

## Shadow 591

### [Chapter 591: Merging \(3\)](#)

He knows he embarked on a different journey than the other people on Earth in his quest for strength

He strives for perfection. And he knows it made him a little late in achieving breakthrough than other people. But once he breaks through, his powers multiplied a hundredfold than if he follows the normal path.

If it's not strong, why would it be so hard right?

Azief also recognize that he is very lucky.

Some of the breakthrough that he had, he probably had to spend many more years than he expected if not for all the fortuitous encounter that he had over the years

Even in that formation of Disk it should have taken him longer.

And even now when he is forming law Bodies, it should have taken him even longer, maybe around thirteen to fourteen years but because he was included in the Demon Monkey scheme, he got some help.

The Temple and the energy of the world was used to help him achieve faster completion of his Law Bodies

That is the only real explanation why it took him only five years to complete something that should have taken him a decade

Though Azief don't believe in luck. Luck could be seized and taken away. And in some cases, it could also be stolen...and given away

All of this luck, maybe this is also because of Loki efforts.

Loki for some reason keep wanting him to become strong and have been doing everything he can to make sure that he would.

There is no other reason for this other than his objective for coming closer to him. Azief could never forget what he said to him. That he in the future would destroy the Universe.

Azief knows Loki is not telling him everything. If that thing is destined to happen, wouldn't it be the safest way to kill him? Yet, Loki for some inexplicable reason had never schemed to kill him.

Instead, he schemed to get him stronger, by all means possible, even if that means endangering the people Azief hold dear.

That is why he could never be completely at ease with Loki. Yet, in the list of people that Azief hold dear, Loki is also in it.

It is not he couldn't kill Loki. It is that he doesn't want to. And no one other than Azief and Loki understand why

Azief keep flying across meteor belts and space rocks, dodging them left and right as his speed increased even more.

Laws and Concept that swirls around him, unseen and invisible to the naked eyes is protecting him from radiations, cosmic dust and many other foreign elements that could change the makeup of human physiology

Thought, it is not very accurate to say that Azief is a human anymore. He had evolved. And when he steps into Divine Comprehension, he would evolve even more.

And each time he dodges and avoid these things floating in the vast space of the Universe, his mind is also making calculation.

What Azief is worried about now is the steps after this.

He knows that if he breakthrough to Divine Comprehension, there is another level of breakthrough which is Essence Creation.

He had a rough grasp on how to become an Essence Creation leveler but he is still not sure entirely.

Azief would not be satisfied just being a Perfect Divine Comprehension leveler. He also wanted to become a Perfect Essence Creation leveler.

He did not want to break the path that he is walking on.

Each time he breakthrough, the World Orb will fill his mind with new information on his path. Word Orb seems to not care which worlds you ended up in.

It still exercises it power over you.

Azief did not know this before but as he roams the Universe, he knows that there is not many object that shows such overbearing powers that could ignore dimensions, space and Time regardless of where you are.

Azief knows some things about the World Orb that most people don't know. He believes that the World Orb is the All Source. Not its fragments but the true and complete All Source.

Azief had once went into a world full of people with abilities and there he got an All Source fragments. He turns it into his Disk and now he had turned it into his Law Body.

So, he could estimate how powerful the real All Source would be. If the fragments alone are that powerful, he shudders to think how much power the real All Source object possesses.

It is why he rusted the information that got into his head each time he breakthrough.

What amazing is that the World Orb would adjust the level of knowledge it gives to the people according to their path.

Like it was trying to minimize the mistake someone could take in pursuing their path. Strengthening humanity.... but for what reason? That has always been Azief biggest question.

He sighed and shake that thought from his mind

Azief had researched this ability of the World Orb and he found out that for each person, it is different information but also mostly the same.

What Azief means was that If you take the conventional path of breaking through, then the requirements to breakthrough is the same.

These people could never fight against people who is like Azief who could decimate the same people of the same level

The people that uses such method to breakthrough could be said, to be neutral, blank devoid of any distinguishing feature, since they have no color of themselves.

Their energy is simple energy and is not colored by their will or emotion.

Thus, they might have great powers and could intimidate those low levelers but when meeting someone who have their own path or someone who perfected their foundation they would not compare even if that person they fought is a lower realm from them

Of course there are some people who walk their own Path. These are people who Azief felt like a comrade in spirit, searching for their Grand Path, just like him.

When he thinks about these people, his mind would flash to Raymond, Hikigaya, Oreki, that person who control Time in the Republic, Loki and Katarina.

They all have their own path and they focused on only one disciple. Azief on the other hand, since he seeks Perfection, had to master many things and understand many Laws.

And the Laws he had to understand must not be laws that are too low leveled else the Perfection Path could never truly be complete.

Azief had to plan each step with caution because one missteps and he could ruin his chances and break down all of his past efforts

He shudders to think what kind of requirements that he needs to fulfil after his breakthrough to Divine Comprehension.

But since he chooses such path, he did not complain or regrets it.

Azief was thinking about this when he suddenly stopped for a moment. Floating in the empty space, surrounded by nebulous colors of some distant star, he saw a planet not far away from him.

The planet seems newly formed. There is only water and there is not even any life inside it yet.

But that is not the reason he stopped suddenly. He frowned.

'It could even do something like this?' Azief thought to himself. The reason he stooped is because he could sense some of his power in that planet

The Law Bodies had incited the formation of this planet in this hidden dimension. He is thinking about a lot of thing and he then look back toward that vague outline of the Supremacy Stairway in the distance and thought to himself

'Did my Law Bodies truly incite a change to this Sealed Dimension? There is a Cosmic Law protecting the new planet. It could even do something like this'

Azief look at it for a long time like he was thinking of something. He then closes his eyes and then he shakes his head

Without saying anything he then flew once gain to his destination

His mind once again wanders thinking about Divine Comprehension level.

What he understands about Divine Comprehension is that if one person could obtain three Laws, whatever that Law was and gained understanding of it, they could charge through to Essence Creation this content of novelfullbook.com, if you reading this content please go to website novelfullbook.com to continue reading, fastest update hourly

Of course one could obtain many Laws so that the foundation of Divine Comprehension leveler would become stronger and more firm

After gathering many laws and understanding it, then people would choose and breakthrough to the next level.

Azief believes that people have understood how important it is to have a firm foundation when attempting a breakthrough.

Even Azief when he is a realm below his enemies, he could still trash them.

It is not only because he is strong, but also because his enemies are mostly people who did not have firm foundation of their realm.

But Azief also knows that not all people could choose to do it like that. There is the matter of resource, energies distribution in some areas and also situation.

If you are being hunted by an Orb Condensing Stage and the only way to survive is to become stronger, then even if you could not firm up the foundation, some people would surely breakthrough to Energy Disperse Stage to stave off the current problems

And each person has different ways to obtains Laws. Some absorb the energy of the world and refines it. Others who had more peculiar abilities could even steal it from the Heavens and the Universe.

Azief himself had stolen some essence from the Heavens and he bets there are others that have such abilities.

Others could also have the ability to imitate it and also could break through to Essence Creation.

There are thousands of way to obtains Laws and there are thousands of path that one could walk on.

#### [Chapter 592: Merging \(4\)](#)

Even Azief not all Laws that he had was refined by himself. Azul was the major contributor of the energy in his body that he managed to turns into Laws.

Instead of saying he is the major contributor, it is an act of helping as Azul brings out the essence in the Ten Eternal Ring and give it to him so he could form his Disk and consequently his Law Bodies

However, they are grades of people who broken through to Divine Comprehension. Yes, anyone who obtained three laws could charge through to Essence Creation

But how could a Divine Comprehension levelers who only have three laws could fight those with six or nine Laws?

There is still a big difference between each one, like comparing the Heaven and Earth as that was how high the difference of power between each grade of Divine Comprehension.

