

RICHEST MAN: GETTING 7 BILLION RED POCKETS TO START WITH

Chapter 301 - 301 Return the Same Words; A Luxury Yacht!

301 Return the Same Words; A Luxury Yacht!

What kind of eyes did Lin Fan have?

When the shop assistant introduced Fenghua, Qin Yuxuan's eyes lit up.

However, Lin Fan knew...

She was not moved by Fenghua at all but by the piece beside it... It was the watch in the middle.

The female shop assistant looked in the direction Lin Fan was pointing, and her heart skipped a beat.

"This is a limited edition watch—the Queen of Heaven. There are only five in the world.

"It was designed and researched by the famous designer, George Nivello, of the Patrick Phillippe Company. He spent ten years on it. A total of 365 natural colored diamonds are inlaid on the watch band and case, representing 365 days of eternal protection and support..."

Lin Fan nodded. Without waiting for her to finish, he took out a bank card and said, "I'll pay by card."

"Huh?"

The shop assistant was stunned.

The reason why she did not mention the price was because she wanted to say that this watch was very expensive.

She had a good impression of Lin Fan and did not want him to be mocked by others.

However, the shop assistant did not expect Lin Fan to directly take out his bank card just like the man.

The shop assistant hesitated and said, "The price of this watch is 31 million yuan."

Before Lin Fan could say anything, the man beside him had already started shouting.

"Quickly swipe the card! What the hell... Do you want me to call your manager over?"

The female shop assistant looked at Lin Fan again. Seeing that he did not say anything, she could only put the bank card on the machine and swipe it gently.

Beep!

With a soft sound, a receipt for 31 million yuan appeared.

It was a successful transaction!

At the same time, 3,100 red packets appeared on Lin Fan's phone.

The man was about to laugh out loud.

At this moment, he was completely frozen.

The transaction was successful!

He actually had 31 million yuan!

How was this possible?

Lin Fan glanced at the man and said calmly, "What you said just now was right. If you don't have the money to buy it, just say that. Otherwise, you'd only be pretending to be cool. In the eyes of those with money, such antics are simply ridiculous. You're simply a clown."

This was what the man said to Lin Fan earlier.

In the end, Lin Fan returned the same words to the man.

The man only felt that... his entire face seemed to have been slapped a few times.

It hurt!

The man wanted to retort, but he was powerless to do so. He could only lower his head and walk out.

As soon as he walked out of the store, the gorgeous woman next to him shouted, "I always thought you were a rich man, but you're actually a poor bastard! I've never been so embarrassed before!"

After saying that, she quickly walked in another direction.

The man opened his mouth, his face filled with helplessness.

When he saw Qin Yuxuan, he felt that the gorgeous woman was just trash.

In the end, even trash did not want to stay by his side.

...

Lin Fan did not care about any of this at all.

He held the dazzling Patek Philippe watch and slowly put it on Qin Yuxuan's jade-like wrist.

"Do you like it?" he asked with a smile.

Qin Yuxuan nodded her head vigorously. Then, she threw herself into Lin Fan's embrace.

At this moment, she was completely filled with sweetness.

After they left the store, the two of them held hands and continued to walk forward, letting the river breeze blow past them. It was refreshing and leisurely.

When Lin Fan raised his head, he could easily see a tall building not far away—Tomson Building.

Was this not the residential building that he had just obtained?

Lin Fan's heart was filled with curiosity toward this famous residential building.

Therefore, he held Qin Yuxuan's hand and walked into the neighborhood.

The price of the units in the Tomson Building was high.

On the one hand, it was because of the good location. On the other hand, the management and environment were very good as well.

The gate of the community was installed with a face recognition function, so outsiders could not enter at all.

Beep!

When Lin Fan walked to the gate, the gate opened with a soft sound.

The two security guards standing at the side quickly stood up straight as if they were soldiers who had seen their superior.

Lin Fan did not pay too much attention to that and walked to the building closest to the river.

Beep!

The gate of the building opened automatically again.

Seeing this...

The security guards looked at Lin Fan with even more respect.

This was because this building was bought by a mysterious person a long time ago.

After that, other than the cleaners and security guards, no one else had gone in.

This was also one of the reasons why there were very few houses in the Tomson Building.

At this moment, Lin Fan had gone into the area. The answer was obvious!

Lin Fan naturally did not know what the security guards were thinking.

He brought Qin Yuxuan into the spacious and gorgeous elevator.

The elevator went up, and it felt like they were on flat ground all along. It did not shake at all.

In less than ten seconds, Lin Fan and Qin Yuxuan arrived at the top floor.

Lin Fan pressed the password and unlocked the door.

With a soft sound, the door opened.

The living room, which was nearly 100 square meters, immediately appeared in their field of vision.

The setting sun shone through the French windows, illuminating the luxurious modern furniture. At the same time, it also illuminated Qin Yuxuan's beautiful eyes.

"Yuxuan, you can stay here from now on."

Qin Yuxuan's delicate body trembled slightly. This was happiness, pure happiness!

She gently opened her cherry lips and said, “Lin Fan.”

Then, she could not help but spread her arms and throw herself into Lin Fan’s embrace.

o(̄ε̄*)

(*̄3)(ε̄*)

...

Tomson Building No. 1, which had been silent for a long time, became extremely lively today.

...

The next day, when Lin Fan opened his eyes, Qin Yuxuan was still lying on the bed in a deep sleep.

This was normal...

She had been too tired the past two days.

Hence, Lin Fan did not disturb her.

He tiptoed to the living room alone.

He first called Fumando to send some delicacies over.

Then, his gaze fell on the check-in system.

“Yesterday, I obtained a Tomson Building No. 1. Let’s see what I can get today.”

“Sign in!”

[Ding! Congratulations, you’ve received a luxury yacht—Solange!]

Seeing this...

Lin Fan’s eyes lit up.

Not long ago, he accidentally saw the news about Solange.

It was 86 meters long and had a total of eight VIP cabins. Rather than calling it a yacht, it was more like a water fortress!

The price had even reached 1.2 billion yuan!

Now, this luxury yacht belonged to him?

Lin Fan owned a high-end residential area, a luxurious villa, a super sports car, and even a helicopter!

However, to be honest... this was the first time he had obtained a luxury yacht!

At this moment, Qin Yuxuan walked into the living room and hugged Lin Fan from behind.

Lin Fan patted her gently and said, "It's been hard on you these two days. Why didn't you sleep more?"

Hard on her?

Qin Yuxuan's pretty face blushed slightly, and then she said softly, "I've rested well enough."

At this moment, the phone in Qin Yuxuan's pocket rang.

302 Discussion on Team-Building; Begin!

Qin Yuxuan looked at the caller ID. It was Senior Lu.

Therefore, she answered the call without any hesitation.

"Yuxuan, are you with Lin Fan?" Senior Lu asked.

"Yes, what's the matter, Senior Lu?" Qin Yuxuan asked.

"Oh, didn't we receive a lot of big orders recently? Yesterday, everyone worked overtime and we've basically finished dealing with the matters in the early stages.

“There will be a lot of things to do later... Therefore, I was thinking that I should organize a team-building event in the next one or two days so that everyone can have fun and relax... What do you think?”

Qin Yuxuan was a person who was motivated and had great management talent.

She knew very well that she had to be lax in the management of the employees.

Otherwise, there would be problems.

Ever since the company was established, there had never been any team-building activities.

Besides, just like Senior Lu said, the entire company would be very busy soon.

Before that, the team-building event could allow the employees to relax. At the same time, it could also cultivate a tacit understanding between the employees and increase their work efficiency in the future. This was a good thing.

“I think it’s a good idea.” Qin Yuxuan replied.

