

R. Paradise 801

Chapter 801: The Ghost Wasp

"Shoo~"

A clear whistling sound came from Lan Jue, Lan Jue was manipulating the precise attack route of the metal arrow by whistling, this metal arrow was not a dead object, but a fusion-type summoned creature that gathered the characteristics of several rare insects, named Ghost Bee.

The pitch-black Ghost Bee shot towards Su Xiao with a whoosh, the sound sensing device on its tail left a greenish-gray trailing flame in the air.

At this moment, Su Xiao was protected by a counterattack shield beside him, but behind him were twenty-nine plasma balls in hot pursuit, so he could only keep moving.

Sharp and thin air-breaking sounds came, Su Xiao immediately sensed that something was coming towards him at high speed, he contracted his sensory range to 5 meters, which was more conducive to catching attacks coming at high speed.

A metal arrow pierced into Su Xiao's perception circle, which was swept up in layers of ripples.

"So fast!"

Su Xiao shifted his attention from Lan Jue to the incoming metal arrow, which gave him a strong sense of threat.

The metal arrow gave Su Xiao a feeling of sharpness, haste, and a vague sense of weirdness, and through his initial perception, he was clear about one thing, it was best not to be injured by this thing, or else the consequences would be severe.

Whoosh~

The speed of the Ghost Wasp was extremely fast, Su Xiao had just sensed this thing when the Ghost Wasp had already stabbed in front of the Counterattack Shield.

Although the counterattack shield shattered many times in the group of soldiers, but this does not mean that the counterattack shield's defense is low, on the contrary, the 500 point strength counterattack shield's is very strong, it is just that when you are in a large group of soldiers, there are too many attacks from all directions, and the frequency of the attacks is also too fast.

The blue energy meridian on the counterattack shield flashed, the tip of the ghost wasp's arrow was about to pierce on the counterattack shield, and the distance between the two was no more than 20 centimeters.

"Command-Ghost."

Lan Jue's mana was depleted by a large amount, and at the same time, the Metal Arrow Ghost Wasp appeared to change.

The pitch-black metal arrow turned greenish in color and even began to transform to translucent.

The Ghost Bee stabbed at the counterattack shield, there was no sound of collision, no air waves spreading, the Ghost Bee passed through the counterattack shield without any obstruction, as if the counterattack shield didn't exist.

It wasn't that the counterattack shield didn't exist, but the ghost wasp transformed from solid to virtual, it was now neither matter nor energy.

Noticing this change in the metal arrow, Su Xiao's pupils tightened, since this metal arrow could be transformed into virtual, it could also be transformed into physical.

The virtualization passed through the enemy's defense, after which it transformed into a physical entity to attack the enemy.

Thinking of this, Su Xiao's whole body muscles tensed, Chopping Dragon Flash Test raised, it was too late to dodge now, he had to chop this thing away at the instant the metal arrow transformed into a solid.

Everything around Su Xiao seemed to slow down, this feeling made him a bit puzzled, he also had this feeling before, when he dodged an axe that chopped at the back of his head.

The Ghost Bee's color changed, from green to black, and stabbed at Su Xiao's head.

The speed of the Ghost Wasp was extremely fast, so Su Xiao only had one chance.

A tingling sensation vaguely appeared on the left temple that was targeted by the tip of the arrow, which was a warning from perception when it was about to be pierced through the skull.

The long knife in Su Xiao's hand chopped down ahead of time, he had already predicted the trajectory of the falling metal arrow.

Ding!

The long knife chopped at the middle section of the metal arrow, chopping marks appeared on the pitch-black arrow, and the entire metal arrow started to pan out due to the force of Su Xiao's chopping, and clanked against the inner side of the counterattack shield.

Tens of meters away, Lan Jue stifled a grunt, and the veins on his face bulged out, slightly hideous.

"Command-Shuttle."

Lan Jue forced his body to endure the discomfort and whistled louder.

Just as Lan Jue gave the command, the Metal Arrow Ghost Wasp immediately responded, the ghost wasp stopped spinning and stabbed straight at Su Xiao.

Su Xiao felt the metal arrow the moment it was aimed at him again and immediately inclined his head.

Whoosh~

The ghost wasp brought up a trail of blood, the tip of the arrow stained with blood.

Warm blood flowed down Su Xiao's cheek, a scratch appeared on his cheek, if it was for a woman, this was a heavenly thing, however, Su Xiao didn't care, it wasn't like he relied on his face to make a living.

The Ghost Bee just brushed past Su Xiao's cheek and reached the back of Su Xiao's head, it deftly reversed its direction in mid-air, and the tip of the arrow stabbed at the back of Su Xiao's head.

The counterattack shield beside Su Xiao dispersed, turning from a circle into dozens of small hexagonal shields, two dozen hexagonal counterattack shields met those plasma balls that were in

hot pursuit, three hexagonal counterattack shields overlapped and blocked the back of Su Xiao's head, the ghost wasp stabbed at the counterattack shields, and when he saw this scene, Lan Jue's face changed.

"Command-Ghost."

The Ghost Bee changed from black to cyan, the translucent Ghost Bee's diameter passed through the counterattack shield and Su Xiao's head.

As the Ghost Bee passed through Su Xiao's head, a trance passed through his brain, which turned to recovery.

As soon as Su Xiao recovered, the pitch-black metal arrow had already appeared in front of his eyes, and with his higher nerve reflex speed, he immediately tilted his body back.

When Su Xiao tilted his body back, the Ghost Wasp had already stabbed in front of him.

Tilting his body back made Su Xiao's height lower, and the metal arrow that was originally stabbed towards his eyebrows flew past his forehead.

Dodging the fatal blow once again, Su Xiao didn't wait to breathe a sigh of relief, that metal arrow stabbed again, Su Xiao raised to block.

Ding!

The metal arrow was bounced off, and the huge force coming from his hand pushed Su Xiao back some.

After some exchanges, Su Xiao discovered the characteristics of this metal arrow, the speed of this thing was extremely fast, he could only have a chance to dodge it if he concentrated, and this thing almost ignored shield-type abilities, and was able to fit between physical and virtual.

This metal arrow was extremely difficult to deal with, however it was not without weaknesses, Su Xiao found that this thing's steering speed and arc flight speed was actually not fast, it was only fast when stabbing in a straight line, and Lan Jue had been avoiding this metal arrow from stabbing on the counterattacking shield, the chopping marks in the middle position of the arrow's body showed that this thing was not indestructible, but only had a strong penetrating power.

While Su Xiao was dodging the metal arrow, the sound of collision came from not far behind him, it was two dozen small counterattack shields and the plasma ball colliding together.

Electricity splashed in all directions, and large arcs of electricity dispersed in the air.

The counterattack shields that collided with the plasma ball were gradually vaporized in the air, and Su Xiao had already disengaged the energy link with these two dozen counterattack shields earlier.

The number of counterattack shields beside Su Xiao decreased, it was no longer enough to form a circle to envelop him, creating new counterattack shields required 500 mana points, without being able to kill a large number of soldiers, he had to conserve mana.

Dozens of Counter Shields circled around Su Xiao, from time to time blocking the path of the metal arrow's attack, the metal arrow never fought head on with the Counter Shield, only occasionally virtualizing through the Counter Shield to attack Su Xiao.

While Su Xiao was dodging the metal arrow, a burning sensation appeared on the wound on his face.

[You have been infested by an unknown toxin, the unknown toxin has successfully interfered with your body state, due to the high level of each resistance, the degree of interference is weakened, your nerve reflexes speed -8%, the effect lasts for 30 seconds].

Chapter 802: Command-Suicide

Seeing this tip, Su Xiao felt bad, he was able to dodge the metal arrow's attack, firstly by virtue of his physical quality and perception, and secondly by relying on his nerve reflex speed.

Now that the nerve reflex speed was cut by 8%, he obviously felt that the metal arrows became faster and more difficult to dodge, in fact, it was not that the metal arrows became faster, but his reaction speed began to slow down.

Whoosh~

The Ghost Wasp cut through Su Xiao's shoulder, bringing up a bloodstain.

[You have been infested by an unknown toxin, and the unknown toxin has successfully interfered with your physical state.]

[WARNING: The abnormal state you have been subjected to is stacked, number of stacks: 2, nerve reflex speed -12%, body defense -15, abnormal state lasts for a total of 1 minute.]

[Decision in progress, due to the hunter's higher resistance to each, duration of abnormal status - 60%, current duration: 24 seconds.]

Su Xiao's senses were even slower, and there was a greenish-gray energy climbing on his body surface, but fortunately, this energy was drifting away at a speed visible to the naked eye.

A few dozen meters away, Lan Jue concentrated on controlling the Ghost Bee, whistling slowly and urgently, he was waiting for an opportunity, waiting for the Ghost Bee to hurt Su Xiao for the third time, the Ghost Bee would attach an abnormal status after hurting the enemy, this abnormal status would appear qualitatively after accumulating to three layers.

Two people killed, now is Lan Jue advantage, but he did not be confused by this advantage, because he knows, long distance and melee 1V1, as long as the strength is similar, initially the long distance must be advantageous, but if the other side close, then there will be his suffer.

"Phew~"

The whistles started to tighten, the hundreds of mechanical dragonflies beside Lan Jue lifted their wings and circled, and did not attack Su Xiao, it was not that Lan Jue did not want to use these mechanical dragonflies to attack Su Xiao, but he did not have the heart to manipulate the other summons when he was controlling the ghost wasps.

The Ghost Bee was very important to Lord Lan, this thing couldn't fail, once the Ghost Bee died, Lord Lan would even have his attributes deducted.

[Ghost Bee]

Category; Summoned Object

Life value: 94%

Mana: 0/0

Strength: 20

Penetration: 32

Skill 1: Ghost Voiding

Skill 2: Poison of the King Bee

Skill 3: Adaptive Speed

Skill 4: Acoustic Sensing System (acquired addition)

Skill 5: Triple Fusion (already fused: bee, beetle, ant)

Skill 6: Supersonic (after using this ability, the Ghost Bee will be dormant for 72 hours)

...

