

## RICHEST MAN: GETTING 7 BILLION RED POCKETS TO START WITH

### Chapter 431 Explanation; Something Happened! (1)

After Ran Fei and Liu Dazhi tried out the gaming helmet with Lin Fan's help, the two of them opened their mouths wide and were dumbfounded.

After a while, they sighed.

"Heavens!"

"This helmet... could it be that it brought us through time?"

"It's exactly the same as the real world!"

"Unbelievable! This is unbelievable!"

"Really... It's a god-like experience!"

Liu Dazhi had already read the thesis and explained the functions of the gaming helmet to Ran Fei.

pandasnovel.com They had a certain understanding and expectations of the gaming helmet.

However, they had never expected that it could be done to this extent.

...

Lin Fan had already seen how Feng Zhixiang reacted when he wore the gaming helmet.

At this moment, he was already used to it.

Therefore, it was not too surprising.

After Ran Fei and Liu Dazhi were tired from playing, Lin Fan said, "Chairman Ran, how is it? Do you want to collaborate to produce the gaming helmet?"

When Ran Fei found out about the functions of the gaming helmet, he had already decided to work with Lin Fan.

Now, after experiencing it for himself, he was even more determined about this idea.

"Yes, yes!"

Ran Fei said after a pause, "Mr. Lin, please wait for me for a moment. I'll hold a video conference with the higher-ups and directors first."

Lin Fan also knew the rules of a large company. There were many things that one person could not decide alone.

Hence, he nodded and said, "Alright."

At the same time, Lin Fan was even more determined not to manage a company.

Otherwise, if he wanted to do something, he would have to hold meetings and explain himself.

It was too troublesome.

The video conference ended.

Ran Fei said, "Mr. Lin, Dahua Group is willing to take 15% of the shares and obtain the exclusive rights to the gaming helmets. In addition, 50% of the profits from all the gaming helmets will belong to you.

"Mr. Lin, what do you think?"

Ran Fei was extremely nervous when he said this.

He had personally experienced the gaming helmet and knew very well how big a sensation it would cause.

If Lin Fan was not satisfied, then he would have a headache.

This was because Ran Fei had tried his best to negotiate this with the higher-ups and directors.

Lin Fan said, "Alright, then let's do it this way."

Did he agree?

After a pause, Lin Fan said, "Also, I have a request. I want to produce a batch of gaming helmets as soon as possible."

"Good, good!" Ran Fei said excitedly. "Mr. Lin, don't worry. Our Dahua Group will definitely produce the gaming helmets in the shortest time possible!"

Then, he said, "I'll get someone to draft the contract now, okay?"

After a while, a freshly printed contract was handed to Lin Fan.

Lin Fan flipped through it quickly and signed his name. I think you should take a look at

Immediately after, Ran Fei also signed and stamped his seal.

At this point, the cooperation had been made official!

Ran Fei hugged the contract tightly and said, "Mr. Lin, we won't disturb you anymore."

Lin Fan nodded.

However, he soon realized that Liu Dazhi did not want to leave.

"Director Liu, is there anything else?" Lin Fan asked.

Liu Dazhi was a little embarrassed. "Ahem, Mr. Lin, you're my idol. Can you give me your autograph?"

Lin Fan rubbed his nose.

Did he have fans now?

Seeing that Lin Fan did not reply, Liu Dazhi said, "I know that this is a very difficult request..."

Lin Fan smiled. "What's so difficult about that?" Where should I sign?"

Liu Dazhi quickly flipped through his leather bag and took out the latest issue of Nature. He said, "Mr. Lin, can you sign here?" *novelnext.Com*

Lin Fan raised his pen and quickly signed his name on the cover of the journal.

Liu Dazhi looked at the flamboyant handwriting and hugged the journal tightly as if he had obtained a treasure.

He bowed deeply toward Lin Fan and said excitedly, "Thank you, Mr. Lin."

After saying that, he followed Ran Fei out with satisfaction.

...

The next day, the weather was clear.

After Lin Fan ate his breakfast, he did not put on the gaming helmet.

Instead, he drove the Cullinan toward Jiangbei University.

After all, he was a teacher now.

He had already been absent for a few days.

When Lin Fan came to the office, Xia Bing, Xia Xue, Nie Zhenjiang, Hao Zhiwu, Jiang Chaoqun, and Liu Qianqian were all focused on their studies and did not notice Lin Fan at all.

At this moment, Lil White, who was lying on Hao Zhiwu's shoulder, suddenly let out a loud meow.

Then, Lil White jumped down from Hao Zhiwu's shoulder and came to Lin Fan's feet, rubbing against him.

"Master, you're finally here. I missed you so much.

"When will you give me something delicious?"

Hao Zhiwu raised his head when he heard the meow.

"Professor Lin, you're here!" Hao Zhiwu said in surprise.

As his voice rang out, everyone raised their heads.

Nie Zhenjiang, Jiang Chaoqun, and Liu Qianqian were shocked.

Xia Bing's and Xia Xue's beautiful eyes flashed with a faint light.

Then, they hurriedly took out two bottles of energy drinks and passed them to Lin Fan.

Lin Fan smiled as he took the two bottles and drank a mouthful from each.

Seeing this...

Xia Bing's and Xia Xue's pretty faces were like blooming flowers, extremely brilliant.

## RICHEST MAN: GETTING 7 BILLION RED POCKETS TO START WITH

Chapter 432 Explanation; Something Happened! (2)

Lin Fan nodded at everyone. Then, he turned around and opened a bag of premium beef cat food.

The cat, Lil White, made a purring sound as it ate.

"It's delicious. It's good that Master is here!"

"You're so greedy!" Hao Zhiwu spat softly.

Then, he took a stack of draft paper and said, "Professor Lin, I have a problem here..."

Lin Fan took a casual glance and picked up a pen to write quickly.

Soon, a long reaction equation appeared on the draft paper.

"I see. I was wondering why I couldn't solve it." Hao Zhiwu suddenly understood."

"Professor Lin, where have you been these days?" Hao Zhiwu asked after a pause.

Xia Bing, Xia Xue, Nie Zhenjiang, Jiang Chaoqun, Liu Qianqian, and the others could not help but perk up their ears.

Obviously, they were also very curious.

Lin Fan said, "Didn't you say last time... that you want a device that allows you to enter the game with your consciousness?"

Hao Zhiwu nodded.

However, his face was still filled with confusion.

He had said this before.

However, what did this have to do with his problem?

It could not be that he had been creating equipment for consciousness to enter the game these past few days, right?

At this moment, hurried footsteps sounded from outside the corridor.

"Professor Lin, Professor Lin!"

Before the person arrived, there was an excited shout.

Soon, biology professors Wu Tian and Zheng Qian rushed into the office.

Wu Tian exclaimed, "Professor Lin, your latest thesis published on Nature, The Principles and Future of Gaming Helmets, is really amazing!"

Silence!

The entire office was silent!

Although Xia Bing, Xia Xue, Nie Zhenjiang, Jiang Chaoqun, Liu Qianqian, and the others, did not know what kind of paper it was, they all understood what it meant to publish a paper in Nature.

Lin Fan had not come to the office for the past few days because he was writing this thesis?

He wrote a paper for Nature in a few days?!

This...

This...

In the past, they often heard people say that Professor Lin Fan was a genius!

It was as easy as eating a meal for him to publish a paper in top journals like Nature and Science.

At that time, they did not believe it.

Now, they did!

Nie Zhenjiang, Jiang Chaoqun, and Liu Qianqian were dumbfounded.

Xia Bing's and Xia Xue's pretty faces were full of admiration.

"Professor Lin, you wrote a thesis on gaming helmets?" Hao Zhiwu shouted excitedly.

Lin Fan scratched his ears and said, "Yes."

"Can I take a look? Can I take a look?" Hao Zhiwu asked hurriedly.

Just like what he said a few days ago, he liked games.

In fact, the reason why he chose bioengineering was to create equipment for consciousness to enter the game.

Now, when Hao Zhiwu heard that Lin Fan had published a thesis on gaming helmets in Nature, how could he not be excited?

This meant that there was progress in the gaming helmet, big progress!

Zheng Qian handed over the journal.