Senior Lu said happily, “I knew that you’d agree!”

“Alright, you two can continue being sweet. I won’t disturb you anymore.”

After saying that, she hung up the phone.

Lin Fan heard the conversation.

“If it’s a team-building event, I have a good place in mind... How about I help arrange it?” Lin Fan said.

Qin Yuxuan had absolute trust in Lin Fan. Without any hesitation, she nodded and said, “Alright!”

At this moment, Lin Fan’s phone rang.

However, it was an unknown number.

“Hello, is this Mr. Lin Fan?” A slightly respectful voice came from the phone.

Lin Fan said, “It’s me. And you are?”

“The Solange luxury yacht you ordered has arrived at the port of Modu. You can go and check it at any time... Also, do you have any other questions or need any help?”

Wan Bo had a certain status in the company.

However, he knew very well that he was nothing in front of a person who had ordered Solange.

Therefore, his tone was extremely respectful.

Lin Fan's face revealed an expression that seemed to say, 'I knew it'. He said, "Alright... I might need to use it to go out to sea and hold a party in the next two days. Can you help me find some crew members and waiters?"

"Of course. If you need anything, you can call me anytime," Wan Bo said.

After Lin Fan hung up, he said to Qin Yuxuan, "I've already made the arrangements. Now it's up to you when you want to hold it."

"I'll ask Senior Lu and the others."

Lin Fan and Qin Yuxuan did not go out for the entire day.

The two of them were like a young couple on vacation. They ate together, watched TV together, and...

It was very relaxing and warm.

...

In the blink of an eye, it was the second day.

When the morning sun rose, Qin Yuxuan drove the Mini Cooper and brought Lin Fan to the Global Financial Tower.

At this moment, all the employees of Fan Yu Investment were waiting downstairs with their backpacks, sunglasses, and hats on their faces.

That was because today was the day of Fan Yu Investment's team-building event!

When they saw Qin Yuxuan and Lin Fan getting out of the Mini Cooper, they shouted, "Hello, Mr. Lin. Hello, President Qin!"

Evidently, everyone had some understanding of Lin Fan's identity.

"Today is the day of our Fan Yu Investment's team-building event," Qin Yuxuan cleared her throat and said. "There's no boss or leader today. Everyone is friends. Later, we'll have a good meal and have fun together!"

"Alright!" Everyone shouted in unison.

At this moment, a Mercedes-Benz luxury bus drove over from afar and stopped in front of everyone.

“The bus has arrived. Let’s set off!” Qin Yuxuan said.”

The Global Financial Tower was not far from the dock. In just half an hour, everyone could already see the blue sea.

After getting out of the bus, everyone welcomed the sea breeze, their faces filled with satisfaction.

At this moment, a man in a suit walked over from afar and said respectfully to Lin Fan, “Mr. Lin, this way please.”

He... was Wan Bo, the manager of the company who called Lin Fan yesterday.

Lin Fan nodded his head and walked forward.

This was a dock, and there were many boats and yachts docked by the river bank.

Everyone walked and watched, occasionally letting out a burst of discussion.

“That ship is quite beautiful.”

“There are actually so many ships docked here...”

“Modu’s housing prices are so expensive. What do you think about buying a ship and using it as a house?”

“You have to be really rich. That’s because they had to pay at least a six-figure management fee to dock here for a year.”

“Hiss! I was too hasty.”

Someone suddenly shouted, “Wow! Look, that ship over there is so cool! It’s even cooler than the ships in movies!”

“It’s so cool! It would be great if we board it and take a look.”

“Board it? Don’t think about it.”

“This is Solange, a luxury yacht!”

“That’s right! It’s Solange! I saw this yacht in a magazine two days ago. The price is 1.2 billion yuan!”

“1.2 billion? Hiss!”

Lin Fan heard everything everyone said.

He smiled and touched his nose. “Since everyone likes this yacht so much, let’s get on it.”

Many of the employees looked puzzled.

Lin Fan smiled. "We're going to have our team-building event on this yacht today."

Silence!

The entire scene was silent!

Everyone's faces were filled with horror.

One had to know...

They had just heard that this yacht was called Solange! It was worth 1.2 billion!

Of course, even if they did not know all this, just the exterior of the yacht was enough to shock them.

Yesterday, everyone already knew that they were going to hold a team-building event at sea.

This made everyone extremely happy.

However, everyone thought that they were just going to rent a dilapidated boat or buy tickets to hop on board a large cruise...

However, it turned out to be a tall luxury yacht?

This... Were they dreaming?

Everyone was still in disbelief.

At that moment, the attendants on Solange seemed to be confirming Lin Fan's words. They got off the yacht one after another, bowed, and said in an extremely respectful tone, "Welcome, everyone! I wish everyone a happy time!"

303 Surprised; Look Down On!

The employees of Fan Yu Investment finally boarded Solange with endless anticipation and surprise.

Just by looking at the exterior of Solange, everyone was already amazed.

When they arrived on the yacht, everyone's mouths were wide open.

A spacious restaurant, bar, high-end KTV, spa, surround-sound cinema, heated swimming pool, luxurious lounge... There was everything that one could dream of!

How was this a yacht?

It was a moving castle!

Lin Fan said, "On the yacht, everything you eat, drink, play, and use... will be provided for free!"

Then, Lin Fan said, "Set sail!"

After the engine roared, the entire luxury yacht was like a dragon that braved the wind and waves as it flew into the distance.

At the same time, the employees of Fan Yu Investment cheered enthusiastically.

Some of them jumped into the heated swimming pool enthusiastically.

Some lay on rattan chairs and rested comfortably.

Some walked into the spa to relax.

...

Soon, the entire luxury yacht was filled with excited discussions.

"Remy Martin, Ace of Hearts! There are actually tens of thousands of bottles of good liquor on the ship! Heavens!"

"Japanese beef, king crab, Australian lobster, sea cucumber, abalone... Moreover, it was so delicious! It's really delicious!"

"The spa is too comfortable!"

...

Solange had just arrived at the port of Modu yesterday. It was difficult for ordinary people to store so much food and wine immediately.

However, Lin Fan owned the three-star Michelin restaurant, Fumando, so it was naturally very simple.

In fact, this was also the reason why everyone felt that the food was delicious.

One had to know...

The food was cooked by a chef from a three-star Michelin restaurant. How could the taste be bad?

Qin Yuxuan lay on the chair and looked at the boundless sea in the distance. She felt relaxed and happy.

She listened to the sounds of the employees playing around, and her gaze fell on Lin Fan. She slowly leaned over.

Happiness, satisfaction, sweetness!

...

In fact, Solange was not the only yacht on the sea at this time.

Not far away, there was also a yacht floating.

Of course, this yacht was far inferior to Solange in terms of size and luxury.

A group of men and women were standing on the deck of the yacht, enjoying the sea breeze and drinking wine. Their expressions were very smug.

"Fine wine, delicious food, five-star suites... All of them! Young Master Liu, your yacht is really good!" A round-faced man praised.

"Of course!" Liu Sheng said proudly. "I spent 300 million yuan to buy this yacht from Brazil. There's no better yacht in the entire Modu!"

“Young Master Huang seems to be very satisfied with this yacht. Congratulations, Young Master Liu!” the round-faced man said.

Liu Sheng said, “We’re all playing and having fun together. What’s there to congratulate?”

Even though he said so, the smile on his face clearly showed that he was in agreement! This was something worth congratulating!

At this moment, a luxurious, magnificent, and extremely cool yacht suddenly sailed over from afar.

Someone immediately shouted, “F*ck!” What a cool yacht!”

“And it’s so big!”

“This can even be called a moving castle!”

Many people stood up and clicked their tongues in wonder.