Undoubtedly, Ghost Bee is the strongest ability and weapon of Lan Jue, bar none.

At the moment, the Ghost Bee was chasing after Su Xiao and stabbing him, the Chopping Dragon Flash in Su Xiao's hand chopped at the Ghost Bee from time to time, however, this thing was just too sensitive, and it was very difficult to chop it.

Su Xiao's abnormal status still had 8 seconds left, as long as the abnormal status disappeared and he recovered, then he would have the chance to cut down this metal arrow.

Whoosh~!

Su Xiao sidestepped his head, the Ghost Wasp flew past under his ear, almost injuring him, the speed of the Ghost Wasp was getting faster and faster, the counter shield obviously couldn't keep up.

Su Xiao swept a glance at Lan Jue, the other party stood dozens of meters away and did not move at all, this made him feel much more at ease, solving this metal arrow is the key to this battle.

Light green light flashed in the air, it was not the light of the Ghost Bee, but one of Su Xiao's weapons.

This light greenish-colored glow was divided around Su Xiao, the distant Lan Jue could not see these light greenish-colored glows at all.

The Ghost Bee attacked again, Su Xiao just wanted to dodge, but due to that abnormal status caused his dodging action to slow down a bit.

The distant Lan Jue noticed this scene, and his mind was rapidly thinking, judging whether this was an opportunity or a trap.

The opportunity was fleeting, from the previous situation, it seemed that Su Xiao couldn't do much about the Ghost Bee, therefore, Lan Jue decided to give it a try.

Whoosh~

The Ghost Wasp stabbed at Su Xiao's brow, Su Xiao tried his best to lean back his body, but unfortunately, the Ghost Wasp's speed was faster.

Zi.

The sound of metal wires tightening came, a kind of green-colored metal wire wrapped around the Ghost Bee's arrow, densely wrapping dozens of circles.

"Caught. "

Su Xiao tightened the boundary breaking wire, yes, the greenish aura that flashed in the air before was the boundary breaking wire.

Lan Jue's whistling stopped, his face did not look good, Su Xiao would not care about Lan Jue's thoughts, he gripped the Chopping Dragon Flash tightly, and slashed at the metal arrows that were scrambling left and right in mid-air.

"Command-Ant."

Before Su Xiao's long blade could cut down, the Ghost Wasp turned from black to yellow, and fine cracks surfaced on its surface, it wasn't shattering, but rather it was dispersing into a multitude of small individuals.

The long knife fell, because the ghost wasps split into tens of thousands of small individuals, the knife did not cause substantial damage to the ghost wasps, and because of the splitting into small individuals, the ghost wasps were free from the boundaries of the boundary break line.

"Command-Scatter."

The small individuals that the Ghost Wasp had split into began to spread out to the surrounding area.

How could Su Xiao let such a tricky weapon escape, all the Counter Shields beside him quickly floated forward, forming a diamond-shaped cage around the small individuals of the Ghost Bee, trapping the Ghost Bee within.

The boundary breaking line was wrapped around the diamond shaped cage, Su Xiao yanked on the boundary breaking line and the diamond shaped cage was yanked over, as the diamond shaped cage flew in front of him, he deviated his body sideways, his body's weight was placed on his left leg, and his right leg kicked out with full force.

Bang!

Su Xiao kicked on the diamond shaped cage, the diamond shaped cage flew into the distance with a whoosh.

"Command-Phantom ..."

Lan Jue's command stops halfway through because the ghost wasp has already flown too far away, using Command-Phantom requires Lan Jue to be within 100 didn't of the ghost wasp.

"Command-Return."

"..."

There was no response, it wasn't that the Ghost Bee couldn't return, it was that it had been kicked out too far and it took time to fly.

Su Xiao looked over to Lan Jue, a smile appearing on his face.

Shave.

Su Xiao disappeared into thin air and rushed towards Lan Jue at a high speed.

"Command-Suicide. "

Once this command was given, red light emerged from the compound eyes of the hundreds of mechanical dragonflies beside Lan Jue and rushed straight ahead.

Not only these mechanical dragonflies, on the ground between Su Xiao and Lan Jue, a mechanical beetle and mechanical earthworm crawled out, these mechanical summons had only one goal, to die with Su Xiao.

It was not true that Shave was fast, but it was hard to change the reverse direction after using Shave, at most it was a small adjustment.

Boom, boom, boom ...

Intense explosions resounded through the battlefield, although Lan Jue was not sure where Su Xiao was, but the two were full of mechanical summons between them, Su Xiao rushed over, he would surely be injured by the explosions generated by the mechanical summons.

The fire of the explosion surged up, and before the explosion ended, a figure had already rushed out of the fire of the explosion.

Ka bar, ka bar.

Cracks surfaced on the newly formed counterattack shield around Su Xiao, just now, in just a moment, the counterattack shield had withstood the impact of hundreds of explosions. The fact that it didn't directly shatter already showed the degree of firmness of the counterattack shield.

Su Xiao's figure reappeared, and he was three meters away from Lan Jue.

"Command-Substitute ..."

Pfft.

Blood splattered, the blade flashed, the left side of Lan Jue's body went numb, his entire left arm + shoulder was chopped off, blood splattered on Lan Jue's face, but Lan Jue was unusually calm.

"Replace."

Lan Jue disappeared, and a faceplate-sized beetle appeared in front of Su Xiao.

This beetle's body was rapidly expanding, needless to say, this thing must be able to explode, Lan Jue's summons, apart from the Ghost Bee, there was nothing that couldn't be exploded, it was simply an explosion maniac.

Thud!

A fireball with a diameter of dozens of meters in size wrapped Su Xiao inside, the ground around him trembled.

Two seconds later, the fireball disappeared, and Su Xiao stood within a huge semi-circular pit, with a few small pieces of Counter Shield floating beside him.

With a clatter, the several small pieces of counterattack shields turned into energy and disappeared.

"Cough cough cough ..."

Su Xiao covered his mouth and coughed dryly, blood spilled out from his fingers, at this moment, he had multiple burns on his legs, his left calf was especially serious, the skin was blown open.

Su Xiao took out a No. 1 potion, this time the No. 1 potion was different from the past, it was contained in a syringe.

He stabbed the syringe into his neck, and the No. 1 agent inside the syringe was injected into his body, not drinking it, and it was injected directly.

Just as the potion entered his body, the blood vessels on Su Xiao's neck rippled, and a moment later, the injuries on his legs began to show signs of recovery, at least the pain disappeared quickly and would not affect his speed.

Chapter 803: mechanical heart

Su Xiao's side directly injected the No. 1 agent into his body, Lan Jue's side was also enough very, Lan Jue similarly took out a syringe, he didn't zap it at the neck, but at the heart.

One shot down, the blood gushing wildly from Lan Jue's shoulder stopped, not only that, he also summoned dozens of mechanical scorpions, these mechanical scorpions climbed up Lan Jue's body, using the wound at his shoulder as the starting point, forming a black arm.

The mechanical scorpion arm quickly formed, five fingers were the tail needles of five mechanical scorpions, blue venom dripped out from the stinger of the fingertip, and sizzled when it landed on the ground.

"Good, the arm is there, and the Ghost Bee is coming back soon."

Both sides were ruthless, one immediately injected very dangerous restoratives into their bodies to keep them moving after getting their legs blown up. The other was stabbing his heart and forming a prosthetic arm with a summon, which wasn't considered to be an arm regenerated by Ranjou, so the Chopper Flash ability wasn't activated.

"The arm is taken care of, but how does this thing break free, it seems very sturdy."

Lan Jue looked down at his body, he was wrapped in boundary breaking threads.

Su Xiao inside the giant pit tightened the boundary breaking line, blood marks surfaced on Lan Jue's body outside the giant pit, this guy's physical strength attribute was not low, the boundary breaking line could only break his skin, it could not cut him to pieces.

Lan Jue's body leaned back, his feet plowed the ground and gradually approached Su Xiao, after all, the gap in strength attribute was there.

After Su Xiao's legs regained consciousness, he immediately charged forward according to the direction of the boundary breaking line and rushed out of the huge pit in a few steps.

The two of them were more than thirty meters away from each other and looked at each other, although Lan Jue was strangled by the Boundary Disconnect Line and covered in blood, he did not panic, but instead revealed a smile.

"Are you sure you want to come over and cut me?"

Lan Jue blew his mouth sun, the distant battlefield over the sharp sound of air-breaking, and for some reason, the empire and the tribe's soldiers did not come close to within a hundred meters of the two, this area seems to have become a 'no-go area'.

This was Lan Jue's summons at work, each of his mechanical summons had its own unique ability, such as the Unicorn Fairy that was now branching out a hundred meters away from the two of them, it was them that misled the senses of those soldiers, making those soldiers think that the area where Su Xiao and Lan Jue were fighting was unapproachable and extremely dangerous.

Hearing that familiar air-breaking sound in the distance, Su Xiao's cheeks twitched, the ability of that metal arrow was just too disgusting, vaporization, extremely fast speed, attaching an abnormal status after being wounded, and the most shameless thing of all was that it could also split.

Lan Jue has a lot of combat means, this point Su Xiao can not compare, Su Xiao will not be those fancy things, he is only good at cutting people, a few knives down, not many enemies in the same class can survive, the big BOSS have been cut down by him a few knives.

Now Su Xiao has two choices, one is to turn around and deal with that metal arrow, the second is to ignore that metal arrow and attack Lan Jue with all his might.

Lan Jue was also clear about this, he was gambling that Su Xiao cared about his own life and would prioritize defending against the Ghost Bee.

Su Xiao stepped on the ground under his feet, without even turning his head back, he directly rushed towards Lan Jue!

"This reckless man."

Lan Jue's whistle paused for a moment and turned more urgent.

Su Xiao hurriedly rushed in front of Lan Jue, who could not control other summons when controlling the Ghost Bee, so he could only leap backward, but fortunately, his agility attribute was not low.

The long blade chopped down, the tip of the Chopping Dragon Flash cut through Lan Jue's leather coat, cutting a wound several centimeters deep on his chest.

Lan Jue was a man who had fought many battles, and he resisted the sharp pain generated by the energy of the Blue Steel Shadow with his willpower.

