Chapter 1501: The Absolute Beginning Gateway

The Origin fusion was easier than Shi Yan had imagined. After Audrey had agreed to cooperate with him, the whole process was really smooth.

Previously, he didn't know the fusion method, and thought that it would require some conditions. However, when she sent him the message to tell him that she would cooperate with him, he immediately knew what to do!

A powerful call came from deep in his soul! It felt like he wanted to retrieve his missing limbs as his soul emitted fierce vibes! The energy rippled from him had bright colors, as they were filled with brilliant outer space streamers. The magnificent light then filled Audrey's Sea of Consciousness.

It was like so many hands had clutched Audrey's Origin in her host soul and pulled it out to absorb it!

It was the gathering instinct between the Origins.

Before Shi Yan had come here, Audrey's host soul was affected by Desolate's will. Crossing endless spaces, Desolate had used the Soul Seal to torture her, drowning her in blurry dreams, to the point where she couldn't tell whether they were true or illusory. At the same time, Desolate sent her similar calls.

It was exactly the same as Shi Yan's call.

Feeling Shi Yan's soul call, Audrey was hesitant. She was afraid that it was Desolate's trick to trap her and make her proactively give her Origin away.

Then, she decided to ask Shi Yan something that only they knew, who gave her the correct answers. That way, she had confirmed the source of the soul calls: they were from Shi Yan.

With that, Audrey didn't hesitate anymore.

Wisps of brilliant five-colored soul light flew out of her host soul. As soon as they left her, they headed fast toward Shi Yan's soul magnetic field.

As soon as the soul lights came to that vibrating soul magnetic field, they turned into the five-colored flames which were actually the heaven flames of the Origin. Then, the flames danced and blended with Shi Yan's soul.

Shi Yan had a feeling of perceiving knowledge and memories comprising of many scenes and images. After fusing with each flame, he saw something from the magical but ancient memory. He vaguely saw some old, resentful stories that took place in the Absolute Beginning Era.

It was Desolate's memory!

Unfortunately, it was still incomplete after this fusion. Taking Audrey's Origin, Shi Yan got two-fifths of Desolate's soul, memory, and knowledge. It was a little less than expected.

"Absolute Beginning... Destination of life journey.... Absolute Beginning Gateway... Key..."

Pieces of scrambled, inexplicable memories flowed into his head. Getting the memory, he suddenly realized that the Power Upanishad Symbol Tower was the key of the "Absolute Beginning Gateway" something. He could use this massive tower to get through that gateway. However, he wasn't so sure what the so-called Absolute Beginning Gateway was, and what was behind it.

He continued to extract the Origin, collecting memory and knowledge. The Power Upanishad Symbol Tower hovered above his soul, protecting him from any evil souls.

Shortly, Audrey's Origin was fused with his.

The Soul Refining Cauldron sank into Audrey's Incipient Extent. Since Audrey didn't have the Origin, it didn't attack Shi Yan anymore.

Without the Origin, Desolate couldn't affect Audrey through space, and she slowly got a hold of herself. She pulled the Soul Refining Cauldron to stop it from attacking Shi Yan, which could affect his fusion progress.

In her Sea of Consciousness, Shi Yan was blazing like the sun, emitting dazzling rays. Rays of light illuminated her Sea of Consciousness, giving her a marvelous feeling of his fusion.

Audrey didn't know why she felt so relaxed and comfortable. She wasn't dispirited because of her lost Origin. Quite the contrary, she felt that her burden was gone. Her soul and spirit were sublimated, and her body now had magical light twirling in it.

Xuan He and Ming Hao had worried about Audrey as they thought her soul would vanish.

At this moment, Audrey's body emitted the thick and vigorous life energy fluctuation. Different colorful light beams moved on her as though they were cleaning the contaminants and dregs in her body, so that she could sublimate her life.

Adele's eyes brightened and her glum face was lit up. "Seems like my little girl's alright. It's bad that she lost the Origin. I'm worried if she can obtain good things like that later..."

She felt regretful because she thought that her daughter's attainment was due to the Origin of the God-blessed Mainland. Today, her Origin had been fused with Shi Yan's soul, which had saved her, but she had lost her Origin. It could affect her cultivation.

"No, it's not bad that she has lost the Origin." Dracula of the White Bone Clan shook his head, his eyes bright with surprise. "To the warriors with the Origin, it could be good, but it's also a burden for their growth. This child lost the Origin, but her soul and spirit have sublimated. She has experienced the marvel of the Absolute Beginning soul. I can say, she obtained luck in her misfortune ..."

Ming Hao looked suspicious, asking, "You mean... her realm wasn't affected?"

"It looks like she has advanced further. The Origin in her soul was a rope that tied her down. She has pulled it off today, so she can soar up now," Dracula nodded, eyeing Audrey and talking sincerely, "Her realm has progressed, and her power Upanishad has become more profound. As long as she accumulates enough God power, she can leap further."

Audrey had just entered the Immortal Realm. According to Dracula, if she advanced further, would she enter the Second Sky of Immortal Realm directly?

How could it be?

Let alone Ming Hao, Hiro, Montecie, and the others were also surprised. They thought that it was almost unbelievable.

"It's hard to explain," Dracula turned to them, speaking, "To some warriors, the souls of the Absolute Beginning creatures could be their motivation. For example, Shi Yan has a tough mind, and he's also extreme and bold. Such warriors wouldn't be bound to anything. He owns what he got. No one can affect him."

He turned to observe Audrey, "But, there're also a kind of warriors who will find the soul of the Absolute Beginning creatures a burden in their hearts. They would doubt that they aren't themselves. Once this kind of doubt emerges, they won't have the confidence, and it will affect their cultivation, binding themselves..."

"So you mean...To Audrey, the Origin of the God-blessed Mainland is a rope that tied her down?" Ming Hao was surprised.

Dracula nodded.

Everybody looked pensive as they quietly assessed Audrey. Her breath had normalized under the people's gaze; slowly, her soul magnetic field expanded.

Layers of marvelous light rippled from her, making her look like she had obtained a new life. It was strange but magical, as if she was born again.

Right at this moment, Shi Yan's co-soul retreated from the corner of her eye, returning to his brain.

Audrey also opened her eyes. Deep in her pupils, people could see so many souls moving, creating a magical soul formation. That soul formation was much similar to the one they used to see on the Soul Refining Cauldron. Finally, she had become the cauldron's rightful owner.

"It feels like someone has removed the stone from my heart. It's really comfortable."

She beamed faintly, as pretty as a blooming flower. Her bearings had come more outstanding and mesmerizing. The ones who had befriended her had their eyes brightened, as if it was the first time they saw her.

"My dear, are you okay?" asked Adele.

"Yes, mom. I'm okay. I'm really good!" Audrey confirmed, then looked at Shi Yan in his eyes, looking shy as she lowered her head. "He did well in my brain. I didn't suffer any pain. He was gentle and natural..."