Liu Sheng’s face was a little dark.

He had just said that there was no yacht better than his in Modu.

However, a yacht that far surpassed his appeared almost immediately?

Did he have to be slapped in the face like this?

At this moment, the round-faced man beside him shouted, “Hey, friends, are you from Modu too? Is this a banquet?”

An employee said, “We’re from Fan Yu Investment, and this is a team-building event.”

Team-building event?

The round-faced man was stunned

On such a luxurious yacht?

Also, he had never heard of Fan Yu Investment before.

Liu Sheng's expression turned slightly better when he heard that.

A team-building event for an unknown small company...

Then, perhaps this yacht was just for show.

Moreover, it was definitely rented!

Hence, Liu Sheng slowly raised his head and looked into Solange.

In the next moment...

Liu Sheng's eyes lit up slightly as they locked onto Qin Yuxuan on the deck.

What a beauty!

What a perfect figure!

Exquisite facial features!

However, he saw Lin Fan hugging Qin Yuxuan.

Liu Sheng immediately felt a strong sense of jealousy.

Why?

Why did such a beautiful woman become someone else's woman?

Just because he was handsome?

Liu Sheng took a deep breath and shouted at Lin Fan, "Bro, you should have heard of Fenglin Real Estate, right? That's my family's. My name is Liu Sheng. It's rare for us to meet today. How about being friends?"

"In the future, if you want to use a yacht, you can use this luxury yacht that I bought from Brazil for 300 million yuan."

The rich second-generation heirs in movies and novels were mostly unreasonable.

In reality, though?

Most of them were very smart like Liu Sheng.

Although his target was Qin Yuxuan, he was introducing himself to Lin Fan and mentioned how powerful his family was and how they owned an expensive yacht.

He believed that Lin Fan would be like a pug, wagging his tail and begging for mercy.

On the other hand, Qin Yuxuan would be endlessly in love with him and want to cling to him.

This... was the charm of money!

Liu Sheng had many similar experiences. He believed that this time would not be an exception.

However...

What Liu Sheng did not know was that after he said those words, Lin Fan just casually glanced at him as if he was looking at an idiot.

A luxury yacht worth 300 million yuan?

A mere 300 million yuan was enough for a ship to be considered a luxury yacht?

His yacht was worth 1.2 billion yuan!

Could he not see the difference between his yacht and this one?

Why was he so blindly confident?

“Fenglin Real Estate?” Lin Fan said calmly. “Never heard of it.”

“As for making friends? Not interested.”

He was not spouting nonsense.

Fenglin Real Estate was indeed quite famous in Modu.

However, Lin Fan was not from Modu. Other than the famous Tomson Building, he had not heard of any other places.

Liu Sheng's face darkened.

He did not expect Lin Fan to reply like this.

“Bro, I’ve already introduced myself. Aren’t you looking down on me by not replying?”

Lin Fan raised his eyes and said, “You can tell? I am looking down on you a little.”

He was not spouting nonsense.

One had to know... With Lin Fan's current status, there were not many people that he looked up to.

Of course, under normal circumstances, Lin Fan would not say that.

It was mainly because he had seen through his evil intentions for Qin Yuxuan.

Since that was the case, Lin Fan naturally would not hold back either.

304 Humiliation; What Are You Fighting About?!

The reason why Liu Sheng took the initiative to use his own yacht to hold this party at sea was to make himself look good in front of the rich second-generation heirs.

However, look at what happened now.

Now... he was actually looked down upon in public.

Humiliation!

A blatant humiliation!

Even though Liu Sheng had received the best education since he was young, he could not help but feel angry at this moment.

He put away his initial amiable expression and said coldly, “Kid, what did you say?!”

Lin Fan said calmly, “I said, I look down on you.”

“Very well! Kid, you have guts! In Modu, no one has ever said that to me! Fan Yu Investment? I’ll remember it! I’ll definitely make you regret it!” Liu Sheng said sternly.

He had already decided that once he returned to shore, he would look for Lin Fan and teach him a lesson.

At this moment, dull footsteps sounded from the cabin.

“What’s going on outside?”

Before the person arrived, their unhappy voice was heard.

Then, a tall figure walked onto the deck.

When Liu Sheng and the others saw him, they respectfully said, “Hello, Young Master Huang.”

“Young Master Huang.”

The moment Lin Fan caught sight of this person, a strange look appeared on his face.

This so-called Young Master Huang was Huang Tian, whom he had met at Hu Tian’s grandfather’s banquet not long ago.

Huang Tian only nodded slowly in response to everyone’s greetings.

“Young Master Huang, I’m sorry for disturbing you. We just met a brat who doesn’t know his place...”

Huang Tian looked in the direction that Liu Sheng was pointing.

In the next moment...

Huang Tian’s pupils constricted.

Lin Fan!

He was an existence that Huang Tian would never forget!

The moment Huang Tian saw Lin Fan, he seemed to recall the scene of his father bringing him to apologize to Lin Fan.

Huang Tian’s butt and nose started to hurt when he thought about what happened that day.

In fact, Huang Tian had come to Modu for a reason.

A large part of the reason was to come out to relax so that he could forget the miserable memories of that day.

In the end... he actually met Lin Fan again!

Liu Sheng continued, "Young Master Huang, don't worry. When we return to Modu, I'll teach this dog a lesson."

Dog?

He scolded Lin Fan, whom even his father had to treat respectfully, and called him a dog?

He... How dare he?

He was standing together with Liu Sheng. What if Lin Fan thought that they were good friends?

In fact, Lin Fan might even think that... these words were instigated by him... What should he do then?

Huang Tian's forehead immediately broke out in a layer of sweat.

If he was misunderstood, it would be a disaster—a terrible disaster!

"Shut up!"

Huang Tian shouted and slapped Liu Sheng's face.

A crisp sound echoed on the deck.

Everyone on the yacht was stunned.

An obvious palm print quickly appeared on Liu Sheng's face, and his cheek gradually became red and swollen.

However, Huang Tian seemed to think that it was not enough.

Hence, he kicked Liu Sheng to the ground and started punching and kicking him.

A moment later...

Huang Tian bowed and said respectfully, "Mr. Lin, I have nothing to do with this guy... He actually dared to insult you... I'm sorry to have disturbed you..."

Silence.

The entire scene was silent.

The rich second-generation heirs on the yacht all revealed obvious looks of surprise on their faces.

They knew each other very well.

Who was Huang Tian?

Even in the entire Hua Nation, he was still a first-class young master!

This was because the Huang family not only had great power in the political world but also in the business world.

However...

Huang Tian actually beat up Liu Sheng for Mr. Lin.

Then, he even took the initiative to bow and apologize to Mr. Lin?

Who was this Mr. Lin?

What kind of strength did he possess?

Lin Fan glanced at Huang Tian and said calmly, "Huang Tian, you have to be more careful when making friends in the future."

His tone was like that of a high and mighty elder.

Huang Tian did not feel awkward at all.

On the contrary, he was very happy and quickly said, "Yes, yes... In the future, I'll definitely be more careful."

...

A loud whistle sounded not far away.

A business yacht slowly sailed over from afar.

The bald man standing on the deck laughed heartily. "It really is my family's yacht!"

This bald man was Liu Sheng's father, Liu Jianqiang.

The surrounding middle-aged men in suits and leather shoes could not help but look over.

The chairman of Tiantian Bank, Huang Jiayi, was also among them.

Liu Jianqiang said, "Chairman Huang, when we have time, let's take that yacht and go fishing at sea together. What do you think?"

Huang Jiayi nodded.

Seeing this...

Liu Jianqiang was secretly delighted.

Then, Liu Jianqiang pointed at Liu Sheng on the yacht in the distance and said, "Look, my son is up there!"

