

RICHEST MAN: GETTING 7 BILLION RED POCKETS TO START WITH

Chapter 421 Take A Shower In The Morning; Take Care Of Your Body!

Lin Fan nodded at Xia Bing and Xia Xue.

Then, he took a stack of draft papers from Jiang Chaoqun.

Lin Fan flipped through it quickly. In just a few seconds, he came to a conclusion.

"You solved this problem well. Continue to work hard."

Although it was just a simple compliment, it made Jiang Chaoqun extremely happy. He said, "Yes, Professor Lin!"

Seeing this...

Liu Qianqian's and Nie Zhenjiang's hearts tightened.

More people had solved the first problem.

They were behind!

At the thought of this, they began to work on solving the problems even more seriously.

Xia Bing and Xia Xue doubled their efforts.

They were not the ones who were the first to solve the first problem.

They absolutely had to snatch that title back for the second problem!

Everyone was competing with each other, and the atmosphere was extremely tense.

When school was about to end, Liu Qianqian came to Lin Fan with a stack of draft books and said, "Professor Lin, these are the steps to answer the first problem."

Lin Fan flipped through it and nodded. "Good answer!"

Liu Qianqian heaved a sigh of relief.

Finally, she managed to solve a problem. She was not too far behind.

She heaved a sigh of relief, but Nie Zhenjiang was extremely nervous and flustered.

Everyone else had solved the first problem, and he was in last place!

At this moment, a crisp bell rang across Jiangbei University.

Lin Fan said, "Today's class will end here. Everyone, go back and rest."

After saying that, Lin Fan strode out.

Jiang Chaoqun and the others stretched their bodies, packed their books, and prepared to leave the office.

When they saw Nie Zhenjiang's listless look, they immediately realized something.

They comforted him, saying, "Zhenjiang, you're studying the Navier-Stokes equation. It's normal for you to have difficulty solving it. After you go back, have a good sleep. Perhaps you'll have a sudden stroke of inspiration and be able to solve it very soon. Take it slowly. Don't be anxious."

Nie Zhenjiang's face turned red again at the mention of this matter.

The Navier-Stokes equation!

A few days ago, he said that this was something he was good at.

In the end, he had yet to solve the first problem.

"Alright," Nie Zhenjiang said in a muffled voice.

After he returned to the dormitory, he did not have a good sleep.

Instead, he turned on the lights and studied the problem carefully, calculating for an entire night.

He was so anxious that he scratched his ears and cheeks, but there was still not much progress.

In order to prevent him from being listless in the office, Nie Zhenjiang took a cold shower early in the morning.

At this moment, Hao Zhiwu, who stayed in the dormitory next door, walked over with a cat on his shoulder.

He looked at Nie Zhenjiang, who was still a little wet, and said thoughtfully, "Zhenjiang, you took a shower so early in the morning?"

"Yes." Nie Zhenjiang nodded.

"Have you washed the clothes?" Hao Zhiwu asked again.

Nie Zhenjiang said, "Not yet."

Hao Zhiwu could not help but take a step back and say earnestly, "The kidney is the treasure trove of humans and the pillar of a man's life! Zhenjiang, you have to protect it well!"

After saying that, he even patted his shoulder gently, looking like he was taking care of him.

Nie Zhenjiang was baffled.

After a while, he seemed to have thought of something and spat out the words, "This guy!"

...

Although Nie Zhenjiang had taken a cold shower in the morning, he was still in a bad state of mind after not sleeping for the entire night.

He sat down in the office and felt drowsy.

At this moment, Lin Fan walked in with light steps.

The cat, who was lying lazily on Hao Zhiwu's shoulder with half-closed eyes, immediately opened its eyes and let out two crisp meows.

"Master is here!"

"Master, did you bring delicious food?"

The cat jumped down from Hao Zhiwu's shoulder and came to Lin Fan's feet, rubbing against him.

Lin Fan smiled. "Don't worry, the food will be here soon."

As if to verify Lin Fan's words, a delivery man walked over with a box and asked, "Is Mr. Lin here?"

"Yes, it's me," Lin Fan said.

"Please sign here," the courier said.

After signing his name, Lin Fan opened the box. It was filled with yesterday's premium cat food.

Seeing this...

Hao Zhiwu's eyes widened.

The reason why he brought the cat, Lil White, over today was because he was a little worried.

On the one hand, it was because Lil White was constantly making trouble in the dormitory.

On the other hand, after Lil White ate Lin Fan's premium beef cat food yesterday, it stopped eating cheap cat food that costs tens of yuan.

This made Hao Zhiwu furious.

He had no choice but to bring Lil White here today to try his luck.

What if Lin Fan brought premium beef cat food again?

That way, would Lil White not be able to eat a little more?

However, what was the situation in front of him?

βανδας ηθνε| The box was half the height of a person!

Yesterday, Hao Zhiwu went online to search for the price of this cat food. It was 1,589 yuan per 150 grams!

In other words, each gram cost ten yuan on average!

Even he could not afford to eat such expensive food, let alone to feed his cat.

How much did the box in front of him cost?

50,000?

100,000?

Hao Zhiwu felt his knees go weak and almost fell to his knees.

Lin Fan did not care that much. He casually tore open a bag of premium beef cat food.

The cat, Lil White, began to munch on the food happily.

"It's so delicious!

"The new master is amazing!"

nOVelNext.cOm

Lin Fan smiled. "If you like it, then eat more."

Then, Hao Zhiwu, Liu Qianqian, Xia Bing, Xia Xue, and the others began to study hard today.

Although Nie Zhenjiang was eager to answer the first question and catch up with the others, he still had a lot of questions to answer.

However, he did not sleep last night and was in a terrible state. He seemed extremely tired.

Lin Fan seemed to have noticed this as well. After stroking Lil White for a while, he took out a box of Spirit Tea and said, "If you feel sleepy, you can make some tea for yourself."

Nie Zhenjiang was too sleepy, so he had to put down his studies and get up to make tea.

When the boiling water was poured into the teapot with a few tea leaves, a rich tea fragrance instantly spread.

Nie Zhenjiang, who was originally extremely tired, felt refreshed as if a breeze had brushed past him.

Almost reflexively, he drank a large glass.

Instantly, it was as if he had a pair of wings, letting him soar wantonly under the blue sky.

All the tiredness from before was swept away, and what replaced it was extreme relaxation and comfort!

After a while, he came back to his senses.

Nie Zhenjiang stared at the cup of tea in front of him with a shocked expression.

When he raised his head and saw Lin Fan, he remembered what he was here for.

He was still in the office and had problems to solve.

Therefore, he quickly suppressed the surprise in his heart, turned around, and returned to the table to think about the problems again.

RICHEST MAN: GETTING 7 BILLION RED POCKETS TO START WITH

Chapter 422 - 422 Delicious; Game!

422 Delicious; Game!

Yesterday...

A few minutes ago, Nie Zhenjiang was still at a loss on the first problem.

At this moment, he had just sat down when a very clear train of thought appeared in his mind.

Then, Nie Zhenjiang picked up a pen and paper and started writing quickly.

The entire office was filled with the sound of the pen hitting the table.

In just over half an hour, pages of extremely complicated calculations were all written on the paper.

Nie Zhenjiang walked up to Lin Fan nervously and said, "Professor Lin, do you think this is the solution to this problem?"

Lin Fan quickly scanned the paper. After a few seconds, he said, "Not bad! The solution is correct."

“Okay!” Nie Zhenjiang said excitedly.

When Jiang Chaoqun heard this, he could not help but raise his head and say, “Zhenjiang, well done! You’ve solved the Navier-Stokes equation!”

“Thank you,” Nie Zhenjiang said with a smile.

At this moment, Hao Zhiwu also raised his head.

Just as he was about to say something, he sniffed and said, “What’s that smell? It feels so refreshing.”

