

Sign In To Become a God #Chapter 41: Improve again - Read Sign In To Become a God Chapter 41: Improve again

These rewards are nothing more. As for worshipping 'Hong' and 'Thunder God' as teachers, Wang Yi would not consider it.

It's okay to sign in the lair of "Hong" and "Thor" in the name of pointing.

Inspector Wang asked Wang Yi for his opinion, and after learning that he did not want to be a teacher, he persuaded Wang Yi to say a few words. Seeing that he was determined to do so, although he was a little regretful, he didn't say anything.

And Wang Yi then returned to his residence in Jiangnan Pavilion with the silver suitcase containing the reward items given by Xtreme Martial Arts Gym.

As for the 10 billion years of activity funds, of course they have already been accounted for after Wang Yi signed the contract.

Now Wang Yi has more than 14 billion funds.

How long has it been since April to July 1st?

Of course, money is of little significance to Wang Yi.

After all, what he really needs cannot be bought with money.

The training camp originally wanted to arrange a God of War teacher for Wang Yi. If nothing else, it should be a flower of the training camp, only accepting female disciples or Jiang Fang from the village of Jiangnan Base City.

But this arrangement was rejected by Wang Yi, and he said unceremoniously that even if Wang Yi's current state of swordsmanship is not above Jiang Fang, both sides are on the same level.

With one more teacher, he usually spends time to be taught by the other person. For Wang Yi, it's a waste of time.

With that skill, it is better to ponder the nine-fold thunder knife or your own knife skills.

Because he doesn't need to study with the teacher, Wang Yi, except for the double number (because he was the 184th in the Black Dragon rankings of the training camp last month) to hunt monsters, he can arrange his own activity time, which is very free.

When returning to the courtyard of Jiangnan Pavilion, Wang Yi also took a special look at the pavilion of Shi Jiang and Zhao Ruo. Quietly, neither of them seemed to be there. Today is No. 1, and it is not clear whether they are hunting monsters. Wang Yi didn't pay attention either.

In the basement secret room of the pavilion where Wang Yi is.

The bright white light illuminates the entire enclosed secret room. Although it looks tight, it also has a perfect ventilation system. Even if the door is closed, it will not feel hot and dull at all.

What's more, in terms of the martial artist's body, ordinary heat is nothing at all.

Wang Yi put the silver-white suitcase on the alloy floor. After fingerprint verification, the suitcase opens automatically.

Inside there were only two fixed wooden boxes. Wang Yi opened the first wooden box. Inside was a test tube fixed by foam, and the test tube was filled with golden liquid.

The second wooden box is a delicate white jade bottle with finger length.

There is also an instruction manual in .

Wang Yi read it carefully.

"It turns out that the chalcedony is taken directly, while the dragon blood is applied to the body surface." Wang Yi understood after reading it.

Whether it is chalcedony or dragon blood, it can directly improve the user's physical fitness.

However, the effect of dragon blood is obviously much better than that of chalcedony.

Therefore, dragon blood is worth 80 billion and chalcedony is worth 30 billion.

Of course, this is the internal price of Xtreme Martial Arts Hall, and the external price is much higher.

Dragon blood is a bit different from chalcedony.

The higher the strength, the weaker the dragon blood effect. The lower the strength, the more obvious the effect of dragon blood. A warrior-level warrior, because he is too weak, with dragon blood, his strength even quadrupled!

And chalcedony is a fixed increase in strength of 10,000 kilograms.

Whether you are a warrior, a warlord or a **** of war, you can increase your strength by 10,000 kg after taking it.

Of course, it is useless for the existence beyond the God of War.

And the second use, the effect will be greatly reduced. Therefore, it is generally enough to use it once.

"Dragon blood and chalcedony can be used together. It seems to promote the effect of dragon blood?" Wang Yi blinked.

He was a little expectant.

His true physical evolution now is at the elementary general level, and his strength is about 8,000 kilograms.

If you use dragon blood to quadruple it, it will be 32,000 kilograms.

plus the improvement of mental power and the triple improvement of chalcedony... I don't know how much my physical fitness will improve in the end.

Wang Yi retracted his thoughts, calmed down, looked down at the two items in the box, his eyes glowed.

let's start!

.....

I don't know how long it took, the heavy iron door of the closed basement slowly opened in the sound of Kaza, and a black-haired teenager with bronze skin and strong muscles came out, his height seemed to be taller and more slender. , Even the face that was still with a hint of immature has become mature.

Wang Yi looked at his hand, feeling helpless.

"Dragon blood has indeed greatly improved my physical fitness, but my skin color has also changed."

Wang Yi doesn't need to look in the mirror, he knows what he looks like now.

However, Wang Yi's physical fitness has also improved extraordinary.

In addition to his body, Wang Yi's mental power has also become stronger, I don't know how much.

It was in the afternoon when Wang Yi came back with his things, but when he came out of the basement, it was already light up. The training camp was shrouded in the night, and in the center was a majestic tower.

A small martial arts hall on the fifth floor of the Ninth Floor.

A white exercise suit, bronze skin, a heroic black-haired teenager standing in front of a boxing strength testing machine, his expression calm, his eyes deep.

"Let me see, after being strengthened by dragon blood, chalcedony, and mental power, my physical fitness can reach what level."

Wang Yi took a step back and took a deep breath. His body muscles suddenly exploded. Without using any force technique, it was just pure brute force. His fist turned into an afterimage that was invisible to the naked eye and instantly broke through the sound barrier and crashed into the black fist. On the target.

Peng!

The black fist target made of special materials that can withstand the power of the God of War over a million kilograms vibrates violently, and a number of numbers-"216725kg" jumped out on the screen of the fist test machine.

That's right!

Wang Yi used his body only, and without using any skills, he exploded with 210,000 kilograms of power!

Even if Wang Yi had already been mentally prepared ~www.mtlnovel.com~ Seeing this number, I couldn't help but be surprised and happy.

And the dark golden orb in Wang Yi's mind was also shattered unknowingly when he used dragon blood and chalcedony to strengthen it in the basement.

The limit of the primary God of War is-64,000 kg to 128,000 kg.

The limit of the middle God of War is-128,000 kg to 256,000 kg.

The limit of the higher God of War is-256,000 kg to 512,000 kg.

Now Wang Yi's body strength has reached the middle God of War level! It is even close to the advanced God of War level!

And the spiritual power, it has reached the level of the pinnacle of the higher **** of war!

But Wang Yi knows very well that before the strengthening, his body has evolved only about 8,000 kilograms.

In other words, in fact, his current body's true degree of evolution is about 72,000 kg.

is the dragon blood, chalcedony, plus the mental power, it has probably increased by more than 63,000 kilograms.

After deducting the fixed 10,000 kg power of chalcedony.

Dragon blood has probably increased the strength of 24,000 kilograms.

There are still more than 27,000 kilograms of power left, which should be provided by mental power.

Of course, part of the effect of dragon blood remains in the body, which can continue to be slowly absorbed to increase his cultivation speed.

And the dark golden orb that condensed a lot of mental power has just shattered, and there will be a period of continuous and rapid growth of mental power, of course, it is not more than the skyrocket at the beginning.

But no matter what, Wang Yi now has the physical quality close to the 'High God of War' level and the mental power of the 'High God of War Peak'.

Except for the planetary star that surpasses the God of War, it can be said that it is almost invincible among the God of War.

Sign In To Become a God #Chapter 42: July - Read Sign In To Become a God Chapter 42: July

On July 1, Wang Yi signed the contract, and the news was immediately spread by Xtreme Martial Arts Gym.

Every force already knows that the rookie genius Wang Yi has been recruited by the Xtreme Martial Arts Center, and the future is destined to be the core high-level of the Xtreme Martial Arts Center.

In April, Wang Yi was just an ordinary student who had not yet taken the college entrance examination. The speed of this terrifying rise was simply shocking and inexplicable.

The importance of all parties on Wang Yi has once again increased.

July 2nd is a double number. It is the day when Wang Yi goes out to the training camp to hunt monsters.

An abandoned city code-named '1001', hundreds of kilometers away from the training camp.

A stream of lightning flashed across the head of a high-level beast-level monster 'Ogmars', and pierced out from behind its head with a chuckle, bringing out a red and white flower of blood.

The mouse seemed to stand upright, but the body of the two-story monster swayed, crashing to the ground, splashing dust.

Wang Yi walked out slowly in a dilapidated commercial building nearby.

咻～～

A flying knife was circling and dexterously inserted back into the hidden weapon bag on Wang Yi's thigh, and Wang Yi, with two war knives behind his back, came to the corpse of the killed monster, put down the swollen combat backpack on the back, and began to collect materials. .