Hao Zhiwu quickly flipped through it like a treasure.

However, he frowned very soon after.

There were many things inside that he could not understand at all.

At this moment, Wu Tian said, "Professor Lin, we didn't help at all this time. In the end, our names appeared as the second authors again. It's really... We're really too ashamed to accept it."

"Yeah," Zheng Qian added.

Although they said so, their faces were flushed and filled with joy.  
NovelNext.com

It was no wonder that Wu Tian and Zheng Qian were like this.

Within a year, they published two articles in top journals.

Even if it was as the second author, that was something they did not even dare to think about in the past.

What kind of glory was this?

Lin Fan waved his hand and said, "This is what you deserve."

Then, Wu Tian and Zheng Qian asked Lin Fan some questions about the nervous system in the thesis.

"Thank you for your patience, Professor Lin," Wu Tian said. "Let's go back and study this thesis. We won't disturb Professor Lin's lecture now." "I think you should take a look at

After saying that, he walked out with Zheng Qian.

At this moment, Zheng Qian seemed to have thought of something and said, "By the way, Professor Lin. Do you know what happened to Hu Tian's family?"

"What happened?" Lin Fan asked.

"Two days ago, I saw Hu Tian in a hurry to go home and asked her about it..." Zheng Qian said. "She didn't say anything. I thought you knew... It should be nothing."

Lin Fan looked at Zheng Qian and Wu Tian's receding figures. After some hesitation, he took out his phone and sent Hu Tian a WeChat message.

Lin Fan: [Teacher Tiantian, you went home?]

However, Hu Tian did not reply after a long time.

Lin Fan understood that something must have happened to Hu Tian's family.

Hence, he made a call.

After a while, a tired voice came from the other end.

"Lin Fan..."

"Teacher Tiantian, you went home?" Lin Fan asked.

"Yes," Hu Tian said.

"Did something happen at home?" Lin Fan asked again.

Hu Tian was silent for a moment before she said in a hoarse voice, "My second brother is injured."

Although Hu Tian did not specifically say what kind of injury he had suffered, Lin Fan knew that he was definitely heavily injured!

Otherwise, she would not be so sad.

In addition, Lin Fan had some interactions with Hu Tian's second brother and knew that his name was Hu Shaodong.

At first, Hu Shaodong wanted to show Lin Fan his strength through racing.

As they got to know each other, he found that Hu Shaodong was a resolute and iron-blooded person, so his overall impression of him was not bad.

Of course, the most important thing was that he was Hu Tian's second brother, his brother-in-law!

Thus, Lin Fan said, "Wait for me!"

One had to know...

Lin Fan had Sun Simiao's Medical Experience. It was definitely not a problem for him to treat his injuries.

Furthermore, Lin Fan had Medical Water, which was a magical treasure that could cure illnesses.

After Lin Fan hung up the phone, he said to Xia Bing, Xia Xue, and the other students, "I have something to do and will be out for a few days. If you have any questions, you can ask the other professors or wait for me to come back to solve them."

After saying that, he quickly walked out.

Lil White, who was eating premium beef cat food, shouted, "Goodbye, Master!"

At this moment, the computer science professors Qiu Junxiong and Liu Wei walked over with a copy of Nature.

They were about to say something when Lin Fan left them with a figure that was quickly disappearing into the distance.

"This..."

Qiu Junxiong couldn't help but be stunned.

At this moment, Hao Zhiwu noticed the two of them and walked over. He said excitedly, "Are you guys here to discuss The Principles and Future of Gaming Helmets with Professor Lin?"

"Professor Lin has something urgent to attend to and will be away for a few days.

"I'm Professor Lin's student, Hao Zhiwu. I know a little about this."

Qiu Junxiong and Liu Wei looked at each other and nodded. "Alright."

"What does this mean?" Hao Zhiwu pointed at a chart.

"And this algorithm..."

"This thing..."

Very soon... Qiu Junxiong and Liu Wei realized that Hao Zhiwu did not know anything.

He did not know anything at all!

He did not even understand the thesis at all!

He wanted to explain the thesis to them?

Qiu Junxiong and Liu Wei did not know whether to laugh or cry.

If he had completely understood the thesis, it would have been fine.

The problem was that he had not fully understood the thesis.

Therefore, Qiu Junxiong and Liu Wei only chatted for a while before finding an excuse to leave the office.

After all...

As teachers, it was not good for students to feel that their knowledge was shallow and that they could not even understand a paper.

When Qiu Junxiong and Liu Wei were holding Nature magazine and walking toward the teaching building with smiles on their faces, Wang Jun, who was also a computer science professor, happened to walk over.

Wang Jun looked at their proud backs and sighed. "A few days ago, Qiu Junxiong didn't recruit a new student. Instead, he dragged Lin Fan to the laboratory.

"If only I had discovered it earlier... The Principles and Future of Gaming Helmets!"

Wang Jun shook the Nature journal in his hand and let out a long sigh.

His heart was filled with regret.

If he had discovered it earlier, perhaps his name would have appeared as the second author.

## RICHEST MAN: GETTING 7 BILLION RED POCKETS TO START WITH

Chapter 433 - 433 Tragic; Special Medicine!

433 Tragic; Special Medicine!

Sha City.

In a vast courtyard.

Old Master Hu Nanshan, Hu Kaixuan, Hu Guodong, Hu Tian, and many other members of the Hu family were standing at the door. Their faces were full of sorrow, and there were people sobbing and discussing.

“Shaodong... Shaodong...”

“I hope it’s not true.”

“Why is this happening?”

Back then, when Old Master Hu Nanshan celebrated his birthday, he received a lot of Spirit Tea from Lin Fan.

If it was consumed normally, it would definitely have the effect of prolonging life.

Now, however, Hu Nanshan’s face looked even more aged than when he had celebrated his birthday.

When Hu Nanshan heard the voices of the crowd, he raised his eyebrows.

“Why are you crying? Shaodong was injured for the sake of the citizens. We must be proud of him! I’ll see who dares to cry later!”

It had to be said that Hu Nanshan had a very high status in the Hu family.

As soon as he finished speaking, everyone from the Hu family stopped sobbing.

Hu Kaixuan took a deep breath and said, “We must be proud of Shaodong!”

At this moment...

Three jeeps and an ambulance slowly stopped.

A large group of soldiers and doctors carried an unconscious man whose face was covered in wounds.

This man was Hu Tian's second brother, Hu Shaodong!

If one looked closely, one would notice that Hu Shaodong's face was not the only part injured. There were many wounds on his body.

In fact, his legs had completely disappeared.

He... He had become disabled!

Even though everyone in the Hu family already knew about this and even though the old man had already reprimanded everyone, everyone's eyes turned red after seeing Hu Shaodong's miserable appearance.

At this moment, a middle-aged man with an emblem on his shoulder came to Hu Nanshan.

"Old Leader, I'm sorry. I couldn't protect Shaodong well and caused him to be so seriously injured. I..."

"What are you talking about?" Hu Nanshan interrupted.

"He's a warrior!"

"Since he's a warrior, he should be prepared to make sacrifices at any time!"

"Also, a warrior should be the one protecting others."

Hu Nanshan could not help but look at Hu Shaodong. "We... I'm proud of him!"

"Yes, Sir!" The man with the emblem on his shoulder shouted.

Then, Hu Shaodong was carried into the room.

As for the soldiers with the emblem, they did not stay any longer. After saluting Hu Nanshan, they turned around and left.

After all, they were soldiers and had many missions to deal with.

After the soldiers left, the Hu family looked at the doctors and nurses who were checking Hu Shaodong's hideous wounds and changing his dressing. They could not help but cry.

The bone-scraping pain woke Hu Shaodong up.

He rolled his eyes with difficulty and said in a hoarse voice, "I... I... This is..."

Zhong Hongting choked and said, "Shaodong, it's okay. It's okay. You're home now..."

Hu Shaodong blinked his eyes in realization. A hot tear rolled down his face.

Who said that men did not cry? Men did not cry just because they had not reached that point of sadness!

At this moment, the phone in Hu Tian's pocket vibrated slightly.

She looked at the caller ID. It was Lin Fan.

