

## **Shadow 1301**

### **Chapter 1301 Golden Air of Fortune and Luck**

As for him not wanting to accept Katarina energy, it is for practical reason.

It is not that he wants to sacrifice himself for her.

In the past, he would not hesitate to do so.

But Katarina and Sofia made him understand, that just because he sacrifices himself for them would not mean that it is the best choice.

Unless he had no other choice, unless he had no other measures, sacrificing himself for them is the last thing he would do. Because he knows how that would make them sad

Just like he couldn't accept it if either Katarina or Sofia sacrifice their life for him. That would burden him for his entire existence.

That is not a burden he wanted.

The particular reason he did not accept Katarina energy is simply because if he managed to break the suction force that is pulling him and Katarina toward the eye, then Katarina who still had energy could bring them to the portal and exit this time space tunnel

And if that did not work, then at least Katarina and him could escape inside the time fragment. Azief knows how his future-self works

He would only attack inside the Time Space tunnel. Because this is the place where it could subvert common sense and the order of time is disordered.

Even if it did not make sense the Time Space tunnel would accommodate it.

Because that is how it is. In normal Time stream, if his future-self killed him, his future-self would also be destroyed.

Because then it would be a paradox. But, inside the Time Space tunnel, this paradox is non-existent.

Time Space tunnel could be said a place where Time went crazy. It is a backdoor of sorts. And it is the road where most speedsters use in the past.

Azief thought of all of this in just a couple of second. From the moment he turns back his body and look at that eye, he balled his fist.

And when he was thinking, his fist gathers the energy that is still there, lingering in the air, a powerful destruction force comes from within Azief body.

His body instantly become even more transparent that he looks like he is going to disappear any moment now.

And then, as the suction force getting stronger, Azief shouted with a roar that shakes the surrounding 'ROARR!' And then he releases his punch.

Space breaks around his fist as his fist turns into a powerful force flying forward toward the eye, trying to break through the suction force.

Azief releases his punch and his body felt drained of energy in an instant.

But this time his attack did not have such a fantastical phenomenon like before. There is no titanic fist that is trying to smash down that suction force.

It is just the force flying forward, breaking space folds and Time Walls.

It is clear that Azief has run out of fuel.

'Shit!' Azief curses even as his body become even more translucent. It is almost like he is going to dissipate.

If not for the fact that some of his body could be solidified, his hand would go right through solid things right now

His body also began to have wounds. Unlike normal body who would drop blood when they are wounded, Azief body leaks energy.

And as the energy leaks the more he became translucent.

Azief is panicking right now but his eyes become even more determined

'Ah, fuck it!' he cursed. Since he could not survive doing this, he could only take his chances and go to one of the time scenes.

The portal is a no go.

He looks at Katarina and simply mutters

'The Time Scene!' Katarina instantly understand what Azief is trying to say and she grabs Azief hand and then kick the air on her feet.

She was about to launch herself and Azief into one of the small time fragment that is flying just right below them

Then suddenly a sound echoes all over the Time Space tunnel

Ommmm!

There is a droning sound that is echoing like some kind of bell being ringed. Azief and Katarina was both shocked and puzzled.

But the reason why they were shocked is not simply because of the droning sound. But because right now, Katarina could no longer move.

Even Azief could not do anything right.

'Time and Space stopped!' Azief thought to himself.

'Is it because of that sound?'

Azief could not believe his luck. Each time he goes inside a Time Space tunnel, this kind of things always happens.

He probably would never want to travel through a Time Space tunnel again with this kind of experience.

As he and Katarina seems to be suspended in the air like a marionette, the only thing that they could do is listen to the droning sound

At first this droning sound is very faint. Azief even thought he had heard wrongly. But then the sound of this droning become louder

Ommm! The sound echoes again, only this time the sound seems to be like a hymn instead of a droning sound.

It was then everything seems to stopped.

When the first sound echoes, time stopped around Azief and Katarina

But now, as the sound echoes for the second time, all the time inside the Time Space tunnel seems to be affected.

The road that have been destroyed by the force of the collision of the sword light and the breath of his future-self suddenly reconstructed back.

The time scene that has been distorted and destroyed, once again appears. Time did not only stop but it is also being reversed

'What kind of being is able to do this?' he thought to himself.

Time seems to stop yet Azief could still watch and moves his eyes. By now, Azief is quite sure that this is not the doings of his future-self.

Someone else is doing this, he thought to himself. Then there is a breezy soothing wind that seems to pass through Azief and Katarina bodies.

Azief felt a sensation over his body and then not a second later, he could also move his entire body. And he immediately looks at Katarina who is in front of him.

She could also move. They look at each other and seem to be asking each other whether they know what is going on.

Azief doesn't know who is doing this and Katarina also doesn't know who is doing this.

But while they were able to move other thing in the Time Space tunnels seems to be frozen by some force.

And the Time and Space inside the Time Space tunnel seems to be rearranged by this unknown force.

Cause and effects are being subverted, time reverses and accelerated on some places, the Road of Time seems to be reintegrating back.

The entrance portal, the portal that connected this Time Space tunnel to Seresian world appears once again.

Azief is shocked to find out that the portal look like it had never been destroyed.

The strings on the road once again tangled with each other and not before long, the force field around the Road of Time recovered back

The Time Scene rearranged themselves along the road like some kind of advertisement banner on the side of the road.

Azief release Katarina hand and floats there in the air. He no longer floats around broken time voids or turbulent space

Instead, he is flying on a clear space. All it takes from the second sound to echoes to the instant reconstruction of everything, only takes two second.

He squinted his eyes and he could see the road, the time scenes, the portals and everything seems to be returned to the initial point

'This kind of power that breaks reality, cause and effect...there is only a few people in the Omniverse that could do such a thing' he thought to himself.

'And this energy. What is it?' he mutters to himself

Azief himself tries to make sense of what this force is but he could not really pin point what kind of energy this is.

It is so pure and contain such a powerful creation force.

Yet, at the same time, it felt like it could encompass every energy that existed and will ever exist. It gave him the same feeling like the All Source energy only this energy is a hundred times purer...if he had to give a quantitative quality to it

There is an aura that is lingering all over the Time Space tunnel

And then Azief could see that this aura condenses into a golden mist. And then Azief heard a voice. It is in a language that he had never learned before, but he understood it.

And he smiles almost immediately when he heard the voice. Because he recognizes it.

"The heavy rain makes my heart carefree"

"I sing a song with a glass of wine"

'the breeze blows away my troubles and sorrows"

"A dream for a lifetime is but a passing moment" This is the words that he had heard. And then he heard the sound of laughing.

This laugh echoes all over the Time and Space tunnel. Azief recognizes that laugh and he remembers that voice

'Azul!' Azief thought to himself.

>>

## Chapter 1302 Master and Disciple

Everything right now is frozen except himself and Katarina. He smiles and laughs.

'We are saved' he said as he looks at Katarina.

Katarina is still puzzled. Azief then grabs Katarina hand and landed on the road again.

The road has finished being recreated right now. Golden mist shrouded everything.

'Luck' Azief said to himself.

'And fortune' he added

When he looks at that golden mist he could feel that the mist contains luck and fortune.

In a way it is like merit that is always fought for in Jade Empire. Katarina on the other hand is puzzled with the sudden occurrence.

In one second, they were on their way to doom. But then a second later, everything seems to be frozen.

But she did not ask Azief anything. Right now, she is too tired to even form a sentence. And it is the same for Azief.

Only Azief tiredness is manifested in a different way

His energy is leaking all over and the energy is slow to recuperate. That is the sign of his tiredness.

Azief was about to absorb energy from the time scene that is being reformed around the road when suddenly he felt an injection of energy.

He was shocked and then he looks around him.

The golden mist seems to swirls around him and enter his body.

Even a small amount of this golden mist entering his body fills his body with energy and almost a second later, he is once again in his peak condition

His wounds are all healed and the tiredness that plagues his body dissipated like it was never there in the beginning

While having an energy body also has its con, it also has its advantages.

It is easy to lose energy, but it is also easy to gain energy because there are no obstacles between the body and the core of energy.

And that golden mist did not only swirls around Azief. It also swirls around Katarina. Azief look at her and simply said

'You could absorb it'

Katarina nodded and she began absorbing it.

It did not take her more than two seconds to return to her peak.

'Amazing!' Azief thought to himself. As Katarina keep absorbing the golden mist into her body, Azief then look toward the eye in the distance.

Even though everything is frozen, that eye is struggling to break through the restriction that is being put on it.

Azief could feel the feeling of dissatisfaction, of anger and of...fear. That what surprises Azief the most.

That the eye is feeling fear.

The reason he could feel the feeling of that eye is because there seems to be some resonance between him and that eye.

When considering that this eye belongs to him, it does not seem that absurd.

'It is not the eye' he thought to himself as he tries to squint his eye. He believes that the true body of his future-self is able only to materialize the eye.