Hearing her, people turned awkward as they suddenly recalled the marvelous features when the souls blended together, their faces ambiguous.

Mei Ji bit her lips, glaring at Shi Yan as she thought that Shi Yan had done something dubious in Audrey's head.

Boom! Boom! Boom!

All of a sudden, the beautiful light protections outside the planet were hit by waves of shooting meteors. Sparks and halos bloomed magnificently.

Montecie and Hiro lifted their heads to look at the sky, their faces darkened as they screamed, "Someone's attacking us!"

"Who?" Mei Ji gritted her teeth, her eyes flaring coldly. "Who dares to attack in the chaotic space basin? It will be big trouble if we battle here."

"I know who," Shi Yan intervened, his eyes serene. Facing the void, he said, "It's Zi Yao. Her real body used to stay in the chaotic space basin. After recognizing that Desolate has awakened, she got back here. She knows this place better than us."

"Why is she here?" Hiro discolored. "Is this her territory?"

"Impossible!" Dracula shook his head, "This place isn't a territory. It doesn't have heaven and earth energy. It's not suitable for any creature to stay and cultivate in. It's not a territory."

People then exhaled in relief. Fighting with someone in his or her territory was the most stupid thing to do.

If this place were Zi Yao's territory, they would never escape. Even the warriors like Hero or Montecie in the territory of the same level expert would be killed eventually.

In one's territory, one's own magical world, he was the sole God that could bend the rules of Nature. The territory's owner could do whatever pleased him there.

"Let me see why she comes here." Shi Yan stood up. After one step, he soared up into the sky, piercing through the Grace Mainland's light protection.

He sat on the misty clouds outside the Grace Mainland, looking at a massive asteroid afar. He shouted at the twelve-headed giant snake, "Why are you here?"

"Little devil, did you forget your old partner when you got a new one?" Zi Yao smiled naturally, seating herself on a brilliant throne. She suddenly moved toward him. After the first glance, Zi Yao's eyes brightened. "Not bad! You got another soul clone of it. It's unexpected! Well then, unless it kills you and refines you to take your soul, it will never recover fully!"

Chapter 1502: Time has changed

"What do you want?"

Hovering in midair, Shi Yan looked calm. Today, he had reached the Peak of Immortal Realm. After fusing with another Origin, he felt his soul had transformed again, and he could enter the Territory Ancestor Realm soon. Now, he wasn't afraid of Zi Yao.

He was confident that he could leave as he wished!

At that moment, shadows appeared by him: they were Hiro and Montecie, the true experts of the White Bone and Phantom Clan, the peerless existences in this vast universe. Also, they were two of the ten Great Territory Ancestors.

In these given circumstances, Zi Yao slightly changed her face. She understood clearly that with Hiro and Montecie here, she couldn't threaten Shi Yan.

Swoosh! Swoosh! Swoosh!

More shadows emerged. They were Dracula and his wife, Mei Ji, and Gay. They were also Territory Ancestor Realm experts!

Zi Yao's eyes changed, feeling a bit frightened by now. Looking at Shi Yan, she felt a headache developing.

'Since when could he gather so many experts like this?' She was surprised. She knew the characters at the Territory Ancestor Realm with the power of the Dark Energy could harm her. The Territory Ancestor Realm Experts were the peak existences of this epoch. Their life form and power Upanishads had reached an extreme level.

In some marvelous aspects, they weren't as good as the Absolute Beginning creatures. However, in a real fight, they weren't too bad.

"We can kill her!"

All of a sudden, Hiro hissed, his face filled with murderous aura.

Montecie's cute face radiated amazingly as she sniggered, "The Absolute Beginning creatures have many powers, and their entire bodies are treasures. If we can kill her, it'll be good for all of us!"

Zi Yao's face went stiff.

Looking at Hiro and Montecie, she suddenly recognized that her background wasn't as strong as Devour's.

The Devouring Clan had Edgar and Labitte as the Territory Ancestor Realm. In the Sea Domain of Nihilism, it was one of the Seven Great Clans. The Devouring Clan had developed to an extreme level, and was a great support to Devour.

However, she only had Tian Xie...

None of her servants had reached the Territory Ancestor Realm. In other words, they couldn't help her much. In the battle between the Territory Ancestors, they couldn't join to help her.

Looking at Hiro, Montecie, Gay, Mei Ji, Dracula, and his wife, Zi Yao's eyes turned dark. She finally admitted that they could threaten her.

She pondered for seconds then laughed. Her powerful attractive power rippled, attacking all the warriors' minds.

As she was laughing, her true body wiggled, drawing the asteroid. Zi Yao waved and Cecilia appeared by her. "This little girl has a deep love like the sea for you. You don't want to see her die tragically, do you? You see, she has my mark on her head..."

She guided more warriors over: Cecilia's teacher Lena, Gu Lian and Gu Ling of the Thousand Fantasy Sect, and some other faces familiar to Shi Yan, Adele, and Ming Hao. They were all dragged here with the green snake mark on their foreheads. Zi Yao had imprinted her soul seal to bind their souls.

With a thought of hers, Cecilia and the others couldn't even wiggle before their souls perished.

She got many people behind her who had a good relationship with Xuan He, Ming Hao, Adele, and DeCarlos. They all wore a glum, reluctant, and desperate face.

Shi Yan turned to see Cecilia.

Cecilia stooped, having a bitter and sorrowful face. She didn't talk, just standing in bafflement.

Shi Yan suddenly felt sour.

"Besides, although this chaotic space basin isn't my territory, I can change the surroundings a bit," Zi Yao sneered and then flung her hands, her moves quite gentle. Then, people saw a darkness fall as outer space streamers came with blasts of wind and snowstorm.

"I've lived here for hundreds of thousands of years. I'm familiar with this place. I have even refined some areas. If you fight me here, I don't think you will gain the upper hand."

Looking at the strange commotion, Hiro and Montecie felt heavy-hearted. They didn't sound really confident.

"If we fight, both sides can't retreat unharmed. We should stop." Shi Yan kept a cold face and snorted. "And, if you know that already, why are you here? You can't kill me. Why do you need to stand in my way?"

"Do you have the Power Upanishad Symbol Tower?" Zi Yao curled her lips.

"In my hands." Shi Yan answered.

As the matter was confirmed, Zi Yao felt indignant. She loathed Devour because if he hadn't cleared her soul seal, she would have had the Power Upanishad Symbol Tower already. Shi Yan would have never had a chance to touch it.

But, she knew it was no use to hate the other. "Do you know the secrets of the Power Upanishad Symbol Tower too?" She asked all of a sudden.

"It's the key to open the Absolute Beginning Gateway," Shi Yan said at his own convenience.

Hearing him, Zi Yao was shaken hard. She couldn't help but scream, "You! How could you know that? Oh right, you got parts of his soul! Damn it!" At this moment, the twelve snakeheads swayed as if they were all frantic.