Obviously, Liu Jianqiang was giving his son a chance to show his face.

One had to know...

The people standing beside him all had extraordinary backgrounds!

As long as his son left a small impression in their hearts, it might bring endless benefits in the future.

At this moment, Liu Jianqiang saw that his son had been slapped.

Then, he was punched and kicked.

The smile on Liu Jianqiang's face instantly disappeared. He shouted, "Why did you hit my son?!"

This shout attracted the attention of Huang Tian, Lin Fan, and the others on the two yachts.

When Lin Fan turned around, Huang Jiayi saw him too.

His heart skipped a beat, and he said respectfully, "Hello, Mr. Lin!"

This made Liu Jianqiang, who was originally arrogant, slightly stunned. It made the others on the yacht reveal a touch of surprise.

One had to know...

Huang Jiayi was the chairman of the largest private bank in China, Tiantian Bank.

Others always treated him respectfully and kept trying to please him.

When had they ever seen Huang Jiayi treat others with such respect?

Moreover, it was to a young man who looked to be in his 20s.

"Oh, it's you, Old Huang..." Lin Fan said.

Old Huang?

Calling the chairman of Tiantian Bank... Old Huang?

The middle-aged men on the business yacht were even more shocked.

At the same time, they started to guess Lin Fan's identity.

At this moment, Liu Sheng got up from the ground.

Everyone had a temper.

He was beaten up and saw his father not far away.

He no longer cared about Huang Tian's and Lin Fan's identities.

He pointed at the two of them and shouted, “Bastards, how dare you humiliate and hit me?!”

305 Anger; Return!

Huang Jiayi’s face darkened. He looked at Liu Jianqiang and Liu Sheng coldly.

He did not know what had happened.

However, Liu Sheng actually dared to insult Lin Fan. That was unforgivable.

Liu Jianqiang noticed the change in Huang Jiayi’s expression, and his heart skipped a beat.

When he saw how respectful Huang Jiayi was to Lin Fan, Liu Jianqiang was already thinking about how to please Lin Fan.

Now... what should he do?

At this moment, Liu Jianqiang did not care if Liu Sheng had been beaten up.

He hesitated and said, “Mr. Lin, there must be a misunderstanding between you and my son. He didn’t mean to scold you...”

Lin Fan glanced at Liu Jianqiang and said, “Misunderstanding? Did I misunderstand him for wanting to steal my girlfriend and threatening me?”

Stealing Lin Fan’s girlfriend and threatening him?

What a... bastard!

Huang Jiayi glanced at Liu Jianqiang and Liu Sheng coldly before grunting.

Liu Jianqiang’s body trembled slightly as he said, “C-Chairman Huang, this matter...”

Huang Jiayi did not wait for him to finish and interrupted him, “You don’t have to say anything anymore! From now on, our Tiantian Bank will not lend a single cent to your company!

“In addition, the previous loans must be repaid immediately!”

When Liu Jianqiang heard this, it was as if his strength had been instantly sucked dry, and his face was pale.

One had to know...

His Fenglin Real Estate was short of money.

Today, the main reason why he was traveling with the entrepreneurs was to get closer to the chairman of Tiantian Bank, Huang Jiayi.

This would make it easier to get some loans from the bank.

Now?

Now, not only could he not get a loan, but he also had to repay the previous loans immediately.

Liu Jianqiang felt the world spin.

Liu Sheng obviously had not expected this. He said again, "Our Liu family is not to be trifled with!"

When Liu Jianqiang heard this, he was like a tiger that had been slapped on the butt.

He... He was completely furious.

It was him. It was all this brat's fault!

Otherwise, none of this would have happened!

Hence, Liu Jianqiang pointed to the front and shouted, "Captain, help me get close!"

Then, Liu Jianqiang jumped in front of Liu Sheng and raised his hand to slap his face.

"Bastard!

"Who told you to cause trouble for me?"

"Bastard!"

As he hit, he cursed. He was furious to the extreme.

Regarding what was happening...

Lin Fan only took a few casual glances before continuing to admire the beautiful scenery in the distance with Qin Yuxuan.

Everyone in Fan Yu Investment was extremely happy and satisfied with this team-building event.

At the same time, the employees became more familiar with each other and understood each other better.

As for Lin Fan, he did not stay in Modu any longer.

After all, he was still a student.

After sending Lin Fan to the airport, Qin Yuxuan returned to the Global Financial Tower.

Senior Lu sighed. "Yuxuan, your boyfriend is really amazing. He actually owns the entire Global Financial Tower. Moreover, he's the major shareholder of Tiantian Bank. He also has such a luxurious yacht!"

When Senior Lu said this, her eyes sparkled.

"By the way, did he take you shopping yesterday?" Senior Lu asked after a pause. "Did he give you anything?"

"He bought me a watch."

As she spoke, Qin Yuxuan raised her wrist.

"He only bought a watch for you? Heavens! This is very pretty! How much was it?" Senior Lu bombarded her with questions.

As a woman, she could not resist such a beautiful watch.

"This is a Patek Phillippe watch. It costs 31 million yuan," Qin Yuxuan said.

"31 million!" Senior Lu shouted out loud.

Initially, she wanted Qin Yuxuan to take off her watch for her to take a look.

At this moment, she completely dispelled this thought.

A watch worth 31 million yuan, what if... If she accidentally knocked it to the ground, what should she do?

"Also, he gave me a unit in Tomson Building No. 1 to live in," Qin Yuxuan added.

"Tomson Building No. 1!" Senior Lu's eyes instantly widened.

She had been living in Modu for a long time, so she knew how expensive a house in Tomson Building was.

The price of one unit was at least 100 million!

He bought a house worth more than 100 million and a watch worth 31 million.

How could she not scream?

After a long time, Senior Lu finally regained her composure and said, "Yuxuan, does your boyfriend have a younger brother?"

Qin Yuxuan could not help but think of her former roommate who had said something similar. She could not help but smile. "He only has one sister."

"A sister?" Senior Lu asked. "Actually, I don't have gender preferences."

Qin Yuxuan was speechless.

...

Naturally, Lin Fan had no idea about the conversation between Qin Yuxuan and Senior Lu.

After he had a good night's sleep in the first-class cabin, he arrived in Jiangbei.

Then, Lin Fan drove the Mercedes-Benz back to the Coiling Dragon Villa.

He first brewed a cup of Spirit Tea.

As the Spirit Tea entered his stomach, his mouth was filled with its aroma, and he felt refreshed. In an instant, all the fatigue he had felt over the past few days was swept away.

Lin Fan put down his teacup and took out his phone. His gaze landed on the 3,178 red packets.

The 3,100 red packets were from buying Qin Yuxuan a Patek Philippe watch.

The remaining 78 red packets were from his recent expenses.

"3,178 red packets. Let's see what I can get," Lin Fan muttered.

"Open!"

[Ding! Congratulations, you've received 9 yuan.]

[Ding! Congratulations, you've received 1,000 yuan.]

...

[Ding! Congratulations, you've received a double shares coupon.]

...

[Ding! Congratulations, you've obtained 10% of Omar Group's shares.]

...

[Ding! Congratulations, you've obtained the skill—Turtle Breathing Technique.]

...

[Ding! Congratulations, you've received 19,999 yuan.]

Lin Fan received a total of 1,321,201 yuan from these 3,178 red packets.

Lin Fan chose to ignore this bit of money.

He first set his eyes on the double shares coupon.

Previously, Lin Fan used a double shares coupon on Penguin Group, which gave him a total of 20% of Penguin Group's shares.

Wanting to give equal treatment, Lin Fan chose Little Tanuki Group this time.

[Ding! The coupon was used successfully. You now own 20% of Little Tanuki Group's shares.]