If his future-self descend completely inside the Time Space tunnel, then judging by the power that his future-self had emanated the last time Azief saw his future-self, this entire Time and Space tunnel would probably collapse under such a powerful pressure

His future-self is a probability of the future. In normal circumstances, the future probability could not come to the past.

If he is correct in some of his assumption, the future has not yet been written. The only thing there is in the far flung future right now is the possibility.

It had not been formed yet. This is not like the case with people who was from the future travelling to the past.

He believes truly that the current time stream that he is at right now is now the current time stream.

He believes that because Loki from the future, came back. And he had a bit of an idea of how Loki defy such hard rule of the Universe.

'Only in here, a probability could appear and become a threat. This does not exist.....yet' he thought to himself as he looks at that eye.

Fortunately, right now that eye could not move or do anything. Azief even felt a bit funny. And absurd.

His future-self is so powerful that his breath requires him to eve drained all of his energy to break through

And one eye is enough to suppress him. What is it with these supreme beings that always uses their organs to fight?

Suddenly Azief felt a poke on his back and he look back to see that Katarina wounds are all healed.

Even though Katarina did not seem to be wounded, she was actually wounded by the blast of the sword light shockwave and even by the time the breath blew onto them

At that time, she had hurriedly close all the wounds with ice that froze all the wounds. But it is still there

She now had finished. It did not take her more than three seconds to heal her entire body. This could not be achieved if not for the golden mist.

And Azief knows exactly who he had to thank

Azief then bow his head to nowhere in particular and said

'Thank you, Senior' he said. That is the only way he could express his thanks to Azul. He did not dare to call Azul master.

He did not expect an answer. But he believes that Azul could see him. This is the only thing he could do.

But then a voice echoes inside the time space tunnel

'You could call me master'

The voice echoes all over and Azief was shocked to hear that Azul answer it. Even Katarina was startled to hear the words.

But, unlike Azief, she didn't seem to be able to understand the word.

The voice paused for a second before it echoes again

'After all, you have already learned a lot from me. You are my disciple and I am your teacher. Remember that.' the word seems to echoes before slowly the sound become fainter and dissipated.

Azief hearing this look around him and then smiles and nodded.

'Thank you, Master' Azief then laughs. In Azief life, there is a few people that he regarded as his teacher. Alsurt is one of them. And Azul is another.

But, he was never their apprentice. It is a weird feeling of having a teacher like this. Most of the time, it was him being a master to someone else.

After all, there is not many beings in the Universe that is qualified to become his master because of his unique fate and his unique path.

Even though he had never dare to call Azul as his master, he had always considered Azul to be one of his teacher.

The other one is Alsurt, the Jotun that he met.

'Now, I have become Azul disciple. It is a pity that this powerful master is probably not in the Universe. If he is I could at least swagger around using his name' Azief though before he himself laugh at his own thoughts

Azief knows only a little about Azul cultivation base. What he does know is that Azul could easily restrain his future-self

And that he is probably stronger than a Sovereign.

This is the only clue he had about the true power of Azul. As for what he knows about Azul, he knows that Azul is rarely in this Universe.

Where he goes is something Azief also does not know.

'Karma is formed between me and Azul right now. A new karma and a new cause and effect'

Azief then avert his gaze from that eye.

Even though he could still tell that the eye is still looking at him, right now the most important thing is to go out from here.

He looks at Katarina and seeing that she is already healed to full power he smiles

'How was it?' he asks. She waves her hand and a snowy wind blows forward. The wind is as sharp as a blade.

She nodded with a smile.

That is enough for him to understand. Azief realizes that as the golden mist become fainter the hold it had over all the things inside the Time Space tunnel is unravelling.

The golden mist is actually being destroyed by the gaze of that eye. The moment that the golden mist disappears, Azief knows there is no longer any protection.

And he knows Azul. He probably would not interfere until the end. This is already helping him enough.

If he does not know how to grasp it, he would truly be an idiot

'Now, it is really time to go home' he said and then he holds Katarina hand, grasping it tight and then kick the ground. He flew up toward the direction of the portal, this time he no longer holds anything back

His speed warps space and bends time.

Azief knows he could not delay anymore. This time, his energy is back at full peak so he dashes forward with the greatest speed he could muster.

Space around him twisted before breaking as he passes around them

Katarina created a force shield that shrouded her body to withstand the turbulence of space around her.

As Azief come closer toward the portal, he could see that the portal had been damaged

And it has been damaged a lot. It had been restored by that golden air just a second before. The only reason why it is damaged now probably had something to do with that eye.

Azief notices that the eye sometimes looks toward the portal.

'The destruction aura could even be transmitted using only gaze? Hoo. I am really one of a kind in the future'

'It could not stand it for any much longer' Azief made his conclusion in the split second he saw that portal

There is signs of tearing and wear all over it. Azief knew why it had become like this. the breath corrodes.

And then there is also something about that eye.

That is something that Azief understood. The him in the future possess great power of destruction.

Even when he went to the future and look at his future-self he was shocked to see himself wielding such a potent force of destruction.

That is why both he and Katarina uses their power to cut and rid away the breath from them and from the portal

The only reason that this portal did not yet collapse is simply because of the golden air of luck and fortune.

Azief could not express how grateful he was toward Azul right now.

He had already been delayed long enough and he does not know what changes had happened on Earth Prime by now

The portal is being held up by the golden air like a glue.

'It is battered and torn apart. But it would do the job' Azief thought to himself

Azief take a turn back, look at that eye, and then he smiles. It is clears that his smile is mocking his future-self.

There is also something that he had found out.

'Next time, I would not be so helpless' he mutters to himself.

Then he and Katarina jump into that portal and golden air that had been supporting the portal from breaking down suddenly exploded

>>

### **Chapter 1303 Gate on the Edge of a Void**

BOOOM!

With the explosion of the golden air the portal of time and space collapsed inwardly, creating a singularity.

A black hole that seems to devour concepts and laws. All the time scenes is pulled into this singularity and grinded into nothingness.

The Eye kept looking at that spot.

Inside the Time Space tunnel, everything began to unravel and the golden mist that was everywhere is slowly dissipating

The gigantic Eye also moves and it seems to look toward a new direction. It glowed blue and golden and powerful fluctuation emanated from that eye.

Then another eye appears. And then a titanic figure slowly solidified.

The entire time space tunnel could not withstand the descent of this being and all of the Time Space tunnel is collapsing.

Even the singularity is suppressed. There is now a solid figure, standing so tall that it oppresses space and each small movement changes the time stream

This figure had the same face like Azief. Only that his eyes are colder and his body is swirling with breath of destruction.

And this eyes gazes upwards.

But he did not look up.

Instead, his gaze pierces this Time-Space tunnel, pierces the Seresian world, passes through barriers of obstacles, peering through worlds and planets and stars, passing through galaxies and multiverses until it reached the end of the border of the Source Wall.

Beyond the Source Wall is a Void. Sometimes it is called Omniversal Void. Sometimes it is just called Void.

Whatever the name one wanted to call it, there is a wide gulf of nothingness there

Nothing could survive there. But the gaze of this person passes over that Void. The length of this Void is almost infinite.

Even if one is already Half Sovereign, trying to reach the end of this Void would be impossible.

Even if they lived as long as Heaven and Earth, their vitality and their longevity would be exhausted even before they reach the end

But this figure gaze could pass through this Omniversal Void and finally saw a blank Void.

His gaze moves forward before it stopped for a second. In the intersection between the Omniversal Void and another new Universe, the gaze stopped

There is a nine thousand feet tall floating gate in front of him. There is aura of all kinds of Laws on this gate.

Standing there like some kind of impenetrable wall, the energy it emanated distort the space and time around it.

The gate is closed with what appears to be a door.

The door itself is designed with a very peculiar design.

On the left side of the doors are Asura-like beings. Wielding sabers, axes and swords, the Asura seems to be in a bloody battle

On the right side is Immortal-like being. Some of them have fiery wings and their hand seems to be swirling with celestial energy

Even though it is just a design on the door, the aura from the door felt like the creator of this door had stamped these auras into the door.

It really felt like there is Immortal and Asuras inside the door. The door is floating there and there is always space on each side of these floating door.

But those who knows the true power of this gate knows, if you try to circumvent the gate, trying to go through this space by going under, above, the either sides of the gate, you would find out that when you pass the door without going through the gate, you would then return back in front of the gate.

His gaze seems to waver when it arrived in this door.

There is a powerful breath of creation on the door.

But because the door is newly crafted and the one creating this door did not really forbid anyone to enter, the gaze passes through the door

And then a new entire Universe, separate from the Omniverse that the one in the Time and Space tunnel inhabited appears.

This Universe is as vast as the Universe that Azief come from.

And it is expanding.

The only difference was that it is too sparsely populated. The stars are only a few. There is no multiverse and different dimensions is not populated by any living beings.

There is more unliving things than they are living things in this Universe.

But that gaze rested on something particularly.

There is a planet.

The planet itself is large.

At least it is probably so since there is nothing to compare it with in this new Universe.

