

The Ex-Husband's Revenge By Dragonsky

Chapter 246

Chapter 246

Of course, she planned for the worst as well. Even if she did not manage to subdue her opponent, as long as Leon managed to escape and contact Shears, their opponents probably would not dare to touch her!

“Know your place!” The leader sneered as he punched Cynthia with incredible force, hitting Cynthia’s attack!

Boom!

With an intense clash, the leader did not move at all.

Instead, Cynthia was sent flying as she fell on the ground heavily.

“Ugh...”

When she fell to the ground, Cynthia spat out a mouthful of blood.

“Intermediate... Innate State!” Cynthia was completely shocked, ignoring her wounds.

When they clashed earlier, she felt that her opponent was not only at the Initial Innate State, but the Intermediate Innate State!

That kind of skill would put him up there as a true expert among the younger generation in Springfield City!

“Cynthia, a—are you alright?”

Leon was shocked at the sight. He immediately avoided the attacks of the other four as he rushed right at Cynthia.

“Idiot, why haven’t you run away?!”

Cynthia was incredibly frustrated. She wanted to rip Leon apart at that moment.

She purposely pushed Leon away to give Leon a chance to run.

Yet, Leon wasted such a great chance!

It was obvious how angry she was!

“I’ll leave right now!” Leon immediately turned and ran toward the greenery.

He did not run away earlier because he did not want to leave Cynthia alone. He also felt like he would be able to deal with four peak Acquired State martial artists.

After looking at the leader’s immense skills, he realized that he underestimated them.

Even though he did not know how strong being at the intermediate Innate State was, he could feel like his skills were slightly worse than that man.

If they faced off alone, he might not be able to beat the leader.

The man even had four subordinates at the peak Acquired State. He would lose if they worked together!

If Leon was right, then the sage arts and martial arts came from the same origins. The two of them just had some slight differences in levels.

One stage of the sage arts was equal to two stages in martial arts.

With his current Advanced Meditation Phase, he would probably be in between the initial and intermediate stages of the Innate State.

He would be able to beat an Initial Innate State martial artist, but lose to an Intermediate Innate State one!

“Don’t let that brat run!”

The leader had a cold look in **his eyes** as he immediately orders his subordinates.

The four reacted very quickly. All of them rushed right at Leon.

The sides of the roads were filled with dense **trees**.

Leon had a frightened look on his face as he rushed into the trees. Darting around as he moved forward.

The four of them pursued him tightly, but every time they were about to catch Leon, Leon would use the trees to miraculously avoid them.

Looking at Leon slowly escaping, Cynthia had conflicted emotions in her heart. Even though she was the one who asked Leon to escape, she was still a girl in the end. She had some wishes and did not want to see Leon leave her alone so emotionlessly.