“If you dare to fight, we will try to kill the Absolute Beginning creature too!” Shi Yan suddenly shouted. His shout was like a thunderclap that awoke Zi Yao. She didn’t dare to ignite the fight, just struggling hard at her spot.

“If you stop me here, we won’t stop until someone dies!”

Shi Yan was extremely bold. Right after that, he drove the Grace Mainland, tearing this area of strong blasts and heading to the territory entrance.

“Goddess Mother!” Tian Xie watched Shi Yan’s group leaving and hissed to remind her. However, Zi Yao didn’t order to attack.

“Shi Yan’s side is different. He has several Territory Ancestors who can actually hurt me. Once we fight, even though I can win because I’m more familiar with this place, we would be damaged badly. It could be even worse than that year. So, we shouldn’t be impetuous.”

After Shi Yan’s team had left for a long time, Zi Yao quieted down. While pondering, she said, “I must recover fast. If I can’t refine Desolate’s clones to do that, I have to find another method. We need to go to the Sea Domain of Nihilicity. As long as I’m fully recovered, I can defeat both Devour and Desolate. It’s now a competition to see who recovers first!”

“I understood,” regarded Tian Xie.

Zi Yao looked at him and felt a little disappointed. She had trained Tian Xie herself; however, due to Desolate Territory’s condition, Tian Xie’s realm was held down. He hadn’t reached the Territory Ancestor Realm yet.

He couldn’t help her in the future battle if he didn’t reach the Territory Ancestor Realm. She calculated and worried about the upcoming war.

...

The Grace Mainland quietly flew through the chaotic space basin. Without Zi Yao troubling them, the planet was well protected by Hiro and Montecie. The chaotic space basin couldn’t affect the Grace Mainland, so the creatures on the continent could still cultivate with the heaven and earth energy there. Everything was going smoothly and ideally.

Shi Yan also quieted down. Before they reached the territory entrance, he could have a short course of peaceful time.

The Yang family had accommodated the warriors from the other stars to the islands in the Endless Sea on the Grace Mainland. The Shang family, the Wu family, the Xiao family, and the Gu God Sect stayed there for the time being. They were all the characters at the overlord-level.

Since they didn’t have much time, they couldn’t bring all of the members of their forces. They could only bring their family and teleport with Shi Yan to the Grace Mainland.

On an island, the Shang family, Wu family, Xiao family, Gu God Sect, and Yu Shan from the Fiery Rain Star Area were gathering, watching the immense sky without a sun, moon, or any star. An Liya, Yu Shan, and Shang Chen looked dispirited, sighing.

“Shi Yan let us lodge together. What does he want to tell us after all?” Sha Zhao was playing with his Gu insects as he shook his head begrudgingly, “We’re away from our home, and we don’t know our future. This feeling... Sigh, I don’t feel well.”

“So, our homeland was slaughtered?” An Liya still had hope. “We will never go back there again?”

“If Shi Yan didn’t lie to us, Desolate Territory is now not suitable for us to live anymore. If you go back there, Desolate will kill you.” Yu Shan said.

At the moment they were talking, Shi Yan appeared between them like a ghost. Looking at Yu Shan, Shang Chen, Shang Ying Yue, and the other faces he knew, Shi Yan felt a little lost. That year, when the Agate Star Area was invaded and attacked by the God Clan, those people didn’t hesitate to give him a helping hand.

Shi Yan always remembered their favors. Thus, when the doomsday came over Desolate Territory, he had exerted a lot of efforts to gather them. However, on listening to their conversation, Shi Yan knew they hadn’t lost hope yet.

“I’m going to show you something. It’s what I saw when I got Audrey’s Origin. This is how Desolate looks today...”

Star energy churned and created scenes above Shi Yan’s head. In those scenes, so many planets Shang Chen and the others knew had their warriors exploded, their soul altars shattering like fireworks wherever the ancient continent passed by. The warriors they knew didn’t have a chance to resist. They were cleared instantly.

The three star areas had merged together to create the real Desolate Territory. However, today, the liveliest life stars in Desolate Territory had their creatures living in misery while warriors were destroyed everywhere.

Anyway, the ordinary human beings weren’t affected in this kalpa.

Shang Chen had witnessed the life stars they used to visit and the warriors they knew explode with blasting soul altars. They paled at this sight, breathing heavily.

Now, they had recognized that if they didn’t leave, the victims of that terrifying genocide would have been them! They didn’t feel indignant anymore. They now trusted Shi Yan entirely, as they knew that he had forcefully drawn them away from a deathly fate.

“Shi Yan, thank you...We understand now! We finally understand!” An Liya sounded dispirited.

Everybody thanked Shi Yan for rescuing them. The elders of the Wu family and the Bai family now knew that it was their best move to send their warriors to the Agate Star Area that year.

If they hadn’t helped him that year, they would have perished at this moment, without having had a chance to survive.

[God of Slaughter](#)

Chapter 1503: Great Seal Technique

Reincarnation Island, Kyara Sea, Endless Sea...

It was the island the Xia family stayed and cultivated on. Yang Tian Emperor had arranged the Xia family to stay on that island. There were several exquisite and comfortable bamboo houses on the shore of Reincarnation Island, and Xia Xin Yan was cultivating precisely there.

The warriors of the Fighting League also lived on Reincarnation Island. Feng Han, Feng Yan, and Qin Ze had considered the island their new homes.

They all knew of the horrible massacre in Desolate Territory, and it would be really hard to go back there. Thus, they had to adapt to the strange and new conditions here.

A silhouette landed on the Reincarnation Island, walking directly to where Xia Xin Yan was cultivating. He was DeCarlos, the grandmaster of Space power Upanishad.

Xia Xin Yan wore an elegant, long, green dress, facing the deep blue sea. Seeing DeCarlos, she was quite surprised. "Are you here to see me? For what, sir?"

DeCarlos sighed inwardly as he took out a thin, small book. The cover of the book had many complicated, twisted space lines with clear space energy emitting from it. "You should read and comprehend the Space power Upanishad in this book. Your own power Upanishad and the Space power Upanishad can cast the Great Seal Technique my teacher had comprehended that year..."

He told her his teacher's wish, then said, "I don't dream to be your teacher, because I know I'm not qualified. But, I'm begging you to cultivate the Space power Upanishad, so that you can use this inheritance from my master." He said solemnly.

Xia Xin Yan was surprised. When DeCarlos gifted her a huge amount of God power, she was skeptical about his motivation. She thought he had some plan she didn't have a clue about. She was alert, as she thought he had some rebellious scheme. And now, she finally got it, making her respect him more.

To fulfill his teacher's wish, DeCarlos had given away such a treasure, which surprised Xia Xin Yan a lot.

She raised her hands as she wanted to receive the thin book.

Swoosh!

