

R. Paradise 791

Chapter 791: mass destruction

Su Xiao aimed the [Ghost Hunter] at the Dwarf who was lying on the ground and was just about to pull the trigger when a familiar air-breaking sound came from above. MagazineInsect

Su Xiao, who was already familiar with the battlefield, knew what it was without looking at it, that unique sound, it must be the 'Green Phosphorus Flame Burning Bottle'.

The fact was exactly the same, a water tank sized 'Green Phosphorus Fire Flask' flew in a parabola, after Su Xiao's initial estimation, this thing was likely to fall a few meters away from him.

The power of the green phosphorus fire is obvious to all, moreover, Su Xiao already has a new batch of tribal army coming from the vicinity, once the 'green phosphorus fire flask' landed, it was hard for him to leave the burning area of the green phosphorus fire, sensing this, he simply gave up killing the dwarf lying on the ground, but used the ghost hunter to aim at the mid-air 'green phosphorus fire flask'. 'Green Phosphorus Flame Flask'.

The 'Green Phosphorus Flask' was flying in mid-air, which made aiming significantly more difficult.

"Kill him."

"Avenge your dead compatriots!"

"Stall him, the Green Phosphorus Bottle is coming, die together!"

The surrounding orcs and dwarves pounced forward, their gazes hating to eat Su Xiao alive.

There were more than a dozen imperial troops pouncing around, Su Xiao still kept his crossbow raised in an aiming position, his breathing slowed down, the wobble of his crossbow's collimator decreased, at this moment, he only had the sound of his own breathing in his ears, and the roars of those tribal troops were ignored by him.

Pulling down the trigger of the crossbow, the crossbow string made a tiny sound of breaking air, a crossbow arrow made of energy was shot out.

The flight speed of the energy crossbow arrow was extremely fast, and it accurately hit the 'Green Phosphorus Flame Burning Bottle' in mid-air.

With a snap, the glass bottle shattered, the green liquid inside the bottle splashed in midair, the green liquid reacted when it came into contact with the air, and green phosphorus fire appeared.

A large area of green phosphorus fire fell into the tribal army, was burned by the green phosphorus fire tribal army screamed again and again, the green phosphorus fire is very vicious, not only the temperature is high, but also has a very strong adhesion, just like the plastic burning droplets, as long as the skin is stained with a small point, the body will be burned out of the very deep hole.

Resolving the threat of the 'Green Phosphorus Flame Burning Bottle', Su Xiao put away the [Ghost Hunter], the counterattack shield spread out to the surroundings, and the long knife in his hand cut through the body of one enemy.

Not a moment later, Su Xiao stood on a pile of corpses, towering over them.

The surrounding tribal army fearlessly rushed onto the pile of corpses, with an air of using human warfare to pile up Su Xiao.

Su Xiao, who used the long sword as his main weapon, was very suitable for group battles, and with the Counterattack Shield and Green Steel Shadow ability, the sea of men tactics could not defeat him in a short period of time.

Mana and life value could be recovered quickly, but physical strength was always a problem.

Su Xiao's physical strength attribute was very high, facing the tribal army's siege, he was able to not lose for a long time, but he was not a machine, sooner or later he would get tired.

Although in the last battle, Su Xiao had killed for a day and a night, but at that time, he was often 'lazy' and would play dead to recover his stamina.

This time was different, Su Xiao was in dire need of battle credits, if he couldn't obtain sufficient battle credits this time, the [Sacred Oak Tree Trunk] would most likely be exchanged by a certain adventuring group that focused on battle credits.

Therefore, in this battle Su Xiao had to kill the enemies with all his might, and while the number of kills soared, his stamina was rapidly depleting.

With a click, the Counter Shield shattered for the fifth time, fortunately, Su Xiao's mana value had already been restored to full through killing enemies, and a new Counter Shield was generated immediately.

Whoosh~ Boom!

From time to time, green phosphorus fire incendiary bottles, rain of arrows, crossbows and reamers flew through the sky, none of these things were good to deal with, after all, they were all weapons of war.

In the high altitude bird's eye view, the army of the empire and the horde continued to swarm up to the black earth fortress, both sides of the soldiers a large batch of a large batch of death, there is a batch of a batch of rushing.

The sound of explosions, the wails of the wounded, the shouts of killing in the sky, the shouts of the officers, these sounds made the battlefield very messy, a large number of soldiers who killed red-eyes even began to accidentally injure their companions.

At this moment, all the soldiers were like crazy, fighting to this extent, even if the chiefs of both sides wanted to stop the war, they couldn't do it, there could only be one outcome of this battle, that is, a certain side was knocked down the Black Earth Fortress and shrunk back to their territory.

The imperial army is to protect their homeland, the tribal army is to let the people no longer starve and freeze, both sides of the reason makes sense, therefore, the war will not stop, must be in a certain side left a large number of corpses to retreat, the war will only end.

There were three large war zones in the War World, and if the other two war zones had a danger factor of two stars, the Black Earth War Zone was at least five stars.

Comparatively speaking, the Black Earth War Zone had more chances to gain benefits, with both danger and opportunity.

Of course, not everyone enjoyed such opportunities, such as the current Symbiosis Alliance Adventure Group.

The Symbiosis Alliance was a medium-sized adventuring group, with 96 members including the leader, belonging to a medium-sized adventuring group with a medium number of members.

The head of the Symbiosis Alliance, Commander Ge, had his eye on the [Sacred Oak Tree Branch], so when the war started, he rushed up to the Black Earth Fortress with his men.

Just after engaging the tribal army, Commander Ge found out that something was wrong, the enemy's defense and attack power was not comparable to the enemy in the previous battle, as for retreating from the Black Earth Fortress, it was impossible, there were too many friendly soldiers at the back, with Su Xiao's power attribute, they were all squeezed up to the Black Earth Fortress.

Facing the Horde army whose defense, attack power, and army quality had increased by several notches, an hour after the war began, the main tank and two deputy tanks of the Symbiosis Alliance fell, hacked to pulp by hundreds of special troopers, the Berserkers.

The Adventure Corps is a whole, this whole has front row, control, fire support, etc. specializing in different body lengths of contractors, the moment the main tank fell, and Commander Ge was already ashen.

In just five minutes**** the Living Alliance was scattered by the Horde's army, and the team members were reduced from 96 to 17, and it was still dropping fast.

Twenty minutes later, Symbiosis Alliance was wiped out, and the head of the team, Commander Ge, died at the hands of an orc leader, a Minotaur, who gave Commander Ge a taste of a cow|dick, no, a cow's horn.

The regiment was destroyed in the battlefield of the first adventure group appeared, reincarnation paradise side of the contractors died and wounded, the apocalypse paradise side is not much better, as the same by the imperial army to beat the skeptical life.

Adventure corps don't like this kind of large battles, they prefer to siege powerful plot characters or big bosses, that's what adventure corps are the best at, after all, their abilities are well-matched, and usually big bosses will die under their cooperation.

But on the battlefield, this kind of cooperation loses its meaning, the number of enemies is just too much, the more the number of adventuring corps, the bigger the target, the more soldiers they face at the same time, in this way, the advantage becomes a disadvantage, of course, if the number of both sides is the same, the adventuring corps must be crushing the soldiers.

Adventure group is not suitable for this kind of battlefield, there is a kind of person who is suitable, that is the solo warrior, most solo warriors even if they are not multiple attribute development, they will use skills or equipment to make up for the weaknesses, which makes the solo warrior has no obvious short board.

Moreover, the number of soldiers a lone warrior faces at the same time is far lower than an adventuring group, making it more likely to survive in a war.

Of course, some Adventure Groups were also mixing it up on the battlefield, using their own soldiers as cover and not rushing to the forefront, and in doing so, the gains were not as high as rushing to the front.

Su Xiao liked this kind of challenging war zone, he had already killed hi within the tribal army, every slash had an enemy fall, he stood on the towering pile of corpses, the imperial officers and the tribal side's chiefs noticed him, the idea of the imperial officers was equal to a raise in rank, while the idea of the tribal side's chiefs was equal to a stronger enemy.

Su Xiao leapt off the pile of corpses, landing on the ground and killing his way through the tribal army, he didn't want to be targeted by an enemy that was too strong, and then, it went against his wishes.

Chapter 792: Su Xiao, who has passed through the station.

Su Xiao had just killed an open space in the tribal army, and before he could catch his breath, he realized that the surrounding orcs and dwarves had actually started to retreat, and there was no fear in their eyes, which wasn't that they were afraid of being killed by him.

Boom Boom Boom...

The ground shook slightly, this abnormal situation made Su Xiao alert.

The vibration of the ground was getting stronger and stronger, not only that, the formation of those tribal soldiers around them gradually dispersed, as if they were giving way to someone.

"Crush the cowards of the empire."

A dwarf riding a boar rushed out from within the tribal army, carrying a short-handled warhammer in his hand, with armor wrapped around the boar's vitals beneath him.

Seeing this kind of attire, Su Xiao immediately recalled the Dwarf race's 'Mountain Cavalry Regiment', and after careful observation, he realized that these Dwarf cavalrymen were different from the 'Mountain Cavalry'.

The armor of these Dwarf Cavalry had a kind of earthy yellow pattern on it, that was obviously the product of Gnome Forging Process + Dwarf Alchemy.

The armor gave people a sense of heaviness, although the 'Mountain Cavalry Regiment' was the elite unit of the dwarves, it could not be equipped with this kind of armor for each person, that would be too much.

Su Xiao secretly became vigilant and used the Apostle's Eye to check the attributes of these Dwarf cavalrymen.

The information was as follows

Name: Bart

Category: Dwarf

Position: Earth Cavalry Regiment (Dwarven ace cavalry, totaling 1,200 men)

Life Value: 100%

Mana: 200/270

Power: 52

Agility: 32

Physical Strength: 49

Intelligence: 27

Charisma: 6

Skill 1: Ace Cavalry (Passive Lv.19), Boosts 400 Life Points, Strength +3, Stamina +5.

Skill 2: Working Together (Passive LV.20), Earth Cavalry number reaches 10, Strength, Agility, Stamina +1, Earth Cavalry number reaches 100, Strength, Agility, Stamina +3, Earth Cavalry number reaches 1,000, Strength, Agility, Stamina +5.

Skill 3: Earth Battle Armor (Passive Lv.25), +15 Defense, +18 Life per minute recovery. produces a small Earth Aura, by the time the number of Earth Cavalry reaches 1,000, a large Earth Aura will be formed (created by Dwarven Forge Craft + Gnome Alchemy)

Skill 4: T-Shaped Charge Formation (Passive LV.26), form a T-Shaped Charge Formation from 1000 Earth Cavalry, Charge Speed +40%, Aura +70%, Attack Power +12%, after charging, generate Power Link, Power Link will be attached to the Large Earth Aura.

