

Superman Delta's Life Diary

Chapter 14 The real first battle

It's half past nine in the morning.

Like Zhongzhou, Xuanqingjiang Prefecture, which is far in the northeast of China, is also full of snow.

It's just that the snow flakes in Xuanqing Jiangzhou are bigger and the sky is colder.

At this time, in Xuanqingjiang University, most of the students here were also in class.

The heating in the room is hot, making people dizzy and want to sleep.

In a certain lecture hall, a student sitting by the window was lying on the table boredly, looking out the window dully.

At this time, he saw a huge white machine suddenly appear next to the foothills outside the campus.

This machine, which looks like an inverted milk tea cup, is steaming white steam all around, and a pair of mechanical hands and feet stretch out from the body.

The robot took a step and started walking towards the school.

Chapter 8:

"There are monsters!"

"Run!"

This student wasn't the only one who saw the robot.

The whole teaching building, no, the whole school is in chaos.

A staff member rang the alarm bell, and the piercing alarm bell rang through the campus, which once overwhelmed the screams of people.

The teachers hurriedly organized students from each classroom to escape, but the scene was still very chaotic.

Just as the fifty-meter-tall giant robot approached the school step by step, a beam of shining light flew from the sky and directly hit the giant robot.

The huge impact caused the robot to retreat a lot and temporarily stay away from the school.

And after that beam of light hit the robot, it bounced back into the air, turned into a human shape, flipped back in the air, and landed on the ground lightly.

“Ah, it’s Ultraman!”

“Ultraman is here!”

‘saved!’

....

Cheers erupted from the crowds in various teaching buildings.

As long as people see the figure of the giant of light, they seem to be safe.

But Ultraman Delta, who was the party involved, couldn’t relax. The previous battle with “Natural Control Machine Heaven” was not a battle at all because the defense system of “Heaven” was not activated. This time it was considered Del Tower Altman’s serious first battle.

Ultraman Delta glanced back at the school, absolutely not turning the school into a battlefield.

Turning his head, Ultraman Delta looked again at the robot that looked like a milk tea cup in front of him.

Although he has never seen this machine, Ultraman Delta is sure that this machine is also a member of the “Nature Control Machine” series, because its appearance and technology are very similar to other “Nature Control Machines”.

On the belly of this robot, there are also two characters “white fog” written in seal script.

Just like its name, every crack in the robot’s body is emitting white smoke all the time.

Ultraman Delta was very cautious. In the information about the “Natural Control Machine” that Ultraman Gaia brought to the Land of Light, there were only “Heaven”, “Yanshan” and “Dark Green”, but there was no such “White Mist”. , and it’s not clear what special abilities this “White Mist” has.

Thinking like this, Ultraman Delta jumped up and focused his energy on his legs. Because of the energy, the blue patterns on his legs shone with flowing light.

“large!”

I saw Delta's body falling, with both feet on the back of the natural control machine White Mist, and deftly rolled over to the ground, turning back and kicking.

Ultraman Delta himself is also very clear that before coming to Earth, he was only half a researcher, and his strength, physical fitness and combat experience may not be comparable to a real warrior.

The kick from the fall of his feet is estimated to cause some damage, and the foot to return to the body is estimated to be useless.

Sure enough, Bai Wu only paused for a while, then turned around immediately, with a lot of mist on his body, and rushed towards Ultraman Delta at full speed.

Delta was very calm, turned over again, crossed the white mist that collided with, and just landed, turned around and shot several arrow-shaped rays of light towards the legs of the white mist.

The energy of the arrow-shaped light exploded in Baimist's legs, it failed to stand firm and fell to the ground.

Ultraman Delta immediately crossed his hands above his head and began to gather energy.

At this moment, a large amount of white smoke shrouded the white fog of the natural control machine, and it dissipated in an instant, and the white fog of the natural control machine disappeared along with it.

Ultraman Delta immediately stopped gathering energy and turned into a defensive stance, vigilantly guarding the surroundings.

"Did you leave, or..."

Suddenly, there was a severe blow to his back, and the huge thrust made him fall to the ground.

Ultraman Delta immediately rolled on the ground and quickly stood up.

He looked around and found nothing, it seemed that Bai Wu was invisible.

