

## Shadow 771

### [Chapter 771: The formidable lineup \(2\)](#)

Azief is already sufficiently shocked seeing these beings appears to stop him but then something else comes to double the shock in Azief heart

He heard a shrieking, a roar and a growl and other sounds of primordial beast converging there on space.

Space should be vacuum and no sound should be heard.

But this sound is altering the properties of space itself and the sound of this beast could be heard echoing all over the Omniverse.

And what are these beast?

There is a Black Turtle swimming across the stars. On its large back that could fill multiple small Earth, it has a fertile world. There is waterfall falling from the edges of its shell and large trees.

Behind his back there seems to be cities and kingdoms. The people on its back doesn't seems to notice that they are sailing through space.

Then there is a White Tiger that is jumping from start to star bringing coldness to any place it went.

Flying beside the White Tiger is an Azure Dragon emanating powerful life force that seems to be able to repel the destructive aura of his future-self.

And behind them, a titanic Vermillion Bird flapping is flaming wing and restoring balance between the White Tiger that brings eternal winter.

It brings life and warmth to the cold universe, the flames seem to be able to renew and rebirths existence

And far behind them is the Water Devouring Snake on which behinds its back is a land of sands. As its slithers through space and stars, like the stars is some branches of a tree

The snake seems is on is shedding phase. The Five Beast seems to be heading toward Earth, their eyes seem to have infinite fury.

Azief remembers something as he looks at this scene. He broke the Fake World. In that world, he free these beasts who were bound by the Fragments.

These five beast is none other than the Five World Bearing Beast.

It made up the Five regions of the Fake World when the White Explosion happen in the past.

Even they came to stop him? Azief is about to be sucked into the Time Stream, but at this moment, how could he go without seeing more?

'Will, help me!' Azief said Azief release his Laws and Wil cooperate immediately as he uses the Sped Source that has recovered inside him.

The portals seem to be losing its suction power for a while as Azief look at the sky to see who else would appear in this battle

He then saw something appears again up there in the sky. It is a star. To be more exact it is a broken star

This broken star seems to be hovering and stopping. Stars do not move the way that broken star seems to be moving. There is a law that govern this star.

At this time, Will also did not miss the opportunity to see what is happening up there in the Heavens as the spatial tearing seems to be slowed down somewhat.

Will also look up and saw the lineup of Beings that have come to Earth.

He saw Sun Wukong the Sage Equal to Heaven wearing his full war armor and wielding a black staff that seems to be able to reach anywhere in the Omniverse

He saw, The High King of Asgard Odin Allfather sitting on his throne, and on the feet of his throne is two wolves. Perched on his shoulders is two ravens.

Standing beside his throne is an eight-legged steed that neighed loudly. Hanging on the side of the handle of the throne is a disembodied, herb-embalmed head.

There is Valkyries and Einherjar behind him ready to go into battle. There is one thought in Will mind at that moment.

‘Odin is going to fight in Ragnarok?’ That is the image that comes to his mind when he saw this line up of beings behind the throne

He also saw Zeus, sitting on his thunder shrouded throne which is suspended on top of golden clouds.

There is a scepter on his left hand and a thunderbolt on his right hand. He is seated in majesty on top of his throne.

Not far away from those two is a person who have black hair that seems as black as the void space. He floats there on the space wielding a sword made of light that seems to be able to drive away all darkness.

Like a sword immortal, his entire being seems to radiate a sharpness that could cut everything in the world.

There is also the Jade Emperor himself. He is shining golden and celestial force permeate the heavens.

These kind of line up of powerful being all over the Omniverse seems to all come here for a final showdown.

This alone had shocked him beyond belief

But when he saw that broken star, both Azief and Will mutters the same word

‘Interium’ Even Wargod appears.

Wargod seems to about to enter the atmosphere of earth.

Coming out from the broken star, Wargod body slowly expanded as his usually red skin seems to glow in blue.

He grows so large that his body seems to break space and the laws around it as he expanded.

'He is an Eterna!' Azief thought to himself. Another clue, he thought again.

At the same time this is happening, Azief felt the same force he once encountered appears again.

'This is...'

It is the same force that appears when he was entering the tunnels that appears on the end of the Supremacy Stairway and the force that helps him when he was about to be killed by his future self in the Time Tunnel.

BOOM!

A sound shocked the world as a mountain seems to materialize out of the nothingness of the void and is heading toward his future self.

It was like it was hurled from some parts of Time and Space.

It was at this moment that the tunnels that had weaken its suction force suddenly become stronger again and before Azief could see the conclusion of what happens he was sucked into the Time Stream and everything went dark for him and then a teeing force seems to envelops both him and Will this content of novelfullbook.com, if you reading this content please go to website novelfullbook.com to continue reading, fastest update hourly

They disappear from the future.

#### [Chapter 772: Returning to the present](#)

Azief and Will both fall downs again.

This time it is also unlike any experience of going through Space and Time tunnel.

They did not see any vision of the past.

All they felt was dizziness as they were sucked into the Time Stream and regurgitated from the Time Stream harshly.

But this time, they did not feel the powerful pressure pushing down their body. This time, they both once again felt powerful.

Azief felt the connection he has with the Heaven Will restored and he smiles

he could feel all that heaviness he was feeling in that future seems to disappear.

Will felt the same.

Even though he could not feel that potent powerful energy of Speed Source he felt in the future, he still regains back his Speed Source. They both get up and activated their Divine Sense.

With one sweep, they know that they have returned to their time. The barrier of Time and Space that they pierced is slowly recovering itself

The journey back is not as perilous they thought.

There was a possibility that a Time Master would chase over them inside the Time and Space tunnel when they entered back into the Time Stream again.

They both believe the fact that the journey felt short have something to do with Will Speed Source.

Time is always confusing in the time tunnel. No matter how many times Azief reminded himself of this, he always forgot how illogical certain things that would appear in the Time Tunnel.

They saw the destruction of Will but when they enter into the Time Stream, Will still probably holds that power of the Speed Source that his future-self had gained.

Time is not the same outside the Time Tunnel and inside it.

Now, they arrived back in their time, both of them try to adjust their mindset and calm their hearts

To them, it felt like thousands of years had passed in the Time and Space Tunnel. But to the rest of the world, Azief and Will only disappear for half an hour.

Right now, they are inside a forest in a large island.

But even though just half an hour had passed, both Will and Azief felt like they returned into a foreign world.

This forest that they are in is full of plants and trees that they did not recognize.

Some look like it come out of a fantasy novel

Colorful flora and fauna fills the surroundings. There is a tall flower the size of a building, its petals emanated a fragrant smell.

There is a flower that explodes out colorful liquid that colored the ground rainbow colored. There are trees whose trunk is as wide as a house.

All of the tree tops reach above the clouds and everything looks larger, and more colorful. It is understandable if they both landed in an alien world but they both know that this is Earth.

Azief could feel it from the Heaven Will he controlled.

And Will could feel it from the familiar Speed Source that is coursing through his body. Each Speed Source is different at certain times and at certain moments. That is how Speedster is able to navigate through Time and Space

If not Speedster would probably get stuck inside the Time Stream a lot

This island is one of the new islands formed after the fall.

Before Will and Azief went to the future and kick started a multiversal convergence, this small island is just the size of three baseball fields.

It had no animals on it, it has no plants on it, only a few pebbles and stone formation that was formed from the volcanic eruption underwater.

But now, this island is as big as the Asian continent.

If a small island grew this big, then one could only imagine the changes on the other continents that would probably grows even more in an exaggerated manner.

Up there on the skies, there is demons from the Seresian world.

Below the sea, there is sea monsters. On the ground, there is invasion force from all kinds of parallel earth and Otherworlds.

But Azief and Will did not yet realize this.

Instead they look at each other solemnly and then they smile.

Noticing the smile on each other faces, they both laughed. It seems that after their trip to the future they seem to understand something

Wat they see in the future was grim but they also notice something. And it is because of that they smile and they laughed.

Azief then said

'Thanks goodness that we did go

Will nodded

'It's not you' Will said.

Azief smiles and nodded

'It is not me'

That is the conclusion that they both have arrived in.

That Azief is not him.

