

## Shadow 851

### [Chapter 851: Who say he could not love?](#)

The sky seems to be separated into three and mystical phenomenon happened wherever you look up at the sky.

On some parts of the sky, there is golden clouds and golden horizons. On another there is red skies with no clouds.

And on another side, there is a purplish green aurora that seems to sway, ebbing like a wave on the sky, creating a haunting beautiful scene

The battle between Azief and the Demon King grows more intense as Loki could feel from the vibration of the ground that the entire world seems to be trembling.

Tremors occurs in all parts of the world and the clash between the two created multiple disaster as they did not fight on one place.

Instead they move each time they were hit. But each time they moved, what they left on their wake is destruction.

One could only imagine the kind of pressure that Azief and the Demon King is producing to create such tremor in this scale

After all, the current world had already expanded.

A small island is now the same size of a large continent before the Multiversal Convergence.

As such, one could imagine the size of Earth right now.

if Azief and the Demon King fought before the world had expanded, the All Source would probably have to expend a lot of its mystical power to make sure that Earth Prime is not destroyed entirely.

He smiles bitterly when he thinks about the All Source.

Even though Loki himself had never touch the All Source, he knew of its mystical powers and the stories about it.

It is probably the most powerful weapon in the entire Omniverse. At least that is what he knows about it.

As Number Seven, he is the most knowledgeable among the other six parts of his self.

Because of that he knows more thing. There is certain knowledge that he had sealed and had taken from his other self.

As he was thinking of this, a block of large boulder the size of a hill is falling down from the sky and is about to fall down toward the dome.

Yewa Hafar look at Loki but Loki just ignore it as the block of boulder seems to phase through the dome and exploded, creating a small tremor.

It exploded on the ground where they are standing at yet, there is no sign of damage around them at all.

Yewa Hafar frowned and simply said

‘Truth and lies, huh?’

Loki simply smirks and said

‘I pick a trick here and there’ as he continues thinking about other matters, ignoring Yewa Hafar once again.

Even though the battle seems to become more intense and the sky and the earth grows restless and chaotic, Loki seems calm like all of this had nothing to do with him.

He thinks. That is what he does when things become more chaotic. Of course, this trait of his is only developed later in his life.

When he is having a lot of thoughts, thinking made him able to clear his mind.

He had rarely opens his eyes this past couple of years to maintain his power. Now, that he had awakened, eh wanted to jog certain memories.

this is very important to him.

Memories are very important to him.

One could say that his memories might have the keys to the survival of the Omniverse. As such, one could not understand the burden of trying to make sure, his memory is still the same without much modification

Loki enemies is not only Yewa Hafar. It is the forced of the Omniverse, this invisible and unfathomable enemy.

Fate and Destiny would try to push back against him and Time would be a stumbling block for him as they would try to correct the probabilities of the future

That is why, Loki memories is probably one of the most important thing in the Omniverse right now and even just by going out from his hiding place, he had put a risk into that memory.

Because even one part of the memories missing could affect the big picture.

But he had to be careful not to shows that he knows.

After all, his other self they are only given part of the mission. They know the endgame, yes

But they don’t have the knowledge of all the events. As such, their views on things might be incomplete

Some of the memories was taken from them so that they might chart a new path. And this is one of Loki toss of the dice.

The Seven Loki’s are all him. They have his feelings and his desires, and in all intent and purposes they are him.

He believes that he need to introduce the unpredictability of himself into the equation of the probability of the future.

If he is the mature Loki meeting Azief in that forest in Malaysia a couple of years ago, the things that he had done might be different

But the more different he became, the odder he became, the more the probability of Time would backlash against him.

Magic had appeared the moment the All Source landed on Earth. It might recognize him as a threat if he shows too much oddity.

Loki had never dare to treat All Source as some kind of unfeeling tool. Those who have tried to treat it like a tool have all suffered terrible fate

Loki plans of separating himself into seven parts with each one having one part of the memory requires him to trust someone. He had to trust someone he had never trust before.

And who is that person? He, himself.

He sometimes thinks of that decision as either one of his most brilliant scheme or one of his most misguided one

He had no guarantee whatsoever that the Loki that separated from him would not develop other thoughts. this content of novelfullbook.com, if you reading this content please go to website novelfullbook.com to continue reading, fastest update hourly

If they do develop another thought, this did not mean that Loki would be angry. After all, the experiences and the new ideas that they might find along the way might even surprise himself.

Yes, Loki was hoping for something with this plans of his. He is searching for hope. Because unlike the other six that separated from him, he knows the entirety of what is about to happen and all the details

He knows many secrets of the Omniverse that his current incarnation did not yet learn and he knows the ending. And because of that, he is a hopeless person. He had no hope.

And he wanted to bear it because it is not a baggage he could give his incarnation which would demotivate them.

He sometime even envied his other self that do not have the full knowledge of the future.

Because they could move forward without hesitation, just by relying on that hope.

Number Seven Loki had decided from the very beginning, that hope could be a source of strength but it is also a source of suffering

As such, Number Seven Loki decided to take all that suffering and gives that ray of sunshine of hope to his other incarnations.

He on the other hand had no hope left. And for those who have no hope, they die a slow death, like a tree in fall, shedding each hope like leaves that fall to the ground.

Yet, the other season never come. It is an eternal fall and there is nothing more tiring than living without hope.

Loki simply knows that the hope he has is simply a delusional hope and for that, he abandons it. Yet, at the same time, he could not completely abandon it.

This contradiction in his mind and in his heart is what created the plan of separating his memories into seven parts, dividing it into seven incarnations of himself

The other six is his hope.

Maybe when all of them united once again in one body, Loki might reach a new conclusion.

He might see hope

He sees the end and as such there is only despair in his heart that he could not console. There is no drink in this Omniverse that could make him drunk enough that could wash away his despair.

When he awakes, he despairs.

When he sleeps, ghost of old friend visits him.

On the days, when he sleeps and there is no ghost of the past, he would dream of the good old days.

He dreams of some slice of happiness, a few moments in his life where he was relaxed and not in a constant struggle with himself and others and then when he thought that the dream is going to be a good one, when he thought that he could forget for a while of the despair that waited for him in the future, he saw all the destruction all over again

Loki is not some kind of unfeeling bastard. He is cunning. He is sly. But who says that cunning people and sly people could not love?

His love was not the kind of love like Azief love triangle with Katarina and Sofia that dragged on for centuries as he goes back and forth between them

### [Chapter 852: Truth and lies](#)

Azief, Katarina and Sofia love triangle dragged on for centuries as Azief wrestle with his own feelings.

Of course, this timeline, it is bit different while still have that same plot.

The meeting between Azief and Katarina happened earlier and Azief was not as dark as he was during the original timeline.

Many things have changed but the three people still tangled with each other. Love is also a form of destiny. And that is probably that is the destiny of three people.

If they were normal people, the matter might not have dragged on for centuries

The matter exacerbated as they become godlike figures, as each of their action affects things in the global and universal scale

Just look at Katarina and how she punished Annika. Or when she wanted to vent her anger and frozen an entire continent in her wrath.

Azief indecisions that lasted for centuries birthed so many events and tragedies. The last straw is probably the death of Katarina in the War of the Sovereigns which led to God of Death to enter the war and kill Oreki and Hikigaya and wounding the others.

Sofia had also felt sad at that event and she said that by dying Katarina had seared herself into Azief mind.

She could not fight against a dead person locked in Azief mind. It was a tragic day that Loki remembered all too well.