Skill 5: Life and death together (Passive Lv.29), candidate earth cavalry juvenile will choose a juvenile sharp tusk war pig, earth cavalry and sharp tusk war pig together training, life, both sides of the tacit understanding, not knights and war horses can be compared, a long time of life and death together, so that the earth cavalry and the sharp tusk war pig appeared symbiotic, when the life value of a party is less than 50%, there will be a vitality sharing state, the higher life value party will share the life force, the higher life value party will share the life force. When a party's life value is lower than 50%, there will be a life force sharing state, the party with higher life value will share out the life force, so that both parties' life value is equal, such as being fatally traumatized, both parties' life value will be lost together, until death.

...

Seeing the attributes of these Dwarf Cavalry, Su Xiao began to slowly retreat, if it was just one Earth Cavalryman, he was able to exterminate multiple parties within ten seconds or so.

But now, thousands of Dwarf Earth Cavalry rushed out from within the tribal army, they rode strong boars in a line to charge, wearing alchemy war armor, holding the same style of war hammer, the armor were all alchemy products, the Earth Cavalry's weapons would be poor?

Rumble ...

Thousands of Dwarf Great Earth Cavalry rushed up the slope, like a stream of earth-colored mud and stone, due to being within the tribal army, Su Xiao would be the first person to come into contact with the Earth Cavalry.

An earth-colored energy connected the thousands of Dwarf Great Earth Cavalry, they were trying to level the Black Earth Fortress.

Su Xiao disarmed his Counter Shield, in the face of this massive charge, the Counter Shield would only increase the area of the enemy's attack, thus sending him flying out on top.

Green Steel Shadow energy wrapped the Dragon Flash, the strength of one Dwarf Great Earth Cavalry was not too strong, but if thousands of them charged together, it was another concept.

"Oh la la la la ..."

The Dwarf Great Earth Cavalrymen let out strange shouts while charging, this was not a meaningless act, this neat shout not only increased their own side's momentum, but also made the enemies notice their existence, thus cutting down the enemy's momentum.

The shouts of the Dwarf Great Earth Cavalry spread, the veterans of the Imperial Army began to subconsciously retreat when they heard this sound, but unfortunately, they couldn't retreat, there were too many soldiers behind them.

Su Xiao placed his Dragon Slashing Flash across his body, at this moment, the Dwarf Great Earth Cavalry had already rushed to ten meters in front of him.

The distance is rapidly approaching, eight meters, seven meters ...

Su Xiao stepped on the ground under his feet, and the gravel splashed, and he actually took the initiative to meet the Dwarf Great Earth Cavalry and made a counter charge.

The few Dwarf Great Earth Cavalrymen in front of Su Xiao froze, and then began to laugh, seemingly mocking Su Xiao's insouciance.

"Little T-word."

The several Dwarf Big Earth Cavalry formed a small T formation, and the earth-colored glow on their bodies turned deeper.

Su Xiao collided head-on with several Dwarf Great Earth Cavalrymen, and the raindrops that fell from the sky slapped on his face, which was cool.

The green steel shadow energy on his long sword rushed, and the several Dwarf Great Earth Cavalrymen raised the war hammers in their hands almost at the same time.

Su Xiao raised the War Dragon Flash above his head, the muscles of his right arm bulged slightly, he used his full strength with this blade.

The Dragon Flash touched with a war hammer.

Boom!

An air wave spread out, thousands of Dwarf Great Earth Cavalry's tendency to charge forward lurched, their ministry as a whole was connected, after a thousand people charged it was a whole.

With a snap, the war hammer in the hands of the Dwarf Great Earth Cavalryman that fought with Su Xiao shattered, and at the same time, his arm and body also shattered.

The blood mist exploded, and the several Dwarf Great Earth Cavalrymen in front of Su Xiao exploded into a sky of rotten meat, including the Sharp Tusked War Hogs underneath them.

Several of the Dwarf Great Earth Cavalrymen's corpses and bones were nowhere to be found, they were shattered by the powerful power of the hedge.

Forces interacted with each other, and in the instant that the thousands of Dwarf Great Earth Cavalry lurched, Su Xiao had already flown backwards in the direction of the Imperial Army.

Whoosh~

Su Xiao made a cracking sound as he flew backwards, being in mid-air, the right side of his body was numb, and the tiger's mouth of his right hand was cracked.

While flying backwards at high speed, Su Xiao opened his Counter Shield to protect himself.

Bang, bang, bang...

One imperial soldier was knocked away by the counterattack shield, and Su Xiao was like a train traveling at high speed into the imperial army.

Boom!

Su Xiao crashed into a higher rocky slope, he was shaken and spat out blood from his mouth, which didn't stop his backward flight, but continued to fly in the direction of the fortress.

Dazed and not knowing how far he had flown, Su Xiao stopped behind a few imperial soldiers, smashing large craters in the dirt, and those soldiers all looked at him with palpitations.

"Is... is this a friendly army?"

"I think...yes, it might have been knocked out by the trolls."

The imperial soldiers stopped paying attention after confirming that Su Xiao was a friendly army, they wouldn't come to check Su Xiao's injuries or save him, this was a battlefield and there was no time to pay attention to the wounded.

"Cough cough cough ..."

Su Xiao coughed out several large mouthfuls of blood one after another, he knew how he was knocked away, after those thousands of Dwarf Great Earth Cavalry charged, they would form a power connected effect, that is, that earth-colored glow, that thing made the Earth Cavalry become a whole.

Su Xiao hard resisted the power of the Dwarf Great Earth Cavalry scrambling, although the thousands of Dwarf Great Earth Cavalry just paused for an instant, but that kind of power is not something that the current Su Xiao can block, this is the power of the charging formation.

Taking out a No.1 potion and drinking it, the soreness and numbness on the right side of Su Xiao's body gradually receded, and the cracked tiger's mouth on his right hand began to heal.

Fortunately, Su Xiao's physical strength attribute was high enough to be able to fight and resist, if it was any other strength or agility specialty Contractor, that one hit just now would definitely be killed in seconds, even Su Xiao, after resisting that one hit, his life value slipped to 17%.

After recovering some of his injuries, Su Xiao got up and looked around, he was surprised to find that he flew to the back of the Imperial Army, he was almost out of the battlefield, surrounded by a few slightly confused soldiers of the Supervisors.

"Soldier, are you alright."

The few soldiers of the Supervision Team were not stupid, moreover they saw that Su Xiao was flying from the front line, this was not a deserter, but a soldier who fought in blood.

"Not much of a problem."

Su Xiao moved his somewhat sore body, just as he was about to return to the front line, he realized that the situation of the war was somewhat wrong.

The screams at the front line were in a row, and they were all the screams of the Imperial soldiers.

A stream of yellow people smashed and crushed a large group of empires, and this stream of yellow people was none other than the Dwarf Great Earth Cavalry Regiment.

Thousands of Dwarf Great Earth Cavalry were like bulldozers, they were unstoppable, they had rushed up to the top of the fortress, and had toppled the imperial army on the fortress, the imperial army was knocked down the fortress, and there was the drive to be driven down the magma slope, according to this way, the imperial army would be cleared out of the Black Earth Fortress.

Boom, boom, boom ...

Heavy footsteps came from behind Su Xiao, a giant around ten meters tall walked past Su Xiao towards the front line, they wore battle armor and oversized battle boots on their feet, the metallic soles were at least twenty centimeters thick, the giant race was the nemesis of the Dwarf Large Earth Cavalry Regiment.

Su Xiao sprinted forward a few steps and then jumped up, his figure nimbly climbed onto the shoulder of one of the giants and stood on it.

That giant turned his head to look at Su Xiao with a calm gaze.

"Soldier, what are you doing on my shoulder."

The giant spoke in a jarred voice and had the dialect of his old home.

"Taking a ride."

"Oh, then you be careful in a minute, humans and giants are friends, giants don't want to hurt humans, and Essen likes human friends."

Brother Giant grinned, revealing two rows of flat teeth the size of cabinet doors.

"No problem."

Su Xiao did not expect that these big men had unexpectedly good tempers.

"Stand firm, I'm going to charge, those shorties are not easy to deal with, choking my feet. "

The giant brother smiled nervously, his legs bowed.

"Hey! You're not going to ..."

Boom!

The giant brother jumped up, a jump that was hundreds of meters away, straight across the Imperial soldiers and onto the Black Earth Fortress.

Not only did this giant brother Su Xiao was in jump up, dozens of other giants also lifted up.

Boom, boom, boom ...

Dozens of giants jumped to the top of the Black Earth Fortress, the fortress shook for a while, and the Dwarf Great Earth Cavalry Regiment that was unstoppable just a moment ago was trampled to death by a large swath of people, those twenty centimeter thick metal large soles were too terrifying.

"Retreat!"

The Giants made their appearance, the Dwarf Grand Earth Cavalry Regiment immediately turned around and retreated back to the Black Earth Fortress, in less than half a minute, the Black Earth Fortress was recaptured by the Imperial side again.

As for the Su Xiao who had just 'hitchhiked', he was currently staring at several dumbfounded Goblins, and beside these Goblins was a large metal stone thrower, and it was this thing that threw the 'Green Phosphorus Fire Incendiary Flask'.

That's right, Su Xiao arrived at the rear of the tribal army from the rear of the imperial army in just ten seconds, spanning the entire battlefield, the previous giant brother's power attribute was too strong, Su Xiao guessed that the power attribute of that thing was probably 80 points, which was the limit value of this world.

Su Xiao stood up and looked around.

"Sitting over the station."

Su Xiao's words just fell.

"Enemy attack!"

Several gnomes let out screams, seemingly a few terrified middle-aged amazons.

Su Xiao couldn't stay here for long, he had to kill his way back to the Black Earth Fortress from the rear of the tribal army to join the imperial army, he was too far away from the imperial army, if he didn't kill his way back as soon as possible, once the imperial army was defeated, he wouldn't even have a chance to retreat, he would be besieged to death by the tribal army.

Su Xiao rushed towards those few terrified goblins, a few slashes down, those few butchered weak goblins stood up, he was just about to kill from the rear within the tribal army, his sight unintentionally swept over, he was attracted by that metal stone thrower with dozens of bottles of green phosphorus fire burning flasks in the vicinity.

Chapter 793: not know how to use

Su Xiao looked at the metal stone thrower not far away with dozens of bottles of green phosphorus fire flasks, the size of the metal stone thrower was not small, with a length of more than six meters and a width of about three meters.

When his palm touched the metal stone thrower, Su Xiao's eyebrows raised.

Origin: Horde Alliance - Dwarf War Workshop

Quality: Purple

Category: Siege Equipment

Capacity: 1~5

Durability: 69/75

Load Requirement: Throwing Apparatus Proficiency Lv.10 or higher.