Although Hu Tian was very sad, she still pressed the answer button.

"Teacher Tiantian, I've arrived at the entrance of the courtyard," Lin Fan said.

Hu Tian sniffed and said, "Alright, I'll come and fetch you now."

After all, there were guards guarding the entrance of the courtyard where the Hu family lived. Outsiders were not allowed to enter and exit as they pleased.

When Hu Tian saw Lin Fan, it was as if she had found someone to rely on. She could not help but throw herself into his arms as tears rolled down her cheeks.

Lin Fan patted Hu Tian's shoulder lightly and said, "It's okay. I'm here. Second Brother will be fine... Take me to see him first."

Hu Tian thought that Lin Fan was comforting her and nodded her head gently.

Thus, the two of them walked side by side to the Hu family's courtyard.

When Lin Fan saw that Hu Shaodong was lying on a hospital bed with injuries all over his body and realized that he had lost both his legs, his expression changed slightly.

Even though he had Sun Simiao's Medical Experience, there was no way to treat someone who had lost both legs.

Now, he could only place his hopes on Medical Water. **NovelNext.com**

In fact...

Lin Fan did not have much hope for it.

After a while, Lin Fan said, "I have a bottle of special medicine here. It should be able to help Second Brother Hu."

As he spoke, he spent ten million yuan to buy a bottle of Medical Water from the system.

Everyone from the Hu family could not help but look at Lin Fan.

Hu Nanshan also noticed Lin Fan and said, "You're so thoughtful."

Clearly, he still remembered Lin Fan.

This was normal.

After all, it was all because of Lin Fan that Qin Weiming and Zhang Jian, the two pillars of the nation, asked Commander Yue Zixiao to come over to congratulate him.

Lin Fan said, "I'll go give this to Second Brother Hu now."

Drink it now?

How could Hu Shaodong drink something casually in his current condition?

Hu Nanshan was about to refuse.

However, he soon thought of the Spirit Tea.

During this period of time, he often drank it.

Every time he drank a cup, he felt refreshed.

After a while, Hu Nanshan felt that all the small problems in his body had disappeared.

If he had heard the news that Hu Shaodong was seriously injured and lost both his legs in the past, before he started drinking the Spirit Tea, he would have died.

Hu Nanshan looked much younger than before!

Lin Fan had magical tea leaves.

Perhaps, he also had a magic potion!

Thinking of this, Hu Nanshan said, "Then I'll have to trouble you, Lin Fan."

With Hu Nanshan's approval, the others naturally did not say anything.

When Lin Fan came to Hu Dong's side, Hu Tian saw his miserable state up close and could not help but hold Lin Fan's hand tightly.

Lin Fan patted the back of her hand and said softly, "It'll be fine."

He was very sure.

Even though Lin Fan still did not know if the Medical Water would have any effect on him, he had the system and seven billion red packets!

There must be a way to solve the problem of this man's legs.

Lin Fan said, "Second Brother Hu, please open your mouth."

Hu Shaodong blinked his eyes and opened his trembling mouth.

Under everyone's gaze, he slowly drank the Medical Water.

When the Medical Water entered his stomach, Hu Shaodong felt a warm current flowing through his stomach.

Then, his body, which was originally in extreme pain, quickly became relaxed and comfortable.

In the eyes of outsiders, the hideous wounds on Hu Shaodong's body were healing at a speed visible to the naked eye.

This scene...

Everyone's eyes almost popped out of their sockets.

## RICHEST MAN: GETTING 7 BILLION RED POCKETS TO START WITH

### Chapter 434 - 434 Mission; Toy Factory!

#### 434 Mission; Toy Factory!

Lin Fan had been paying attention to the changes in Hu Shaodong's body.

After pondering for a moment, he spent another ten million yuan to buy a bottle of Medical Water from the system.

"Second Brother Hu, drink another bottle."

Hu Shaodong was still in a state of shock.

Hence, he did not hear Lin Fan's words at all.

Lin Fan could only open his mouth again, "Second Brother Hu, open your mouth."

Hu Shaodong finally reacted and replied, "Ah... Alright."

His voice was no longer as hoarse as before, and it sounded energized, as though his health had returned to normal.

The second bottle of Medical Water went down his throat.

Hu Shaodong felt warm and comfortable.

To outsiders, the wounds on his body healed even faster.

Lin Fan had been staring at the changes in Hu Shaodong's body. Then, he spent another ten million yuan to buy a bottle of Medical Water from the system.

A bottle of Medical Water could cure countless illnesses.

After three bottles, the effects were multiplied!

In the blink of an eye, the wounds on Hu Shaodong's body lessened.

About ten minutes later...

All his wounds had healed.

Seeing this...

Lin Fan sighed.

Hu Shaodong's legs had not recovered yet.

Hu Tian could not help but ask, "Brother, how do you feel?" *novelNext.COM*

Hu Shaodong clenched his fists and said in a powerful voice, "I'm fine. I feel like I'm fine now!"

Hu Nanshan nodded repeatedly.

Then, he said to Hu Shaodong, "Shaodong, hurry up and thank Lin Fan!"

Even Hu Nanshan had never heard of a medicine that could heal wounds in such a short time.

Medicine?

In Hu Nanshan's opinion... Perhaps, this could not simply be called medicine!

It was divine medicine!

Without a doubt, its value was immeasurable!

Yet, Lin Fan was willing to take out three bottles in a row. This was definitely a huge favor!

Hu Shaodong also understood this and said seriously, "Lin Fan, thank you."

Lin Fan waved his hand and said, "Second Brother, you don't have to be so polite... Besides, I didn't really manage to help you."

As he spoke, he could not help but look down at Hu Shaodong's legs.

"It's good enough," Hu Shaodong said dejectedly. "After all, it's impossible for legs to grow back."

At this moment, Lin Fan's head rang out with a clear sound.

[Ding! Mission: Buy one million toys and make 100 different toys. Reward: Perfect artificial limbs, as well as the machinery, tools, and principles for making artificial limbs.]

When Lin Fan heard that, his expression changed slightly. "I have a way to make Second Brother Hu stand up!"

As soon as he said this, everyone present revealed an unconcealable excitement.

However, Lin Fan then said, “Teacher Tiantian, do you know if there’s a large toy factory in Sha City?”

A large toy factory?

Did he not say that he could make Hu Shaodong stand up?

Why was he suddenly asking about a toy factory?

Although everyone was puzzled, Hu Tian still replied, “There are some toy factories in the north of the city.”

Lin Fan nodded. “Alright.”

After saying that, he did not say anything else and strode out.

Only the Hu family members were left looking at each other.

Was the toy factory related to helping Hu Shaodong stand up?

He could not possibly use a toy to stand up, right?

Lin Fan sat in the Cullinan and headed toward the north of the city.

After a while, he arrived in front of a rather large factory called Qinqin Toy.

The security guard at the door quickly noticed Lin Fan and said, “Hello, what’s the matter?”

Lin Fan said, “Tell your factory manager that I want to buy the toy factory!”

Lin Fan’s thoughts were simple.

The mission was to buy one million toys.

It would definitely be very slow to buy them in bulk.

The simplest and most direct method was to buy the entire factory.

In this way, the toys in the factory would be bought by him!

In addition, Lin Fan needed to make 100 different toys.

It would be more convenient to buy a factory and make them himself.

However, the security guard was stunned by his words.

Anyone who suddenly heard that someone wanted to buy a huge factory would be a little stunned.

Moreover, the other party was a young man.

At this moment, a Porsche Cayenne drove over from afar.

The security guard immediately stood up straight and said, "Hello, Factory Manager Yao!"

Then...

A middle-aged man with a big belly slowly walked down.

Factory Manager Yao nodded to show his greeting.

"What happened here?" he asked.

The security guard hesitated for a moment, but he did not know what to say.

Should he directly say that this young man wanted to buy the toy factory?

The factory manager would definitely scold him, right?

Lin Fan said, "You came at the right time. I want to buy your factory!"

Factory Manager Yao was also stunned for a moment.

Obviously, he did not expect Lin Fan to have such a request.

Factory Manager Yao could not help but size Lin Fan up. He realized that Lin Fan's expression was calm, as if he was not joking.