His love was different than the dramatic romantic love that Azief had for the two ladies

Loki love was a simple one but depending on some people his love is even more hard to understand for some people.

It is the people he met in his journey, the people who shares a connection with him. The people he saw in the taverns. Those people that had helped him and save him.

Those that gives him a bit of kindness in a cruel hard world. The people that fight alongside him, the people that sacrificed their life and time for him.

It is something he did not understand until it was too late. And that regret shaped him and changes him in the later years

In the original timeline, many people hated him but if all the people in the world hated him, why was there a temple dedicated to him in the Norwegian community?

Why was there people who worshiped him and burns offering for him? Pray to him?

Because, he was the only Sovereign that walk among mortals. Those other Sovereigns live high up in the Heavens, some created their own personal realm, giving access only to their chosen

They were high up above the air, but mortals live on the ground and could only look up to them.

Even if they fly up and went out from Earth, even if they fly for thousand years, unless those Sovereigns open the door and guided them, they would not be able to see the faces of the Sovereigns

But Loki was different. He was among them. He could easily be summoned. People could make deals with him

What he asks for the price of his help is always steep but it is fair. Because those who makes deals from him, always needed the deals more than he who did not need it.

He was a different kind of breed than the other Sovereigns and while some make fun of his status, many of the common people regarded him as the god that fight for them... and the one that is closest to them

And while Loki had never intended to be like that, in his later years, he was not that bitter against the world.

He would sometime go to Elysium and visit Annika.

Other times he would go to Neverland to talk with the always sorrowful Jean, or play around in Oreki Thunder realm, and he sometimes sneak to Hikigaya Illusionary World and surprise him every once in a while.

Of course, after the War of the Sovereign, he rarely visits anyone anymore.

He thought of all of this memories of the past and he could not help but sighed.

to him it is a distant past.

But to the people of this world, none of that had happened. It might not even have happened in this timeline.

When he thinks of this disconnect, he immediately felt like he was alone in this world

Though, he does know that Erika also have seen the future. But what she sees and what he sees is different.

And Erika has always been an optimist which is odd considering the doom she saw in a daily basis.

She is probably the most hopeful. It takes quite the strength of the heart to remain faithful even though there is so much evidence to the contrary.

He looks toward the direction of the north and his eyes seems to travel though the distance and he saw Erika in a continent far away, sitting under a tall tree.

She appears very lonely. It is a loneliness that Loki understood.

Though, the heights of the tree did not appear that tall now that the distance between the sky and the ground seems to expand

But he could see her there, still waiting.

On that area below the tree, Erika felt the sensation of being watched and then she smiles as she too looks at the direction of Loki. She could not see anything because of her cultivation level but she does sense Loki

Loki saw her smile and he shakes his head in regret.

“Hope... it is that hard to find’

That is one of the reason he separated himself into seven parts.

The other reason was that he fears that he would go too fast, that he would become impatient and as such ruin the grand enterprise

Some thing would change if the person doing it won't know what would happen later. Other times, there are memories that is given to his other incarnation so that it could serve as a guidance.

Whatever the case, each Loki understood this.

They get as much memories that they needed, not too much and not too little.

If it is too much, ten many more memories would be erased by the effect of Time Correction. this content of novelfullbook.com, if you reading this content please go to website novelfullbook.com to continue reading, fastest update hourly

If it's too little, then there is bound to be mistake in making the plans and setting up scheme. Even if Number Seven lies to them, in the end, it is number seven lying to himself.

As such, even enemies would find it hard to find Loki true endgame plan. It is quite appropriate for Loki to create such a plan.

He is after all in the future would become the God of Lies

But he is also the God of Truth. That is the duality of his power

Since he is able to see through all lies, he is then able to see all the truth.

This kind of statements in some kind of Zen statement but that is the ability of Loki powers. No one could lie to him. Of course this power was developed during his later years where he was more mature.

If Hikigaya eyes could see through all illusion and create all kinds of paradises and hells and turning illusion into reality, then Loki ability could even negate Hikigaya ability.

Because he sees all truth, all realities and could discern what is fake, what is false. Thus it is only appropriate that he probably even lies to his other self, and dangle the truth a bit so that his other self could be guided

It is not like Loki wanted to lie and do such a complicated way and scheming against himself

It is only because of Time Correction and Time Backlash that would visit him that he had to make such a method

It is a safe way so that the memory would not get eroded by the Time Correction.

Even now, as he is standing here, protecting Yewa Hafar from the pressure of that Wheel, Loki is worried that Time would find his trace and began correcting his memory to achieve Time Balance.

Jean had explained all of this to him before he went back in time so he had been always maintaining a cautious attitude when he went out from his hiding place.

Most of the time, he is in slumber.

With little to no energy emission and energy absorbing, even Time would not be able to find his trace when he hides so deeply beneath layers upon layers of dimension, lost timelines and fractional space remnants

BOOM!

Another tremor echoes all over the area.

Yewa Hafar look at Loki and said

'Still staying?'

Loki smiles and said

'Are you thinking of using Time to threaten me?' Then Loki said

'All Source is still here. And it is still strong. That would at least hold it off for a few moments if the backlash is about to come'

Yewa Hafar become silent and said nothing else. Loki on the other hand, now think about the All Source.

The area around him is becoming even more chaotic.

Every once in a while a few boulders and blocks of the earth would fly over and landed around them but because of the dome nothing happened to Yewa Hafar and Loki

#### [Chapter 853: The lore of etherna](#)

The sky cracks even more and rift of space could be seen opening up in the sky.

There is tsunami reaching an all-time high that probably break all records of the past tsunamis before the Fall.

The entire sea is rumbling and the sky seems like it is about to fall down

Fifty meters high tsunamis are ravaging many parts of the world, flooding continents and some newly born island.

On some parts volcanoes is spewing its lavas and some exploded into smithereens, its volcanic clouds fill the world for a brief moment of time only to be dissipated a moment later when Jean passes the area and take control of the situation.

The three powerful being is fighting and the area of their fighting widened.

Without having to worry about the collateral damage and the casualties of normal people, Azief is using all of his power without holding back

The Demon King also seems to be hurt. But Loki could see that the Demon King is only getting started.

This is not enough.

This is the indication that the battle between Azief and the Demon King is getting even more dangerous.

There is also an aura of time that enveloped the world, no doubt the work of Jean. Hikigaya on the other hand still did not reveal himself.

Loki also pays attention toward the sky above. The space rips that connected Earth Prime and the other dimension has already been cut off.

As such, it is freeing up Orvanians relief aid. They could now focus on helping Azief to subdue the Demon King.

Loki bets, that Sith'venar is full speed ahead in heading toward Earth.

He could see that the Orvanian fleet is surrounding the entire orbital area of Earth. There must be thinking of sealing the world using their technology and aiding Azief.

They are fast approaching. Azief must have known that the Orvanian is coming as that must factor in his decision to fight against the Demon King.

That would surely bring him more advantage against the Demon King.

The Demon King had also seemed to realize that the Orvanians is coming and began fighting even more brutally.

And that is the cause of all these disasters all over the world, godlike creatures duking it out with each other this content of novelfullbook.com, if you reading this content please go to website novelfullbook.com to continue reading, fastest update hourly

It is nothing like in his future where such massive battle was a thing of the past when the Sovereign was in charge.