Since he had walked the perfection Path that is why the requirement for him was so perverse. If its anyone else, they might have changed into a different way of cultivating instead toiling and persistently walking this same path, without any confirmation that it would world

Azief had to find thirteen energies and turn it into Disk and only then he could convert the energy into laws.

Divine Comprehension could be divided into three realms. It is the Earthly Realm. The Worldly Realm. And the Heavenly Realm.

And each realm had its own requirement to fulfil

By comprehending three Laws, that means you are a Divine Comprehension leveler in the Earthly Realm.

The Laws that a Divine Comprehension at the Earthly Realm could control is only the three Laws they had comprehended when they breakthrough.

Since these Laws might not be their own true path, they probably could not use the Laws effectively and there is a slight chance that their weak grasp on Laws would force them to breakthrough early to Essence Creation thus making their foundation unstable

Then there is the Worldly Realm.

For one to be considered as a Divine Comprehension leveler in the Worldly Realm, that person must comprehend six or more Laws or have Six Disk when breaking through to Divine Comprehension

Six Disk alone is very powerful and Six Laws could make someone an overlord in many planets in the Vast Universe

The people in this category have more powerful energy than the one in the Earthly realm and the Laws they could manipulate is more varied.

A Divine Comprehension leveler at this level could even affect other Laws if they understand the core of their Laws and in some cases evolve their own laws to become closer to the source of its origin

One could even cultivate a useless Law but if one had a deep understanding of their own Laws they could reach the Source of that Law and evolve their own Law by their own comprehension.

In battle or the exchange of pointer, one might have the same law but the nature would always be different depending on the user Path.

Azief saw this with his many other understanding of certain concepts. Time concepts when it is activated by him is different when it is activated by Time Master Jean.

He saw how Jena fought off Weronians with his Time Concepts and it was vastly different than the way he uses it.

Of all the great people in the world that Azief had interacted, he had interacted the least with Time master Jean.

Even when they were pooling their powers together to free Europe from the Weronians Invasion, he did not talk too much with Jean. It is not because he hated him or something.

And Jean himself look amiable. It is just that they did not have any common topic. He was actually very interested in Jean and his Path that seems to focused on the Laws of Time

He then thought back of the Laws he had gained.

Azief luckily had many of the source of power of these Laws. He had never been lucky before. Ironically, after the world fall into chaos, that is when his luck kicks up.

And the more he experiences his life, he became even more suspicious of this luck. The more he understands, about Destiny and Fate, about Karma and the principle of debts and repaying things, the more he thinks about the matter of luck.

The luck...it is piling up on him. Luck and fortune keep piling for him. And that did not make him happy. It made him wary.

He sighed as he thinks about the Divine Comprehension level. He knows that having six laws is not a guarantee one could win against a Divine Comprehension leveler in the Earthly realm

What is important is always the energy and the utilization of Laws when in battle. If you have six laws but do not know how to utilize it, what use would it be?

And then there is the ultimate form of a Divine Comprehension levelers. Those that in the Heavenly Realm.

And what is the requirement to enter this category? One had to comprehend Nine Laws. Nine Laws. That would take many years even if one just wanted to understand one law.

For the perceptive one a law could take up to half a year or one year in total. For those who are slow, it might take them a little more time.

That is why he himself did not think he could breakthrough to Essence Creation after just a couple of years.

He had thought about it when he was still in Disk Formation. Of course at that time he still did not know the miraculous powers that the Supreme Stairway posses

If not for his luck of having the Six Sabers and his success in helping Azul, all of these luck and fortune would not come his way.

Those that could comprehend nine laws and master it would surely be no different than God and while Azief don't think that they could compare to Supreme Beings, it is not that far from that level of power

To people of Earth, such person that reached such level of power probably had not match on Earth.

To control Nine Laws means to have all kinds of forces of the heaven and Earth, the Universe and beyond at the tips of one finger

The variety of ability such person could use in a battle is endless.

But how about Azief then? He had cultivated thirteen Laws. And it is not the same like those people who were cultivating their energies into Laws.

With the help of these magical stairway called Supreme Stairway, Azief not only converted his Disk into laws, the Supreme Stairway as acknowledgement of his Perfection path, convert those Laws into law Bodies.

In other words, he did not have to sit and trying to master the laws that he had obtained.

Instead the Supremacy Stairway would help the Laws Bodies into understanding the Laws, thus skipping one of the important matter of Divine Comprehension which is understanding the Laws

And Azief just had to reap the benefits.

It is like having his clone studying for him and when the clone dissipated and merge back with him, all of the clone knowledge enter into his mind.

He had waited five years. Even then Azief think that it is still too short of a time. Other people would have to spend years to comprehend that many laws but he only took five years.

Was it really his hard work that lead him to this moment? Or is it luck? Maybe it is a combination of both. But for some reason, he always felt suffocated with the luck he got about the Thirteenth Steps.

He always felt vague about it. The more he thinks about it, the more he felt unease it is. Are there such things that only gives but not ask?

Azief is only afraid that he had been involved in something he shouldn't. Then Azief put it back in his mind.

'Whatever happens, happens. I already got this far' Then he saw it in the distance. this content of novelfullbook.com, if you reading this content please go to website novelfullbook.com to continue reading, fastest update hourly

He saw the Thirteen steps, not far away from him as he slowly slow down his flying.

'This is incredible' he thought

Though, this time he was shocked to see there is no longer any statue on the stairways.

The stairways itself look like it has been beaten up. There is cracks in every steps. Each steps are like a realm unto itself, vast and boundless, stretching out like it has no end

If not for the fact that Azief could see through it through the eyes of the Law Bodies, even he would think that there is no end to the steps

But that is not the only thing that made him shocked. There is a change in the Supremacy Stairway and that change relates to his Law Bodies.

As he come closer to the Supremacy Stairway, he was greeted by an unbelievable sight.

He saw thirteen beings who were standing tall and straight, surrounded by the Laws of which they were created from, their powers seem limitless and boundless.

Each one of them could be considered an overlord. It is like having thirteen Disk Formation levelers with each one in Perfection of their powers

And they are all staring at him emotionlessly.

And all of these thirteen being have his face and each one of them have different temperament than him.

The only difference was that he has emotions and these Law Bodies did not

They are like a higher level form of existence than the clone yet at the same time, they are not. They are like the extension of part of him but without his emotions

And what is more disconcerting about them is that how titanic they all are. They easily would pierce the skies if they are on Earth.

Some of them were so tall and big that Azief could see just until its knees. And its feet are larger than a continent on Earth

But for some reason he is not afraid. Since all thirteen of this being is him. They were calling him and he has returned

Now, it is time for him to breakthrough.

He smiles and floated to the first step and it begins

#### [Chapter 593: Tying karma \(1\)](#)

He stepped on the first step of the Supremacy Stairway. This time there is no longer nay pressure around him forcing him to come down. He felt at ease and at the same time feels that the thirteen steps have acknowledged him

The moment his feet touched the first steps, he could see planets that have been nurtured by the power of the law bodies that stands on top of the Stairway.

He sees it from the eyes of his first Law Body.

He could feel it. It is a hard feeling to describe. It is abstract and the concept that flashed inside his mind is abstruse and complicated and as his left foot steps into the stairway a change had happened.

The first Law Body that Azief formed is none other than the Worldly Law Body. And in the first step, there is that gigantic Law Body staring at him.

But Azief could not find any hostility. The width of that first steps has transformed. Now the first steps were as wide as the circumference of a hundred Earth and standing there in the middle of that was his Worldly Law Body

His eyes are as big as the moon and something else shocked him. Inside the gaze of the eye of his Law body is sword moves. Azief could recognize it easily

'Ah' he said and then he smirks. Now he understands. His Law Bodies merged his comprehension of the sword arts in the Sealed World with their understanding of Laws.