In a world where it is the only thing, it is hard to compare it with others. The laws of this world also operated differently but that gaze did not falter.

It passes through the atmosphere of that planet and look at someone who is resting under a tree.

Azief future-self that appears in the Time and Space tunnel, is looking at Azul. His eyes are cold and destruction aura emanated out from that gaze.

Separated by such an incalculable distance, even so, the destruction aura that is coming simply from his gaze could disintegrate almost anything

But this gaze when looking at Azul is simply just a gaze. His destruction aura could not escape the restrain of this Universe Laws and Concepts.

Azul if he returns back to the Omniverse of the One and Only, he too would be suppressed. And if he did things too much, Azul would awaken that One.

Azul who is under a tree, opens his eyes and look at that eye.

Even though they were separated by thousands of layer of dimension, they could look at each other, like they were only a few feet from each other.

Azul was listening to the rain pouring down and enjoying the windy breeze when the golden mist that he had sent had done its job.

Meihul is still sleeping on his thigh. The sun in the sky shining bright, the clouds moves gently, there is butterflies flying and flower scent filled the area

It is a nice day.

Azul did not feel anything looking at that eye. He did not fear. Even if the owner of that gaze come to his Universe, he is not afraid.

They are of a different level.

If he dares come, he would be beaten back. As for the reason why Azul did not simply save Azief from his fate and destiny, it is because that is the destiny and fate of that Omniverse

It is entangled with so many things. Once Azul went into that world, he had to follow the rule of that world.

Even for him, untangling such a burdensome fate and destiny is not something he could effortlessly did.

But he could aid him according to the principle of Karma. He looks at that gaze. There is no eye in the sky.

There is no silhouette of Azief future-self looking at Azul.

But Azul could sense it. And once he could sense it, he looks at Azief future-self that is standing inside the collapsing Time Space tunnel

Azul smiles and he said

'What an impostor!' and he laughed.

'That is too unfair, don't you think? Trying to swat him to death like a fly? You want to confuse cause and effect. You are real and at the same time not real'

His laugh seems to be very contained. It is not loud because he did not want to wake Meihul who is sleeping peacefully on his thigh

But that laugh travelled incalculable distance and echoes all over the Time Space tunnel.

It seems to him that there is no distance at all. If he wanted to, he could arrive in that Time Space tunnel in an instant.

This is the infinite changes of Karma' he said and that word echoes in that Time Space tunnel

Azief smiles and once again he laughs like he found something very funny

No one would understand this word other than the ones involved.

Azul did not need to explain because Azief future-self would understand.

'Now, enough peeping' And Azul waved his hand. A powerful force cut off the connection of the gaze with Azief future-self eyes.

Azief future-self close his eyes and then opens it again. This time, he could no longer see the scenery of that world.

That world is closed from him.

The Time Space tunnel then collapses and Azief future-self become transparent before turning into motes of light and disappears from the Time Space tunnel.

And the moment that figure turns into motes of light, the Time Space tunnel collapsed entirely, creating a Time Space explosion.

While all of this is happening inside the Time Space tunnel, all of this is something that is unknown for Qarliya who monitored the time space tunnel.

In her readings, there is only a few second of abnormal energy spikes and then the energy spike ended and everything went to normal

Of course, how could she ever imagined that in that brief moment of time where there is an abnormal energy spikes, Azief future-self tries to kill Azief and Katarina.

And if that is not enough, even Azul, a being as old as the Five Seats of Orvan also interfere in the matter.

If this is known to the Universe, it would be a huge story. Azul is one of the last living Ancient Asura

And the abnormality of Azief future-self would probably also be scrutinized and put under a microscope

But, in the readings, there is only a few second of abnormal spikes. How could Qarliya could know all sorts of things happens inside the Time Space tunnel when she is not in there

Even if she is there and send a probe inside that Time Space tunnel, when Azief unleash his attack and collided with that lingering breath of his future-self, that explosion would probably fried all the evidence that Qarliya could bring back.

And Qarliya might even die under the coercion of Azief future-self.

>>

#### **Chapter 1304 Helping a Friend is Hard**

Qarliya sighed as she looked at the interface of the information of the Time Space tunnel that she had opened.

'What happened that cause such a spike of energy?' she seems to mutter to herself as her mind is calculating some data. She might look like a little kid and while she does act like a little kid and a bit na?ve in certain things, she is equipped with many function. Her head is basically a super quantum computer.

She also notices that the stabilizer is fried but she only frowned.

'Something probably happened.' Then she looks at the reading again and then she clicked her tongue

'Something did happen. They were thrown off course' she thought. She sighed but there is nothing more that she could do.

Qarliya is still in the Seresian world and she is ready to retreat from the Seresian world. her last job was to help Katarina go home and make sure that the United Intergalactic Alliance to grant independent to the Seresian world.

When she first came here, she though the hard tsk between the two is to pacify the envoys of the United Intergalactic Alliance.

But now that she knows certain things about Azief and his relations with Katarina, it turns out the harder task is helping Katarina and Azief to return home.

She believes it to be her duty to help Katarina home.

Even though, the Five Seat of Orvan seems to care more about Azief, at least to Qarliya, she cares more about Katarina.

Katarina had help her and the Orvanian Directive.

So, the return home trip is a reward.

It also a way for her to show her appreciation to Katarina.

Qarliya doesn't have many friends in Orvan. Even though ever one knows she acted like a child because she is really a child, nobody thought of her as a child.

She might have lived for eons but her mental state is quite childlike. This has something to do with the fact that she did not experience life the same way like other Orvanians

And as for the reason why she did not have many friends, she blamed her functions. She is a tool first, an individual later. You might think that she resent this Qarliya did not resent this.

She understood it. She understands why people treated her the way they did because she is intelligent and smart.

But, that doesn't make it alright. Because she is not simply a tool and she feels, so, even though she understood, she still feels hurt.

But, it would be nice if people could see her and not simply her functions.

And Katarina had seen that.

Qarliya treated Katarina like a friend because she treated her like a friend.

So, regardless of the schemes and plots of the Five Seat of Orvan, Qarliya sincerely wanted Katarina to return home without any problem

But, it seems that if you travel alongside someone who even the Five Seat of Orvan pays attention too, the journey would probably be very unusual.

'At least, nothing bad happened to her.' Qarliya thought to herself.

Qarliya got the result of her calculations almost immediately.

Even though both Katarina and Azief veers from the course a bit, the calculation shows that the time difference is not that far and the destination did not change.

And they survive whatever happened inside the Time Space tunnel

She could only sigh.

'Why is it so hard for me to make a friend?' Qarliya mutters to herself. One of her friend become a traitor.

And as for this new friend of hers, she seems to be intertwined greatly with the fate of that mortal man who has caught the attention of the Five Seat of Orvan

Whoever that the Five Seat of Orvan had to pay attention to must have some great destiny or background or certain influence.

Though in Azief case, Qarliya believe that this mortal probably has some great destiny because he did not seem that he came from some great background

And most of the time, a person with great destiny live a very complicated life full of ups and downs

Katarina standing alongside with such a person.... Qarliya is worried about her friend.

She sighed and then said.

'I hope you don't die too early. After all, if you die too early, we would never meet again' Qarliya don't think that she would meet those two again.

Since after this she would probably be stationed in some place else. If not she might return back to Orvan and take a vacation for a few hundred years.

But, in this Omniverse, who could say for sure.

'Still, what kind of thing happened that almost all countermeasure that I set up beforehand were all destroyed?' she thought to herself.

The stabilizer is not the only thing that was fried like a toast bread. She also makes sure that the time space on the portal connecting the Seresian world and the Time Space tunnel is opened.

This is a measure that she had put in case something bad happened and those two need to return back.

However, what happened afterward is really weird. The portal that connected the Seresian world and the Time Space tunnel had collapsed.

But then almost a second later, that portal suddenly up and running again.

It was like in that brief moment, the portal was destroyed and reconstructed.

However, to do that requires some unbelievable control of the Laws of the Universe.

At that time, Qarliya really wanted to dive into that Time Space tunnel and look through it to find what the hell was going on.

In her many years of opening portals of Time and Space, this is the first time, she had ever experienced this kind of thing.

Though, she must admit most of the time she uses this kind of methods, rarely she sent someone other than an Orvanian

Even though she had prepared all kinds of countermeasures in the end, something still happened.

Since the moment that the Five Seat of Orvan shows great attention to Azief, she slowly understood something.

This person must have some extraordinary fate and destiny. It is either that or Azief has some unbelievable background.

That is the conclusion she had reached.

That mortal while powerful it is not the kind of powerful that would threaten Orvan or could be compared to the great generals of Orvan.

Yes, that mortal walk the path of perfection. But, he is not the only being that had walked the path of perfection.

And probably that mortal would not be able to walk the path of perfection until the end. Qarliya had seen many mortal beings that try to walk the path of perfection

But, in the end they lack the destiny and usually would have to cut their path short

And that mortal also did not come from some huge background like Asgard or Olympus or the other great civilizations

So, that slashed the possibility that Azief comes from some powerful background.