Nie Zhenjiang said, “You should be smelling the fragrance of this tea. It’s very delicious. It’s because I drank it that I was able to answer the first problem so quickly. You guys can come and drink it too.”

Liu Qianqian, Xia Bing, and Xia Xue, who were still trying to solve the second difficult question, could not help but raise their heads and look at the tea that Nie Zhenjiang was pointing at.

After all, this involved solving a difficult problem.

Hao Zhiwu was the first to come to the coffee table. He picked up a cup of Spirit Tea and poured it into his mouth.

In the next moment, Hao Zhiwu felt as if his clothes had been torn to shreds.

It was as if he had transformed into the legendary first human—Adam!

He was naked and had a strong jumping ability. In the dense forest, he ran and jumped freely against the breeze...

It was so refreshing and pleasant!

“This tea is really delicious!” Hao Zhiwu could not help but praise.

When Jiang Chaoqun, Liu Qianqian, Xia Bing, and Xia Xue heard this, they also walked over and poured a cup of tea into their mouths.

In the next moment, everyone's faces revealed a touch of unconcealable comfort and enjoyment.

"So refreshing!"

"I feel much more relaxed."

Everyone could not help but praise.

When they returned to their seats, their minds were much clearer than before.

Facing the second problem, they had some ideas.

At this moment...

They finally understood why Nie Zhenjiang had said that he could answer the first problem so quickly because he drank the tea.

This tea was simply too magical!

They were all immersed in learning.

However, sometimes, a clear mind was not enough to answer difficult questions.

...

In the blink of an eye, it was already afternoon, but no one had solved the second problem.

Yesterday and this morning, Lin Fan had been playing with the cat.

However, as time passed, it gradually became boring.

After browsing the news on his tablet for a while, he opened the group chat that he had not sent a message in for a long time.

Work Slayer: [Let's play a few rounds of games.]

Dream Type: [Yes, the worker is a godly tycoon!]

Aunty: [Coming!]

Old Rate: [I'll be there soon!]

Meowgod: [Logging in to my account!]

...

Hao Zhiwu, who had been reading books and answering difficult problems for a long time, stood up and stretched.

He looked at his cat, Lil White, who was lying beside Lin Fan. He walked over and prepared to pet it.

He had just petted it a few times when he heard the familiar sound of Pesticide.

He looked at Lin Fan, who was holding his tablet, and said in surprise, "Professor Lin, you like to play Pesticide too?"

"Haha! I like to play it too!"

"I like to play mage, archer, and jungler!"

"Actually, I used to like the support the most, but I often encounter some idiots who occupy the output position. The support can't save the world at all."

Hao Zhiwu was an extrovert.

In addition, he had been spending time with Lin Fan for the past few days and felt a sense of familiarity.

When the game was brought up, he began talking non-stop.

Hao Zhiwu said after a pause, "Actually, a large part of the reason why I chose bioengineering was that I wanted to study more about the human body!"

"In the future, I want to think of a way to create a piece of equipment that allows one to enter games with their consciousness!"

“Just like in Sword Art Online, where you can pick up your own weapons and kill monsters.”

As Hao Zhiwu said this, his eyes flickered.

It was as if he already had this kind of game equipment and was wantonly adventuring in the game.

At this moment...

Lin Fan, who had been playing games silently, suddenly stopped what he was doing. *noVeInext.com*

This was because a crisp notification sounded in his mind.

[Ding! Mission: Watch a biology experiment and a computer experiment. Read Nervous System Research, From Neuron to Brain, The Constitution of Neuron, Nervous Transmission, Animation, Mathematical Methods in 3D Games and Computer Images, and Game Program Patterns. Reward: Computer and biology experience increases by one level, gaming helmet, and its working principles.]

Hao Zhiwu saw that Lin Fan was not playing the game and that his character was about to be killed.

He was even more agitated than Lin Fan, who was the one playing games.

“Professor Lin, why aren’t you moving? Move! You’re about to be beaten to death!”

When Lin Fan heard this voice, he came back to his senses.

However, he did not play the game. Instead, he handed the tablet to Hao Zhiwu and said, “You play.”

Then, he said to the others, “Study on your own. If you encounter any questions that you don’t understand, put them aside for now. Ask me again when I come back.”

After Lin Fan finished speaking, he walked out.

Hao Zhiwu took Lin Fan’s tablet and started playing the game.

He spent a long time to avoid his character dying.

“You want to kill me? You’re still a little inexperienced!”

Hao Zhiwu could not help but nod and praise.

When he saw the IDs of his teammates, his eyes widened as he shouted, “Dream Type? Aunt? Old Rate? Meowgod?”

“Oh my god!”

Dream Type, Aunt, Old Rate, and Meowgod were the most popular players in Pesticide!

In the end, these people were actually ranked together with Lin Fan!

This...

This...

Hao Zhiwu could not help but... look at Lin Fan, who had disappeared from the door.

“Professor Lin, you’re awesome!”

RICHEST MAN: GETTING 7 BILLION RED POCKETS TO START WITH

Chapter 423 Computer Experiment; Body Sensing Equipment!

Hao Zhiwu had always had a dream.

That was to game with one of the top players—Dream Type, Aunt, Old Rate, and Meowgod.

However, Lin Fan had all four of them on his team!

How amazing was this?

After a while, Hao Zhiwu looked away and focused on the tablet again. He continued playing the game excitedly.

During this time, he did not forget to take out his phone and record a few videos of himself and the game as a memento.

...

Lin Fan did not care about Hao Zhiwu's actions at all.

At this moment, he had already arrived at the entrance of Teaching Building No. 1.

The reason why Lin Fan was so eager to complete the mission was that he was in a hurry.

On the one hand, this mission could increase his computer science experience level.

On the other hand, he was also very interested in the gaming helmet that Hao Zhiwu mentioned.

As long as one put on the helmet, one could enter the game world. How fun would that be?

At this moment, a bald man in a white shirt walked over.

When he saw Lin Fan, his silver-rimmed glasses flashed as he quickly walked over.

"Hello, Professor Lin!" the bald man said happily. "I'm Qiu Junxiong, a professor at the School of Computer Science."

Lin Fan's name had long since spread throughout Jiangbei University.

Qiu Junxiong naturally recognized him.

"Oh, it's Professor Qiu," Lin Fan said. "Hello."

Lin Fan greeted him!

The smile on Qiu Junxiong's face widened as he continued, "Professor Lin, Professor Liu Wei and I have brought a few graduate students to carry out a sensory device experiment. Are you interested in taking a look?"

After he said this, a look of anticipation appeared on his face.

A long time ago, there was a saying circulating among the teachers of Jiangbei University.

If one wanted to make a breakthrough in their research, get Lin Fan to be interested!

Initially, Qiu Junxiong did not pay much attention to such words.

However, not long ago, Wang Jun and Chen Haiyang, who were professors at the School of Computer Science, had piqued Lin Fan's interest in their experiments.

From there, he invented the carbon-based photolithographic machine and published a thesis on Science!

This matter made all the professors in the computer science department extremely jealous.

One had to know...

Wang Jun and Chen Haiyang were now often interviewed and reported about by various media outlets. They had become big names in the field of computer chips.

In addition, Jiangbei University had also increased its investment in all its projects.

It could be said that Wang Jun and Chen Haiyang were rich and famous now!

How could they not be jealous?

All of this was because of Lin Fan.

When Lin Fan heard Qiu Junxiong's words, his heart skipped a beat.

An experiment on a sensory device?

Could this be considered related to his gaming helmet?

Even if there was no connection, as long as he watched the experiment, it would be enough!

Thinking of this, Lin Fan nodded. "Alright, let's go take a look."

He agreed!

Lin Fan agreed!

The joy in Qiu Junxiong's heart grew even stronger.

He hurriedly said, "Professor Lin, this way, please."

Under Qiu Junxiong's lead, the two of them walked to the second floor.

Just as they left, Wang Jun happened to walk over.