And it is not some philosophical bullshit like that Azief is not him because he is the Azief of the future or something like that.

That Azief in the future, isn't really Azief.

Not to say that Azief is fake.

But whoever was attacking and killing there, it is not Azief.

They have their question answered on some question. But there is also some new question. If that is not Azief, who was it?

And how did things become like that? Though that is another matter.

Azief then look at the sky.

Unlike the sky in the future where he could see only glimpses and not everything could be seen clearly, here, at this present, he could see everything.

Nothing could escape his eyes. All under Heaven is under his gaze.

Azief look and by looking, he saw everything. this content of novelfullbook.com, if you reading this content please go to website novelfullbook.com to continue reading, fastest update hourly

The Will of Heaven relayed to him what happens in the half an hour he was gone.

This information streamed inside his mind in just a few second and his face turns into a frown.

Azief then avert his gaze and he look at Will and said

‘Something happen’ Will snorted and said

‘Well, obviously’ he said as he pointed toward the sky. Up there in the sky there seems to be a battalion of demonic soldiers flying down toward them.

It appears these invading forces realize that there is a sudden fluctuation of energy on the forest and quickly gave chase.

All over the world right now battels are being fought.

Will smiles looking at the battalion of demonic soldiers arming the skies and rushing down to probably capture or kill them

‘Seresian. It has been along time since we saw them.’ Will said

Azief laughed. Seresian demons is one of the first demonic creature that Azief had fought.

He fought them in Earth Two.

At that time, he didn’t have the power to change the tide of battel. That is also the reason why he did not open up any other portals after that to another world.

Because it could attract some unwanted attraction from these world conquering aliens.

That is also why he left Na Eun in that world to go to a separate parallel Earth and why he could not go back to that world again.

He fears that the Seresian demonic army would be able to trace and uses the tearing of space to invade that other world

To travel the multiverse means that it would slowly weakens the barrier of space between world.

The moment he returns to Earth Prime he sealed that point of space.

But today, as he and Will punched through Time and Space that barrier also exploded.

And judging from the situation all over the world right now, all kinds of parallel Earth that have the same frequencies is lining up, trying to merge.

Azief look at Will and then smiling he said

'I guess we had to deal with this first. After all, we were the cause of this'

Will nodded.

Azief did not go into a fighting stance. In the past he could not change the tide of battle. At that time, he was only an Energy Disperse Stage leveler.

But now he is a Divine Comprehension leveler.

Even in the Universe, there is not many that could fight him unless there are some ancient existence of the Omniverse.

Will also did not move as he regulated the circulation of Speed Source in his body.

The other reason he did not move is because there isn't a need to.

Azief is here. Azief flick his finger toward the sky as Laws gathered all over his fingers. He flicks his finger to the direction of that battalion of Seresian soldiers.

Up there in the sky, these Seresian soldier that is eager to kill, with murderousness in their eyes is rushing toward the ground and could not see that Azief had made a move.

BOOM!

The sound barrier is broken. One of the commander of this battalion look around to try to see from where the sound originated.

But before it could determine it, the commander turns into dust.

A second later, a powerful force tears through this battalion of demon soldiers.

Before they could register what happened, they turn to dust, and as the wind blows, these dust we brought along with the wind.

Azief sighed and said

'It seems my meeting with the Oracle had to be delayed for a while. Now, it seems I have to personally show myself'

The moment he said that thunders and lightning exploded in the sky and the whole world shakes as the Heavens seems to suddenly grow more powerful

All over the world, the heroes that is fighting the invasion look up and they all have the same premonition.

Death Monarch has finally come out from his throne room! He is joining the battle.

The great heroes all over the world all smiles when they noticed this phenomenon. In the hearts of these great heroes, Death Monarch is an existence they both feared but also admire.

Everyone had speculated that Death Monarch Azief had broken through from Disk Formation. Many of them believes that Death Monarch disappeared in a stairway that descend from Heaven is akin of a tribulation.

And when he returned to Earth, Death Monarch is still the invincible Death Monarch with no match.

It brought suppression and it brought a feeling of powerlessness when facing such a powerful person.

But now as the world is overwhelmed by the invasion forces from other worlds, they all waited for that person in Pandemonium to make his move.

And now, with the thunder rumbling, lightning dragon swiftly sailing the clouds in which their tails and head could not be seen, everyone felt a sense of elation enveloping them

The strongest person in the world is about to make his move!

With the shaking sound of a roar up there in the sky, the counterattack of Earth Prime began

### [Chapter 773: White and golden](#)

Will had already gone away the moment Azief began to attack

Will from the very beginning never intended to shift the blame to anybody else. He knew what could happen if he broke through the Time and Space barrier.

Because he believes that by seeing the future, he could balance the two out.

He believes that the future holds a much bigger threat than what they think and he is proven right by the scenes he saw.

And he actually has a countermeasure against the Multiversal Convergence.

He thought that if they go to the future, he would then return back only a few seconds after they left.

But there were too many distractions along the way and so many unexpected things happened, thing that he could not predict or even anticipate.

Why did they stop at that point of time where Loki is almost dead?

Why at that time? Will did not notice this before but maybe someone is watching all of the things they did and guided their path in the future.

And when they arrived at the particular future events that they wanted to see, Will could not have expected that he could not access the Speed Source.

That is one of the miscalculation he made this content of novelfullbook.com, if you reading this content please go to website novelfullbook.com to continue reading, fastest update hourly

When they enter back into the Time stream, parts of it was powered by the Heaven Will that Azief had wielded and parts of it is powered by the Speed Source of his future-self.

As such, there is a differed of time when they come back to their present.

Instead of a few second difference, they lost half a n hour.

And Will is trying to compensate that right now. He could feel the Time and Space all over the world is in disarray.

All around him time slowed down. Azief movement of flicking his finger and the energy that comes out from his finger could be seen clearly by Will.

But he did not stay long in the area.

He kicks the ground and set off. In his heart, there is only one thing that impacted him right now.

He had made the wrong calculation.

He forgot about it for a moment before because of the shock that was given to him by the vision of the future.

He still would be in a daze if not for the sudden crash course in reality when they return to the present

He had sweep the island with his divine sense before and he could barely envelop the entire island with his Divine Sense.

That alone had signified to him that things had changed a bit.

No, not a bit. But a lot he remarked to himself

It is clear that when he had opened the portals and punch through time and space, he had started a change in the Earth Prime.

It is probably them that started the change and it make some of the things they saw in the future make some more sense

The world in the future that they had seen is bigger than when they left the Earth.

Now, even as he is running at his fastest speed he just went out from the island after a few second of the real time.

Usually with his speed he would already pass a few continents along the way but the world had expanded.

This feeling is prevalent in Will hearts. He could also sense the large amount of worldly energy filling the whole world with Universal energy also filling the whole world

Even though he is running Will could multitask his mind to think a lot of things. After this, there would probably be a boom of people rising in their strength.

There is also benefits' Will think to himself

This could be considered a great effect of the Multiversal Convergence.

True, the Multiversal Convergence drew Otherworlds to them

But it is also true that they could also go to the Other worlds right now.

The barriers between world right now is very thin and one could go into another world just by walking through it.

As Will was thinking of all of this in just a second, he arrived on a large patch of land.

It is hard to tell whether he arrived at one of the old continent of the world or whether it is a new continent that appeared after the transformation of the world.

Will saw a group of invaders from another world is attacking the people of Earth Prime.

To him, these people were all slow. It is like a snail.

Not, even the movement of a snail would be faster than the movement of people that Will is seeing right now

At least this ability of him is not weakened. He thought to himself as he passes by the invaders.

A golden flash flit by and when it passes way, the invader all stop moving.

At that time before Will come into the area, a few Energy Disperse Stage is at their last straw fighting the invaders.

They were all about to die.

When that golden flash passes by suddenly these invaders that seems to be unstoppable with their out of the world technology suddenly stopped their movement and they instantly become pale.

The wind blows a bit and then one could see a thin straight line on their necks.

Then slowly their necks slide off from their head and they all died without knowing who killed them.

Their body falls to the ground and then they died almost immediately before their body suddenly bursting into an explosion of meats.