But then why would the Five Seat of Orvan pays that much attention?

If it's not power, if it's not background, then after eliminating other factors and reason, the only one left is that the fate and destiny of this mortal is so important that it needs the Five Seats of Orvan, the highest existence in Orvan to scheme against him

Since then Qarliya knows that abnormal things would probably happens around this mortal regardless of how well she prepares for it

That is the conclusion she had reached

She could only sigh after seeing the result of the Time Space tunnel travelling.

'I expected it to some degree but now I am experiencing it, it does not feel good. Even though, the ending was good, in the end, all kinds of equipment is fried. I only hope that at least the devices I set up to maintain the Time and Space tunnel at least help them both' she said to herself before closing the interface

She sighed and then just shakes her head

'Whatever. This is the games of those bigshots and have nothing to do with me. I am just trying to help a friend' she said to herself and then she began closing her eyes

The moment she closes her eyes; all kinds of orders is sent to the labs all over the Seresian world.

Then the entire Seresian world shakes.

There is shaking all over, the seas seem to rage and the clouds opens up and the people of the Seresian world that day all look up toward the sky and seen something incredible.

They could see all kinds of spaceships flying toward the sky and before they could truly see what it is that is flying in the sky, these spaceships disappeared in a blinding explosion of light

To those people who were not educated like the maids and people inside the Palace of Altayera, when they see these weird phenomenon, they think of it as chariot of the gods.

Some painted this event onto a painting.

And some carved it in their caves.

The labs of Orvanian that was embedded on the Seresian world ground had all kinds of shapes.

Some were shaped in a pyramid-like shape. Some were saucer-like and some are like some kind of rectangle shaped flying device.

Probably because of the high profile evacuation of the Orvanian forces from this world, a few hundred years from now, the primitive living beings of this planet would form pyramid like shapes and told stories of chariot of the Gods, flyting in the air and disappeared in an explosion of light

All of this is seen by the living beings of the Seresian world. This is the day that the Seresian world would open a new chapter in its civilization

That day, Azief and Katarina is not the only one that leave this planet.

The Orvanian had also begun its exodus.

### **Chapter 1305 Crystal Ball**

While Qarliya is heading home in light speed, in a secluded dimension which is layered with all kinds of protection charms and runes, there is five Orvanians sitting on a throne.

This is the Five Seats of Orvan

They all seem to be squinting their eyes.

'We could not see anything' one of them spoke.

The other four nodded.

'It is always hard to see anything in the Time Space tunnel'

Sound of acknowledgement could be heard.

'What one would see in there is different depending on one own comprehension. And we all agree that we would not send probe in there. There is no need to worsen his opinion of us' The other four nodded.

'However, this is an abnormality' One of the Orvan spoke.

And for a moment, there is only silence.

'We need to see more' Two of the Five Organ said, in unison. It was almost like they were thinking the same thing and spoke it with the same intensity and timing.

The other three nodded

'It is approved'

Then the Five thrones without any warning all teleported and they appear nears each other. It was almost like they were agreeing to do this from the beginning.

But, this is not the case at all. The Five Seat of Orvan had always had some kind of telepathic connection that is hard to explain in the Omniverse

Their throne floated in the air and they form a floating circle around each other. There is a powerful psionic force that seems to be rising up as they stand nears each other.

If Hirate was here, he probably would be shocked at how dense the psionic force around these five Orvanian

It is no wonder why these five beings could use their mental energy to even gaze upon a world zettillion of light years away.

One of the Five Seat waves his hand and a crystal ball appears in the middle of that circle. The crystal ball did not look like the crystal ball in some parlor shop

Instead, this crystal ball seems to have four runes carved into it. It decided the alignment of p and down, of west and south of the crystal ball.

One might think that the crystal ball is small. But if it is brought out from this dimension where the Five Seats of Orvan inhabits, this crystal ball is the size of a small galaxy.

One of the Seats from the House of Qar then look at the crystal ball.

The gaze seems to contain some psionic force and then one by one the four runes that was carved onto the crystal ball lights up

He nodded and then said in an imperative tone.

'Calculate the cause and effect'

At the same time, he is sending psionic force to the crystal ball to make sure that the crystal ball knew which cause and effect he is referring to

Then the other four seats also began sending their psionic force into the crystal ball

The crystal ball began to become even brighter and then rows of symbols and numbers from all kinds of civilization appears inside the crystal ball.

The crystal ball itself is now shrouded with thick psionic force that swirls all around it.

The crystal ball seems to show the five seats of Orvan the cause and effect of Azief, Katarina and all that is related.

Most of them is fast forwarded to the scene of Azief and Katarina entering the Time Space tunnel.

But once Azief and Katarina enter the Time Space tunnel, the crystal ball images began to become blurry.

And then it shuts down completely

'Hoh' One of the five seat was astonished. But the crystal ball is still calculating. Not long after, a word seems to appear inside the crystal ball.

'Like I expected' One of the Five Seat said the moment he reads the conclusion of the crystal ball.

The other four nodded and sighed.

'This is expected. Since the moment, Azief had veer from the course of fate and destiny, some beings would no longer just passively watching. They would begin to move and act'

From the moment Azief and Katarina wanted to go home and enter the Time Space tunnel, the Five Seat of Orvan has been paying attention to it

Of course, unlike before, they did not scheme against Azief.

Last time they were caught red handed by the Creator and they fear that Azief might have some misgivings about them

Azief silence means that the mortal did not yet wanted to tear face with them. So, they decided to take a step back and give proper respect.

So, they did not send any probe or any Divine Sense into the Time Space tunnel. And even if so, peering through Time Space tunnel is not easy task

But, from the beginning, the Five Seats had some inkling that something would happened the moment they enter the Time Space tunnel

The Five Seat of Orvan had a very powerful instinct.

So, they could tell that something bad was about to happen. And just like they predicted, something wrong had happened.

But they themselves did not know what went wrong.

While they do have extensive knowledge about the Multiverse and their work does touch the boundary of Time and Space, the one that is truly expert in Time and Space is the Time Lords

'Contact the Time Lords?' one of them ask. The other four frowned

'They would probably not cooperate'

'They will remain in the background? Even at this juncture? Are they fine with things ending the way it did?'

The other four seats did not answer.

Even though they spoke, their mouth does not move.

All of this talking and conversing is done by using psionic force. Each words that they send to each other creates a ripple in the space-time around them

'They do not like this mortal...or his friend the speedster. Too much of a troublemaker. And then there is also the Time God'

'Jean.... that mortal?'

One of them then said

'He is still a mortal. He is not yet the Time God. There is no need to hold grudges for someone that had not yet reached that level'

Then one of the Five Seats said.

'You know how it is with this Time Lords. Time.....are quite subjective to them. It did not matter whether Jean is a mortal right now or not. What matters to them, that he would be the Time God. Hence, the factions among the Time Lords'

The other four nodded

Then the Orvan from the House of Yara said

'And the Time Lords.....they do not like to leave anything to chance. Time is a.....very complicated matter. They fear that if they meet the Time God, some Time Remnant could be awakened. They do not know if the Time God had some kind of countermeasures or some kind of methods that would be activated. They probably hated Jean more than they hated the Speedster'

One of the Five Seat of Orvan then said

'The Speedster is a problem that they could handle. Even though in this timeline, he did some trouble, in the end, like the matter of the Time Crisis, it all went according to predestined plan'

'It is under the acceptable range of error. But Time God? That mortal basically undid all the realities and Time and Space of the Omniverse. Even till now the Time Lords is still working hard to undo, to rectify and to piece together some of the new script of the current timeline'

The other four become silent. But then one of the Orvan from the House of Rhobos simply said

'You are basically saying that they are busy'

'Yes. It is not every day, the Omniverse was rewritten. To be more accurate, it probably had never happen before. They are still working on it. Thus, giving us quite the free reign to manipulate many matters'

'Then what should we do?'

The words on the crystal ball is only a few words.

The words are

[Unidentified energy detected]

Of course, to some people this is not a clue at all. There is so many kinds of energy in the Omniverse.

But this is a crystal ball of the Orvanians. This is Orvanians crystal ball, a race of aliens who is basically like the Scholar of the Omniverse

The amount of knowledge they possess is probably unrivalled in the entire Omniverse if you exclude some really old ancient existence like the Ethernas and the Ancient Asura.

What does it mean if it is not unidentified? There is only probably only a few being in this whole wide Omniverse that they could not see through

It is the beings in the Garden

'Those being in the Garden?' One of them offered.

One of them shook their head.

'It might be them. But it might also be that "Being"

'The Grand Supremacy Who Realized his Path?'

The one that offers this conclusion nodded

They are referring to Azul.

They did not dare to verbalize the name for fear that Azul would be alerted. It is fine if they spoke it without meaning to.

Or when they are speaking about some unimportant matter.

But this is an important matter.