Wang Jun happened to see the backs of Lin Fan and Qiu Junxiong going upstairs. He muttered, "Did Qiu Junxiong recruit another new student?"

Obviously, Wang Jun did not recognize Lin Fan.

...

Laboratory 203.

The two graduate students' fingers quickly jumped on the keyboard.

The other two graduate students were adjusting the various circuits of the welding.

Professor Liu Wei, whose hair was slightly white, stared at the computer screen and was deep in thought.

At this moment, the laboratory door was pushed open.

Qiu Junxiong said excitedly, "Everyone, stop what you are doing for a while."

When everyone heard this, they could not help but turn around and look over.

The graduate students were still confused.

Liu Wei's expression changed suddenly, and he said excitedly, "Are you Professor Lin?"

One had to know...

Liu Wei was probably over 50 years old.

Even Lin Fan was not used to being addressed so respectfully by someone in his 50s.

Lin Fan coughed lightly and said, "I am Lin Fan. But you don't have to be so polite."

After getting Lin Fan's approval, Liu Wei did not treat him as he was supposed to.

On the contrary, he became even more excited and respectful.

He took two steps forward and grabbed Lin Fan's right hand, "Professor Lin, thank you for your invention of the carbon-based photolithographic machine. You've saved Hua Nation from being suppressed by others."

Liu Wei's tone was very sincere.

This was definitely from the bottom of his heart.

He had been in Hua Nation's computer industry for more than ten years, and he knew very well how important chips were to the country.

Now, the problem had been resolved!

When Liu Wei learned that someone in Hua Nation had invented the carbon-based photolithographic machine, he was so happy that he almost cried.

noVeInext.com

Now, he had seen the inventor of the carbon-based photolithographic machine with his own eyes.

How could he not be excited?

Compared to Liu Wei's excitement, the faces of the four graduate students were slowly filled with admiration.

Lin Fan could be said to be a god-like existence in Hua Nation's computer science circle, especially in Jiangbei University's computer science department.

Lin Fan rubbed his nose and looked at Liu Wei's employee badge. "Professor Liu, I heard from Professor Qiu that you're researching a sensory device?"

"We started researching it last year," Liu Wei said truthfully. "At that time, we were actually hesitant. After all, even if the research was successful, we'd need a chip with excellent performance to operate it."

"But there's no need to worry now! It's all because of the carbon-based chip that you invented, Professor Lin!"

At this point, Liu Wei's emotions, which had just calmed down, became excited again.

Lin Fan said, "I'm not sure about that. Can I take a look at your experiment?"

Liu Wei did not hesitate at all and said directly, "Of course!"

Lin Fan was now a god-like existence in the computer circle. To be able to do experiments in front of him was something that he could not be happier about. How could he reject Lin Fan's request?

"Let's do an experiment on the latest research. I'll do it myself!" Qiu Junxiong said.

"I'll do the data!" Liu Wei said.

The two professors took action personally.

It was obvious that they placed great importance on this experiment. They wanted to show Lin Fan the most perfect side of the experiment.

The strange-looking machine let out a low sound.

On the computer screen, many complicated patterns, codes, and data gradually appeared.

Although Qiu Junxiong and Liu Wei were older and their movements were a little slow, their operations were stable!

RICHEST MAN: GETTING 7 BILLION RED POCKETS TO START WITH

Chapter 424 Guidance; Living In The Library?

Qiu Junxiong and Liu Wei did all the steps of the experiment in a stable manner.

Normally, the experiment would normally take half an hour to complete, but it took an hour before it gradually came to an end.

"Professor Lin, what do you think needs to be improved?" Liu Wei asked.

Qiu Junxiong and the graduate students all looked at Lin Fan with anticipation.

They had been working on the body sensing equipment for more than a year.

However, they encountered many difficulties.

They were all looking forward to Lin Fan, who was like a god, being able to provide them with some help.

However...

Lin Fan did not answer them immediately.

Instead, he placed his attention on the system mission.

[Mission: Watch a biology experiment (0/1) and a computer experiment (1/1). Read Nervous System Research, From Neuron to Brain, The Constitution of Neuron, Nervous Transmission, Animation, Mathematical Methods in 3D Games and Computer Images, and Game Program Patterns. Reward: Computer and biology experience increases by one level, gaming helmet, and its working principles.]

He had completed one of the requirements!

After a while, Lin Fan retracted his attention and said, "Your experiment has inspired me. I'll go back and organize my thoughts first."

Without waiting for Qiu Junxiong and Liu Wei to speak, he turned around and walked out.

Then, he went straight to Teaching Building No. 2.

Most of the laboratories in the biology department were located here.

Lin Fan had been here once. With his photographic memory, he was familiar with the entire building.

He came to the laboratory door on the third floor and pushed it open.

Professor Zheng Qian, Professor Wu, and a few other graduate students were studying something.

After a long period of research, Zheng Qian's mouth was a little dry.

She got up and was about to get some water to drink.

The next moment, Zheng Qian was stunned.

She said in surprise, "Lin... Professor Lin, when did you arrive?"

As soon as she said this...

Wu Tian, who was originally doing experiments seriously, and a few graduate students all stopped what they were doing and looked toward the door.

When they saw that it was Lin Fan, Wu Tian hurriedly went up to him. He bowed slightly and said excitedly, "Professor Lin, the recovery drug you invented is amazing!

βαηδας ηθνε| "Even though we've studied the paper repeatedly, we still find many parts of it amazing!"

The more Wu Tian spoke, the more excited he became. His old face, which had experienced some vicissitudes of life, became extremely red.

Wu Tian continued, "In fact, even following the steps in the thesis, some experiments are still difficult for us to complete... Mr. Lin, can you give us some guidance?"

At this point, Wu Tian's face was filled with anticipation.

After Lin Fan published the paper Principles of the Human Islet Recovery Drug, Wu Tian and Zheng Qian became famous in the biology world.

However, they did not become arrogant because of this.

On the contrary, Wu Tian and Zheng Qian spent a lot of time researching the drug.

In the outside world, many people thought that Wu Tian and Zheng Qian had done a lot of research on the drug.

However, in fact, the knowledge they had was not much different from that of the biologists who studied glucose.

This meant that even if they spent a lot of time, their progress might not be much faster than those biologists.

When Lin Fan heard Wu Tian's words, his gaze changed.

Guide an experiment?

It should be considered as watching a biology experiment, right?

Thinking of this, Lin Fan said, "Okay, but my time is limited. I'll guide you in an experiment."

"Thank you, Professor Lin!" Wu Tian said happily.

The last time Lin Fan completed the system mission, he directly obtained the manufacturing principle of the drug. As for the various experiments involved, he naturally understood them very well.

With Lin Fan's help, a complete biology experiment was completed in just 40 minutes.

"So that's how it is!" Wu Tian said in realization. "No wonder we couldn't succeed before!"

Zheng Qian and the other graduate students had a look of reminiscence on their faces.

Lin Fan did not bother about it and focused on the system mission.

[Mission: Watch a biological experiment (1/1) and a computer experiment (1/1). Read Nervous System Research, From Neuron to Brain, The Constitution of Neuron, Nervous Transmission, Animation, Mathematical Methods in 3D Games and Computer Images, and Game Program Patterns. Reward: Computer and biology experience increases by one level, gaming helmet, and its working principles.]

Seeing this...

Lin Fan's lips curled up.

As expected, even if he was just guiding the experiment, he could still complete the task.

"Professor Lin, thank you for your guidance."

Zheng Qian and a few other graduate students followed, "Professor Lin, thank you for your guidance."

Lin Fan waved his hand. "It's just a small matter. You guys can continue your research. I'll take my leave first." *noVeInext.com*

After saying that, he turned around and left.

Then, Lin Fan strode into the library.

After all, he only needed to read a few more books and he would soon be able to get a gaming helmet.

At this moment, a clear voice rang out not far away.

"You're here?"