"Command-Supersonic."

Lan Jue's whistling stopped.

Boom!

There was an airburst from behind Su Xiao, a sonic boom from something going supersonic.

At this moment, Lan Jue was still maintaining his backward leaping posture, and a piece of blood bead was floating in front of his chest.

Su Xiao's pupils contracted, that strange feeling reappeared, he began to feel a vague pain at the back of his heart, it seemed that something was about to pierce his heart, he subconsciously shifted his body.

With a brushing sound, the Ghost Wasp penetrated Su Xiao's body and disappeared within the ground in front of him.

An arm-thick wound appeared on the left side of Su Xiao's chest, and his beating heart could be seen through the wound.

The Ghost Wasp within the soil fell into a forced dormant state.

"It didn't penetrate the vitals, crap!"

Hundreds of mechanical bees appeared near Lord Lan, and Su Xiao, who had blood spilling from the corners of his mouth, ignored those mechanical bees and rushed in front of Lord Lan.

Blade flashes, Su Xiao chopped several slashes in less than a second, when the enemy didn't block his attack, high speed chopping was the most effective, these slashes respectively chopped on Lan Jue's neck, chest, abdomen and other locations.

At the same time Su Xiao made his slashes, hundreds of mechanical bees wrapped him up.

"Command-Suicide."

Lan Jue, who had blood gurgling out of his mouth, gave the command.

Boom!

The fire from the explosion wrapped Su Xiao inside, this was one of Lan Jue's ability to focus the explosive power of the summon, after the explosion engulfed Su Xiao, smoke and dust mixed with dirt and debris splattered as the battle finally subsided.

The smoke and dust floated up, and a gentle breeze blew through, the smoke and dust was blown away.

Lan Jue's decapitated head stood on the ground, his expression was stagnant, suddenly, Lan Jue's eyeballs moved, his gaze looked towards Su Xiao, he actually did not die!

"..."

Lan Jue's mouth opened and closed without making a sound, after being decapitated there was no ability to make a sound at all, the good thing was that launching a skill didn't actually need to make a sound, the ability he used was his big move to save his life, named: 'Command - Mechanical Heart.'

Thud, thud, thud ...

In Lan Jue's body that had been chopped into several sections, the heart that had stopped beating was beating again, if this heart was shaved out it would be discovered that Lan Jue's heart was a mechanical construction, which was the reason why he had not died after being chopped into pieces.

In reality Lan Jue would also die, if he did nothing for ten seconds after being decapitated, he would lose consciousness and eventually die.

With that mechanical heart beating, Lan Jue's decapitated body began to mechanize, when his entire body was mechanized, Lan Jue sighed in relief, his head was similarly metallized, as long as the mechanical heart was not destroyed, he would not die for a while.

Dozens of mechanical beetles drilled out from the ground, they lifted up Lan Jue's body and spliced his body together, of course, splicing together was useless, the nerves and bones had been broken, this was not a problem that mechanization could solve, mechanization was a life-saving move, not resurrecting in place.

A dozen or so beetles would use their claws and mouth pincers to fix Lan Jue's body together, allowing him to take human form.

Mechanization could only last for two hours, if Lan Jue couldn't recover his body that had been chopped into several pieces within two hours, he would die then.

At the moment, Lan Jue's body couldn't move at all, the only things that could move were his five senses, luckily there was a beetle holding it up.

"Still not dead? Sure enough, this guy's survivability is strong."

Lan Jue looked towards Su Xiao, who was lying on the ground and seemed to have fainted.

Suddenly, Su Xiao's index finger twitched a little.

Su Xiao, who was lying on the ground, raised his head as pain traveled through all parts of his body, he tried to use his hands to support his body, but unfortunately failed.

"Kill him."

Lan Jue's order was given, and several beetles began to approach Su Xiao, preparing to blow themselves up.

A white object rolled out of Su Xiao's arms, which just appeared and split into dozens of small white green outsiders, jumping towards Lord Lan.

"Retreat!"

The mechanical beetles underneath Lan Jue dragged him to quickly crawl into the distance, those little white frogs were in hot pursuit, the ones that came to kill Su Xiao before met the alchemy bomb.

With a loud boom, the mechanical beetles exploded, and the small frogs made up of alchemy bombs were mostly detonated, just a dozen of them chasing after Lan Jue.

A mechanical beetle burrowed out from within the dirt, dragging a metal arrow and running away quickly, very comical.

Su Xiao climbed up from the ground, he wanted to raise his sword and chase after it, but unfortunately his heart was in the right place, Lan Jue, as the hunter of Apocalypse Paradise, was certainly not easy to deal with.

With his current physical state, wanting to go after Lan Jue is a complete fool's dream, it's better to think about how to survive in the battlefield is the key, after Lan Jue retreated, the soldiers who were fighting together a hundred meters away have started to approach Su Xiao.

Su Xiao drank a bottle of No.1 potion, and after considering for a moment, he simply lay on the ground and pretended to be a corpse, something he was good at.

Su Xiao was actually not in a hurry, Reincarnation Paradise did not issue him a mission to kill the other party, instead, the other party seemed to have a mission to kill him, listening to the other

party's tone, without killing him, the other party would die before the end of this world, but the authenticity of the message was to be investigated, this was, after all, the enemy's words, Su Xiao would not believe it completely.

In this battle, although both sides didn't kill each other, but it was Su Xiao who won, he didn't lose any other parts except for a hole in his chest, Lan Jue was miserable, he was cut into six sections by Su Xiao.

Chapter 804: survivability

Su Xiao was lying on the battlefield, surrounded by soldiers who were fighting each other.

The sound of the war drums became more and more urgent, the superiority of the Imperial Army began to be obvious, and had already knocked the tribal army down the rocky slope.

Within the crowd of Imperial soldiers, several hundred soldiers wearing black armor were particularly conspicuous, they gathered together and formed a circle of human walls within the crowd.

"Cough cough cough ..."

Dry coughing sounds came out from within the human wall, Legion Commander Carlos was sitting on a corpse, blood gushing out of his mouth with every cough he made.

Under Carlos' butt was the corpse of a troll, this troll was covered in blue skin, and even though it was dead, it was still emitting a cold aura.

This troll was the leader of the Troll Clan in the Black Earth Warzone, his enemies called him the Troll Sage and his acquaintances called him Frost.

"Amster, count on you to escape quickly."

Carlos pressed the bloody hole in his abdomen with one hand, how the wound looked like it was made by the top of a bull's horn.

Just ten minutes ago, Minotaur Amster along with the Frost Troll fought with Carlos, the result was one death and two injuries, and Amster escaped after having one of his bull horns cut off.

"Is everything alright?"

A female voice came from beside Carlos, a stealthy Dark Elf.

"It's fine, you want to kill me with just the two of them? In the Black Earth Warzone, no one else can take my life except for Bert Dorn to come."

Carlos picked up the bullhorn on the ground.

"This is good, I remember that your father has a grudge against Amster, after the war is over, give this to your father."

Carlos tucked the large portion of the horn into his arms, pulling out a glass vial in the process, and looked to the air beside him, where a stealthy dark elf was standing.

"How calculating of the gnome's dwarf to go out of his way to deliver this alchemical potion to you, perhaps waiting for me to drink it when I'm wounded, no wonder the Troll Sage and Amster dared to come and kill me."

The potion in Carlos's hand slipped to the ground, the potion landed on the ground and Carlos's combat boots stepped on it, crushing it with a click.

"It's expensive, even if you can't use it, you can sell it back to the Horde Alliance, most means can't check this potion for problems."

The dark elf spoke up, some rancor in his tone.

"Did you get this from Dogra? It's no wonder, it's normal for a childhood friend to want to poison her opponent when she's been robbed by another man."

Carlos' eyes lowered, lost in thought as he looked at the potions seeping into the dirt.

"Dougla's dead."

The female dark elf spoke.

"What?"

Carlos was a bit taken aback.

"He died by my hand, and he wasn't my childhood friend, that's just his personal opinion, Dark Elf children grow up together, I have at least a hundred childhood friends if you go by his way of thinking."

The voice of the female dark elf, the dark elf princess, began to chill with cold air.

"That's harsh."

Carlos seemed to understand the saying that the most poisonous woman was the most poisonous woman, and the rumors were correct, he did have an affair with the Dark Elf Princess.

"Honey, do you have a problem with that."

The Dark Elf Princess' voice was gentle, but Carlos felt no warmth.

"Let's not discuss this topic, the battle is going well now, it won't be long before the Horde army is routed, and then we need to prepare for a pursuit, or at least keep them away from the Black Earth Fortress. "

Carlos stood up and drew the knight's sword that had been stuck aside within the dirt, it was at least palm wide and heavy, with a sharp edge that was good for slashing enemies.

Knight sword originally polished sword body is a little red, this is a long time to cut the enemy will appear the color, the sword vigorously cut into the enemy body, under the accumulation of time, blood will be due to a strong impulse to soak into the sword body, in the long run, the formation of this both snow bright, but also vaguely reddish sword body.

If Carlos died in battle and other people use this sword, if the user's willpower is not strong enough, it is likely to be affected by the blood inside the sword, after all, Carlos used this sword to kill the enemy for nearly twenty years, and the tribal army that died under this sword are countless.

"Occupy our Black Earth Fortress, you guys can also taste the taste of being invaded."

Carlos looked to the back of the battlefield, from a distance he could see the adjutant standing at a high point directing the battle.

"Rona is good, well suited to take over the position of Legion Commander."

Carlos spoke out of turn, realizing that it had only been a few days since he had assumed the position of legion chief, and he had already begun to consider the issue of a successor.

"Already...can't be suppressed."

The Dark Elf Princess's voice was a bit choked.

"No crying!"

Carlos let out a low roar, and a blood-red light emerged from his right eye, at this moment, Carlos looked like a demon in purgatory.

"Remember, even if I die, don't cry in front of my corpse."

The red light in Carlos' right eye receded and his breath returned to normal, he turned around and walked towards the back of the Imperial Army.

Tick, tick, tick ...