After a while, Factory Manager Yao finally said, "Our Qinqin Toy Factory is doing very well. Our annual profit is more than ten million yuan, and it's still expanding. For the time being, I have no intention of selling it, so I can only apologize to you."

If Lin Fan were just an ordinary young man, Factory Manager Yao would not have bothered saying so much.

In fact, he would not even have gotten out of the car.

It was because Lin Fan was driving a luxury car that was worth tens of millions of yuan—Rolls-Royce Cullinan!

Lin Fan acted like he did not hear him and said, “500 million yuan!”

Factory Manager Yao’s body stiffened slightly.

500 million yuan!

In fact, their factory was only worth some money.

The machines and raw materials were not worth much money.

If it were a big brand toy factory, there might be some brand value.

However, Qinqin Toy Factory had only been established for a few years and had no brand value at all.

500 million yuan!

It definitely exceeded the actual price of the factory!

Seeing that Manager Yao did not say anything, Lin Fan said again, “1 billion yuan!”

One billion yuan!

This was not the actual price of the factory but several times more!

Factory Manager Yao felt his throat go dry.

Seeing that Manager Yao still did not answer, Lin Fan frowned slightly and said, “Two billion yuan!”

At this moment, Factory Manager Yao finally reacted and hurriedly said, “I’ll sell it!”

“If you need it, I can leave all the materials, workers, equipment, sales channels, and so on to you!” Factory Manager Yao continued.

Not selling?

It was just that the price was not high enough!

Lin Fan nodded his head in satisfaction. “Alright!”

Seeing that Manager Yao was still standing beside him, he frowned again and asked, “What are you still standing there for? Go and draw up the contract. Today, I’ll become the boss of Qinqin Toy Factory!”

“Yes, Sir!” Factory Manager Yao hurriedly responded and jogged back to the car. Then, he quickly went into the factory.

The reason why they came to work in the toy factory was definitely not because they liked toys.

It was just to make money.

Now that they could double their salary, they naturally did not want to miss this chance.

As for what was produced, what did it matter?

Lin Fan nodded. “You don’t have to agree immediately. Today is a paid day off. Go back and think about it. Just come back tomorrow.”

## RICHEST MAN: GETTING 7 BILLION RED POCKETS TO START WITH

Chapter 435 - 435 Continuous Level-Ups; Announcement!

435 Continuous Level-Ups; Announcement!

Factory Manager Yao's name was Yao Hanqing.

Even though he was the factory manager, the entire factory did not belong to him alone.

Instead, it was opened by three people, including him.

Normally, it would be difficult for one to even get a job in a factory like this.

If they wanted to sell it, it would be even more troublesome and take a longer time.

After all, everyone had different thoughts.

Some people did it for their ideals, while others did it for their interests...

However, in just two hours, Qinqin Toy Factory quickly drafted the contract and completed the ownership change.

What ideals?

What interest?

In front of two billion dollars, they were nothing!

After the transaction was completed, Yao Hanqing's entire face broke into a smile.

Lin Fan's expression remained the same. He focused on the mission system.

[Ding! Mission: Buy one million toys (1 million/1 million) and make 100 different toys. Reward: Perfect artificial limbs, as well as the machinery, tools, and principles for making artificial limbs.]

The mission was already half completed! At the same time, 200,000 red packets instantly appeared on his phone!

However, Lin Fan did not immediately go to collect the red packets.

At this moment, a series of notifications rang out in Lin Fan's mind.

[Ding! System upgrade, Level 8!]

[Level 8 reward: 200 yuan for every breath; 200 yuan for every second of sleep, and 200 yuan for every step taken. Rewards are distributed at 12 a.m. daily.]

[Upgrade cost: 1.62133 billion/1 billion (not including gifts and gambling. In addition, all items obtained from the system are prohibited from being traded.)]

[Ding! [System upgrade, LV9!]

[Level 9 reward: 500 yuan for every breath; 500 yuan for every second of sleep, and 500 yuan for every step taken. Rewards are distributed at 12 a.m. daily.]

[Upgrade cost: 102,330,000/2 billion (not including gifts and gambling. In addition, all items obtained from the system are prohibited from being traded.)]

[Ding! Congratulations, you've completed the hidden mission. You've spent a total of one billion yuan and received five platinum packets!]

As the series of voices rang out in his mind, even Lin Fan could not help but curl his lips up.

He had leveled up two levels in a row!

When he was at level 7, if he only counted the money he earned from breathing, walking, and sleeping, it would be about seven million yuan a day.

At level 9, however, that sum had increased by five times!

In other words, Lin Fan could earn more than 35 million yuan just by breathing, walking, and sleeping every day!

He would get one billion a month!

That was a terrifying number!

In fact, Lin Fan did not care about this bit of money.

The key was the five platinum packets!

Lin Fan had never opened a platinum packet before, but a golden packet had given him Spirit Tea Seeds, double shares coupon, and so on. There was a high chance of him getting good stuff.

Platinum packets were definitely worth looking forward to!

...

After a while, Lin Fan finally collected his thoughts.

He looked at Yao Hanqing, who was holding his phone and counting the balance back and forth. He had yet to leave. Lin Fan asked, "Is there anything else?"

After all, he could leave now that payment had been made.

Yao Hanqing hesitated for a moment and said, "Mr. Lin, I wonder if I can continue working in the factory?"

"Don't worry, I won't take the shares. I'll just be an ordinary manager.

"I've been a toy worker for more than ten years and a factory manager for a few years. I've been in charge of the management, operation, and production of the toy factory, from toy production to offline sales and after-sales... I'm very familiar with the entire process..."

The current him could be said to have complete freedom of wealth.

However, Yao Hanqing had a feeling that if he followed Lin Fan, he would climb higher and go further! *noveLNext.COM*

Lin Fan did not care about management, operations, sales, and so on.

However, production?

This was what Lin Fan needed!

After all...

Next, he needed to make 100 different types of toys.

Only then could he complete the mission.

“Can you make 100 different toys?” Lin Fan asked.

Yao Hanqing did not understand why he would ask such a question.

However, he still replied immediately, “If the toy is considered different after slight modifications, then I can make hundreds or thousands of toys!”

Lin Fan nodded. “Alright! Then teach me how to make 100 different toys now.”

Teach him how to make 100 different toys?

Yao Hanqing was stunned again.

This...

A super tycoon who spent two billion yuan to buy a toy factory wanted to learn how to make toys?

“Why? Can’t I?” Lin Fan frowned.

Yao Hanqing quickly said, “Of course... I’ll go to the workshop with you now. There are materials and tools for making all kinds of toys.”

At this moment, in the workshop, a group of workers were either standing and operating machines, doing manual work, or welding.

When they saw Yao Hanqing, they shouted, “Hello, Factory Manager Yao!”

Obviously, these workers still did not know that their boss had been quietly replaced.

Yao Hanqing coughed lightly and said, “Everyone, stop what you’re doing!”

...

When everyone heard this, they stopped their machines and gathered around.

Yao Hanqing continued, "I have something to announce to everyone. From today onward, Mr. Lin is the new boss of our Qinqin Toy Factory!"

Hence, all the employees looked at Lin Fan and said in unison, "Hello, Boss Lin!"

Their change of words could be said to be very simple.

This was normal.

They usually did not interact with people like bosses.

In their hearts...

As long as they worked normally and the boss paid them normally... it did not matter who the boss was.

Lin Fan said, "Hello, everyone. I want to announce something. Qinqin Toy Factory will soon produce some other things. Those who want to stay can continue to stay. If you stay, your salary will double! Those who don't want to stay can go through the resignation procedures, and we'll pay N+2 compensation."

After all, as long as he completed the mission, he would be able to obtain the machinery, tools, principles, and other things needed to make prosthetic limbs.

Since he had bought the factory, he would go with the flow.

Otherwise, it would be a waste.

As for the compensation and doubling their salary, Lin Fan did not care about it at all.

"Really?"

"I'll get double my salary?"

“I’ll stay!”

“I’ll stay!”

“Me too!”

...

As Lin Fan’s voice fell, the entire factory was filled with intense shouts.

The reason why they came to work in the toy factory was definitely not because they liked toys.