The meat scattered all over like a parade of gore. The group of people who thought they were going to die also frozen in place.

The sudden change in fortune was shocking to them too. They were already praying and resolve themselves to die.

Some of them even thought of exploding their body to create a large explosion, bringing as many of the enemy dead with them

But a moment later, their enemy suddenly died like they were being punished by some gods.

These people then remember that golden flash and they all exclaimed at the same time.

‘The Golden Speedster!’

They could only see the lingering flash left by the traces of the Golden Speedster. They all laughed after being spared of a terrible death

When the world began expanding some countries and some villages were cut off from the notice of the Great powers of the World.

Each continent grew in an accelerated rate that the distance between two villages could be measured in months’ even if they still have cars.

A month long journey just to go from a village to another village which before the change would only take a fifteen-minute ride.

The world at large did not know when the first space rip happens, it was in the World Government Island of Peace.

They did not know that Loki the Trickster is the first one to engage with these invaders, and is still there inside that space rips holding on the space rip from letting a large fleet of the Seresian world from coming into Earth prime.

And they did not know that there is two people who did not appear in this battle that could tilt the balance of battle toward the people of Earth Prime easily

It is Death Monarch and the Golden Speedster. As for Death Monarch, it is not to be doubted that his participation would end a lot of the resistance of the invaders from parallel Earths

But is that any different for Golden Speedster? Who could dismiss such a powerful Disk Formation leveler? And it is not only because of his Disk Formation realm that he is useful.

It is his inherent unique ability that sets him apart from other Disk Formation leveler.

There is one other person that have some kind of similar abilities like Will and that is Warp from the League of Freedom

Warp can teleport.

but he is unlike a Speedster.

Warp specialty is in escaping and not attacking.

It is said because of his teleportation ability that defies the Laws of normal teleportation, that even if its Death Monarch, he would be hard-pressed to capture Warp.

But as for offensive power?

Warp could teleport enemies but he could not compress the space and kill people in that teleportation area.

Will the Golden Speedster is different.

This is a person capable of killing thousand or even tens of thousands in a span of seconds

His speed alone is useful.

He could run over the entire world in a few minutes, killing anyone that is doing harm to the people of Earth Prime

It is a different thing if the enemies are people of Disk Formation that would have ways to deal with Will speed.

The invasion force from other Earths is mostly people who have highly advanced technology but it is still bind by the limitation of technology.

And while there is a few world of magic that enter Earth prime right now, they did not seem to come with the desire to invade Earth prime.

Even if they do, could they fight a true bona fide peak Realm of Disk Formation leveler like Will?

Right now all over the world, all the Disk Formation that usually secludes themselves in caves, and on top of mountains all come out and began attacking.

Each one of them is like a weapon of mass destruction unleashed upon the world.

They only met resistance with fighting the Demonic Count who is around the same level of cultivation level.

But as for forces of the Other worlds that is not from some magical civilization, sending these Disk Formation leveler is like throwing a lion into a pen of sheep.

And now, Golden Speedster also enter the battle. Golden lightning is flashing throughout the world and everyone could feel that the situation is changing better for the Earth Prime.

Everyone could see a golden light flashing by and morale rises up. Wherever it flashes, dead souls are reaped.

Time and Space around the area distorted because of the speed that the Golden Speedster is using.

Clad in kinetic energy Will eyes is shining radiantly, golden lightning spiraling inside his eyes as he will use the Speed Source to close up the portals.

But like before, he could not do it alone.

‘Teacher’ he shouted in Savi’krian language. And inside a cut off timeline, inside an altar emanating ancient atmosphere, an orb shine white and then it flashes out from the altar and opens up a portal. The portal only opens up for a second and the flash of white appears in Earth Prime flashing toward Will

Now there is two light flashing all over the world, a white and a golden lightning

#### [Chapter 774: Laws obeyed](#)

As Will take that first step and disappeared from the island, the moment passed and Azief take a deep breath after he just finished an entire battalion of Seresian demonic soldiers up there on the sky

He takes only a second before he calls upon the Heaven Will.

Because he knows Will has disappeared, he wanted to know whether Will is trying to close the space rips all over the world

He could see using the Heaven Will everything.

He could see the vastness of the new lands.

Each of the seven continent seems to expand so large that they could fit hundreds of the previous continents inside the new size of the continent.

The distance between Earth and Heaven multiplied by tens of thousands folds.

If before Azief wanted to reach the sky, it would at least take him a few seconds. But now, not only that distance is higher it would also take him longer.

For anyone below Disk Formation, it would take them a long time before they could reach the sky.

He then goes to gaze upon the whereabouts of Will. It only takes him a few second before he could see where Wil is. In the eyes of the Heaven Will, Will appears slows.

Even though the world had expanded, the distance between the sky and Earth had multiplied, with the control of Heaven Will, Azief could still see whatever he wanted as long as it is under the Heaven

With the sudden influx of energy because of the Multiversal Convergence the world is full of energy.

It helps the fostering of new kinds of living things but it also strengthens the Heaven. Because of that, it is the same as increasing the strength that Azief possesses.

His eyes look upon Will who is just a flash of golden light to people who did not able to keep up with the speed.

He is running all over the world, killing the invaders with his finger.

Will only need to scratch his fingers on the necks of these invaders while moving in a sound breaking speed reaching almost light speed.

If a needle falls with the speed of light, even that could create a massive impact on Earth.

Not to mention Will who uses his speed and combines it with his attack. The invaders that is on the ground is easier to kill and consumes little time and energy on part of Will.

Will plan is easy. Fighting these invaders one could take two different approach. It is a matter of quality over quantity., Will is focusing on quantity.

Most of the invaders come from the parallel Earth that possess some technological advancement that was clearly hundreds of years more advanced than Earth Prime before the Fall.

But even though they have powerful technology and there is millions of them invading, their weakness was that they could not stand even one punch from a Disk Formation leveler.

Even Seed Formation leveler could do a lot of damage upon them.

Will focused on killing these type of invader's first. It is faster and it frees up the other fighter to help the others.

Quantity focused attack would target these numerous but weak humans. Quality focused is fighting the Demonic Count. Each Demonic Count is like a Disk Formation leveler.

Each one of the Demonic Count is like a weapon of mass destruction.

If one chooses the quality focused approach, then they have to tangle with a Demonic Count, preventing these Demons from killing a lot of people with their terrifying might.

But it also helps stabilize the other invasion force. The situation right now is that there are many other worlds and these worlds all have different objectives and different aspiration.

Some knows that this is a multiversal convergence.

While some other worlds did not know that their world is experiencing such multiversal convergence.

Azief could see in one of his vision of the world that there is someone that comes out straight from a medieval era like world.

To these people who did not come from a magical civilization, or even a modern world with advanced technology, the sight that they are seeing right now probably would make them question their sanity.

There is an entire caravan that appeared out of the space rips looking bedazzled when they come out.

It was like someone went back in time and pluck these people out from the medieval era to here.

They look at the world and they were fearful because they see such a large tree that defy their common sense. They see people flying and fighting in the sky like deities.

Azief believes that if Will could fix the Space Rip and send everyone back to their worlds, these caravan probably would record it in their stories of these worlds like a demonic world or the world of deities.

Azief then glance back to the other parts of the world. His eyes seem to be even more powerful and all seeing right now

Will had chosen this because I am here' Azief thought to himself

The invader that is on the ground easier to kill and faster to kill rather than the enemy up there in the sky.

That time could be use to weaken the other invasion force. Will had decided it to be so.

Most of the Disk Formation leveler of the world is fighting at the sky, preventing the Demonic Count from using their prowess to initiate a powerful cleansing of humanity

Since there are heroes and heroine fighting the Demonic Count, then Will would clean up the weak humans saving lives of the people of the world while trying to fix the mess that they created

Azief could see that these invaders from another world mostly comes from a world of powerful technological advancements and their weapons could even kill a Seed Formation leveler

There are a few worlds that is in the Multiversal Convergence that comes from magic-like worlds but most of the enemies in the ground did not possess powers that exceed Disk Formation.

The only reason why they are hard to kill is because the sudden expansion of the world and they were not gathered in one place and there is also a difference between each of the invasion force.