The ranking of the Black Dragon in the Elite Training Camp is determined by points.

points are equal to 'record points' multiplied by 'combat power amplitude'.

The score point is determined by the level of the monster hunted.

The higher the level of the monster, the more points it will earn.

However, students can only hunt and kill at the designated location of the training camp.

And the students will not hunt down lord level monsters, because once they hunt more than two lord level monsters, they will think that they have become the **** of war and can only graduate from training camp ahead of time. Therefore, in order to avoid this situation, students will generally choose to hunt down beast-level monsters.

With Wang Yi's current strength, hunting these monsters would naturally be effortless.

The hunting efficiency of the spiritual teacher is more than ten times higher than that of the warrior of the same level.

When I ran into Wang Yi's monster, I couldn't even run.

Wang Yi's current strength can be regarded as the first person in the entire training camp. With his status as a spiritual teacher, the speed of earning score points is naturally very fast.

The single number learns to practice in the training camp, and the double number hunts monsters in the wilderness area to hone their skills.

chat with family and friends in the evening.

The days just passed by in such a bland day.

Wang Yi, an ancient civilized gravity room with only one entire training camp, also visited once, and in the first month, he only had one hour to practice in the gravity room.

And there are a lot of earth-made gravitational chambers, he goes to a lot more.

Wang Yi's physical fitness is constantly improving.

Studying, practicing, hunting monsters, resting, this is Wang Yi's days in the training camp. Although boring and monotonous, Wang Yi feels very fulfilled.

And even in the training camp, he can still meet with family and friends through the Internet every day, and he will not be lonely.

Wang Yi is still waiting for the time to come.

And his ranking on the Black Dragon rankings is also rapidly increasing.

In the first month of the month, as he earns record points efficiently and his already high combat power amplitude, his ranking suddenly rushes to the top 20!

And the upward momentum is unabated.

shocked the entire training camp.

Although other people are working hard to hunt monsters, people with discerning eyes can see that they can't earn record points faster than Wang Yi.

Wang Yi, who has already become a celebrity in the elite training camp, has been in the limelight for a while.

But for Wang Yi, this is not something to make a fuss about.

Although his current amplitude of combat power is a bit different from the top students in the elite training camp due to the relatively low level of force, he can still earn a record

with the speed of hunting monsters with the high-level God of War Peak Spirit Master. Point to tie the gap.

The Black Dragon rankings are nothing, but what makes Wang Yi more concerned about is the upcoming 'Adventure of Life and Death' to the Australian mainland on August 1st!

Mainland Australia, but there is a mysterious Kirishima that Wang Yi cares about very much.

A shocking day has arrived.

On the last day of July, Wang Yi's ranking on the Black Dragon rankings is fixed at fifth!

Although this momentum has already been there, when Wang Yi really rushed to the fifth place in the Black Dragon rankings in the first month, he still shocked countless people.

The whole world once again set off a storm because of the name Wang Yi.

I don't know how many organizations are racking their brains to study Wang Yi's information and his secrets.

Someone has guessed that Wang Yi hunts monsters so fast that he might have the status of a spiritual teacher!

Otherwise, it is impossible to surpass the top training camp geniuses in such a short time, and rush to the fifth in the Black Dragon rankings in the first month, an unprecedented achievement!

As the world's first training camp, the elite training camp is not without spiritual teachers, but they do not have the horrible hunting record of Wang Yi, so many people follow the derivation and can easily get the result-Wang Yi I am afraid that my current physical fitness and mental power are very high!

has definitely reached the God of War level, maybe still a high God of War!

Wang Yi doesn't care about outside speculation and rumor, because he now has enough strength to protect himself!

With the huge tree that covers the sky with his back at the Xtreme Martial Arts Hall, he doesn't worry that other forces will be messed up!

The only annoying thing is that in July, he made more than one application to seek advice from the museum owner 'Hong', but they were all rejected and shelved on the grounds that the museum owner was in retreat.

Let Wang Yi continue to wait, and he will naturally reply when the curator comes out.

'Hong' is enough, even 'Thunder God' is the same.

Wang Yi couldn't help but sigh, he really deserves to be the two strongest martial arts madmen on the planet.

Looking at the strength of practicing hard, there is no reason why people can become so strong.

Wang Yi feels that he also needs to work harder~www.mtlnovel.com~ For example, uh... continue to find a place to sign in?

.....

August 1, early in the morning. One hundred and ninety-three trainees gathered on the grass in front of the nine-story building (the training camp will be killed or injured in the hunting of monsters, or graduated, so the number often changes), and everyone chats in groups. All students are fully armed, carrying backpacks and their own weapons, etc., because...Today is the day of departure for the "Adventure of Life and Death"!

Wang Yi was also among them. He was wearing a gray-black and reddish SS-level combat uniform that was configured for him by the Extreme Martial Arts Gym. There were two SS-level Flowing Fighting Knives on the ground, as well as a combat backpack on his back, and he was specially prepared. The 16 throwing knives made of SS grade placed on the hidden weapon bag sat on the grass and chatted with other training camp students who have been familiar with this month.

"Wang Yi, do you want us to act together when we arrive in Australia?" Shi Jiang asked. The status of Wang Yi as a spiritual teacher has been circulated in the training camp, and everyone is not aware of it, and Wang Yi has no intention to explain it. , Now everyone already knows that Wang Yi is a spiritual teacher.

The Australian mainland experience lasts for a month, which is extremely dangerous. The students are naturally willing to team up with powerful companions. This is also safer.

This is also a common activity method for most trainees in the training camp in mainland Australia. After all, only a few powerful trainees can act alone.

"Sorry, Brother Shi Jiang, I want to act alone." This is not the first person to find Wang Yi to form a team, but this time Wang Yi still refuses very simply.

He is going to find Kirishima when he is going to the Australian mainland. How could he be with the trainees of these training camps?

Making a fortune with a muffled voice, of course, just go alone.

Sign In To Become a God #Chapter 43: Mainland Australia - Read Sign In To Become a God Chapter 43: Mainland Australia

The Australian continent, sub-Saharan Africa, and the South American Amazon are also known as the world's three most dangerous places!

In the era of Nirvana, the Australian continent was completely occupied by monsters. Now there are only infinite monsters on it, and no humans.

As usual, students from the elite training camp Wang Yi and others will go to the Australian mainland for a one-month life and death adventure in August!

At nine o'clock in the morning of the same day, 183 students from the elite training camp and more than a dozen Ares teachers led the team boarded the flying passenger plane to the Australian mainland.

At 3:10 pm, the flying passenger plane landed on a plain on the Australian mainland.

And as the flying passenger plane turned into a streamer and disappeared into the sky, it also represented the official beginning of the adventure of life and death.

once again refused several invitations to form a team, Wang Yi distinguished his direction and proceeded directly along the predetermined goal.

Before coming to the Australian mainland, Wang Yi had already done his homework, collected all the geographic data of the Australian mainland, and after sorting out and calculating, he had found the place he wanted.

Although the entire Australian continent is vast, Wang Yi has delineated the search area in advance, so it is much easier to find it.

Not to mention, there are satellite positioning and navigation here, and there is no such thing as getting lost.

The goal of Wang Yi's visit to the Australian mainland this time is very clear, which is to exist in the Kirishima island that has not been discovered by people in the Australian mainland.

In the vast wasteland area, a figure moves quickly.

"Fortunately, the place where we landed is the hinterland of the Australian mainland, and the Luofeng of the world should have landed in this area." Wang Yi moved quickly while following the map.

With his physical fitness close to that of a higher war god, once the speed unfolds, the whole person seems to turn into a streamer, breaking through the speed of sound, and rushing out in an instant without knowing how far.

The monsters along the way didn't have time to react, so Wang Yi rushed over, feeling the amazing aura, they didn't dare to chase after.

is chasing, but can't catch up.

"Well, the ape mountain range where Luo Feng and Li Yao entangled in the original book is over there, and here is..." Wang Yi ran wildly while recognizing the direction.

"Unfortunately, I don't have the Black God suit now." Wang Yi still has an obsession with the Black God suit. The Black God suit is a Tier 1 Force suit from the relics of ancient civilization. The function is easy to carry.

But according to his contract with Xtreme Martial Arts Gym, he must obtain the rating of the God of War before he can issue a set of Black God suit.

I guess I have to pay it back in the future.

"If I can gain enough in Kirishima this time, I won't have to stay in the training camp for that long." Wang Yi's eyes flashed.

One of Wang Yi's biggest goals now is to break through to a planetary star.

But the earth's talents have evolved for decades. Although some ancient civilizations have been unearthed, there is currently no complete set of practice methods. Breaking through requires talent and luck.