It was just to make money.

Now that they could double their salary, they naturally did not want to miss this chance.

As for what was produced, what did it matter?

Lin Fan nodded. “You don’t have to agree immediately. Today is a paid day off. Go back and think about it. Just come back tomorrow.”

## RICHEST MAN: GETTING 7 BILLION RED POCKETS TO START WITH

Chapter 436 - 436 Mission Completed; You Can Stand Up Soon!

436 Mission Completed; You Can Stand Up Soon!

“There’s no need to consider!”

“I agree!”

“I agree too!”

All the workers shouted. The entire workshop was noisy. No one chose to leave.

After all, their salary would double!

What if they went back and thought about it for a night, and in the end, they lost their chance?

They would definitely regret it for the rest of their lives!

Seeing this...

Lin Fan could not help but frown.

He did not like this kind of noisy scene.

Especially since he still had a mission to complete. Hu Tian and Hu Shaodong were still waiting for him at home.

Yao Hanqing, who was standing at the side, seemed to have noticed Lin Fan's unhappiness. He hurriedly said, "Those who want to stay, go to the square and register with Manager Qu!

"The quota is limited! If you're late, we'll take it as an application to resign! After registration, you can come back to work officially tomorrow!"

He did not think that Lin Fan was joking when he said that he would double their salary and pay N+2 compensation.

One had to know...

Lin Fan had just spent two billion to buy Qinqin Toy Factory.

After Yao Hanqing finished speaking, the employees no longer dared to make any noise and rushed to the square.

Soon, the entire workshop became empty and silent.

Lin Fan nodded in satisfaction. "Not bad."

Even though it was just two simple words, in Yao Hanqing's ears, they sounded like beautiful music.

"Thank you for your praise!" Yao Hanqing said happily.

Lin Fan said, "Now, teach me how to make toys."

"Alright," Yao Hanqing said.

Yao Hanqing held a small motor and plastic cover while saying, "These are the parts of the toy car. You just need to assemble them."

As he spoke, he assembled about a dozen components together.

Soon, a mini car appeared in front of him. After installing the battery, it could run at a relatively fast speed.

A minute after Yao Hanqing had finished assembling it, Lin Fan finished assembling another one.

This was normal...

After all, making this toy was very simple.

Lin Fan had a photographic memory, so how could he not finish assembling it quickly?

Yao Hanqing looked at Lin Fan's quick and perfect installation of the toy and could not help but praise, "Mr. Lin, your assembly speed is so fast!"

Lin Fan ignored him and focused on the mission system.

[Mission: Buy one million toys (1 million/1 million) and make 100 different toys (1/100). Reward: Perfect artificial limbs, as well as the machinery, tools, and principles for making artificial limbs.]

Lin Fan said, "Make the next toy."

"Alright," Yao Hanqing said.

Then, they assembled Thomas & Friends, different Ultramans, Iron Man in various positions, many toy guns, excavators, slides, and so on.

It had to be said that there were indeed many types of toys in Qinqin Toy Factory.

Yao Hanqing was also proficient in making all kinds of toys.

In the blink of an eye, three hours had passed.

Yao Hanqing picked up another set of components and was about to assemble them.

At this moment, Lin Fan, who had been silent all this while, suddenly said, "That's enough."

That was because a clear notification sounded in his mind.

[Ding! Mission Completed: Buy one million toys (1 million/1 million) and make 100 different toys (100/100). You've obtained perfect artificial limbs, as well as the machinery, tools, and principles for making artificial limbs.]

Mission accomplished!

At the same time, Lin Fan's mind was filled with a lot of knowledge about artificial limbs.

After a while, a smile appeared on his face.

According to the prosthetic knowledge provided by the system, he knew that Hu Shadong could stand up!

When Yao Hanqing heard Lin Fan's words, he heaved a sigh of relief.

After making toys for three hours, he was a little tired.

Lin Fan said, "Alright, that's all for today. I'll come back tomorrow."

"Alright," Yao Hanqing replied.

Then, Lin Fan did not stay any longer and drove the Cullinan into the distance.

...

In the courtyard of the Hu family...

After Hu Shaodong took three bottles of Medical Water, his overall condition was no different from before, except that his legs still had not grown back.

There was no difference?

That was not true!

In fact, there was still a difference.

Hu Shaodong had been suffering from ringing in his ears, nasal obstruction, sore throat, and other ailments for many years, but all of them had disappeared without a trace.

Hu Shaodong saw that the Hu family members still had some sadness on their faces, so he forced a smile and said, "Dad, Mom, Uncle, Aunt, you don't have to be unhappy. I think it's good this way. In the future, I don't have to train or run around. I can always be by your side."

Everyone could tell that he was trying to comfort them.

They suppressed their urge to cry and nodded.

"Lin Fan had that magic potion. Since he said that he can make Shaodong stand up again, I believe it'll happen!"

When Hu Shaodong heard this, his heartbeat quickened.

Soon, however, he shook his head helplessly.

A method?

What method?

If Lin Fan did have a method, he would have said it out loud just now.

It was impossible to regrow legs out of thin air!

“Tiantian, didn’t you just call Lin Fan? Did he say what he was doing?”

Hu Tian hesitated for a moment and said, “He... He said he went to the toy factory.”

Her aunt clearly wanted Hu Tian to say something to comfort Hu Shaodong.

*ηOvelnext.cOM*

However, if she really said words of reassurance, what would Lin Fan do when he came?

At this time, the greater the hope, the greater the disappointment!

It would also make things difficult for Lin Fan.

Hu Tian did not want Lin Fan to be in a difficult position.

In fact...

When Lin Fan left the Hu Family, he said that he wanted to go to the toy factory.

However, Hu Shaodong and the Hu family still had a glimmer of hope in their hearts.

What if...

What if they had heard wrongly?

What if Lin Fan went to find a godly potion that could help Hu Shaodong stand up?

At this moment, after hearing Hu Tian’s words, the last bit of hope in everyone’s hearts turned into a bubble.

“What is he doing in the toy factory now?” someone asked in a low voice.

Hu Shaodong smiled and said, "Maybe Lin Fan went to the toy factory because he wants to customize toys for my future nephews and nieces... Not bad! Tiantian, it's time for you to have a child."

When Hu Tian heard this, her pretty face could not help but blush.

When the Hu family heard this, their mood improved slightly, and a hint of anticipation appeared on their faces.

At this moment, the sound of brisk footsteps could be heard from outside.

It was Lin Fan, who had been out for a few hours!

At this moment, Lin Fan walked in with a big box and shouted, "Second Brother Hu, you'll be able to stand up soon!"

As soon as he said this, Hu Nanshan, Hu Tian, Hu Kaixuan, and Hu Shaodong, who was lying on the bed, turned around.

All eyes were on Lin Fan!

Hu Shaodong could stand up soon!

Everyone's hearts began to beat faster and faster!

## RICHEST MAN: GETTING 7 BILLION RED POCKETS TO START WITH

### Chapter 437 Replying; Magical Prosthetic Legs!

Hu Tian could not help but walk forward and say, "Lin Fan, is what you said true?"

Lin Fan smiled. "When have I ever lied to you? Don't worry!"

As he spoke, he gently patted the back of Hu Tian's hand.

Then, he carried the big box to the bed.

Under everyone's gaze, Lin Fan took out prosthetic legs from the big box.

Lin Fan introduced, "These are prosthetics. After they're installed, they can perfectly replace the original legs.

"Second Brother Hu, your whole body might be a little numb later."

"Alright." Hu Shaodong nodded.

Lin Fan lifted Hu Shaodong's lower body.

Even though Hu Shaodong's injuries had all healed, one could still see the hideous wounds on his legs.

Many people from the Hu family felt their hearts tremble. They felt extremely sad.

Lin Fan took out the prosthetic legs and compared them to the thighs.

Then, he connected one end of the prosthetic legs to Hu Shaodong's broken ones.

Just as Lin Fan said, Hu Shaodong's whole body felt numb.

At this moment, Hu Shaodong seemed to have lost consciousness. Even his brain stopped thinking.

In the eyes of the Hu family...