Some of the invasion force do come from a technological advanced world.

But some of the invading worlds have weapons that could injure and kill Seed Formation leveler. While some others have weapons that could only injure and kill Energy Disperse Stage leveler but could not injure Seed Formation leveler.

Separated by millions of miles and new lands and island that sprouted out from nowhere make it difficult to eradicate all of them.

If one of these invaders could create a base in Earth prime they could slowly integrate themselves and create a lot of damage.

The meaning of none of them exceed Disk Formation levelers also means that other than Disk Formation levelers, the methods of these invader is deadly to those below Disk Formation.

There are only a few people on Earth that could ignore distance.

One of them is Will. Will right now is going to everyone on Earth, killing any enemies that he passes by.

Will chooses the quantity approach, because Will knows that for Demonic Counts, Azief could kill all of them.

Smiling a bit, Azief thought to himself

‘This sworn brother of mine really wanted me to do the heavy lifting’

Then he laughed a bit.

He takes a step and he appeared somewhere. Distance and Space did not mean anything to Azief. He controls Laws. This is unlike that time in the future where his Laws is distorted and altered. This is his era. The era of Death Monarch.

The Laws of Space and Time bends for him and the worldly laws had to obey.

When he takes a step, the space distorted and he appeared somewhere else.

he appeared on a sky somewhere above a large city. It is a small city in African continent.

But with the sudden expansion, this city suddenly was far away and there is a stretching wide lands that is empty around them that they could not travel until the next village unless it would take them days and even months if they are not someone in the Seed Formation or above

Then they were attacked by Seresian demonic soldiers.

They repelled the invading forces but that was just the beginning. Now, after they wiped out the demonic soldiers, reinforcement came in the form of one Demonic Count

The demonic Count did not say much or fly down to the city. Instead is floated above the city, gather his energy and is about to send a large ball of flame toward a large city.

There is no Disk Formation leveler here in this city. They all could only watch as a gigantic ball of flame is descending down from Heaven to burn everything.

They felt despair and a sense of powerlessness. this content of [novelfullbook.com](http://novelfullbook.com), if you reading this content please go to website [novelfullbook.com](http://novelfullbook.com) to continue reading, fastest update hourly

It was at this time, that all hope seems lost, up there in the sky, amidst the many opening space rips, voids shatter and space seems to be deconstructed like a kaleidoscope shape taking place for a moment in the sky and someone appears up there.

Azief appears up there in the sky of the city, his mind is still thinking and his eyes is still seeing thousands of sceneries of the world.

The edges of his sleeves and his black cape billows.

The cape is not a cape that is made by fabric but by some unknown energy of the world that spread darkness around it

'It seems I am not that late' he said to himself as he watches the gigantic ball of flame that is about to be crashing toward the city.

He waves his hand gently and he activated one of his Thirteen Law Bodies.

Thunder rumbles and the sky opened up for a second as the Laws of the world seem to be prodded by a foreign energy.

And this foreign energy is like a monarch commanding its subject. The Laws obeyed and the world trembles

Azief stand there up in the sky, a large gigantic flaming ball is about to crash on him. It is like a small boat on a stormy sea.

But for some unknown reason, when the people of that city look at that figure of black clothed man, instead of feeling that the man is small and the gigantic ball of flame is big, they instead felt that the man is larger than the flames

It does not make sense but that is their feeling

Some of the people in the city look up and when they saw that black clothed person, appearing out of nowhere, it took them for a second to recognize that person.

Right now as the energy of the world become even more thick it is even harder to teleports and some parts of the world is ravaged by an energy storms that made it almost impossible to teleports.

The Space Laws is also in disarray right now as multiple worlds are converging.

But if there is one person that is able to easily traverse through time and space, there is no doubt "that person" is the only one

On one part of the city, one of them shouted

'Death Monarch Azief!'

#### [Chapter 775: The power of a divine comprehension realm](#)

Azief smiles as cosmological forces swirl around his hand and a silhouette of a titanic figure could be seen behind Azief, forming

It was translucent at first but it is slowly becoming even more solid

The space rip around the sky is cracking the moment that silhouette appeared.

the space rips around the area that was in the amount of thousands was pressured by that titanic figure and the space rips exploded like it could not bear its power.

Not only it exploded, it also creates a backlash of energy to anyone using that space rips.

The Seresian invading forces that is accelerating the space rips were taken by surprise as that pressure closes up the space rips and stabilizes the space around the area

It was like it is slowly finding its stability

Laws and Concepts of the world seems to be suppressed by the tremendous power that is emanating from Azief body right now.

Divine Comprehension leveler!' This is the thought of some of the Seed Formation leveler watching this scene from the city below Azief feet

This is the power of a Divine Comprehension leveler! No one had seen the power of Divine Comprehension leveler before on Earth.

Even when Death Monarch Azief had returned to Earth he did not fight or display his ability, remaining mysterious and unfathomable like always, sitting in that high throne of his in Pandemonium.

He only sends a sword to express his displeasure. And a letter to warn and remind some people

He never made any move other than that.

Everyone knows one fact about Death Monarch. When Death Monarch did not move, the world would be calm. Once he makes a move, waves and storms would rise up.

How could the move of the strongest person in the world would not be earth shaking and a heaven defying move?

Powerful life force fills the whole world as the silhouette become even clear. It is not only the city below Azief feet that could feel the life force.

All over the world, a life force seems to rain down upon all the inhabitants of Earth prime. Barren lands sprouted out grass.

At other places, it accelerates the formation of plants and even shower the animals around them for them to gain ability unique to themselves

Those who were tired felt their tiredness goes away. Those who were in the verge of dying stabilizes itself.

Energy filling these tired people body who is fighting the war against all worlds that is attracted to Earth Prime.

Those Seed that wanted to dried up in the Seed Formation inner world is once again blooming with energy.

Those Disk that is about to crack under the pressure of fighting the unending enemies, once the life force sweeps them through, it is like being slap with an adhesive glue merge back, the cracks slowly disappeared.

This rain of life force is giving them more energy to fight of the invaders.

Even the Disk Formation levelers that was fighting the Demonic Count was also affected. The difference between Disk Formation and Seed Formation leveler is not that different.

Those who have sturdy foundation of a Seed Formation could fight against Disk Formation.

But that is not the same difference between a Disk Formation leveler and Divine Comprehension leveler.

And nothing says its better than the current occurrence right now.

Even Raymond who was fighting amidst thousands of Seresian demonic soldiers could feel the life energy filling his tired body, like a rain that strip away all deadly force and repels all fatigue

Azief is powerful enough that he could heal even a Disk Formation leveler like an ancestor lending some hands to their juniors

Azief simple waves of hand created this phenomenon all over the world. this content of novelfullbook.com, if you reading this content please go to website novelfullbook.com to continue reading, fastest update hourly

The Emperor of Wei once said, that Death Monarch is tall. He is so tall that his fist could not reach it.

The reason he is tall is not because of his height.

But because of his transcendence nature in the hearts of the people of the world.

To many, the moment Death Monarch won against the Heavens, Death Monarch become the Heaven. Now, no one would doubt such words.

Azief is still floating on top of the city skies.

The space rips all over the city disappeared because of the silhouette pressure. It was like they were crushed by that invisible pressure

Azief still appears unconcerned even as the gigantic ball of flame coming down from the sky. The clouds had already dissipated because of the heat of the ball of flame.

But Azief is still leisurely floating there, his eyes seem to be filled with many images of all the things that is happening in the world

The titanic silhouette slowly become even more solid.

As it become clear, the Demonic Count that was coming down in high sprit shrieks and then flew away like it is being chased by the Death Reaper.

Azief did not seem to care that the enemy is trying to escape.

The ball of flame when it reached around ten feet of Azief body, it dissipated like a small flame being blown by a gust of harsh wind.

Everything seems so futile.

The silhouette then become even more solid and one could see the closed eyes of the silhouette opened up suddenly

The silhouette body is about to make a move

The right eye of the silhouette has white pupils and powerful Life force seems to be emanated from it.

Wherever that gaze of the right eye landed, the area around it will be showered with powerful life force.