Lin Fan looked in the direction of the voice. It was Lu Ling!

Today, Lu Ling was wearing a long blue dress. Her quiet face, snow-white skin, and the books in her arms made her look extremely quiet and pure.

Lin Fan could not help but feel weird. "Yeah."

Almost every time he came to the library, he would meet Lu Lin. Why did it feel like she lived here?

Finally, Lin Fan could not help but ask the question in his heart, "You seem to always be in the library. Don't tell me you live here?"

Lu Ling's snow-white face blushed slightly. Then, she said in a somewhat reproachful tone, "I have no choice. When I heard that the famous Professor Lin Fan was recruiting students, I hurriedly sent an email, but I wasn't selected.

"So, I can only stay in the library, study hard, and continue my postgraduate studies."

When Lin Fan heard this, he could not help but reveal an awkward expression. "You sent an email? I might not have noticed."

When he was recruiting students, Lin Fan received tens of thousands of emails.

Therefore, he asked Lil White to pick ten students from each field who had the most potential and were the most outstanding.

Lu Ling always had difficulty answering even simple questions. It was normal that she was not picked as one of the top ten physics students.

RICHEST MAN: GETTING 7 BILLION RED POCKETS TO START WITH

Chapter 425 Gaming Helmet (1)

Lu Ling looked at Lin Fan's awkward expression and rolled her eyes. She deliberately said in a pitiful tone, "I was the first one to send you an email."

Then, she could not help but burst out laughing. "I lied to you. I didn't send you an email."

After a pause, Lu Ling said, "Oh right, what books are you looking for in the library this time?"

Lin Fan coughed lightly and said, "Nervous System Research, From Neuron to Brain, The Constitution of Neuron, Nervous Transmission, Animation, Mathematical Methods in 3D Games and Computer Images, and Game Program Patterns. Reward: Computer science experience increases by one level, gaming helmet, and working principles."

"Nervous Transmission, Animation, Game Program Patterns? What do you want to study?" Lu Ling was a little puzzled. "A sensory game?"

She had done some research on these things and quickly made a guess.

"You can say that," said Lin Fan.

Lu Ling's interest was immediately piqued. Her eyes turned into crescents as she said happily, "That's great! I hope you can invent it as soon as possible!"

Obviously, she was very interested in games.

Lin Fan said, "Don't worry, it won't take long."

The two of them walked forward as they talked.

They passed through the language section, the mathematics section, the chemistry section... *noVeInext.com*

They went to the medical neurology category and found Nervous System Research, From Neuron to Brain, The Constitution of Neuron, and Nervous Transmission.

Then, the two went to the animation and game programming bookshelf and found Animation, Mathematical Methods in 3D Games and Computer Images, and Game Program Patterns.

After that, they each carried a few thick books and sat down in their usual seats.

Lin Fan did not hesitate too much. He opened a book and flipped through it quickly.

In just two minutes, he had finished flipping through the hundreds of pages of the book.

This scene...

Liu Qianqian, who was walking into the library, saw everything. She had wanted to ask Lin Fan to give her some guidance.

However, she quickly shut her mouth and revealed a thoughtful look.

...

After more than 20 minutes, Lin Fan finished reading the last book—Game Program Patterns.

Lin Fan had just put down his book when a crisp voice rang out in his mind.

[Ding! Congratulations on completing the mission. Watch a biology experiment (1/1) and a computer experiment (1/1). Read Nervous System Research, From Neuron to Brain, The Constitution of Neuron, Nervous Transmission, Animation, Mathematical Methods in 3D Games and Computer Images, and Game Program Patterns. Reward: Computer and biology experience increases by one level, gaming helmet, and working principles.]

[Ding! Upgrade successful! Congratulations, you've obtained Academician Computer Experience!]

[Ding! Upgrade successful! Congratulations, you've obtained Academician Biology Experience!]

...

##1472365##

##64663##

...

$C_0_2+H_2O\text{----}(CH_2O)+O_2$

$6CO_2+12H_2O\text{----}C_6H_{12}O_6+6H_2O+6O_2$

...

Instantly, a huge amount of codes and complicated biological knowledge flooded Lin Fan's mind like a tidal wave.

Then, the principle of creating the gaming helmet appeared in Lin Fan's mind.

[Do you wish to extract the gaming helmet?]

Mission accomplished!

He could use the gaming helmet immediately!

Even Lin Fan could not help but feel excited.

He stood up and said, "I have something to do, so I'll leave first."

After saying that, he strode out.

He could not wait to retrieve the gaming helmet and play with it.

Lu Ling opened her mouth and was about to say something.

However, looking at how anxious Lin Fan was, he could only swallow his words.

She looked at the draft paper on the table and muttered, "Anyway... This time, there's only one question that I can't answer. I'll save it for next time."

...

Lin Fan did not choose to go to the office. Instead, he drove the Cullinan back to the Coiling Dragon Villa.

[Do you wish to extract the gaming helmet?]

"Yes!"

In the next moment, a helmet made of metal appeared in front of him.

This... was the gaming helmet!

Lin Fan looked at the helmet curiously.

Then, he put it on his head.

The gaming helmet was made of metal on the outside, but the inside was very soft and comfortable. It also had excellent soundproofing properties.

Lin Fan placed the carbon-based chip into a backup phone.

Then, he upgraded the phone's program on the computer.

About half an hour later, everything was ready.

Lin Fan muttered, "I have the equipment. Now, I need to design a game."

Thinking of this...

Lin Fan could not help but feel a headache.

Even though he had Academician Computer Experience and mastered the production and working principles of the gaming helmet, it was extremely troublesome for him to design a game by himself.

Without a few days or even dozens of days of hard work, it would probably be impossible to complete.

Lin Fan sighed and said, "Forget it. I'll apply for a patent and publish a thesis first."

Even though Lin Fan had endless wealth, he was not sloppy when it came to applying for patents for inventions.

Otherwise, when his inventions were circulated to the market, the patents would be registered by others.

That would put him in an extremely passive position.

As for publishing a thesis...

It was almost a habit of Lin Fan's.

RICHEST MAN: GETTING 7 BILLION RED POCKETS TO START WITH

Chapter 426 - 426 Gaming Helmet (2)

426 Gaming Helmet (2)

"Lil White!"

“I’m here, Master!” The super smart watch on his wrist made a crisp sound.

“Help me register a patent for the gaming helmet and write a thesis on it,” Lin Fan said.

“Alright, Master,” said Lil White.

Then, the super smart watch shot out a red light.

About ten minutes later, patent documents from countries all over the world appeared on the display of the super smart watch.

“Master, the patent for the gaming helmet has been registered.

“Also, the thesis on the gaming helmet has been sent to your email.”

As soon as Lil White finished speaking, Lin Fan’s phone vibrated.

An email popped up.

It was titled ‘Principles and Future of Gaming Helmets,’ which Lil White had just edited.

Lin Fan glanced around and said, “Lil White, not bad! The first author will be me, and the second authors will be Qiu Junxiong, Liu Wei, Wu Tian, and Zheng Qian.”

“Then, send the thesis to... Nature’s editorial department. They should review it as quickly as possible.”

“Yes, Master!” Lil White said.

Suddenly, Lin Fan, Qiu Junxiong, Liu Wei, Wu Tian, and Zheng Qian’s names appeared out of thin air in the thesis.

Then, Lil White sent it directly to Nature’s editorial department.

Suddenly, Lin Fan thought of something and asked, “Lil White, can you develop a game that suits the gaming helmet?”

“Sure,” Lil White said.

“That’s great!” Lin Fan said happily.

After all, he was very interested in the gaming helmet.

However, he had a headache because he needed to design a game.

This feeling was like having a treasure mountain, but there was an incomparably long and rugged mountain road ahead.

Lil White was able to help with the design. It was like adding a ropeway to a long, rugged mountain road! It was so convenient!

“What kind of game do you want, Master?” asked Lil White.