And Azief could feel the energy of the world flowing around him. The Worldly Law Body formed from the worldly energy. It is formed from the energies that existed on Earth. With this Law in his grasp, there is no Law on Earth that could suppress him.

This is what it means to steps into Divine Comprehension. To become a true powerhouse in the galaxy. this content of novelfullbook.com, if you reading this content please go to website novelfullbook.com to continue reading, fastest update hourly

To controls Laws and to be Divine. To be a God!

Azief smiles and then he comes closer to the Worldly Law Body. The distance between them is the distance of Heaven and Earth.

But the moment Azief wished to come near his World Law Body, the step responded to his wish and just by thinking it he is already in front of his Worldly Law Body

'Return to me' he said calmly and the moment he said this, the large Worldly Law Body exploded into motes of light and charged toward him. Azief opens his hand wide as he embraces that motes of light

In just a few seconds all of those motes of light was absorbed into him and he closed his eyes. Then he opens back his eyes

Then his energy surges up and he could feel his entire body rejuvenated. His eyes are so sharp that just by looking, he could cut stars and planets.

The light in his eyes was suffused by a sword will that is grand and could enlighten any mortal with superior form of swordsmanship

And this swordsmanship that one would comprehend is not the kind of swordsmanship that requires a sword. It is the will of the sword. The Will is important...not the sword itself. This is the hidden understanding in that gaze.

There is will of sword in his eyes. This is no different than when he kills those people without a sword.

Only this time he would use the Will of the World to cut them.

On Earth, unless Azief opponent is also in the Divine Comprehension level and comprehend Worldly Law, that person could not even contend against him.

He felt that if he waved his finger right now it could cut the stars around him and bring down the collapse of a planetary system.

He could feel that the system in his body, the interface system is cracking down. He does not know how to explain it but he could just feel it.

A lot of understanding enter his mind. All kinds of worldly laws revealed itself to him as he absorbs it.

It was like he is in his mind for thousands of years understanding each and every one of the Laws that is contained inside every world that spreads itself all over the vast universe

These only happens for a brief moment.

But for Azief it was like he was the one that was standing on the Thirteen Steps of the Supremacy Stairway, understanding and comprehending the Laws for hundreds and even thousands of years.

He felt like this knowledge does not belong to him but someone else. Then all the phenomenon in the first step dissipated and he stand there alone, straight and unbending

He then thinks about something eels as he tries to recover back his mind. His thought immediately went to his status window.

He did try to check his status window but it was to blurry for him to make the words before.

He knows for a long time that the status window is only a guide and indication of how strong a person is.

When someone power reaches a certain level, the status window could no longer make an accurate judgment of the level.

Azief too had understand a bit about this system that were meant to guide humans to quickly become stronger

One way to break away from the system is to become stronger than it.

And that is one way.

The other way if you find a path that the system couldn't quantified or evaluates, a path that goes against its purpose or a path that suppresses the system

And maybe there are other ways to break away from it that Azief still didn't know.

Azief had long known that many of the arts and magical abilities that appeared in Earth, the abilities and all of other tools the World Orb give humanity is derived from many alien's civilizations.

So he was not surprised when he heard mythical monster appearing on Earth and people with mythological weapon showing of their weapons.

Even the system that they used is the same.

Before when he tries to check his status, the window status become blurred. Now he could feel it breaking bit by bit.

Azief is slowly becoming unpredictable and unquantifiable from the perspective of the status window of the system.

Even the system itself is a restraint that would halted many people from pursuing their path.

If you strayed from the path that the system had laid out for you and find your own answer, even if that answer led back to the system, it is still one own true path

It is those who find their Grand Path that will break through the restraint of the system.

The World Orb help humanity raises itself up in just one generation. But it also took a strain into the energy it had to provide to Earth

It is the World Orb that supported humanity but Azief also confirms many of his suspicion. There was that Fake World and the fragments of the World Orb.

Then there is the Will of Heaven who he fought against.

There is a reason why he did not stop running forward. Because he knows whoever become the first to break the limit, break the wall that is the system, he would be a true God like those Supreme Being.

And that person will be the one that dictates everything in Heaven and Earth.

And only one will sit in that Divine Throne.

Azief of course did not know this but Loki knows the future. He knows that even in that other timeline, where all is stacked against him, Azief was still the First Sovereign, the first one to break the wall of the system becoming level 100 and breaking the system.

He had also set up the Prohibition of Sovereign and decree Divine Laws and rule the world in a prosperous age.

He also was the one that gives permission to Raymond to attempt in becoming Sovereign.

Not only that, he also abdicates his position and let Raymond sit in the Divine Throne until the next selection for Sovereign.

No one understands why but only Sovereign understand why they yielded the throne.

Raymond also yielded his Divine throne to Oreki and Oreki to Hikigaya and so on and so forth. If there is one person that did not have the opportunity to sit in that Divine Throne, it is Loki the trickster.

Azief also dictated the few others Sovereign ascension after that though he remains in the background, like a dark hand guiding the era, like the matter between Jean and Katarina which eventually lead to Jean beloved Paulette death.

And the death of Paulette would one day trigger the War of the Sovereigns which he did not participated in until the death of Katarina the Snow Goddess.

In other words, Azief thoughts was not wrong. Whoever become the first one to break that system would then determine the course of humanity for eons to come.

And Azief preferred that person to be him.

#### [Chapter 594: Tying karma \(2\)](#)

If any of his enemies become that powerful existence and decided to suppress everyone then he would become the first target.

Since he had long entrenched himself into the spotlight, he had no other choice.

Those below him could choose another person to serve, but he had only one way...to become stronger or die, becoming just another stepping stone for another to establish his name

Azief had always think about this. When he reads fantasy novels that spoke of cultivation world or a world full magical abilities he wonders this one thing.

Why would a powerful cultivator would not kill the enemy of his family when he is strong but waited until the main protagonist to become strong and then killed them?

Why wait and become complacent and arrogant? And why would the strongest of them always waited until the enemies become strong enough and then show themselves?

The world was never like that. It is unfair and it is ruled by the strong. It has always been this way from the beginning of life in Earth and it will be so until the end of the world

Those who think differently has never seen true power and has never been exposed to the real truth of the world.

Since such person was never helpless he did not know and care about it. But when he is struck by real power, then he would know.

That all civility, all kinds of things that they thought could prevent others from harming them is nothing in front of true power.

One could pen an essay of ten million words long and still not be able to fight against a simple slice of a sword

In the real world, such thing would never happen. If the real world has such cultivation power, the strong would always oppress the weak and no shred of enemies would be released.

If one is level four and one is level two and fail to kill level two because of some matter, they would not be so stupid to leave that level two person to roam around the world and become stronger.

Now that he is level four he needs to kills the level two person before he could grow even stronger and kill him.

Those who did not even understand this simple logic would sooner or later be dead.

The only other reason to let them live is either they are useful to you or you know that they would never surpassed you.

The battle of level four and level two is negligible but what about people with level approaching the 90 plus mark?

The same would apply and was even more important.

Their powers and levels would have reached astounding levels and such enemies if you are no confident in fighting them in the future and it is not contrary to one own grand path, it is better to kill such a person than letting them live and having an opportunity to kill you

The past history of Earth had proven itself. Do not let your enemy to have a chance to strike you

If you have lifted the sword, then don't hesitate to swing it down

Now, on Earth, there are people who could move mountain, parted the seas, bring on thunders and could hear through the whispers of the wind.

How could anyone hide from such power?

If the first person that break the wall of the system is anyone else other than him, what is to say that the person who break that wall would not harm him or his beloved people?

Who could guarantee that to him?

He had learned might makes right.