Plants sprouted, people were healed of their tiredness and sickness.

Wound of the wounded closes up, those who were at the verge of dying would be filled with life force enough to tide the situation.

On its left eye, the pupil is black and darkness seems to emanates around the pupils like a fog of the blackest of dark nights

The left eyes seem to possess the power of Death and emanates a sense of desolation upon whoever cast its gaze upon it

The silhouette gaze upon the flying Demonic Count. But only the left eye seems to be shining.

It shines and to the disbelief of all the people below inside the city, the Demonic Count that appear so mighty like a true demonic god slowly turning into ashes.

The Demonic Count did not even realize that he is turning into ashes as it keeps shrieking while flying.

It keeps shrieking until finally his entire being of the Demonic count dissipated. The left eye of that silhouette stop shining.

The left eye possesses the power of Death, wherever the gaze landed Death would come. The silhouette become even more clear as the pressure multiplied.

But the pressure did not oppress the people of Earth prime instead it fills the world and pressure all those creates up there flying in the sky, treating Earth prime like their playground.

Azief close his eyes for a moment, then opens it back up. His eyes are no longer full of images as he had seen almost everything that is happening in the world.

He saw the battle all over the world and he saw the invasion forces that come from other worlds

There is around thirty invasion forces that comes from thirty different worlds.

But they were never the real threat. The real threat is always the Seresian who have powerful beings that have powerful might that is equivalent to Supreme Being.

'You are really brave. Just because I couldn't stop you in Earth two, do you think I am still the same person?' Azief smiles a bit.

'This is also good. I do not need to seek you out' The Seresian Invasion in Earth Two is one of Azief regret.

He had decided that when he grows stronger he would open back the portal and free Earth two from the hold of Seresian influence.

Now, he is strong enough.

Seresian no longer have a Demonic Emperor.

There is a lot of Karma between him and the Seresian. The rising on his finger after all was taken by him in the Seresian world.

The silhouette become even more solid as Azief Will seems to envelop the whole world.

The Time flows differently around the silhouette figure that is slowly getting even bigger.

As the silhouette become even more clear, people inside the city could see more detail about the silhouette behind Death Monarch

By now, everyone recognizes that the one who saved them from the gigantic ball of flame is none other than the famous strongest person in the world, Death Monarch, the eternal ruler of Pandemonium.

Before these people notices that the silhouette has two different colors of pupils, with each of its eyes seem to symbolizes and contained the power of Life and Death.

But now, they could see the colors of the silhouette fingers. It has variety of colors in its finger. Instead of calling it colors, it is more accurate to say it is an aura that is given form.

A large tree suddenly sprouted as the area around Azief seems to become a celestial domain.

It is like the area above the sky and the area below it is separated by layers of dimension.

The expanding pressure close up the nearby space rips.

A hundred kilometers away there is a group of invaders who is fighting a group of Orb Condensing leveler who is protecting their villages.

The pressure sweeps them by and without rhyme or reason, these invaders all disintegrated.

Their weapons fall down but their body turns to dust.

When it sweeps through the invaders, they die but when it sweeps through the villagers, they all were given powerful life force as they notice the peculiarities that is happening around them.

This pressure sweeps all across these huge continent.

This is no longer just a power of the energy of the world.

This is the application of Laws. Distance did not mean anything once you grasped the power of Laws.

This pressure sweeps all around as the silhouette above that city grows even bigger and the pressure breaks the sky.

There were few thousands Seresian soldiers who notice the peculiarities and fly toward that gigantic silhouette but wherever that black pupil gaze upon them they died without knowing even why.

They only felt fear and premonition of death, shrieking in fear and then died just like that.

As the silhouette become clear, one could see that the eye is not an eye. Instead it is shaped like an eye but it is actually an orb.

The fingers had purple and green colors. The purple aura that emanated from the purple finger seems to contain the power of rebirth.

It turns a withering plants into a green plant, barren land to fertile land.

And the green finger seems to distort time. These two concepts of Rebirth and Time seems to be overlapping each other.

This time, the silhouette is no longer a silhouette as it become clear that the large titanic silhouette possesses the same face as Death Monarch.

By now everyone in the whole world could see it. Those invaders in the ground were shocked as they hesitate to continue their attack

What kind of a world we arrive at?' one of them ask at the soldiers beside him.

Thunder rumbles and the skies of the world seems to share the same night as all of the clouds become dark and envelope the world

Lightning crisscrossed like an omen of dark tidings

#### [Chapter 776: The decree of heaven \(1\)](#)

'What kind of a world we arrive at?' one of them ask at the soldiers beside him.

These soldiers from other worlds have seen all kinds of phenomenon when they conquered other planets and world before and nothing should shock them anymore

But they have never seen such scene. They themselves in their worlds believed that they are the peak of human existence, possessing powerful technologies.

There were many worlds overlapping each other right now. And this soldier come from one of those world.

The world where he came from is governed by one singular entity of power, the Empire of Evenisia.

They had mastered space travels and conquered planets and star systems.

Today, the military department suddenly detected a huge explosion of energy that opens up portals in their Earth.

The military immediately send scouts and found out it is a world untainted by pollution and seems to have many mineral resources that is now rare on Earth and even some new mineral resources that they could not identified.

As the Empire usual behavior, they immediately send an invasion force. What they want, they take.

Of course at that time, they did not know that they were about to kick a very hard metal plate.

They appeared in a vast land of emptiness.

No one would have thought that when a scan of the world was done, the scanner that they brought could not scan the entire planet surface.

It surpasses the machine scanning range.

That alone should be a warning sign for them that they should not have come into this world. This world that they come into is larger than any planets that they have encountered before and it is also one of the strangest planets that they have ever been in

They then began exploring the world, sending their drones and their scouting robots up toward the sky.

They could see the weird plants, large trees that reached up toward the Heavens, all kinds of manners of beast that are all gigantic in size and possess abilities that is illogical

It was then that they were found by the inhabitants of this world and engage with them in battle. One thing that their soldiers are famed was their ability to win every battle they are in.

Of course, that confidence lasted only until the first clash between them and the original inhabitants of this world

And it is to their shock, that they found the inhabitants of this world is not as primitive as they thought and they are not weak either.

They possess powerful weapons and all kinds of abilities that bordered in magical abilities that usually could only be found in fantasy stories

At first, they scoffed at these people weapons.

Some of them brought out spears, some brought swords and other brought out weapons that look like they came from a medieval world era.

But it wasn't until their prided advanced machinery clash with these cold weapons, that they understood why these people uses these kinds of weapons.

Their weapons possess powerful destructive power.

Some of them controls the element and some of them control the very energy that exist around them.

With their sword they could cleave mountains and with their spears it is like they were using a powerful lightning bolts to pierce through their armor

They could fly to the sky and hurls down lightning and thunderbolts, produce fire from their mouth and control the weather like gods in myths.

If Earth Prime did not experience the event of the Fall where the All Source transformed the world, it is without doubt that these invaders would easily steamrolled any opposition.

But if never existed in the battlefield.

When they ask this question, it is not because they were curious like any other times they conquer other planets.

The tone is a tone of fear and disbelief.

This is because as they look toward the distance, they could see a titanic silhouette covering up the Heavens.

And it grew larger and larger that one could almost feel that this titanic figure is about to envelop the world like a world devouring creature

They felt fear and uncertainty creeping in their hearts. this content of novelfullbook.com, if you reading this content please go to website novelfullbook.com to continue reading, fastest update hourly

What kind of world did they tried to invade right now? By now, many of this people had fought the inhabitants of Earth prime.

And they come into one terrifying conclusion. Whatever these beings are, they are not human at all.

The people of this planet in the minds of these invaders looks like humans but they were nothing like a normal human.

They did not have to wear nano integrated suit to fly and they control the power of the elements. Some of them have unique abilities like superpowers.

They are godlike being that live in a planet that is the same as their planet.

Some of the soldiers even thought that they have arrived at a Divine Realm where all the inhabitant is some form of deities.

This soldiers are but one of many of the other invasion forces that just realized that they have come into a very dangerous world

And now a new worry fills their mind

Instead of them able to use the space rips to come to this world and conquer it, some of them even fear that these people of this world would set their sight to their worlds.