Crystalline teardrops dripped down, the Dark Elf Princess's eyes were filled with tears as she stared blankly at Carlos's back, this powerful man she loved was going to die, and she wouldn't live more than three months at most.

"There must be a way, there must be."

The red lips of the Dark Elf Princess pursed up, her beautiful features hid her ruthlessness, sometimes when a woman goes crazy, she is a scary creature.

"Within two months, if that goblin hybrid can't come up with a solution, he'll be split up and buried."

Unbeknownst to Nicholas Caesar, who was in the back of the Imperial Army, a woman was on to him, and if he couldn't come up with a cure for Carlos, the soon-to-be-widowed female elf was going to be mad.

Dark elf women have a characteristic, is once they find the love, there is no such thing as a breakup, in the female dark elf's cognition there is only widowhood, there is no breakup, beautiful flowers tend to carry thorns, female dark elves are even more ruthless, they come with a lifelong 'binding' function, want to be unbound? If you want to be unbound, go to hell, you'll be unbound when you die.

...

Su Xiao stood up from the dense group of soldiers, at this moment he was full of forward charging imperial troops, there was no longer any need to play dead.

He looked down at the wound on his chest, after receiving a serious piercing wound, the recovery power of Potion No. 1 manifested itself, and the arm-thick blood hole had already stopped bleeding, and the blood hole was covered with a thin layer of flesh, and it didn't take long to see the appearance of a rough recovery.

As for the internal injuries, the effectiveness of Potion No. 1 in recovering internal injuries far exceeds that of recovering muscles and bones, Su Xiao's liver, which was pierced through most of the liver, has begun to heal.

Su Xiao took a deep breath, there was still a vague pain in his chest cavity, but fortunately it was no longer a big problem, this is the benefit of strong survivability .

If competing for survivability, Su Xiao's survivability was not weaker than the main tank of the adventure group, although he was not equipped with a shield, he had a counter shield.

If comparing the physical strength attribute, Su Xiao was not much lower than those main tanks, as for the number of life values, although the life values were datamined according to percentages, after the calculations and summaries of many contractors, there was a rough way to calculate the life values.

In general, 1 point of physical strength attribute could increase the life value by roughly 10 to 13 points, comparing the life value, Su Xiao might be higher than most of the main titans.

The Spirit Shadow Physique skill caused a change in the way Su Xiao's mana value was stored, Most Contractors' mana value was stored in their brain, Su Xiao was different, his mana value existed in blood, muscles, bones and other bodily tissues in all parts of his body.

This special way of storing mana value allowed his mana value to have a nourishing effect on his life value, and the Spirit Shadow Physique skill allowed Su Xiao's life value to increase drastically by an amount of 30% of his total mana value.

Su Xiao's current mana value limit was 2,610 points, which was enough to boost his life value by 783 points, and with such an amount of life value, as long as he was not injured in the vitals, not to mention being pierced through the chest, even if he was cut down at the waist, he would be able to hold on for a long time.

Toughing it out with the enemy head on was Su Xiao's usual fighting style, which required a strong survivability to support it.

The benefits of strong survivability were manifested at this time, after a few moments of repair, Su Xiao had already regained some of his fighting strength, if Lan Jue knew Su Xiao's current situation, he would have rolled his eyes in anger.

Chapter 805: Attacking the town

The tribal soldiers on the battlefield were quickly repulsed, and the number of dead and wounded increased tremendously.

With the massive deaths and injuries, plus the fact that the leaders of the Orcs and Trolls didn't come out to stabilize the situation, the tribal soldiers began to appear to be massively fleeing.

The first to flee was not the orcs whose leader was injured, nor the trolls, but the goblins, who realized that the situation was not right and immediately fled with their beloved war equipment.

The second to flee was the trolls, because they had too many dead and wounded.

After the Goblins and Trolls fled, the Orcs could not sit still, they also began to massively flee, as for the hot-tempered Dwarves, they are also fleeing, the other three races have fled, they still play a hammer.

"Kill them all, hahaha."

The imperial soldiers formed a battle formation and surrounded and killed the tribal army that couldn't escape in time on the war, the battle that was scorching before was a one-sided massacre at this moment.

Su Xiao mixed in the crowd, from time to time killing a tribal army, he was surprised to find that the life value recovered by the natural ability 'Spirit Devourer' after killing the enemy was very special, for every enemy army he killed, he could probably recover 13 to 15 points of life value and mana value, the reason he could recover this amount of life value was because the mana value increased by the Spirit Devourer had reached the 200 points cap, and the effect of killing the enemy to recover was increased by 50%.

The life value recovered through the Spirit Eater was able to slowly heal Su Xiao's injuries, this kind of healing was slow, but it was more thorough than the recovery from potions.

When Su Xiao killed a dozen or so enemy soldiers, the chest tightness disappeared and his breathing was obviously much smoother.

Discovering this, Su Xiao killed even more vigorously, and in no time, he beheaded dozens of tribal troops.

Now the battlefield and before do not use, want to kill tribal army to rely on luck, tribal army in mass routing, the imperial army chase.

The miserable screams of rushing and killing were mixed together, a contractee of the Apocalypse Paradise was full of despair, the Imperial Army beside him was too much.

After only a few minutes, the Apocalypse Paradise indentured servant ran out of mana, he was engulfed by the tide of people, if the Imperial side lost the battle, the Reincarnation Paradise indentured servants would not be any better.

The pursuit began, the Imperial Army left a small group of troops to hold the fortress while the rest of the soldiers pursued the Horde Army.

Su Xiao is in the pursuit team, as long as the pursuit does not end, the war will not end, as for going to redeem the [Sacred Oak Tree Branch], for the time being, do not have to think about it, as soon as the war started, the Reincarnation Paradise prompted the Merit Exchange Store to close, and there is a condition for it to open again, which is that the Imperial Army has successfully stationed in the Fortress of the Black Earth.

Before the battle Su Xiao observed the situation of the black earth fortress, the fortress interior was badly damaged, and before and after the stone slope and magma slope need to be cleaned up, and to open up the fortress inside the blocked channel, the inner channel can let the imperial army easily enter the fortress, so in the horde army after the capture of the fortress, the dozens of inner channel sealed.

Before all this was taken care of, the Imperial Army was not stationed in the Black Earth Fortress, and it would take at least 1 to 2 days to try to take care of all this.

In other words, it would take at least 1 to 2 days until the Merit Shop opened, so Su Xiao was not in a hurry, it was useless to rush.

...

Three hours later.

An imperial army that had killed within the Horde Alliance's territory marched neatly, the same army that had fought on the Black Earth Fortress earlier.

It sounded like the three-hour pursuit was already very deep into the Horde's territory, but in actuality it wasn't, this army wasn't trying to go deep into the Horde's territory, but rather cleaning up the Horde's army that had collapsed into small groups around the Black Earth Fortress.

An Imperial officer rode in front of the army on a warhorse, his name was Russell, he had always been a champion of Carlos, a powerful member of the Iron Blood Legion.

After Carlos took the throne, Russell, who was not weak and had great commanding skills, was promoted a few ranks in a row, before, he was not reused because of his bad origin, fortunately, the new head of the legion, Carlos, didn't care about his origin, he only looked at his ability.

"Reporting to Commander Russell, a town under the rule of the Horde Alliance has been spotted ahead."

A scout knelt on one knee in front of Russell's warhorse with a respectful expression.

"Population. "

Russell didn't say much, and he didn't smile, ironic, serious, thin and cold was the first impression he gave.

"Probably around 20,000 to 40,000 people, due to time constraints, my subordinates are unable to learn too specific information."

That scout swallowed his saliva.

"Men, execute him."

Russell's tone was flat, and the scout froze.

"Lord Russell spare his life, my subordinate is really ..."

The scout's face was white with fear.

"Shut up."

As soon as Russell's words fell, a male wood elf clan rushed out behind him, this male wood elf was extremely fast, without waiting for the scout to react, the short sword in his hand had already chopped down, and a human head flew up.

"Marquis Mark that old thing is really a waste, the tribe's scouts have infiltrated the scout unit, every time Lord Carlos wants to deal with the scouts, that old thing looks forward and backward."

Russell didn't even look at the scout's corpse, as a member of the scout force guarding the Black Earth Fortress, he wasn't even clear about the situation of the town near the Black Earth Fortress, this is the basic quality of a scout, even if he wasn't a scout, this kind of dereliction of duty during wartime would require him to lose his head.

The imperial army began to march towards the town, Su Xiao mixed in the imperial army, not long after, a sizeable town appeared in his line of sight.

Whoosh~

The sound of breaking air came, an orb smashed in a parabola towards the Imperial Army, it was a Goblin Bomb.

Boom!

Fire splashed everywhere, a large part of the Imperial Army was blown to pieces, and a short leg wrapped in rotten cloth flew near Su Xiao.

"All troops charge."

The Imperial Army rushed towards the tribal town with great vigor, and the remnants of the tribal army near the town immediately retreated inside the town.

The Imperial Army was not far from the town, in a few minutes, a large number of Imperial Army rushed into the town and started to fight in the alleyway with the remnants of the Tribal Army inside the town.

The screams from the town, That is the civilians living in the town, including orcs, goblins, etc., mostly women, tribal alliance, teenagers or adult males have been forcibly recruited to the army.

When Su Xiao entered the town with the army, the battle had already subsided, and the one that attacked the imperial army before was a small group of tribal army.

Su Xiao walked in the town, did not see civilians on the streets, civilians are hidden behind the windows, look numb looking at the streets of the imperial army, most of the civilian houses in this town are piled up with stones, most of them are two-story structures, the houses are very dense, because it just rained not long ago, the streets are very muddy.

The Imperial Army began to search within the town, from time to time exchanging blows with the scattered tribal army.

It was not wise to continue to move deeper into the tribal territory, so Su Xiao's Imperial Army stopped in the town to recuperate, and would return to the Black Earth Fortress afterward.

After clearing out the tribal soldiers within the town, the imperial soldiers gradually dispersed, their demeanor obviously much more relaxed.

Su Xiao sat on the stone steps in front of a residential house, eating compressed cookies to replenish his energy, the compressed dry food was actually not difficult to eat, it was just very dry in texture.