“Adventure category!” Lin Fan replied without hesitation.

“Alright, Master.” Lil White said.

About ten minutes later...

Lil White said, “Master, a game has been installed on your spare phone. It’s called World.”

“Alright!” Lin Fan said happily.

The game was installed, and he could enter the game immediately!

Lin Fan quickly picked up his spare phone. Indeed, there was an unfamiliar icon with the word ‘World’ on it.

Then, Lin Fan lay down on the bed and connected the gaming helmet to his backup phone.

At this moment, a crisp notification sounded out in Lin Fan’s ear.

“Do you wish to activate the gaming helmet?”

“Activate!” Lin Fan said.

Hiss!

Lin Fan felt his neck tighten.

The next moment, Lin Fan's vision turned dark.

A crisp sound rang out in his ears again.

"Welcome to the gaming helmet."

Then, a row of floating characters appeared in front of Lin Fan.

"Enter World?"

Lin Fan did not hesitate at all and said, "Yes!"

In the next moment...

A patch of green grassland appeared in front of Lin Fan.

A gust of wind blew. He could feel the cool breeze and the touch of the grass.

When Lin Fan raised his head, he could see sparrows flying across the sky and the warm sun hanging in the air.

All of this...

Everything was so real.

In fact, Lin Fan had a strange feeling.

It was as if he was not in the game at all but had entered a real world.

Lin Fan walked into the distance slowly.

Before long, a sea of flowers appeared in front of them.

Red, blue, purple... It was very beautiful.

The air was filled with a rich fragrance.

At this moment, a long snake with patterns all over its body suddenly darted out from the sea of flowers. It spat out venom and quickly slithered toward Lin Fan.

When Lin Fan saw this, he hurriedly retreated.

However, the more he retreated, the more the snake closed in.

In the next moment...

The snake sped up and bared its sharp teeth, wanting to bite Lin Fan's calf.

Lin Fan quickly dodged.

If this were the outside world, Lin Fan would have become a superhuman existence after consuming the Constitution Enhancement Potion multiple times.

With his speed and strength, he could easily take care of the snake.

However, in the virtual world..

His strength and speed were only on par with ordinary people.

It was really difficult to dodge the long snake.

In fact, Lin Fan was bitten by a long snake in the calf.

A piercing pain assaulted his heart.

Immediately after, his entire body felt numb.

After a while, the world in front of him suddenly shattered.

"You died. Game over." A crisp voice rang out in Lin Fan's mind.

He entered the game and was bitten to death by a snake in the blink of an eye?

Lin Fan could not help but reveal an awkward look.

“Do you wish to re-enter the game?”

“Yes!”

In the next moment, Lin Fan appeared once again on the boundless plains.

This time, he did not move forward immediately.

Instead, he found a suitable wooden stick and two stones.

Then, he continued to walk toward the flowers.

As expected, the long snake appeared again.

Lin Fan grinned. “Good!”

Then, he raised the stick and slapped the long snake.

When the long snake was on its last breath, he did not forget to smash it with a stone, completely ending its life.

At this moment, a faint light flashed in the snake’s head that had been smashed into meat paste.

“The Spirit Wind Pill is a mysterious spiritual energy within the Spirit Snake’s body. After consumption, it can increase speed by ten points!”

A notification rang out in Lin Fan’s mind.

Seeing this...

Only then did Lin Fan reveal a look of realization.

No wonder this snake moved so fast. It turned out that there was such a thing inside its body.

Kill monsters and steal treasures?

This game seemed to be quite interesting.

As Lin Fan thought about this, he slowly lowered his head and picked up the Spirit Wind Pill.

Although the Spirit Wind Pill was inside the snake's body, there was not a trace of blood or stench on it. There was still a faint glow on its surface.

Lin Fan did not hesitate and put it into his mouth.

The moment the Spirit Wind Pill entered his mouth, his entire body felt a slight chill.

Then, Lin Fan walked over quickly. His speed was obviously much faster.

This made Lin Fan even more interested in the game.

He continued forward and arrived at a dense forest.

Among them, there were a few crystal clear fruits on one of the trees.

Curious, Lin Fan plucked a fruit and put it into his mouth.

It was juicy, sweet, and delicious.

Lin Fan could not help but praise, "I didn't think that my taste buds would work in the game."

When he finished eating the fruit, a crisp notification sounded in his mind.

[Consuming an Energy Fruit will increase strength by ten points.]

As expected, Lin Fan could feel a surge of energy within his body.

He looked at the remaining fruits above his head, and his eyes lit up completely.

Without any hesitation, he picked another fruit and put it into his mouth.

Sweet and crisp!

Delicious! *nOVeNext.cOm*

At the same time, his strength increased once again!

When Lin Fan plucked another fruit and was halfway through eating, an ape suddenly jumped down from the tree.

It bared its teeth and roared continuously.

When he saw the remaining half of the fruit in Lin Fan's hand, he seemed to be completely furious. He raised his hand and slapped Lin Fan's head.

Luckily, Lin Fan had taken the Spirit Wind Pill, so his speed had increased by quite a bit.

Finally, he successfully dodged the ape's attack.

However, the ape did not give up.

It continued to attack.

Lin Fan dodged a few times and knew that continuing was not the way. He took out the stone he had prepared and found an opportunity to hit the ape's head.

After eating two energy fruits, Lin Fan's strength was not bad either.

The stone smashed down, directly hitting the ape until it took two steps back.

Lin Fan understood that the ape was not invincible, so he smacked its head again.

Fast, accurate, ruthless!

Two consecutive smacks directly scared away the ape.

Meanwhile, Lin Fan continued to eat the Energy Fruits and played the game happily.

...

Lin Fan was happy, but some people were the complete opposite.

RICHEST MAN: GETTING 7 BILLION RED POCKETS TO START WITH

Chapter 427 - 427 Debate; Another Contribution!

427 Debate; Another Contribution!

It was midnight in America.

The editor of Nature, Esmond Bevan, was sleeping soundly.

At this moment, the phone beside his bed suddenly rang, waking him up.

Generally speaking...

It was very annoying to be woken up by a phone call in the middle of the night.

However, not only was Esmond Bevan not angry, but his face even showed a touch of excitement.

He did not answer the call immediately. Instead, he quickly went to the study and turned on his computer.

Unfortunately, he did not see what he wanted to see. *noVeInext.com*

He had no choice but to return to his bed and continue sleeping.

As Asmond Bevan fell asleep, the phone next to him rang again.

He got up excitedly again.

When he came to the computer, an email popped up.

“There’s mail! Haha! It wasn’t in vain for me to wait every night!” Esmond Bevan shouted excitedly.

Waiting every night?

That was right. He had been waiting every night!

Ever since he was woken up by a phone call and received Lin Fan's email, he had been waiting for Lin Fan's email every night.

This was because it was related to whether he could get a promotion and a raise in the editorial department of Nature.

However, he soon frowned slightly.

"The Principles and Future of Gaming Helmets? What is this? It seems like... I got happy over nothing again," Esmond Bevan said helplessly.

Although he said that, he still glanced at the author's name.

It was this glance that made his depressed gaze light up.

He jumped up in excitement.

"Lin Fan! It's Hua Nation's Lin Fan!

"Hahaha, I finally got his thesis again!

"The Principles and Future of Gaming Helmets? This is absolutely extraordinary!"

Esmond Bevan read the thesis carefully from beginning to end.

He was reading the thesis with anticipation and seriousness.

As he read deeper into the thesis, his eyes gradually widened, and his face revealed an unconcealable excitement.

"This... This... It enters the game!

"My god!

"This is unbelievable!

“I need to hurry up and tell the managing editor, yes!”

As he spoke, he quickly picked up his phone and dialed a number.

Then...

Many white-haired computer experts gathered at Hemp Rope Technology University.

They either dripped eye drops or washed their faces with cold water... Those were the only ways to keep themselves awake.