But at that moment, a petite figure suddenly appeared. She smiled and grabbed the book. When she held it, her face looked strange. "That Great Sea something sounds interesting to me. Let's see if the Space power Upanishad is worth cultivating..."

She was Montecie, the Territory Ancestor Realm experts of the Phantom Clan. At this moment, she was the key person who protected the Grace Mainland from the dangers in the chaotic space basin.

While hovering in the clouds of the Grace Mainland, she noticed a man approached Xia Xin Yan. As she had considered Xia Xin Yan her only disciple, she planned to take to Shi Yan about this. She had decided to impart Xia Xin Yan her Time power Upanishad inheritance.

She saw DeCarlos give Xia Xin Yan a thin book, asking her to cultivate Space power Upanishad, which rang alarm bells for her immediately.

Xia Xin Yan had cultivated Time power Upanishad to a high realm, but it wasn't a good move to cultivate Space power Upanishad now. Montecie thought that it would affect Xia Xin Yan's development. Thus, she couldn't help but come and interfere in this.

"Fusing Time and Space to create the Sea of Time and Space, freezing both Time and Space..."

Montecie wore a disdainful face, but after reading the little book for a while, she was shaken inwardly as her eyes brightened. "It's an interesting idea. Oh wow! There's even a clear sequence. Not bad, not bad! It's possible indeed!"

Then, she said, "Little girl, you don't need to cultivate the Space power Upanishad. Mixing power Upanishads will affect your progress. As you've cultivating only one power Upanishad, you're a gold ore that hasn't been refined. After I've shaped you, you will achieve excellent attainments." Montecie held the book, turning to DeCarlos and talking faintly, "As for this Great Seal Technique, I will talk to Shi Yan to see if he's interested in trying it out with me."

DeCarlos' face froze.

Montecie was at the Second Sky of Territory Ancestor Realm. She was the peerless existence in the Sea Domain of Nihility. How could DeCarlos rebel against her? What did he have to fight with her?

He looked sorrowful, standing baffled as he didn't know what or how to retort. He could only sigh.

"You come here..." Montecie twisted a tuft of her hair around her finger, sending Shi Yan a message.

Not far from them, Shi Yan was explaining the current situation to Shang Chen, Yu Shan, and the others. He received the message, so he comforted the group of warriors and left for the Reincarnation Island.

"Precursor Montecie, why did you call me here?" Shi Yan came, then walked to Xia Xin Yan and beamed. "Oh, I got it. You come here to ask for my girl. Haha, since I've known you cultivate Time power Upanishad, I wanted to ask you to take her as your disciple. Seems like you have the same idea, don't you?"

"Xin Yan, precursor Montecie is a peerless expert in Time power Upanishad. It's very good for you to follow her." Shi Yan said with a stern face. "In this vast universe, only she has cultivated the Time power Upanishad to the Territory Ancestor Realm. You shouldn't let this chance slip away no matter what!"

Xia Xin Yan was moved, her eyes turning bright. Seconds later, she smiled while bowing to the other, "I wonder if I have this fortune, precursor?"

"Ah haha!" Montecie laughed cheerily. "It's hard for you to find a master teaching Time power Upanishad, and it's the same for me to find a good disciple! From the moment I saw you, I had made up my mind. Even if this kid Shi Yan didn't want it and I had to steal you, I would have done that for sure!"

Hearing her, Xia Xin Yan smiled sweetly, "So, teacher agrees to accept me?"

"Of course, I agree!" Montecie was happy. She handed Shi Yan the thin book. "Look, this technique's really interesting, using the Space and Time power Upanishad to seal space and stop time. It's an absolute seal. According to the author, if the experts cultivating Space and Time power Upanishads cooperate, the seal can confine an entire territory. It's similar to the permanent icy seal..."

Shi Yan was surprised. He received the book and studied it carefully.

DeCarlos and Ming Hao's teacher was a legendary expert. He used to be a grandmaster in Space power Upanishad, reaching a remarkable peak. He had fought against Bloodthirsty and been defeated. Afterward, the Corrosion power Upanishad had eroded him to death.

After his defeat, he had spent the short remaining course of his life in seeking a way to deal with Bloodthirsty.

The technique in this thin book was a fatal attack he had created. It required fusing the Space and Time power Upanishad to cast the Great Seal that could seal everything, be it space or a speck of dust!

According to him, the expert had to use Space power Upanishad to create a small space to confine the target and then seal that space completely.

The space confinement could hold the creature's body, but it couldn't stop the soul. In other words, a creature with intellect could use the soul energy, which meant it could use the Dark Energy to crush that space.

However, if the expert sealed even time during this process...

When time stopped, the creatures' thoughts and soul were fixed. The soul would be paused in a specific moment, so, that confined creature couldn't think or use soul energy.

Space would confine the body, and time would pause the thoughts. When the two power Upanishads were used at the same time, together, they could lock both the body and the soul of the target, which would be a true seal.

The target wouldn't be able to use the body's energy, and his instinctive reaction wouldn't be able to tear the confining space. At the same time, his soul wouldn't be able to think to urge the power Upanishad or the Dark Energy to shatter his confinement. He would be imprisoned in a fixed time and space; unless someone helped him, the target would never wake up.

Theoretically, if the experts were strong enough to cast this Great Seal, they could confine not only some creatures, but also the entire territory with planets and gases!

"Although your teacher is gone, the technique he had invented is really fierce," Shi Yan studied the book, and his face changed. "It's lucky that your teacher didn't cultivate Time power Upanishad. Otherwise, once he could cast that Great Seal, even if Bloodthirsty hadn't been killed by the God clan, your teacher would have been able to seal him entirely."

"You should learn the technique. Perhaps, we will need it later. Anyway, you don't need to cultivate the two power Upanishads at the same time, as the two experts cultivating the two specific power Upanishads could join hands to create the same effects." Montecie smiled gently and tiptoed to pat Shi Yan's shoulder. "Don't worry! I'll impart Xin Yan the power Upanishad. Later on, you guys can join hand to seal anyone you hate. How does that sound?"

She wouldn't take that book, as she thought that it would be better to let Shi Yan keep it, in case Xia Xin Yan was moved and she wanted to cultivate Space power Upanishad, which would slow her progress in learning the Time power Upanishad.

“Follow me, we should find a place to talk.” Montecie lovingly hooked Xia Xin Yan’s arm, bringing her and surfing above the sea with a bright and wide smile. They looked like a little sister clutching on her big sister. With her petite figure of a little girl, she didn’t look like a teacher at all.

“You should keep this small book and seek for your disciple to cultivate the Space power Upanishad. The Sea Domain of Nihility is really vast. You will get more chances.” Waiting for Montecie to leave, Shi Yan tucked the thin book into DeCarlos’ hand. “Xia Xin Yan and I are different. It’s late for her to cultivate another power Upanishad...”

DeCarlos forced a smile. He nodded, then turned away and left.