Of course, this excluded when the Sovereign itself was fighting since their battle could affect the entire Universe and the Omniversal dimension

Azief, Jean and the Demon King are all absorbing the energies of the world to supplement their attack and one percent of the energy of the world had been drained by them

That itself is a large amount of energy that could power ten thousand planets energy consumption for trillions of years

All Source power is being used at an enormous rate right now.

But probably because the world had expanded, the rate of regeneration of energy grows faster and it is still at a manageable level.

If not, those three beings might exhaust all of the All Source energy for this cycle in one fight.

'The All Source is working hard' Loki thinks to himself.

It is quite laughable when one thinks of it.

Many people on Earth Prime that knows the existence of the All Source treated it like it is a source of Life and there were not particularly wrong.

After all, in the All Source, there is the Life Formula. It is something that the Destroyer had wanted.

It is promised to him. As such, that is why the ending would not change. But something happened at the End.

For one brief moment, Jean managed to manipulate Time, Space, Destiny and Fate to be subverted

In that one moment, Jean take that opportunity to create a timeless space where he and few others created a plan to save the Omniverse.

In that timeless space, they debated the matter for probably days or weeks. Loki could not really tell because the lack of any sense of time inside that space.

Of course, only Jean had such capability to create such space before they all die in the blast that the Destroyer had created that engulf the entire Omniverse.

Of course, the scene of them dying is not something that Loki had manage to see. Since Jean successfully reverse Time, it means that they did not die. Jean hits the reset button and everyone had a second chance

They listed all the probabilities of the thing that would happened if they send someone back to the past and change it.

They have to factor in everything from the existence of the Creator and Destroyer, and they also have to factor in the probability that the Destroyer and Creator would not be affected by the Time Reversal because of their inherent quality of creation

The Creator and the Destroyer lives outside of any Laws of the Omniverse, free from the restrain of Time and Space and so normal logic don't apply to them.

Those two had to be factored in since they are related closely to what happened.

As for the other Supreme Beings, some of them would probably affected more than most but Time Correction would find ways to erode the memory of the Time Reversal

They also brainstorm all kinds of ideas to reach the best possible ending.

The plan to kill Azief had been brought out many times in those endless discussion. Sofia who was at the table vehemently argue against it.

They also factor in that the Destroyer could not directly teleported itself towards Earth Prime.

There is the fact that for the Destroyer to repeat back his victory in that other timeline, he had to let certain things happen.

When the Time Reversal started, the Destroyer who had already won was back at his current position, slumbering in the Void of Nothingness

Everything started again, so his victory was voided.

The Destroyer who already know what would happen did not immediately goes to Earth. The reason is simple.

It is because Odin and Zeus did not yet release the All Source to Earth Prime.

When the All Source was released, The Destroyer awaken as he should be. The ancient promise fulfilled.

That was the promise. His final victory.

Even now Loki still did not understand what it means by the ancient promise.

the Destroyer clearly promised with someone. But what is the content of that promise and why is it had to do with the All Source is still something that Loki doesn't knows.

While many of the mysteries surrounding the matter had been uncovered by him because of what happen in that timeless space there is of course things that he doesn't know and one of that particular matter is the promise of the Destroyer and the content of that promise.

The Destroyer is following the script because this script is beneficial for him. Other people might think that they are the main character in this story but the main character of this story has always been the Destroyer.

All of things in the Omniverse is destined for a great destruction, a reckoning, an End.

And who is the one that is going to put the finishing touch to this story? It is none other than the Destroyer

As such he is the main character. It is why he moves according to plan. In the original timeline, he did not know where the All Source ended up with.

And when he did, he knows he could not take direct action to take it or reveal his presence because contrary to many popular belief, the All Source is not simply a tool and a weapon.

If Loki had to describe it, it is a sentient weapon.

The Destroyer follow the plot because if for some reason he deviated from the plot, then maybe, the direction of the story might shift, and the more it shifted, the more it would affect the predetermined ending.

It is quite a chore to think what that Supreme One is thinking.

There is something that could be gleaned from some of the things that Loki had found in his journey

He saw the Supreme One in many ancient murals of long lost forgotten alien civilization.

Most of the time, he is depicted as a ball of light, other times, there is shapes or symbols, as one could not really describe what He is, and how he looks like

In the many ancient murals of buried alien civilization, around the epochs where the Ethernas had existed, there is trace of this Supreme One.

No one seen his face and he is described sometime with symbols, other times in words, but never in appearance.

These ancient murals are all scattered in many places all over the Omniverse.

probably for such a being, he could take any appearance he wanted.

Though, that was not the focus of the murals.

The murals had always focused on the fact that this Supreme One, had created all of the planets and stars and plane of dimension known to the Universe

And each murals seems to tell a story. And yet, no matter how many of these murals or tablets that he had found in his journey, there is one story that is the same.

When Loki was Sovereign, in an effort to become stronger, he had scour the known Omniverse, ending up in many dimension and universes.

Some of them are even Universes that was cut off from the main Universe.

it is there where he found the lore about the Ethernal story.

#### [Chapter 854: A wind that slowly blows \(1\)](#)

Most of the murals and ancient lore about the matter agree it is the rebellion of Ethernal against their Lord that had precipitated the creation of the All Source, the source of all energy, laws, concepts and anything imaginable in the Omniverse.

It is a weapon that could only be wielded and used effectively by the Creator and Destroyer.

In the long lore of the All Source, no one had the ability to wield it for a long period of time before dying of excess of knowledge and power.

As such, even the Seven Intergalactic Powers did not dare to touch it that much even when it was split into seven by the Elder of the Universe.

They even contained them in some magical cage so that its effect is lessened.

The Elder of the Universe ability to wield the sacred weapon is probably because of his status as one of the followers of the Creator.

He sighed a bit. He thought to himself that this is still a faraway event but he had to prepare early.

That is how he stays ahead of Yewa Hafar. The All Source would play quite an important role in the Yrinia event and during the End.

And Loki had also realized that the seed to the New World War had been sowed. That virus that Feng Jing had spoken with Hirate, that must be the experiments of the Magician.

It only took Loki a few seconds to connect his memory with the memories of his other six. Now, there is only five since Number One had merged with Number Two.

As such, the memories and knowledge about a sickness and disease appearing in the Asian continent had also fills his mind and he immediately knows who is responsible.

The flu like symptom and the rate of infection that affects even levelers, that must be the early experiments of The Magician to create his weapon.

The New World War is induced by him. Loki would leave it to his other incarnation to deal with this matter.

But it is quite alarming to know that the event is already fast approaching. He sighed as he continues looking at the Wheel in the sky that cover up the sun above.

Loki do watch the battle but he is most preoccupied with the Wheel that is slowly spinning on the sky.

On the other hand, Yewa Hafar is more interested in thinking about the next step. Especially his consideration against Loki.

He did not ask much question toward this particular Loki and did not provoke him because of these considerations

Yewa Hafar consideration is mainly because this Loki, the number seven Loki is not someone he could kill even if he uses his full power. Number Seven seems to possess a Sovereign Level Will form.

That alone is enough to swat him into a beaten meat flesh.

That would be actually the best ending when meeting such powerful expert.

If somehow Loki captured him and torture him in some kind of prisons for souls, that would be a fate terrible than death

To Yewa Hafar, death is never the end since his Master is the Source of all destruction and death. If he dies, that would not be a true death for him.

As for Loki, at least this Loki, he knows a lot more than the Loki that is fighting against Jean and the one who had taken the blame.

One could say he knows everything and what is about to happen. He is Number Seven. The one with all the memories.

Like Loki, Yewa Hafar also made some calculations and collect his information about his enemies.