Even before the fall, it might seem the world was civilized and people settle thing with words and diplomacy but that is the most erroneous opinion

Those who sits in the UN before the Fall, the five power that could veto other people decisions and determination, aren't they the most powerful governments in the world?

The most corrupt and the most debased government could sit in that table and argue about humanity and all those high sounding ideas but the truth was, if they did not possess powers and influence that they had, they will not be allowed to sit in that table.

Whether that be nuclear power, or economic powers, it is the same. It is something people fear, something people needed and that is power.

Azief saw it clear when he met Azul. If he reached the level that Azul had reached, who would he be afraid of in this Vast Universe?

But this is all predicated in the assumption that he would be the first one to break that wall. He must be the one that be the first.

Only then he could be at ease. He did not see himself as a kind person. But he also knows he is not that cruel of a person.

And while he could confirm his heart, he could not confirm others.

Even if it is his subordinate that broke that wall first he could not trust them to treat him like their leader if they were the one that reached first to break that wall.

He even would have sabotaged them

That is because the surrounding would become different and as such the heart would also change

He could only be at ease if it was him. That is why he keep running forward. And now, he had reached the point where if he returned to Earth, no one could be his match

Then his mind wanders to a certain name: Void. That is another problem

He sighed as he shakes that thought off his mind.

Azief then closed his eyes back and took a deep breath.

His body is now filled up with energy and instead of feeling that he would explode with so much energy, it was like his body right now is a bottomless abyss that want to have more energies

He took the next step and the moment he took that next step, to Azief shocks, the Stairway that have stood the test of time, surviving epochs after epochs, eon after eon, crumbles into dust

Azief did not realize or even recognize it but as that step crumbles, a thread latch itself onto his body.

This thread seems to come from nothingness but there is a trace of time around the Thread. And not only that.

It also possesses a certain archaic aura around it, like it comes from such a distant past that it could not be determined at what epochs it come from

This is Principle of Karma but it is not just a simple Principle of Karma. It is an ancient form of it, pure and ancient

If this was any normal user of Karma, he would have realized it. But the thread is very thin and not only was it thin, it is masked by the energies coming out from the Law Bodies.

When one said thin, it did not mean the thread itself. It means the thinness of such energy that no one could see it.

This is a plan that have been concocted in the beginning of Time, during the First Rebellion of Ethernal.

Azief was shocked at the crumbling of the step and he did not understand why such a powerful and magical steps would crumble after he passes it and took his law Body

he did not understand. Was that supposed to happens or was that not what supposed to happen? But the Law Body that is now merging with him have nothing wrong with it this content of [novelfullbook.com](http://novelfullbook.com), if you reading this content please go to website [novelfullbook.com](http://novelfullbook.com) to continue reading, fastest update hourly

He doesn't know why but it doesn't seem to harm him in any way so he moves forward to his second law body.

And maybe this is the ritual. Each time a Supreme Being reached the Supremacy Stairway and claim their Law Bodies, the steps would break off and then reformed back.

Azief did not know that this is not supposed to happen. But some Beings in the Omniverse knows.

All over the Omniverse, the moment Azief step up on that Stairway, to claim his Thirteen Law Bodies, a lot of Supreme Being was watching this event with full concertation

They stirred and some open their eyes and gazed upon that Stairway

Azul just close his eyes as he will not interfere this time. He also has his own Divination powers but because the Omniverse belong to that Supreme One, his divination was obstructed but he did not pay it any mind.

Wargod who is now hiding in some other dimension also look toward that direction, his eyes pierces through layers of dimension and galaxies to see the events that is about to unfold.

He also has a thread that connected him to the Omniverse.

Instead of saying it connected it to Omniverse, it connected him to the most mysterious and divine concepts in existence, Fate and Destiny.

‘Tying Karma’ he said and he laughed.

Interium then once again shrouded itself in darkness.

#### [Chapter 595: Threads that connected them \(1\)](#)

He is not the only one looking at this scene. The Jade Emperor which is the closest Supreme Being to the Supreme Dimension look at the crumbling first steps and the moment he saw the scene, he laughed like he understands something

It was like something that cover his eyes all this time was removed

‘It was truly thirteen. Only thirteen. There is no fourteen. So, this is how it is!’ he said the same words that Azul, Wargod and Loki said before. this content of novelfullbook.com, if you reading this content please go to website novelfullbook.com to continue reading, fastest update hourly

Because now he understands something, and his mind think of the Wargod in Interium and the Monkey in that mountain filled with louds accompanying that empty robe.

‘You all knew. I am the only one that is ignorant!’ then he thinks of Zeus and a few others and he laughed again

‘It seems I am not the only that is ignorant! HAHAA!’ The more he understands the more he wanted to laugh yet at the same time he also cried.

Because now he knew why that Supreme Stairway existed. And he does not know whether it is curse or a blessing.

Now that he understands, he knows that matter sin the Omniverse will not be so simple. A storm is brewing

That ancient race planned all of this eons ago....and while his race did not meet that ancient race, they know all about it.

Each of its artifacts could bring untold catastrophes or fortune.

‘It seems I have to make more preparations’ he said as he averts his gaze from the Stairway.

Wargod is the one most invested in this matter and while Interium is hidden, his gaze did not avert from the stairway, ready for any interference

There is only one person that would interfere in this matter and that would be Great Supremacy Azul of the Vast Universe.

Though his title would probably have to change now since he is no longer a Supreme Being and surpassed that level.

Supreme One of the Vast Omniverse. He heard that how the Elder of Universe referred to Azul now

The moment that Azul tries to interfere, he would not mind being destroyed in body and soul and throws all of his plan to ensure that this matter concluded as it should

Azief of course did not know how many eyes are looking at him right now.

Even if he does know, he wouldn't have cared since right now he is claiming his own Laws back into his body

He did not say much this time or look at it that much when he is one the second step.

He just opens his arms and the second Law Body like the first Law Body exploded into motes of light and surge into his body

The Second Law he had formed on the Thirteen Steps is the Universal Law, controlling the Universal energies, changing stars moon and sun and the elemental forces that is present in the Universe.

If it any other person, the control of such law deepened on one comprehension.

But Azief short circuited it by walking the Perfection path and have such help from the Supremacy Stairway.

Azief suddenly comprehended an unpagged of his sword skill the moment he absorbed his second Law Body.

Like the first Law Body the second Law Body also comprehended sword essence and sword skills.

His sword will and sword light become shaper if it's even possible. His sword will and sword light is now imbued with the properties of the Universal energies.

If he uses the sword right now, his sword strikes would possess the true heat of stars and sun.

When he chopped down, the weight of his strike would collapse planet lie they were being attacked by the Universe.

The sharpness of his sword light could split atoms into nothingness

Azief felt more power surged into his body, as a cataclysmic aura surrounded and swirls around him as he is the reckoning of all life.

As he wills it, the Universe would stir and world could either be salvage or destroyed. One slash of a sword and he could have brought down an entire Universe.

He now has two laws in his body and his energy is surging higher and higher that it affects the many principle and concepts of Laws around him.

He only need One more law for him to reach the level of Divine Comprehension Earthly Realm.

The moment he absorbs the first law, his level shot past the level 79 mark it did not stop at 80 but instead it shot through to reach level 89 almost immediately.

He checks the level box and while the other information and status about him is still blurry at least some of them are not that badly blurred and one of that is his level box in his status window

The system judged the thirteen Laws as the ultimate limits of Divine Comprehension level. Azief smiles and he almost wanted to laugh because how happy he was.

It felt like he is metamorphosing even more. He did not grudge the years he had to spend in the Sealed World at all right now.

Even though he did not absorb all thirteen laws yet, the system had judged the thirteen laws is already present and that he had acquired it.