Because of his clear goal, Wang Yi almost followed a straight line along the way. For the powerful spiritual masters of the God of War level, there is no terrain environment on the earth that can stop them.

Boom!

Wang Yi completely turned into a flash of lightning, advancing on the ground at an astonishing speed of five to six hundred meters per second.

often waited for Wang Yi to pass, the next moment there was a piercing explosion of air.

Wang Yi was unwilling to fly, for fear of attracting powerful birds and monsters in the sky, it would be more troublesome than monsters on the ground.

Just like this, it was like this. About an hour or so, after stopping to check the terrain several times, Wang Yi finally arrived at his destination.

That is a lake with a radius of one hundred miles.

The lake in front is completely covered by endless thick fog, and the deeper the lake, the thicker the fog, even the sight of God of War barely sees through a hundred meters.

The strange thing is that the fog on the edge of the lake is very light. As for the land beside the lake, there is no fog at all.

brush! A stream of light broke through the air, stopped outside the lake, and solidified into the figure of a black-haired boy.

"That's right... the lake, the fog... this is it." Wang Yi couldn't help expressing joy in his eyes.

Mysterious and quiet lake, the lake is filled with endless fog, but there is no fog at all on the edge of the lake, which is very strange.

"Kirishima...it's inside." Wang Yi took a deep breath.

嗖!

The two fire fighting knives inserted in Wang Yi's back flew out and hovered in front of Wang Yi. Wang Yi stepped on it with one foot and just hovered in the air.

Wang Yi knew that there were a large number of lord-level monsters in the foggy lake. His target was Kirishima, so naturally he couldn't provoke them.

"go!"

Wang Yi's eyes were bright. Driven by his mental power, a powerful force acted on the fiery sword at his feet. The next moment Wang Yi's figure became blurred, and he had rushed into the sky, as if he was riding a roller coaster, soaring into the sky.

flew to a height of one thousand meters, then stopped, and looked down at the endless white fog on the ground.

"Now, the monsters in the lake shouldn't be able to spot me, right?"

If it were not for the mental power and the ability to fly, Wang Yi wanted to find Kirishima through this lake with a radius of one hundred miles. It would be really difficult.

I don't know how many dangerous lord-level monsters in the lake, even ordinary high-level war gods, will die in nine deaths.

If Li Yao in the original work was not protected by the Black God suit, it is estimated that he would probably die in the lake.

Wang Yi was floating in the air, Nianli controlled two war knives, and flew carefully toward the center of the lake.

Although he has a deep understanding of Kirishima through the original plot...but the plot is a plot, UU reading www.uukanshu.com is reality, and Wang Yi will not be negligent or overwhelmed because of this.

What if a king-level monster happens to be born in the lake and sees Wang Yi coming over?

And the most dangerous thing is actually the island in the lake. Underneath, there are two super monsters, 'Tentacles Beast King' and 'Mo Yun Teng' hidden.

With Wang Yi's current strength, it really shocked them, and it was very dangerous.

In the original story of Devouring the Starry Sky, the Mo Yun Teng appeared first, and then the 'Tentacled Beast King'. These two monsters are the intelligent life 'Babata' buried deep in the Kirishima island using a strange treasure in the universe. "Yang Jing" made it out, but Wang Yi is also a bit strange. How did Mo Yunteng and the "Tentacles Beast King" get along? Could it be that Mo Yun Teng was taken away by 'Hong' and Babata made another tentacle beast?

It's been so many years since I've been in this world. It turns out that Wang Yi can't remember the details of the plot clearly, but according to his guess, the situation should be similar.

It means that there is actually only one moyun vine growing silently in Kirishima.

"In fact, the aggressiveness of Mo Yun Teng is not very strong, it should be hidden deep, if it weren't for the iceberg guard to discover its existence with a special ability,

and anger it, it is estimated that there will not be so many things behind." Wang Yi thought silently.

Otherwise, Luo Feng and Li Yao's group of people hit you and me on the island before, and the grass and trees are so beautiful, and I didn't see the moyun vine coming out.

Until the guards of the iceberg, who had the ability to discover the life of special plants, came over, he accidentally angered the moyunteng and ran out to make a mess.

"So, I signed in at Kirishima, just pick a few plants of the spirit of plants and trees and leave, there should be no problem?" Wang Yi looked at the thick white mist underneath, thinking with expectation.

Sign In To Become a God #Chapter 44: Kirishima sign in - Read Sign In To Become a God Chapter 44: Kirishima sign in

In the sky, Wang Yi flew with his sword like a fairy in the legend.

The fog is too thick, even with Wang Yi's eyesight, he can only see a distance of about two hundred meters. Even if he uses his mental power, he can sense the same range.

Wang Yi had to lower his height when he came to the lake center area.

"Two hundred meters, it should be almost the same." At this height, Wang Yi could barely see the lake surface without worrying about being suddenly attacked by monsters in the lake.

The vast lake filled with white mist, rippling water plants, and turbulent waters, there were roars from time to time, and I didn't know how many monsters existed.

"Wow!"

A dragon-like creature with a body that is more than 100 meters long, covered with black and purple scales, and a body thicker than a water tank, emerged from the lake and set off a raging wave.

Wang Yi watched coldly, and continued to fly towards the center of the lake.

These monsters living in the misty lake are not the goal of his trip.

During this process, Wang Yi was also attacked by lake monsters several times, but he solved them with a flying knife.

As we went all the way, we kept searching, and soon, an island appeared in Wang Yi's eyes.

That is an island with lush vegetation and lush greenery, shrouded in mist and silent.

Wang Yi quietly hovered in the air and watched this mysterious and silent island for a while, and then slowly flew over. During this process, his mind was always on the highest alert.

Huh. Wang Yi descended from the sky, his boots lightly stepped on the soft sand.

"Sign in." Wang Yi opened the golden sign-in panel without hesitation.

As the golden brilliance lit up symbolically, Wang Yi heard the wonderful voice again.

【Ding, congratulations to the host for successfully signing in, and rewarding a moyunteng seedling. 】

【The seedlings of Moyunteng have been put into the panel space. 】

【Number of check-ins available for this place: 0】

"Huh?" Wang Yi frowned.

He can see that there is an additional display under the golden sign-in panel. It is a grid-like space. In one of the spaces, a plant that looks like a gourd vine is quietly placed, which is only two meters in length.

This is 'Moyunteng seedling'.

Moyunteng is a very popular plant life in the universe, and it is very popular with some strong people and their disciples.

The value of a vine, in the universe, is very amazing.

In the process of cultivation, the vine can evolve and become stronger. The grown up vines can be used to protect the body, and can also be used to attack the enemy. It is the best partner.

There are many evolutionary routes of Moyunteng, mainly related to the various treasures it can ingest.

If it is placed on the earth, it can only absorb the energy of the universe, and at the top, it will only have a planetary-star level seven or eighth strength.

And if it is fed with various precious treasures, it will be 'immortal' without any problem, but the price is very staggering.

.....

Wang Yi recalled the information about 'Mo Yun Teng', and he was able to sign for 'Mo Yun Teng' in 'Kirishima', which was a bit unexpected.

Wang Yi showed helplessness.

It's just a pity that this is just a seedling. It might take a lot of time to grow to a planetary star.

Unless there are precious treasures like "Wooden Crystal" to increase the growth rate.

And the cultivation of 'Moyunteng' is not that simple. Without any guidance, Wang Yi was also at a loss in this regard.

"But, it's better to have it than not..." Wang Yi took a breath and looked again at the silent island shrouded in white mist, dense with trees, like an ancient primitive jungle.

Wang Yi knew that there are many spirits of vegetation growing on this island.

In this world, there is no unified theory about the origin of the spirit of the vegetation. Some people say that the spirit of the vegetation is produced through special mutation. It is also said that the spirits of plants and trees evolved after absorbing the special energy of the universe...In short, there are different opinions, but there is no unified conclusion.

But one thing is confirmed. After the vegetation is transformed, it will become the "spirit of the vegetation", as long as it is not close to it, there will be no threat, and each spirit of the vegetation is called the essence of heaven and earth, and has special effects.

However, Wang Yi knew that the so-called "spirit of plants and trees" actually came from the handwriting of the intelligent life Babata in the Meteor spacecraft buried 50,000 years underground in Kirishima. The owner of Babata is a powerful and immortal. But the enemy killed his soul, and finally fell to the earth, and the spacecraft was seriously damaged, unable to start, and could only stay underground.

And the Meteor Star forces have also been completely destroyed! The earth was spared because the master of Babata used a powerful space secret method to obscure the coordinates corresponding to the dark universe before his death, so that people outside could not find the star field where the earth is located.

Baba Bata's wish is to find a suitable heir for the dead master.

And this descendant must have a very high spiritual talent, or a sufficiently high 'brain width'!