In the world right now, he only regarded Loki as his enemies. It is ironic though that because of the things that they knew, their relationship is very dynamic

At time, Loki and his objectives seems to coincide with each other

Other time, the objectives that they held clashed with each other.

It is clear to him that Loki want to retain some of the original timeline events and change some others.

As such, their position is very different yet at times it could be reconciled.

Yewa Hafar goals is to make the timeline as near as similar as the timeline where his Lord is able to descend and fulfill the ancient promise.

In the beginning, he believes that Loki action were all in the effort of stopping his Lord from descending.

But as he slowly understands this enemy of his, he began to see some discrepancies with that idea this content of novelfullbook.com, if you reading this content please go to website novelfullbook.com to continue reading, fastest update hourly

It did not appear at all like Loki is trying to hinder the arrival of his Lord.

But it doesn't seem that he is actively helping him either.

This back and forth position that Loki had taken had made him very confused.

He then reaches the conclusion that Loki objectives sometimes could serve and benefit him and at other time could severely impede him.

He doesn't know if this is some kind of strategy to confuse him or it might be that Loki had actually from the very beginning have some plans that Yewa Hafar could not think of.

As such, with Loki by his side, Yewa Hafar is very cautious in his actions and words, fearing that he would reveal something to him.

And this Loki is not the same Loki he met at that island. This Loki seems to have an air of mystery around him that make guessing his thought almost an impossible matter.

He rarely comes out but now he had come out the actions that he took is very mysterious and puzzling

Yewa Hafar is without a doubt, the enemy of not only Earth Prime, but all of Universes.

He wanted to welcome His Lord to Earth and by doing so, starting Annihilation of the Omniverse

Thus, the action that Loki took is very confusing.

Loki also did not immediately kill Yewa Hafar because he knows even if he kills Yewa Hafar nothing would be achieved.

Instead it would free Yewa Hafar from his current host and enter a more pliable host.

It is clear that even though the soul in that body of Yewa Hafar hibernates, once an external pressure that affect the soul of Yewa Hafar is used, that soul could restrain a bit of Yewa Hafar movement.

To Loki, this is nothing short of a weakness

At that time, during the final battle, he was shocked to know about Yewa Hafar but he was also caught blindsided because of him.

He did not know much about Yewa Hafar and as such he lacks the corresponding knowledge to restrain Yewa Hafar.

He is not going to make the same mistake again

But now, it is different.

Loki knows a lot about Yewa Hafar. At least a lot more than before.

Killing him would only enable him to possess others and he had to once again compile his data on Yewa Hafar.

And killing him would inform the Destroyer.

It is not good to have the eyes of the very personification of All Deaths and All Destruction to train His eyes on him

The wind blows again as they saw an entire island was pushed down back into the ocean by the pressure of the Wheel in the sky

Loki smiles bitterly. The island was just about to be formed but because of the pressure from the Heaven is was pushed back down.

But that is the only feeling he felt. A bit pity and nothing more and nothing less but then he looks back at Yewa Hafar.

The wind blows harshly around them and they could see tornadoes are forming in the distance. The entire sea is stormy, everything was in disarray and in constant state of danger.

‘Why?’ that is the question that comes out from Yewa Hafar mouth.

#### [Chapter 855: A wind that slowly blows \(2\)](#)

Loki heard it and there is a bitter smile on his face.

Loki did not immediately answer Yewa Hafar question instead he look at the distance, seeing that Wheel up there in the sky, covering the Heavens and seeing the three heavens on the top of the heads of the titanic figure of those three beings and he scoffed

‘Because Heaven now has its eyes everywhere’ That was his answer to Yewa Hafar. Listening to this, Yewa Hafar immediately understood.

‘Death Monarch had already reached this level?’ Yewa Hafar said to himself and then he nodded as he understood something

‘You did not do it for me. You did it for yourself’ Yewa Hafar said

Hearing this Loki once again chuckles

‘Of course I do it for myself. How would I selflessly do it for you?’

Yewa Hafar finally understand what Loki is doing.

With the current power that Azief is wielding, there is only a few things in this world that would be concealed from him.

If he did a Divine Sweeps all over the whole world, and saw him, a peculiar case of two souls in one body, he might get moved to investigate.

And with Yewa Hafar current level, it would be hard to escape Azief grasp. If he however did able to escape, this would only have made him more interested.

As such, sooner or later, things would crack up and heavenly secret would be revealed. And there would be more changes happening in the timeline.

Both of them probably don’t want that.

Yewa Hafar plan is quite easy than Loki task.

Yewa Hafar only had to make sure that things happen as it was supposed to happen. And even fate and destiny, this two intangible forces that exist is giving him a push in the back.

Even though there are slight changes, with his prodding, he could make it once again stay on course.

But what Loki is trying to do is undoubtedly harder because he is not only trying to change certain things in the timeline, trying to subvert destiny and fate he is also trying to balance it out.

As such, the ball has always been in Yewa Hafar court. The advantage has laws lied on someone who is trying to keep the status quo. But it is clear, that Loki is slowly chipping away at that advantage.

Loki plan is very ingenious.

If from the beginning, he tried to change the timeline with drastic action, Time and Destiny would become stronger and it would only push Loki more and might even lock into a future probability

But...by slowly changing certain things, like a wind that blows slowly and then turning into a storm, Loki act of small changes is slowly making Yewa Hafar in a disadvantageous position.

If the storm is too big, Destiny and Fate had to make a correction that would change the future possibilities.

Loki is also managing the risk right now.

Yewa Hafar knows that his position could have been revealed when he was in pain before.

Most of the time, he is concealed and even Azief Divine Sweep would not be able to find him.

But that is different when the Wheel of Reincarnation and Rebirth is brought to the equation.

In that moment where he was experiencing pain and torture in his soul, that moment, his entire concealing spells around his entire body had broken.

If Loki came a little bit later, Azief, Jean and that Demon King would notice him.

Azief would probably notice him because of the Laws of Destruction that is in him.

Jean would probably notice him because of the weird Time Path around him and as for the Demon King, he would surely be attracted to the Laws of Destruction that he possesses.

And there is still Hikigaya that is hiding in the Laws of the world. Loki could see that Yewa Hafar had understood so he simply said

‘Now, that you know, just stay still and look at how the battle unfolded’

Yewa Hafar only snorted and said as he looks at that Wheel up there in the heavens and said

‘Things.... have changed a bit’ Yewa Hafar said. Frowning, Loki said

‘A lot actually.’ Smiling Yewa Hafar reply back

‘Still...just a bit. There is still room for correction’ Loki hearing at Yewa Hafar laughed and said

‘Good luck with that. With so many changes, it would be hard for you to correct it. Though, you are welcomed to try’

Yewa Hafar look at Loki and laughed. Loki look at Yewa Hafar and smirks.

Both of them is confident that when the last chess piece is put down in the chessboard, the winner would be them

>>>>>>>

The creaking sound of the Wheel sounded again and Yewa Hafar shows that he is uncomfortable with the sound

There is only slight pain in his head right now but that did not mean the pain did not feel painful. Yewa Hafar look a Loki trying to maintain his sanity before calming down as the Wheel rotation slow down more.

He then said

'I thought you would prefer it to remain at least...controllable. If all the events of the future become so chaotic, that wouldn't be good for you too'

Loki smiles bitterly and then said

'Order and chaos. Sometimes, chaos is an easier way to reach my objectives. I only advocate order, when the chaos is too chaotic. But.... there is always an exception to everything. As for, your assessment of my plan...' and Loki smiles mischievously as he said

'Are you really sure what number one told you....is the endgame for me?' And then Loki laughed as Yewa Hafar frowned.