Effect: Long-distance precision throwing: After completing the filling, you can throw the Green Phosphorus Flame Flask accurately between 100 and 1400 meters.

Score: 150

Introduction: Developed by Dwarf artisan Warner and later improved by a number of Gnome Alchemists.

Price: Unable to sell.

Tip: This is a war instrument, before the tribal alliance lost the war, this item can not be included in the storage space, can not get ownership, such as the war victory, this item will become a war trophy, you can use the war credit exchange or directly seized.

...

This thrower is actually a piece of equipment, but unfortunately, it belongs to the war instrument and cannot obtain ownership before it is converted into war trophies.

Moreover, trying to load this thing required Lv.10 or above Throwing Apparatus Proficiency, a skill that Su Xiao had never even heard of, not to mention mastering.

Although he couldn't load and talk about it, it didn't mean that Su Xiao couldn't use this thing to launch a green phosphorus fire flask, after all, it was already loaded.

Su Xiao will not launch this thing for the time being, but pick up a bottle of Green Phosphorus Fire Burning Bottle on the ground, this thing may also be a war instrument, if that's the case, he can't even take a bottle, the reason is very simple, there is no way that he can carry this thing with him when he fights, that's just a fancy way of making a mistake, it'll be hilarious if the enemy breaks the burning bottle.

Su Xiao checked the attributes of the Green Phosphorus Fire Burning Bottle, not surprisingly, this thing is also a war instrument.

After hesitating for a moment, he took a metal syringe and stabbed the needle of the syringe into the wooden cork of the 'Green Phosphorus Fire Flask'.

Su Xiao was always on guard against the sudden spontaneous combustion of this thing, but the needle of the metal syringe was very thin, and the Green Phosphorus Flame Flask didn't show too much reaction.

Using the metal syringe to draw out some green phosphorus solution, this thing was a product of alchemy, if he had time Su Xiao could study it, after all, his alchemy level was not low, if he was lucky, he might be able to imitate it.

Dismantle the metal syringe, take out a small finger long glass tube from inside, the glass tube is filled with green phosphorus solution, the glass tube is high strength glass, the hardness can be comparable to metal, there is no problem to carry it around, moreover, there is very little green phosphorus solution inside, even if it is broken, he can immediately rip off the clothes that touched the green phosphorus solution.

The sound of shouting and killing came from the back of Su Xiao, his location was a little remote, near a small piece of forest, the tribal army did not notice him for the time being.

As for why the 'Green Phosphorus Fire Flask Thrower' was placed in such a remote place, the reason was simple, to reduce the possibility of being discovered by the Dark Elf tribe.

The Dark Elf race was a special type of soldier of the empire, usually scouts or assassins, more than 70% of them were females, the Dark Elf race was born with the ability that their skin and hair could

adsorb light, thus allowing them to carry out a long period of invisibility, there were rumors that the Dark Elf spent most of her life in invisibility, the female Dark Elf was too beautiful and could easily cause the males to "animal ' coveted.

This female animal, which wraps male humans, male elves of other races, male orcs, male dwarves, male goblins, and male trolls!

On the continent, perhaps only the straight giants would not see color in a female dark elf, after all, the size difference is too great.

Dark elf scouts who can remain invisible for long periods of time are the biggest threat to wargear because, the tribal side hides the wargear properly and minimizes the number of soldiers near the wargear so as not to attract the attention of the dark elves.

Once the Dark Elves discovered the War Apparatus, it was useless to have more soldiers nearby, the Dark Elves would carry around an Alchemical Corrosion Bomb, that was extremely corrosive to most metals.

It had to be mentioned that a Dark Elf could carry at most one or two Alchemical Corrosion Bombs, and as for the reason, it was because these stealthy scouts couldn't wear clothes.

Dark Elves used their skin to adsorb light, thus achieving stealth, and once they wore clothes, the effect of stealth would be drastically reduced, to the point of being unable to be stealthy.

Imagine a beautiful female Dark Elf wandering around the battlefield looking for a chance to assassinate an enemy general or destroy siege equipment.

As for where the Dark Elves hide the Alchemy Corrosion Bombs, there are few places a naked Dark Elf can hide something, but of course it is tucked into the ... Don't get me wrong, they just tuck the Alchemy Corrosion Bombs into their braids and wrap the Alchemy Corrosion Bombs with their hair.

It is because of the presence of dark elves that there are very few soldiers near this war apparatus, leaving only a few necessary goblins with alchemical traps set up around it so that it provides fire support as well as bait, and because of this, most dark elves have to know some rudimentary alchemy in case of alchemical traps from the Horde army.

However, Su Xiao directly ignored the nearby alchemy traps, He flew over.

Su Xiao surveyed the "Green Phosphorus Fire Flask Thrower", the construction of this thing was very complicated, there were hundreds of large and small parts, and it was extremely difficult to fill, but fortunately, launching it wasn't that difficult.

There was a joystick on the thrower, according to Su Xiao's visual estimation, pulling the joystick should be able to launch the 'Green Phosphorus Flame Flask'.

Su Xiao took out a rope from the storage space and tied the nearby twenty-five bottles of Green Phosphorus Flame Flasks together, holding the flasks bundled into a ball, he walked towards the thrower.

At the end of the thrower was a two-meter long throwing rod, and there were five grooves on the throwing rod, with five bottles of Green Phosphorus Flame Burning Bottles fixed inside the grooves.

Su Xiao tied the bundled 'Green Phosphorus Fire Flasks' in his hand to a bottle that had already been filled.

He considered it this way, first of all, both the thrower and the flasks couldn't be taken away, so it would be better to use them all, the problem was that apart from launching, he didn't know anything about the other functions of the thrower, such as the adjustment of the distance, the direction of the throw and the height, and so on.

Since he didn't know how to adjust it, Su Xiao simply didn't adjust it, and now that the thrower had been filled, it could be fired at any time, which meant that the target of this thing's attack was most likely the Imperial Army now.

The weight of five bottles of 'Green Phosphorus Fire Incendiary Flasks' was certainly different from the weight of thirty bottles, and in Su Xiao's conception, after successfully throwing the 'Green Phosphorus Fire Incendiary Flasks', the thirty bottles of 'Green Phosphorus Fire Incendiary Flasks' would fall within the tribal army because of their weight, and even if they couldn't fall, he still had other remedies, it would just take less time for the green phosphorus fire to burn the enemy.

A white object was attached to the Green Phosphorus Flame Burning Bottle, this was the Alchemy Bomb, Su Xiao's backup means.

Gripping the joystick on the thrower, Su Xiao was eager to throw it successfully, a successful throw equaled a large amount of battle credits.

If you want to read a good novel, please use WeChat to pay attention to the public number "get cattle to read books".

Chapter 794: Shameless!

Su Xiao pulled the joystick, click click click, the gears inside the thrower turned.

With a pang, the base in one corner of the thrower fell off, and the thrower as a whole tilted a bit.

Su Xiao froze, he said that he would launch when he pulled the joystick, how did this still fall off a corner, he was a bit unconvinced and pulled the joystick a few more times.

Pang Dang, Pang Dang ...

The base used to stabilize the body at the four corners of the thrower all fell off, Su Xiao never expected that the most conspicuous joystick was actually not launched, but disassembled.

After circling around the thrower for a few times, it was proven that Su Xiao was not very good at precision machinery, and it was no problem to set up a trap, but as for analyzing the construction of the thrower, it would be better to wash his hands of it.

Empty Thrower + Green Phosphorus Flame Flask but can't fire it out, nothing is more depressing than this, a lot of battle credits went up in smoke because he can't use a Thrower.

"Bullshit dwarven craftsmanship, such a complicated design."

Su Xiao kicked at the thrower, the metal guard of the thrower was dented.

"If I were you, I'd pull that wire underneath the thrower."

A female voice came, and Su Xiao looked sideways at the tree a dozen meters away, where there was someone.

"Whoever it is, show yourself in ten seconds."

Su Xiao didn't know about the existence of the Dark Elf Clan yet, he hadn't come to this world for a long time, the other party's intentions were unknown and they were still in a stealthy state, so of course he had to recognize the other party's identity.

"Unreasonable guy!"

There was some anger in that female voice.

"Five, four, three ..."

Su Xiao's qi was released, hoo~, the dead leaves on the ground were blown up, he had killed at least thousands of tribal troops on the Black Earth Fortress before, and his qi at this moment was extremely amazing.

"Don't misunderstand, I'm a friendly army."

"Two."

Su Xiao's aura became even more ferocious.

"Wait."

"One."

"You"

The female voice was anxious, and she felt as if an evil beast formed by killing intent was staring at her with a pair of bloodshot eyes, and the evil beast stretched out its icy, piercing tongue and licked across her exposed skin. It was icy cold and stinging.

Clang!

The Chopping Dragon Flash stopped in front of a delicate neck, and goosebumps appeared on that white skin due to the sharpness of the blade.

A naked|fruit girl with fair skin and an alluring figure appeared, this girl had pointed ears, one hand blocking her chest and the other covering her private parts.

"You...you must be doing this on purpose, I'm going to complain to Lord Carlos, with an aura this strong, there's no way you're a new recruit, how could you not know about our Dark Elf Clan."

The Red|Fruit girl's pointed ears flushed red, her chest rose and fell violently, obviously infuriated.

"Dark Elves?"

Su Xiao sized up the other party, from the size, appearance, and already the pointed ears, this was indeed an elf, but why would an elf appear behind the enemy army with her bare | fruit body, this was too ridiculous.

"Stealth ability... can't wear clothes."

From the appearance of the other party who was so shy that he couldn't wait to find a crack in the ground to turn in, Su Xiao was able to judge that the other party didn't have a ubiquitous | reveal | fetish, coupled with the other party's stealth ability, Su Xiao, who often fought with all types of enemies, deduced the other party's approximate ability.

Mastery of Stealth + Breath Concealment ability, can't wear clothes when stealthy, otherwise it will be exposed or have a big break.

Being strong in force is only one aspect of being powerful, analyzing intelligence about the enemy is also an essential part of combat.

"Enough watching."

The elf girl's teeth itched fiercely, if Su Xiao's aura hadn't already reached the level of frightening, she wouldn't have shown up in this state.

"No offense, having joined the army less than a week ago, I don't know much about Dark Elves."

Su Xiao's aura retracted, and that Dark Elf sighed in relief and went into stealth.

"I'll tell on you, for sure, our princess and Lord Carlos are a couple, huh~"

The elf girl had obviously never received this kind of aggravation.

"Feel free."

Su Xiao didn't care if the other party sued, he had contacted Carlos, the other party wouldn't purposely come to him because of this kind of crap, as for silencing him, that would be the dumbest choice, besides, this kind of person who shouted about suing, the possibility of actually going to sue was unlikely, if he really wanted to go to Carlos to report Su Xiao, he would surely turn around and walk away without saying one more word to Su Xiao.