Only then could they focus all their attention on the thesis in front of them.

“Gaming helmets?”

“They allow one’s nerves to connect to the game world!”

“Connecting to the game world?”

“This...”

Among these people, there was no lack of big names who had won various awards in the computer field, including the Turing Award.

They had the most advanced computer technology and had forward-thinking...

Even so...

They looked at the data and introduction in the thesis and could not help but be dumbfounded.

The journal staff of Nature asked, “Professors, do you think there’s a problem with these data?”

After all, when he showed them Lin Fan’s research papers in the past, they were filled with admiration!

This time, their reactions were clearly different.

Charles, who was wearing a golden pocket watch, said, "It's not that there's a problem, but it involves the nervous system of the human body. We can't understand it at all. We need a biologist to come over."

Some of the big names at the side nodded in agreement.

Although they had studied some biology during their higher education, that was only very shallow learning.

The journal staff suddenly said, "Don't worry, the biologists will be here soon."

As if to verify his words, another large group of middle-aged and elderly people who looked full of wisdom walked in quickly.

"Where is Professor Lin's thesis?"

"Let me see."

Ever since Lin Fan invented the human islet recovery drug, he had become a leader in the field of biology, chemistry, and medicine.

When the biologists heard that Lin Fan had published another research paper on the human body, they all rushed over without any hesitation.

They could not wait to read the thesis.

Soon, someone sighed.

"Professor Lin actually found the frequency of the nervous system!"

"Amazing! It's simply too powerful! That's right, the human nervous system is equivalent to a circuit. The gaming helmet receives the simulated signal and then forms an image in the mind!"

"The electrical signals allow the human body to have special senses like smell, sight, taste, and even touch! Heavens, as expected of Professor Lin!"

...

The computer experts at the side also joined in the discussion.

“You mean... the thesis is correct?”

“I don’t know if it’s correct or not, but it’s possible to achieve it in the nervous system. Of course, we still need strict experiments to see if it’s correct or not.”

Time passed quickly amidst the praises, quarrels, and experiments.

In the blink of an eye, two days had passed.

...

At this time, in the Foreign Chip Alliance.

The president and the vice presidents of all four regions were gathered together.

They were drinking red wine and eating steak as usual, extremely indifferent.

At this moment, a man in a suit and leather shoes hurriedly ran over.

The president could not help but put down the knife and fork in his hand. He frowned slightly and said, “Jack, I’ve told you many times not to panic when you encounter something. Everything can be solved slowly. The sky won’t fall!”

“That’s right,” the vice president of the western region echoed. “Just like the carbon-based photolithographic machine and carbon-based chips invented by Hua Nation last time. So what if they’re powerful?”

“Our silicon-based chips are enough for all mobile applications today. In addition, the carbon-based chips and carbon-based photolithographic machines will pollute the environment and affect the body!”

When the president heard this, the corners of his mouth curled up slightly, revealing a smug expression.

He was the one who came up with the idea that claiming carbon-based chips would pollute the environment and affect the body.

They had used the media's crazy bombardment to achieve great results.

Nowadays, many foreign countries had already boycotted carbon-based chips.

This meant that their silicon-based chips still had the largest market.

So what if carbon-based chips had good performance?

If they were not used in the overseas market, it would not affect them at all.

The vice president of the western region noticed the smile on the president's face.

"Jack, don't be anxious. Sit down and eat some steak and drink some red wine."

Jack had no choice but to eat a piece of steak and drink a glass of red wine.

The president nodded in satisfaction. "Jack, why are you in such a hurry? Is there something you want to tell us?"

Jack took a deep breath and said seriously, "Dear presidents, Professor Lin has submitted another paper to Nature!"

RICHEST MAN: GETTING 7 BILLION RED POCKETS TO START WITH

Chapter 428 - 428 It's Over; Reminder!

428 It's Over; Reminder!

The knife and fork in the president's hand fell onto the table.

He did not know what kind of thesis Lin Fan had submitted to Nature.

However, just hearing this, the president's heart inexplicably tightened.

Ever since Lin Fan invented the carbon-based chip, the president had conducted an in-depth investigation and research on him.

Lin Fan solved a few unsolved math questions, invented the earthquake prediction device, the human islet recovery drug, the super battery, and so on.

Lin Fan... was definitely an existence with extremely high intelligence that could create miracles.

If he interfered with the chip again, then the consequences... were absolutely terrible!

The vice president of the western region was obviously very wary of Lin Fan. He asked, "What thesis did Professor Lin submit to Nature?"

"The Principles and Future of Gaming Helmets!"

"The Principles and Future of Gaming Helmets?" The leaders looked at each other in confusion.

Gaming helmets?

They had some vague guesses.

However, the Foreign Chip Alliance only cared about chips.

As for gaming helmets, they were not interested.

"According to Hemp Rope Technology University, this gaming helmet has a special function that allows people to enter the game world with their consciousness..." Jack continued.

“In addition, operating this helmet requires a very high chip performance. Perhaps, a carbon-based chip must be used to operate it successfully!”

The cups, knives, and forks in the hands of the leaders fell to the ground.

Their faces turned pale.

They knew very well how attractive this gaming helmet that could enter games was to foreigners!

In the face of carbon-based chips with better performance, the president and vice presidents managed to make ordinary people who did not know the truth refuse to use carbon-based chips and continue to use silicon-based chips through the media and internet trolls on the grounds of environmental protection and health!

Once the gaming helmet appeared, however...

In the eyes of foreigners, what did all that matter?

Were environmental protection and health more important than entering the game world?

Absolutely not!

It was over!

The Foreign Chip Alliance was completely finished!

...

Jiangbei University.

Even though Lin Fan had not come to the office for the past two days, Liu Qianqian, Nie Zhenjiang, Xia Bing, Xia Xue, Jiang Chaoqun, and Hao Zhiwu still went to school on time and took the initiative to learn with an extremely serious attitude.

However...

Xia Bing and Xia Xue often unconsciously looked at the empty desk in front of them, and a trace of longing appeared on their pretty faces.

Liu Qianqian saw all of this.

When the school bell rang, Liu Qianqian took the initiative to walk to the dormitory with Xia Bing and Xia Xue.

“Xia Bing, Xia Xue, you two look exactly the same. Are you twins?” Liu Qianqian asked.

Xia Bing and Xia Xue said in unison, “Yes.”

“So, it’s true!” Liu Qianqian was pleasantly surprised. “I heard that twins think the same way. Are you two the same?”

Xia Bing and Xia Xue said, “Most of the time, yes.”

“Are the people and things you like the same?” Liu Qianqian continued.

n0VeLnext.c0m

Xia Bing and Xia Xue nodded slowly.

“Do you like Professor Lin Fan?” Liu Qianqian asked.

Xia Bing’s and Xia Xue’s pretty faces instantly turned red.

They hurriedly lowered their heads, wishing they could bury their heads in the ground.

Liu Qianqian immediately knew the answer when she saw them like this.

She thought about it and said, “Professor Lin Fan is proficient in mathematics, logistics, biology, chemistry, computer science, and so on. He does have a strong charm!

“But I think it’s best for you to distinguish between liking and worshipping.”

Liu Qianqian saw that the two of them still had no reaction and hesitated for a moment.

“A few days ago, I was in the library. I saw Professor Lin Fan sitting together with a woman, talking and laughing. Moreover, Professor Lin Fan was a mess in front of her, flipping through books randomly.”

Obviously, Liu Qianqian was talking about Lin Fan and Lu Ling reading together.

Lu Ling had scolded Lin Fan for not choosing her as a student, but in Liu Qianqian’s eyes, they were talking and laughing.

Lin Fan used his scanning ability to read, but in Liu Qianqian’s eyes, he was just flipping through books randomly.

Liu Qianqian felt that she had made it obvious enough.

However, Xia Bing and Xia Xue still did not seem to have any reaction. Liu Qianqian could not help but say again, “I think Professor Lin Fan might have a girlfriend.”