'The ending would be the same' Yewa Hafar said

Smiling, Loki simply said

'Time will tell' They both remain silent after that. The power of that Wheel becomes even more powerful.

And with the Demon King and Azief fight intensifying by the second, the damage that they will inflict upon the world would surely be at the level of apocalyptic level

They could even see the starry skies in the sky now.

Maybe because of the size of Earth right now, or maybe because of the energy that flowed around it that the coldness of space did not enter the world

Though it might also be because of Jean's effort of minimizing the damage that is being inflicted to the Earth.

Even the surrounding area around them becomes even more dangerous as it seems like this place is about to crumble.

But Loki did not teleport Yewa Hafar away.

There is no need to now.

Instead they keep looking at that Wheel, and the pressure of that power doesn't seem to be able to pierce through that dome.

Loki only smiles as he knows that Number One's task is completed. Number Two would begin his mission. All the memories of number one would be transferred to number two.

Loki knows that this is the few ways he could take to deceive the Time Correction of the Timelines.

If not, there would be a lot more than he had forgotten. Simply sealing his memories would not be enough.

There is a reason why you don't see Sovereign or supreme being keep messing with Time. Time Correction is a very scary thing

The Time Correction did not mean only Time would be against the change.

Destiny and Fate also would bolster the Time Correction, to make sure the path runs smoothly, as it was intended.

Supreme beings and Sovereigns especially would usually cut off the path to the past so that nobody could travel easily to the past from the point of time that they become Sovereign. this content of novelfullbook.com, if you reading this content please go to website novelfullbook.com to continue reading, fastest update hourly

This is because the path to the past lies the weakness of Sovereigns and all of those powerful Supreme Being

For those who have powerful Time powers, when they saw Sovereigns and who became enemies with these Sovereigns, some of them must have thought "I could not defeat a Sovereign in their peak power, but surely I could defeat them in the past, right?"

That is true and that is the most possible way to kill a Sovereign if you are not a Sovereign or a Supreme Beings yourself.

But why was such thing did not happen?

Is it because when they were erased from the timeline, no one remembers their name anymore?

No!

That is because even before there is such people thinking of such thing, Sovereign had already thought of it and make countermeasures against it

Sovereigns, they usually seal part of the Timeline of the past especially one that is regarding their own past.

It made the Time Tunnel leading to the past ten thousand times harder. And even Jean in the future had strengthened the Time Tunnel so much that it is nearly impossible to travel back to the past without Jean Time Key

That is why it is easier to travel from the past to the future than it is to travel from the future to the past.

Because future world is constructed based on the likeliest probability of the choices of the past and such could be regarded as an always changing key.

As such, one way or another, one could find "a" future as long as they went into the Time Tunnel

Logic would dictate that it would be easier to travel to the past because the past is already written and as such it is a stable Time area compared to the future where it is not at all stable and subject to change (even though the change itself is predicated upon many factors)

But when does the Sovereign ever played with logic?

They defied logic and as such, anything that is unexplainable could be attributed to their power and abilities.

Loki knows this because he is also a Sovereign, even if he was an incomplete one.

Then he laughed at himself.

To say he is incomplete would be a bit insulting.

He did not follow the most orthodox path to become a Sovereign but that is because those Sovereigns before him ripped the Will of the World

The most accurate term was that he is a unique existence among the Six Sovereigns. His deals once it is signed, holds power over everything else

As long as he is doing it to uphold the deals that people made with him, he would possess an almost unlimited power from the sources of power that resides deep inside each and every fiber of atoms in the Omniverse.

As the wheel moves, these enemies stand side by side, the scene look like they were close but the truth was that they were each other nemesis, looking in the distance.

Loki knows he at least had to maintain this dome until the Wheel disappeared.

Yewa Hafar on the other hand is thinking in his head. He could no always be this passive.

He must create a way somehow to lessened the effects of the Wheel and improve his concealing abilities.

If not for the fact that Loki had already got his hands on The Helmet of Invincibility, he would surely like that item.

Hades Helmet of Invincibility is a top notch concealing artifact that could hide someone from even Divine Sense of powerful beings.

Unless Azief become Sovereign, those who wear the Helmet of Invisibility could hide himself from him

With all of this thought, they look at the sky.

At the same time, there is another place that was affected because of the Wheel.

#### [Chapter 856: Whales and shrimp](#)

In the beginning of the battle between Azief and the Demon King, there was someone that would probably be remembered for his contribution to humanity when the battle ended.

That person is Lee Sangmin the Arrayist Sage.

No one could possibly have though, that someone who is known to maintain a low profile all of these years had somehow managed to do such a big move.

And his deed?

The mass teleportation of humanity, saving countless lives in the process.

The Mirror Dimension is the place where puts these people.

Of course this is a stopgap measure. This mirror dimension could not be sustained forever.

As for the duration of the Time Limit, even the creator itself, Lee Sangmin don't know. Because he had made it using the characters and these character is extracted from the wishes of the people.

It depends on the will of the people in the mirror dimension and their will.

It is fueled by their desires, wishes and their hope.

All seems good but the Wheel that Azief had summon had a profound impact on the Mirror Dimension.

It seems to bypass those restriction of the spell and the concepts that is embedded in that mirror dimension.

The Mirror Dimensions that Sangmin had created is also affected by the reality breaking pressure of the Wheel

Even Lee Sangmin himself did not expect such situations.

And Lee Sangmin who is now at some other places could still feel the change in the Mirror Dimension even though he himself was not inside the Mirror Dimension

'Something is happening' he muttered to himself as he is frowning.

Whatever that is happening in the Mirror Dimension, Lee Sangmin is quite sure that it had something to do with that Wheel up in the sky.

He tries to access his power but he is still too weak right now after the successful creation of that dimension.

The dimension that he had created is based on wishes. It is one of the most powerful thing to base a formation with but it is also highly unstable and at times hard to fathom

And with Lee Sangmin current condition, he could not make sense of what is happening in the Mirror Dimension accurately. this content of novelfullbook.com, if you reading this content please go to website novelfullbook.com to continue reading, fastest update hourly

He stands there on the grassy plains and began absorbing energy while Warp is standing beside him, also doing the same thing.

They were prepared to run and teleported away at any sign of danger.

They after all saw how destructive the power of the three titanic beings in the area which used to be the regions of the North American continent.

Now who know what kind of region that is after the expansion of the world. the geography of the world had changed again

Lee Sangmin worries about the Mirror Dimension is warranted

Because there is something wrong with the Mirror Dimension right now.

The Mirror Dimension is slowly cracking at the edges of its reality lines.

The reality lines are the lines where the true reality and the mirror reality intersected. When these lines touch each other, then the Mirror Dimension would collapse.

Before Lee Sangmin created the Mirror Dimension, he also created a few laws that is embedded in the reality lines of the Mirror Dimension.

These reality lines contain the Laws of the world inside The Mirror Dimension. One could say it is the code that maintain the stability of the Mirror Dimension.

That is why even though Lee Sangmin was the creator of the Mirror Dimension, even he was not able to enter his own Mirror Dimension, because one of the rules of the Mirror Dimension was that no one above Seed Formation could enter it.

This is not because Lee Sangmin wanted to exclude saving more people. It is that the energy of Seed Formation leveler would cause the Mirror Dimension to overload.