Su Xiao returned to the thrower, before the elf girl said that there was a thread underneath the thrower, after checking it out, there really was one, only that the thread was hidden in a groove, it was easy to be ignored.

Knowing clearly how to throw, Su Xiao no longer hesitated and directly pulled the thread.

"Wait!"

The elf girl anxiously shouted out, but unfortunately, it was already too late.

Bounce!

The throwing rod probed out, and those thirty green phosphorus fire incendiary bottles were thrown out, launching successfully.

The green phosphorus fire burning bottles were indeed thrown, however, the stabilizers at the four corners of the thrower were previously removed by Su Xiao, and after completing the throw, the entire thrower came upside down towards Su Xiao!

Su Xiao swore to the heavens that he would stay away from some unfamiliar enemy war instruments in the future.

Boom!

Dirt flew horizontally and smoke rose in all directions.

The stealthy elf girl's small mouth was slightly open, it was the first time she had seen someone 'smashed to death' by a thrower.

"Cough cough cough ..."

Su Xiao came out from within the smoke and dust and patted the dust on his head, although he did not see the Green Phosphorus Flame fall into the enemy army, the large amount of battle credits gained indicated that the Green Phosphorus Flame fell into the dense crowd of the tribal army.

"You didn't die~"

The elf girl opened her mouth, and although her tone was somewhat gloating, she was obviously relieved.

"Not really." ...

Su Xiao shook the dirt from his clothes, with the speed of his nerve reflexes, being killed by a thrower was simply ridiculous.

"Where are you going, this is the tribal army's big backyard, by the way, how did you get here, you're not a spy, are you."

The elf girl took a step back.

"Hitchhiked here."

"Huh?"

The elf girl's brain circuits were a little short on ideas about how a chariot could break through a horde army.

The successive breathless encounters made Su Xiao want to kill people, and as it happened, he was going to kill the enemy in a while.

"Where are you going?"

"..."

"Hey, why don't you say something."

"..."

"I don't know if we can win either."

"..."

Su Xiao walked forward in silence, he realized that this elf girl he met by chance was a chatterbox.

"So petty, at most I'm not going to sue, why you are ignoring people."

The elf girl in the invisible state made a ghostly face at Su Xiao.

"I can sense you, that is to say, you are now almost equal to walking behind me naked|body, I'm going to kill my way back to the Black Earth Fortress, and so if you want to follow, it's up to you."

Su Xiao's words caused the elf girl to freeze, and those pointed ears quickly flushed red, if burning like fire.

"Shameless!"

The elf girl turned and fled into the forest, Su Xiao lit a cigarette, he had to calm down and calm down, a stunningly beautiful bare | fruit elf girl behind him swaying half a day, He is a normal man, no desire that is nonsense.

However, now in the battlefield, excess distraction will make him buried here.

Su Xiao walked out of the forest, and tribal armies with their backs to him appeared a hundred meters away. These tribal armies were walking slowly, they looked relaxed, these were soldiers from the large rear of the tribal army, and it was unlikely that they would be involved in the war.

Su Xiao put away the Dragon Slashing Flash and the Slaughtering Short Knife appeared in his hand, he eased his steps and came behind an orc soldier.

The short knife wiped across the orc soldier's throat, slaughtering this short knife was used for throat cutting.

Equipment Effect: Throat Breaker (Passive), when slitting any creature's throat, it will deal an additional damage value.

Tip: The extra damage value is 50% to 0% of the base damage, the extra damage ignores body defense and resistance.

Equipment Effect 2: Sobbing Blood (Passive), if you successfully slit the throat and trigger the equipment effect, it will judge the enemy's physical strength attribute, if the enemy fails to pass the judgement, you can trigger the Sobbing Blood effect, the enemy will lose a lot of blood, the bloodshed damage per second is 4% of the enemy's maximum life value, and the bloodshed effect lasts for 0 seconds, and this damage has priority.

Tip: If the enemy's life value is below 30%, the duration of the bleeding effect is -50% (5 seconds), and the bleeding effect is doubled (8% of maximum life value per second).

Equip Effect 3: Moon Glow (Passive), Sharpness +4, Armor Break +0, Penetration +9.

...

The three passive effects triggered at the same time, the orc soldier was instantly killed in seconds, and didn't even shout, the only sound that appeared was the sound of the blade cutting through the flesh.

This slight sound, let a nearby dwarf a little puzzled, just at this moment, he felt a cold neck, eyes quickly into darkness.

The sound could be ignored, but the blood that spewed out would quickly expose Su Xiao, he was just trying to conserve his strength to kill as much as he could, and it was only a matter of time before he was discovered.

Chapter 795: Kill a bloody road

Two orcs had their throats slit by Su Xiao, and at the same time, those nearby tribal soldiers smelled the pungent odor of blood, and they were immediately alerted.

Su Xiao rushed into the tribal army, his figure shuttled from one tribal soldier to another, his target of attack was only the throat, and his knife killed him.

When Su Xiao put down twelve enemies, the surrounding tribal army completely discovered him.

"Enemy attack!!!"

The surrounding tribal soldiers were a bit incredulous, if Su Xiao was a Dark Elf race, they wouldn't be surprised, but Su Xiao was a human anyways.

Su Xiao put away the Slaughtering Short Knife, the Dragon Slashing Flash appeared in his hand, and the Counterattack Shield opened.

Ring Break.

Clang.

The ring blade spread, the tribal army around Su Xiao froze in place, a line of blood appeared between their chests and stomachs, as for the dwarves, they were directly chopped down to the sky.

Su Xiao did not even look at the soldiers who froze in place, and charged straight ahead, he needed to kill his way back to the Black Earth Fortress before he was noticed by the enemy's high command.

Ring breaking the clearing, Su Xiao rushed into the tribal army more than ten meters away, on his way to charge, the top half of those dumbfounded tribal army's body fell to the ground, wailing in pain, waiting for them to die.

Su Xiao eyed ahead, the attacks from the left, right and back were all ignored, all defended by the counterattack shield.

The long knife flew, because of the enemy's obstruction, Su Xiao's forward speed slowed down significantly, he needed to kill the enemy in front of him before being able to rush through.

"Kill him!"

"Enemy troops have appeared in the rear!"

A roar came, Su Xiao ignored these roars, at this time, he no longer had to think about the exhaustion of his physical strength, killing his way back to the Black Earth Fortress was the key.

With a slash to kill the enemy army in front of him, the long blade that chopped down didn't stop, and it turned on the Blue Steel Shadow ability.

Poof.

A Dwarf wearing heavy armor was decapitated, and Su Xiao dashed past the corpses of the Orcs and Dwarves as a new enemy appeared in front of him.

At this moment, Su Xiao was about eight hundred meters away from the Black Earth Fortress, which gave him a new perception of the power of the giant race.

Eight hundred meters was not a long distance for Su Xiao, but that was if there were no enemies blocking the way, what if the eight hundred meters were full of enemies? The answer was that it was difficult to break through.

Blood splattered, broken limbs flew, no tribal soldier could resist Su Xiao's slashes, he used more than 80% of his strength for each slash, as a price, his physical strength was consumed faster.

Intense attacks came from all sides, the counterattack shield was cut with clanking sounds, its durability was rapidly decreasing.

What was killing a bloody path? Su Xiao was now killing a bloody path, if he couldn't kill this bloody path, he would most likely die in the horde army and be swallowed up by the raging tide of people, as for fleeing towards the horde alliance's territory, that would indeed save his life, but this

world's gains basically ended here, and the [Sacred Oak Branches and Truncheons] wouldn't be the same to think about either.

On his way to charge, Su Xiao's side came a snap and crunch, the counterattack shield shattered.

A wide-bladed greatsword chopped at Su Xiao's face, he didn't dodge, instead he used Chopper Flash to meet the enemy's blade.

With a clanging sound, the broad-bladed sword was chopped off, and the enemy's head was also chopped off, and the sharpness of the Dragon Slash once again showed its crucial role.

Just after killing an enemy, Su Xiao started to urge the counterattack shield to appear, however, it was not what he had hoped for, because the counterattack shield had just shattered, the internal Cyan Steel Shadow energy was gradually devouring away beside Su Xiao, a new counterattack shield would take 0.2~0.8 seconds to be formed, which was considered a weak point of the counterattack shield.

Of course, if there is no gradually consuming Shadow of Blue Steel energy around, opening the counterattack shield is just an instant.

The new Counter Shield gradually formed, but the attacks of the surrounding enemies had already arrived.

Su Xiao lowered his head to dodge a long sword, his short black hair was blown up by the strong wind, the Chopping Dragon Flash in his hand chopped at the various weapons from the right side, with a clinking and crunching sound, a few weapons were cut off by the Chopping Dragon Flash...

Pfft, blood splattered.

Su Xiao's back was cold and numb, this feeling was more than familiar, he was chopped by a sharp weapon, there were four wounds, one on the right shoulder blade, one in the center of the back, and two on the left rear waist, under the raging tide of people, Su Xiao, who was rushing forward, was injured.

A new counter shield appeared, and all the incoming weapons were blocked.

The instant the counterattack shield appeared, Su Xiao's footsteps accelerated, and the counterattack shield in front of the chopping trajectory immediately spread out to the surroundings at the same time he struck his sword.

The numbness of the back wound disappeared, turning into a drilling sharp pain.

Su Xiao ignored the wound on his back, he was already used to it, and the life value recovered from killing enemies could make the wound heal faster.

"Again!"

Su Xiao shouted, a few nearby tribal soldiers actually showed fear, they were shocked by this aura of Su Xiao.

Kill, keep killing forward, only by killing through the tribal army, he could live.

Amazing scene appeared on the battlefield, a person, a knife, killing into the thousands of troops no one can stop, this person is not here to take the enemy's head, he is to kill through the tribal army, so as to gain a chance to live.

In the forest behind the tribal army, the elf girl in stealthy state stared blankly at Su Xiao who was fighting in the tide of people.

"Still think ... he was joking when he said he would kill his way back to the Black Earth Fortress, really did it, and, so strong!"

The elf girl began to be curious, she was curious if Su Xiao could kill his way up to the Black Earth Fortress.

...

Crowd.

Su Xiao's chest rose and fell, his breath began to catch, his right arm was sore, half an hour had passed since he killed the tribal army.

During this half hour, he had been chopping down the enemies with all his might and charging forward afterward.

Su Xiao looked up, the towering Black Earth Fortress in front of him was getting closer and closer, was at most not more than 200 meters away from him, fortunately, he didn't meet any enemy leaders along the way to kill over.

The entire battlefield hundreds of thousands of soldiers, horizontal span of about one kilometer, vertical is not good to calculate, with the deaths and injuries of both sides of the soldiers, the vertical width of the battlefield is shortening, this scale of the battlefield, the chances of encountering the enemy leader is not great.