The liquid on the prosthetic leg suddenly squirmed violently and seeped into Hu Shaodong's broken legs.

It was very strange.

About three minutes later, the liquid disappeared.

The prosthetic legs were perfectly connected to Hu Shaodong's body.

It was as if...

It was as if these were Hu Shaodong's legs and not artificial limbs.

At this moment, the numbness in Hu Shaodong's body gradually disappeared.

"Are you done?" he asked after a pause.

Lin Fan nodded. "Alright, Second Brother Hu. Try standing up."

"Alright," Hu Shaodong replied.

The next moment, he was completely stunned.

He really stood up.

He could walk forward, walk back, and even spin!

He was extremely agile and free!

It was as if his legs had grown back!

He jumped excitedly.

He jumped two meters high!

His head hit the roof.

Then, he landed steadily on the ground.

This scene not only shocked Hu Shaodong but also everyone in the Hu family!

It was as though his legs had grown back!*ηOvelnext.cOM*

He had a pair of super legs!

Hu Shaodong widened his eyes and looked down at his legs. His face was filled with disbelief.

In fact, he did not have much hope for the prosthetic limbs at first.

After all, they were just prosthetics.

However, what was the situation now?

Even though Hu Shaodong had experienced many things, at this moment, he could not help but stutter, "Lin... Lin Fan...My... These are..."

Lin Fan said, "These are prosthetics. Are they useful?"

Hu Shaodong nodded vigorously and said, "But why do I feel like they're really my legs? No! They're even better than my own legs! Especially in terms of strength and speed!"

As he spoke, he kicked his legs and ran quickly.

Lin Fan explained, "This is normal. This is because the artificial limbs are already connected to your nerves and tendons. Of course, you can control them like your own legs.

"As for the strength and speed, it's because of the materials."

"That's great! Shaodong has legs again!" cried his aunt happily. I think you should take a look at

After a pause, the aunt continued, "This... Would his legs break? How should he take care of them? Are they made from metal? Will they be harmful to the body?"

She was not doubting Lin Fan.

It was out of concern for her family member.

After all, she did not know about artificial limbs.

Lin Fan was not angry and explained, "Don't worry, the materials used for these prosthetic limbs are far beyond medical grade. They won't cause any harm to the body. As for the damage to the prosthetic limbs, they'll be damaged if they're blown up by artillery shells.

"But the prosthetics are very stable. They're water and fire-resistant. There's no need to take special care of them."

When everyone heard Lin Fan's words, the admiration on their faces intensified.

The prosthetics could be considered a pair of transplanted legs. They were stronger and more perfect!

Hu Hu Nanshan shouted, "Shaodong, what are you doing? Hurry up and thank Lin Fan!"

The prosthetics were definitely a mystical item that could be compared to Medical Water!

Hu Nanshan knew that Lin Fan must have paid a huge price for it!

Hu Shaodong also understood this and said solemnly, "Lin Fan, thank you!"

"It's just a small matter." Lin Fan smiled. "Besides, you're Tiantian's second brother. So, there's no need to thank me."

In order to thank Lin Fan for saving Hu Shaodong and giving him the prosthetics, the Hu family specially organized a grand banquet.

Without a doubt, Lin Fan was the main character of this meal.

Everyone in the Hu family, including Old Master Hu Nanshan, kept toasting Lin Fan.

Everyone ate and drank happily.

...

The night gradually darkened.

Hu Tian and Lin Fan walked side by side on the small hill behind the courtyard.

"Lin Fan, thank goodness I have you." Hu Tian sighed sincerely.

As she spoke, she could not help but think of the scene of Lin Fan solving a math problem seriously.

She thought of the scene of Lin Fan writing calligraphy elegantly.

She thought of the scene when Lin Fan came to congratulate her grandfather on his birthday.

Finally, she thought of the scene of Lin Fan coming to her house.

Hu Tian's face turned red, and her entire body went limp. She could not help but lean toward Lin Fan.

$O(\epsilon^*)$

$(3)(\epsilon^*)$

...

Lin Fan and Hu Tian only walked down the hill when it was very late. Their faces were slightly red.

After being blown by the cool breeze for a while, their faces gradually returned to normal.

At this moment...

Hu Tian seemed to have thought of something and asked, "Lin Fan, what were you doing at the toy factory today?"

[pandasnovel.com](http://pandasnovel.com) In fact, she had been curious about this for a long time.

However, there were too many people in the Hu family's compound earlier.

She was worried that Lin Fan would be put in a difficult position, so she did not ask.

Lin Fan said, "I did some research and developed the prosthetics."

Research?

Moreover, he did research in a toy factory?!

He only studied it for an afternoon...

Yet he had developed prosthetics with such miraculous effects!

This...

This...

Hu Tian knew that Lin Fan had solved several world-class mathematics problems and invented the earthquake prediction device, the human islet recovery drug, the super battery, the carbon-based photolithographic machine, and many other things. He was called a super genius by many people.

However, when Hu Tian heard Lin Fan's answer, she was still shocked.

She looked at Lin Fan, and her beautiful eyes flashed.

After a gust of wind blew past, Hu Tian's pretty face, which had finally returned to normal, turned red again. She approached Lin Fan again.

Then, she pulled Lin Fan back to the small hill.

## RICHEST MAN: GETTING 7 BILLION RED POCKETS TO START WITH

### Chapter 438 - 438 One-Stop Service; Return!

438 One-Stop Service; Return!

The next day, the sky was clear.

After Lin Fan finished his breakfast, he drove the Cullinan toward Qinqin Toy Factory.

However, he did not drive directly into Qinqin Toy Factory.

Instead, he slowly stopped in an empty space not far from Qinqin Toy Factory and focused his attention on the system.

[Do you wish to extract the prosthetic maker?]

“Yes!”

In the next moment, several large machines suddenly appeared on the empty ground.

Although these complicated-looking machines were very strange in shape and had many circuits, Lin Fan knew every part, button, and function that was involved.

Lin Fan sized the machines up and said to the super smart watch on his wrist, “Lil White!”

“Master, I’m here!” The super smart watch flickered slightly and made a clear sound.

Lin Fan said, “Help me register a patent for the prosthetics as well as the prosthetic maker.”

It had become Lin Fan’s habit to register a patent for new things.

If it were an ordinary person, registering a patent would be very complicated and cumbersome.

However, it was very simple for Lin Fan.

Since that was the case, why not?

“Yes, Master!” Lil White said.

It had already registered several patents, so it could be said to be familiar with the process.

In just a few minutes, electronic patent certificates appeared on the screen.

Lin Fan nodded in satisfaction and muttered, "Now, I only need to purchase the raw materials and produce the prosthetics... These raw materials don't seem to be easy to obtain. It's troublesome!"

At this point, Lin Fan could not help but frown.

He hated trouble!

"Master, if it's raw materials, I can help you search and transport them."

"Is that so?" Lin Fan's eyes lit up.

"Yes, Master. In addition, I can also control the prosthetic maker to produce and sell the products. I can even handle after-sales," Lil White said.

Lil White could search for raw materials, then carry out mass production, sales, and after-sales.

This was a one-stop service!

Lin Fan praised, "Lil White, you're not bad!"

Suddenly, a big smiley face appeared on the display screen of the super smart watch, and its voice became even more pleasant. "Thank you for the compliment, Master."

Lin Fan thought for a while and said, "Right, Lil White. Can you adjust the materials of the prosthetics? I just need to make their strength, speed, and quality similar to that of a normal human leg."

Lin Fan had witnessed Hu Shaodong's ability after he put on the prosthetic legs. He understood that if a large number of disabled people were to use his

prosthetic limbs, it would probably bring some unnecessary trouble to the world.

“No problem!” Lil White replied.

With Lil White’s promise, Lin Fan did not hesitate anymore. He dialed Yao Hanqing’s number and asked him to arrange for some people, trucks, and cranes to come over.

It had to be said that Yao Hanqing’s execution was not bad.

After a while...

Two large trucks, a dozen workers, and a large crane arrived at the open space.

“Hello, Boss Lin,” Yao Hanqing said. *noveLNext.COM*

Immediately after, more than a dozen workers said in unison, “Hello, Boss!”

Their tone was very respectful and sincere.

