

The Ex-Husband's Revenge By Dragonsky

Chapter 2210

Chapter 2210

"Sure! You'll need two-thousand points for the Fairy Fruit and any herbs that contain light energy will require three-thousand points. Which one do you need first? I'll get my men to start looking," Alfred agreed to the request right away.

"I need both, especially herbs that contain light energy. The more the better!" Leon said with a smile.

"The more the better? Do you have that many contribution points?" Alfred questions in confusion.

"Not yet, but I can kill other criminals if I run into them. That way. I'll have more contribution points!" Leon said.

He already reached the overall strength of the Intermediate Almighty State and even managed to kill the Scarlet Thief who ranked fourth place on the criminal list, so he was confident that he could hunt other criminals down in the future.

"I'm afraid that won't work!" Alfred shook his head.

"Why not?" Leon asked.

"You don't know this, but the Serpent Demon who ranked sixth place on the criminal list has been eliminated by Dragon Guards in the northern region a few months ago. The Phantom, who ranked fifth place, has also been killed by Dragon Guards in the eastern region a month ago and Zack participated in that attack! You have personally killed Asmodeus, the Poisonwielder, and the Scarlet Thief, so there are only three criminals left on the list and they are all hiding in the central region," Alfred explained.

"They are all in the central region? That's a bit tricky." Leon scowled.

Though a part of the southern region was connected to the central region, there was a distance of over a thousand miles to travel from the core of the southern region to the core of the central region.

Leon just managed to settle down in the southern region and did not intend on moving to the central region anytime soon, so there was no way that he could kill the other three criminals who were still alive.

Instantly, he realized why Alfred claimed that his idea would not work.

"It's far from tricky! These three criminals are the strongest ones on the list! They are all in the Advanced or Peak Almighty State, so they are far more powerful than the likes of the Scarlet Thief! Killing them in exchange for contribution is almost impossible!" Alfred added.

"The Advanced and Peak Almighty States? Really?" Leon gaped.

Since he managed to kill three criminals in a row recently, he started to underestimate the criminal list, only to realize that he grew too confident after learning that the top three criminals on the list were in the Advanced Almighty State or above.

The three criminals were even more powerful than the Southern Boss and Arthur, so Leon would not stand a chance.

Leon reached an overall strength of the Intermediate Almighty State and could barely rival martial artists in the Advanced Almighty State with little to no chance of winning. Hence, if Leon ran into a martial artist in the Peak Almighty State, he would not stand a chance of surviving.