In the original plot, Luo Feng's brain width is as high as 21! He is the tallest person on earth, so he was chosen by Babata as the descendant of Meteor Star.

Looking back, Babata, as an intelligent life, is essentially a virtual existence. Without artifacts, it is difficult to leave the spacecraft.

In order to select disciples for the master, in the period of human nirvana, when the strong humans first appeared ~www.mtlnovel.com~ Babata threw out a seed of Mo Yun Vine and fed it to Mo Yun with three woody crystals. Rattan, so that its strength grows rapidly.

At the same time, there are two wood crystals that have been powdered, which are absorbed by some plants and trees to form the so-called 'vegetable spirit'.

This is the reason why Kirishima is so quiet. Apart from a large number of 'spirits of plants and trees', there is also a terrifying moun vine.

The monsters in other lakes did not dare to go up.

is today's earth. Except for 'Hong' and 'Thunder God', none of the other human powers can be the opponent of this moyun vine.

Wang Yi thought in his heart, he didn't plan to provoke this moyun vine now because he couldn't beat it.

The spacecraft where Baba is located is in the stratum tens of thousands of meters deep under Kirishima. It has been disguised. If Baba is unwilling, it is impossible to find the spacecraft.

Unless Baba thinks that he is 'extraordinarily gifted' and is a genius who can inherit the mantle of his master, then he may be taken in.

In my heart, Wang Yi didn't want to seize Luo Feng's chance.

Especially after having cheats.

His future development may not be lower than that of Luo Feng, so why bother to take advantage of his friends.

People always face a lot of temptations in their lives, the result is not really important, what matters is your choice at the time.

"The heart..." Wang Yi murmured.

Wang Yi showed a wry smile, "It turns out that I have been shaking too."

This feeling is like your friend's ancestral treasure is buried in the corner. Your friend doesn't know it, but you know it.

What to do is a test of people's hearts.

people's hearts are unpredictable!

As for right and wrong, it doesn't matter anymore, what's important is that he understands his own mind.

Sign In To Become a God #Chapter 45: I chop! ! ! - Read Sign In To Become a God Chapter 45: I chop! ! !

Wang Yi in a gray-black and reddish combat uniform walked cautiously among the large forested jungle.

His goal is "Liu Mu Xin", or "Wan Nian Liu Mu Xin".

After a month of training in the training camp, Wang Yi's physical fitness has been improved to 100,000 kilograms of strength!

One month, almost 30,000 kilograms of power increased!

On average, one thousand kilograms per day is lifted, which is equivalent to the physical fitness of a quasi-warrior.

This cultivation speed is amazing.

The reason why chose to look for Liu Muxin is that it has obvious characteristics and is easy to search. The second reason is that this kind of vegetation spirit is the only one in Kirishima that can directly and harmlessly improve physical fitness and know how to use it.

"Ordinary Millennium Willow Heart, after taking it, firstly, it can greatly increase the cell activity and the body's recovery speed by many times. Second, there will be a leap in physical fitness." Wang Yi recalled the plot in the original book about the Millennium Willow The description of the heart.

As for the more powerful 'Willian Willow Heart', the effect is definitely more magical and powerful.

However, in the original work, Li Yao, who was wearing the 'Black God Suit' as a high-level War God, could not beat 'Wannian Liu Muxin' and almost died there. Wang Yi was hesitant about whether he could kill 'Wannian Liu Muxin'.

"My physical fitness has fully reached the level of a high-level God of War. With 2.1 times the strength, my strength has reached more than 600,000 kilograms. My sword skills and physical skills are top-notch. There should be no problem in coping with Liu Muxin for these ten thousand years. , I still have mental power." Wang Yi was certain in his heart.

Spiritual power is Wang Yi's real killer!

Wannian Liu Muxin faced Wang Yi, quite facing a powerful advanced warrior and an almost invincible spiritual teacher among the gods of war!

Of course, without the protection of the 'Black God Suit', Wang Yi's own protection is very weak.

"I want the largest willow heart with a few thousand years and just leave it with five...no, four thousand year willow hearts for Luo Feng." Wang Yi felt vacant.

I don't know if doing this by myself will seriously change the trajectory of history.

.....

The island is big or small. Soon Wang Yi searched one-third of the area, and on the way he also solved several plant spirits that attacked him. With Wang Yi's current strength, it is naturally very simple to solve these plants and get a few unexplained plant spirits.

Of course, Wang Yi wouldn't eat anything, but pretended to be, and waited to leave to check the information.

"I don't know if there is any spirit of vegetation on this island that is stronger than Wannian Willow Heart, besides Moyunteng, but I haven't encountered it."

after a while.

"found it!"

Wang Yi stood on a big tree, looking at the nine extremely conspicuous tall willow trees in the distance, with a smile on his face.

"Whoo!"

He jumped down from the tree, and two swords flew out in mid-air and landed at his feet, and then Wang Yi flew quickly to the nine willow trees like a gliding all the way.

"One, two, three... That's right." Wang Yi glanced over again and nodded.

The thinnest one of these nine willow trees is thirty to forty meters in height, and the thickest three-meter-diameter big willow tree is nearly 100 meters high. Thousands of willow branches drift with the wind.

Standing hundreds of meters away, Wang Yi observed and frowned.

"Nine willow trees are too close."

"No matter which tree I attack, I will be attacked by the other eight willow trees."

And the thickest and tallest "Ten thousand years willow heart" in the middle, the wicker length is hundreds of meters long, completely covering the growth area of all willow trees.

If you want to cut down willow trees, you must pass the attack of Wannian Willow Heart.

Snapped.

Wang Yi tentatively approached a willow tree from one side edge.

Huh, the willow branches of the willow tree that were drifting in the wind suddenly seemed to come back to life, breaking through the speed of sound at an alarming speed, and rushing towards Wang Yi frantically.

咻! call out! call out! Huh... Faster than them are a few streams of light flying out of Wang Yi.

The six flying knives swiftly spun, sharply cutting the entwined willow branches.

The branches that were broken for a while are scattered in a mess.

"Swipe!" Wang Yi's figure was like electricity, avoiding all willow branches like a ghost, and instantly approached the thousand-year-old willow heart on the far left. The double knives in his hand turned into two blazing fire streams and slashed on it.

How powerful is Wang Yi now, and the extremely sharp SS-class sword can even cut through the body of most king-class monsters, not to mention a thousand-year willow heart in the immediate area.

The blade plunged a few centimeters in at once, and green juice came out.

The thousand-year-old willow tree trembled in its heart like a heavy blow, and then the wicker waved more frantically.

Wang Yi slashed at the gap again like lightning.

"Wow!" The pale golden willow branches of the thickest willow tree in the center suddenly stood up, and tens of thousands of willows were densely packed, and they were entwined with Wang Yi who was cutting the willow tree.

Wang Yi manipulated the flying knife and cut the pale golden willow branches.

Wang Yi is now a spiritual teacher at the pinnacle of the higher God of War. Even if he manipulates six flying knives at the same time, the power of each flying knives exceeds 500,000 kilograms, which is even more powerful than Luo Feng, who took a thousand-year willow heart in the original work. Even stronger!

But even so, when cutting these pale golden willow branches, it still feels a bit difficult.

嗤, 嗤, 嗤...

There was a violent breaking through the air, and all the willow branches of the willow trees surrounded Wang Yi.

The flying knife whirled and cut at extreme speed, but there were still a large number of willow branches that broke through the defense and stretched towards Wang Yi.

Wang Yi made a knife~www.mtlnovel.com~ to fend off these willow branches instantly.

Chi, a light golden willow branch was wrapped around Wang Yi's left leg. He staggered, his body slanted and his feet unstable.

There are too many!

"Am I..." Wang Yi felt a trace of anger in his heart.

Power poured on the sword, slashed violently, connected the two swords, and cut the pale golden willow branches in two.

Seeing that there were so many willow branches around him that he could not see clearly, Wang Yi also had a tingling scalp.

These willow trees are more difficult than Wang Yi imagined.

"Fuck!" With an angry curse, Wang Yi manipulated the flying knife to spin through the ground, and he himself, with the help of mental power, moved away quickly like a ground burr.

.....

"It's really cruel." Not far away, Wang Yi came out again, looking at the calm willow trees with a trace of cruelty.

"I don't believe it anymore, so why not let you guys!"

Wang Yi approached again.

Hoo!

Countless willow branches shot over in an instant.

Wang Yi flew back calmly, and at the same time manipulated a flying knife to cut the willow branches.

The broken branches flew around in an instant.

Once, twice...

As time goes by, the intact willow branches on the willow tree become less and less, becoming sparser.

And the heart of the willow tree, Wang Yi's focus.