The system also shows that the numbers on the level box of the status window fluctuates. Sometimes it shows level 82 sometimes it shows level 89.

This maybe because he is not fully integrating itself with the law Bodies yet so it could not make accurate judgment.

The only thing left yet to do is to comprehend them and for most that is the hard part. But even that Azief did not have to do since the Supremacy Stairway had done it for him

All he needs to do now is absorb them and rises through the levels.

One step and he could essentially reach Essence Creation. That is how lucky he is right now.

Azief even in his current condition is still thinking heavily right now

There is still no information about Essence Creation entering his mind right now and he knows he needs to absorb all thirteen Laws and compete this level first before the information would arrive in his head.

‘The World Orb is really a mysterious source of power’

Azief did not hesitate this time. As soon as he could calm himself down he jump into the third step

The moment he did that, the second steps, just like the first step exploded and another thread of string latched itself onto Azief. Azief did not notice this just like before.

And he could not see the accumulation of destinies and fates converging around him. It is slow and subtle, but it is slowly coming closer and closer and these illusory concepts of destiny and fate swirls around the thread.

#### [Chapter 596: Threads that connected them \(2\)](#)

On the third steps is the Runic Law Body. Azief smiles as he arrived at the third steps. The last time when he was walking these steps powerful pressure bearing down on him.

But now, as he walks it there is only a feeling of peace, like he was strolling around his backyard.

But that is not why he is smiling. It is because he felt grateful to the one who gives him the opportunity to form this Disk.

He himself never truly went to the Eight Realms of Asgard. What he knew about Asgard is relatively simple and relatively unimportant facts and trivial knowledge

He knows that it is not quite like what he had imagined.

The stories of Norse mythology he once heard or read are nothing like the real Asgard. Some of the events in the Prose Edda did happen but it did not happen exactly like the story tellers said it happens.

And it is not The Nine Realms but Eight realms. For some reason, Asgard did not claim Midgard, or Earth as one of its dominion, like there is a prohibition against it or something

Azief knew he did not know many things in the Universe yet. He knew there are still many mysteries that still not uncovered and hidden

But he heard whispers.

Of Elder of the Universe.

Of Wargod and his broken star Interium. Of Merchants of War, the Sarens, the marauding space pirates the V'likrarian and many others

The runic energy is the energy from Alsurt and it is one debt he would never forget. Even after years had passed and he had change his surrounding, he did not forget that wise Old Jotun, trapped in a prison of stars chaining him

The moment he steps on the third steps, the atmosphere and the surrounding around him changed.

It was like he was stepping into another world

If the second steps are full of Universal energy dancing around the Universal Law Body, on the third steps, countless runes could be seen floating all around the steps and they danced like they are soap bubbles swaying wherever the wind blows them, each one of these runes seems to contain the true meaning of thing and truths

He walked forward and he is tempted to check his eternal ring. One of his ring is called Ring of Runic Creation.

Azief even until now wonder what kind of person that once wore these rings. He did not forget the look Azul gave him when he saw the ring on his finger.

The Ring of Runic Creation is a magical and wondrous ring that could create magical runes.

Azief was lucky that there are no powerful beings that notice that ring. Azul at that time notice the ring but he didn't need the ring and not to mention it seems the ring belong to his friend.

Each time there is some new runes he could use from the ring, he would find a tattooist, a class of people who could imbue images into one skin and increase one strength.

But for him, he always imbues the runes that he had inside his skin.

Fortunately, the effect is permanent and no matter how terrible his body was destroyed, the runic tattoo that he had embedded inside his skin, would always formed back

He had a lot of runes. There is Eolh the Rune of Protection.

Other than that he had the Aesir rune. It is the rune of knowledge, wisdom, and communication. it is also the rune of prophecy and revelation.

It is why he sometime have premonition of something. It's like it gave him a divine sense that is quite different than a Divine Sense that scans enemies and friend.

It is a Divine Sense regarding one fates and destinies.

He had Beorc. The rune of Rebirth and fertility. Runes of Daerg. The runes of a new dawn. this content of novelfullbook.com, if you reading this content please go to website novelfullbook.com to continue reading, fastest update hourly

Uhur the rune of will. Raidho the rune of speed. Kanaan, the rune of mortality and pain.

Haglaz, the rune of chaos. Aergliso the rune means be destroyed. He could even combined runes to create more powerful runes that could be inscribed, on weapons and clothing.

The suit that he gave Sina was carved chock full of it. Sina out of the four I the weakest which is why she was the most protected in Pandemonium.

He sighed as he thinks of all this. Runes are the one thing he is not proficient at. If not for the fact that he had the Eternal rings he would not even be able to use runes and uses it to strengthen himself

Is his luck good or is his luck bad? He thought to himself. He saw the distance between him and his Runic Law Body and he just smiles.

He thought of it and then he arrived only a few steps from his Runic Law Body

Azief just like before come in front of the Runic Law Body gigantic body. On its body, all over from the top of his head to the bottom of his feet, the skin was carved with runes.

Each rune that is carved into the body seems to interconnect with each other, none of them directly counteracted each other, creating a synergy of energy that seems to be enable for all these different Law Body to harmonize with the other law Body.

However, as Azief come closer to the body, he notices something.

And his eyes widened

All of that runic carving he saw carved into the body seems different when he comes closer. It is like an optic illusion.

He takes a step back and he saw the carving but when he takes a step forward closer, he saw only one rune carved on his chest. It is a rune shaped straight like a sword

Unbending, unyielding and eternal. Azief don't know why he thinks like that but that was the feeling he felt when he saw that rune

And he could sense the extraordinary power that rune seems to possess. Like the Law body before him, the Runic Law Body also infuse the comprehension of the sword into that one single rune.

It was like the accumulation of comprehension of all the sword arts in the Universe is contained inside that one simple rune.

What is rune? He thought as he come just in front of the feet of his Runic Law Body

Is it just words? Ancient words that contains magical properties?

Or is it a way to store information?

A way to transmit information?

Or to relay thing that could not be expressed by simple words, to relay and give information that seems to be lacking vocabulary in languages to express some things and concepts that surpass the limitation of words and languages?

'If these runes were embedded in a weapon it could become a divine armament, if it is embedded in an essence of energy like a Law Body it enables the Law Body to turn into a weapon.' He said and then he understands why he understand these words and why he suddenly gets this knowledge out of nowhere

Because the Law body will become one with him later.

The closer he came to the Law Body, the deeper the understanding.

The reasons why he did not see the rune shaped straight like a sword before, is because he is far.

The closer he came, the deeper the understanding he had of runes so when he come closer he could see beyond the superficial essence of the Runic Law Body.

He smiles and then embraces it. There is no longer an explosion this time.

This time the Runic Law body take a step forward and turns into motes of light that flew calmly and gently and enter Azief body.

It was like a spring breeze that blows around him

Azief now understand. The stronger he became, and the more he understands the laws, the easier it is to absorb them

Understanding flashes inside his mind about runes and he smiles as he did not linger around and take the next step to the forth steps

The third steps crumbles almost immediately the moment he takes that step and another string latched itself onto him.

Three strings had latched itself onto Azief body, a thread of Karma and there are three steps that have been ruined, something that have never happened since the beginning of time.

Azief enter the Divine Compression level, Earthly realm. His power surges like never before.

It is not something he could simply explain with words.

[Chapter 597: Threads that connected them \(3\)](#)

The closest he could express the feeling that he is experiencing is that he felt rejuvenated, refreshed and energized all at the same time.

Azief took a deep breath as all kinds of information about Runes and the Rune making enters his mind. He closes his eyes as he focuses and a moment later he opens his eyes.

The moment he opens his eyes, all the floating runes on top of the third steps all surged into him and Azief lifted his finger as he wrote something up in the air.

He wrote Life. And then he wrote Death. He wrote it using is language but because of the understanding of the Law Body it turns into runes.