Chapter 806: an atrocity

"Beauty, don't be afraid, I won't hurt you."

An imperial soldier embraced a wolf head Orc, this is a female Orc, for the imperial soldiers who have been guarding the Black Earth Fortress for a few years, female + good figure is equal to beauty, as for that wolf head, just cover it with clothes, after all, Orcs only have a big difference between their heads and humans, their body structures are similar.

The female wolf Orc lowered her head, she did not use fear, there is only numbness, under the destruction of the long war, the fate of civilians is so.

"Ah!!!"

A scream came from a male dog-headed man covered in wounds, hanging upside down as several Imperial soldiers looked on.

"I suggest bloodletting. "

"It's better to burn him to death."

A few Imperial soldiers laughed as they discussed how to execute a wounded captive; these Imperial soldiers might be kind fathers or good husbands, but in war, they were butchers.

In the end, a few of them decided to burn the captive, the other imperial veterans who saw this scene were already accustomed to it.

The orc captive wailed in agony as the fire burned, but he didn't beg for mercy, he just cursed and cursed the Imperial Army.

A dozen of new soldiers witnessed this scene, they were newly recruited to the Black Earth Fortress, although they had been trained, but the actual battle was the first time.

The dozen or so recruits had just adapted to the cruelty of the battlefield, but the scene in front of them made them somewhat unable to accept it.

What they didn't know was that if the imperial army was captured by the tribal army, they would end up in the same situation, being burned, having their throats slit, or even skinned alive.

War had no humanity, and even if the soldiers had it initially, it would disappear with the war.

Whoosh~

The sound of breaking air came, and the dozen or so recruits near Su Xiao subconsciously flung themselves to the ground.

Boom!

A residential house was blown apart, debris and wood chips flew, and the dozen or so recruits fell on the ground, not even daring to raise their heads.

"What are you afraid of, this is flying from afar, it's not a precision strike, you guys will get used to it when you're stationed at the Black Earth Fortress in the future, this stuff often flies to the Black Earth Fortress."

An old soldier put his arm around a female orc and looked at those new recruits with a smile.

Su Xiao looked at the compressed cracker in his hand that was stained with dirt, hesitating for a moment he threw the compressed cracker away, took out a new piece, and calmly continued to eat.

Several recruits looked at Su Xiao with surprise, the thought in their mind was, this guy is not afraid of death.

Su Xiao just put the compressed cracker into his mouth, a green "meteor" flew into the town, this is a green phosphorus fire burning bottle.

It was proven that if one was unlucky, even if one could survive the battlefield, one would die under the 'stray bullet' afterwards.

Su Xiao stood up, he sensed that there was someone inside the residential house behind him, and as a 'civilized person', he knocked on the door.

A muffled bang came from inside the private residence, after which it fell into dead silence.

Knocking on the door and no one opened, Su Xiao could only resort to a not too civilized means and kicked the door open.

Into the private residence, although it is daytime, but the windows of the private residence is blocked tightly, the room is somewhat dark.

This mansion is not small, and is a two-story structure, the upper and lower floors together, at least three hundred square feet, it can be seen that the identity of the owner of this mansion is not low.

Su Xiao sensed the situation within the private residence, and three life breaths appeared in the room on the second floor.

Walking up to the second floor, with Su Xiao's sharp hearing, he even heard subtle breathing sounds, the owner of the breathing sounds was nervous and was deliberately suppressing the breathing sounds.

"Come out."

Su Xiao sat on a wooden table on the second floor, he put the [Arashikage Trenchcoat] into the storage space and took off his bottoming shirt that was covered in dust and blood, his bare|shoulder upper body, his face and upper body were covered in dust and blood, and there were tiny stones in his hair.

The door to the room opposite Su Xiao opened and a female Lionhead stepped out of the room, the female Lionhead was a bit nervous, the hand holding the dagger behind her back was shaking, this dagger was not used to kill the enemy, but to commit suicide.

"All come out."

Su Xiao lit a cigarette, his whole body relaxed and leaned back in his chair.

"It's just me ..."

Before the female Lionhead could finish her sentence, she realized that Su Xiao was already looking at her.

"I'm not interested in female orcs, and even if I was, you wouldn't be able to resist."

Hearing Su Xiao's words, the female lion-headed person gripped the dagger in her hand tightly.

"Even if I die, I will not be insulted by you, never!"

The female Lionhead was resolute, she did not think of killing Su Xiao, she just did not want to be ravaged by the victorious Imperial soldiers.

"I'll give you ten seconds, the other two come out, and also, go get me some hot water."

Although Su Xiao killed without blinking an eye, he wouldn't kill meaninglessly, that didn't yield any profit, soldiers were different from civilians.

The female Lionhead hesitated for a few seconds, and finally compromised.

"Yura, Shirley, come out."

A young lionhead and a lionhead girl came out from the room, both of them looked at Su Xiao in awe, there were three female lionheads in total, which was not surprising, the male lionheads all went to join the army.

Not a moment later, the adult female Lionhead brought a tray of hot water, carefully placing it on the wooden table beside Su Xiao, Su Xiao took out a towel and began to clean the blood stains and dirt on her body.

Soon, the plate of hot water turned black and red, and Su Xiao signaled the female Lionhead to go change the plate of hot water.

A few minutes later, Su Xiao, whose entire body was much more refreshed, leaned back on the wooden chair and took a nap, drops of water dripping from the ends of his hair.

"Don't come within five meters of me."

With the Chopping Dragon Flash placed on a wooden table to the side, Su Xiao was always ready to deal with enemy attacks.

"Need...need food, as long as you don't hurt us, we will definitely not do anything stupid."

"No need."

Su Xiao just wanted to rest now.

Messy footsteps came from downstairs, a few soldiers entered the residential house, talking and laughing loudly, it was very noisy, hearing the noisy talking and laughing, the three female Lionheads' faces all started to turn pale.

Soon, several soldiers with muddy faces rushed up to the second floor, their eyes lit up when they saw the three female Lionheads, but after seeing Su Xiao, who was leaning against a wooden chair and taking a nap, several soldiers shook their heads, a little bummed out, and turned around to go downstairs.

"Someone grabbed the lead, go look elsewhere, this guy is so lustful, one big, two small three."

A few soldiers talked and laughed and left, silence was restored in the civil house, all soldiers who survived the war, if there was a conflict over grabbing a female orc, it was simply ridiculous.

After the imperial soldiers left, the lion-headed human girl knelt on the ground and cried silently.

This was the situation of the tribe's civilians, this lion-headed man's situation was fine, at least he wouldn't starve, as for the other orcs, most of them were starving, unable to keep their heads above water, so it was no wonder that they would start a war.

The Imperial Army occupied the tribal town, and the 'revelry' began.

As night fell, the streets of the town were lit up with fires, the fires were surrounded by Imperial troops who were hugging female orcs and laughing, they were enjoying themselves instantly, all of them knew that it wasn't certain that one day they would die, maybe tomorrow, or maybe the next moment when a goblin weapon fell on their heads.

Oooh~

The sound of a horn came, a rallying cry.

Su Xiao, who was taking a nap, opened his eyes, he hadn't slept much, after all, he had to always be on guard against gnome bombs or incendiary bottles falling from above.

Su Xiao put on his trench coat and snorted as he headed downstairs, the three female Lionheads watched him leave without much emotion in their eyes.

If it was a normal situation, the female orcs within the tribal town would have been captured and sold as slaves, but right now, the Black Earth Fortress didn't have much food, and there was still a need to repair the fortress, so how could there be time to capture orc slaves to sell.

Moreover, Legion Chief Carlos had a characteristic, he only captured the soldiers of the tribe as laborers, he never captured female orcs to be sold as slaves, this was true for the Legion Chief, and the same was true for his subordinates.

In fact, the most effective way is to slaughter the city, But after the slaughter of the city needs to be cleaned up, otherwise there will be an outbreak of plague, we must know that this place is not far from the Black Earth Fortress, the outbreak of plague is likely to spread to the Black Earth Fortress.

Just leaving hastily of course won't work, with these female orcs around, it won't take many years for them to give birth to new orc soldiers, so the imperial soldiers took a measure, a somewhat inhumane measure, although those female orcs won't die, it's simply not possible to want to continue to procreate, this kind of inhumane measure was done in passing after those imperial soldiers 'relaxed their minds and bodies ' After the incident, it was done by the way, that is, using a very thin dagger, to stab a knife to the womb of those female orcs.

War makes all people cruel, if the war continues, sooner or later, there will be races that will be slaughtered, in fact, there are already races that have almost been slaughtered, such as the Centauri.

The rallying cry was blown, the imperial army quickly assembled, the tribal armies in the nearby area had been dispersed, it was time to return to the Black and Fortress.

Su Xiao followed the army towards the Black and Earth Fortress, the current situation was good, the Black and Earth Fortress was snatched back, and after that, it was time to consider the issue of the World's Core.

But before that, Su Xiao had to exchange the [Sacred Oak Tree Branch] as soon as possible.

Chapter 807: block the way

The pursuing army methodically marched towards the Black Earth Fortress, and along the way back, Su Xiao from time to time saw small groups of Imperial troops patrolling the vicinity of the Black Earth Fortress, and once they discovered the Empire, they immediately fired firecracker-like flares into the sky.

From time to time, there were flares rising in the night sky, and more than 100,000 imperial troops split into several units to clear the tribal army in the nearby area.

Of course, there was a time limit for this clearing, and the clearing would end when night fell completely, and the army would gather at the Black Earth Fortress and hold it down.

Unsurprisingly, the Horde Army would not abandon the Black Earth Battle Zone, this was after all one of the three major battle zones, besides, it was not the first time the Horde Army had been repulsed.

The Tribal Army was beaten up in this battle, both because the Tribal Army wasn't united enough and because Carlos was personally present at the frontline, allowing the Imperial soldiers to reach an unrelenting level of aura.

When Su Xiao followed the army back to the Black Earth Fortress, there were several large piles of corpses piled up outside the Black Earth Fortress, and these corpses were burned by the fire, with black smoke rising into the air.