Instantly, he gained 10% of Little Tanuki Group's shares. Lin Fan's assets increased by another 500 billion yuan.

Omar Group was the world's largest department store with a market value of 1.4 trillion yuan.

10% of the shares, which was 140 billion yuan, was not bad.

Finally, Lin Fan's gaze landed on Turtle Breathing Technique.

[Turtle Breathing Technique: A special skill that consumes fat, sugar, and other energy in the body to replace oxygen breathing. You don't need to breathe to live well, and from there, you can display your infinite charm!]

Seeing this...

Lin Fan's lips curled up slightly.

Turtle Breathing Technique was definitely a very good skill!

306 Triggered; Watch the Experiment!

The next day, the weather was clear.

Lin Fan drove the Mercedes-Benz, facing the cool morning breeze as he continued forward.

Soon, he arrived at Jiangbei University.

It was the old professor's class in the morning.

Even though Lin Fan had rested well yesterday, listening to the old professor's slow, lullaby-like lecture, he quickly fell asleep on the table.

Regarding this...

Not only was the old professor not angry, but he even nodded at Lin Fan.

That look seemed to be saying, 'He's the model of a good student!'

After the bell rang, the morning class ended.

Lin Fan, Song Yi, Ma Zhong, and Zheng Jinbao walked out together.

When the four of them walked to a corner up ahead, they accidentally bumped into a middle-aged professor with slightly white hair.

Suddenly, the stack of documents in the middle-aged professor's hands fell to the ground.

"I'm sorry, Professor..." Ma Zhong hurriedly said.

Then, he squatted down to pick up the information.

Lin Fan, Zheng Jinbao, and Song Yi also bent down to help.

The middle-aged professor was very amiable and said, "It's okay... I was thinking about something while walking and wasn't paying attention to what was in front of me."

When Lin Fan picked up some of the documents, he casually glanced at the information.

Negative: $4\text{Li} - 4e = 4\text{Li}^+$

Positive pole: $2\text{SOCl}_2 + 4e = 4\text{Cl}^- + \text{S} + \text{SO}_2$

Total reaction: $4\text{Li} + 2\text{SOCl}_2 = 4\text{LiCl} + \text{S} + \text{SO}_2$

...

"Thank you," said the middle-aged professor.

Ma Zhong had obviously seen the information as well. He could not help but ask, "Professor, are you doing a battery research project?"

Their conversation was very short, but Lin Fan's expression changed slightly.

In his mind... a clear notification suddenly sounded.

[Ding! Mission triggered: Watch a battery experiment (0/1). Read Battery Principles, Battery Handbook, Lithium-ion Batteries, Polymer Batteries, and Battery Structure and Principles (0/5). Reward: A super battery patent, manufacturing principle, and complete thesis.]

The middle-aged professor took the materials and turned to leave.

At this moment, Lin Fan said, "Professor, may I know your name?"

"My surname is Zhao," the middle-aged professor said.

"Hello, Professor Zhao. I'm Lin Fan from the Mathematics Department. I'm also interested in batteries. Can you take me to the laboratory to have a look? It would be best if you'll let me watch the specific experiment," Lin Fan said.

In fact...

When Professor Zhao saw Lin Fan for the first time, he felt that he was familiar.

After hearing Lin Fan's self-introduction, his eyes lit up.

Lin Fan from the Mathematics Department...

It could be said that everyone at Jiangbei University had heard of this name!

It was just that Lin Fan never accepted interviews. Many people did not know what he looked like.

Professor Zhao had only seen Lin Fan from afar once. Otherwise, he would have recognized Lin Fan immediately.

Professor Zhao did not hesitate at all and hurriedly said, "Alright, I'll take you to the laboratory now."

His experiment topic was considered confidential.

Lin Fan was just a mathematics student.

However, so what?

One had to know...

Lin Fan had even developed an earthquake prediction device!

He was not a physics student!

With a smart brain, no matter what he did, he would be able to achieve twice the result with half the effort and discover things that ordinary people could not detect.

Hence, Professor Zhao could not wait to bring Lin Fan into the lab.

He no longer paid attention to Ma Zhong, Zheng Jinbao, and Song Yi, who were standing on the spot.

After passing through the basketball court, there was a tall building in front of them.

Many chemistry laboratories were located in this building.

Walking along the wide corridor of the building, one could hear a dull sound from afar.

Professor Zhao took the lead and pushed open the laboratory door.

A tall machine came into view.

Three graduate students were working on something seriously.

Even when they heard the door open, they did not turn around to look.

Only the old professor, who was sitting at the front and staring at the computer screen, raised his head.

He first looked at Professor Zhao calmly, then glanced at Lin Fan. He did not say anything and turned his attention back to the computer screen.

Professor Zhao took the initiative to introduce, "Professor Li, this is Lin Fan from the Mathematics Department."

"Oh?" Professor Li's face, which had always been calm, was now filled with surprise.

The three graduate students who had been focused on the experiment could not help but stop what they were doing and turn around to look.

Lin Fan's reputation in Jiangbei University was simply too big.

Professor Zhao continued, "Lin Fan is also very interested in batteries. He came today to visit the laboratory and see the specific battery experiments."

Professor Li did not hesitate and said, "Alright! We still have some unfinished tasks from our last experiment. Please wait a while."

"Alright," said Lin Fan.

As expected, he only waited for a while.

About five minutes later, Professor Li said, "Our battery experiment can start again."

"I'll have to trouble you, Professor Li," Lin Fan said.

Professor Li smiled. "It's not troublesome at all. It's what we do."

Then, Professor Li said, "Everyone, try to do the experiment as carefully as possible and set the standard!"

Clearly, he wanted Lin Fan to understand more.

As the experiment began, a dull sound came from the strange-looking machine.

Rows of indicator lights lit up with different lights.

Then, electric sparks kept jumping in the pitch-black material, making crackling sounds.

At the same time, a jumping curve appeared on the computer screen.

The three graduate students moved very slowly. Moreover, some of the operations that could have been skipped were carried out.

Therefore, the experiment that originally only needed 30 minutes lasted for nearly 50 minutes before it slowly ended.

Professor Li first took some notes on the experiment.

Then, he asked, “Lin Fan, how was it? Do you have any other thoughts? Or suggestions?”

Lin Fan looked at the system mission.

[Mission: Watch a battery experiment (1/1). Read Battery Principles, Battery Handbook, Lithium-ion Batteries, Polymer Batteries, and Battery Structure and Principles (0/5). Reward: A super battery patent, manufacturing principle, and complete thesis.]

Obviously, the first condition of the mission had been fulfilled.

Thus, Lin Fan said, “I need to spend some time thinking about it.”

Professor Li was not too surprised. He nodded and said, “Batteries indeed require a lot of time and experiments to achieve certain results.”

RICHEST MAN: GETTING 7 BILLION RED POCKETS TO START WITH

Chapter 307 Super Smart Watch; Name Change!

After Lin Fan was done here, he went to the library.

The library of Jiangbei University was always packed with people.

Lin Fan walked past the language category, mathematics category, geography category... He went straight to the chemistry bookshelf.

He had to admit that Jiangbei University had a very comprehensive collection of books.

Lin Fan spent a few minutes to find the five books he needed—Battery Principles, Battery Handbook, Lithium-ion Batteries, Polymer Batteries, and Battery Structure and Principles.

He hugged the five thick books and glanced at the seats filled with people in the distance.

At this moment, a familiar voice sounded behind him.

"I have an available seat there. Do you want it?"

When Lin Fan heard that, he slowly turned around.

A fair woman with exquisite facial features appeared in front of him. She was wearing a long dress and black-rimmed glasses. She looked very beautiful and quiet.