And these runes trigger some kind of energy outside the Sealed Dimension.

It is a very ancient energy. It is the source from where all Runes originated. The Source of Runes come from the Ethernal of Words, Xerergan

Like a beast that is awakened from its sleeps, that energy seeks its master. Azief of course did not know this because he is in the Sealed Dimension.

Then he waved his hand and the runes fly out from his hand. It looks like it travels slow but it moves in light speed velocity.

In just a few moments, it arrived at its target. Azief is trying to test whether he truly understand what his Law Body understand.

The two runes have two different target.

There are two planets that he saw and the Life rune went into a barren planets and the Death rune travel to a planet that seems to have formed seas and clouds.

The moment the rune of Life enters that barren world, a world that is devoid of life, a powerful Laws that disrupt the natural orders erupted inside that world.

To Azief shock, the barren world seizes the fortunes of the Universe.

And it transformed that world as the runes fused into each and every part of that world, gestating a life force

Grass suddenly sprouted, trees erupted from the soils as it reached the clouds, clouds were formed and rains fall down, filling the barren world with life.

On the other planet, that world that seems it will contain life a few trillion years later, the moment that death rune enters it, everything seems to wither like they were attacked by Time.

The entire world seems to age by trillions of years in a second and it slowly become barren.

The clouds dissipated into nothingness, the trees rots and withers, the seas dried up and even the sun around it seems to experience death.

Azief was astonished. He then understands how runes work

'So that is how it is. The compression of meaning is one of the ways to utilize runes'

And he laughed as he took the next step to the forth steps no longer doubting the comprehension of his Law Body

The third steps immediately crumble into nothingness and another thread latched itself onto him. this content of novelfullbook.com, if you reading this content please go to website novelfullbook.com to continue reading, fastest update hourly

And another change happened in the Omniverse.

The Destroyer which was sailing the stars at that time suddenly stopped. He was shocked and the Destroyer is rarely shocked.

As the Promised Day for him nears, he had more emotions. It was like the seal that have been weakening his emotion slowly unravels. He now had feelings.

Hate. Desires. Wish. Dreams. These emotions fill his heart and torture him so. Because there is also regrets and heartbreak.

One might never understand why a powerful Being like Destroyer have feelings. They don't. They work. Creator creates. Destroyer destroys.

That is their job since the beginning when they were created.

And while the Creator is allowed to have feelings and emotion to better understand all creations, the Destroyer did not have to.

And since the beginning they never have.

The fate of Destroyer and the Creator is not something one should pity. Because they are only doing their job.

There is evil and good in creating and destroying. For others, such thing has the connotation of evil and good. But not for the Destroyer and the Creator.

And if this is so, why now Destroyer have these feeling? Because there is a secret that only a few Beings in the Omniverse knows

The Creator is human. Or at least he used to be. But not for the First Creator. To understand their history and why they have emotions, it all traced back to the First Rebellion by the Eterna

That is where all of the thing in the Omniverse started.

The Destroyer squinted his gigantic eye and then he tries to see where this thread coming from. But to his shock, he is unable to cut it.

The Destroyer stand still in space, emanating destruction that slowly affected the Universe he is in as everything swirls closer into destruction.

He then tries to find the source of this power and the knowledge shocked him. There is a complicated emotion in his eyes before he decided to continue sailing into the stars.

On Earth prime, someone got up from his sleep. He was inside a cave and he was sleeping then suddenly the man got up from his sleep.

His eyes are black before it regained back its normal colors.

The young man is sweating and the moment he got up he frowned

'This did not happen before. Perfection path? It seems there are other scheming in the dark. Hmm. Is this beneficial or is it harmful to my master?' he thought to himself

This person is a young man. Outside the cave is perpetual snow falling down. This young man is in Russia.

The man is wearing fur clothing that protects him from the cold. At least that is what some people that saw him thought. Even if the world had changed, there are certain things people are accustomed to.

When in hot nations, you wear loosely and when you are in a cold country you wear thick fur clothing.

But Earth had changed and even the weakest person is at Orb Condensing Stage which means their resistance to cold and hot is higher than normal humans.

But the Earth had also changed. As the humans become stronger, Earth also become stronger. The cold increases and so does the heat.

So some people would use fur clothing enchanted by some wizards or being made with special effect imbued in them.

The young man walks slowly to the entrance of the cave. The cave is hanging just below a tall mountain that reaches the sky. It is the tallest mountain in the world.

That title no longer belongs to the Mount Everest. It belongs to the Ice Mountain in Siberia. Katarina surpassed her tribulation and uses her newfound power to create mountain of ice combining it with the earth making a true mountain to materialize from the ground

And the clouds above the mountain pour down perpetual snow all the time.

The young man breathes and the air coming out from his mouth could clearly be seen.

The young man was thinking of the vision he had just seen. There is one-part of his face covered by his long silver hair

When he met people, he introduced himself as Rafah. But he in truth is none other than Yewa Hafar, the last Acolyte of Dark Tidings

He just got words that something had changed and he needs to investigate it.

He did not want to leave this body yet since it would be hard to find another body. Thinking about it again, Yewa Hafar just shakes his head. He could not affect something that is happening in another dimension and a dimension that even his Master couldn't penetrate with his eyes.

He had to think of other ways.

'So, it seems Death Monarch will return. I must make more preparations.' he muttered as he closes his eyes and let the cold wind assaulted his body

#### [Chapter 598: Those who wanted to seek, those who wanted to hide \(1\)](#)

Azief on that dimension stepped onto the fourth steps even as the information of the Runic Law Body is slowly being acclimatized in his mind.

The fourth steps are the Celestial Law Body. Even before he steps onto the step, Azief could feel the celestial airs leaking into the other steps.

Though, the trace of such energy is minuscule, Azief could always senses it.

The moment he steps into the forth steps, it was like he was in a paradise of immortal with thick celestial energy all around him.

There is also a red aura that tries to invade the steps but always being pushed back golden white light filled with thick immortal energy.

Azief saw none of the statues and from the eyes of the Law Body he saw ho the statues exploded after his Law Body all absorbed the energy inside the statue.

He knows that the statue on the fourth steps is none other than the statue of Odin.

Azief did not look around since even if he does not look around, he could still see the Celestial Law Body.

Standing tall over the stars and space dust, its cold eye staring at him, each fingertips the size of mountains, Azief did not need to look left and right top see where his Celestial Law Body is.

Celestial energy swirls around him the moment he come closer to the gigantic Law Body.

The Law Body now stares at him but form the memories of the other Law Bodies, before all thirteen Law Bodies reached completion, the Celestial Law Body locked eyes with the Law Body in the sixth steps, the Law Body of Asura. this content of novelfullbook.com, if you reading this content please go to website novelfullbook.com to continue reading, fastest update hourly

Azief himself could not hold the excitement in his heart right now. It still need shim to absorb the fourth Law Body before he could confirm his thought but he doesn't think that he is wrong.

Changing into Celestial and Asura with a thought! That is what he thinks. He himself knows how contradictory the power and energy of the two.

They are many ways to claim the power of Celestial and powers of the demonic but they are rarely practiced together.

Even when he was in Seed Formation, he felt the repulsive force that counteract each other between the Celestial Energy and the demonic energy.

If not for his Defiant heart, his demonic energy would have long ago been diminished by the more potent celestial energy.

Or it might even happen the other way, with the demonic energy seizing the power of the celestial energy.

Azief took a step and then the gigantic Law Body slowly disintegrated, as the motes of light is like butterflies of fires, slowly flapping its wing and enter into Azief body, like his body was not solid and actually translucent.

Azief did not open his hand wide like before as he lets these butterflies pass into him and he calmly accepted it.