## **Chapter 1306 A Writer Inside a White House**

'Investigate?'

It is a question.

It took them a few seconds to think.

A few seconds is enough for these five ancient Orvanians to do all kinds of calculation in their minds and they all sighed in unison that it echoes all over in the dark space that envelops them

'Do not investigate. In the end, it did not matter whose hand that reach out into the Time Space Tunnel. What is important that the mortal survives and thrive. Fate and destiny is not easy to be changed. Sometimes it would be a curse. But sometimes it would also be a blessing'

What he meant is understood by the other Orvanians. Azief if he knew his fate, he might be dissatisfied and wanted to change his fate.

He probably would think of his fate and his destiny as his curse and shackle.

Changing fate is hard. It is not as easy as one might think.

A fate that is created by man could be broken, but a fate that is decreed by heaven is hard to change and even harder to break

But there is also advantage of being mark by fate and destiny.

Azief would not die until the moment his role is completed. There is a need for that fate to be fulfilled and completed

This is what is called a great destiny

As such, anyone who wanted to kill him early, had to fight against fate and destiny

It is funny that sometimes fate and destiny could be your enemy, but at times it could be the staunchest ally.

Someone might have tried to make a move against Azief inside the Time Space tunnel. But even though the Time Space tunnel is cut off from many conventional law, fate and destiny still remains and this fate and destiny that binds Azief is also the one that protects him the most when his role is not yet completed.

This is the fickleness of fate and destiny.

Thus, one always said, fortune and bad luck is not easily distinguished. Sometimes a bad luck is actually fortune is disguise and vice versa.

'We all agree then not to investigate?' The other four nodded.

Then one of the Orvanians waves his hand and the crystal ball disappeared. They all blink their eyes at the same time and then they were separated by thousands of miles

'We will continue to observe and reduce contact with him. Lower his vigilance against us. It is imperative if we cooperated in good manners'

One of the Orvan then said

'I believe when he reached Sovereign level, he might be the one who would seek us. So, there is no need to be to active now. It is unfortunate that we had to scheme against him to seek the Creator.'

The other four nodded and then like they share the same though, all five of them sighed. Then once again they lazily close their eyes and the darkness that covers them become darker and deeper.

Azief might not have known that the disturbance that happens in the Time Space tunnel is observed by many people.

However, not many beings know what really happened inside it other than a few powerful being

On the other hand, sitting on the edge of the Omniversal Void, the Creator squinted His eyes and frowned

'I told him not to interfere too much in this Omniverse. Stubborn'

The Creator of course knows that Azul had interfered.

But, it is not easy to stop it. Since Azul is the only being that is stronger than Him other than His Lord

Azul is the one who realized the Path and had created a new Universe.

The last time Azul descended in this Omniverse, the entire Omniverse fate and destiny lines seems to sway.

This is a being that transcended everything.

But, he is different from His Lord.

There are many galaxies but there is only two Universe.

This depends on the definition. Before the ascension of Azul, the Universe is only one. There is nothing before it.

Even the Multiverse and the hidden dimension and all of that is under the umbrella of this Universe.

The simple definition of a Universe is all of space and time and their contents, including planets, stars, galaxies and all other forms of matter and energy.

Of course to some civilization in the Universe, if they define Universe as "all the can ever see" or space time regions that expand together" then many Universes may indeed exist under that definition

But in the eye of the Creator who created most of the living being in the Universe, knows that there is only one Universe.

Even those who hides in pocket dimensions or cut a bit of space and hidden it away, in the end, they based off it with the Laws of this Universe.

Hence, there is uncountable of galaxies in the vast span of the entire Universe but there is only one Universe that comprises of all things.

But the moment Azul ascended, His form of being changed, transcending everything and so He cuts a Void. This is different from the Void that sometimes appeared between the chasm of galaxies.

This is a Void that could not be crossed because the Laws and energy beyond that Void is entirely different.

A New Universe emerged. This Universe is not part of this Universe at all and different and separate.

If Azul did not allow anyone to come, no one would be able to come. Unless of course if His Lord wanted to move, then His Lord could come because they are of the same level

But if not, nobody could cross that chasm.

The Universe that the Creator has been looking out for had evolved to an Omniverse. In the beginning there is no Multiverse. But Sithulran was stubborn and touch what should not be touched and see what should not be seen and so the infinite universes exist inside the contains of laws and rule of this Universe.

Then there is also the Savi'krian race whose speed and ability split time and space, creating many separate dimensions and pocket dimension once again splitting more and more spaces of the Universe.

And encompassing all of this the simple Universe become even more colorful, become an Omniverse.

He could only sigh. he did not even have the chance to stop it and before He knows it Azul golden air of fortune and luck had crossed the dimensions and the Omniversal lines and even enter the Time Space tunnel.

He could not stop it but he also did not go toward that gate. There is no need to. Azul knows what he should and should not do.

He only looks toward that endless Void, his eyes is looking far away. For a moment, His eyes are shining bright, the heat from his eyes burns the space around Him.

And then he sighed. His sigh fills the entire Void and breaks the vacuum space. Then he averts his gaze.

He also has many things to do. He might not have to scheme as hard as the Five ancient Orvanians, but He also has His plans.

The Karma between Him and Azief is not yet written off. Arial, this incarnation of Him still owes a lot.

And Karma that has been owed, needs to be repaid.

'Maybe, from the very beginning, all of this has always been under His calculation' he thought and he smiles. Then thinking of this, He disappeared from his sitting place.

This disturbance that create ripples all over the Omniverse of course alerted some beings. And it alerted a certain being

Somewhere inside a garden, there is a white house surrounded by flowers and trees.

The flowers are all beautiful and many of them are unique. There are some that are commonly seen, and some is too weird to even describe.

The floral scent fills the garden, each scent seems to be able to revitalize the spirit and calm the mind.

And as for the trees, there are some trees that are tall and lush and some are withered and dying. Each tree has its leaves, and each leaf seems to contain breath of creation.

In such a vast garden, with so many trees and flowers, there is a Gardener. The Gardener did not seem to notice the disturbance.

Maybe, he would have noticed if he pays attention to it.

But the gardener has no such desire to take notice of everything. Instead he is busily pruning and cutting the trees and the flowers.

Sometimes he would spread out some fertilizer on the wilted and dying tree, hoping some miracles would rejuvenate the trees.

In other places, miracles are hard to happen.

But in this garden, there is no lack of miracles at all.

On the hill near the garden, there is a hill.

And on the back of the hill, there is a scholar reading a book with one hand holding a book the other holding a cup of tea.

He too did not notice as he is too engrossed in reading the book. And then there is a white house, near the garden

There are many rooms in that white house. And in one of that room, there is someone writing a story with a typewriter.

When Azul send the golden mist, he stopped writing. He looks at the typewriter like he was thinking of what he wanted to write

His gaze looks toward the window.

The window if one did not look carefully might look like a normal window.

But if one has some method of eye technique, one could see that on the window is the map of the Universe.

Everything could be seen.

'Hmm' The one writing the story seems to say. There are rarely any words coming out of His mouth.

Then there is a sigh

There is only a long sigh that could be heard all across the large garden. Then after a while, the sound of the typewriter could be heard again

All over the Omniverse, there is a reverberation that is causing waves towards fate and destiny. A storm had been created by the wings of a small butterfly.

### **Chapter 1307 Falling**

Azief did not know about all of this. He did not know that all of this cosmic beings are very interested in him right now.

They talk about him. They make plans around his actions.

Katarina even more so. In Earth, she might be the leading character of her faction but to those cosmic beings, she is but a side character

Of course, most people don't like being the side character. If anything, everyone wanted to be the main character of the story.

But, if Katarina or anyone else knows how the story ends, then being the side character is probably better than being the main character of this grand story of fate and destiny, of ancient promises and ancient prophecy

Right now, they are tumbling through time and space.

When Azief exited the portals what awaits him is not Earth.

But instead a white space of nothingness.

It is a turbulent space and time.

Every time he experienced it, it always a new experience.

He had expected it a bit considering how much he mucks up the Time Space tunnel. But, the moment Azief in in this space, he felt relieved. This place might be called the turbulence space but, at least it is not the Time Space tunnel

In the Time Space tunnel, Azief knows that his future-self could do some damage there. He could appear there

And considering that his future-self seems determined to kill him, Azief is not eager to go to any Time Space places.

So, he felt relieved. Because even though, he did not immediately go out and arrived on Earth, he knows he is going home.

And he is now safe. Azief look around her. In this vast space of unlimited whiteness that seems to cover everything, Azief is looking around him

And then he smiles as he saw her in the distance.

'Katarina!' he shouted. His voice seems to echoes in this unlimited space.

Katarina who is falling as she is flailing down like a bird falling down from the sky could hear the voice and look toward Azief in the distance.

They seem to be a few hundred kilometers apart but it is really hard to estimate distance in this space of dimension.

Azief is also flailing but it is not as bad as Katarina. And when he tries to use his Divine Sense, the space that it could cover is limited.