She was Lu Ling, whom he had seen several times in the library.

Lin Fan remembered that she was a physics major.

He seemed to meet her every time he came to the library. Was this fate?

Lin Fan rubbed his nose and said, "Yeah, I do."

Then, under Lu Ling's lead, Lin Fan came to the seat that he had sat on several times.

He could not help but wonder and asked, "Do you always sit here?"

"Can't I?" Lu Ling asked.

"Of course, you can." Lin Fan shrugged.

Lin Fan did not continue chatting. Instead, he used his scanning ability and quickly flipped through Battery Principles which was in his hands.

The sound of someone flipping through a book immediately rang out.

Battery Principles was hundreds of pages long. However, Lin Fan only spent five minutes to memorize all the contents.

Then, he moved on to Battery Handbook.

The third book was Lithium-Ion Batteries.

Lin Fan spent a total of 20 minutes to finish reading the five books.

Instantly, a crisp notification rang out in Lin Fan's mind.

[Ding! Mission completed: Watch a battery experiment (1/1). Read Battery Principles, Battery Handbook, Lithium-ion Batteries, Polymer Batteries, and Battery Structure and Principles (5/5). You've obtained a super battery patent, as well as the manufacturing principle and complete thesis.]

In an instant, other than the five books on battery knowledge that he had just flipped through, there was a tsunami of battery knowledge in Lin Fan's mind.

Lu Ling saw that Lin Fan was not flipping through books anymore and asked, "Batteries? Are you studying chemistry now?"

"Yes," Lin Fan said.

Then, he looked down at the questions on Lu Ling's desk and said, "You don't know this question anymore?"

Lu Ling opened her mouth. She really wanted to say again?

Alright, it was indeed again.

She really wouldn't.

Lin Fan could easily read her thoughts from her expression.

At this moment, Lin Fan had just completed his mission and was in a good mood.

Hence, he picked up his pen and easily answered the questions on it.

After reading it, Lu Ling's pretty face revealed a touch of realization.

Lin Fan smiled and strode toward the exit of the library.

Lu Ling hesitated for a moment and said, "Please wait a moment. Thank you for helping me answer the questions. I'll treat you to lunch."

At the mention of food, Lin Fan's stomach was indeed a little hungry.

Therefore, he immediately replied, "Okay."

Lu Ling tidied up the books on the table and went to the cafeteria with Lin Fan.

Originally, Lu Ling wanted to treat Lin Fan to expensive food.

However, no matter how expensive it was, could it be as expensive as what Lin Fan usually ate?

Lin Fan rejected her right away.

Sea cucumbers, abalones, and other such foods... Sometimes, he would get sick of them too.

It was also a good choice to occasionally eat the food in the cafeteria for a change.

At this time, it was mealtime.

There were many people in the cafeteria. After ordering some food, Lu Ling and Lin Fan found an empty seat and sat down.

Lu Ling took a few mouthfuls of rice and could not help but say, "Lin Fan, why are you so good at math? Is it because of interest?"

"I'm not interested in mathematics," said Lin Fan.

Lin Fan was not lying.

The reason why he entered Jiangbei University was to experience life.

As for those difficult questions, it was entirely because it was convenient for him to do so, as well as because they were missions given by the system.

"huh?" Lu Ling was stunned for a moment. "Then... Then how did you solve so many difficult problems?"

Obviously, after Lin Fan introduced himself last time, Lu Ling already knew his identity.

"Those problems?" Lin Fan asked. "Aren't you able to answer them by looking at them?"

He was able to answer them just by looking?

Including Zhou's Conjecture, the Twin Prime Number Conjecture, Hail Conjecture, and Hodge Conjecture?

These... They were all world-class math problems!

Lu Ling was completely stunned.

At this moment, the phone in Lin Fan's pocket vibrated.

12:00 PM!

The red packets were here!

[Ding! Congratulations, you've received three yuan.]

[Ding! Congratulations, you've received 999 yuan.]

...

[Ding! Congratulations, you've received 18,888 yuan.]

[Ding! Congratulations, you've obtained a super smart watch.]

This time, Lin Fan received a total of 53,211 yuan.

Lin Fan did not even want to look at this bit of money.

He immediately focused his gaze on... the black watch on his wrist that suddenly appeared.

A super smart watch!

"I suddenly remembered something important...I'll be leaving first." After Lin Fan finished speaking, he walked out.

He really wanted to see what this super smart watch was.

Lin Fan had a strong feeling that this was definitely a good treasure!

Lu Ling was left alone in the cafeteria with a blank face.

Lin Fan did not go to the dormitory. Instead, he went to the Mercedes-Benz and headed toward the Coiling Dragon Villa.

He sped all the way there.

About 20 minutes later, Lin Fan arrived at the sofa in the Coiling Dragon Villa and sat down.

Then, he turned his attention back to the super smart watch.

[Super Smart Watch: An AI watch that combines protection, calculation, tracking, and other powerful abilities into one. It's absolutely loyal to its owner and helps its owner easily complete things, displaying extraordinary power.]

An AI watch that combined powerful abilities such as defense, calculation, and tracking?

For some reason, Lin Fan suddenly thought of Jarvis in Iron Man.

Lin Fan's heart raced as he asked, "A super smart watch?"

"I'm here, Master. What can I do for you?" The watch screen lit up slightly and emitted a magnetic sound.

Even though Lin Fan had heard many beautiful voices before, he was still a little weak at this moment.

After a while, Lin Fan asked, "Do you have a name?"

"Super Smart Watch."

"This name... doesn't sound good. I'll change it to a better name. You're all black, so you'll be called... Lil White, then," Lin Fan said.

"Ding! The modification was successful. Lil White Then is at your service."

Lin Fan was speechless.

Was this really a super smart watch?

Not a super silly watch?

Was he expecting too much from it?

RICHEST MAN: GETTING 7 BILLION RED POCKETS TO START WITH

Chapter 308 Sent An E-Mail; Review It ASAP!

Lin Fan sighed helplessly. "What I meant was to change your name to Lil White and not Lil White Then."

The screen of the super smart watch flashed for a moment before a crisp sound came out.

"Ding! Modification successful! Lil White And Not Lil White Then at your service."

When Lin Fan heard this, his lips twitched.

Idiot!

This was definitely a super silly watch!

Lin Fan patiently explained it to the super smart watch.

That was how he changed its name to Lil White.

Lin Fan then went to the washroom. When he passed by the study, he happened to see a stack of documents on the table.

Out of curiosity, he casually glanced at it.

"Super battery patent."

Lin Fan muttered, "Did the mission rewards come straight to my house? That's quite convenient."

Then, he looked at the computer beside him and said, "Anyway, I don't have anything else to do, so I'll just write the thesis on this super battery first."

If an ordinary person wanted to write a thesis, they would definitely have to think twice. After all, it was an extremely difficult task.

After spending a lot of time writing it, one still had to go through complicated and detailed modifications.

However, Lin Fan was different. This thesis was given to him by the system.

It could be said that it was directly engraved into his mind. There was no need for any thought or modification at all. It was incomparably perfect.

Lin Fan's fingers were on the keyboard, jumping around like a phantom.

In just over an hour...

A logically meticulous and extremely complicated thesis appeared in the Word document.

Lin Fan pondered for a while and wrote his name in the first author's position. Then, he wrote Zhao Xueqin and Li Rongfa in the second author's position.

Zhao Xueqin and Li Rongfa were the two professors who asked their students to do the battery experiment for him.

Lin Fan was a person who knew how to repay kindness.

Since he had received the help of other people, he would give them some small benefits. It was reasonable.

Some small benefits?

This was a thesis on super batteries!