Originally, Ultraman Delta wanted to rely on the snow on the ground to find the trace of the white mist, but when he looked at the ground, he found that the surrounding snow had been almost melted by the steam of the white mist.

The invisible white mist slammed into Ultraman Delta again, and Ultraman Delta, who was unable to guard against it, was hit hard again.

But he got up quickly from the ground, lying on the ground would only die faster.

“Beep, beep, beep...”

The color timer on Ultraman Delta’s chest sounded an alarm, and his time to fight was running out.

At this time, Delta was in a deadlock, and he himself had not practiced skills similar to the mind.

In addition, now the wind is howling and snow is flying, and the situation at the scene does not support him to use his hearing to discover the invisible white fog.

When Ultraman Delta was tangled and beaten.

He suddenly remembered the scene when he and Xia Luzhen and the others went back to the dormitory after the match.

At that time, Barley activated the ability of Yanyan Fruit, ripples rippled under his feet, and then the whole person sank.

Although Ultraman Delta will not sink to the ground, the condition of Barley when he activates his abilities inspires Ultraman Delta.

Ultraman Delta immediately squatted down, the energy from his body spread out on the ground along his feet, forming a “water surface”.

Suddenly, the “water surface” formed by energy feeds back to Delta, and ripples in a certain direction.

Delta immediately shot a cone of light in that direction.

The cone of light stuck on Bai Wu like a drill, and it didn’t disappear for a while.

Taking this opportunity, Delta immediately gathered energy and made the classic cross gesture.

“The Delta Spatium optical flow.”

The white Spexium light crossed the triangle drawn by Ultraman Delta, turned into a golden Spexium light stream, and bombarded the cone of light.

With a stronger thrust, the cone of light broke through the shell of Bai Wu, and penetrated the entire body of Bai Wu in one go.

Immediately afterward, the light flow of Spexium completely destroyed the internal structure of Bai Wu, and the figure of Bai Wu appeared.

Its electronic eyes flickered twice, then stopped completely.

Chapter 15 The end of the battle

When Xingguang Yi was fighting in Xuanqing Jiangzhou, he was far away in the classroom of Zhongzhou College.

“Qiu happy! What are you doing!”

Shen Dazhe temporarily stopped his lectures and clicked on the name of a student below.

Qiu Kaixin, who was playing with his mobile phone below, shuddered, raised his head and looked at Shen Dazhe, who had a serious face, with an embarrassed yet polite smile.

Big Brother took a look.

Oh, good guy! You Qiu are happy and want to mock me.

Thinking of this, Brother Da Zhe got off the podium and took two steps to Qiu Kaixin's side.

“Take out your phone, what are you looking at?”

There was no way, Qiu Kaixin could only reluctantly took out the phone.

“Teacher, Ultraman has appeared again. It's at Xuanqingjiang University. I'm watching the live broadcast. This should be considered to be concerned about current affairs, right?”

Qiu Kaixin tried every means to find a reason for himself to play with his mobile phone in class.

“Altman?”

Brother Da Zhe sat in the empty seat next to Qiu Kaixin and looked at the screen on Qiu Kaixin's mobile phone.

The person who took the picture was not too close to where Ultraman and the monster were fighting, but it was clear enough.

The pictures taken in reality give people a sense of oppression that is different from special photography.

After all, these are two behemoths over fifty meters tall.

Let alone a fight, just standing there is amazing enough.

Especially not far from the battle position, there is also the entrance of the school building, which makes the Ultraman and the monster even more huge in comparison.

“Can you turn on the sound?” Big Zhuo asked.

“Ah? Oh oh oh, can it be possible.”

Qiu Xinxin quickly turned on the volume of the phone.

Even though the shooting location was a little far from the battle location, someone next to the photographer could hear exclamations such as “grass grip” and “cow beer”.

But you can still hear Ultraman’s battle cry, as well as the loud noises made during the battle.

Seeing Brother Da Zhe watching so intently, the students next to him also gathered around.

“Beat it, beat it!”

“An uppercut, an uppercut!”

“Pretty! Dodge!”

Finally, the Ultraman on the screen ended the battle with a classic cross gesture laser.