"Rise, be careful, the lasso over there is slow."

"Whoever has seen Malsa, have him appear before me in five minutes."

"Report, all of our fallen soldiers have been carried inside the Black Earth Fortress. "

Soldiers were busy on the battlefield, and Legionnaire Carlos stood among several officers, those officers reporting something from time to time.

Su Xiao's tribe dispersed after arriving near the Black Earth Fortress, and all the soldiers were free to move around.

The recruits climbed up to the fortress through rope ladders, they were going to the clerk inside the Black Earth Fortress, wanting to write a letter home to tell their families that they were still alive.

As for the veterans, they were scavenging their belongings on the battlefield, and they were more willing to send something of value to their wives and children at home than a letter.

Su Xiao walked towards the Black Earth Fortress, he was going to find the Quartermaster Nicholas Caesar, not surprisingly, the Battle Merit Store would open in no time, at that time, the heads of all the major adventure groups would also head there, after this battle, Su Xiao was definitely not the only one with enough merit to redeem the [Sacred Oak Tree Trunk].

Fortunately, Su Xiao had a previous encounter with Nicholas Caesar and was able to go through the door.

Su Xiao climbed up the rope ladder to the Black Earth Fortress, the stone slope on the outside of the fortress had already been removed, and that thing had no other purpose other than to facilitate the tribal army's attack on the fortress.

Above the walls of the fortress, the ground was wet, and some shallow red puddles reminded the crowd of what had happened here before.

Su Xiao smelled the faint odor of blood, although the corpses on the walls had already been disposed of, and the ground had been cleaned, but the smell of blood persisted.

After inquiring with the soldiers coming and going, Su Xiao knew the location of Nicholas Caesar, and that guy had already moved back to the Black Earth Fortress with all his family assets.

The entire fortress stone wall more than dozens of meters wide, the fortress walls on the inner side of the hollow side, which is used to hoard supplies and soldiers live, as for the outer side, the whole body obsidian to build, this side is often attacked by the tribal side, not sturdy can't.

Su Xiao entered the inner wall of the fortress, here is somewhat similar to a large war fortress, a total of 16 floors, each floor has a corridor, horizontally through the whole floor, easy to walk.

The 16th floor to the 6th floor is used for soldiers to live, is partitioned into a room of thousands of square meters of large bunks, the 5th floor to the 4th floor is where the officers live, this is partitioned into a small cubicle, the higher the position, the better the living conditions, the 3rd floor to the 1st floor is used to store supplies.

Su Xiao walked into the interior of the fortress, a strong smell of gunpowder came to his nose, a large area of black rubble scattered in the corridor, this is the masterpiece of the tribal side, they wanted to blow up the black earth fortress before, of course, they had to start blowing up from the hollow side.

The walls of the fortress corridor inserted a torch, the firelight swaying, inside the fortress is a little wet and cold.

According to what was inquired, Nicholas Caesar resided on the 4th floor, a place where only high ranking officers could reside.

Su Xiao just walked to the entrance of the 4th floor and found several soldiers blocking the entrance.

"Please ask this lord to show his officer's certificate."

These soldiers stood straight and looked serious.

"I'm Junior Captain White Night, no proof for now, an officer added during the war. "

Su Xiao had nothing to prove his identity, however, he didn't need identification at all, the war had just ended, there were a lot of newly added officers, these officers didn't have an officer's certificate, as for impersonating an officer, ordinary people wouldn't do that, it was a capital offense.

A few soldiers looked at each other, they were a bit hesitant.

"This lord, I'm sorry, without an officer's certificate, you can't enter here for the time being."

A soldier stepped forward and said in a low voice, "My lord, there's nothing I can do, don't make it difficult for the little man ..."

There was already a pleading tone in that soldier's words.

"This method is good."

Su Xiao roughly guessed what was going on, needless to say, these soldiers were planted here by 'someone with a heart', now that the war in the Black Earth Fortress had just ended, the officers were busy and had no time to come back here, there was only one kind of person who would come here at this time, that is, the contracted people who wanted to exchange items with their battle credits.

Su Xiao only opened the war merit store after he got the officer position, so did those adventure group leaders, the squad leader can recruit 200 subordinates, this is actually for the equipment of the adventure group, the adventure group leader will recruit his subordinate group members as subordinate soldiers, that way he can help his subordinate group members to open the war merit store, and only when he opens the war merit store will the war merit be displayed.

The few soldiers blocking Su Xiao now were probably recruited by those group leaders as a way to block other contractors from seeing Nicholas Caesar.

Even if they couldn't block everyone, it would be good to block some of them, as military discipline was strict during wartime, most indentured servants wouldn't dare to make trouble.

Thinking of these, Su Xiao pushed aside the soldier in front of him and walked straight forward.

"Wait."

These soldiers did not shout words like 'stand still' or 'shoot on sight if you dare to approach', but subconsciously shouted 'wait', which made Su Xiao more certain that these soldiers were paper tigers.

Su Xiao's footsteps lurched and looked sideways at the soldiers, it was them who should be weak-hearted now.

"This lord villain ..."

A slightly older soldier walked forward.

"Any more nonsense and I'll kill you."

In the face of this deliberate obstruction, of course Su Xiao would not be polite.

"..."

A few soldiers retreated a few steps back, they had a feeling that if they blocked Su Xiao any more, they would really die, if they died now, it would be in vain, and they would also be burdened with a crime after death.

Su Xiao walked into the corridor on the 4th floor of the fortress, from afar he saw a dozen people standing within the corridor, seemingly waiting for something.

After seeing these people, Su Xiao recognized that these people were indentured servants, as there were 'acquaintances' among them, the pair of siblings that he had met outside the Quartermaster's tent earlier, and Su Xiao had sold the 'Bullhead Lord Armor' to the younger brother among them.

The dozen or so indentured servants all looked towards Su Xiao, these dozen or so people were split into four groups, which basically represented that there were still four adventuring groups left in the Black Earth Warzone.

Chapter 808: Su Xiao vs. Caesar

"Yo, acquaintance."

The blonde-haired imperial sister who had met before opened her mouth, beside her was the teenager who had bought the 'Bullhead Lord Arm Armor', the teenager's codename within the paradise was called Iron Pillar, a codename given to him by his older sister in the hope that he could survive within the cruel Reincarnation Paradise.

Iron Pillar's gaze towards Su Xiao was a bit 'ghostly', the reason being that there were more bandages on his body, just like a mummy.

"Gu Xiaosheng, it seems that your plan was not good, one of the ones that should have been blocked was not blocked."

The blonde haired imperial sister let out a light laugh, her eyes glancing obliquely at a young man who was leaning against the wall smoking a cigarette, he was Gu Xiaosheng, the leader of the Blood Wolf Adventure Group.

Gu Xiaosheng also glanced at the blonde imperial sister and let out a cold snort, he was clear that this was the blonde imperial sister helping him make enemies.

"I'm not like some people, when a bitch but also to set up a house of cards, if it is not forced by the situation, Thunderbird's revenge, I'll look for you to liquidate now, Nasha."

It turned out that the blonde imperial sister was called Nasha, and she also had an old grudge against the Blood Wolf Adventure Group.

"Both of you, calm down, and make peace."

A middle-aged fat man smiled and rounded up the situation, he was also the leader of an adventure group.

"I don't care what kind of grudges you guys have against each other, but in this world, whoever dares to infight, I'll be the first to get him killed."

A thinly built Law Master opened his mouth, and despite his thin figure, his aura was extremely strong, and the fire elemental beside him was dense to a terrifying degree.

Seeing this Law Master, Su Xiao remembered who the other party was, the other party was the one who used fire elements to form a giant middle finger in the 'Starry Sky Transit Station'.

When the Fire Master opened his mouth, Nasha and Gu Xiaosheng both stopped speaking, they seemed to be very jealous of this Fire Master, and they could not allow the two to not be jealous, the Fire Master was the leader of a large-scale adventuring troupe, although this large-scale adventuring troupe did not have the kind of scale of the Blood Sect and the Divine Emperor, but the number of people was quite a lot, moreover the Fire Master's strength was very strong, possessing three pieces of Dark Purple Law Suits, his strength was able to be ranked at the top of the second rank.

The four leaders were waiting, waiting for the war merit store to open, now that the clearing troops had returned to the Black Earth Fortress, this meant that it wasn't far from the opening of the camp store.

Several people stood in front of a wooden door, and from time to time, sounds and strange odors came out from within that wooden door.

A beautiful woman in OL dress with black framed glasses walked to the wooden door, she fully embodied what is called uniform | temptation | bewitchment, OL dress beautiful woman slightly organized grooming, she is the ministry of that Fire Master of the Law, a charisma specialists.

"Mr. Caesar? Do you have time now?"

OL dress beauty voice is very crispy, hear this voice, aside of the iron column little brother heart like a cat scratching, throat dry, however, our stingy, cunning, greedy, see the benefit and forget the righteousness of the Caesar brother does not eat the female | color this set.

"No time, wait."

Nicholas Caesar's voice came from inside the door, his tone was impatient.

"Then excuse me."

The smile on the OL dress beauty's face was a little too much to keep up, and she shook her head at the Fire Master, signaling that the Charm attribute was ineffective against Nicholas Caesar.

"Wait then."

The Fire Master was somewhat helpless, he had contacted Nicholas Caesar before, the other party was simply oily, he bribed the other party with a piece of blue equipment, however, it didn't work, Nicholas Caesar was enthusiastic for three seconds, then he selectively forgot about that piece of blue equipment that he had in his pocket, and acted as if he wasn't acquainted with the Fire Master.

Not only had the Fire Farseer suffered a loss on Nicholas Caesar, the other chiefs had also suffered more or less.

Su Xiao walked up and stood in front of the wooden door.

"This little handsome man, it's useless, wait with us."

The OL-suited beauty sized up Su Xiao for a while, and her intuition told her that Su Xiao was not a charisma specializer, instead, his charisma attribute was not high.

Su Xiao ignored that OL dress beauty as he clenched his right hand into a fist.

Thud, thud, thud.