If Zhao Xueqin and Li Rongfa knew about this, who knew how shocked they would be?

Of course, regarding this...

Lin Fan did not care.

He casually sent the thesis to the editorial department of Science.

When he was about to leave the study, he saw the super smart watch on his wrist.

Hence, Lin Fan said, "Lil White, can you get my thesis approved in the shortest time possible?"

As one of the most authoritative scientific research magazines in the world, Science was the holy land in the hearts of all scientific researchers. They received countless emails every day.

For most scholars, successfully publishing a paper in Science was something they were extremely proud of. In fact, they could even make a meteoric rise immediately.

Therefore, the email of the editor of Science was filled with endless manuscripts all year round.

Lin Fan had sent the manuscript over. Under normal circumstances, it would take at least a week or two before it could be reviewed.

That was why he asked the super smart watch.

"No problem, Master!"

The screen of the super smartwatch flashed slightly and emitted a crisp and pleasant sound.

...

In America...

At this time, it was early in the morning.

Science's editor, Howard Theus, was lying on a soft bed with a faint smile on his face. Clearly, he was having a good dream.

At this moment, the phone beside his bed suddenly rang.

However, the noise did not wake Howard up.

The next moment, the TV in his room suddenly turned on automatically and switched on the sound system that he had not used in a long time.

Howard was so frightened that he jumped out of bed.

"What happened? What's wrong?"

When he saw that it was the TV, he heaved a sigh of relief.

"I remember that I turned it off before I went to bed. Did I remember wrongly?"

Howard shook his head and did not care too much.

He picked up the remote control by the bed and turned it off. Then, he lay back on the bed.

However, he had only laid down for a while when the TV and sound system were turned on again, and a series of ear-splitting sounds were heard.

Howard jumped up again and shouted, "F*ck! Is this TV crazy? I'll throw it into the trash tomorrow!"

After saying that, Howard stood up angrily and pulled out the power cord.

After going through the trouble, Howard felt a little thirsty.

He got up and went to the kitchen. He poured a glass of ice water and gulped it down.

Then, he returned to his room to continue sleeping.

At this moment...

The oven, which would only make a sound after it was done roasting something, made continuous ringing noises.

The washing machine, which only played light music after washing clothes, kept playing light music.

The refrigerator door, which would only make a sound when it was not closed even after a long time, produced an urgent beeping sound...

All the electrical appliances that could make sounds rang at this moment.

It was extremely noisy and hurried!

Howard held his head and shouted, "What the f*ck?! What's going on?"

Then, he quickly unplugged all the electrical appliances.

Just as Howard heaved a sigh of relief, the laptop in the study started playing loud music.

He quickly walked into the study and raised his hand to turn off the laptop.

However, Howard soon realized that he could not control the mouse at all.

Even if the power was unplugged, the laptop still ran on its battery.

Howard shouted angrily, "If I find out who's playing this prank on me, I'll definitely make them pay!"

At this moment, the music on the laptop suddenly stopped.

At the same time, an email popped up on the screen.

'Principles and Applications of Super Batteries.'

Howard, who was in a state of anger, only glanced at it casually at first.

Not long after, however, he could not take his eyes off it.

"This... This... Could such a small battery continuously release so much electricity?"

"If this thesis is true..."

"Super battery..."

"Super batteries will definitely change the entire mobile phone electronics industry!"

"Whose article is this? Lin Fan from Jiangbei University? The mathematician and the genius who invented the earthquake prediction device?"

"Oh my God!"

Now, Lin Fan's name could be said to be well-known in the scientific research world.

At this moment, Howard had completely forgotten about the unpleasantness from before. He was extremely excited.

If it was Lin Fan, the value of this thesis would rise to another level.

"I have to ask the managing editor for permission and then look for a big shot in the industry to review it..."

Then, Howard ignored the abnormality of the electrical appliances in the house and the sky that had yet to completely brighten up. He took out his phone and dialed the number of the managing editor.

...

309 Science!

The managing editor, who was sleeping, suddenly received a call.

He was like a furious lion.

His voice was terrifyingly low.

When he saw the paper, Principles and Applications of Super Batteries, he immediately became extremely excited and praised Howard Theus.

As the managing editor of Science, he knew very well what this thesis represented.

Some people were extremely proud of their paper being published in Science.

There were also some papers that were published by Science that made Science feel honored.

This thesis on super batteries was the latter.

One had to know...

Science was not the only top journal in the world.

If they did not review and reply immediately.

What if... the other party felt that they had neglected him, so they decided to send the manuscript to Science's long-time rival, Nature?

At that time... he would definitely regret it.

Therefore, the managing editor immediately forwarded Principles and Applications of Super Batteries to Professor Stephen Jenny of Hemp Rope Technology University.

The next day, Hemp Rope Technology University's chemistry laboratory was bustling with activity.

...

Lin Fan had no idea about all of this.

These few days, Lin Fan just went to school, slept, and ate. He was experiencing the leisurely life of a student. It was very relaxed and pleasant.

He was relaxed, but Professor Stephen Jenny was the complete opposite.

In the past few days, Professor Stephen had been experimenting and checking the theory of the super battery.

Today, the experimental results finally appeared, and they were completely consistent with the data in the thesis.

The thesis was... correct!

When the editorial department of Science received the feedback, they did not hesitate to publish the thesis and added a prominent title on the cover.

...

At this moment, in the headquarters of a popular mobile phone company in America.

The technical director took a stack of documents and rushed to the president's office.

"What's wrong?" Kaku asked curiously.

"Super battery! You'll know when you see it," the technical director said.

One should not think that the CEO did not know anything and only knew how to give orders blindly.

On the contrary, the CEO knew much more than the average person.

Kaku quickly flipped through the information. After a moment, his face gradually revealed a hint of shock and solemnity.

"According to the thesis, the battery size of mobile phones can be reduced by at least half, but the capacity can be increased by several times! How authentic is this thesis?"

Nowadays, cell phones were always developing in the direction of being lighter and thinner.

The super battery could undoubtedly achieve the ultimate in this aspect, and it could even be said to be subversive.

It was no wonder that Kaku would show such an expression.

"This paper was reviewed by Professor Stephen Jenny from Hemp Rope Technology University," the technical director said. "He's an authority figure on batteries. Also, last night, I did a few last-minute experiments according to the

thesis, and the date I got was exactly the same as the data mentioned in the thesis.

“Therefore, there’s no need to doubt the authenticity.”

When Kaku heard this, he turned around a few times before picking up the phone on the table. “Mr. Wilson, I need you to get the contact information of Lin Fan, the author of the Science thesis, Principles and Applications of Super Batteries, as soon as possible! Hurry!”

“Yes, Sir!” Wilson’s serious voice came from the phone.

...

Bangzi Country, Four Star Corporation.

Chairman Lee Kangxi listened to the director’s report and frowned. “Super battery? Moreover, it’s a super battery developed by someone in Hua Nation? You know I hate those two words!”

After a while, Li Kangxi continued, “Now, we must make two preparations.

“First, we need to get in touch with Lin Fan as soon as possible and try to buy the patent for the super battery.

“Secondly, we need to check if Lin Fan from Hua Nation is a nationality of Bangzi Country.”

“Yes, Sir!” the director said respectfully.

...

Hua Nation, Dahua Phone Group.

Chairman Ran Fei had a habit of spending at least an hour a day reading the most cutting-edge scientific research reports.

He knew very well that technology was the only driving force for progress.

When he picked up the latest issue of Science on the table, he was quickly attracted by the title on the cover, Principles and Applications of Super Batteries.

Then, Ran Fei almost buried his entire head in the journal.

After a long while, he muttered to himself excitedly, “The battery capacity can actually be increased by so much...”