Shi Yan frowned, still thinking about the Great Seal using both Space and Time power Upanishads. He understood that this technique created by DeCarlos’ teacher was really terrifying. He wanted to try to see if it could work out.

If it worked, this absolute seal would be very useful, and could even change the world...

God of Slaughter

Chapter 1504: The Path Ahead...

The chaotic space basin was filled with bright and colorful space streamers. A blue planet was rolling towards the territory entrance.

On the vast Endless Sea, many small islands that were like sand grains were scattered in every corner. Today, warriors from different races gathered on those islands.

The other areas on this continent stayed the same. Ordinary human beings were scared when the world changed. However, after they figured out that no harm was done to their lives, they continued to live in peace.

Only the Endless with many crowds of warriors from other star areas had become the most lively and bustling area.

Behind the mountain range on Immortal Island.

Hiro, Montecie, Dracula, and other experts gathered by Shi Yan. Hiro invited, “The Sea Domain of Nihility is very spectacular. It’s a chaotic, distorted place that normal life stars can’t survive in. The magnetic field there will draw earth and heaven energy on the life stars away. After we get through the territory entrance, I suggest that we should move this planet to a natural territory. Our White Bone Clan has many natural territories. If you don’t mind, I -”

“Well, as your White Bone Clan has natural territories, you think our Phantom Clan doesn’t have any? Shi Yan and Mei Ji of my clan are together. He can be deemed as half of a member. Why would he go to the White Bone Clan’s natural territories?” Montecie rolled her eyes and interrupted Hiro. Then, she turned to Shi Yan and beamed like a flower. “I can manage and give you a natural territory. You will be the master of a territory. What do you think?”

Xuan He, Ming Hao, Frederick, Yang Tian Emperor, Fu Wei, and Blood Devil were here as they were characters that could affect Shi Yan's decision on Grace Mainland.

"How do you categorize the territories?" Xuan He intervened.

Gay explained with ease, "Of course we have categorized the territories. The territories include refined ones and natural ones. Normally, the conditions of the refined territories are extreme. For example, after a warrior's cultivates Fire power Upanishad to the Territory Ancestor Realm, he can create a territory. However, this sort of territory has only one attribute. It will be filled with fire and scorching lava. Such a place is only suitable for warriors cultivating Fire power Upanishad."

The warriors at Territory Ancestor Realm could refine and ascend their Incipient Extents to territories.

The territory's attributes were according to the power Upanishads that the experts had cultivated. If the expert had only one power Upanishad, his territory had only one attribute.

"Normally, this kind of territories isn't suitable for low-level creatures. Also, they aren't open to the world outside," Gay looked at Hiro and Dracula. Seeing them nod to him indicating that he should explain more, he continued, "This kind of territory has a Master. Staying in a territory like that means that the Master can control your life. Thus, not many people dare to cultivate in someone else's territory unless they are subjected to the Territory Master."

Listening to him, Xuan He and Ming Hao looked at each other and nodded as they understood.

"That's not true," Shi Yan narrowed his eyes and rubbed his chin as his suspicion rose. "Desolate Territory is a refined territory, right? However, it doesn't have only one attribute. Many attributes like lightning and thunder, ice, flame, even death and darkness can be cultivated there. It's different from what you just said."

At this moment, Hiro of the White Bone Clan smiled and intervened, "Among so many territories in this vast universe, Desolate Territory is an exception. I'm sure that none of the refined territories I know are as strange and magical as Desolate Territory."

Then, Hiro looked at the sky above his head as a brilliant gold sea emerged. Slowly, it became a blurry sea of gold light. Inside the thick gold atmosphere, several metal planets were moving and releasing cold aura of metals.

It was a Metal Territory!

"Take my territory for example. It's suitable to only warriors with the Metal power Upanishad. Of course, only low-realm warriors could benefit in there. Warriors at Original God Realm and above will be affected by my understanding of Metal power Upanishad if they cultivate in my territory. It will become a restriction to them."

Hiro pointed at the Metal Territory and explained further, "Most of the other territories look like mine. With different power Upanishads, the territories will look a little different. However, none of them could reach a magical level like Desolate Territory."

Pausing for a while, Hiro continued, "Because Desolate is an Absolute Beginning creature, it knows so many mysterious and marvelous things. Also, perhaps it's related to the divine weapons it has. I heard

that Desolate's divine weapons are related to the Heavenly Creation. It's also the reason why other Absolute Beginning creatures have aimed at Desolate."

The Absolute Beginning divine weapons that are related to Heavenly Creation? Shi Yan's face showed his fear. He thought and then said, "So Desolate Territory is an alien among refined territories? Except for it, no territory looks like that?"

Hiro, DeCarlos, and Montecie nodded.

"How about the natural territories?" asked Shi Yan.

"It's easy to explain this. The natural territories are created by Nature. Normally, the earth and heaven energy in these territories aren't as thick as energy in refined ones. Even the conditions there can be a little harsher, the warriors with different power Upanishads can live and grow there." Montecie smiled, her petite face beautiful. "You will know more detail when we get there. Alright, I will pick the best territory out of the natural territories that our Phantom Clan has managed. If you agree, when we get through the territory entrance, I will create the passage. What do you think?"

Everybody turned to Shi Yan.

After so many incidents, Shi Yan had become the real owner of this continent. Only his decision was valued. If he agreed, the others couldn't interfere.

"Is it true that Grace Mainland can't exist in the Sea Domain of Nihility?" Shi Yan hesitated.

"The Sea Domain of Nihility is chaotic and twisted with evil magnetic fields. Once a normal planet gets in those twisted magnetic fields, it will be torn into pieces. No one knows the causes but it's true. The Seven Great Clans have tested it. We sent a normal life star there and saw it shattered shortly afterward." Hiro advised. He didn't want Shi Yan to try because they had tested this hundred times.

"So, I have to choose a territory of your White Bone Clan or of Phantom Clan?" Shi Yan forced a smile.

"There's no other option around," Hiro and Montecie said at the same time.

"Then, we should choose the one that is close to both clans. Hmm, please arrange it for me." He glanced at Mei Ji and saw her beautiful eyes begging, so he added, "Yeah, the one that belongs to the Phantom Clan."

Mei Ji's eyes looked happy. Montecie also smiled.

Hiro seemed to have foreseen that. He nodded and said nothing, pulling Montecie aside to discuss further.

"I wonder what it will be when we come to a strange land. Sigh, I never thought that I would have to leave my home one day and live in a foreign land," sighed Blood Devil.

"Those territories all have entrances to the Sea Domain of Nihility. Normally, a territory is a suitable place for ordinary human beings and low-realm warriors to stay and cultivate. After the warriors reach a certain level, they can go to the Sea Domain of Nihility. The Sea Domain of Nihility is the center of all territories. Although the energy there is bizarre and distorted, it also hides a lot of unknown, mysterious

marvels. It's a much more suitable place for high-realm warriors to explore and take adventures to train."