Su Xiao slammed a few punches towards the door, sort of knocking on the door, the whole wooden door was dented a bit inwards by him, looking at this scene, those few chiefs were dumbfounded, their first reaction was, where is this frothing young man from, and this frothing young man is going to have bad luck.

"Who is it! My poor door, in the end is which chaos ..."

Caesar's shrill voice came from inside the door, and just by listening to it, one could tell how angry the miserly Mr. Caesar was, this was destroying his personal assets.

"It's me."

Hearing Su Xiao's voice, Caesar inside the door froze and turned to open the door of the room.

"My dear friend, when did you come? You've been waiting for a long time, right, quick, come in and sit down."

Caesar embedded the already warped door with a crack, that green face was filled with a cheap smile.

Su Xiao entered the room, and the dozen or so contractors couldn't sit still.

Bang!

The door to the room was tightly closed, and the door panel nearly slapped on the Fire Master's nose.

"This fucking ..."

For a moment, the Fire Mage didn't know what words to use to express his current mood, and several of the chiefs who were shut out of the door stared at each other wide-eyed.

"What to do? The Sacred Oak branches are going to be gone?"

"Not necessarily, the one who went in should be a lone warrior, gaining 16,000 battle merit alone is too much."

"16000 points? Isn't it 10,000 points?"

"Who said that? It's definitely 16,000 points."

The dozen or so contractors were talking.

"There shouldn't be any problem, the Reincarnation Paradise didn't prompt the Battle Merit Store to open, even if that person could enter the room, they couldn't redeem away the Sacred Oak Tree branches in advance."

The Fire Master was a little nervous, it was not true that his strength was strong, but he could not be hostile to his own contractors in this world, the consequences of hostility were very serious, so he could only obtain the [Sacred Oak Tree Branches] through formal means.

Thinking of this, the Fire Law Master was stifled for a while, he was right about the formal means, but the guy who entered the room, how did he look like he went through the back door.

Inside the room, Su Xiao looked around the room, Caesar's room had a large area, conservatively estimated to be more than four hundred square meters, a large test bench, several rows of neatly placed material shelves, as well as substances piled up in various parts of the room.

The bedroom, dining room and other facilities were all available, perhaps even Legion Chief Carlos' room would not have this kind of specification.

"Feel free to sit."

Caesar said this with his mouth, but in actuality, he threw the jacket he was wearing on the large leather couch and moved a broken wooden chair.

It wasn't the first time Su Xiao had dealt with Caesar, and he threw the jacket on the leather couch onto the wooden chair and leaned back on the couch with his entire body comfortably.

Although this thing looked like a sofa, it was actually a large wooden chair wrapped in several layers of animal skin, and it was very comfortable to sit on.

"My dear friend, Caesar has missed you."

[Hint:Quartermaster-Nicholas Caesar's favorability -5, existing favorability 90 points.]

Su Xiao ignored this prompt, Keith's goodwill didn't serve any purpose, this guy belonged to the category of not seeing the rabbit, trying to get benefits from Keyser based on goodwill was even harder than making Boo Boo Woof not demolish the house.

"Well, I 'miss' you too."

Somehow, Su Xiao's conscience actually ached a little after she said these words.

"Did you come to teach me alchemy? It must be, right? It must be, well, where do I start ..."

Caesar this 'question' to 'rhetorical question' to 'affirmation' to 'certainty' in one fell swoop, purposely to teach him alchemy.

If it was a Contractor who dealt with Caesar for the first time, he would most likely be hard-pressed by this 'four consecutive strikes' and impart Caesar's knowledge of alchemy in order to keep his goodwill.

"Not a bad idea, however it isn't."

Su Xiao was resolute.

[Hint: Quartermaster-Nicholas Caesar's favorability -20, existing favorability 70 points.]

Daily dropping of goodwill, Su Xiao felt that this was like a breeze on his face, he had no waves in his heart and even wanted to smoke a cigarette.

Caesar's face alternated between green and red, he clearly recognized that Su Xiao was even harder to deal with.

"My dear friend, you have worked hard to kill the enemy in the battlefield, Caesar has great reverence for warriors like you, wait for me."

Caesar walked towards the kitchen, Su Xiao's expression froze, feeling that things were not right.

Chapter 809: 'Nightmare' Goddess

Soon, Caesar came out of the kitchen with a bowl of soup in his hand, yes, exactly the kind of excretory system + urinary system mixed and boiled to make a strong | yang soup.

Su Xiao rarely resisted anything, and this bowl of soup, had already been blacklisted by him.

"This is the newly brewed 'Gerham' soup, try a bowl, my dear friend."

The pitch of the words 'dear friend' a few in Caesar's mouth rose significantly.

[Hint: Special plot character Nicholas Caesar invites you to drink 'Gerham Soup', if you refuse this invitation, your goodwill with special plot character Nicholas Caesar will be cleared, and you will not be authorized to use the War Merit Shop].

Seeing this prompt, the corner of Su Xiao's mouth twitched.

"Last time we discussed the main ingredient of Green Phosphorus ..."

As soon as Su Xiao's words fell, that 'multiple choice question' disappeared, and Caesar, with a cheap smile on his face, held his bowl and listened carefully to the alchemy knowledge imparted by Su Xiao while drinking soup.

Su Xiao's mastery of alchemy was not comparable to Caesar's, and Caesar listened as if he was mesmerized.

"For the most part, materials that contain fire attributes all have the same property. "

Su Xiao suddenly closed his mouth, Caesar who was listening attentively froze, the place where Su Xiao paused was too tricky, it was one half of the knowledge of an alchemy formula, Su Xiao both let Caesar understand the power of this alchemy formula and also did not let him fully understand this alchemy formula.

"After that, what comes after that!"

Caesar was jumping around anxiously, his current feeling could only be described as scratching his heart. This was Caesar's weakness, obsessed with alchemy.

"After what?"

Su Xiao's conscience ached again, because he could understand how hard it was for Caesar, it was like spending months chasing a very wonderful drama, and when it reached the highest | tide of the story, a line appeared on the screen, 'Due to lack of funds, this movie is closed', this kind of feeling, it was no longer as simple as smashing the computer.

"It's the formula after that!"

Caesar's eyes were red, his features twisted, itching to eat Su Xiao alive.

"It's been too long since I used alchemy, I forgot, maybe if I'm in a better mood, I'll be able to recall."
"

Su Xiao's answer left Caesar speechless, he hesitated for a moment, ran to the test bench and grabbed the list of supplies, handing it over to Su Xiao.

"Be quick, I'll buy you a few seconds at most."

Caesar walked towards the door of the room, and at the same time that Keith opened the door, Su Xiao received a prompt from Reincarnation Paradise.

[The Dragon Empire-Iron Blood Legion has successfully stationed at the Black Earth Fortress, and the camp store is open.]

The door to the room opened and a silhouette was the first to approach the room, it was Nasha.

"Gain-Stone Skin."

A low shout came out, a layer of gray stone skin appeared on Nasha who rushed at the front, this was a muscle building state that increased defense, but would reduce speed.

Nasha's speed was slowed down, and the Fire Master behind him rushed closer to the room, and he saw the list of supplies in Su Xiao's hand at a glance.

"Slow down. "

The Fire Law Master stared intently at Su Xiao, but Su Xiao simply ignored the other party.

[Alert: You have successfully exchanged 'Sacred Oak Tree Branches and Trunks', deducting 9,000 battle points].

Sacred Oak Tree Trunk arrived, Su Xiao sighed in relief, a piece of small finger long trunk appeared in his hand, this trunk became cylindrical, tiny wormholes could still be seen on the surface, the whole piece of trunk gave off a feeling of vitality, flashing with golden-green light.

An aroma of earth after the rain entered his nose, Su Xiao took a deep breath and turned the sacred oak tree trunk into the storage space.

What came into his hands, unless he died or willingly took it out, no one else could get it.

The fire mage rushed forward, his palm touched the list of supplies, two seconds later, the fire mage's face began to gloom, four seconds later, the golden quality staff [Duncan's Call] was exchanged away.

"Your name is White Night, right, I've heard of you, you have means."

The Law Master let out a long sigh of relief.

"What, you don't want me to hand over the Sacred Oak Tree branches."

Su Xiao had already gotten what he wanted, and as long as his Mana and Physical Attributes reached the expected values, he would use the Sacred Oak Tree Branch.

"If threats work, wouldn't getting stronger be pointless, I'm more curious about how you hooked up with the Quartermaster, threats with inferior skills are just barking dogs, let's go, if there's a chance in the future, we can work together."

The Fire Master walked towards the outside of the room, not uttering a threat, but instead offering to work together in the future if there was a chance, very generous.

"Can."

Su Xiao casually responded, although both sides were clear that future cooperation was unlikely.

The remaining three leaders had already rushed forward, and their demeanor varied when they saw the Sacred Oak Tree branches and trunks being redeemed away.

"What you just held in your hand is the Sacred Oak Tree Branch, right?"

Gu Xiaosheng stared at Su Xiao.

"Who knows."

Su Xiao snorted, he was now eager to sleep in peace.

"Make a bid, you should be a melee system, the biggest value of that thing is to increase the mana value, that is to say ..."

Before Gu Xiaosheng finished his words, Su Xiao waved his hand, for him, mana value was important.

"No way, it's just first come, first served, I'll be first, I'll be first."

It was impossible for Su Xiao to transfer the Sacred Oak Tree branch to someone else.

"There is no possibility."

Gu Xiaosheng had obviously made a lot of efforts for the Sacred Oak Tree Branch, and it was very unwilling to let him give up like this.

"You're very unwilling? "

"Yes."

Gu Xiaosheng was clearly not as atmospheric as that Fire Master and was unwilling to admit defeat.

"Since you don't want to admit defeat, you can find a way to kill me. "

Su Xiao looked at Gu Xiaosheng with a smile on his face, without being compelled by a mission, he would not take the initiative to provoke others, and he never wimped out if others came to provoke him.

Life and death is indifferent, if you don't serve, do it, this is Su Xiao's consistent creed.

Right now, Gu Xiaosheng had two choices, to feud with Su Xiao or to recognize his own bad luck.

"You're cheating."