Ran Fei quickly dialed a number and said, “Director Liu, have you seen the latest issue of Science?”

“You’re talking about Principles and Applications of Super Batteries, right? I was just about to report this to you,” Director Liu said.

“Oh? What do you think of the thesis? Is it possible?” Ran Fei asked.

“There’s no problem with the basic logic, but the specific data still needs to be verified personally,” Director Liu said.

Ran Fei said, “Put everything aside now. Form a research team of 20 to 50 people and verify the experiment in the shortest time possible!”

“Alright!” Director Liu immediately replied.

Then, Ran Fei dialed the number of the director of the Human Resources Department and said, “Help me get the contact information of Lin Fan from Jiangbei University as soon as possible.”

“Yes, Sir!” the HR director said.

Ran Fei paced around the office. After thinking for a moment, he made another call and said, “Help me book a plane ticket to Jiangbei. The sooner the better!”

...

All the big shots in the mobile phone industry had noticed the thesis, Principles and Applications of Super Batteries.

They all asked their HR department to help them find Lin Fan’s contact information. However, the most they could find was Lin Fan’s email address.

As for his phone number and his house address, they failed to get that information.

In fact, this was normal.

After all, Lin Fan was a member of the Dragon Division, and his identity was encrypted.

In addition, Lin Fan invented the earthquake prediction device and solved many mathematical problems. He also said that he would not accept any interviews.

The officials understood that Lin Fan did not want to be disturbed.

Naturally... no one would know about his information.

They did not manage to find his cell phone number or specific address...

Helpless, the senior executives of the cell phone companies could only send Lin Fan emails.

However, as a young man of the 21st century, why would he check his email regularly?

These emails were destined to be unseen.

310 Lin Fan's a Good Role Model; Cooperate!

That night, Lin Fan arrived at Yi Ke City.

Qiu Ziqian and Huang Ling were so happy that they did not sleep the entire night.

...

The next day, Lin Fan dragged his tired body to the classroom.

At this time, there were still a few minutes before class started. The students around were chatting about games and television dramas, relaxed and unrestrained.

The old professor strolled in after the bell rang.

He cleared his throat and began his lullaby-like lecture.

Lin Fan felt his eyelids sink, and he fell asleep.

When the bell rang, the old professor stopped lecturing.

It was also at this moment that hurried footsteps could be heard from outside the corridor.

"Lin Fan... Is Lin Fan here?"

The old professor and the students all looked towards the door.

It was Professor Zhao Xueqin and Professor Li Rongfa, who had interacted with Lin Fan not long ago.

The old professor obviously knew them and could not help but ask in puzzlement, "Professor Zhao, Professor Li, why are you looking for Lin Fan?"

It was no wonder the old professor asked.

If a mathematics or physics teacher or professor came to look for Lin Fan, that was easier to understand.

After all, Lin Fan was a genius in the mathematics department.

Whether it was mathematics or physics, there were some complicated computational problems involved.

However, the problem was that Zhao Xueqin and Li Rongfa were professors in the School of Chemistry!

Chemistry did not require particularly complicated calculations, right?

Li Rongfa said, "Lin Fan's super battery thesis has been published in the latest issue of Science!"

After he said this, his voice trembled with excitement.

Li Rongfa was a chemistry professor, and he also had a deep understanding of batteries.

Lin Fan even added his and Zhao Xueqin's names to the thesis. Even though it was only as second authors, it was a great honor!

As Li Rongfa finished speaking, the entire classroom instantly fell silent.

Nature and Science were known as the best in scientific research.

Everyone who was involved in scientific research dreamed of being able to publish a thesis in those two journals.

Lin Fan was a genius.

However, he was a math genius!

Why would he have a paper published in Science?

Moreover, it was a battery thesis. Chemistry?

This...

When did Lin Fan start researching chemistry?

When the class suddenly fell into silence, Lin Fan's snoring sounded particularly abrupt.

The old professor, the students, Zhao Xueqin, and Li Rongfa looked over at the sound of snoring. They all focused their gazes on Lin Fan.

Everyone had the same thought, 'He must have stayed up the entire night last night! Outstanding people sure do work the hardest!'

At this moment, Lin Fan slowly woke up from his deep sleep.

He raised his head and looked at everyone's gazes. For a moment, he was at a loss.

He muttered in his heart, 'Wasn't it fine to sleep in class in the past? What's going on today? Why is everyone looking at me?'

The old professor praised sincerely, “Lin Fan, you’re truly good! You’re a role model for everyone!”

The old professor was the first to applaud.

Then...

All the students in the class applauded.

Lin Fan was stunned again. What was going on?

Role model?

Role model for what?

Sleeping while studying?

It did not seem like it.

Zhao Xueqin and Li Rongfa hurried over.

“Lin Fan, your paper, Principles and Applications of Super Batteries, has been published in Science! Moreover, it even appeared on the cover!”

As Li Rongfa spoke, he quickly showed the cover of the latest issue of Science.

When the old professor and the other students heard this, the horror on their faces intensified.

The cover!

To be able to publish a thesis in Science was already extremely rare.

Lin Fan had actually appeared on the cover!

This...

This...

Compared to everyone’s surprise, Lin Fan’s face revealed a look of realization.

How smart was he?

He instantly understood that the old professor’s words were indeed a compliment.

Lin Fan looked at the super smart watch on his wrist and secretly gave it a thumbs-up.

In just a few days, the thesis passed the review and was successfully published.

Lil White's ability was not bad!

Li Rongfa continued, "I and Professor Zhao didn't help you at all. But you wrote our names as the second authors... We don't deserve it."

When Li Rongfa said this, he became excited again.

The old professor standing on the podium revealed a hint of envy.

The cover of Science... Even if it was as second author, it was still a very big deal.

Lin Fan said calmly, "You guys helped me by showing me the battery experiment. So, there's no problem writing it putting your names for the position of second authors."

They became second authors of a thesis published in Science just because they let him watch the battery experiment?

The old professor said, "I can do that too!"

At this moment, another set of footsteps sounded from outside the corridor.

Feng Weijian, the vice chancellor of Jiangbei University, and a square-faced middle-aged man walked in.

"Professor Zhao, Professor Li, Professor Wang, you're all here." Feng Weijian smiled.

Then, he looked at Lin Fan and pointed at the square-faced man beside him, "Lin Fan, this is Mr. Ran Fei, the chairman of Dahua Phone Group. He says he has something to discuss with you."

"Hello, Mr. Lin," Ran Fei said hurriedly.

Lin Fan said, "Hello, Chairman Ran. May I know why you're looking for me?"

Ran Fei hesitated for a moment and said, "I want to start a cooperation with you on the super battery."

Silence.

The entire classroom fell silent again.

Previously, the students only thought that Lin Fan was able to publish a thesis on Science and that it was an amazing thing. Most of them admired him for it.

At this moment, they were filled with envy. It could even be said that they were jealous.

One had to know...

Dahua Phone Group was the leading company in the entire communications industry in Hua Nation.

Dahua Phone Group was not listed, but according to external estimates, its market value was at least two trillion yuan.

The chairman of such a large company actually came over personally to discuss cooperation because of Lin Fan's super battery.

How much compensation would that be?

100 million?

300 million?

More?

When the students thought of this, they felt their throats go dry.

Regarding this...

Lin Fan said calmly, "Cooperation? Sure."

In fact, he could also choose to build his own company or factory.

However, just thinking about it made Lin Fan feel troubled.

In addition, Dahua Phone Company's reputation had always been good, so it was worth working with them.

"Then why don't we go somewhere else to talk?" Ran Fei said happily. "After all, I still have to get the company to send the corresponding information and contract over by fax."

Lin Fan nodded. "Alright."