If there is only one Seed Forming leveler or ten, it would not be such a big deal.

But if there is one thousands of them or even ten thousand of them? Then the Mirror Dimension would be unstable and crack even faster.

Lee Sangmin ideas and the successful creation of this isolated but connected dimension had saved a lot of people.

And those who were in the Mirror Dimension had seen the destruction that is being wrought by these three powerful beings.

The could even see it more clearly than the people in the real world because in the Mirror Dimension, nothing would happen to them.

They could see it without being clouded by fear or the light works that happen when the three beings clashed with each other

They hardly even fight intensely, but the clashes had already created space rips, disasters, calamity all over the world

While they were in the Mirror Dimension, everything mirrored the real world except that none of the effect and disaster that happen in the real world affects them

They clearly saw that if not for Lee Sangmin and Warp cooperating with each other and teleported all those below Seed Formation, the collateral damage would be astronomical.

They are babies, old people, young kids and many more of such people that was spared of such collateral damage casualty because of Lee Sangmin effort.

The people inside the Mirror Dimension was perplexed, puzzled and some of them even panicked at first when they discover that they are inside a mirror reflection of their world.

But then when they saw the destruction that could be inflicted by Death Monarch just by a punch of his and the kind of damage that the Demon King could do just by moving his feet in the seabed, they

sincerely pray to whatever Gods there is up there in the Heavens, that the Mirror Dimension would hold and would not break

When they saw the sky inside the Mirror Dimension cracks, they saw light. But the people inside the Mirror Dimension did not feel good seeing the light

Usually light would be associated with happiness, when the people inside the Mirror Dimension saw light from the cracks, they fear and they trembled in the anticipation of a disaster. The crack grows wider in the sky and they become even more afraid.

This is because while the Mirror Dimension is a mirror reflection of the world there is a bit of difference. And that difference is that in the Mirror Dimension, everything is gray colored.

Like they are stepping into a world of black and white.

But suddenly there is golden light entering from the cracks of the world in the Mirror Dimension

How could they not get freaked out?

They knew that the Mirror Dimension is cracking because of that Wheel.

Even though they could not feel the power of that Wheel, because they were separated into a different dimension, they could see the effect it had on the real world

The cracks that is happening all over the skies and heavens of the Mirror Dimension fills every single person inside it with nervousness

if it broke, then the most logical explanation of what would happen to the person inside the Mirror Dimension is that they would be expelled out from this Mirror Dimension.,

And when that happens, they would find no refuge in the real world.

Those three beings did not even fight their hardest yet and they already created all kinds of apocalyptic phenomenon all over the world.

One could only imagine the kind of damage that they would unleash when they go all out against each other.

No matter how big the world had become after the Multiversal Convergence event, none of the people that have witnessed the powers of those three beings felt secure no matter how far they are from the center of battle.

And they are not the only one that is worrying.

All over the world, the great heroes and heroines of the world, once again saw that Wheel and each one of them have complicated feeling when they saw the titanic figure of Death Monarch shining his holy light all over the four direction of the world.

People from Pandemonium instantly recognizes that Wheel since they have saw it before when Azief uses it against his fight with Sithulran.

Most civilians that is below Seed Forming and Disk Forming leveler has already been transported into the Mirror Dimension.

On the gathering ground of these heroes and heroines, they all look at the sky with a complicated expression

'Shit, how can we help him if this is the scale of the battle' Athena mutters and her words is heard by the other two generals

What she said is echoed silently in their thought.

Sky splitting apart, and the entire earth seems to be in the verge of collapse, how could they shrimp fight when whales duke it out with each other?

#### [Chapter 857: High in the heaven above](#)

The Three Generals look at the scene in the sky with complicated feeling more than most people felt.

They do not know what to do right now.

And as such they could only look up and frowned.

They could go to the area where their lord is fighting but, they know with their power and ability instead of helping their lord, they would only be a burden.

It is the reason why they did not fly toward the area of the world where Azief is having silent battle with the Demon King

But they do not feel good to only watch.

And they were also disturbed by the announcement that had been ringing in everyone mind.

Sina who watches this from Pandemonium also felt conflicted.

She sighed.

She had heard the announcement of Hirate and she knew what Loki had done and why he had cut off all relations with Pandemonium before he goes off.

Sina knows the real truth. Hirate said the cause of this Multiversal Convergence is Loki.

But Sina knows for a fact that it is not the truth. He knows it was Azief and Will action that led to the current situation.

And she also knows that is why Azief is fighting his hardest right now and for once put the welfare of humanity as his first priority.

In the past, he would surely not risk his life for other people other than those who he loved and who he knows.

But as years passed the list of people he knew and the list of people he loved increased. There were more people that he could not let go and as such, today he fights for them.

Sina understand Azief more than most.

This fault is his and as such he would bear it. Sina even expected that after this is all over, Azief would not mind receiving the condemnation of the world because of his action.

To make him pay for it on the other hand might require the entire world to go against him. Sina had even prepared to reconcile the rift between the great powers after this event.

After all, he knew that the moment it was revealed that Azief is the one responsible for today calamity, then the world would turn against Azief.

Yet at the same time fighting Azief would only weaken humanity so Sina had prepared herself and thought of the idea of reconciling the great powers with Azief

Her plan might even work.

Sina after all had a lot of friends in other great powers whether it be the Senators of the Republic or the Quorum members of the World Government.

She is even friend with the Poison King Takashi in the League of Freedom and many other influential people in the other six great power.

But Hirate announcement overturned all of her plans and instead fills her with a bit of frustration at Loki

And Loki did not come out and saying it was false. Instead, it appeared like Loki had tacitly agreed on this matter

As such, Sina quickly understand what Loki had been doing all of this time. Loki was planning to take the blame for Azief deed

She did not know how to feel about this.

She knows Loki.

But the more she knows Loki, the more she knows that she knows nothing about him.

Loki for some reason, have this secret that he had never been able to share with her and one of that secret surely involve Azief.

Sina was not blind. Loki had some eccentricities that is hard for her to just ignore. Loki foresight is too good to call him just speculating.

It almost seems like he knows what is going to happen in advance.

There are many things that Sina notices as she grows in power and saw the Time Discrepancies aura around Loki.

She also believes that this is the reason for the disagreement between Loki and Azief.

But since he had never talked about it, she also never pries that much. And because she is afraid of what the answer would be.

She looks in the distance and even with her current Disk Formation level aided with the pills she had concocted, she could only see the wheel and the golden light shining over the whole world but she could not see Azief himself

All she could see is a huge silhouette of his like it is being obscured by mist

Shining too bright that nobody could stand to see it for too long, else they would become blind. She thought to herself and chuckles a bit.

There is nothing more she could do here and there is nothing she could do to help Azief. this content of novelfullbook.com, if you reading this content please go to website novelfullbook.com to continue reading, fastest update hourly

Azief among the four friends that met in that forest, years ago, had become so high and become so far.

He is high in the Heavens above while they were all in the ground, she bitterly thought to herself.

She looks around her and she could see all the great heroes and heroines of Pandemonium are all gathered here.

They are all waiting for orders on what to do next. But no one knows what to do now. And no one is giving any orders

Sina then try to close he mouth and then she laughs a bit.

Some people look toward Sina direction but they did not say anything.

They all came here, all in the hopes that they could formulate a plan to help Death Monarch.

But now, all they could do is simply look at the distant sky, looking at that Wheel and the only thing they could do is just stares at that Wheel, moving bit by bit.