"It should be...no problem."

The wound on Su Xiao's back was on fire, this last two hundred meters, no surprises, he could kill his way through.

A bloody footprints appeared under Su Xiao's feet, he killed more than 00 meters in the enemy army is not without a price, during this period, he received a total of thirteen times of chopping from sharp weapons, three times of blunt hammering, and there are also two rows of teeth marks at the calf, this Su Xiao will be an orc chest chopped after the counterattacking shield was shattered, and that orc bites before he died.

Su Xiao's face was a little white, this was normal after a large amount of blood loss.

Under normal circumstances, after killing the enemy in the battlefield for half an hour, Su Xiao would not be so heavily injured, nor would he consume so much physical strength, he was charging within the tribal army, charging and at the same time having to kill a bloody road, which made his chances of being injured increase drastically.

Su Xiao didn't have time to deal with the wounds on his body, and more wounds don't really hurt much, the trouble was the continuous blood loss.

After charging forward again for ten minutes, Su Xiao saw that the imperial soldiers who were fighting with the tribal army appeared in front of him, there were still fifty meters left, charging through these fifty meters, he ascended to the top of the Black Earth Fortress.

The smell of blood rushed into his nostrils, his ears were filled with the hissing sounds of the Imperial Army and the Horde Army, not far away there was also a bottle of 'Green Phosphorus

Flame Flasks' that fell into the Imperial Army, Su Xiao shook his head, the large amount of blood loss made his concentration start to be unfocused.

"Rally."

A roar came from nearby, Su Xiao took the time to look over after decapitating a few orcs beside him.

Earth-colored patterned armor, holding a war hammer and riding a boar, it was a Dwarf Great Earth Cavalryman.

Chapter 796: unstoppable

It was nothing if there was only one Dwarf Great Earth Cavalry, but unfortunately, dozens of Dwarf Great Earth Cavalry appeared in front of them, Su Xiao recognized the other party, and the other party seemed to recognize Su Xiao as well.

Enemies were not the same, if it wasn't for these guys, Su Xiao wouldn't be flying around behind the two legions.

The dozens of Dwarf Great Earth Cavalrymen stared viciously at Su Xiao, he did recognize Su Xiao, if it wasn't for Su Xiao blocking the momentum of their charge earlier, the Great Earth Cavalry Regiment would have been able to charge through the Black Earth Fortress and directly charge the Imperial Army down the opposite magma slope.

"T-charge formation."

Dozens of Dwarf Great Earth Cavalry quickly assembled, they formed a small T Charge Formation, it was a good thing that the kind of earth-colored light that could connect the forces did not appear.

After the earth cavalry formed a charging formation, those tribal armies near Su Xiao began to retreat backwards, away from Su Xiao.

The situation now was simple, kill over, live, be blocked, die.

Life and death were only on the line, the reddish blood dripped from Su Xiao's chin.

"This feeling, not bad."

Su Xiao spat out a mouthful of blood-tinged saliva, his battle intent was majestic as he sheathed the Zhan Long Flash, holding the hilt of the blade in his right hand and the sheath in his left hand as he held the Zhan Long Flash across his face.

300 mana points were converted into Qing Gang Shadow energy wrapped around the Chopping Dragon Flash in the state of continuous warping, the Chopping Dragon Flash turned gorgeous and abnormal, the surface seemed to be wrapped in a layer of thunder and lightning.

The long knife slowly came out of its sheath, snow bright blade light appeared at the first sight in the battlefield, blue light surged out, this blue light had an extremely strong cutting power, Su Xiao's breath began to get sharper and sharper.

Dozens of fine chopping marks appeared on the ground nearby, at the same time, the counterattack shield beside Su Xiao disappeared, the appearance of dozens of brand new counterattack shields. This time, the counterattack shields were not hexagonal, and their shapes were a bit messy, and if

these counterattack shields were combined they would be found to be actually a full body armor, an armor made up of energy shields.

The differently shaped counterattack shields flew towards Su Xiao, dozens of counterattack shields were pieced together on Su Xiao's body to form a full body armor, even his head was also protected, Su Xiao was wrapped in a layer of energy armor, the move he was going to use after that was too fast, he had to make sure that he was safe from crashing into the enemy's weapon first.

The muscles of Su Xiao's legs slightly bulged, his body was bent low, the gazes of those dozens of Dwarf Great Earth Cavalrymen stared up, they sensed that Su Xiao was not to be messed with.

The dozens of Dwarf Great Earth Cavalry had already set up a charging formation, he moved neatly while slapping the boar underneath him.

"Oh la la la la ..."

Dozens of Dwarf Great Earth Cavalry rushed headlong towards Su Xiao, although it was not as strong as the momentum of a thousand Dwarf Great Earth Cavalry charging, it was also extremely amazing, it seemed that they were going to break everything in front of them, going forward without any hesitation, and dust filled up in the back.

Facing dozens of fast charging Dwarf Great Earth Cavalry, Su Xiao had to kill them as soon as possible, if he was entangled by these guys, his hope of breaking out would be very small, knowing that there were still thousands of tribal soldiers around him.

The Black Earth Fortress was right in front of him, Su Xiao took a deep breath, his lowly bent body tensed.

"Break the sky."

With a whoosh sound, dirt splattered where Su Xiao was, like a bomb bursting at his feet.

Clang!

A straight blue chopping awn flashed across the battlefield, and this chopping awn swept past dozens of Dwarf Great Earth Cavalry in a straight line.

Crisscrossing chopping blows exploded in the area where the blue chopping awn flashed through, and wherever the 'broken air' passed through, a Dwarf Great Earth Cavalryman was chopped to pieces.

In just an instant, dozens of Dwarf Great Earth Cavalry were left with four survivors, and a large number of broken limbs appeared on the ground.

On the rocky slope of the Black Earth Fortress, Su Xiao staggered two steps, the burden of "Breaking Air" on his body was not small, he had used this move against the Hero King.

'Break the Sky' was a move Su Xiao had developed alone, the chopping power exceeded Ring Break, and the move had an advantage, it could be used against either a single or a crowd.

If one used 'Break the Sky' to decapitate an enemy, the decapitation power would be weaker, but at the moment of decapitating the enemy, the Cyan Steel Shadow energy and the blade's aura would invade the enemy's body at the same time, and after a few seconds, it would form a Shadow Spike in the enemy's body, heavily damaging or killing the enemy from the inside.

As for dealing with a group of enemies with 'Breaking Sky', it was necessary to fully release the chopping power of 'Breaking Sky', which was much more efficient, and the previous chopping that exploded in the place where 'Breaking Sky' had passed through, was the The effect of fully releasing the chopping power of 'Skybreaker'.

Su Xiao finally killed the Black Earth Fortress, he miraculously killed from the back of the tribal army to the front of the battle line, as a price, he was eager to lie down on the ground and take a nap right away.

However, things weren't over yet, Su Xiao still had to kill his way past the top of the Black Earth Fortress to reach the opposite Magma Slope, and once he got there he could rest for a moment, he was just too tired.

Dragging his tired body, Su Xiao swung his sword to kill a few nearby tribal soldiers, after killing a bloody path along the way, he arrived at the top of the Black Earth Fortress.

"Kill!"

"Help~"

"My legs, where are my legs?"

The shouts of murder and the wails of the wounded were connected, Su Xiao kicked a dwarf's neck to break his neck, and the Imperial Army had appeared not far in front of him.

An Imperial Army rushed near Su Xiao and swung his sword at the Dwarf Su Xiao kicked down.

Poof. Plop ...

Blood and broken flesh flew across the room, and that Imperial Soldier clenched his teeth and splattered his face with spots of blood, and he did not stop until he had chopped up that Dwarf.

"This dwarf is much more honest. "

The imperial soldier kicked at the dwarf's corpse, in fact, the dwarf had already had his neck broken by Su Xiao's kick, the soldier was letting out his anger, a few minutes ago, his comrade in the same squad had died at the hands of the dwarf.

This scene appeared from time to time on the battlefield, war erupted due to hatred, after the war erupted, greater hatred appeared, and this vicious cycle, eventually both sides became mortal enemies.

Empire and the tribe is a mortal enemy, the two sides have been at war for too long, there is no possibility of reconciliation, even if the two sides of the royal family want to reconcile are not possible, but there are a lot of radicals under their rule.

Once reconciled, the empire and the tribe will appear in the resistance. The resistance will use all means to overthrow the current royal family, and replace them to continue the war, the purpose is very simple, revenge.

In fact, the war to the present, both sides of the royal family want to stop the war, such as the Dragon Empire will shrink the territory a little, at least let the tribal alliance of civilians no longer starve, compared to the resources consumed by the war, let out some not too rich territory is really nothing.

However, both sides are riding a tiger, they have been at war for too long and too long, what's even more scary is that both sides are a bit used to war, the tribal alliance will even use the war to cut down the population to avoid large-scale famine in the territory.

Su Xiao didn't care about the complicated relationship between the Empire and the Horde, all he wanted to know now was how long this scorching war was going to last.

Right now, Su Xiao was behind the friendly army, which made his heart a lot more solid, at least there was a way back.

The Giant Race that was still killing enemies on the fortress before had already retreated to the rear, they were an important battle force of the Imperial side, specialized in dealing with the elite troops of the Horde side.

Although the giants were fierce, they were afraid of the 'Green Phosphorus Fire Burning Bottle', and the small number of giants could not be that the giants' fertility was not good, but that some kind of custom led to this reason, that kind of custom that the imperial royal family had tried to abolish many times, and the result was that it was close to letting the giants revolt, and in the end, it was just not done.

Giants have a lifespan of 600 to 700 years, and a 50-year-old giant is considered to be in his youth, when male giants will consider the issue of reproduction.

However, the female giants have a very high vision, they only like a strong spouse, in this way, the giants of the matchmaking has become a duel, the winners of the marriage of the rich and beautiful, the losers can only play the bachelor to jerk themselves, and is a lifelong can not take a wife, because they are the losers, this is the custom of the giants, only the winners of the right to procreate, the survival of the fittest, strong individuals will have the opportunity to continue to reproduce, so as to ensure that the giant race The power of the giant race.

Chapter 797: Scary IQ

After Su Xiao swung his sword to kill a few charging orcs, he began to retreat towards the crowd of imperial troops behind him, the war had been going on for some time, the entire battlefield's battle line was drawn out, the rear was no longer that crowded.

After two hours of grueling killing, Su Xiao had already begun to get fatigued, during these two hours, he first killed the enemy in the front line, after which he was knocked out by the Dwarf Great Earth Cavalry, and then unintentionally flung into the back of the Horde Army by a Giant Elder Brother, and ultimately killed his way back from the back of the Horde Army to the top of the Black Earth Fortress.