Emperor Sea Shark suddenly talked after being silent for the entire time. He looked at Ming Hao and Xuan He and said, "You can settle this planet in the Phantom Clan's territory. The warriors at your level can go to the Sea Domain of Nihility through the territory entrances to develop yourself in a bigger arena. Your grandchildren and subordinates can stay to cultivate on this planet."

While they were staying idle, Emperor Sea Shark and Shen Ren were like outsiders that didn't mingle with surrounding warriors. As they were about to reach the territory entrance today, he finally talked to Shi Yan. Looking pensive for a while, he said, "Shi Yan, this continent has thick earth and heaven energy. It's really good for low-realm warriors to cultivate in, especially this sea area."

He watched the Endless Sea behind him. "This seabed also has members of the Sea Clan. Their realms are too low, though. If you don't mind, before you enter the Phantom Clan's territory, please give me fifteen minutes. I want to bring my fellow people on the seabed of the Sea of Annihilation to live on the seabed of the Endless Sea. Don't worry. I will control them well. I won't let them affect the Sea Clan members under this sea."

If he said that, of course, he had calculated it. Since he had helped Shi Yan by attacking Neptune and Ferrell under the Sea of Annihilation, he had offended the five clans, which had troubled his clan a lot. He felt sorry for his fellows as the five clans had aimed at them all the time.

On Grace Mainland, he had observed for a long time and found that the earth and heaven energy in this area was really thick. The seabed of the Endless Sea was really suitable for warriors of the Sea Clan. It was even better than the Sea of Annihilation. He was moved and he had tried to find a chance to talk to Shi Yan.

"I invited you to Desolate Territory this time to repay your favor. It's unexpected that Desolate awakened earlier, so we have to leave. I'm really sorry about this. Of course, I support you. Moreover, I would like to request for your care to the Sea Clan members in the Endless Sea. Please help them improve their realms," said Shi Yan.

Emperor Sea Shark looked happy as he smiled, "Thank you."

"There's something I need to tell you." Dracula pulled Shi Yan aside, his face stern. He was the oldest man in the White Bone Clan. Because Shi Yan had revived him, he was thankful. He pulled Shi Yan and looked him in the eyes, lowering his voice, "I've paid attention and I saw a blood mark on the glabella of the warriors you've bestowed energy to. Is it true?"

Shi Yan was surprised, "Yes. What about that mark?"

"This seal belongs to you, but did you create it yourself?" asked Dracula.

"No," Shi Yan shook his head.

Dracula changed his visage and said seriously, "It's troublesome, then."

God of Slaughter

Chapter 1505: Bloodthirsty's Last Words

"How troublesome?" Shi Yan was startled as he smelt the seriousness in Dracula's voice.

Dracula didn't answer him right away.

He turned to Xuan He and Frederick and then to Yang Tian Emperor, Bloodthirsty, and Fei Lan. Those people had a clear mark on their foreheads.

It was just a small mark, but it separated the warriors of the Bloodthirsty Force and the others.

Many years ago, Bloodthirsty who had received his eight evil power Upanishads gave his followers the mark of blood clouds on their foreheads.

Only the Bloodthirsty Force's members had this mark as if it was the crest of the eight great branches.

Was it a problem?

Shi Yan became nervous.

"We should talk somewhere else. This place isn't convenient." Dracula pondered for a while, leaped up, and moved away from Immortal Land. There were many islands and islets around Immortal Island. Although they were just rocky islands, they also had abundant earth and heaven energy.

Dracula flew to a remote islet. After he landed, he arranged his thoughts and talked to Shi Yan as soon as he arrived. "I'm sure you've seen similar marks on the servants of Hui and Devour. For example, Hui's soul slaves have a dark green snake mark and Devour's subordinates have a dark vortex one.

"It's true," Shi Yan nodded.

"The members of the Devouring Clan like Edgar and Labitte don't have the same mark. Do you know why?"

"Why?"

"Edgar and Labitte were created by Devour's blood, body, and soul. Devour considers them his children. Of course, he won't imprint the soul slave mark on them. That mark is an enslaving mark! Once they get it, they have to become a servant that can never escape their life as a slave!"

Dracula took a deep breath, his face stern. "Also, the soul mark is very cruel. It has the same aura as the Master. When the Master dies, the soul slaves will be affected. Their souls will perish instantly! Devour considers Edgar, Labitte, and the Devouring Clan's warriors as his children, not the slaves. Thus, they don't have a soul mark... "

He was the most ancient precursor. He was the high-intelligent creature born after the Absolute Beginning Era. He knew how fierce and cruel those strong Absolute Beginning creatures were.

The soul mark was something that only the Absolute Beginning creatures could create. Once the warriors were imprinted, their souls and lives were confined. They had to be someone's slaves for the rest of their lives.

This mark was a cage that could bind the warriors until they died!

Listening to Dracula, Shi Yan was chilled. He understood why Dracula wanted to keep this conversation from Xuan He, Ming Hao, and Frederick.

If Xuan He, Ming Hao, and the others knew that they had an enslaving mark, how would they feel?

“My mark has existed from the moment I got the inheritance.”

Shi Yan stroked his forehead, which was smooth without any mark. The mark existing in his soul didn't appear on his skin like Xuan He. Only when he sent his energy to the others did it emerge vaguely.

“If it's so serious, am I someone's soul slave?” Shi Yan changed his face, his eyes shooting sharp light. “This mark comes from Bloodthirsty. He wasn't an Absolute Beginning creature. How could he get it? As the mark still exists, is it true that he's still alive?”

A series of doubt popped up in his head. He stroked the Blood Vein Ring and searched through its memories.

Swallowing Pu Tai's soul altar, he got all the memories of the Ring Spirit. At this moment, he was carefully searching. However, he found nothing related to the mark in Pu Tai's memories. He didn't find anything related. It made him more worried.

He knew that it wasn't good.

Dracula looked at him, his eyes deep. After a while, he stressed each word. “That blood mark should be the last wisp of Bloodthirsty!”

Shi Yan felt something explode in his head.

Bloodthirsty's remaining soul?

The great devil King of Desolate Territory, the one that had silenced Devour, hasn't died yet?

Was he that bold?

“Before this conversation, I've asked Xuan He and Ming Hao about Bloodthirsty's features. He was created by Desolate from the essence of the Four Great Creatures. However, Devour had affected him and given him the Devouring power Upanishad with the eight evil power Upanishads. Bloodthirsty was actually part of an Absolute Beginning creature! It's not wrong to say that he was an Absolute Beginning creature. He got the power from Desolate's body, so he knew the secret technique of the soul mark. It's not hard to explain.”

Dracula's voice was serious, his face solemn. “With the magical features of the soul mark, if it's an evil mark, when Bloodthirsty dies, Xuan He, Frederick, and the ones with the marks will perish instantly altogether!”