Since the space rips went both ways. The silhouette figure struck fear in all the hearts of these invaders

Only at a certain place where the sight is obstructed by tall trees and tall mountains that it is hard to see the silhouette.

But for invaders that come from a world of magic, even though they could not see it, they could feel the intensity of energy that is swirling throughout heaven and Earth

But that would not remain for long as Azief silhouette grew even bigger by the second and that feeling is no longer just a feeling, as the pressure mounted upon them become like a solid attack that would pressure their body

As for the heroes and heroines of the world, they all gaze toward that direction and they all were shocked.

They were shocked because of different thing. It is not the gigantic silhouette that shocked them.

#### [Chapter 777: The decree of heaven \(2\)](#)

What shocked them was the aura around that silhouette.

An aura of Laws of the world gathering and obeying.

In a snowy land, there, fighting up in the sky wearing a white clothing looking like a divine goddess of beauty is Katarina

Her red sword cut open her enemies like she is cutting butter with heated knife.

She too saw the silhouette and she notices some peculiarities between that silhouette and the person that is in her heart.

When she stops, her maiden rush forward fighting for her. When she stops fighting, the snow around the area halted in place.

But the fighting around her continues, the sound of screaming, of anger of despair, echoes all around her.

But like an untainted beauty, nothing seems to be able to come near her. Katarina frowned a bit and then she smiles

‘Where did you go before?’ she seems to ask. But then she just sighed.

‘At least, you have returned’ she muttered silently and then the snow falls again and she flew forward, the cold once again fills Europe.

But before, the coldness affects the entire Europe, but now only parts of it is affected.

The world has become too large that even Disk Formation leveler could not be considered a powerful force that could wreck the world easily like before.

Their power and force remains like before, and it even became more powerful and more full of energy but their effects of damage to the world decreased.

It is not that they become weaker. It is the world become stronger.,

The moment that the world expands, the powerful the world becomes.

Before, one punch of a Disk Formation could level a mountain easily. But now?

Now, if a Disk Formation punch toward a mountain, at most, parts of the mountain would fall off.

At the least, there is a shaking on the mountain, like someone hitting a large gong.

But it would not be like before when any of the Disk Formation leveler went out it is like a nuclear warhead walking around the Earth, making any great powers to check the movement of each of Disk Formation leveler

However, while the damage they do to the world is minimized, the damage they do to their enemies is still the same power.

Just because they could not destroy mountain with one punch, it did not mean that they could destroy other people with one punch.

The differences of power between each realm is still there.

All the heroes of the world are still fighting and all of them realized the appearance of that silhouette and that heaven breaking power.

There is no doubt in anyone minds that the silhouette resembles very closely to the appearance of Death Monarch Azief

They all felt their morale rising up.

Because they all know that even though they are Disk Formation leveler, they are no longer in control of the situation.

There were too many changes in the world that they could not keep up with.

The entry of Death Monarch, the sole Divine Comprehension leveler in Earth would probably level the playing field right now.

Disk Formation leveler could not be at different places at the same time excluding people like Jean who could summon his past-self into the present and fight the demonic soldiers and the Otherworlds invasion force at different places at the same time.

They waited for the strongest person in the move to show his might. Everyone could see the silhouette and even though they were sure that the silhouette appearance is related to Death Monarch they did not know what it actually is

The silhouette is actually one of Azief Law Body.

And in particular it is the Cosmic Law Body. Now that it is projected outside of his Inner Universe, the Cosmic Law Body slowly gains form.

As it gains form, it become larger and the pressure it emanated skyrocketed, covering the whole world.

The only reason it could cover the whole world is such a domineering fashion without any obstruction from the Will of the world is because of the miraculous events that preceded the formation of the Law Body.

Even before Azief had the Law body, he already fought against the heaven and won. In winning, he usurped the authority of Heaven Will.

That leads to this current state where the Law Body is like merging with the Heaven and becoming one with it, spreading its power to all the four corners of the world

As the Law body become clear, people could see that the Law Body did not exactly look like Death Monarch, at least not entirely the same

The Law Body seems to be colored by five colors, representing the power of the Elements.

Its right palm is in reddish black color, possessing the power of Cosmic Destruction and its left palm is purple mixed with green color, possessing the power of Destiny and Fate

Azief smiles and said

‘I think this is enough to settle this continent’

Saying this he opened up his hand. Gushing of powers swirls around him and his body and then reforming out of the laws of the world, is nine swords.

This nine sword was small in the beginning. One could barely see it as they were the size of a needle.

But a second later, it grew into a normal size of a sword and then a second later it grew again.

It turns into a gigantic sword that emanates powerful fluctuation of energy that pressure space, and controls the laws of the world

Azief smiles looking at these swords and said

'Since people wanted to see my power, there is no need to hide it then' he then waves his hand and this nine sword flew to his Cosmic Law Body and suspend itself swirling around the Law Body this content of novelfullbook.com, if you reading this content please go to website novelfullbook.com to continue reading, fastest update hourly

Azief had formed these nine sword in the Supremacy Stairway. Each of the sword all have concepts of Laws imbued into it.

The Laws and Concepts come from his Seed. To be more accurate it is Laws given form

The Sword of Death originated from the Law of Death. The Sword of Life originated from the Law of Life

These two swords are beside each other, balancing each other out, one seems to emanate the ghastly feeling of reaping souls, the other emanates warmth that embraces life

There is also the Sword or Rebirth originating from the Law of Rebirth.

Wherever it passes, it could induce transformation akin of a phoenix undergoing tribulation, turning into ashes and be reborn again through the fire

The Sword of Time originating from the Law of Time. It could cut through Time and it could affect Time related powers.

This is one move that he did not use against Jean before. If he uses it against Jean, who knows who would be disadvantaged between them two when comparing Laws?

After all, no matter how proficient Jean is in the laws of time, he is still a realm below Azief.

The reason why Azief did not go all out against Jean is because he did not have any ill feeling against Jean and Jean did not have evil intention against him

It is just a difference in objectives and the objective of Jean is something that Azief understand and even admired.

If not for the circumstances that forces him, even he would be standing beside Jean.

In the end, Jean failed simply because Azief is stronger than him.

[Chapter 778: The decree of heaven \(3\)](#)

Then there is the Sword of Darkness originating from the Law of Darkness, the Sword of the Elements, originating from the Laws of the Element, possessing the power of all the Elements in the world.

With the Sword of Elements, one could control the elemental powers of the world like thunder, water, fire and many more.

Then there is the Sword of Destruction originating from the Law of Destruction.

This sword emanates a powerful destruction aura that if not for the power of the Sword of Life it would bring a withering and corrosion effect to the area around it,

Then there is a Sword of Destiny and the Sword of Fate originating from Law of Destiny and the Law of Fate.

These two swords seem to be swirling with threads and all kinds of abstruse images and symbols. The aura around these two swords seems to emanate some kind of sense of mysteries

The Nine Laws Sword. It rotates around the Cosmic Law Body. The Cosmic Law Body right now seems to be clear.

It had the white and black pupil and the colorful body with a face that is similar to Azief.

Only it had none of warmth but impassive like an emotionless statue of a powerful supreme being.

Azief smiles as he said

‘Wield it’ The Cosmic Law Body eyes suddenly shines with brilliance and intelligence. The Nine Laws Sword hummed and a melody seems to come out from the humming of the swords.

It affects the world laws and create a resonance with all kinds of energy that is present in the world

Azief eyes also shines with brightness. This brightness first only covers him but it slowly expands.

Azief eyes brightens even more and for the people below the skies, when they look up it was like looking at a miniature sun, shining a golden light that fills the world

This brightness soon covers the whole world.

Everyone could see it this time.

Regardless whether there is tall mountain or tall trees, this time the brightness covers the whole world and no one could avoid seeing it unless one is blind

Like a silver explosion happening, it covers the eyes of everyone for a second.

And a powerful pressure appears up there in the heaven

‘I decree, invaders of my world to be punished’ A word could be heard breaking through the clouds, like someone high above is speaking and the whole world had to listen

The words echo all over the world and thunder booms like it was acknowledging the words.