After getting along with them for a few days, Liu Qianqian felt that Xia Bing and Xia Xue were kind and nice.

In terms of love affairs, Liu Qianqian thought that she was experienced.

She knew very well how painful it was to find out the person one liked had a partner.

Therefore, she had to pull Xia Bing and Xia Xue over in time before they fell too deep.

However...

Xia Bing and Xia Xue still had their heads lowered. Their pretty faces were red, and they did not have much of a reaction.

Liu Qianqian thought they did not hear her.

Therefore, she said again, “Xia Bing, Xia Xue, Professor Lin Fan probably has a girlfriend.”

Xia Bing and Xia Xue raised their heads and said, “Huh? We know.”

Liu Qianqian heaved a sigh of relief.

At this time, Xia Bing and Xia Xue said, “We’re also Lin Fan’s... girlfriends.”

Liu Qianqian was speechless.

...

Regarding Nature, the Foreign Chip Alliance, and what happened at Jiangbei University, Lin Fan had no idea about them.

Other than eating, drinking, and sleeping, he had been completely immersed in World.

In World, he roamed freely, killing monsters and admiring the beautiful scenery.

This was an unprecedented novelty.

Of course, this novelty did not last forever.

For example, right now, Lin Fan was slowly regaining his composure.

He called the two-star Michelin restaurant.

Not long after...

Top-grade abalone, M9 beef, sea urchin eggs, king crab, and so on were delicately made and sent over.

As Lin Fan ate, he commented, “Although the food in the game has some taste, it’s still different from real food.

“The delicacies in reality have a special feeling of filling the stomach and lasting for a long time. In the game, only when you eat do you have that kind of feeling.”

When all the food on the table was finished, Lin Fan burped.

“By the way, I don’t think I’ve signed in today, right?”

Lin Fan muttered to himself and focused on the sign-in system.

“Sign in!”

[Ding! Congratulations, you’ve received 1,000,000 yuan.]

Lin Fan pursed his lips and said, “Why is it this again?”

At this moment, the phone next to him rang urgently.

Lin Fan looked at the caller ID. It was Feng Zhixiang from the Institute of Science.

RICHEST MAN: GETTING 7 BILLION RED POCKETS TO START WITH

Chapter 428 - 428 It’s Over; Reminder!

428 It’s Over; Reminder!

The knife and fork in the president’s hand fell onto the table.

Lin Fan pursed his lips and said, “Why is it this again?”

At this moment, the phone next to him rang urgently.

Lin Fan looked at the caller ID. It was Feng Zhixiang from the Institute of Science.

RICHEST MAN: GETTING 7 BILLION RED POCKETS TO START WITH

Chapter 429 - 429 Shock; Cooperation! (1)

429 Shock; Cooperation! (1)

Lin Fan and Feng Zhixiang had interacted many times.

He had a good impression of this old man who worked hard for the country’s scientific and technological development.

Therefore, without much hesitation, he pressed the answer button.

“Professor Lin, you submitted Principles and Future of Gaming Helmets to Nature?”

Feng Zhixiang’s urgent voice sounded as soon as the call was connected.

“Yeah,” Lin Fan said slowly.

“Gaming helmets... can they really be made?” Feng Zhixiang asked nervously.

Lin Fan said, "Sure, I've been playing with one for a few days."

"Playing... How many days have you been playing?" Feng Zhixiang stuttered.

Then, he asked in disbelief, "You mean..."

Lin Fan said, "Yes, I've already invented it."

"Good, good, haha! That's great!" Feng Zhixiang laughed happily. "Professor Lin, where are you? I'll be right there!"

"Coiling Dragon Villa. You've been here before. Do you still remember the location?" Lin Fan said.

"I remember, I remember. I'll be right there!" Feng Zhixiang said.

Then, Lin Fan heard the sound of a collision from the phone.

"I'll take full responsibility. I'll compensate you for your car now..."

Lin Fan slowly placed his phone down and muttered, "Feng Zhixiang... got into a car crash? He shouldn't be so agitated at his age!"

Lin Fan shook his head and returned to his room. He put on the gaming helmet and entered World game again.

In the game, Lin Fan was riding a white horse. He welcomed the breeze and galloped on the green grassland.

At this moment, a huge claw suddenly stretched out from the ground in the distance.

Lin Fan's expression was calm as he pulled out the blade from his waist and swung it fiercely.

The claw broke.

At the same time, a golden pearl of light appeared on the ground.

This was the treasure that appeared after killing the monster.

However, Lin Fan did not care at all.

Instead, he continued to ride his horse forward.

This was because he had experienced too many things like killing monsters and obtaining treasures in the past few days. There were some things that he did not even bother to pick up.

...

When Lin Fan took off his gaming helmet, it was already a few hours later.

He got up from the bed and stretched.

At this moment, the doorbell rang urgently.

Hearing this, Lin Fan came to the front of the door and slowly opened it.

“Professor Lin, so you’re really home?” Feng Zhixiang said excitedly.

At this moment, he was covered in sweat and looked rather disheveled.

Lin Fan was stunned. “When did you arrive?”

“About two hours,” Feng Zhixiang said.

Lin Fan could not help but reveal an awkward look.

He thought that Feng Zhixiang would only come in the afternoon.

Who would have thought that he would come so quickly?

Two hours?

In other words, he had been standing outside for two hours?

It had been a long time.

Lin Fan said, “Come in and drink some water.”

Feng Zhixiang waved his hand and said, “No need... Where’s the gaming helmet you mentioned just now?”

“In the bedroom,” said Lin Fan.

Thus, the two of them went to the bedroom together. *novelnext.com*

Feng Zhixiang held the metal helmet and asked, “This... is the gaming helmet?”

Lin Fan nodded.

Feng Zhixiang was even more excited.

He could not help but carefully examine the gaming helmet.

Then, he asked, “Can I try?”

Lin Fan nodded and helped Feng Zhixiang put it on his head.

Feng Zhixiang only felt the back of his neck tighten slightly.

In the next moment...

He appeared on the beach.

In the distance, there were surging waves.

He raised his head... he could see the scorching sun.

Feng Zhixiang stuttered, “This... This... Weren’t I in the Coiling Dragon Villa just now, trying out the gaming helmet?”

“Am I dreaming?”

At this moment, a large crab suddenly crawled over to Feng Zhixiang’s feet and pinched his toes.

“Ah!

“It hurts!

“I actually feel pain! This is not a dream!”

Then, Feng Zhixiang held up the seawater and put it into his mouth.

“Salty!”

...

About ten minutes later, Feng Zhixiang took off his gaming helmet.

His face was full of surprise as he sighed sincerely. “Unbelievable, this is too unbelievable!

“After I put on the gaming helmet, I even thought that I had transmigrated!”

As he spoke, Feng Zhixiang could not help but hug the gaming helmet tightly.

It was as if he was holding a supreme treasure.

Supreme treasure?

In Feng Zhixiang’s heart, this was much more precious than countless supreme treasures!

It was because Feng Zhixiang understood that this gaming helmet was definitely a revolutionary invention!

It would definitely cause the entire world to shake again!

“Professor Lin, can you let us study this helmet?” asked Feng Zhixiang.

Lin Fan was not surprised by such a request. He nodded and said, “Sure.”

“Thank you, Professor Lin. I’ll come back in two days to borrow your gaming helmet!” Feng Zhixiang said excitedly.

Lin Fan could not help but ask, “Aren’t you going to Jingbei now?”

After all, every time he studied something in the past, he had to bring it to the capital immediately.

“No need,” Feng Zhixiang said with a smile. “A while ago, we applied for a scientific research institute in Jiangbei. In the next two days, some academicians and various equipment will be shipped over.”

Lin Fan nodded his head.

Feng Zhixiang said, "Oh, right. Professor Lin, are you planning to cooperate with Dahua Group to produce the gaming helmet?"