They all shares the same feeling at that particular moment. It is not that they don't want to help.

It is that their help is not needed and even could be detrimental as they would just be a nuisance if they go there.

they felt it deeply deep in their hearts and Wang Jian clench his fist because of this feeling

They felt powerless. And that is why they only could watch

they felt that the pressure of the Wheel grows even larger and grew more powerful with each passing moment.

For some reason, they were not affected that much by the illusion that the Wheel had inflicted upon others.

While that made them able to keep their mind, they also were not exposed to the possibility of being enlightened by the Wheel

It is a tradeoff that anyone in Pandemonium would take. On some other continents they were people who were affected by it and could not think properly.

This must be an unconscious action by the Wheel corresponding with the heart of his owner.

On Pandemonium, Sina also knows that they need at least to do something.

With all of them in Seed Forming and Disk Formation level, they must be something they could do to help ease of Azief burden

It would not look good if they just stay here and watch things happen.

Sina look around her and she is trying to search someone among the crowd. She is searching for Sasha, the leader of the Shadow Guards.

But after looking around she did not find Sasha anywhere

‘Just like her, to ask help from me and then just disappear’ she thought to herself.

She smirks a bit.

Knowing Sasha, she must have some plans of her owns or maybe she has some secret orders from Azief himself.

It is ironic when she thinks of it.

Those two were enemies in the past.

But now they were like a boss and a secretary. If this is a romance series, Azief would be the overbearing boss and Sasha would be the efficient but gentle hearted secretary that he would fall in love with.

She laughs at her own imagination. She come closer to Wang Jian and Sina movements caught the rest of the other attention.

Sina stand beside Wang Jian who towered over her and she simply raise her eyebrows and said

‘What are your plans, Wang Jian? Are we to stand around here and watch a Wheel moving?’ Wang Jian frowned.

‘Your Excellency Sina, please advise’ He rebutted back.

Sina only laugh.

Sina look around her and then she laughed again.

‘This is a formidable lineup that have never been seen before other than when Death Monarch summons us’ she started saying and the people present all nodded their head

This kind of lineup is enough to shock the world and it is also this reason why Pandemonium maintain their lead over all the other great powers in the world

Yet, today, they remain motionless after seeing the disparity of power between them and the one people called the strongest person in the world

Today, they knew how high the gulf between them and Death Monarch. It is like a carp trying to leap to the Heavens

It is simply impossible.

Of course there is a reason why the disparity of power is so high.

Even though when Azief was in Disk Formation before, his power outstripped his peer. It is the reason why he remains on top and his throne as the strongest person in the world had never been shaken.

It is not simply because he created a sturdy foundation for himself, but because he follows the path of perfection,

And now after walking the Supremacy Stairway, there is not only a quantitative change in the amount of energy he possesses, there is also an overall improvement in the quality of his ability.

There are only a few people in this world that knew that Azief pursue extreme perfection in his leveling up to next realm.

People did not notice it simply because Azief grows at the same rate as everybody else.

Truth was, even though time had probably only move around eight years in the real world since the Fall, give or take any other Time Dilations Occurrences that happens all the world in a span of a day, Azief himself had experienced countless of years living in other dimensions and other worlds to consolidate his state of power.

He had used the distortion of time to shorten the Time Differences

To others, it appears that Azief progress very fast.

But to Azief himself, he knew that it is the accumulations of experiences of many years. His age could not be said as early twenty even though he looks like he is in his early twenty.

The age of his soul is even more longer than that if he included his life as the Six Live sin Azul sabers.

That is probably also the reason why Azief memories when he tries to recall the past and the experience he had experienced in the Six Lives, there is some confusion.

By slowly forgetting those moments, the soul is removed from the influence of Azul.

Whatever the case was, Azief prowess is now truly revealed to the world.

#### [Chapter 859: Unite, fight \(2\)](#)

That is not to mention the others who also uses considerable amount of the energy of the world to raise their levels.

And it drained the world energy quickly and in a fast rate so much so that the rate of the energy being taken is surpassing the rate of the energy being replenished.

When Azief left the world, the world is slowly showing signs of having energy depletion. They know that the energy would be replenished but it would be slow.

And the more they take, the longer it would take for it to be replenished.

As such, there is even people who went outside of Earth to cultivate and absorb the energy from other worlds. this content of novelfullbook.com, if you reading this content please go to website novelfullbook.com to continue reading, fastest update hourly

And such, this created the current problem of the weak and the strong. And the system is no longer fair

The weak people consisted mostly of those who were kids or old people when the Fall happens.

Kids do not know how to use the opportunities and they lack certain luck and certain conditions for them to thrive in the early era of the Fall.

They are mostly protected by their parents and as such they could not have made any decision that seems dangerous since their parents would not allow them to.

Even if they could make dangerous decision like hunting and doing quest, they might fail and might die

The most optimal people primed for success during the early years of the Fall was people who were around their teens or during their middle age.

Since they have seen the world and some of them quickly adapt to the game concepts

There are also people who is already established with background like soldiers or spies, or had laborer who were quite familiar with hard work and dangerous lifestyle.

And some were lucky.

Whatever the case this disparity of people who gobbles up the energy of the world has now currently become the powerful people of the world.

Azief for example had shave off the immature parts about himself, appearing to many people of the world, like some kind of impassive dark god that protect Pandemonium just by sitting on its throne and oversee all creation from the Heaven.

There is Raymond who is shining like the sun, inspiring the people of the World Government with his valiance and honor

People would not believe if Sina told them that Raymond was a gamer in the past and he is an ardent visitor to Comic Con.

Then there is Katarina who is unbending in her conviction against evil.

There were so many criminal warlords and evil people that has been sacrificed to her red sword that gives her the reputation of hating evil and upholding kindness

Who would believe her if she said that Katarina the strongest woman in the world was once abused by her father and powerless to stop him

How about Boris, the Beast King who ruled side by side with his sister in the Republic who had to take a beating for his father when he was a child so that his father would not laid a hand on his sister?

None of these stories is something that people knows. And even if they heard it, they would not believe it.

People wanted to be them, and envy their powers.

But normal people who were born at the wrong time, like those kids who were born after the Fall, they would find themselves lacking in the energy needed to break through to their levels.

Levels now is no longer a blessing.

It is a curse that limits them.

They have to fulfil the requirements of the system to rise up.

While this is not hard in the beginning because of the amount of energy in the world at that time which was abundant, as these people at the top become stronger, the more energy that they would consume and as such, the vicious cycle of the world not having enough energy for everyone would start again.

Regardless of all of this, Sina said

‘We simply have to fight’

They all know that they have to fight. But how? That is the question that they want answered.

Wang Jian then asked

‘How to fight? We are not even in the same level’ Sina only smiles.

What Wang Jian and these people need from her is not answer. They need confidence. Then she said

‘With all of this people, how could you not fight? In my estimation, all we need is one attack. It might not kill that Demon King but it surely would be able to distract him don’t you think? If we could give Death Monarch even one second of time, that would be help enough. We are all Disk Formation levelers. One second is enough to determine the outcome of a battle’

Some of the crowds nodded.

Then pausing for a second, Sina said

‘There is always an advantage of number. The Demon king might possess an Essence Creation prowess level, but it is suppressed by the Will of the World, suppressed by Death Monarch and even by Jean. And Hikigaya would also not sat still. He might be waiting for the opportune moment to deliver a fatal strike’

And then she pointed toward the sky and said

‘And I think some of you could see the thing that is above the sky. Of course it might be blurry a bits ice the distance between the ground and the sky had expanded but I think some of you could see it right?’