Wang Yi pruned the branches of these willows patiently.

He is now stronger than the 'phantom magic' Cattelan in the original book. As long as he is careful not to fall into the circle of nine willow trees, he doesn't have to worry about something.

finally.

a few hours later.

Boom!

A thousand-year-old willow heart near the edge was cut by Wang Yi's persistent flying knife, and finally fell down.

**Sign In To Become a God #Chapter 46: God of War -
Read Sign In To Become a God Chapter 46: God of War**

"After so much effort, I finally got this Wannian Willow Heart." Wang Yi ignored the four miserable 'bald' willow trees next to him, and stuffed the fist-sized Wannian Willow Heart into his combat backpack. , Shi Shiran left the messy scene.

As for the broken willow branches? With the amazing vitality of the plant spirit, it will grow back soon, so Wang Yi doesn't need to worry about it at all.

Wang Yi happily left Kirishima from the sky with five willow hearts and returned to the shore.

This time, he gained a lot. In addition to signing a 'Moyunteng seedling', he also got a total of eleven plant spirits including Wannian Willow Heart!

And it hasn't disturbed the Mo Yun Teng on the island, it is great to leave safely.

As for Luo Summit not to come to the island in August next year, whether he can get Willow Heart after coming here depends on his luck.

On the wilderness covered with lush and dense vegetation, a figure suddenly flashed over.

"Well, there is a mountain range ahead, let's just be there." Wang Yi narrowed his eyes.

Desolate and steep mountains, on a cliff, where monsters are rare. Wang Yi flew to the middle of the mountain like an ape, and directly controlled a flying knife to dig out a four or five-meter deep cave that was large enough to accommodate one person. Live in the hole, leaving only an inconspicuous gap for ventilation.

"That's it." Wang Yi sat down at the end of the aisle without caring about the dirt, opened the backpack placed on the ground, took out the Wannian Liu Mu Xin, and placed it in his palm for a closer look.

This is an oval crystal with the size of a fist. The crystal has a flowing green and a hint of gold. Putting it in the palm of your hand just looks at it with the naked eye, and it makes people throbbing.

"Thousand-year willow heart has two major effects that can increase human cell activity and improve people's physical fitness. And this is my ten thousand year willow heart." Wang Yi also had a hint of excitement in his heart.

In the original plot, Luo Feng used the "Millennium Willow Heart" to increase his physical fitness from the elementary God of War to the middle God of War level, or even the higher God of War level.

"Wan Nian Liu Mu Xin" effect will definitely be stronger!

But it is estimated that Wang Yi cannot be directly promoted to 'Breakthrough and Surpass God of War'.

'Breakthrough to beyond the God of War' requires more than just the physical aspect.

But for Wang Yi, even if it can only improve a little, it's worth wasting.

As his mind turned, Wang Yi squeezed the fist-sized crystal in his hand directly. The liquid, full of endless vitality, green with golden light, slowly flowed out of the crystal, and at the same time, there was an indescribable flow. The fragrance diffuses, making people feel extremely comfortable in mind and body.

Wang Yi used his mental power to absorb the essence of Ten Thousand Years Willow Heart, turning it into a stream of crystal clear water, and flying into his open mouth.

A burst of coolness spread from his throat to his whole body in an instant, causing Wang Yi to feel aroused.

"Cool!"

Although it has been guessed that Liu Muxin is not painful or dangerous when taking it, this feeling is really very comfortable.

While the whole body was cool, Wang Yi could feel that the whole body was vibrating very fast, very small but surprisingly. In this kind of vibration, the gray-black substance penetrated through the pores of the skin.

And the endless vital energy contained in the essence of Wannian Willow's heart has also caused amazing changes in Wang Yi's body cells.

Genes continue to evolve, and cell viability is also improving.

Wang Yi's body evolution level had originally reached about 100,000 kilograms, but now, it is increasing rapidly...150,000...200,000...250,000...300,000...

The life energy in Ten Thousand Years Willow Heart is not known how many times that of Thousand Years Willow Heart, the effect of taking it is naturally far more than that of Thousand Years Willow Heart.

...

In the dark cave, Wang Yi opened his eyes and looked at the time on the man's tactical watch after I don't know how long it had passed. He found that about three hours had passed.

"Chuck."

"Papa."

Wang Yi stood up, making a crisp sound like popping beans all over.

It's as if I just had a massage in a hot spring bath.

Just one feeling, comfortable!

Feeling the surging power and vitality in his body, Wang Yi couldn't help but show a smile on his face.

Although the specific degree of improvement is not yet known, Wang Yi can vaguely feel that his current physical fitness is very close to the limit of the God of War.

In addition, Wannian Liu Muxin still has a lot of medicinal power remaining in Wang Yi's body.

"The effect of Wannian Liu Muxin is really amazing." Wang Yi nodded in satisfaction.

And he still has the spirits of plants and trees including the four thousand-year willow heart in his hands. These spirits of plants and trees have no effect on Wang Yi, who is about to reach the limit of the **** of war, but he can take it back to his family depending on the situation.

"The ten thousand year willow heart problem has been solved, so now it's time to get to Moyunteng." Wang Yi's consciousness moved, and the sign-in panel again appeared in front of him, and the most conspicuous under the sign-in panel was the seedling that resembled the gourd vine.

"Mo Yunteng..." Wang Yi sighed, but also had a headache.

Moyunteng is indeed a powerful plant to support life, but it also needs resources to grow.

And according to the level of training, the strength of Mo Yun Teng is also different.

At least the current Wang Yi does not have this condition.

After hesitating, Wang Yi finally released the Mo Yun Teng. UU reading www.uukanshu.com

A drop of blood recognizes the Lord.

The most important thing at the moment is to grasp every resource and strengthen yourself as soon as possible.

As for the evolution of Mo Yun Teng, we can think of a way later.

As a large amount of blood is absorbed by the sylvestris, the sylvestris changes from green to red, and the branches and leaves are gently swaying.

Wang Yi has been bleeding twice in a row. With his current physical fitness and cell activity, he naturally doesn't care.

Feeling that it was almost done, Wang Yi stopped the bloodletting and put his hand on Mo Yun Teng lightly. Suddenly, a hazy consciousness passed over and affectionately, giving Wang Yi the feeling...just like a child's attachment to his parents, Wang Yi loosened. With a sigh of relief, he knew that he had successfully subdued Mo Yun Teng.

Mo Yunteng is very loyal. Once he recognizes the master, he cannot betray, so there is only one master in his life.

If the master dies, Mo Yunteng will die too.

"Mo Yun...you will be my partner from now on." Wang Yi gently stroked Mo Yun Teng and muttered.

When the two sides had the same mind, Wang Yi accepted the method of use passed from the consciousness of Mo Yun Teng.

With a heart move, Mo Yunteng suddenly shrank, and quickly disappeared into Wang Yi's skin. At the same time, Wang Yi could feel an invisible layer of cold clothes on his body.

Wang Yi shook his head, Mo Yun Teng is not even a planetary star. Only when it reaches the planetary star and first evolves, can it become a armor body and possess powerful combat capabilities.

And the current Mo Yun Teng is just an ornament.

"For the rapid evolution of Moyunteng, there must be resources, and they are not what the earth can provide..." Wang Yi's gaze once again looked in the direction of Kirishima.

There, deep underground, is where the Meteor Star spacecraft is located!

Sign In To Become a God #Chapter 47: Looking for the Meteorite - Read Sign In To Become a God Chapter 47: Looking for the Meteorite

The night is deep, with a dazzling and charming galaxy flowing, a round of bright moon shuttles between the clouds and mist, and the soft moonlight is sprinkled on the vast and desolate land like running water. Only the roar of beasts comes from afar, breaking the tranquility.

was wearing a gray and black combat uniform, and there was a sapling of *Morinda sylvestris* who had just recognized the master on his skin, and he stepped on a stream-fire war knife. Sixteen blades guarded his body and were ready to attack at all times.

Wang Yi stood high in the sky, under the night wind, like a fairy with a virtual wind.

He looked at the vast lake a hundred miles in the distance, his eyes were like torches, as if he could see through the dense fog that enveloped the lake and the mysterious misty island inside.

"Huh!"

The next moment, Wang Yi suddenly turned into an afterimage, and fell straight into the ground. Before approaching the ground, sixteen flying knives flew out of his body, rotating and cutting towards the ground.

嗷嗷～～

The mud splashed, and under the influence of mental power, Wang Yi rushed into the ground like a ground drill.

Under the rotating assault of the flying knife, Wang Yi sneaked into the soil and rocks quickly.

"Well, it's 10,000 meters, it should be almost the same." Wang Yi roughly estimated that the direction of advancement suddenly changed, from vertical downward to horizontal advancement, and the direction of advancement was Kirishima.