Only two hours of intense fighting had left him more fatigued than the day and night of killing enemies in the previous battle.

This can't go on, Su Xiao looked around, no matter the morale of the imperial army, or the number of enemies killed exceeded the tribal army, the battle situation began to tilt towards the imperial side.

Realizing this situation, Su Xiao was ready to retreat to the imperial army to rest for a moment.

Resolving a few of the pouncing enemies, Su Xiao drew back, even if he couldn't sleep, letting him have a drink of water and rest for a few moments would be fine.

Just as Su Xiao was about to retreat to the crowd of the Imperial Army, a feeling of crisis appeared.

Su Xiao scanned his surroundings and didn't find any enemies that were too strong, but the sense of crisis not only didn't diminish, but instead it grew stronger and stronger, it was like he was locked by something.

"Sniper?"

Su Xiao perceived carefully and quickly denied the possibility of being targeted by a sniper, since the enemy did not appear, he continued to retreat.

Finally, two hours after the start of the war, Su Xiao realized that there was an opening to catch his breath, and he stood among the friendlies, took out a bottle of water, and drank it down in a big gulp.

After drinking some water, Su Xiao's entire body was a bit more energized, and he immediately began to treat the wounds on his body.

...

Inside the tribal army, a bald and strong man was holding a translucent tablet computer in his hand, which looked like a high-tech product.

The bald and strong man was wearing a leather jacket, and there were many high-tech products hanging on the belt around his waist, two energy guns, three plasma grenades, and already many unheard of high-tech products.

"Xi, I've arrived at the Black Earth War Zone, unexpected."

The bald burly man was video calling with the tablet in his hand, on the other side of the call was Queen Hee, and the leader of the Apocalypse Paradise side, Hee was standing in front of a pile of corpses, which was frozen by a layer of transparent crystals.

"You went to the Black Earth Warzone? Go there ..."

Xi was initially a bit puzzled, but then she thought of something and looked a bit displeased, there were a few transparent crystals floating beside her, and due to the change in her mood, those floating crystals turned red.

"Liuli's matter just like that forget it? She is your own sister, that little girl surgery when crying into what kind, you forget?"

The bald, burly man smiled, seemingly undaunted by Xi.

"Lan Jue, are you disobeying my orders, don't forget that this world is not your home turf. "

In front of the pile of corpses, Xi's silver hair was windless, and the few crystals floating beside her turned ice blue.

"Hoshi, don't talk to me in the same tone as you would to your subordinates, I was only drafted to your team for 'inexplicable' reasons, by all accounts I don't need to follow your orders, helping that little girl to come and kill people is only because she keeps begging me, I'm a soft heart. "

The bald, burly man, also known as Lan Jue's attitude began to harden.

Hoshi gazed at Lan Jue through one of the crystals in front of her, and after a few seconds, the crystal beside her returned to colorless.

"Lurie." ...

Hoshi looked sideways to her side as a breeze blew through her, a strand of silver hair sliding from her ear to her cheek.

"Come here."

As soon as Hoshi's words left her mouth, a young loli with the same hair color as hers walked up to her, her steps trembling.

"Sis ..."

Ruri had just opened her mouth when she realized something was wrong with Hoshi's gaze.

"My beautiful, generous, pure, and powerful sister-sama Queen Hoshi, what do you want to see me about."

Although little Lurie had gotten close to Xi, she was in a state of readiness to run, her lower half of her body that had been shattered by Su Xiao had already recovered.

"What favor did you give Lord Lan."

Hoshi didn't avoid Lan Jue who was keeping a long distance video call with her.

"Didn't...didn't give anything."

"..."

Hoshi looked at Ruri silently, and three seconds later, Ruri gulped, and ten seconds later, beads of sweat oozed from Ruri's cheeks.

"Just...just gave him the red crystal."

Ruri lowered her head.

"You're growing up and getting your wings. "

Hoshi's demeanor changed little; if it hadn't been her sister who did this, the other would already be a corpse.

"I ..."

Ruri was just about to speak when Hoshi waved her hand.

"What's done is done, don't regret it or I'm not your sister."

"Uh-huh."

Liuli nodded firmly, "I'm not willing to do it, although I'm no match for that man, I have leverage."

Hearing this firm tone from Lurie, the corner of Xi's mouth curled up slightly and turned to look at Lan Jue.

"You have to do something after receiving favors, find him, kill him, bring his head back, and this matter will be cleared."

"Of course."

Lan Jue knew clearly what the matter of two clearances in Xi's mouth was, this matter was not Liuli taking the initiative to find him, but he took the initiative to find Liuli.

"I have discovered the target's whereabouts, and will soon resolve it, as for bringing back the target's head, there is difficulty, if we fight at full strength, it's either he dies or I die."

Lan Jue hung up the video call, he touched his bald head.

"What a difficult woman, maybe she has guessed something, this kind of intelligence is simply monster, or that little girl is good to fool."

Lan Jue pushed the orc beside him away and walked in the direction of the Black Earth Fortress.

...

The Great Canyon of the Shire, in a mountain range.

Here a small estimated conflict has just occurred, that is, the Imperial Army also the Horde Army daily war, the battle has ended.

The Imperial soldiers didn't seem to have many deaths or injuries, except that they looked a bit dumbfounded as they stared blankly at the mass of corpses on the hillside that had been frozen with crystals, all done by one man.

Next to the crystal corpse piles were dozens of Apocalypse Paradise's indentured servants, some of them were chatting idly, others were maintaining their weapons.

"That's how things are~"

In the crowd, Liuli looked like a schoolboy who had done something wrong with his head lowered, it looked like he knew he was wrong, in fact, there was not the slightest bit of remorse in those big eyes, using a paragraph to describe Liuli could not be more apt, admitting her mistake with an excellent attitude, she just wouldn't change.

"You did well."

Xi went against the norm and actually complimented Liuli.

"Huh?"

Ruri's scalp was like an electric shock, her sister's attitude was wrong, super wrong!

"What kind of person do you think, Lord Lan is."

Hoshi's question left Ruri in her daze a little confused.

"What kind of person? Eh~ Cunning? Money-hungry? A loner?"

Ruri cocked her head, she could never guess what Hoshi was thinking.

"He's a very 'unusual' person, from the time he entered the War World until now, he's been focusing on one thing, the destination of the World's Core."

"That's not normal?"

Liuli was a bit puzzled, she also wanted to get the World's Core, if she couldn't get it, all of them would be punished.

"Of course it's not normal, he even went so far as to follow my orders in order to get the whereabouts of the World's Core out of me, but now he's suddenly rushing to the Black Earth Warzone just for a red crystal, not only that, I just tried to get him to leave the Black Earth Warzone, and I was surprised by his attitude, it was the kind of attitude that would do something even if he didn't want to turn his back on me."

Xi's eyes looked towards the distant mountains, as if he was thinking about something.

"Sis, do you think about this every day, it's going to kill a lot of brain cells."

Although Ruri wasn't stupid, compared to Hoshi, she was simply a silly white sweet munchkin.

"The person who hurt you before, was a loner, right?"

Hoshi ignored Ruri's previous words as she seemed to think of something.

"It seems to be, anyway, I didn't see that he has teammates, and his fighting style is inclined to solo, excellent defense, intelligence and agility attributes are also very high, he has strong long distance attack means, ignores mind control, the most frightening thing is his melee ability, if he is chopped by him, no, I might even be slashed in a second, that guy can fight and resist, both near and far, immune to control, simply monster."

Mentioning Su Xiao, Liuli obviously had some palpitations.

Xi fell into deep thought again, and after a long time, he murmured under his breath.

"Is it a coincidence, before I just guessed that Lan Jue is different from us, no, I should say that he is different from all the soloists, there are often rumors in the paradise that he is feuding with certain indentured servants for no reason, and every single one of those indentured servants that are feuding with him is abnormal, he seems to be actively seeking out these abnormal indentured servants and killing them, soloists, full range of abilities, and frequently fighting with abnormally capable of the indentured servants is hostile."

Hoshi's eyes were bright, and Ruri on the side had absolutely no idea what Hoshi was talking about.

"There are some taboos that must not be touched, I seem to have reached a certain dangerous edge, Lan Jue's specialness is not to be mentioned for the time being, the best choice is not to go deeper into it, however, what could have caused him to give up the information about the World's Core so that he could go and find a certain contractee of the Reincarnation Paradise."

As Hoshi continued to think, Ruri on the side snorted, as if she was listening to heavenly books.

"This question can also be postponed, the current situation is a win-win situation for both of us no matter what, whether Ranjue loses or that man from the enemy side loses, it's all good for us, neither side is a savior, Ruri, you go and do one thing."

Xi looked to Ruri, who was already in a state of delirium had a bad feeling.

"Sis, I'm your own sister, don't pit me, I'm afraid~"

Ruri looked at Xi pitifully.

"Don't worry, there's no danger, just letting you do what you do best."

"Really, is it to do that?"

Ruri inquired tentatively.

"Yeah."

"Great."

Lurie's dishevelment was swept away, and a badass grin appeared on her face.

Chapter 798: lie in wait for

On the magma slope behind the Black Earth Fortress.

Su Xiao mixed among the imperial soldiers, that sense of crisis from before had disappeared, he chewed compressed cookies in his mouth and drank water from time to time to avoid choking.

He couldn't care whether the food was delicious or not during the war, being able to fill his stomach quickly was the key.

Resting in the crowd for a few moments, Su Xiao's sense of loss of energy receded, he had consumed a large amount of physical strength in a short period of time, fortunately, he did not overdraw his physical strength, so his physical strength recovered very quickly, after all, the physical attribute was placed there.

The wounds on his body have been roughly handled, too deep wounds stitched up, shallow ones are not handled for the time being, and a special medical bandage is hastily wrapped up.

After wrapping the special bandage, the wound comes with a cool feeling, this is the analgesic effect of the bandage.

Emperor ** situation is very good, at this time the emperor ** has rushed through the top of the black earth fortress, the tribal army will be forced back to the fortress under the rocky slopes, if you can maintain the current advantage, the emperor ** will not take long to beat back the tribal army.

Taking advantage of the lull in recovering his strength, Su Xiao checked the existing battle achievements.

Existing battle merit: 9243 points.

Seeing this amount of battle merit, Su Xiao was not surprised, roughly counting, he had killed at least 3,000 enemies in this battle, even though he had only fought for two hours, he had after all killed and wounded his way up to the Black Earth Fortress from the back of the Horde Army, cutting down many people along the way.

If it was just more than 3,000 ordinary soldiers, of course there would not be this amount of battle merit, Su Xiao had previously sniped more than 50 Dwarf machine crossbowmen, each sniped Dwarf crossbowman was 60 battle merit points, moreover, when he had previously charged within the Horde army, he had also killed some other special types of soldiers, together with the 1,436 battle merit points that he had previously saved, it was not surprising that he now had 9,243 battle merit points.