Gu Xiaosheng was not a brain dead passerby, he could mix to such an extent within the Reincarnation Paradise and formed an adventure group, how could he be a brain dead, the things were in other people's hands, and now he had to not try to make a grudge.

"There really is no trade possible? Of course, I'm talking about a fair trade."

Gu Xiaosheng made a final struggle.

"No."

"Forget it then, cut, what kind of doorway did you go through."

Gu Xiaosheng shook his hand and threw away the cigarette in his hand, and began to exchange items with battle credits.

Su Xiao put the list of supplies aside and gazed at Nicholas Caesar.

"My dear friend, you should be in a good mood right now."

Caesar attentively brought Su Xiao a cup of water.

"Well, the mood is good."

Su Xiao finally cured Caesar, which put him in a better mood.

A dozen of contractors left with hurried footsteps after exchanging their items, the reason being that they were furious at the sight of Caesar, and what was even more irritating was that this guy couldn't be beaten or scolded, and had to be provided for like a grandpa.

After the contractors left, Su Xiao explained the second half of that alchemy formula to Caesar, who was finally satisfied.

Su Xiao was just about to get up and leave, when his eyes unintentionally glanced at the test bench, he was attracted by a tube of blood.

"Is that... blood?"

Su Xiao walked towards the test bench.

"Wait."

Caesar blocked Su Xiao with a serious expression.

"You can't touch that thing, if we don't solve the problem with that blood, there's a crazy woman who will kill me."

Caesar's face did not look good.

Although Su Xiao was a bit far away from that tube of blood, he sensed a familiar energy in that blood, and that energy was similar to demonic power.

"Whose blood is that?"

Su Xiao looked at that tube of blood.

"This ..."

Caesar began to hesitate.

A few minutes later, Su Xiao walked out of Caesar's room.

"Why does Carlos have demonic power in his blood, interesting. "

Su Xiao went to the 5th floor of the fortress and looked for an unoccupied room, as a squad leader, he had the right to choose a single unoccupied room on the 5th floor.

The room was only a dozen square meters in size, The furnishings were simple, a wooden bed and an iron cabinet.

Su Xiao locked the door of the room, put out the Apostle's Eye vigilance, lying on the wooden bed and fell asleep, he is too tired too tired, fatigue does not want to move a finger.

I don't know how long he slept, Su Xiao suddenly sensed a strange aura approaching, strangely enough, the Apostle's Eye actually didn't send out an alert, there is a possibility that the one approaching him is not a living creature.

Su Xiao sat up with a huff, a silver-haired loli wearing a white dress appeared in his room and was floating in mid-air like a ghost.

"Sure enough, doing what you do best is smooth. "

The silver-haired loli floating in mid-air spoke, her body somewhat transparent.

"Hello Blade Man, my name is Ruri, and I will be your 'nightmare' goddess for some time to come."

Chapter 810: molest

Chopping Dragon Flash appeared in Su Xiao's hand, he aimed a slash at Ruri's throat, he recognized the other party, this was the same silver haired girl who had escaped from him earlier.

The long knife chopped through Ruri's neck, Ruri did not panic, instead she laughed, since she was not a solid body, nor a spirit body, but a doppelganger made of special energy.

"It's been a long time, you sword man."

Ruri was the young girl who seemed to be fighting 'riding a peppermint' when Su Xiao had previously shattered her lower body with the Spider Queen.

"Accident?"

Ruri pinched her waist and looked around the room.

"You're not being treated very well, then again, this young lady may have been beaten half to death by you before, and now, it's payback time."

Su Xiao ignored Ruri's words as he climbed the Blue Steel Shadow energy onto the Chopping Dragon Flash and slashed again at Ruri.

However, it wasn't effective, Liuli's current state should be some sort of illusory doppelganger, the kind of energy that constituted her had an illusory nature, neither could it attack Su Xiao, Su Xiao couldn't attack the other party.

Most importantly, Su Xiao didn't feel any sense of threat, which basically means that Liuli's attack power is almost nothing.

"There's no need to waste your efforts, I don't have any aggressiveness, as a reward for not having aggressiveness, you can't break me in any way, even if you can, it doesn't matter, this kind of doppelganger's cost of construction is very low, the cost of construction is no more than a candy."

Lurie laughed a bitchy laugh.

"Are you here to negotiate or declare war? "

Su Xiao was a little confused as to the purpose of Ruri's use of her doppelganger to come here.

"Not really, by the way, to repeat the statement, my name is Ruri, remember that name, this is your 'nightmare' for the next few days."

"Nightmare?"

Su Xiao didn't care about Ruri's threat, the other party couldn't attack him, talk about nightmares.

Unbeknownst to Su Xiao, before Hoshi had told Ruri to do what she was best at, which was what she was doing now, which was what she was best at.

This ability of Liuli's is called Illusory Mirror Body, it has no attack power, it can penetrate most objects, and it is easy to go through walls or hide in the ground.

This was originally an ordinary detection ability, but in the hands of Ms. Liuli, who had a strange brain, this ordinary ability was no longer ordinary.

Although she couldn't attack the enemy. But from her fighting style, it was clear that this was a bitchy cute girl.

Liuli can't attack the enemy yes, but she can slut the enemy, she sings when the enemy sleeps, she pretends to vomit when the enemy eats, she gazes silently when the enemy goes to the toilet, in short, she does whatever the enemy is uncomfortable with.

With this kind of 'heartless' ability, Liuli tortured a third-ranked contractor to death in a certain large-scale world (developmental world), and that third-ranked contractor had no choice but to sign a mutual non-provocation treaty with Liuli.

"La la la la, my little flower~"

Liuli began to sing in the room, Su Xiao stared at the other party, he only had one feeling right now, it was very annoying, this bastard had already sung for more than an hour, what was even more disgusting was that this bastard specialized in picking one song, and his pentatonic voice was incomplete.

"You seem to be very angry, this is only an hour, don't worry, the mission in this world will continue for another twenty days, these twenty days with a cute girl like me accompanying you, you won't be 'lonely'."

Liuli floated in mid-air, covering her mouth with a smile, smiling charmingly, however, Su Xiao didn't feel charming.

Not to mention twenty days, this one just sang beside him for more than an hour, and he felt bad about his entire being.

"Your name is Liuli right."

"Hmmm, memorizing my name already? that's a good start, but... I'm not going to chat with you."

Liuli continued to sing, still something about little flowers, little grass, if Su Xiao didn't guess wrong, this damn should be a children's song.

Under the infinite brainwashing cycle of the children's songs, Su Xiao did not say rest, it was hard to quiet his mind.

Su Xiao sat cross-legged on the bed, trying his best to ignore the noise beside his ears, using meditation to calm his heart.

The noise beside his ears gradually faded away, and after three hours, Liuli's throat was dry, and Su Xiao was still sitting cross-legged on the bed with a calm demeanor.

"Is this guy wooden."

Liuli cleared her throat, honestly, singing all the time and trying to run out of tune, it was a physical job.

Su Xiao's eyes suddenly opened, and Ruri's heart rejoiced at the sight.

"You sing well."

Su Xiao got up and headed out of the room, it was Boo Boo Woof who had arrived near the fortress, moreover, Boo Boo Woof had brought back the World's Core!

"Singing ... well?"

Ruri flinched in mid-air, seeming a bit skeptical.

"A strong enemy, but this lady doesn't just sing."

Su Xiao walked in front and Ruri floated behind, as Ruri was an illusory doppelganger with no attack power, the soldiers inside the fortress did not care about her.

Su Xiao walked down the fortress from the exit of the inner side of the fortress, a long distance away, he saw Boo Boo Woof who ran quickly, after not seeing for a few days, Boo Boo Woof was obviously thinner, it should be that he had been out in the wind for a few days.

As the distance approached, Su Xiao realized that Boo Boo Woof was holding an object in his mouth, the object was snow-white in color, it should be some kind of creature.

"Not seeing you for a few days, you actually learned to hunt wild game."

Su Xiao was thinking that Bu Bu Wang had caught a wild rabbit of some sort.

Soon, Bu Bu Wang ran to Su Xiao, after not seeing him for a few days, Bu Bu Wang was unusually excited to see Su Xiao.

"Woof."

Bu Bu Wang flung a cat in his mouth to Su Xiao, Su Xiao looked down and saw that it was a pet cat that looked similar to a Ragdoll cat, at this moment, this cat was foaming at the mouth and its stomach was pumping.

Liuli, who was floating in mid-air, saw this cat, her pupils started to tighten, just an instant later, her expression returned to normal, a bitchy smile on her face.

"It seems... you recognize this cat?"

Su Xiao captured that momentary loss of concentration of Liuli.

"It's just someone's pet, I didn't expect that, but you actually got her here."

At this moment, Ruri prayed in her heart, she was praying that the beautiful cat called Bethany must not wake up, her thoughts rushed through her mind as she tried to think of a countermeasure to save Bethany.

The beautiful cat Bethany was not just a pet only, her owner's name was Xi, strangely enough, the relationship between Ruri and Bethany was even closer than the relationship between Xi and Bethany.

In Liuli's heart, Bethany is by no means a pet cat, this is a friend that she can trust her life, do not look at Liuli's character jumping out of the box, in reality, she has very few friends, Bethany is one of them.

Boo Boo Woof handed the [World's Core] held in his mouth to Su Xiao, Su Xiao got the [World's Core] without any hints appearing, the [World's Core] was about the size of a pinky cap, and the only attribute was that it couldn't be included in space-type items.

Su Xiao carried the [World's Core] with him and turned to look at the beautiful cat on the ground.

"Bu Bu, bite it to death."

Receiving Su Xiao's command, Boo Boo Woof ran forward, it had been looking at this cat for a long time, the reason why it brought it back was just to let Su Xiao judge whether this cat had any value or not.

Liuli's heartbeat accelerated, at this moment she knew that she had lost, at the same time her heart was glad to be here, otherwise Bethany would have died, and that wasn't the result she wanted to see.

"Wait, name your conditions."

Liuli floated in front of Besni and tried to block Bubuwang, but she was only an illusory doppelganger and couldn't block anything.