"According to the original book, the spacecraft where Babata is located should be about 15,000 meters below Kirishima..." Wang Yi manipulated his mind, controlled the flying knife, and swiftly shuttled through the ground like an industrious groundhog. "Mawyunteng should be located between three kilometers and one kilometer in Kirishima, but to be safe, I'd better go straight to the position of 10,000 meters."

Although Wang Yi's strength has greatly increased, he is still only the God of War, and he does not have the Black God suit. Facing the planet-star Ma Yunteng, he can't beat it at all.

It's better to avoid it.

"As soon as I get closer, Babata should be able to spot me. What will he do then?" Wang Yi was a little expectant.

Wang Yi now has the same mental power talent as Luo Feng. In the original work, Luo Feng was chosen by Babata because he possessed the best mental power talent among the people on earth (with a brain width of 21). Heir to Mo Xing.

Wang Yi didn't plan to grab Luo Feng's chance, but he could take advantage of it.

The ground was dark and silent, but with Wang Yi's current vision, it was still easy to see things in the dark, and his mental power could radiate to a hundred meters away, making it very convenient to detect.

After a while, Wang Yi, who was originally advancing, looked at the communication watch, "Now I am under Kirishima...Then, let's start searching." Wang Yi glanced at the surrounding environment. At this moment, he was among the rocks. .

Six streams of light flew out from Wang Yi, spinning towards the rock in front of him. Under the high-speed spinning knife, the rock was easily drilled through like tofu, and Wang Yi rushed in.

However, Wang Yi did not rush forward, but slowed down and searched carefully while moving forward.

kept sniffing his nose.

There is no rice fragrance.

"Did Babata spot me?" After a while, Wang Yi, who had found nothing, sat on a rock in the ground, a little helpless. "Is he sleeping? As an intelligent being, does he have a sleeping function? Or I don't meet his requirements and he doesn't bother to pay attention to me?"

Wang Yi cheered up.

"Forget it, even if he doesn't want to talk to me, as long as I can find the location of the Meteorite Star and sign in by the way, it won't be a wasteful trip."

Wang Yi stood up.

Babata's spacecraft has a camouflage and concealment function. Even if the earth comes from ancient civilizations and can monitor the world, it will not be able to detect the existence of the Meteorite spacecraft.

Wang Yi believes that no matter how he finds his mental power, he can't find Babata's spacecraft.

But he has a sign-in panel.

As long as Wang Yi is within 100 meters of the sign-in location, he will choose to sign in. So even if the spacecraft is not found, as long as the sign-in succeeds, it means that the spacecraft must be nearby.

For Wang Yi now, it is a worthwhile trip to be able to sign in on the Meteorite spacecraft.

He secretly expects, what rewards will be given to him if the Meteorite spacecraft signs in.

"At any rate, it is also an immortal spaceship with a value of several million yuan. Although it is now damaged and can't fly, but the overall value is placed here, no matter how low the level is, it can't be lower." Wang Yi is full of expectations.

"I don't know what signing in the Meteorite spacecraft will give me? Wouldn't you give me another Meteorite spacecraft? Shi (breath in), is this reward too exciting?"

"Could it be possible to give me a Babata?"

"Or what treasure, the mystery of Meteor Moxing's inheritance?"

"There are many immortal corpses in the spaceship...Will you give me a corpse?"

Wang Yi was a little bit crazy.

The entire earth is a big treasure. Except for the earth made by the reincarnated "Sit Mountain Guest", the strongest man in the universe, it is the treasure left by the owner of Meteorite.

The remains of ancient civilizations, the Meteor Star spacecraft, the Mechanic spacecraft, the Silver Blue Empire spacecraft, the Zerg Mother Imperial Lair... these are all good places to sign in for Wang Yi.

As long as you are lucky, you might turn your bike into a rocket in minutes!

Shotgun for nuclear bombs!

As long as you are lucky and reach the pinnacle of life, you only need a successful sign-in. UU Reading www.uukanshu.com

Wang Yi couldn't help looking lovingly at the golden panel, as if looking at his own son...

The golden panel is as silent as before.

No matter the host abuses him thousands of times, he treats the host as his father.

Even if I occasionally drop the chain, I will never leave the host (daddy) alone.

"Son, whether Dad can reach the pinnacle of life in the future and eat and drink in the universe, it depends on you..." Wang Yi said emotionally to the panel. "Don't be angry with your father at this time, you are already a mature panel, and you have to learn to be responsible for your work."

Sign-in panel: "..."

Time passed slowly. After walking through the dark rocks for a long time, Wang Yi suddenly moved his nose, and a faint smell of rice faintly spread into his nose.

The taste of rice?

Wang Yi refreshed and became excited. "Wooden crystals! This must be the taste of rice crystals!"

Wang Yi speeded up, and moved fast along the direction where the rice fragrance came from. Soon, a faint light appeared in front of him.

Wang Yi swept away his mental power and smiled. "Sure enough, it's Mi Yingjing!"

"There is actually a rice crystal here, it seems that Babata really found me."

Regardless of whether Mo Yun Teng or Mu Yingjing, it was actually Babata that was used to attract the strong on earth and used it to test their talents.

The wooden crystals are very precious, and they are priceless treasures on the earth. If Wang Yi did not meet the requirements of Babata, he would never release it easily.

This white transparent crystal also exudes bursts of rice fragrance, which makes people have a desire to drool.

When Wang Yi's mental power was rolled, the white transparent crystal flew over automatically and fell into Wang Yi's hand.

Sign In To Become a God #Chapter 48: All acting - Read Sign In To Become a God Chapter 48: All acting

"Haha, a wooden crystal is here!" Wang Yi was happy.

Wooden crystal is a treasure used for cultivation, and it is also a treasure for taming animals and plant life. Very useful.

For example, Mo Yun vine, cultivated with wood sacred crystals, will soon grow to a 'constant star'!

On today's earth, that is the existence of invincibility!

Only a wooden crystal can make an apprentice of rank eight and rank nine, spend a month of work, directly into the first rank of star!

For Wang Yi, who is currently eager to make a breakthrough, Mu Yujing is undoubtedly a timely rain.

Moreover, the life energy of the wood crystal can also be used for training and quickly improve your strength!

Wang Yi doesn't want to learn from the protagonist of the novel. He obviously has ready-made treasures to break through quickly, but he wants to make his own sword go slanting and make a breakthrough on his own!

"My physical fitness is already at the peak of the God of War, and my mental power has reached the limit of an apprentice's ninth rank. Maybe a wooden crystal can make me break through in both aspects at the same time! Become a star warrior and a spiritual teacher!" Wang Yi's eyes glowed.

Regardless of whether you are a martial artist or a spiritual teacher, you have specific requirements if you want to break through to a planetary star. You don't want to break through!

Of course, if you are a wizard of the sky, like Hong and Thunder God, you can break by yourself.

Breakthrough is not difficult for Wang Yi, whose genetic level is far stronger than that of a human being on earth. Even if there is no wooden crystal, it is estimated that after a period of time, he will naturally break through.

Compared with countless other warriors trapped in the realm of God of War, I don't know how much stronger it is!

However, Wang Yi is not willing to wait!

"There is a way to make a breakthrough, but it will take time. It is better to solve the problem directly with a wooden crystal." Wang Yi smiled and put the wooden crystal away in a happy mood. "Furthermore, the Muyajing can also be used by the family." Wang Yi is naturally not stingy with his family.

After all, the meaning of relatives to him is more important than others.

"Since the wooden crystal has appeared, there must be more than one." Wang Yi was refreshed, his eyes pierced into the darkness. "Babata, now, it depends on how powerful you are."

Wang Yi sucked his nose and continued to drill towards the ground.

In the underground rock a few kilometers deep from Wang Yi's location, in an ancient black spacecraft.

In a spacious hall, the dazzling light shone from the height of the hall, a small man of only 1.4 meters, like a child, with two horns on his forehead, blood red eyes, and a virtual figure in a black robe is watching A three-dimensional projection screen in the hall, and in the screen, is a slowly moving figure of a black-haired teenager in a gray and black combat uniform.

"Hmm... After waiting for so long, I finally waited for a human with a sufficiently wide brain to come over." The child with blood-red eyes like a little devil stared at the figure in the picture tightly, "Come on, come on. Little guy, as long as you come here, the benefits will be great. As long as you worship my boss as a teacher and become the descendant of my meteorite star, it is not a dream to become a strong man in the universe under the guidance of my Babata."

When talking about 'Boss', the little devilish child's tone fell down, looking in the middle of the hall, his eyes full of sadness.

"Boss..."

"Fifty thousand years..."