Redeeming Sacred Oak Tree Trunks required 9000 battle merit points, Su Xiao's battle merit was already enough for redemption, but unfortunately, nowadays, it was the time of war, leaving the battlefield would be judged as desertion, and the battle merit would be cleared immediately.

Su Xiao's physical strength recovered some, he was ready to continue to the battlefield to get some battle merit, knowing that there were other good things in the battle merit store besides the Sacred Oak Tree Trunk.

Passing through the friendly soldiers, Su Xiao topped the top of the Black Earth Fortress.

The tribal army had already been beaten back to the rocky slope on the other side, and the emperor** was somewhat condescending, which made the tribal army's defeat speed up.

Su Xiao walked quickly across the Black Earth Fortress to the rocky slope, and the tribal army appeared in front of him.

"Compatriots, we can't retreat, behind us is our home."

A minotaur roared, it was true, if the tribal army was repulsed, it would not be as simple as losing the Black Earth Fortress, the empire** would likely drive in and rush into the tribal party's territory for a counter-invasion.

Although the Dragon Empire could not see the barren land of the tribal alliance, it was interested in destroying the cities or villages of the tribal alliance, war should be a back and forth battle, being passive and subjected to invasion all the time would demoralize their side.

The roaring minotaur was exceptionally brave, the minotaur is the strongest branch of the orc race, and its individual strength far exceeds that of other orcs.

Su Xiao stared at the minotaur, he used the cover of the nearby soldiers of his own party and approached the other party silently.

"Imperial scum!"

The minotaur grabbed an imperial soldier with one hand and used the two imperial soldiers in his hand as weapons, slamming them against the other imperial soldiers nearby.

The imperial soldiers formed a circle, they all knew clearly that the minotaur was not easy to deal with, they must not give this guy a chance to charge, otherwise that pair of bull horns would pierce through who knows how many of their own people.

The minotaur was exceptionally brave on the battlefield, he used the two deformed corpses in his hands to smash three imperial soldiers to death.

"Hoo, hoo."

This raw bull's head was panting heavily, he had been fighting for two hours and at least dozens of imperial soldiers had died in his hands.

Just as the minotaur was panting, he suddenly felt a coolness appear behind him and immediately turned his head to look.

Clang!

The minotaur only felt a flash of light in front of his eyes, after which he returned to normal, and an imperial soldier holding a longsword glanced at him before turning to walk away.

"Huh?"

The Minotaur was surprised to find that the Imperial soldiers who had surrounded him dispersed and no one seemed to care about him anymore.

"Is this being scared off by me?"

Just as the Minotaur wondered, he heard the sound of dripping water.

Tick-tock, tick-tock.

Red liquid dripped out of the Minotaur's chest, and he subconsciously looked down, and this movement of his head down caused a large portion of his upper body to fall towards the ground.

After a moment of heavenly rotation, the minotaur's upper body landed on the ground, and he saw a somewhat familiar body standing beside him, that body was chopped off from its chest position, and it stood for a moment before collapsing.

"So I'm going to die."

The sharp pain after being chest chopped hit him, the enemy's blade was too fast, so fast that he didn't notice being chest chopped before.

The minotaur lay on the ground waiting to die, an imperial soldier ran past his eyes, he didn't care, the face of a loved one floated in his mind.

Suddenly, the dying minotaur thought of one thing, whether his loved ones would suffer what he was suffering now.

Thinking of this, the minotaur used his hands to support his body to climb forward, climbed out half a meter, he lunged forward, a bite of an imperial soldier's leg, dead bite, even if the enemy with a sharp knife chopping will not let go of the mouth.

War is so cruel, no one will be soft because the enemy has a family.

After Su Xiao resolved that Minotaur, he approached a few orcs with his sword.

Buzz.

The sound of vibrating wings came, this sound was like having bees flying by your side in the summer.

Su Xiao looked towards the source of the sound, he actually did see a dozen bees, to be exact, a dozen mechanical bees.

These mechanical bees were the same size as ordinary bees, with thin and light wings, red light emitted from the compound eyes in the head, and the part was a peanut-sized cylindrical glass **, which was filled with orange-yellow liquid.

Seeing these bees, Su Xiao subconsciously thought of the enemy Contractor Bomb, and he immediately retreated backwards.

Buzz.

A dozen or so mechanical bees accelerated and rushed towards Su Xiao, these mechanical bees spewed out flames from their legs like a small missile.

Before these mechanical bees approached, Su Xiao didn't feel anything, as if these were just harmless ordinary bees.

Lan Jue looked at Su Xiao with a smile on his face.

"The same kind of people?"

Su Xiao sensed Lan Jue's aura, and indeed, the other party's aura was different from any contractors he had ever seen.

"Yes, the same kind of person, my side is called the Purge Envoy."

Lan Jue paused when he said this, seemingly waiting for something.

After a few moments, Lan Jue asked tentatively, "Did you just hear what I said?"

Su Xiao raised an eyebrow and eventually nodded.

"Sure enough, talking to the same kind of people is just smooth and not blocked.

The smile on Lan Jue's face was even more obvious, and he even reached out and touched his bald head, if it wasn't for the hundreds of mechanical bees hovering around him, this scene would make people think that he was here to befriend Su Xiao.

"Unfortunately, we're not helping out the same place, but then again, people like us shouldn't be treated well anywhere, we can't team up with other contractors, we can't work with others too many times, and we have to clean up that bullshit anomalies, those ghosts have a thousand different abilities, I've encountered a guy who fought with his own organs, it was disgusting as hell. "

Lan Jue chattered like a chatterbox, however it was in the past, he rarely talked this much to others, especially if both sides were hostile.

Lan Jue was the Purge Envoy of the Apocalypse Paradise, which was the equivalent of the Reincarnation Paradise's hunters and killers, responsible for cleaning up those contracted individuals who had violated taboos.

"As fate would have it, what you get you also pay for, it's fair."

Su Xiao didn't strike immediately, he hadn't seen a hunter-killer from the same camp, let alone a hunter-killer from another paradise, whether there were other hunters in the Reincarnation Paradise was not known, but the probability was that there were other hunters, just that the number was sparse, and one hunter-killer in a derivation world would be enough, and the chances of encountering other hunter-killers within the derivation world was very small.

This time, Su Xiao actually encountered a hunter-killer from the Apocalypse Paradise, and he wanted to get some useful information from the other party.

"Perhaps you're right, it's fate, although the Purge Envoy is a bad identity, the level of danger is several times or even dozens of times that of an ordinary Contractor, but the speed of getting stronger is much faster. "

Lan Jue threw out a mechanical beetle, the mechanical beetle was about the size of a sparrow, this mechanical beetle emitted red rays from its eyes.

"Oh? Four attributes developing at the same time? Not a small ambition."

Needless to say, Lan Jue was probing Su Xiao's information, and the Apostle's Eye beside Su Xiao was similarly probing the other party.

[Comparing the intelligence attributes of both sides... comparison is complete, our intelligence is 0.945 times that of the enemy, and we have obtained 29% of the enemy's information.]

The information is as follows

Name: Lan Jue

Category: Human

Life Value: 100%

Mana: 1610/1700

Power: 33

Agility: 72

Physical Strength: 67

Intelligence: 73

Charisma: 10

Scouted Skill 1: Mechanical Heart (Active Lv. 32), can transform insect-like creatures into mechanical summoning creatures.

Lv.10 Additional Ability: secondary activation.

Lv.20 additional ability: mechanical creature remote control.

Lv.30 Additional Ability: Mechanical Bio-Detonation.

Scouted Skill 2: Master Summoner (Passive Lv.30), Increases the Strength, Agility, and Stamina attributes of the summoned object by 20%, and the summoning speed is increased significantly.

Lv.10 Additional Ability: multiple summoning.

Lv.20 Additional Ability: Super Multiple Summoning.

Lv.30 Additional Ability: Summon Fusion Technique.

...

Seeing this information, it was immediately clear to Su Xiao that the enemy was not easy to deal with, the opponent was developing all three attributes at the same time, agility and physical strength to ensure survivability and a certain amount of melee ability, and the intelligence attribute to increase the number of summons, strength, and time of existence.

The opponent's profession is very special, in general terms, it is a mechanical summoner, able to transform all insect-like creatures into summons and summon them during battle, moreover, the opponent's summoning basic skill is master level, how strong is the basic ability of the master level, Su Xiao knows only too well.

Thinking about it, the other party is the hunter of the Apocalypse Paradise, with the degree of danger of the hunter with the speed of growth, it is impossible to be weak, weak hunters have long been eliminated.

Overall, Lan Jue is a survivability powerful long-range summoner, and the other party brought a high-tech items, excluding the point of summons, the other party's long-range firepower should not be weak.

Both sides will understand each other's ability before the war, Su Xiao can not probe the full information of Lan Jue, as for the other side to probe how much information is unknown.

"Melee? I was wondering, when I saw you before, my instincts kept urging me to stay away from you, this ability called Cyan Steel Shadow is simply so strong that it makes people's eyes red, it seems that the occupation you got is also very good."

Lan Jue moved his shoulders, he didn't take the opportunity to summon mechanical creatures, there was no need for that kind of thing, compared to other summoners, he summoned mechanical creatures in just a split second.

Su Xiao didn't say anything, he was considering how to approach the other party, there were too many mechanical bees near the other party, there were hundreds of them, if these mechanical bees exploded at the same time, the counterattack shield would probably not be able to carry it.

If you can't fight hard, you can only take advantage of the situation, first of all, you have to lure away the mechanical bees near the other party, or directly detonate these mechanical bees.

Just as Su Xiao was considering his battle strategy.

"If the direction of development of ordinary contractors is inclined to deal with plot characters or besiege elite creatures, then our direction of development is person to person, in the words of the game, ordinary contractors are PVE, we are PVP, fighting with you, I'm looking forward to it."

Lan Jue hadn't spoken so much to an enemy in a long time, usually when he fought others, he would just release his summons and cover with them. After that, he would pierce the enemy with a killer weapon, today, when he saw Su Xiao, who was also a hunter, he inevitably talked more.

"This is the end of the small talk, I'm not sure what's going on on your side, I've got a mandatory mission on my side, only one of us can live before this world ends."

Lan Jue stated his purpose of coming here, to split life and death with Su Xiao.

Now that Reincarnation Paradise was at war with Apocalypse Paradise, it was normal for Su Xiao, as a hunter of Reincarnation Paradise, to be targeted by the enemy paradise, after all, he was helping Reincarnation Paradise to clean up those rule-breaking contracted persons.

On the noisy battlefield, Su Xiao and Lan Jue confronted each other about twenty meters apart, surrounded by large swathes of corpses, and even further away were soldiers who were fighting together.