The moment the energy enters his body Azief close his eyes as all kind of enlightening truth of Celestial energy enter his mind and he could feel his aura grows stronger.

When he opens his eyes, his body is swirling with celestial energy, looking like a Celestial Emperor looking down over all life.

He broke through the Earthly Realm of the Divine Comprehension leveler and now is reaching the Worldly Realm of the Divine Comprehension level.

Azief took his steps to the fifth steps and the fourth steps crumbles and the thread once again latched itself onto his body.

The Destroyer that is still sailing all over the stars and the darkness of space also realizes it but he no longer cares about it.

The connection had been formed.

On the fifth steps, Azief no longer look back or cares whether the stairway crumbles or not.

He took a step onto the fifth step ignoring the crumbling of the fourth step.

The fifth step has the All Source Law Body. The moment he steps into the fifth steps he felt all the source of energy that encompassed all universe was unleashed upon him

But it was not in a threatening manner or dangerous. Instead the energies welcomed him gently.

Azief smiles as he felt atoms dancing on top of his fingernails, felt the movement of particles all around him, like the feeling of wind passing him through sensing all kinds of energy that flows all over the worlds and Universes.

The source of that energy soothes out his mind as the comprehension of the Laws of the Celestial quickened in his head.

Then as he looks forward he saw the All Source Law Boy. Each time he steps into a new step to claim his law body he is always surprised of how gigantic they are, and how unaffected he is.

Because no matter how big they are, no matter how small he is in front of his law Body, one thing that did not change was that, they have to come back into him.

The bigger they are the better. The more powerful they are the better. Because in the end, they are him, and he is them.

But for one brief moment, as he looks at the All Source body, there is a feeling of fear and awe mixed at the same time. He erases that feeling in the span of time one blinks an eye.

Of all the energy he has during his Disk Formation, none is more important than the All Source energy.

He even had the time to reminisce about how he got the All Source Disk.

It was at Earth Thirty-Nine where he got a hold of the All Source energy. That world look so similar like earth but also have it differences.

Some key parts of history that happens there is slightly different than the history on his own Earth. What differentiated it from other parallel dimension was that it possesses a fragment of All Source.

He uses his clone as bait and finally got it and incorporated it in his Disk.

the reason why it was so important is one other than because All Source Disk enables him to convert any kind of energy he had to other types of energy.

It is a synthesizer for energy. If it's not for the All Source Disk, half of the Disk he possesses could not be used when fighting someone

Azief All Source Law Body have grown larger than the last time he saw it when he arduously climbing the steps.

His Law Body is no longer just a hundred feet high but now thousands of feet high, as the Space around him seems to contains all kinds of energies of the Universe

the Void that breaks down because of the pressure of the Law Body is filled with many pockets of source of energy that could be found all over the Universe.

There are also some space rips that keep breaking and the reforming back almost instantly. The destruction and the creation of such thing is instantaneous and it happened perpetually.

'Infinite cycle of destruction and creation' He muttered and he smiles.

Because of how the Law Body affected the space and time around him, one would have the illusion that the entire universe behind that Law Body is created and destroyed at the same time

Azief saw how the All Source body absorbed the essence of the stars and planets around it, causing the entire Universe of the Supreme Dimension to shake and rumble

And the Law Body refines all that inside its body.

'A Sovereign of all source of energy' Azief had long been tempted about the power that one would receive when making a fragment of power from the All Source into his Disk

It is why he had risked so much to get it.

[Chapter 599: Those who wanted to seek, those who wanted to hide \(2\)](#)

'A Sovereign of all source of energy' Azief had long been tempted about the power that one would receive when making a fragment of power from the All Source into his Disk

It is why he had risked so much to get it.

Of course Azief did not know that is what sealed his fate and also bring his eventual clash with the Destroyer closer

Loki knew but did not stop him. Destroyer seek the Life Formula and the Life Formula is hidden inside the All Source.

Others might not know but Loki knows.

And there is a fragment of All Source energy in Azief body. He knew the cause and effect but he still didn't say anything.

Who knows why? Did he not want to sever the cause and effect? Azief could never understand Loki because he did not yet gain power that Loki once had.

The power of Sovereign. If he had it, he would understand so much more and his limited understanding would become then...unlimited

That connection alone had bonded the Destroyer and Azief in a way that Azief didn't know.

It bonded him and the Destroyer, but it also bonded him and the other energies that is present in all of the Omniverse

And now the Stairway latched threads of Kama and connected him with the Destroyer, now ensuing a double connection of fate between them

Nobody could quite understand the plans of the Ethernas of the past but a few people.

Wargod speculates and he thinks he knows the truth.

Loki had read the Song of the End but that story did not mention walking the Thirteen Steps of the Supremacy Stairway but he could guess some things.

And Azul?

He doesn't care about why and it doesn't matter at all. All he knows that he would lend help when it matters but he will also not interfere more than needed. this content of novelfullbook.com, if you reading this content please go to website novelfullbook.com to continue reading, fastest update hourly

Death comes to all beings. Azul did not protect Azief life because he too knows the eventual fate of his life.

But just because of that doesn't mean he would not render help. He owed him, so he will help. And like Azief had shown him, Fate.... could be changed

Azief did not know all this matter and all he is doing right now is walking closer to his Law Body on the Thirteen Steps

He could feel the abundance of energy all over him, rushing and swirling before entering into his body, tempering his body with energies.

Undying Physique that he possesses also slowly adapt itself and evolving with the surge of energies it received.

Azief could feel it. The cells in his body is changing into a form of energies. No, not a form. But forms.

It is like it dissolving the Undying physique, breaking it down so it could be rebuilt, to become more powerful.

Azief took only one steps and blue energy from the All Source Law Body comes out from the Law Body as the Law Body shrinked and turning into motes of blue lights that swirls and twirls around him

Azief took a deep breath and all of the motes of blue light enter his nose as Azief eyes turns blue and his entire veins turns blue.

A blue light shot up upwards piercing the darkness of space. Wherever it passes its spreads energies and the entire Dimension was affected.

Sound of roaring seems to sound and echoes out of the deepest reaches of the Omniverse, echoes of a scream left eons ago that finally had itself the chance to be heard.

Azief heard the roars but he did not know why he heard the roar.

He speculates that it must have connection with the fact that All Source seems to be connected to the ancient race destruction.

Azief himself knows a few things about Eterna and how they became the source of many energies in the world.

He then regained himself as the power of five Law Bodies thrummed all over inside his body, revolution of powers swirling in each and every part of fiber of his being.

The fifth steps crumbles into nothingness as Karma burdens itself into Azief without him knowing. Slowly tying him with Fate and Destinies of a very ancient race.

He took a deep breath and then took towards the sixth step

Another thread connected him, the Destroyer and Wargod all at the same time. It also connected him with the planet Belthana.

He sighed the moment he enters the sixth step. Another realm different than the other steps appears in front of his eyes.

A powerful demonic aura swept over him and his feet is deep soaked inside the sea of blood. There is a variety of colors in this sea of blood.

There is red blood, purple blood, blue bloods and the faces of people could be seen vaguely if one looked closely at the turbid water of this sea of blood.

There is also a curtain of red aura that surrounded the entire sixth steps like it is separating itself with the other steps

But there is also a bit of trace of Celestial energy from the fourth steps. Azief smiles. This is what he expected and his suspicion is correct.

The Ancient Demonic Law Body could harmonize with his Celestial Law Body. Even in the mist of red, there is a trace of white light flowing freely amidst all of the darkness of killing intent.

This is an Ancient Demonic Aura, a very domineering aura that could bring one to madness if they are inflicted or inside it but Azief was unaffected by it

The mist seems to pierce everything that permits life and it keep spreading desire to defy and kill anything that have life.

It is truly a very terrifying power for a person.

