

The Ex-Husband's Revenge By Dragonsky

Chapter 2438

Chapter 2438

"Yes! Don't worry, Mister Wolf, we'll do our best to not disappoint you," Mason, Henry, and the others said.

"Sure! Let's all head back for now. Get ready tonight and starting tomorrow, you'll all be staying here," Leon said.

Just then, he recalled something and was hesitant to speak.

Regarding the restriction about the Heavenly Stars Method, there was a way to counter it.

When the light energy within Henry and the others reached its peak, he could find a treasure that contained dark energy to neutralize the light energy within them, thus helping them get past the Saint State.

Still, a treasure containing dark energy was hard to come by, and they only just started training with the Heavenly Stars Method, so Leon saw no hurry in informing them about this.

He could always wait until they reached the Saint State.

Confused by his silence, the others asked, "Mister Wolf, what's on your mind?"

"Oh, nothing! Let's go back!" Leon smiled and returned to the villa with Henry and the others.

Time flew and half a month passed.

During that time, Henry, Mason, and the others followed

Leon's order and trained using the Heavenly Stars Method tirelessly.

With the help of the Light Convergence and Energy Convergence Circles, they all made great progress with their training.

Meanwhile, Leon and his confidantes did not rest either.

During the day, they worked and handled matters in the companies. At night, they would gather around to train with the Spiritual Pearl.

Ruth, who was the most talented of them all, rose to the Semi-Emperor State with the help of the Motherwort Pill.

After training hard for some time, she broke through the barriers between states and rose to the Intermediate Emperor State.

Cynthia and Snow, on the other hand, both reached the Peak Overlord State and were a step away from reaching the Semi - Emperor State.

Once they reached that state, they could use the Supreme Pure Energy Pills to get to the Initial Emperor State.

Iris, who started her training later than the others, and Leon, who only focused on martial arts later on in life, both reached the Advanced Overlord State and were both close to reaching the Peak Overlord State.

Of course, there was also Roanne.

Angus agreed for her to continue her stay at Leon's villa and she trained with the group for the past weeks. Because of that, she also rose to the Advanced Emperor State from the Intermediate Emperor State.

With Leon, who studied sage art, as an exception, Iris and the others were mostly in the Overlord or Emperor State, which was still a far cry from the power of older generation martial artists. However, amongst the younger generation, they could all be considered some of the best martial artists, especially Roanne and Ruth, who were in the Intermediate and Advanced Emperor State.

Leon's situation was unique and apart from him, even Yuri, who was known to be the most talented martial artist of the youngest generation, couldn't compete with them.

This went to show just how talented Roanne and Ruth were.

With that, they spent most of their time training and working, and the group had a well-deserved period of peace.