"Then...let's begin, enemy homunculus."

Su Xiao took a long breath, Lan Jue was strong, the bad thing was that he wasn't in a good condition having just rested for a few moments, if Su Xiao's fighting strength at his full strength was 10, it would be around 8 right now.

"Your condition shouldn't be very good, don't say I'm mean, I've waited two hours for this, it's tactical."

Lan Jue discovered Su Xiao's whereabouts at the beginning of the war, he hadn't made a move, he was waiting for Su Xiao to consume his strength, before Su Xiao disappeared for a period of time, and after he reappeared, Lan Jue chose to make a move, he was afraid that Su Xiao would hide in the imperial army and not show up again.

The battle of the hunter-killers was imminent, it was a battle between two master killers.

Chapter 800: powerful enemy

Lan Jue drew the two energy guns within the holsters on his waist, which were similar in appearance to the pistols, except that the guns were a bit longer.

There was a blue light pattern on the two energy guns, and they were not ordinary products at first glance.

Lan Jue held the two guns, and the muzzles of the guns were not aimed at Su Xiao, but at the ground between the two.

"Is that a snake in the ground? No, it's some kind of bomb, nice tactic."

Lan Jue pulled the trigger, two round energy bombs detached from the guns, the energy bombs were extremely fast and continued to expand in size, by the time they were launched a dozen meters away, the energy bombs were already the size of basketballs, turning into two plasma balls.

Bang, bang.

The two plasma balls hit the ground and exploded, the soil splashed, the ground was blown out of a round pit with a diameter of about three meters, and the blue plasma spread out on the surface.

Boom!

Another explosion came from the ground, dazzling flames surged up, from this flames, it was very much like Su Xiao's Extraordinary Alchemy Bomb.

A stone blown by the explosion flew by Su Xiao's ear, he originally wanted to use the alchemy bomb to detonate the mechanical bees near Lan Jue, now it seems that this method won't work, Lan Jue's perception is very strong.

"Won't you charge up, you're a melee fighter."

Lan Jue opened his mouth rather provocatively, the energy gun in his hand aimed at Su Xiao.

Su Xiao would not easily rush over, now was not the time to rush forward, there were at least hundreds of unknown summons lurking within the dirt under Lan Jue's feet, moreover, there were also hundreds of mechanical bees that could explode hovering near Lan Jue.

However, if he couldn't fight in close combat and used his long-range ability to blast each other, Su Xiao might not be Lan Jue's opponent, after all, the other party specialized in long-range ability.

Both sides had already started the battle, of course Lan Jue would not be polite, his finger continuously pulling the trigger.

Bang, bang, bang ...

A basketball-sized plasma ball flew towards Su Xiao, and the speed of these plasma balls was no worse than ordinary sniper bullets.

Although the speed of the plasma balls was fast, Su Xiao's speed was even faster, and when the plasma balls were still on their way, he had already jumped sideways away.

Looking at the side-leaping Su Xiao, Lan Jue not only didn't stop shooting, but instead aimed his gun at the sky and continuously pulled the trigger.

Bang, bang, bang...

A dozen of plasma balls flew into the sky, and the energy gun in Lan Jue's hand ran out of energy.

"Command-Rush. "

An invisible fluctuation spread with Lan Jue as the center, and when this fluctuation touched the mechanical bees, the red light in the mechanical bees' compound eyes became more obvious.

Buzz~

Several hundred mechanical bees flew towards Su Xiao, and their flying speed was at least several times that of before.

Large swathes of mechanical bees flew towards Su Xiao, and to make matters worse, the plasma ball that Lan Jue had fired earlier actually had a tracking function.

In front of Su Xiao were hundreds of rapidly flying mechanical bees, to his side were 14 plasma balls, and above him were 16 plasma balls flying in a parabola.

Su Xiao took out three special grade alchemy bombs and threw these three alchemy bombs into the cluster of mechanical bees, detonating them at the same time.

Boom!

The power of the three special grade alchemy bombs exploding at the same time could be imagined, a large area of fire wrapped those mechanical bees, and these mechanical bees that were originally capable of exploding were detonated.

The dense explosions were linked together like firecrackers set off during New Year's Eve, Su Xiao had just resolved the mechanical bee skirt when the plasma ball flew in from the side and the sky above.

An 80-point strength energy shield appeared beside Su Xiao, he wanted to test the power of these plasma balls.

Disconnecting the energy link with the energy shield, Su Xiao pushed his palm forward, and the energy shield panned out towards the plasma balls on his side.

Bang!

The energy shield collided with the plasma balls, and one of the plasma balls exploded, turning into a large swath of plasma that wrapped the energy shield, and the 80-point strength energy shield gradually shattered.

Not only that, those plasma floated in the air, releasing a large amount of electric current.

Su Xiao was surprised to find that the attack power of this kind of plasma ball wasn't too strong, Lan Jue hit a total of 30 plasma balls, if he used his counter shield to resist it hard, he should have no problem resisting the remaining 29.

Nonetheless, Su Xiao was not prepared to resist the plasma balls hard, the real function of the plasma balls was most likely not to attack, but to release a strong electric current to paralyze the enemy, this was a kind of ability that had strong control and could track the enemy, it was very difficult to deal with.

The good thing is that after the plasma ball breaks away from the straight line ballistic trajectory, the flight speed when tracking the enemy slows down a bit, with Su Xiao's speed, he can completely get rid of this thing.

Su Xiao rushed straight towards Lan Jue, he had a feeling that those mechanical summons underground were not active and seemed to be in the activation stage.

Lan Jue stood still, without the intention of dodging, instead, he snapped his fingers.

With a snap, while Lan Jue snapped his fingers, hundreds of mechanical fireflies appeared beside him.

These fireflies circled around Lan Jue, forming a network of light around him, and eventually several hundred fireflies were fixed in mid-air, with light connecting them to each other, forming four layers of fluorescent shields around Lan Jue.

"Command-Guard."

As soon as Lan Jue's words fell, Su Xiao had already rushed to a few meters away in front of him.

Those four fluorescent shields formed by fireflies flashed, and the fluorescent shields became thicker and more solid.

The long knife in Su Xiao's hand was raised high, the time he could attack Lan Jue was very short, those 29 plasma balls behind him came after him.

The long knife tore through the air, the green steel shadow energy of the blade was active to the extreme.

The long knife chopped on the fluorescent shield.

Zira!

Sparks splashed up high as Chopping Dragon Flash directly shattered the first layer of fluorescent shield and chopped up the second layer of fluorescent shield in the process.

Bang.

Like a flash bomb exploding, the second layer of fluorescent shield shattered, Su Xiao's vision was white, his eyeballs appeared hot, but his chopping did not stop.

Buzz!

A treble sound wave came, this was the effect triggered when the third layer of fluorescent shield shattered.

Ka-ching.

The fourth layer of shield was chopped through, and although Su Xiao could not see or hear, he was clear that the attack trajectory of the Dragon Slashing Flash was correct.

The corner of Lan Jue's mouth twitched, although he expected Su Xiao's melee combat ability to be strong, it still seemed to be beyond his expectations.

"Command-Replace."

The long blade chopped down, and there were many small creatures that were cut off by Su Xiao.

Boom!

The shockwave of the explosion came towards Su Xiao, and due to the protection of the Counter Shield, Su Xiao was only shaken back.

Su Xiao's vision gradually recovered, the buzzing in his ears disappeared, and the moment he recovered, he leapt to the side.

Whoosh~

Two dozen plasma balls flew past Su Xiao, this thing's tracking ability was exceptionally disgusting, wherever Su Xiao went, these plasma balls chased him.

With his sight restored, Su Xiao looked around, and he found that Lan Jue was already a few dozen meters away.

A piece of Lan Jue's leather jacket had been chopped off at the shoulder, and there was a very shallow blood mark on the exposed skin, and at this moment, Lan Jue's brow was trembling, obviously eroded by the Cyan Steel Shadow's ability.

The Green Steel Shadow ability was just so brutal, as long as it was injured by Su Xiao, even if it only broke a layer of skin, the Green Steel Shadow energy would take the opportunity to invade the enemy's body.

Taking a slash from Su Xiao, Lan Jue was devoured by the glaive shadow energy for 160 mana points, while receiving 240 points of real damage, and his body was still a bit stiff, this was triggering the glaive shadow's soul sensing electricity effect, and he had been paralyzed for 0.7 seconds before, the

If Lan Jue was not hit by the knife instantly and mechanical summons to swap positions, Su Xiao recovered vision and hearing, a few knives down he was likely to be controlled again, until he was hacked to death alive, if all the skills did not play out to die in battle, it is really too suffocating.

"Obviously there is only a 12% chance, is it a bit unlucky, or is the triggering mechanism of the three control effects independent after being hit?"

Lan Jue had probed Su Xiao's information before, so he had a rough understanding of Qing Gang Shadow's ability, and he probed Su Xiao's three skills, which were: the Qing Gang Shadow, the Blade Master, and the Jedi Demon Physique, so he was clear about Su Xiao's melee ability and survivability.

Hundreds of mechanical dragonflies appeared beside Lan Jue, this thing is different from ordinary summoners, ordinary summoners are summoning a few, at most a dozen or so, Lan Jue this guy is summoning hundreds and hundreds and hundreds of them, and in the underground, there are also a lot of mechanical insect summons hidden.

After summoning hundreds of mechanical dragonflies, Lan Jue lifted his leather jacket, revealing a metal arrow hanging from his belt.

This metal arrow was black in color and had a sound sensor at the end.

"Shoo~"

Lan Jue actually whistled, and as he whistled, the metal arrow broke free of the leather arrow pouch and floated on his side, its sharp tip aimed at Su Xiao.

Lan Jue's previous attack was just testing and collecting Su Xiao's moving habits and speed, which was finally transmitted to this metal arrow through the nerve conduction system.

After completing a series of tedious pre-conditions, the speed of this metal arrow was about three to five times faster than Su Xiao's moving speed.

"Swoosh~"

The whistle blew again, and that metal arrow shot towards Su Xiao with a whoosh.

Lan Jue's abilities were well rounded, his high physical strength gave him decent survivability, and his agility attribute allowed him to face melee combat without being as woeful as a normal summoner.

The plasma ball was responsible for tracking, harassing, and ultimately discharging electricity to paralyze the enemy, making it easier for the metal arrow to pierce the enemy's vitals, and the Mechanical Summoner Creature combined the abilities of attack, defense, control, and short-range exchange of position into one.

Among the many abilities, the metal arrow was Lan Jue's main means of attack, this thing also belonged to the category of summoned creatures, it would enhance its attack power, penetration power, etc. according to Lan Jue's 'Master Summoner' skill, its ability was extremely amazing, and this thing almost ignored the enemy's shield-type defense.