“Xuan He is still alive. Thus, there are two ways to explain this. That soul mark might not be an evil one. He died, but his soul slaves are still alive. If it is an evil one, then he hasn't died yet. A wisp of his soul remains in this world. The mark in your host soul should be where his last wisp of soul is sheltered.”

Pausing for a while, Dracula hissed, "If it's true, then one day, he can wake up and use that mark to replace you, using your blood, flesh, and soul altar to revive himself!"

It was like a thunderclap booming in Shi Yan's brain. His face became dark and sinister.

Dracula turned to him. He didn't say more. If Shi Yan was resolute enough, he would know what to do next.

Thus, he just watched him in silence.

Shi Yan emitted a gloomy and cold aura like ice. After less than ten minutes, he smiled, "No matter what, I have to thank you. Regardless of which it is, I will do it now. I will cut it off!"

Dracula gave him a nod, "Then, I can ease my mind."

He didn't linger and turned into a gloomy light, leaving the place.

After he had disappeared, Shi Yan kept silent for a long time. All of a sudden, he dug into the ground of the island. When his body disappeared, layers of dark clouds churned. Lightning flashed inside the dark clouds as they created a barrier that could prevent all kind of Soul Consciousness sensing activities.

Even the warriors at Hiro and Montecie's level couldn't intrude this place. Because this was Grace Mainland, the continent belonged to Shi Yan.

Inside the islet, the rigid rock and soul separated naturally as if a God had just created a plain stone room there.

This stone room was closed so that wind or light couldn't visit here. Shi Yan stayed inside the room and began to observe his soul altar. He gathered his Soul Consciousness and created rolling waves to tie his host soul down.

The transparent host soul hovering above the Incipient Extent had a small blood mark on its forehead where there were many wiggling soul lines like tiny snakes.

"Swallow!"

The black hole emerged and turned into a black vortex that shrank and then entered the host soul through the forehead. The black whirlpool faced the mark in case something happened that Shi Yan couldn't handle.

Bands of starlight came with Death, Darkness, and many other power Upanishads to set up the barriers inside the black hole.

After everything was ready, Shi Yan turned into a jet of light that shot through the mark!

It was the first time he had come to the blood mark in his soul!

Red clouds that looked like they were made of blood gathered. As Shi Yan's Soul Consciousness got in there, he suddenly felt irritated as if he couldn't control his heart. He wanted to sink into the desire to slaughter!

It was the effect of the blood cloud sea!

His Soul Consciousness floated above the sea of clouds. He observed to sense if there was an aura here. He wanted to solve the problem that had troubled him for years.

All of a sudden, the sea of clouds began to spin. Clear images emerged and Shi Yan could see a man who was pretty tall and sturdy with overbearing makings. He had long, fire-red hair that outlined his red sun-like eyes. He was slaughtering many warriors. Shi Yan could feel his invincible, overlord-like aura through the images.

A vibe was sent to his Soul Consciousness. Shi Yan was touched. It was like a giant Demogorgon in the ancient time that faced the sky and roared. The giant Demogorgon wanted to kill all the creatures and even tear the images that Shi Yan was watching to jump into this world!

It was a soul vibe that he couldn't describe!

Every image he was watching described the giant Demogorgon that conquered earth and heaven and subjected the other creatures to him. Slowly, the images shrank and created a clear roll of pictures.

In that roll of picture, the hunky, blood-red figure was fighting against a massive octopus-like creature. The entire sky darkened and collapsed because of their fight. Stars around them exploded continuously...

Shi Yan understood it clearly. It was the battle between Devour and Bloodthirsty. The picture made him boil with enthusiasm as if he had witnessed how bold and peerless Bloodthirsty was with his own eyes.

This last picture was the memories that Bloodthirsty had carved deep in his soul. It didn't include the battle between him and the God Lord or the God Lord controlling many experts to fight him. It proved that Bloodthirsty didn't consider God Lord Brian his equal match. In his memories, the battle with Devour was the peak of his life.

It was the memory that never faded from his mind.

As the images disappeared, the magical blood cloud sea thinned as the mark in Shi Yan's soul started to dissolve.

A vague, ancient deep voice arose in his head.

"My heir, finally, you came here. It means that you're just a step away from the Territory Ancestor Realm. This is the last mark I left in this world. It will vanish at this moment and I will be buried altogether. My life, the one that was just shown to you, will be the guidance for you to continue thriving. To you, I have only one request: swallow and refine Desolate and Devour! My existence and my entire life is just a sacrifice to compete against them! You are my heir and the one I lay my hope in. Please help me obliterate them!"

[God of Slaughter](#)

Chapter 1506: Drifting Far Away

Immortal Island.

Xuan He, Frederick, and Ming Hao were in three different places and telling their warriors about the current situation. When Grace Mainland entered the foreign territory, they arranged their warriors to cultivate better.

Those warriors cultivated Death, Corpse Qi, and Soul Control power Upanishads. When they were in Desolate Territory, they had scattered and worked for Xuan He and the other two discreetly. They were the reserve force.

Some incident happened quietly...

While talking to his warriors, Xuan He found that their blood marks were slowly fading as if someone was erasing them. It was so strange.

Then, Xuan He noticed that his warriors were watching him with frightened eyes. He took out a mirror to check his own face.

The blood mark on his glabella was slowly disappearing magically. Xuan He was frightened. He didn't know what was happening. He ditched his warriors and went to find Frederick and Ming Hao to see if they knew the situation.

The same thing happened to the warriors of the Bloodthirsty Force. The blood mark on their foreheads vanished.

As Xuan He was shocked, Ming Hao and Frederick felt the same. Yang Tian Emperor, Blood Devil, Fei Lan, and the others were panic-stricken.

It was the fear of the unknown.

Shadows moved fast and gathered on Immortal Island. Those people belonged to the Bloodthirsty Force. Regardless of where they received their Inheritance, they had the same blood mark.

At this moment, all of their marks were disappearing. What happened?

Blood Devil, Yang Tian Emperor, Fei Lan, Leona, and Ka Tuo saw Xuan He and Ming Hao arrive. As they saw the others without the blood mark, they got more frightened. "What's happened? Why are our marks are all disappearing? Gosh! Is it going to be something terrifying?" screamed Ka Tuo.

On a cliff not far from them, Dracula was watching Xuan He's group. Seeing their marks gone, he was also skeptical. He turned to see the islet where Shi Yan was hiding.

It had been half a month. What happened to him?

Dracula pondered, his face getting serious. He was afraid that something unexpected had happened to Shi Yan.

When the Bloodthirsty Force's warriors were the most restless and insecure, Shi Yan appeared out of thin air magically in between them.

Everybody immediately gathered around him and hurried to ask him the reason.

"Do you feel comfortable or not?" Shi Yan smiled.