Dark clouds gather all over the skies and the Heaven above the world seems to be affected.

BOOM!

Thunder roars up there in the skies. Whenever there are outsiders of Earth Prime, clouds will gather above their heads and around them

It is like a prelude to a great annihilation

'I, command the Laws' this word echoes again all over the world.

'Execute the invaders!'

BOOOOM!

The thunderous roars shocked everyone that could hear it and destruction aura envelop the entire Heaven.

Everyone who is above Seed Formation could feel goosebumps all over their body

The Heavens Above seems to possess killing intent and this killing intent is so strong that it become solid as red blackish aura covers the clouds.

Every part of the world seems to experience night.

Those who live in the part of the world where the sun is shining suddenly were covered by dark red skies.

It is like Night falls over them, like curtains is being closed on and the sun and the moon was shut off from their vision.

But this night is different from normal night.

It made everyone that look at the darkness of this night flailing upon them felt like this darkness would consume them whole.

The thunder went crazy, lightning fills the entire world, sometimes illuminating the darkness of dark red skies with golden light making like the sky is about to fall down this content of novelfullbook.com, if you reading this content please go to website novelfullbook.com to continue reading, fastest update hourly

Thunder Dragons appears among the clouds and then harsh winds followed.

All kinds of lightning seem to gathers and appears like they were about to strike the world and shatters the world apart.

Another thunderous boom exploded in the sky, like a war drum being strike upon to march the soldiers.

These lightning exploded up there in the skies and split the heaven apart and thunderous roars akin to the roars of a primordial beats unleashed from its captivity resounded across the sky.

Then they rain down upon the world like a celestial soldiers attacking the enemy of Heavens

This powerful attack from the Heaven is not limited to the African continent where Azief is right now.

Instead they rained down all over the world.

But instead of normal thunderbolts, it was dragons, tigers, lions who attacked these invaders.

All of these dragons, lions, tigers, griffins and all manners of terrifying beast were all based on lightning and emanated the destruction power of thunderbolts.

Their entire being is swirling with electricity arc as they attacked the invaders of Earth Prime.

These lightning also have their own colors

Some of them are golden and some of them are red. And as such, these beasts that is made of these lightning also have different colors.

They are thunderbolts given form by the will of the world and now with the decree of Death Monarch, they executed the invaders

The screams of these invaders resounded throughout the expanse of the Heaven and Earth.

Some of them try to return back to the portal they came from but these beasts that were sent down from the Heavens was merciless and fast, none could escape them once they lock onto a target

Some of these space rips were split apart by the stray lightning and thunderbolts that keep raining down.

The destructiveness of these lightning is like the Extermination Thunderbolts that tries to kill Azief in the past.

As such, unless one possesses such powerful physique like Azief in the past, there is only one conclusion that would wait for anyone being struck by these thunderbolts.

Death.

The lights of lightning bolts lighted up the skies, the crash of thunder precede the appearance of thunderbolts.

The lights and the sound would convince anyone that today is the day the world will end

That is the feeling these invaders are feeling right now. They saw night cover the day.

They saw a titanic figure rose up in the distance and they saw thunders and lightning morphed into gigantic beast of legends and myths, killing them without mercy and without stopping

Some of the Seresian soldiers who arrogantly floated in the sky, looking down at the destruction they wrought before are now all running and flying away trying to escape the judgment of heaven

Azief saw all of this as his Divine Sense envelope the whole world.

And he smiles.

‘How could it be easy for you to just run away?’ He thought. Right now, this world is a prison. And he is the warden.

And he is about to punish those who are caught in his prison. Smirking, he said

'Today, there is no escape. Let the matter of the past be settled here today and let the matter of future also end here. I would squash these worlds desire to ever come here again'

He spoke and behind him, thunder shakes the sky and lightning flashed by.

#### [Chapter 779: Heaven retribution](#)

The power of the thunders is destructive and it seems to abhor Life as it seeks to destroy everything it sees and encounter.

But the destructiveness of the properties of the thunder did not affect the people of Earth Prime.

To the people of Earth Prime, what they saw was the Heaven is angry and send down thunderbolts and lightning to punish the invaders.

And the people who were fighting capitalize on this advantage.

Now the invading force not only have to run away from the lightning and thunders, but they also have to try to fend off the attack of the people they attacked.

But even then, this is still not over.

The Heaven Will would be exhausted and Azief also knows this. that is why he wanted to use it when he can and he will use it until it is empty.

He wanted to conserve his energy and at the same time deliver a powerful blow to all the worlds that is trying to invade Earth right now

He wanted it to be perfectly clear to those people. Earth Prime is not your playground. It is your funeral site.

Earth Prime is not some normal planet that you can come and go as you please without any consequences

Up there, the clouds boiled over and rolled all over like someone is pushing and rolling it as the heavens pour down a powerful force that restricted and weaken the enemy.

This prove fatal to magical civilization and demonic soldiers of the Seresian world. The shrieking that echoes all over the world at the same time prove this.

A demonic count who possess the same might as Disk Formation leveler would then drop down to the same power level as a Seed Formation. this content of novelfullbook.com, if you reading this content please go to website novelfullbook.com to continue reading, fastest update hourly

This force sweeps all over the world in a few second.

Azief could not maintain it for long since the power of Heaven is already quickly depleting.

But a few second is enough for Disk Formation leveler of Earth prime who is engaged in battle with these Seresian Demonic Count to deliver a powerful blow and kill them quickly

A few hundred Demonic Count were killed in that gap of few seconds.

When the Disk Formation leveler of Earth Prime had finished with their enemies, they would fly over to other sites helping the others.

This force only sweeps the world for three seconds but it changes the battlefield all over the world.

Now, there is only one third of the power of Heaven that Azief could use.

Azief smile. He is not done yet. He is only beginning.

'Rise!' He ordered.

And like the words is a divine decree, the world quake and trembled all over like something is about to come out from the ground.

All over the world, in places where the battle is the most intense between the inhabitants of this world and the invaders from the Otherworld, the ground cracked.

Like a surge of a tidal wave. fires and all kinds of thing emerge out from beneath the Earth. Cracks on the ground widen as these beings emerges out.

Fire Giants come out from beneath the Earth, created by the molten core of the world.

These Fire Giants is composed by the Wil of Heaven and it began to involve itself into the battle.

They emanate powerful heat that melted the enemies armor and burns some of them like they were in the presence of a sun.

Even from afar, they could feel the heat yet these heat are only targeted toward the invaders

Because they are not real Fire Giants like those fire Giants in Asgard. They are the fires of the world, taken the form of a giant because of the Will of the World decreed it to be so.

They take this form to protect Earth Prime.

their heat did not affect the inhabitant of the world but it would bring untold torture to those of others world invaders

At other parts of the world there is Frost Giants and some others are large vines that grows larger and larger and capturing the invaders with their vines and killing them by strangling them.

Azief laughed as a murderous gluing glimmering in is eyes

'I know I am the open that made this mess. But if the other forces in the universe wanted to take advantage of my mess, that is not something I could accept!'

His mod after the heaven and each of his action moves the Heaven and Earth.

When he spoke, his voice become Laws and when he is angry, a loud roar of thunderbolts would echo all over the world, summoning raging thunder that signify his anger and displeasure

The Nine Sword that is revolving around his Cosmic Law Body merged into one sword. The moment it merged powerful pressure descended upon the world.

Anyone below Seed Formation power level that is not from Earth Prime were hit by this pressure and they were all were falling down. If they were in the skies, this pressure forces them to dive down like they were slap from above by a powerful palm strike.

If they were in the ground, the land around their figure would be depressed as they would either smack their face to the ground or exploded.

All over the world, the scene of people from the Otherworld exploding shocked the fighters of Earth Prime

But everyone could see that the dark red skies are about to end, the curtain is about be lifted up and everyone know who make this move.

One of the fighter who just escape death because of the sudden explosion of his enemies shouted with gratitude

‘All hail Death Monarch! The strongest person in the world!’ the others followed. All over the world this scene repeated itself.

But Azief control over the Heaven Will was so precise that even though all the invading force all exploded if they were below Seed Formation, those who arrived at Earth Prime and did not attack or have evil intention in entering Earth Prime, they were spared just like the rest of Earth prime inhabitants.