It was no wonder.

After all, Lin Fan had given Yao Hanqing two billion yuan and doubled the employees’ salaries.

Lin Fan nodded and said, “Send these machines to the factory.”

“Yes, Sir!” everyone shouted in unison.

They all worked hard as if they wanted to show their hard-working appearance in front of Lin Fan.

After the workers moved the machines to the factory, Lin Fan handed everything over to Lil White.

Not long after, large trucks drove over.

There were many spare parts piled up inside, as well as many small robots that were similar to the food delivery robots in hotels.

Under Lil White's control, the small robots took the initiative to pick up parts and carry out simple self-transformation to make their bodies more agile and powerful.

Then, these small robots took different parts and sent them to the prosthetic maker for modification.

The workers clicked their tongues in wonder.

However, they were not too shocked.

After all, this was the 21st century, and the workers had some knowledge.

After the little robots were done with that, more trucks drove into Qinqin Toy Factory.

These trucks were filled with... all kinds of materials.

The small robots transported the materials, while the prosthetic maker melted the materials at high temperatures, cut them, and quickly processed them.

Not long after, a set of prosthetic limbs was produced.

Then, a line of words appeared on the screens of the small robots—'Packing them up.'

Seeing this...

Even Lin Fan nodded in satisfaction.

In this way, he did not have to worry about anything. It was very easy.

Lin Fan... liked this relaxed feeling.

Lin Fan said, "Yao Hanqing, in the future, you'll continue to be in charge of the management and operations of the factory. As for the specific work, just follow these little robots or my instructions."

At this moment...

Yao Hanqing and many other workers were looking at the small robots and the prosthetic maker with fascination.

They were like children looking at an excavator. It was very novel.

As such, when Yao Hanqing heard Lin Fan's words, he could not react in time.

After a while, he said excitedly, "Yes, Boss!"

Lin Fan's words were equivalent to letting him continue to be the factory manager!

Even though the factory manager's salary was nothing to Yao Hanqing, he believed that Qinqin Toy Factory would go very far, especially after seeing these machines make artificial limbs. He was even more determined to stay.

After everything was settled, Lin Fan drove the Cullinan back to the Hu family's residence.

Without a doubt, he was received with great hospitality.

There were many green plants in the Hu family's courtyard, and the air was clear. It was very suitable for retirement.

However, Lin Fan was not an old man.

After staying for a long time, it was inevitable that he would be a little bored.

Hu Tian seemed to have realized this as well, so she said to Old Master Hu Nanshan that there were still things she had to deal with at school.

Then, Lin Fan drove them back to Jiangbei in the Cullinan.

This was Hu Tian's first time sitting in Lin Fan's car.

She did not know if it was because beauty was in the eye of the beholder or something else.

She looked at the way Lin Fan drove and was mesmerized.

She could not help but lean her head over.

$o(\overline{\varepsilon}^*)$

$(\overline{^*}3)(\overline{\varepsilon}^*)$

...

Lin Fan, who had Professional Driving Skills, drove very smoothly.

When they arrived at Jiangbei, the sky had already darkened.

In the car, Hu Tian was already unable to control her emotions.

When Lin Fan sent her home, the two of them immediately started their activities for the night.

Shouts rose and fell.

...

It was a sleepless night.

## RICHEST MAN: GETTING 7 BILLION RED POCKETS TO START WITH

Chapter 439 - 439 Platinum Packets; Open!

439 Platinum Packets; Open!

The next day.

The weather was clear.

Lin Fan opened his eyes slowly.

At this moment, he was the only one on the bed. His pillow was filled with a delicate fragrance.

Lin Fan picked up his phone, and a message appeared on the screen.

[Notice from Merchant Bank: 35,790,120 yuan was deposited into your account.]

Although the money he earned from breathing, walking, and sleeping every day was five times more than before, reaching a total of 35.79 million, Lin Fan did not feel anything.

He focused his attention on the sign-in system.

“Sign in!”

[Ding! Congratulations, you’ve received ten million yuan.]

Lin Fan could not help but yawn. He scrolled through his phone for a while.

Only then did he slowly get up.

When Lin Fan opened the door, he was greeted by the fragrance of food.

He could not help but walk toward the dining room.

There were pork ribs, yam and red date soup, fried dumplings, and fried eggs on the dining table.

Hu Tian, who was still busy in the kitchen, slowly walked out.

When she saw Lin Fan, she smiled and said, “Are you hungry? Eat something first.”

“Alright!” Lin Fan said.

It had to be said that Hu Tian's culinary skills were indeed not bad.

Even Lin Fan, who was a master chef, could not help but praise the food and eat everything.

As it was the weekend, they took the time to rest.

Lin Fan and Hu Tian held hands and strolled around outside sweetly.

...

While they were strolling around, the first prosthetic limb was successfully sold for two million yuan under Lil White's arrangement!

When everyone saw the excellent effect of the prosthetic limb, it immediately caused a huge sensation.

As a result, the price of prosthetic limbs began to rise.

The price of the second prosthetic limb became five million yuan.

The price of the third prosthetic limb was ten million yuan!

The fourth prosthetic limb was priced at 12 million yuan!

...

The magical prosthetic limbs quickly attracted the attention of Hua Nation's officials.

Therefore, the Hua Nation government also spent a lot of money to buy a prosthetic leg and quickly sent it to the Institute of Science. *noveLNext.COM*

The academicians gathered together and let out a wave of enthusiastic praises and discussions.

"How was this artificial limb made?"

"This liquid can actually completely match and connect with the nerves and tendons. It's simply unbelievable!"

“It’s as if a disabled person has grown a new limb!”

“Amazing! The person who developed it is definitely a genius, an amazing genius!”

“Who developed this?”

“This is unbelievable!”

In fact...

They were not the only ones who were puzzled. Many medical researchers and big investors, both domestic and foreign, were also very interested in these prosthetic limbs.

They first appeared in Hua Nation.

In addition, the Hua Nation government had absolute control over the country.

Soon, they discovered the company that produced the prosthetic limbs. It was called Qinqin Toy Factory.

When they saw the company’s name, the Hua Nation officials thought they were seeing things.

A toy factory... produced such magical prosthetic limbs?

Was this a joke?

With a puzzled attitude, they investigated Qinqin Toy Factory.

Only then did they realize that they had recently applied for the production and sales qualifications of medical equipment.

Furthermore, the legal representative had been changed to Lin Fan!

...

In the blink of an eye, another day passed.

Lin Fan and Hu Tian were lovey-dovey the entire day yesterday.

This morning, Hu Tian received a call. After breakfast, she went to school to settle some matters.

Meanwhile, Lin Fan returned to the Coiling Dragon Villa.

As he was bored, he picked up his phone and prepared to play with it.

At this moment, he saw the 200,000 red packets displayed on the screen.

Lin Fan's heart skipped a beat as he muttered, "I've been out for the past two days and haven't opened these 200,000 red packets and five platinum packets.

"Now I can open them and see what I can get."

At this point, Lin Fan's tone was filled with anticipation.

After all, he had never opened a platinum packet before.

The 200,000 red packets were also a number that he had never accumulated before.

"Open the platinum packets!"

[Ding! Congratulations, you're now the founder of the Qing Hong Sect.]

When Lin Fan caught sight of this, he could not help but reveal a doubtful look.

What was this?

[The Qing Hong Sect: The Qing Hong Sect, once the largest sect, is now the largest financial group in the world. Its headquarters are located in America! With this identity, you can show your nobility! You'll be even more charming!]

Seeing this...

Lin Fan could not help but click his tongue.

Then, Lin Fan opened another platinum packet.

[Ding! Congratulations, you've received 80 million yuan.]

80 million yuan?

How could a platinum packet give out such trash?

Lin Fan shook his head helplessly and continued to open the platinum packets.

[Ding! Congratulations, you've received 90 million yuan.]

Trash again!

[Ding! Congratulations, you've obtained Plant Growth Water.]

Plants Growth Water.

What was this?

Lin Fan was puzzled as he focused his attention on it.

[Plant Growth Water: A magical potion that allows plants to grow rapidly after being used.]

Make plants grow faster?

It did not seem to be of much use.