Some others look at the sky and they noticed it too and they seem to be making calculation in their heads

Sina continue saying

‘There is the Orvanians also coming to help us. I am not saying to you to make yourselves a burden to Death Monarch. I am saying to make yourself useful. Don throw your lives away. Wang Jian just because the enemy is stronger than you, you would give up? What kind of a general of Pandemonium is that? If you could not defeat them head on, then strategize! I thought that is your specialties?’ she smirked and then said

‘You don’t have to take risk. Go first, and see if you could help. If you could not help, then don’t. But think about it first. Think of a way to defeat the Demon King. If you could not do that, then think of a way to delay, to distract, to give even one advantage to Earth’

'If Death Monarch loses, then Jean and Hikigaya would also loses. And if they lose and the Orvanians come late then one could only imagine the damage that the demon could do. And even if they come, what if they could not contain the demon? I, for one, do not want to rely on the mercy of others. I know all of you here do not exactly all seen eye to eye with each other. But I think no one here wants a repeat of the Weronian Occupation.'

Hearing this the eyes of some of the civilian become determined.

All of the people here had experienced the hellish years under the Weronian civilization.

Even though it is only a few years, millions of people died and many of the people in the world had lost their loved one because of the Weronian Occupation.

The scars of that war is still fresh for many people.

Sina then said simply

'Unite. Fight'

### [Chapter 860: Unite, fight \(3\)](#)

Saying this, Sina waves her hand and a pill exploded into a white smoke that in front of her and envelops the space around her

The smokes settle away and people could see that there is a round board floating a few meters above the air.

Sina jump into the round board and then flew to the sky toward the direction of the battle

She did not say anything or ask them to follow her

She just made her decision and executed it. Sina is always seen as the most rational among the close circle of Azief.

But that is just because all the other three is crazier than her this giving people the impression that Sina is the normal one among their group.

In the other timeline, she was called the Mad Alchemist. Even though she is not called like that in this timeline, that streak of craziness is still there.

She disregards what Sasha is doing. That is Sasha plans. And she has her own plans. She would simply see whether she could help or not.

Standing and watching the Wheel moves would not help at all. All of them did not know what to do.

Since that is the case then, do whatever!

That is the answer that Sina come up with

She would go that area of battle first. If she truly could not help, then she would retreat. If she could help, even a little, she would.

Of course, she also takes in the possibility that the Demon King would use her as bait. Taking in that possibility, she already has plans to make sure such thing did not happen.

At the same time Sian fly to the sky and heading toward that area of battle, Wang Jian who was shocked for a second with Sina sudden departure from Pandemonium made his decision.

He no longer has his soldiers

Behind him there is only the high ranking officials that were not sucked into the Mirror Dimension.

Most of his soldiers is around the Orb Condensing and Energy Disperse stage level.

As such they were absorbed into the mirror dimension. As for his other officials they were all in the range of Seed Formation and Disk Formation level.

Wang Jian had been awakened by Sina words and he look at his officers and said to them

'I owe Death Monarch a lot. He had trusted me and had given me all that I have today. I must go. But you all don't have to. This is a suicide mission. If we got caught in the blast of any of those three, we might die. Don't follow me if you have a mother at home, a wife waiting for you and a son that wanted to see his father'

One of the officers called Milos suddenly said

'We follow where the General goes!' He shouted.

The soldiers also have a determined expression and some of them said

'We also owes Death Monarch a lot. If today, Death Monarch falls, the world would suffer untold suffering. Weronian Occupation had taught us that much. We follow the General!' one his officer shouted and hearing this Wang Jian smiles

Then Wang Jian nodded, his eyes looking toward that area where three heavens converged atop each other and then he said to his officers.

'Follow me then. We will see whether we could help or not. If we could help, we help. If we are a nuisance, then we retreat and would not make Death Monarch worry about us. I refuse to believe that we could not even help Death Monarch with all of us joining hands' this content of novelfullbook.com, if you reading this content please go to website novelfullbook.com to continue reading, fastest update hourly

Wang Jian then jump onto his mount which is a griffin and soars across the clouds.

The other officers all nodded and they immediately fly toward the sky, some of them riding their mounts, some rides futuristic looking devices and some others uses their flying abilities.

It was like the rushing of celestial soldiers to fight against evil.

All of Wang Jian officers headed toward the battle.

The Fairy of the Battlefield Somi also follow Wang Jian from behind, riding her sword, appearing like some kind of Sword Fairy as she accompanied her husband to war

Athena and Freya look at each other and shouted

'Who is willing to follow me!' Their officers all shouted back in acknowledgement and they too flew to the sky

Other experts that is in Disk Formation also flew to the sky and follows the three Generals.

The Three Demonic sister also follows them, turning into a red smoke that fills the area of the sky, rushing through the distance, heading toward the battle area

But while most of the Disk Formation leveler had follow the Three Generals, not everyone follows them

Some people had to think some more and some others have different objective. And one of them is the Immortal Couple

Xu Cong and Lihua still did not make their decision. Xu Cong look at Lihua and ask

'We go? Or we stay? Whichever we chose, Death Monarch wouldn't blame us'

Lihua frowned and said

There is a conspiracy here. I could feel it

Xu Cong understood what Lihua is trying to convey to him

They also heard about what Hirate had said. Lihua is Loki disciple. As such, she felt that this matter is very suspicious.

Even though she rarely meddles in the matters of the world since that battle a few years ago, she knew a lot about the matters of the world.

She then said

'I will seek Hirate' she said and Xu Cong eyes narrowed. Then he said

'Then I would follow you'

'You don't have to'

'But I want to' Xu Cong reply

Lihua only smiles.

Xu Cong then closes his eyes and then like he was divining something, his hand moves.

An illusory brush appears on his hand as he painted a scene that is streaming in his mind and then the scene that he painted become life-like.

And then he drew a circle

The scene that he had painted inserted itself into the circle.

Lihua saw that it is a location and she nodded

Xu Cong hold her hand and said

'We do it together' Lihua smiles and kiss him in the cheek. Then she said

'We do it together' holding each other hand, Xu Cong and Lihua both enter into that circle.

The moment they enter it the circle shrink and closing.

The Immortal Couple is no longer in Pandemonium, appearing in the Island of Peace that is in stealth mode

She and her husband was face to face with Hirate. Hirate did not seem surprised. He looks at them and said

'Loki expected you to be here. And he has a message for you. Do you want to receive it? He said you deserve a choice this time. And if you were to listen, there is no turning back' That is the first thing that Hirate said the moment that Lihua appeared in front of him.

She frowned and Xu Cong shakes his head. He did not expect all the plans that they had were dismantled the moment they arrived here.

Their plan was simply for them to ask Hirate about Loki. Who would have thought that Loki even predicted death they would come to Hirate and leave a message to Lihua?

This feeling of being in another palm is not exactly pleasing

He looks at the face of his wife and the moment he saw her expression; he already could guess what his wife would choose.

He knew that his wife is once again sucked into the whirlpool of the matters of the world.

The Immortal Couple could no longer live as carefree as an immortal after this. But even knowing that, he hold his wife hand.

And he holds it tighter. This time, whatever comes, they would face it together. Lihua could sense his husband hands and she smiles bitterly as she said to Hirate.

'Tell me the message' Hirate smiles and he simply said

'Loki said you will agree' And then Hirate told her what she needed to know and what she needed to know.

It is a prelude to the epilogue.