The impact of the laser swept away the snowflakes flying around.

After the huge roar, only the cheers of the students remained in the live broadcast.

“Wuhu! Success!”

Outside the live broadcast, Brother Da Zhe also cheered.

As soon as he finished cheering, Big Zhe realized that something was wrong, and no one in the classroom cheered with him.

He cleared his throat, "Cough cough, let's continue the class. Happy, you remember to write a small note about watching current affairs in English, five hundred words. Give it to me next class."

The live footage is basically synchronous.

When Brother Big Zhe restarted the class, Ultraman Delta stretched out his arm and fired a guiding beam.

Circles of triangles slowly spread down from the top of the natural control machine, the white mist. After a while, the white mist disappeared, and it was contained in the independent space attached to the delta transforming device.

After doing this, Ultraman Delta breathed a sigh of relief, the color timer on his chest flickered faster, and it seemed that time was running out.

Seeing that Ultraman had dealt with the monster, some daring students ran towards the place where Ultraman was, waving their hands as they ran.

Delta Altman turned to look at the students and gave them a thumbs up.

Then, he stretched his arms and flew away.

As usual, he left a golden triangle trail in the air and disappeared into the sky.

Even after the monster was eliminated, Xingguang Yi did not appear in the classroom again this morning.

Just when the get out of class was about to end, Xia Luzhen received a text message from Xingguang Yi.

"Help me bring a meal, I want more meat. I'm bringing three Snickers, thank you."

After the morning class was over, Xia Luzhen gave Damai and Lao Hou a look at the text message.

The two of them simply packed their lunch and went back with them.

"Old Star? Old Star?"

Xia Luzhen shouted and pushed open the bedroom door.

"Fuck, what's the situation?"

As soon as the door was opened, the situation in the room was somewhat unexpected to Xia Lu.

The curtains of the bedroom were drawn tightly, and in the dark environment, many light blue light curtains floated in the room.

There are many mechanical parts scattered on the ground.

There are many miscellaneous things, but Xingguangyi cannot be seen.

“Old Star! What about people?”

Xia Luzhen and the other three carefully stepped into the dormitory, avoiding the mechanical parts on the ground and the blue light curtain in the air to avoid touching them.

Malco stepped on the ladder and looked at Xingguang Yi’s bed, “He’s not on the bed either.”

“Where will he go then?”

Xia Luzhen scratched his head, and first found a free place to put the packaged meals there, and it was tiring to carry all the time.

Hou Xianxing squinted and looked around the room. He could roughly feel where Xingguang was. “The technology of the Land of Light is really interesting.”

As soon as he finished speaking, he heard Xing Guangyi’s voice coming from nowhere.

Chapter 9:

“I am here.”

Immediately afterwards, I saw a golden triangle slowly rotating from small to large, becoming a space portal, and Xingguang Yi also walked out from the inside holding the door frame.

He is not in good condition now, with dark circles under his eyes and a large piece of plaster on his face. Because he was rolling up his sleeves at this time, he could see the plaster sticking to his arms.

“You came back from an escape? You look too miserable.” Xia Luzhen was taken aback by Xing Guangyi’s appearance.

“Small things, it’s normal. Which is my meal?” Xingguang waved his hand, showing he didn’t care.

Xia Luzhen pointed to the lunch box on the table.

“Thanks.”

As soon as Xingguang moved over a stool, he immediately opened the package and started to gobble it.

“Maintaining a giant battle is still a bit of a drain for me, but it’s nothing to do, just eat more and get some sleep.” Xingguang explained, “Today’s opponent is a bit strong, and he always likes to Greeting on the face, I put a plaster on it to make it a little more comfortable.”

“Okay.” Xia Luzhen glanced at the corner of his mouth.

“Old Star, what do you do with these things?” Malco pointed to the two piles of things in the sky and the ground.

Xingguang pulled the rice into his mouth with one, three, five, and two, and then poured a large mouthful of warm water.

“Hey~ you said this, today’s battle made me discover my own shortcomings. After all, I’m not a fighter, and I can’t exercise results in a short period of time. But I’m an intern researcher, and I have my own methods. I think I It’s time to make some preparations in advance.” Xing Guangyi said.