This did not escape the eyes of the Earth prime inhabitants.

As such, they regarded those who were not attacking them and not being crushed by that pressure as neutral forces.

During the beginning, there were a few clashes between these neutral forces that were attacked by the Earth prime Great Powers because they thought they were also the same factions as the invading forces

But, Death Monarch ways of punishing and rewarding shows that they are neutral forces and there are hostile forces and differentiate the treatment between them

This is why Azief appears dazed when he arrived at the city before. It is not that he is thinking about unrelated stuff.

Instead he uses the Heaven Wil to relay to him all the people the foreign people coming from the other worlds so that he could decide which world they come from and whether they were hostile to Earth Prime or innocently were caught in the Multiversal Convergence attraction force.

The dark red skies, this Nightfall is slowly going away.

The thunder dissipated, the thunder beast also disintegrated, the Fire Giants and all the thing that come out from the Earth merged back into the ground.

The Night ended and the world seems to be reborn anew.

A golden flash could be seen flashing all across the world and wherever it passes the space rips closes up.

Beside the golden flash is a white flash that also flows the golden flash. But no one right notice that golden flash right now

What they notice is simple.

On parts of the world where it is night, they saw back the return of the shining sparkling stars in the night.

And in the parts of the world where it is day, they once again see the suns and see the white clouds and the blue sky.

And they all smiles and cheers

Because seeing the stars in the night sky and seeing the white clouds and blue sky in the day clearly as they are now, means the portals up there in the sky have all disappeared.

And now, they could see a gigantic figure of Death Monarch Azief wielding a sword.

#### [Chapter 780: Rampaging](#)

Azief then smiles and said to his titanic Law Body

‘Go wild’ Smiling, Azief take another step and disappears.

The space around him break apart like someone had slash a straight line on space and open up a crack.

Azief enters it and then the crack stitched itself up and he was no longer there.

But the Cosmic Law Body is still there on the African Continent, like a titan of old and he is about to move.

Its eyes shining with intelligence, the Cosmic Law Body swing the sword on his hand, and space breaks and powerful pressure gushed out from his simple swing, changing the colors of Heaven and Earth

Thunderous sound could be heard all over the sky as the sky quakes and all the clouds disappeared, a large gash could be seen on the space where the Law Body swing his sword.

The area around the city seems to be sweep by a powerful force but to those who is the inhabitants of this world, they felt a warm breeze while the invaders nearby all felt like they were being shredded by powerful force.

Before they could even scream in pain, their body were shredded by this forces and they turn into atoms before even they were destroyed into nothingness.

Laws of the world grinded them like a meat in a powerful blender. While some of them exploded into mas of gore.

Destruction and Creation coexisted and oppose each other at the same moment.

Cosmic Laws replaces the Laws around the African continent, and the people of the African Continent could now fight back

And what is Cosmic Law. To put it simply it is the power to create, shape and manipulate cosmic energies to produce nearly any effect that is desired.

Including molecular restructuring and transmutation of matter, the manipulation of matter across space and time, the creation of force fields, the creation of inter-dimensional portals and vortices, telekinesis, and cosmic awareness.

As such when the Law Body sweep with his sword, force fields seem to be erected over all the people of Earth Prime inhabitants.

Matter was affected as hills disintegrated and turns into sharp particles that scattered and kill tens of thousands of the soldiers of invading forces

The armor suits of those technologically advanced people were transmuted into other matters, leaving them defenseless and died almost immediately after being sweep by that powerful force.

The sword killing force sweeps throughout the African continent with Nine Laws that seems to replace the Laws of the world around the African continent.

These Nine Laws affects the entire continent, like establishing a new world order.

This time, the power of the laws is restricted around the African continent and its surrounding region. But while it did not affect the entire world, the effect is more powerful

It was like the Cosmic Law body had entrenched itself on the African continent soils and his might and power become denser and more compact.

The sharpness of these laws grinded the enemies into nothingness but aided the inhabitants of the world

Then the Cosmic Law Body thrown it sword.

His act of hurling the sword created a massive space tear but it was closed almost immediately when the Laws of Rebirth imbued in its eyes activated.

The sword scattered into nine light.

BOOM! A sky quake echoes in the expanse of the skies.

Then the nine light turns into a gigantic light pillars. It was as big as the Cosmic Law body itself and each light pierced the ground on nine different parts at the edge of the African Continents.

These nine pillars of light reached the Heavens and its light was blinding.

The Laws of the world around these nine light pillars were all distorted and turned into the corresponding Laws that inhabits the nine lights.

Laws of Time and Space were affected, Laws that governs Death and Life were also affected.

At one parts of the area, Life blooms without effort. While at one part of the African Continent, Death reigns and Life found no refuge.

Then a translucent barrier is erected with each connecting point is around the nine sword that was stuck to the ground.

These sword is not like normal sword. They are translucent but it emanates the power of Laws and changed the African continent where their influence reached

Turbulence of energy fills the African continent and even the top members of the African Alliance who was fighting on the other side of the continent could feel the aiding power of that titanic cosmic law power sweeping through them, strengthening them and weakening their enemies

The Cosmic Law Body then began twisting the Laws of the world.

All the space rips in the African Continent was extinguished at the same time and then the Cosmic Law Body began going wild.

It punches and in his strike, there is force of cosmic destruction as the space around him breaking down the moment the Law Body clench its fist, creating a void space.

All enemies around the cities were destroyed and even the beast who were innocent also were turned into dust.

It keeps hurling punches as the Nine Laws Sword is restraining the formation of the space rips and killing the invaders with the Nine Laws embedded in it.

Just because the Heaven Will could no longer be used doesn't mean that the strongest person in the world no longer have any moves.

That was just the beginning. Then to the shock of everyone, the Heavens opened up and comets and meteors is descending down toward the opening of the sky.

The demonic creatures were all shrieking in fear before the meteors falls down and a powerful eruption blasted off all of them.

But the force barrier that protect cities and people of Earth Prime still existed like an outer membrane that prevented them from being affected by the powers of the Laws of the Cosmic Law Body.

A storms of fires engulfed the continent and it cleanse all of the invaders from the surface of African continent.

When the fire and smokes subsided a second later because of the wave of the hand of the Law Body, they were no longer any soldiers of the Otherworldly forces and demonic creatures on the surface ground

All kinds of EXP flew to the Law Body but the Law body blows his mouth and these EXP of killing enemies and all kinds of beast were instead rejected by the Law Body and blowing it to the people of the African Continent. this content of novelfullbook.com, if you reading this content please go to website novelfullbook.com to continue reading, fastest update hourly

Some of the Pillar Forming levelers and Orb Condensing leveler immediately rises up to Energy Disperse Stage almost immediately and some even broke through to Seed Formation.

The people who broke through relying only on the energy and not through comprehension of their Grand Path probably would not be able to break through Disk Formation and Divine Comprehension later on but it is their choice to do so.

The Cosmic Law Body did not just create a gravitational pull to bring down comets and meteors hurling down from above the Heavens, but as he punches the area, stellar winds were generated

This are fast moving flows of material consisted of protons, electrons and atoms of heavier metals that are usually ejected from the stars.

Continuous outflow of these material is moving at a speed that exceed three thousand kilometers per second, grinding all the demonic creatures up there in the sky into bits and pieces that was reduced to their most diminishable state.

The Law Body is also capable of Cosmic teleportation as he uses his power to transport a few villages into some other places of the continent

With his power, the law Body could transport himself, others and objects anywhere in the Milky Way Universe.

But it is a pity that it is still not at peak level. If not he could able to teleports massive objects such as planets, stars and even galaxies.

If Azief could do this, he would probably easily just transport all of these world caught in the attraction pull of Multiversal Convergence into other planes of existence.

There were many powerful abilities that the Law Body exhibited as it keeps bringing down destruction and cleansing the African continents from the invaders. It is like a one man show now.

Even before, Death Monarch had never had been this powerful that he alone could change the tide of battle of a war of the worlds

As Azief left the African Continent to his Cosmic Law Body who were rampaging there, he appeared in another region.