"It has been fifty thousand years since you died. I will definitely follow your words and cultivate you an excellent disciple!"

"must!"

.....

Regardless of Babata's nagging, on the other side, Wang Yi was surprised and "accidentally" picked up two wooden crystals.

"It's already the 13th..." Like an ordinary person picking up gold, Wang Yi skillfully put the wooden crystal away, muttering in his heart.

In the original work, when Mu Yujing appeared, it attracted the strong from all over the world. A group of people surrounded Mu Yujing to fight to death, and even hung up a few planet stars, but they didn't grab much.

Now Wang Yi just wandered underground for a few laps and found a bunch.

I have to say that the same person has no fate.

As expected, the protagonist's treatment is different. Wang Yi sighed inwardly.

But this world is inherently unfair, and Wang Yi didn't bother to think too much.

Continue to search for Mu Yajing.

Gradually, Wang Yi went deeper and deeper into the ground.

and it is 15600 meters deep underground.

"Target locked."

"Already obtained the wooden maiden."

"Turn on the cue and start to take the lead."

The strange ripples that could not be noticed by the naked eye changed slightly. From the depths of the earth, they followed a straight line through many rock layers and reached Wang Yi, who was looking for the wooden crystals. The naked eyes, instruments, and thoughts could not detect it. The ripples passed directly into his sea of consciousness.

And Wang Yi also found that there was a thought in his mind, that is, to keep moving in one direction, as if he instinctively felt that he would find a wooden crystal in that place.

Wang Yi immediately understood in his heart that it was Babata who had begun to make trouble.

"This Babata, I can't get out of the house, so I just make this kind of mystery..." With the psychological preparation, Wang Yi will naturally not be easily influenced by Babata's

psychological hints, but he still pretends to be lured by him on the surface. Go deep underground.

In the spacecraft hall, Babata was also looking forward to this scene.

slap your mouth.

"What a greedy little guy, come here. Hey." Barbata smiled triumphantly, "How could you, a native of the earth, escape my master Barbata's grasp."

Wang Yi, pretending to be at a loss, was still happily collecting the 'accidentally' found Mu Yajing.

It seems that Babata was worried about the lack of attractiveness, so while Wang Yi was looking for it, he still threw out some wooden crystals.

"There are already 27, and Babata is really willing." Wang Yi is full of rewards~www.mtlnovel.com~ However, the big head is still behind!

"Huh? Why are there no fragments of the red mixed copper mother?" Wang Yi glanced around, then stepped on the ground several times with his feet.

"This Babata, look down on people." The Hunyuan copper mother fragment is extremely sharp and is a big killer. The effect on Luo Feng wasn't that great either, and Wang Yi didn't mind taking it away.

It's a pity that Babata might not have thought of this and didn't give it out.

This makes Wang Yi a little unhappy.

After a while, when Wang Yi 'picked up' the 32nd wooden crystal, on the thick rock wall not far away, he threw a knife into a side of extremely hard metal.

"Here?" Wang Yi moved in his heart, and when he looked around, he could see that there seemed to be metal in the narrow gap beside him.

"Meteor Star Spaceship!" Wang Yi understood that he was already there.

But on the surface, Wang Yi still showed surprise, surprise, and shock.

And Babata, who has been following Wang Yi in the spacecraft, naturally saw this scene with satisfaction.

"The fish has taken the bait." Two people thought at the same time.

Without hesitation, Wang Yi directly manipulated the flying knife to open the rocks around the metal, exposing a passable passage. In front, there is a dusty strange silver-white metal 'door', which is similar to this one. The 'door' of the smart fighter's cabin door is now half closed.

Wang Yi blinked.

slowly walked over, and at the same time the mental power spread in.

Soon Wang Yi discovered the scene he wanted to see—just on the ground of the hatchway entrance, all the spars with a faint white halo gathered together, ten, twenty, thirty. Stars... densely packed, there are at least two to three hundred!

Even if he had already expected it, Wang Yi's eyes instantly turned red.

Sign In To Become a God #Chapter 49: Incompetent furious. Babata - Read Sign In To Become a God Chapter 49: Incompetent furious. Babata

"A lot..." Wang Yi's nostrils enlarged, his face flushed, and his eyes fiery.

Seems like a pervert who has been single for decades suddenly sees a peerless beauty.

After subconsciously looking around, Wang Yi realized that he was alone in the ground, and perhaps there was another Babata who didn't know where to hide and peeping.

"Hey... it's all mine." Wang Yi grinned, and without hesitation, the figure jumped into the spacecraft's entrance, not worrying about the danger at all.

The entire spacecraft is actually under the surveillance of Babata, an intelligent life, and since Babata hiding behind the scenes attracts him with so many precious wooden crystals, it will naturally not hurt him easily.

To hurt Wang Yi is meaningless to Babata.

Intelligent life is also intelligence, has its own logic, and will not be easily affected by emotions and do meaningless things.

"One hundred twenty-five... One hundred and seventy-one..." Wang Yi came out like an evil tiger, swiftly speeding, and like a wind rolling cloud, all the white transparent crystals near the entrance of the passage were collected.

stood up with unfinished talent, "Three hundred and fifteen..."

plus the wooden crystals obtained outside, it is 348!

Each wooden crystal can make an apprentice of rank eight and nine break through to a planetary star in one month!

How many planet stars are there now on the whole earth?

This is a great fortune, even "Hong" and "Thunder God" are jealous.

So before Wang Yi is strong enough, he will never reveal that there is a wooden crystal in his body.

If it doesn't, the result is very serious.

Wang Yi is not afraid, what about the people around him?

As long as one is exposed, others must suspect that he is hiding more, and the subsequent troubles are endless. Human nature is like this, and the explanation is useless.

Wang Yi didn't plan to cause trouble for himself.

Wang Yi looked at the empty passage in front of him. All the wooden crystals had been taken away. Wang Yi knew that there must be more in Babata, but unfortunately, he couldn't go through.

Before Luo Feng got the golden horn monster clone, he chose not to change the original history as much as possible.

Of course, several years after the arrival of the Golden Horn, Wang Yi at that time did not know how many opportunities he got and how far he grew up.

Maybe Wang Yi at that time dealt with the golden horn behemoth, maybe he could slap to death with a slap.

It would be better if the golden horn beast could be found before it was born. Wang Yi is also very interested in the secret method of the golden horn monster's clone talent.

Wang Yi glanced at the spacecraft passage again.

"Check in."

The sweet voice of his son's sign-in panel sounded in Wang Yi's ears.

[Ding, congratulations to the host for signing in successfully, and a premium space ring is rewarded.]

【The space ring has been placed in the panel space. 】

【Number of check-ins available for this place: 0】

Hearing this result, Wang Yi was a little disappointed.

Compared with auxiliary props such as the space ring, Wang Yi still prefers things that can be directly improved.

For example, ten thousand wooden crystals, a spacecraft of Meteor Star... It's okay to have a Baba 2...

Unfortunately, the sign-in panel is a random reward, and a place can only sign-in once, and there is only one chance. There is no way if you are not lucky.

Wang Yi saw that there was an extra ring in the grid under the golden sign-in panel. The panel space can only accommodate the items for sign-in rewards. Generally, it cannot be put back again when it is taken out and cannot be used as a storage space.

"Also... this ring should be the one given to Luofeng by Babata. It seems that the internal space is very large, and it is considered a treasure in the universe." Although Wang Yi was a little disappointed, it was acceptable.

If only a wooden crystal or the like can be signed in the Meteorite spacecraft, then his mentality will really collapse.

"The Mu Yujing has been taken, and the sign-in is completed, then..." Wang Yi slowly raised his head.

He seemed to be able to see that a little devil-like child was watching him expectantly in a dark corner, waiting for him to step into this pit.

It is a pity that Wang Yi has his own ideas and does not want to follow Babata's wishes.

And in the central control room of the Meteorite spacecraft, Babata also looked at the black-haired boy in the three-dimensional projection, who had been standing still for a long time, and was also a little insufficient.

"Why doesn't he come in yet?"

"Come in, there are no traps here!"

"There are more treasures inside, and Master Babata will not eat you again."

"Trench!"

As if he heard the voice of Babata, the black-haired boy in the three-dimensional projection raised his foot... Then he turned around without hesitation, and rushed out of the hatch, riding Juechen amidst Babata's stunned expression, instantly moving away. go.

"?????"

Babata stared with blood-red eyes, and watched that the "Moon Star Future Descendant" he had finally selected was oiled on the soles of his feet. He ran so fast, as if there were a hundred behemoths in the starry sky chasing after him, just disappearing from him. Right now.

Babata is messy in the wind.

"you!"

"**!"

"Just ran away like this!?"