Then, Lin Fan turned his attention to the last platinum packet.

[Ding! Congratulations, you've obtained a dust jacket.]

No way!

Just this?

[Dust jacket: After wearing it, your clothes and body will no longer be stained with dirt. At the same time, it has the function of preventing fire and water.

Dustless and clean, full of charm!]

Seeing this...

Lin Fan's eyes lit up. This was pretty good.

[Do you want to take out the dust jacket?]

"Yes!"

The next moment, a white robe that was as thin as a strand of hair appeared in front of Lin Fan.

He wore it with curiosity.

In the next moment, the white clothes melted into his original clothes like water.

Lin Fan could not help but click his tongue. "As expected of the system! Amazing!"

Then, Lin Fan placed his attention on the 200,000 normal red packets.

At this moment, his phone rang.

He looked at the caller ID and saw that it was the director of the Institute of Science, Feng Zhixiang.

"Professor Lin, you invented prosthetic limbs again?!"

As soon as he picked up the call, an excited shout sounded from the other end.

Lin Fan rubbed his ears and said, "Again? This should be the first time I created a prosthetic limb, right?"

"It's really you,! You're really amazing!" Feng Zhixiang shouted again.

Although he had already received the report from the relevant departments about Qinqin Toy Factory, after receiving Lin Fan's affirmation, he could not help but feel extremely excited.

“Director Feng, don’t be too agitated. Be careful of your health,” Lin Fan reminded him.

After all, Feng Zhixiang was considered an old man.

Great sorrow and joy were taboo. What if something bad happened to him?

Lin Fan would feel a little guilty.

## RICHEST MAN: GETTING 7 BILLION RED POCKETS TO START WITH

### Chapter 440 - 440 Spending a Billion, Earning Five Trillion!

#### 440 Spending a Billion, Earning Five Trillion!

Feng Zhixiang did not care about Lin Fan’s words at all. He continued to laugh excitedly.

After a while...

“Professor Lin, the Jiangbei branch of the Institute of Science is ready. I wonder if you have time to come over and give us some guidance?”

His words were filled with anticipation.

Even though Feng Zhixiang had seen Lin Fan a few times, he only took away Lin Fan’s products each time and never got to chat much with him.

Of course, Feng Zhixiang knew that even if he chatted with Lin Fan, he probably would not be able to get anything out of it.

However, if Lin Fan was willing to go to the Institute of Science, it would be completely different.

There were many academicians there.

They were knowledgeable and could talk to Lin Fan about many things.

In addition, this was something that the academicians had been looking forward to.

Lin Fan understood what Feng Zhixiang was thinking.

He was also willing to give some pointers to the academicians.

This was because, in Lin Fan's eyes, it was this group of people that allowed the people of Hua Nation to live stable, safe, and happy lives.

Lin Fan felt that he did not have much to do today anyway.

Thus, he said, "Then I'll go over later."

"Really? That's great!" Feng Zhixiang shouted excitedly.

Lin Fan heard the cheers from the other end of the phone.

After hanging up, Lin Fan could not help but smile and shake his head.

Then, he turned his attention back to the 200,000 normal red packets.

"Collect them all!"

[Ding! Congratulations, you've received 2 yuan.]

[Ding! Congratulations, you've received ten yuan.]

...

[Ding! Congratulations, you've received a one yuan critical hit card.]

...

[Ding! Congratulations, you've obtained 10% shares of Maotai Liquor.]

...

[Ding! Congratulations, you've received a double shares coupon.]

...

[Ding! Congratulations, you've obtained 51% of Yi Ke Real Estate's shares.]

...

[Ding! Congratulations, you've obtained 51% of Wansheng Group's shares.]

...

[Ding! Congratulations, you've obtained Agreement Hospital.]

....

With 200,000 red packets, Lin Fan received a total of 21,049,801 yuan.

He also got a one yuan critical hit card, which meant that if he spent one yuan, Lin Fan could get one billion yuan.

The market value of Maotai Liquor exceeded two trillion yuan. 10% of the shares would be 200 billion yuan!

Lin Fan used the two double shares coupons on Little Tanuki and Penguin.

Originally, Lin Fan held 40% of the shares of the Ah-Ri Corporation and Penguin Corporation. After doubling them, they became 80%!

In other words, his shares in the two companies instantly increased by 40%!

One had to know...

The market value of Little Tanuki and Penguin both exceeded five trillion!

That meant he owned a cumulative total of four trillion!

Yi Ke Real Estate was the largest real estate company in Hua Nation, with a market value of about 200 billion. 51% of the shares meant 100 billion.

Wansheng Group was one of the top food and beverage companies in the world. Its market value was about 200 billion, and 51% of its shares were also 100 billion.

Agreement Hospital was the largest private hospital in Hua Nation, with an estimated market value of more than 100 billion!

...

All of these were from Lin Fan opening 200,000 red packets. The total value was close to five trillion yuan!

These 200,000 red packets were all from Lin Fan spending two billion to buy a toy factory!

What did it feel like to spend two billion and earn five trillion?

Lin Fan was the one experiencing it!

He looked at the red packets on the screen and could not help but smile.

After a while, he collected his thoughts and drove the Cullinan away.

...

In the Dongcheng area of Jiangbei, in a beautiful location.

Last year, the Jiangbei government invested three billion yuan here to build a sizable office building and factory.

Originally, they were prepared to invite investment from the government.

For this... they even made a public announcement and made several advertisements.

Some companies also expressed their willingness.

However, just a few days ago, the investment promotion work came to an abrupt end.

This was because the office building and factory area had been taken over by the Institute of Science.

At this moment, Feng Zhixiang, several academicians, and many staff members stood in front of the entrance of the Institute of Science. They waited quietly.

Just as everyone was looking ahead...

A tall and sturdy car drove over.

It was Lin Fan's Cullinan.

Lin Fan also saw Feng Zhixiang and the others standing at the entrance. He slowly stopped the car.

Feng Zhixiang welcomed him with a smile and said, "Professor Lin, welcome to the Jiangbei branch of the Institute of Science!"

Even though Feng Zhixiang had already told everyone that Lin Fan was very young, the academicians were still surprised when they saw him.

He was simply too young.

Who would have thought that it was such a young man who had solved several world-class mathematics problems, invented the earthquake prediction device, super battery, carbon-based photolithographic machine, human islet recovery drug, gaming helmet, artificial limbs, and so on? He had achieved a series of things that shocked the world!

The academicians were stunned for a moment before they said, "Professor Lin, welcome to the Jiangbei branch of the Institute of Science."

Lin Fan said, "You didn't have to wait at the door."

Feng Zhixiang said, "You've made such a great contribution to the academic world, and even to the entire world. What's the big deal if we just wait at the door? This is what we should do."

All the academicians nodded.

Obviously, they agreed with him.

Then, Lin Fan walked in with Feng Zhixiang and the other academicians.

After a while, they arrived at the laboratory where the carbon-based photolithographic machine was displayed.

An academician wearing gold-rimmed glasses finally could not help but say, “Professor Lin, may I ask you some questions?”

Lin Fan nodded and said, “Sure.”

After all, the reason he came here was to answer their questions.

The academician with gold-rimmed glasses quickly said, “Professor Lin, how did you make the purity of carbon nanotubes reach 99.9999999%?”

Lin Fan replied, “High electromagnetic purification...”

The gold-rimmed glasses academician’s cloudy eyes lit up slightly, and a look of realization appeared on his face.

The other academicians nodded.

Then, they quickly asked the questions that they had been puzzled about.

Lin Fan did not keep secrets from them and gave them detailed answers.

Every time, Lin Fan did not just answer the questions.

He also explained all the knowledge related to the problem, and the academicians were fascinated.

At first, when they saw Lin Fan’s young appearance, they were shocked.

At this moment, their gazes toward Lin Fan were filled with respect and admiration! *noveL***N**ext.**C**Om

They looked like outstanding students who had met a knowledgeable teacher.

One had to know... these were the top scientists in the country and even the world!

Every single one of them stood out in the industry, and they were all figures of great stature.

Now, they were treating a young man in his 20s as their teacher.

If word of this got out, who knew how many people's jaws would drop?