If Azief did not have many other Disk and was consumed by his own energy, he might be a heartless killer and a demon, his features would have change to resembles ancient Asura.

But he has many other things other than the Ancient Demonic Law Body to suppress its killing desire

And since Azul gave him that power, it had no possibility of having a backlash. That is why Azief think of himself as a lucky person

Azief walk forward and the more he walked forward the higher the water became and soon enough, Azief had no more reason to inspect and search his Law Body in the seas of blood

This is the peculiarity of this step, this realm of endless seas of blood.

When he arrived at other steps, just by looking around....no, just by looking ahead, he could see the titanic figures of his Law Bodies.

But when he reaches this step, all he could see is blood. All he could feel is killing intent. There is mist of demonic aura and flowing ceaselessly is the blood of living beings and the faces of people inside the waters.

He did not see his Law Body

'I could not find it like this' But Azief felt the calling. He felt his Defiant heart beating calling upon him to come to the demonic aura

'Another way' he thought to himself.

he wills himself and slowly floats above the rising seas.

Then he saw it and he almost gasped. He always believed that the law he created from the energy he got form Azul would be extraordinary but even he did not expect this sight.

The sixth steps seem to turned into a vast realm of eternal seas of blood in each direction. Since the other steps have been destroyed, if he looked back there is no scenery he could see.

Only the dark and desolate space. But he felt curious so he turns to look behind him. But all he could see was seas of blood.

The blood seas filled the dark space, that it blotted the planets and the stars.

It almost seems like the planet below the steps of the thirteen Steps is drowned underneath the blood sea.

And he could feel the power of this seas

'I know Azul is powerful. Even the energy he gave me is very powerful'

He flies all over this steps and it almost seems like there is no end to this step. But he did not saw his Law Body.

He follows the calling of his heart and not before long he passes a very thick mist and then he stopped, floating over the blood sea

When he saw his Law Body he heaved a sigh of relief

### [Chapter 600: Those who wanted to seek, those who wanted to hide \(3\)](#)

Of all the Law Bodies he had created, this is the most defiant Law Body he had created. It even forces him to do manual work like this.

Azief almost laughed because of how ridiculous this situation is

Though Azief understand why it is so hard. When he created this Law Body he slightly infused the Defiant heart into this Law Body giving the Law Body the desire to defy orders and its nature.

It should submit but it did not. But in the end, this Law Body is him and so resisting is impossible. But that alone shows how powerful the defiant heart that Azul had gifted him.

It is a heart that made him always unwavering in pursuing his Grand Path.

But as he comes closer, he frowned when he saw his Law Body

Like the other Law Body, the Law Body of Ancient Demon is tall. Very tall that Azief find it hard to see the head of his Law Body

If not for the fact that his eyes could see through his Law Body, he might not know what his Law Body is looking at or what expression of his face is.

But that is not what made him frown

What made him frowned was that the killing intent generated by his Law Body is too powerful

If not for the fact that he had cultivated Celestial Law body he would not have the confidence to claim this Law Body of the Ancient Demon

The killing intent that is coming out form the Law Body is not only thick and monstrous, it also distorts everything and slowly shaping up to become a bane to all kinds of life force that is present in the Universe

Azief saw his own face looking down at him. He did not know how cold he looked before but now seeing himself staring at himself, that is truly a novel experience.

Now, he knows why people felt that they feel like they are being intimidated each time he looks at them with a cold face.

The face is not pleasant to look at and that cold eyes seems to implied something bad will happen to you if you keep staring. this content of novelfullbook.com, if you reading this content please go to website novelfullbook.com to continue reading, fastest update hourly

Azief then only took a second before he wills the Ancient Demonic Law Body to merge with him

The will is conveyed and the Ancient Demonic Law Body close its eye and then turns into droplets of blood.

These droplets of bloods numbers in trillions of droplets. They were suspended in the air, floating with souls swirling around it carrying resentment.

Then it rained down on him.

the droplets of blood were absorbed into his body like him and as it falls Azief close his eyes as his mind is being flooded with information and comprehension of the Law.

His aura also changes and his body is experiencing a powerful surge of energy breaking out from him.

It took him a few second before he could calm himself down. Then he slowly opens his eyes. The moment he opens his eyes a killing aura erupted out of him.

It could drive anyone around him to go crazy. A murderous glints shines in his eyes.

He looks upon a planet; as red light shoots out from his eyes. This light is a light that is refined with killing intent, sharp like the sword will he cultivated.

There was an asteroid heading to a planet. As that light passes that asteroid, the asteroid did not explode. Instead it was like it was erased from existence.

There is nothing to indicate that it ever existed. There is no longer a titanic body. Only his six foot six figures floating in the air.

But that figures seems to pressure this Sealed Universe even more than the titanic body ever did.

Azief entire being right now emanated bloodlust. But that bloodlust is tempered into patience in Azief heart.

If anyone else cultivated such powerful energy and Law, they would be controlled by the bloodlust and their intention and their mind would only be filled with the desire to kill and execute destruction, wherever there is life

But because Azief had the celestial energy and the fact that the Celestial energy merged and harmoniously coexisted with the demonic energy, Azief not only keep that bloodlust at bay, he even could control it.

To only use it when he wanted to. To change intention and will according to one thoughts. This is control. It is not letting the demonic energy to control you but you controlling the demonic energy.

Azief pressure was so powerful that all the space around him distorts before spiraling out of controls and exploded.

The power of the explosion will not lose out to the power of a star exploding, yet the moment they exploded they were suppressed by the force of the demonic energy and were erased instantly.

All the space around his body right now collapses unto itself, creating space rips and pockets of unknown energies as the seas of blood rushed into some of these pockets.

Azief could now see the hellscape of killing and bloodshed.

The seas are filled with souls that have resentments, people he killed as Azul, people he killed as himself and souls of animals and all of living things he either killed and the souls of the inhabitants of these sealed universe that was absorbed into the seas of blood.

An ancient demonic aura is radiating from Azief body. And that alerted some powerful Being in the Universe.

Residing in the Dark Universe, the High Emperor of the Asuras Vritra senses an ancient power of the Asura to be borne and his eyes is red.

This feeling transcended Time and Space so that even Vritra who lives inside the Source Wall felt it.

This is no so much as the energy leaked out from the Supremacy Dimension but a feeling of premonition.

Vritra did not know about Azief walking on the Thirteen Steps. If he knew, he would never let his enemy grows even stronger.

He was drinking his Soma when he felt that energy. He looks beyond his Loka, trying to see pass the Heavens of the Infernal Realm but he saw nothing

'This is suspicious he said. He flies out from his Loka as his entire Loka trembles and inauspicious signs covered the Heavens of the Infernal Realm

He turns into his original form of ten-million-meter long Black Dragon that cowed the stars and pressure the universe

Thunders roars as he roars, striking the land and shakes the world.

He flew out and tries to sense it again. He knows that the feeling he felt was the ancient demonic energy.

But no matter how he utilizes his power he could not find the source of that energy. Vritra felt threatened.

He, like Yu Wang forgot some things and remembers some things. But like many of the other powerful Beings in the Universe, eh did not know the existence of Azul.

If he knows, he would find ways to become his disciple owing to the fact that Azul race was the race that birthed the Asuras.

Yu Wang who was at his Celestial Palace, look toward the Infernal Realm of the Dark Universe, his eyes narrowing his forehead creased.

Beside him is Queen Mother of the West, holding his hand.

He did not want to let Vritra knows that Azief, the future God of Death is advancing to Essence Creation.

Because now that Yu Wang understand some things, he is eager to protect Azief. Like Odin, like Loki of Asgard, and like the scheme of that ancient race, he too betted on Azief right now

Vritra flies around a few minutes and then after not sensing anything he returned back to his Loka and full of thoughts.