Babata is not a fool either, he reacted immediately and realized that he had been tricked by someone, roaring like thunder!

A series of angry universal lingua franca spouted from Babata's mouth ~www.mtlnovel.com~ and then switched to hundreds of dialects of different universe regions.

His great Lord Barbata, who used to traverse many star regions and left behind the horrible legend of the "Devil Barbata", was actually played by a small native of the earth who had not yet dried his hair!

is simply a shame!

"what!"

"Asshole! One day, I want you to know how good my Babata is!"

Babata's angry roar echoed in the spaceship for a long time.

.....

On the other side, Wang Yi swiftly shuttled among the hard rocks like a swordfish, rushing to places tens of kilometers away at the fastest speed, and is still going away.

"Good harvest this time!" Wang Yi hummed happily.

As for the Babata who was angered by him... that guy can't get out again, Wang Yi is not worried that Babata will make trouble now.

And he and Luo Feng are friends. Even if Babata comes out later, Luo Feng will not agree to move him.

Perfect!

Wang Yi was full of spring breeze and refreshed.

This trip to Kirishima can be said to be a full harvest, with a physical fitness reaching the limit of God of War. After signing in to 'Moyun Vine', 'Space Ring', and getting a lot of wood crystals, and some spirits of plants and trees...

waits for using Muyajing, he can directly break through to the planetary star in the shortest time, and then continue to become stronger!

"It doesn't make sense to stay in the training camp anymore." Wang Yi's eyes were deep.

"However, I can't expose it yet!"

In April, Wang Yi didn't even pass the quasi-warrior test. By August, he had become a powerhouse beyond the **** of war... spread out, I am afraid the whole world will be crazy.

Wang Yi's scalp tingling when he thinks about that kind of scene.

Sign In To Become a God #Chapter 50: Wang Yi beyond the ** of war - Read Sign In To Become a God Chapter 50: Wang Yi beyond the **** of war**

"So, the training camp can be my temporary dormant place. As long as I don't show the strength beyond the **** of war, and don't encounter the existence of planetary stars, no one can find out what level I am now."

"If it doesn't work, I can only hunt two lord-level monsters, get the God of War evaluation, graduate from the training camp, and then return to the base city!"

"But Hong doesn't know if he has left the customs, and if he meets him again..." Wang Yi had a headache.

Actually, Wang Yi didn't think about breaking through after graduating from training camp. There is no hidden danger and there is no need to worry about being discovered easily, but... that would be a waste of time.

Time is very precious to Wang Yi.

"It doesn't matter, I'll break through to the star level first, and I will practice for a while in mainland Australia."

"With woody crystals, I can become stronger quickly, and Mo Yun vines can also be cultivated. With Mo Yun vines, my strength can go even further, and I can sign in to other ancient civilization sites on the earth, and when I have enough ability to protect myself, it doesn't matter even for a showdown."

Wang Yi knows that strength is the foundation of equal dialogue!

Without strength, it is false to say anything about equality.

It is stupid to put one's own destiny in the hands of others.

You must have an idea, Wang Yi is in the mood to focus on the reward 'Space Ring' he just signed in.

With a thought, the spatial ring immediately appeared in his hand. It was a seemingly ordinary silver ring, and at the same time a message poured into his mind.

"It turned out to be like this..." Wang Yi immediately understood how to use the space ring.

As long as a trace of spiritual power is penetrated and the spiritual imprint is incorporated into it, the space ring can recognize the master.

Wang Yi put the silver ring on the index finger of his left hand. The next moment, the ring was silently flowing like mercury and melted into the skin. Wang Yi felt a chill, and then the ring on his finger disappeared completely.

Wang Yi's mental power penetrated into the spatial ring, and the spatial ring also undergoes subtle changes. Then, Wang Yi felt that the ring seemed to be his own hands and feet, and he did not need mental power to know everything in the ring clearly.

There is a cuboid space inside the space ring, approximately 612 meters in length, 521 meters in width, and 108 meters in height.

"It really is the spatial ring that Babata gave Luo Feng." Wang Yi nodded clearly.

The size of the ring in this space is also a good treasure when placed in the universe.

Wang Yi put all the wooden crystals and the spirit of grass and trees in the backpack into the space ring.

looked at his empty left hand, Wang Yi was very satisfied.

Then there is no need to worry about being discovered.

On the wilderness dozens of kilometers away from Lake Kirishima, the ground suddenly exploded, and a ghostly figure rushed out, suspended in mid-air, under the hazy moonlight, revealing the appearance of a handsome boy in gray and black combat uniforms.

is Wang Yi who has just signed in from Babata.

Wang Yi looked around.

"Now, let's find a place to break through. It just so happens that Moyunteng will also be cultivated."

Wang Yi returned to the steep cliff cave where he originally hid. The environment is remote and desolate, and even monsters rarely appear, which is suitable for him to practice in retreat.

"Moyun." Wang Yi released the seedlings of Moyunteng. The red vines, which were only two meters long and resemble gourd vines, were rooted in the rock. The roots easily disappeared, and the branches and leaves fluttered towards Wang Yi.

"Moyun, you can accompany me to practice here during this time." Wang Yi touched the leaves of Moyun vine, a white translucent crystal appeared in his hand, and at the same time a fragrant rice smell permeated the cave. .

Moyunteng seedlings felt the presence of woody crystals, and the branches and leaves of the vine shook more severely. At the same time, a strong sense of desire passed from Moyunteng to Wang Yi's mind.

"Eat, grow up quickly so that you can help your master." Wang Yi crushed the woody crystals, sprinkled them on the leaves of the vine, and was wrapped in the leaves of the vine.

"Goo~oo~" A strange voice came from Mo Yun's body.

Moyun vine grows up visible to the naked eye. The branches and leaves and vines are growing and spreading quickly. Soon the cave is filled with Moyun vine. Chichi~~ More vines extend into the rock and grow rapidly.

And Wang Yi could also feel that the aura of Mo Yun Teng was constantly getting stronger, and the color of its appearance changed from red to purple.

After swallowing the wood crystal, Mo Yun vine began to evolve rapidly.

However, according to Wang Yi's calculation, if you want to quickly evolve to the first level of the planetary star, you can't do it without four or five wooden crystals.

Moyun vines were originally huge plant life, and naturally they need more energy for evolution than human beings.

In the original work, the Moyunteng was thrown out by Babata, but it took decades to evolve to that point, but now Wang Yi wants Moyunteng to evolve at the fastest speed in a short time. The cost is naturally much greater.

Seeing that Mo Yun Teng had begun to evolve, Wang Yi also settled down and prepared to practice.

Sitting cross-legged on the rocky ground, Wang Yi took out two wooden crystals from the space ring and stared at the transparent white crystal with the intoxicating rice fragrance. Wang Yi grinned and placed the wooden crystals on Hold it in both hands and start practicing.

Under the inducement of the gene primitive energy, a stream of energy quickly poured into Wang Yi's body. The energy of the 'woody crystal' is different from the genetic primal energy, and the energy of the woody crystal is very pure and pure! It is easily absorbed and refined by the body!

Not only the genes are evolving, but even the soul, the spiritual power in the sea of consciousness, is like a seedling that has been moisturized, growing rapidly.

With the influx of the pure and surging life energy of Muyajing, UU Reading www.uukanshu.com is merged with genes and soul, and Wang Yi's body is constantly evolving.

Break through the original shackles little by little to reach a higher level.

In the dim darkness, in a rock cave densely covered with lightly shaking red-purple vines, a figure almost completely submerged by a sea of vines sat quietly at the end, motionless, but the aura of his body continued to grow stronger.

Time goes slowly...

The birds and beasts in this mountain range seemed to perceive something terrifying, and fled this area one after another. For a while, this mountain range seemed even more desolate and dead.

And deep underground, black and purple vines are spreading and growing, like an octopus, spreading their minions.

The breath radiating from the invisibility made the sensitive monsters frighten and dare not stay.

The life and death adventures of the training camp students on the Australian mainland are also going on.

Some students communicated through communication watches, but some fell silent.

And Lin Youyu, Gao Yurong and the others also knew that Wang Yi was living in a dangerous wild, although they were worried, they never took the initiative to disturb him.

On August 11, 2056, Wang Yi came to Australia on the 11th day, at 1:30 pm China time.

In the dim cave, inside the purple vine that had grown thick to more than 8 cm in diameter, a figure suddenly moved and slowly opened his eyes. In an instant, there seemed to be two more flames in the darkness.

Boom!

The flame was filled, the heat wave rolled, and the suddenly stinging Mo Yun vine panicked and put the vine away, and the young man who was covered in flames like a **** slowly stood up and looked down at his undamaged body in the flame. , Showing an inexplicable smile.

"Finally broke through, star!"