RICHEST MAN: GETTING 7 BILLION RED POCKETS TO START WITH

Chapter 430 Shock; Cooperation! (2)

Lin Fan said, "It should be. Is there a problem?"

"No problem, no problem!" Feng Zhixiang hurriedly said. "A while ago, we just approved a few plots of land for Dahua Group. Now, it seems that those plots of land aren't enough. Later, I'll report to the higher-ups and give Dahua some approval."

The two of them continued to chat for a while before Feng Zhixiang left with a smile on his face.

Lin Fan sat on the sofa and casually scrolled through his phone.

After a while, he muttered, "Studying gaming helmets? Looks like I have to make a few more game helmets as soon as possible..."

Thinking of this, Lin Fan dialed the number of the CEO of Dahua Group, Ran Fei.

...

At this moment, in the chairman's office of Dahua Group.

Ran Fei sat in front of the computer and flipped through the documents seriously.

After a long while, he sighed and said, "The carbon-based chip technology has already reached an absolute leading level. However, the market has not accepted it at all.

"The cost of carbon-based chips isn't high, but it's still a little higher than silicon-based chips.

"And silicon-based chips are already enough for daily needs...

"What should we do?"

"If only there were some functions that require carbon-based chips, but it's too difficult!"

Ran Fei sighed again.

pandasnovel.com The carbon-based chips were good, but no one cared about them.

It had to be said that this was indeed a very uncomfortable matter.

At this moment, there was a dull knock on the door.

A man wearing golden glasses rushed in with a document in his hand.

"Director Liu, what's the matter?" Ran Fei asked.

Director Liu said excitedly, "Nature! The latest issue of Nature published a thesis titled Principles and Future of Gaming Helmets!"

"Gaming helmets?" Ran Fei was puzzled. "Dahua Group isn't involved in the gaming industry."

He came from a technical background and only wanted to lead the company in researching and developing technology.

Therefore, even when Ran Fei had enough manpower and financial resources, he never considered getting involved in extremely profitable fields such as games, real estate, cars, and other industries.

The company had stuck with the same general direction over the years. Ran Fei felt that Director Liu, who had been with him for many years, should know.

Director Liu said, "This gaming helmet is different. According to the thesis, it can bring a person's consciousness into the gaming world!

"In addition, the gaming helmet requires an ultra-high-performance chip to operate!"

As soon as he said this, Ran Fei immediately understood what the game helmet meant.

Considering this gaming helmet could make a person's consciousness enter the game world, it would definitely make people go crazy. This gaming helmet would become popular all over the world!

Would it not mean that carbon-based chips could be put to good use?

This was good news!

This was definitely great news!

Ran Fei was about to laugh excitedly...

At this moment, the phone on the table rang.

Originally, Ran Fei wanted to reject it.

He only had the gaming helmet in his mind.

He wanted to hear more about the gaming helmet.

However, when he saw that the caller ID was Lin Fan, he could not help but press the answer button.

After all, Lin Fan was the biggest shareholder of the Dahua Group.

"Hello, Mr. Lin. May I know why you're calling?"

Ran Fei was someone who did not like to beat about the bush.

Moreover, his entire heart was focused on the gaming helmet.

Therefore, he went straight to the point.

Lin Fan said, "Oh, I invented a gaming helmet, and I wanted to ask if you wanted to collaborate to produce it."

When Ran Fei heard this, he was stunned.

His mouth was half-open, and he was completely motionless.

Lin Fan invented a gaming helmet?

The person who Director Liu just mentioned was Lin Fan? He was the one who wrote the thesis on gaming helmets?

That was right!

Lin Fan was in the computer field, biology field, and physics field... He was definitely a big shot!

In this world, who else could compare to Lin Fan... This time, he invented a piece of high-tech equipment that could allow one's consciousness to enter the game world.

Why did Ran Fei not think of it earlier?

Lin Fan saw that no one answered and continued, "Chairman Ran, are you not interested in this? If so...?"

Ran Fei did not wait for Lin Fan to finish and quickly said, "I'm interested, I'm interested! I'm coming to Jiangbei now!" "I think you should take a look at

After hanging up, Ran Fei called his secretary and said, "Help me book the earliest flight to Jiangbei!"

Then, he quickly packed his things and prepared to walk out.

"Huh? Director Liu, are you still here?"

Director Liu's mouth twitched slightly. 'I've always been here!'

However, he still said in a very gentle voice, "Yeah... Chairman Ran, do you have something urgent to deal with?"

"Yes!" Ran Fei thought about it and said, "Forget it. Come with me. We'll go to Jiangbei and talk about a collaboration with Professor Lin Fan!"

Discuss a collaboration with Professor Lin Fan!

Meet Professor Lin Fan!

Director Liu's heart raced.

He was a technician!

Lin Fan, who invented carbon-based photolithographic machines, super batteries, and other products, was his idol!

Now, he could see his idol!

It was as if he was making a pilgrimage!

How could his heart not beat faster?

Director Liu hurriedly said, "Alright!"

...

About three hours later, Ran Fei and Director Liu arrived in Jiangbei.

Ran Fei wanted to discuss the matter of the gaming helmet as soon as possible.

On the other hand, Director Liu wanted to see his idol as soon as possible! Therefore, they did not take a break. As soon as they got off the plane, they headed straight for the Coiling Dragon Villa.

At this moment, Lin Fan was sipping on Spirit Tea.

He heard the doorbell ring and slowly opened the door.

"Mr. Lin, we finally meet again," Ran Fei greeted him with a smile.

"This is Liu Dazhi, the technical director of our Dahua Group."

Liu Dazhi quickly said in a somewhat nervous tone, "Hello, Mr. Lin."

Liu Dazhi was 42 years old and was the technical director of Dahua Group.

He had seen many important figures and attended many high-level meetings.

At this moment, facing a young man who was only in his 20s, he was actually nervous!

If outsiders knew about this, who knew what kind of expression they would have?

However, Lin Fan did not mind it too much. He nodded his head calmly and said, "Come in."

When the two of them walked in, they were immediately attracted by the fragrance of Spirit Tea.

It was a refreshing smell.

Seeing the two of them staring at the Spirit Tea, Lin Fan could not help but say, "You guys should be thirsty, right? Sit down and have a cup of tea."

He also knew that Ran Fei and Liu Dazhi had specially rushed over from Peng City. Giving them some tea was also the right way to treat guests.

Following that, Lin Fan poured two cups of Spirit Tea and placed them in front of them.

The refreshing fragrance became even stronger, causing Ran Fei and Liu Dazhi to instinctively pick up the teacups and pour the contents into their mouths.

As soon as the Spirit Tea entered their mouths, their bodies and souls seemed to be cleansed in an instant.

They had spent more than three hours rushing from Peng City to Jiangbei, yet their fatigue had completely disappeared at this moment.

What replaced it was an unprecedented sense of ease and freedom!

Ran Fei and Liu Dazhi were both intoxicated by the tea and could not extricate themselves.

At this moment, Lin Fan asked, "Do you want to take a look at the gaming helmet?"

When Ran Fei heard Lin Fan's words, he finally reacted and stuttered, "Ah... Alright, alright."

Even though he responded like this, his eyes could not help but look at the Spirit Tea in front of him.

Lin Fan said, "If you want more, then pour it yourself."

Ran Fei waved his hand and said, "No, no. Let's look at the game helmet first."

What if Lin Fan thought that he was just enjoying himself and did not care about the gaming helmet?

Lin Fan did not think too much about it and said, "Alright, the gaming helmet is inside."

As he spoke, he got up and walked toward the bedroom.

As for Ran Fei and Liu Dazhi, who obviously wanted to continue drinking Spirit Tea, Lin Fan left them be.

Earlier, he had personally poured them a cup of Spirit Tea.

If they wanted to continue drinking it, they should pour some themselves!

Of course, he could not pour tea for them all the time.
