

# The Ex-Husband's Revenge By Dragonsky

Chapter 2053

Chapter 2053

The next morning, Leon got up bright and early before he went to the top of the mountain behind the villa alone.

The night before, he already managed to reach the Golden Phase!

Based on the memories Leon inherited, it was time for him to start using sage techniques!

Just like martial techniques, they were a form of skill that could greatly increase one's combat ability!

The only difference was that martial artists used martial techniques, while sage art practitioners used sage techniques!

However, martial artists needed to be at the Almighty State before they could start using martial techniques!

Spiritual energy was much stronger than true energy!

As long as a sage was already at the Golden Phase, they could start training and using sage techniques!

Other than that, there was no big difference between sage techniques and martial techniques. From top to bottom Heavenly, Earthly, Black, and Basic were the classes of techniques, and they were all split into the Ultimate, Advanced, and Lower ranks.

The higher the rank and class of the techniques, the stronger they were!

Leon deliberately got up early to go to the mountain because he wanted to try out the effects of a few sage techniques!

After that, he shut his eyes and searched through his mind. He quickly picked out a few interesting sage techniques!

The first was the Ultimate Rank Earth Class technique, the Phantom Steps!

It was a very complex form of footwork. When it was used, it would greatly increase one's speed!

Lately, he had encountered quite a few strong opponents, and he had been much slower than them!

The footwork could make up for his lack of speed!

That was why he picked out that technique first!

The other technique was the Advanced Earth Class technique, Earthly Plunder! It was an incredible technique that condensed all one's power into a fingertip, unleashing an incredible attack!

The third one was the Ultimate Earth Class technique, Hurricane Break!

That was a technique with a wider area of effect. He could use it when he was facing multiple opponents!

The fourth technique was.

In the end, Leon picked out a few sage techniques. They were all basically in the Ultimate or Advanced Earth Class, and they were very impressive!

Of course, Leon's memories did not just have Earth Class techniques. He even had Heavenly Class Techniques!

However, he was just at the Golden Phase, and still far too weak to use any Heavenly Class techniques!

So, he was forced to choose Earth Class sage techniques instead!

"Let's try out Phantom Steps first!" Leon had a thought in mind. After that, he stepped forward and his body moved like the wind. He was incredibly quick, and managed to move five to six meters in the blink of an eye!

"Phantom Steps are amazing! It is an Earth Class sage technique!" Leon hissed with a happy smile on his face.

He could feel that his speed had at least increased by three or four times when he was using the technique!

However, the only problem was that, the higher rank a technique, the more powerful it was, and the more spiritual energy it would use!

He just used Phantom Steps for a moment, and there was already a clear loss of spiritual energy!

Even if he used everything he had, he would probably not be able to last for a few minutes!

"Let's try out Earthly Plunder!"

Leon walked in front of a large tree. After that, he summoned up his spiritual energy and pointed forward. The spiritual energy in his body began to condense into his fingertip. Then it shot out with a thunderous roar, shooting right at the tree!

Boom!

With a loud sound, there was a large hole in the middle of the tree, and it started to fall!