Even though this place is not the Time Space tunnel, it is as just as mysterious. The energy is also chaotic in this place.

Of course, if it is not chaotic how could it be considered a turbulent space. Both Azief and Katarina could hardly control their body.

All around their body there is a force. Azief could identify a few of the Laws contained in the force

There is Laws of Time and Space. But there is also other Laws. Some he recognized, some he did not

When they were coming out from the portal, this force pushed them down. And they lost all control over their body

It is like they were falling down from an extremely high places.

Like mortals that could not fly, Azief and Katarina could not direct the direction they wanted to go.

If not, Azief would have already flown toward Katarina side

But Azief and Katarina both could feel that as more time passes, the control of the matter around them tightened.

It is like the Laws are being completed. The turbulence slowly subsided.

And not before long Azief could control his body as he directed his body to fly closer to Katarina

It did not take long before he arrives beside Katarina and hug her. Smiling, he said

'What did I say?'

Katarina laugh. Right now, they are already out of danger so they could finally be relieved a bit.

'I should have known that travelling with you would always be accompanied with danger' Katarina said, as she chuckles.

'You regret it?' Azief ask with a smile on his face. It was like kind of a challenge. Katarina shook her head

'Not one bit' Azief laugh.

They hug each other as they seem to fall down. Or it might that they are going up

It is hard to tell the direction in the turbulent space.

Time is also hard to tell in this place. However, they did not feel danger.

And even though they could now control their body, they follow the flow of that force. They know that the flow of that force would lead them home

And then after what seems to be an eternity, both Azief and Katarina could see that there is a crack on the space.

And on the other side of the crack is land. It is like they were watching a land from the sky.

Azief and Katarina immediately knows that if they pass that crack, they would be going home.

So, they accelerated their speed and not before long, the scenery around them changes and almost in an instant, both of them could feel energy of the world around them.

But then, they felt weak.

'Shit!' Azief curses. He could feel that his body is out of energy all of a sudden. He holds Katarina tight

His body become translucent in almost an instant. But, he could still hold things

Katarina also felt the same sensation. The moment they pass that crack, both of them seems to drained of their energy

They seem to regurgitated out from the sky and the force of these push was so powerful that both Azief and Katarina did not have time to changed direction

BOOOM!

The dust rises up

They crash landed onto the ground, and a large explosion erupted from the site of their crash

There is a crater with the width of fifty feet. When Azief and Katarina crash it was like the gods were hammering the earth

The entire land seems to be depressed downward. The wind went wild and the impact was so loud and so powerful that the clouds directly above them disperse in almost instant

Then there is the shockwave.

It erupted the moment Azief and Katarina body crash.

The shockwave did not only uproot all the nearby trees around the three-hundred-meter radius of the crater, it causes the entire area to be cracked and depressed

The flying monsters around the area all flew away in almost an instant. Some who were late was pushed by the raging wind generated from the shockwave.

The dust rises up to the clouds.

If not for the fact that the clouds are too high now, it would probably truly reach the sky.

Soils flew up into the air and before they even had the chance to fall down, the shockwave swept it all away

BOOOM!

BOOOM!

The sound of explosion resounded all over the area as the shockwave continues to uproot trees, level down hills and crush large stones and boulder.

After a few minutes, finally the shockwave had ended. Usually after this kind of crash, there is dust finally coming down from the sky. But because of the shockwave that sweeps all the dust, Azief had clear view of what is happening.

His body is still translucent but it is enough for him to protect Katarina. Even though his body had some cons to it, there is also a few advantages to it.

Beside him is Katarina, lying down. But there is no dust on Katarina white attire. Like a pure snow in winter.

Around her, there is swirling energy. It is a force field that Azief had immediately created to protect Katarina.

The impact of the crash is mostly his force field crashing with the land. His body is already half translucent and if he had crashed with his body, there is at most some trace of his falling.

He as long gone past the way where he crashed and the entire land depresses. That is only when he has his physical body.

Azief even though he did not see this with his own eyes, he could guess it. He is still closing his eyes.

'Shit' he curses.

The reason he closes his eyes was because when he was falling just now, his eyes began to feel pain

He could tell that it was another premonition.

It had been mild when he was in the Seresian world but the moment he returns back to Earth, suddenly like an accumulation of glimpses that he had been restraining, all of them suddenly broke out.

So, Azief closes his eyes trying to block out the pain.

But this pain is not physical. The best way Azief could categorize this pain is the pain of the soul. He takes some time to sort out the glimpses. He did not see much and it is hard to make sense of the images that he saw

'Erika' Azief suddenly muttered. Right now, even if the whole world did not know where he is and what he is doing, Erika probably could sense him

Azief then shook his head, shaking the thought out of his mind. He sighed and then he slowly opens his eyes.

The pain is still searing in his mind. He looks at Katarina who is lying down beside him, floating just a few inches from the ground because of his force field.

Smiling, he looks at the sky above him. And he smirks.

### **Chapter 1308 Earth**

It is the yellow sun and the white clouds with blue skies. It is the sky of Earth.

He takes a deep breath and even though most of his energy had been drained, he could sense this familiar energy and he smiles

He is sure now that he is back at Earth Prime.

This is not some other worlds or some other dimension.

That is because Azief could feel the energy of the All Source.

This pure energy that is present in Heaven and Earth, that is only present in the Milky Way galaxy, that only exist in one of the infinite Multiverses confirm Azief thoughts.

Katarina also slowly opens her eyes. Like him, she first looks to her side. She saw Azief, glance him over, and smiles

Then she looks at the sky, takes a deep breath and then laugh.

'We're back' they both said at the same time and then they look at each other. Katarina chuckles and Azief laughs

For a moment, it was like they were back in the Palace of Altayera.

Azief did not immediately got up. So, Katarina stay beside him. She notices the force field around her. Then the force field slowly fizzles out.

She looks a Azief and said

'You don't have to do that; you know?'

Azief shakes his head.

'I was drained of my energy. It is right to assume that you also lost your energy. And unlike me, you didn't strengthen your body. Without energy, your body while it is still powerful, lose some of its durability. It is merely a precaution'

Katarina did not say anything else then.

They seem to be recovering their energy as they lay down inside the crater.

The crater is like a crater made of glass. When they crashed the heat seems to exploded into unbelievable degrees of heat in matter of nanosecond.

It burns but because it burns so fast, it carbonized the soils. It took them around a minute to at least have enough energy to get up

Azief slowly got up. His body is also not as translucent as before. There is now some solidness to his existence.

Katarina also got up. Even though there are no external injuries for both of them, only they know that they are very vulnerable right now.

Azief Laws could not be mobilized because there is no corresponding energy that react to that Law in his body.

As for Katarina, all of her Disk is dim right now. Like Azief, there is no energy, so she could not use it to manipulate the energy.

Azief on the other hand because he is a bit different than others, could still squeeze out some energy and created the force field around Katarina.

But that had taken all the energy in his body.

Now, at least, they have taken some of the energy, they finally have enough energy to get up. There is a reason why they didn't immediately gobble up all of the energy around this area.

Both of them are still cautious.

And there is also some know how on devouring energy.

It is a bit like eating.

When you are hungry, you don't devour all the food you could see in front of you. That would lead to indigestion and you might even vomit it all out.

Take it slow and when the pace is right, then you could devour all you want. Azief slowly devours the energy and then after he feels familiar with it, he takes a deep breath and close his eyes.

Then he opens his eyes and then suddenly all the energy in the radius of one hundred meters was instantly sucked into his body, leaving nothing. Katarina who was standing beside him looks at him and said

'Leave some for me' She said and Azief laughs. He forgets about her and nodded.

'You take that direction and I take this direction' he said as he pointed to Katarina left and his right.

When one reaches Disk Formation it is easier for them to control and manipulate the energy around them. So, they could even choose the direction on which places to suck their energy from.

Katarina then began closing her eyes.

She could not do what Azief could do so effortlessly.

All around one-hundred-meter radius of her, the energy of Heaven and Earth had been cleaned out by Azief.

So, she is attracting energy in the distance.

Because of how powerful the pulling force, the energy further away even condenses with each other, creating something like a mist of energy that is slowly being pulled toward Katarina.

Beside her, Azief is also doing the same thing.

The energy from two hundred, three hundred meters away from him is being pulled.

But he did not immediately devour it.

The range of where he could draw his energy from is the same as the range of his Divine Sense.

His Divine Sense is pulling these energies toward him.

And so, the range multiplied from two-hundred-meter distance, to one thousand meters to ten thousand meter.

They condensed together and then Azief pulls all of them together towards him. If one could see the scene right now, it is truly shocking. On Katarina side, there is a mist of clouds that is rushing towards her.

On Azief side, there is a spiraling storms of energy. And a rushing gust of wind that seems to solidified rushing towards him

The spiraling storms of energy is swirling around him and as for the rushing gust of wind it is the energy condensed. All of this happens in merely a second after their conversation

BOOOM!

