.

The airship business was a piece of fat meat, but the airship business in Qilu City was not controlled by the ten old men but by the Hunter Guild.

Compared to the Hunter's Guild, the ten old men's forces were not worth mentioning. It could be said that the Hunter's Guild was a force above most national institutions.

In front of the airship management office, Su Xiao looked at the long line in front of the door, and his cheeks twitched.

Today was the morning of August 26th. There were still five days left before the opening of the Youke Xin auction. Even so, the transportation tools of various cities rushing to Youke Xin City were overloaded.

Looking at the ticket office from a distance, a sign was hanging there, and it was impressively written: earliest airship ticket, nine months and seven days.

In other words, even if he bought the airship ticket, he would have to wait for nine months and seven days to take off.

Su Xiao looked at Bobowang. Was he going to ride this guy to Youke Xin?

Bobowang took two steps back. His gaze was clearly: "Master that is more than a thousand roads. Calm down. I can't do it."

Leaving the airship management office, Su Xiao went straight to the train station.

The situation in front of the train station was not very good. A familiar scene appeared and could be said to be a sea of people.

"Tickets, tickets, nine in the morning to the Youke Xin train ticket."

A little fatty stood in the crowd. He grunted after shouting a few times. He was invited by the gang to 'drink tea. The train station was the business of the gang. If he wanted to sell yellow bull tickets, he had to be managed by the gang.

The gang left with the shivering fat man, and two tickets appeared in Bobowang's mouth.

"This thing... It can't be fake, right?"

After preliminary verification, these two tickets were genuine. At 9 am, Su Xiao sat on the train to Youke Xin.

In the carriage, Su Xiao sat in the seat by the window, and Bobowang sat next to him.

"The train to Youke Xin City is about to depart. Please check your luggage, belongings, etc.."

The gentle voice of the attendant came from the radio. Su Xiao had taken out his tablet computer and was playing puzzle games.

"Woof."

Bobowang called, which meant that he was hungry.

Su Xiao took out a bunch of snacks and put them on the small table in front of him. Bobowang tore the bag with his two front paws and ate happily.

Not long after, a young man and woman sat on the chair opposite Su Xiao.

Su Xiao looked up and continued to play puzzle games.

"Brother, is Youke Xin as lively as you said?"

The girl in front of Su Xiao spoke. The girl was about 15.6 years old. She looked pure and wore a beige dress.

"Of course, although Youke Xin holds an annual auction, he can take out rare items every time. This time, we are just going to watch the fun."

The man beside the girl was wearing a simple white T-shirt, black pants, and a pair of frameless glasses.

"I'm looking forward to it."

"Mm, don't get separated from me when the time comes. The gang controls Youke Xin, so it's not safe."

"I know, you're so long-winded."

The girl pursed her lips, and her brother smiled helplessly.

The train started slowly. Bobowang touched Su Xiao with his front paws. The small eyes seemed to be saying, "Master, I want to sit inside and see the scenery outside the window."

"I can't stop your mouth even if I eat."

Su Xiao got up and changed positions with Bobowang. Bobowang grabbed a bucket of potato chips and looked at the scenery outside the window with satisfaction.

"This... is so magical."

The girl on the other side looked at Bobowang, and her eyes seemed to have stars.

"Doggy, I'll give it to you."

The girl took out a piece of jerky and handed it to Bobowang.

Bobowang rolled his eyes and ignored the girl. The dungeon was icy, so don't disturb me.

"Sister, don't mess around."

The girl's brother took his sister's hand and smiled apologetically at Bobowang.

Just two seconds ago, when the girl handed the dried meat to Bobowang, Su Xiao looked up, and the girl's brother inadvertently looked at Su Xiao.

At that moment, cold sweat soaked the clothes on the girl's brother's back. There was no hostility in the other party's eyes, no killing intent, just a simple look.

But the keen perception told the girl's brother that this man was extremely dangerous.

"Puppet? This is the psychic. The perception is very sharp."

Su Xiao continued to lower his head to play the decryption game. He did not release his momentum, but the other party still perceived something.

The girl brother's sitting posture was stiff, and cold sweat oozed his cheeks.

"Brother, what's wrong with you? It's not hot in the carriage. Why are you sweating all over?"

The girl looked at her brother in confusion.

"It's fine. Emily, didn't you say that you were sleepy? Go to sleep."

"Mm, alright. But brother, this is a sign of kidney deficiency. I saw it in the book."

Emily leaned on the back of the chair and took a nap. Her brother took out a book and read it attentively.

"You are competent."

Su Xiao suddenly opened his mouth, and the girl's brother stiffened.

"No, compared to this gentleman, I am not worth mentioning. By the way, I forget to introduce myself. My name is Kenny."

Kenny was secretly on guard.

"It's tough to read books upside down."

Su Xiao had a smile, and he kept operating his hands.

"Hey."

Kenny found out at this time that he had taken the book down.

"We don't know each other, and there is no grudge."

When he heard Su Xiao's words, Kenny nodded.

"Sorry, I was rude before."

Although Kenny relaxed on the surface, he did not relax at all. The scene he saw in his eyes was unforgettable.

The breath of ordinary people was colorless or milky white, and Su Xiao's breath was light blue, violent, sharp, and seemed to swallow everything.

The train drove steadily. According to the current speed, it would arrive at Youke Xin in about 13 hours.

In the first hour of the first day, Bobowang could still watch the scenery to relieve boredom, but after two hours, this guy began to be bored. He rolled on the chair and hit Su Xiao from time to time.

Three hours later, Bobowang had already become one with the girl Emily. One man and one dog started playing cards. Whoever lost would put a note on their face.

Su Xiao had already seen Emily's appearance in less than half an hour. Apart from her big watery eyes, her face was covered with paper.

The corners of Emily's brother's mouth twitched. He had seen intelligent dogs before, but this was the first time he had seen a dog with such a high IQ.

"No, why do you have a big and small ghost again, damn it."

The angry Emily threw the cards in her hand, but Bobowang's cards were too good.

"No, let's do it again."

Emily, whose face was full of notes, was about to turn into a 'drag'. Bobowang was not bored anymore. She began to wash the cards with her flexible front paws.

The boring journey was no longer boring because of these two buffoons. Su Xiao put away the tablet computer. He was ready to rest for a moment. He would arrive at Youke Xin City in five hours.