The sound echoes all over as both of the energies gathered by Katarina and Azief slammed onto their bodies.

It enters their body almost immediately and both Azief and Katarina surges with energy. Katarina Disk was nourished almost in an instant.

The area around her suddenly became cold and the clouds above her head seems to turns dark

The hot air suddenly turns cold. As for Azief side, around him all kinds of phenomenon of reality bending erupts. If not for Azief restraining these phenomena with his energy, it probably would alert the world of his return.

Azief is like a black hole sucking all the energy around the crater. Katarina energy skyrocketed and it is the same fore Azief

It did not take long before all the area around the crater and the few dozen kilometers around them were all drained of energy.

But then almost as it is emptied there is process of the energy gathering back

'Hoh! Azief exclaims. Katarina was also pleasantly surprised with this. the rate of generation of energy on Earth seems to have improved.

In the past, if he drained an energy from some region or places, it would take days in minimum and if it's worse, it takes weeks for the energy to once again regenerates itself.

Katarina was not here after the end of the battle against the otherworldly invaders.

But Azief had read the report. Even though at that time he was worried about Katarina and planning to enter the portal on the hills, he also had pay attention to what was happening to the world after the Time Crisis.

So, he knew the reason why the energy regenerate so fast. This must have something to do with the merging of many energies during the Multiversal Convergence.

'I explain later' Azief said as Katarina seem perplexed at this. Katarina nodded and then they began devouring more energy.

It took them half an hour for them to have enough energy that they feel safe.

Katarina is restored to half of his energy and Azief is only fifteen percent. Both of their body is a pit for energy.

Katarina energy is pure because she only learns one methods, integrate all methods into one. Azief notices that when Katarina attack someone her energy seems to have some spirals like properties.

Because of that, the requirement for energies is more than normal Disk Formation leveler.

As for Azief, he is not only someone who walks the Perfection path, his energy is also domineering and one of the purest.

It is not surprising then that he needed more energy. Right now the energy around the area had already been refilled only it is bit thinner than before.

Now, they both feel like that they are full after eating.

'It's enough for now. Don't take too much energy.' Azief said. Katarina was puzzled by Azief instruction but she just nodded. Then Azief and Katarina began climbing out of the crater.

Azief frowns become even deeper

'Tch' he seems to click his tongue like something had annoyed him. Katarina on the other hand did not notice this.

She seems to be thinking of something. She takes a deep breath and then said to Azief.

'I'm going back to Moscow first. My brother must be waiting for me. And the Republic...with Jean there, I fear there would be factional battle between my brother and Jean' she said

Azief notice that Katarina is now more sensible in matters relating to politics.

It was not like before where she didn't know anything. This improvement must be because of her experience being a leader in the Seresian world.

She then slowly floated.

Azief could see that Katarina is about to fly off to the sky.

Even though she might not know where the Republic is right now it would not take her long to see where it is if she flew upwards towards the sky.

Of course, the distance between the sky and the ground right now is different than before.

The changes of Earth are all encompassing from the rate of generation of energy, to new monsters and plants and to new dangers and new opportunities

She is already floating but Azief fly up and grabs her hand

'Wait'

## **Chapter 1309 The New World**

'Hmm?' Katarina was startled by the sudden grab.

Her feet had already floated one feet from the ground. But as Azief had grabbed her, she slowly floated back down.

She looks at Azief with that expression of puzzlement and Azief then said,

'Let's sit somewhere first. I need to explain something to you first'

Katarina nodded.

Azief look around him and then he activates his Divine Sense.

A powerful force seems to explode from him. The ground around him seems to vibrate.

Even Katarina could tell that Azief had just use his Divine Sense

Divine Sense is usually silent and undetected. But, Azief using this kind of forceful Divine Sense is because the thick energy around this area.

The more energy in certain area, the harder it is for a Divine Sense to penetrate it.

This is the logic behind why low real leveler could not use their Divine Sense against people of the higher realm.

If a Seed Formation leveler uses his Divine Sense to probe a Disk Formation leveler, usually they would experience backlash because the difference in realm between them

As such, Divine Sense is affected by energies, laws and Concept of the world.

This is also the reason why in the Time space tunnel, Azief could not use his Divine Sense.

The laws and concepts in Time tunnel is very chaotic. His Divine Sense would then be confused. Instead it is simply better to use his own sense instead of using Divine Sense

This world since the Multiversal Convergence is now brimming with energy.

While it does make it easy for people to breakthrough, it also made it harder for people to surveil the world. In the past, Azief could use his Divine Sense to look the entire world.

But after the Multiversal Convergence, there are some places other than the forbidden zones that is hard for him to see.

And now, it is even harder.

His Divine Sense if its jut scanning a few hundred meter around him would not encounter such resistance.

But right now as Azief wanted to spread his Divine Sense as far as he wants, the resistance of the energy clashed with his Divine Sense

In less than a second, his Divine Sense spread out for one hundred kilometers, then two hundred kilometers then three hundred kilometers and then after reaching seven thousand kilometers, Azief retracts back his Divine Sense.

He is now frowning

Katarina stand there, waiting for an explanation and after seeing Azief frown, she also become worried

Azief did not use his Divine Sense to spread all over the world. Not only his energy is insufficient right now.

He also didn't want anyone to know where he is right now.

There is too much of this world that he does not know.

Even when before he went into the Seresian world, Earth was undergoing many massive changes. There are even new continents and new sea route that had been formed.

Earth right now is extremely large. And now, who knows how large it has become and what kinds of world it has become.

the only reason why he unleashes his Divine Sense is simply so that he could make sure that he had really returned to Earth

The other reason is because he wanted to know where he is right now. Using his Divine Sense, he knows that he is not in any one of the seventh continents.

Instead, he is on an island.

And this island is small. Yes, seven thousand kilometers island is a small island. And it is one of the smallest.

Azief after all had seen an island the size of Europe. It could not even be considered an island by that point.

In his Divine Sense, he could see that the further his Divine Sense go, the more it become blurry.

'The concentration of energy is too high' he thought to himself. It would take him time to familiarize himself. Azief did not use the power of the Heavenly Will to augment his Divine Sense.

Because he had another concern.

'At least there is nothing dangerous here' he thought to himself. When his Divine Sense sweeps the island he could see that there is many beast and monsters here. He even saw a few dozen monsters nest.

This kind of place would be ideal for people to raise their level.

The reason why Azief is not that concerned about these monsters and beast all around the island is that almost none of them could threaten him and Katarina

Most of the monsters and beast in this island is around Seed Forming level. The most powerful might be around Disk Formation level range of power.

He sighed.

Then he looks at Katarina.

There are some things that he needed to explain to her. Things have gone wrong and certain plans had to be changed.

Azief was doing all of this thinking while at the same time walking to the forest nearby. It takes him a short time to activate his Divine Sense and then retract it back.

There is a few beast looking at them from the bushes nearby.

Azief had no desire to cut them down so he just release his aura a bit to scare them off and these beasts quickly scattered away.

'At least even though none of them developed some intelligence, most of them understood fear' he thought to himself.

Katarina followed him from behind as Azief walk deeper and deeper into the forest. He did not look like someone who is lost, instead, he looks a lot like someone who have been here before.

It is simply because he uses his Divine Sense that he knows where to go

Katarina did not know what Azief wanted to talk about but as she walks deeper and deeper inside the forest she also took the time to look around her. She could see all kinds of trees and flowers and all kinds of insects and beast in the forest

The insects are also no small tiny little insect.

There is a firefly-looking insect that flies over head.

It does not seem to have any indication of trying to attack her, so Katarina did not do anything to that insect as and just watched it flying around in the air.

These insect even have ability to fly high into the air and the flapping of its wing created wind gust.

There is also small beast that looks like cute little dogs. But they are not dogs. Because their tails are forked. And they have horns on their head.

Most of them would scatter when Azief arrives as the aura that he emanated seems to induce fears amongst these creatures.

But Katarina was enchanted.

She did not know that the world had changed after she was kidnapped by the Demon King. But after looking at all of these, how could she still not know?

Something must have happened during her absence. But she did not seem shocked. instead, it was more like she was enchanted by it

Azief did not know this but there is a smile on Katarina face. It was like a world of wonder had opened up in front of her own eyes.

Weird beast and insects, colorful flowers that she had never seen before, large trees that covers the clouds.

There are even some trees that could move.

One trees even try to grab her. But even before the tree had the chance to grab her, sharp icicles forms and cut that vines.

There are also some trees that moves like a swing, smashing anything that comes near it.

It is like she is in a Wonderland.

All these new creatures that looks nothing like the creatures Katarina is used to. But it brings a smile to her face

Katarina finally remembered that during the Time Crisis, many otherworldly creatures also entered Earth.

Yes, the world was preoccupied with fighting Demonic soldiers from some otherworldly planets and other human-like beings that suddenly come and try attacking them

But while they were busy fighting these invasion forces, there were also portals and gates that connected other worlds.

Only these other worlds are not inhabited by demon-like creatures or human-like beings. Instead, it is inhabited by beasts and animals and insects.

Some of them even cross over to this side.

'So, that is how it is' Katarina quickly made this conclusion

Azief filled in the blanks when he arrived at Seresian telling her what had happened on Earth since she was kidnapped.

He did tell her that the world had changed after the Multiversal Convergence

But, it was the first time for her to see it.

The trees are all weird and unique. Some of them bore fruits and some don't.

But to Katarina it was very amusing and very novel experience.

Only people like Katarina and Azief who have reached the peak of power on Earth could still leisurely walk inside a forest that is full of beasts and all kinds of dangerous plants and trees and have time to marvel at it.

Azief did not even seem to see the nature around him, focused on finding a place to explain certain things to Katarina.

While Katarina seems to look at all the beasts around the forest like they are animals in a zoo. By now, they have left the area of the crater.

The area around the crater had been flattened and removed of all plants. It is now a flat area. Even a hill was flattened when the shockwave erupted

Of course, the extent of the destruction is very large.

They have to walk a few hundred kilometers to finally see an area with a forest.

But when they walk, it is not like the same type of walking like mortals did.

Each step they take warps the space around them and the distance of a few hundred meters is but a few seconds to them.

Azief did not know what Katarina is thinking instead when he arrived a bit deeper into the wood, he looks at the sky. And he frowns

Then he mutters

'I'll deal with you later' he thought to himself.

## **Chapter 1310 Time Went Wrong**

What he felt was the pressure from the Heavens.

When Azief first returns and confirms that this is his Earth, he began trying to feel the Heavenly Will.

He could tell that the barrier that he had created to warn the Heavenly Will not to encroach on his authority is already very thin.

He could tell that in his absence the Heavenly Will once again try to regain full control.

That is the other reason why he did not use Heavenly Will to augment his Divine Sense.

He does not want to be detected by the Heavenly Will. Every being under the Heavens is monitored by the Heavenly Will. Other than a few people who could shroud themselves from the eyes of the Heavenly Will, the Heavenly Will sees all.

And Azief is one of the few people on Earth that could hide himself and even Katarina from the eyes of the Heavenly Will

That spiral of energy that swirls around Katarina's body not only protected her from the crash, it also has something special in it that enables Azief to hide her from the eyes of the Heavenly Will

For now, he would let that Heavenly Will go. Not until he makes sure of something

He looks around him and nodded.

'This is a good place as any' he mutters. Katarina was only a few feet from him and then Azief suddenly waves his hand.

A powerful force burst out from his hand that sweeps across the area. Katarina was about to raise her guard up when the energy passes her.

It seems that the energy did not harm her in the slightest

The area where both of them are in now is full of towering trees.

It shades them from the sun and it is for that reason the forest is so dark and damp.

But with one wave of his hand, the trees around one-hundred-meter radius of Azief's position were cleared out.

The trees all disintegrated into ashes.

Leaving only a huge clearing.

Amazingly enough, the grass and the herbs on the ground were not affected at all. Only the tall trees were disintegrated.

The bottom of the tree, however, the stump was left behind.

He is not done yet. Katarina was about to ask what he was doing when Azief pointed one of his fingers upwards.

Ringgg! There is a sound like a bell being struck and the sound seems to echoes. Katarina could see that one of the rings on Azief finger is shining bright

Katarina knows that Azief had ten rings. Each of these rings have powerful abilities. It is Azief most prized artifact.

'what is he doing? The moment she thought of this suddenly, there is light covering the one-hundred-meter radius

The center is Azief and everywhere on the one-hundred-meter radius from him is covered with golden light.

Then runic symbols flew out from his rings and floats toward four directions. The one-hundred-meter radius expanded to five hundred meters

'A Formation!' Katarina exclaimed in her heart. She would not mistake it. Azief is trying to lay down a formation right now.

The four runes that fly out to the four direction acted like a border. It determines how much of space the formation would be able to spread.

It stopped at five-hundred-meter radius. Katarina look at the formation

This formation is circular in shape and it covers the area of the clearing. Then illusions seem to appear around the formation

The area which seem to be cleared out now seem to be full again with trees.

Only the people inside the formation knows that there is no tree. It is an illusion.

Azief then sit on one of the stump and he gestures Katarina to sit down in the stump beside him. Everything seem so natural.

Katarina was also shocked at this, at how casual Azief is right now. It is clear that he is used to this.

Then she looks at the formation again

Katarina then slowly frown. Because she could now recognize that the formation that Azief had just throws out is a concealing formation.

This is used for anti-surveillance. What Katarina understood almost immediately is that, Azief fears someone would hear what they said.

He was so careful and cautious that it raised the alarms in Katarina heart. Earth is not like the Seresian world.

At least in the Seresian world there is ancient old monsters that could still give Azief a run for his money. But not on Earth prime.

On Earth Prime, Azief is the strongest person in the world. There is no need for him to fear anything. Instead, usually, Azief on Earth Prime throws caution to the wind.

It is not that he did not know how to be careful but on Earth Prime, he had no enemies that could threaten him.

Like a sole predator in a cage full of prey.

But right now, Azief is careful enough to even lay down a concealing formation. Now, some of the questionable act that Azief done in the beginning began to make sense.

It seems that Azief had found something that she did not. Something that concerns him enough that he had become cautious like this.

The four runes are stably floating in the air maintaining the entire formation like it is walls. She also notices that the formation is not merely a concealing formation.

It also has certain function of illusion.

It refracted the light and manipulated the space.

Of course, Katarina knows that Azief while he is talented in many things, even a person like him did not have all the time in the world to practice formation.

Katarina had learned formation once and almost give up because of how difficult it is. And she was learning a battle formation that she wanted to employ with her maidens.

Imagine other formation that requires more intricate control. The only reason why Azief manage to create such a perfect formation is simply because he has the Ring of Grand Formation.

The illusion function of this formation seems to materialize tress out of nowhere. This is probably to hide that there is now a bald spot on the island forest.

The illusion function and the formation itself also seems to be concealing Azief and Katarina aura.

However, even though she understands that Azief is now being cautious and careful, she didn't understand what elicited such a response

Is there a danger that she didn't know about? But her senses did not sense anything. There is no feeling of danger.

Katarina look at Azief and she could not help but frown. They already formulated a plan when they were at the Seresian world

They have decided that when they return home, they first would go back to their force and assure them.

She would return to the Republic and take back her position as the High Chancellor and Azief would return to Pandemonium to once again sit on his throne as the monarch of Pandemonium.

Then they would call upon a meeting of all the great powers. Before Azief left Earth, there is still many problems plaguing the entire world

Hikigaya and Oreki had separated from the World Government. The criminal warlords had also fled to other continents and seas.

There seems to be a factional battle in the Republic. The World Government is unstable with some governors is unconvinced with the power of the World Government

Pandemonium has his own set of problems with Azief not retracting his support for Loki.

After that, they would settle on a way for all the world power to distribute the continents. Azief wanted to once again divide the world among the seven great power

In the past Azief had divided the seven continent to seven great powers.

Of course, in each of these world power, most of them had to contend with local faction, other forces who tries to undermine the world power stationed there and so on and so forth

Other than the Republic, the World Government and Pandemonium, the other four world powers usually had to contend with the other local forces in the places that they were rewarded with.

For the four world powers, it was a contest of power and those who are weak would be eliminated.

Azief crafted this model to make it easy for the world to be governed under order. Let them fight each other and let the common people not bothered by it too much

Of course, this also makes the common people very important for the word power since they need people to replenish their force

Each world power has their own identity and their own methods of governing whether it be a democracy or monarchy or any other methods of governing they wanted to try

It also provides peace to the Three Great Powers when all of the other powers is busy fighting the local forces.

It was a chaotic period of time yet it was also one of the most orderly since the Fall.

But with the Multiversal Convergence happening, with new continents popping up, new kinds of lands, the old order was destroyed and so a new order need to build.

Azief actually have a plan to solve this matter. He had share this with Sasha. Though he did not share it with Katarina.

He said it would be a surprise. They were also supposed to talk about enhancing the security measures of the world

There are a few other things that they would do after that, but the first step has always been to return home back to their force first.

And Katarina is eager to meet with her brother. She is worried about him. Still, she sat down on the stump and then she asks

'What is this about Azief? We have a plan. Let's stick with it'

Then she asks

'is there something dangerous that makes you this cautious? I did not yet activate my Divine Sense but I don't think that there is anything on Earth that could threaten you'

Azief then sighed. he then shakes his head and said

'We now have to change our plan' he said. Katarina eyes narrowed.

'What do you mean?'

'There is a slight miscalculation.'

Katarina did not say anything waiting for Azief to explain it to her.

'Something had gone wrong. I expected it the moment my future-self attacked us inside the Time Space tunnel. Though, I don't think that it is that bad. I still could not confirm it of course but I really don't think that it is as bad as I thought' he said

Katarina then ask him

'What went wrong?'

'Time. Time went wrong' Azief said.