When Xuan He, Ming Hao, and Frederick heard that, they were bewildered. When their marks vanished, they were filled with fear, so they hadn't had time to check the other details in their bodies.

As Shi Yan reminded them, they got a hold of themselves and checked their bodies with shocked faces.

All of them looked at ease and comfortable as the shackles in their souls were unchained.

Many of them felt free and they even felt that the air they were breathing in was more fresh and cool than usual. Some with stagnant realms for years felt like they were about to soar up into the sky. They were so thrilled as they gazed at Shi Yan with questioning looks.

They needed a quick explanation!

"Bloodthirsty had used a secret technique to create that mark. It's similar to the enslaving mark that Hui and Devour implanted on their slaves. However, your marks didn't bind your souls. It didn't kill you when he died. Compared to Hui and Devour, Bloodthirsty was more humane."

Looking at them, Shi Yan said continuously, "That mark had some magical functions. He could know your location and condition through the mark. He could even know your thoughts. It was an invisible cage that bound all of you."

Everybody wore dark faces.

"However, it won't continue. When the mark vanished, you've become free." Shi Yan smiled, "After his last wisp of soul vanished, all the marks were gone. Later on, you can't depend on the energy I gave you anymore. Anyway, without that tie, your sky will be wider. It's like you got good and bad news at the same time."

"Freedom is more important than accumulating energy!" Xuan He expressed his attitude first.

"Our lives are more important than anything!" Frederick nodded.

"He... did his soul try to possess your body?" asked Ming Hao quietly.

Shi Yan kept silent for a while and then said, "No, his last words were to ask me to kill Devour and Desolate. His existence and his tragic life was a sacrifice to compete against Desolate and Devour. He understood that even if he got my body, due to the limits in his soul, he wouldn't be able to defeat Desolate and Devour. Thus, he gave it up. He had to sacrifice himself to lie his hopes on me. He hoped that I could fulfill his wish, the life goal that he hadn't achieved yet: Destroying Desolate and Devour!"

Listening to him, Xuan He, Frederick, and Ming Hao were down, sighing and sobbing. They were upset because Bloodthirsty was utterly gone.

The overlord who had swaggered proudly in Desolate Territory for ten thousand years had given up his last chance to revive and set his hopes on Shi Yan. He asked Shi Yan to fulfill his wish.

"From now on, your souls aren't bound to anything. You can pursue a more profound realm. Of course, you need to accumulate energy. It will take more time to break through," said Shi Yan.

Xuan He and the others nodded, indicating that they understood as they smiled.

It seemed like they had already accepted this.

Time flew like a running, unceasing river.

Grace Mainland headed to the territory entrance inside the chaotic space basin. The warriors were accommodated in different islands. They cultivated and lived well.

During this time, Shi Yan didn't cultivate. He left the Endless Sea to visit Quiet Cloud Land, Divine Great Land, Dark Magnetic Noxious Mist, and the coastal area at the end of the sea.

He met so many people.

He met Mu Yu Die in Quiet Cloud Land. Fortunately, Mu Yu Die had recovered her graceful appearance. She had broken through the realm that restricted her longevity.

However, it'd been so many years. Even though Mu Yu Die had advanced her realm, the gap between them was like the sky and the earth. He was just an old friend who came and visited her, nothing more.

On Divine Great Land, he came to Ice Emperor City to meet the four mature women including Bing Qing Tong, Han Cui, Shuang Yu Zhu, and Ling Dan Qing. The four women stayed and cultivated in Ice Emperor City. Sometimes they smiled happily when they remembered him.

He had stayed in Ice Emperor City for a short time before leaving the four women a course of bright memories that they would never forget. Then, he left.

He visited the two Chiefs of the Demon Clan, Bao Ao, and Jie Ji. They drank and discussed their understandings of power Upanishads. He had opened them the gateway to a new level.

Inside the Perpetual Night Forest, he met Fiery Dragon, Fierce Flame Gold Lion, and he had shown them the Heavenly Monster Tribe's cultivating techniques, directing them to a brighter future.

His figure had appeared in every corner of the continent...

He had observed the trees, the tufts of grass, human beings, and so many creatures living on this continent. He studied and remembered them all.

He walked across this world to think about the changes to his Incipient Extent in the future. He thought and reasoned the rules of Nature, and the marvels it could have after creatures were created there...

He wanted to study the creatures' situations and conditions to see how things changed in the real world. It was going to help him figure out the key points to ascend his Incipient Extent to a territory.

Grace Mainland moved at a normal pace. He didn't try to urge his energy to accelerate and just calmly walked around the continent to observe more.

It'd been ten years already.

During the ten years, he didn't cultivate his power Upanishads and just wandered around, drinking in the inns of the mortal people and enjoying the windy, misty weather deep inside the forest.

Then one day, Hiro and Montecie appeared in front of him. It was in a small country inside an ordinary inn...

By a hustling and bustling square, flows of people walked around and their lively noises carried through the window of the tavern.

Shi Yan leaned against the window and drank. His drowsy eyes eyed the noisy street with people living their normal but happy lives. It wasn't lunchtime yet, so the tavern didn't have many customers. They were talking about their daily lives.

The shopkeeper was flipping through his log book. From time to time, he shot a checking look to the young man sitting by the window. It'd been three months since that young man came to drink in his tavern daily. Every day, he came and sat in the same spot. He would spend half a day in his shop. The young man looked like he was in his twenties, but he appeared as if he had experienced hundreds of lives in this world. His back looked archaic and the shopkeeper couldn't explain why he had such a feeling when he saw him.

Footsteps rattled on the staircase. An elegant young lady came with her maid. She was a tender girl, wearing a long, green dress, her body graceful. She chose a table behind the man to sit with her maid. Sometimes, she shot the man her meaningful looks.

The shopkeeper glanced at the young lady and sighed. He knew that this girl was the City Master's daughter with a noble origin and he also knew that she had a deep affection for the young man. That's why she came here every day to see him. However, she was shy so she was waiting for him to make the first move.

Unfortunately, the young man didn't talk to her. Every time, she went home with disappointment. However, she wasn't enraged because of that. The next day, she would show up with her maid and order the same food he had ordered.

Many regular customers of the inn could see her feelings, but the man seemed so ignorant. He hadn't said even a word to her.

Today was the same. The young man stood indifferently by the window, observing the bustling life down the street and saying nothing.

The lady came with her maid and sat behind him, her bright eyes fixed on the side of his face. Looking at that lonely figure, she was so bitter that she couldn't talk.

"What has he experienced?"

The young girl mumbled inwardly. Recently, she had become emotional. The more she thought, the sourer she became. Gradually, she had tears in her eyes.

Suddenly, two lights came. A little girl and a white skeleton appeared by the young man. The white skeleton spoke in a human language. "Shi Yan, we are almost at the territory entrance. Everybody is waiting for you."

The young man that looked everlastingly cold smiled for the first time. As people were screaming in panic, he stood up.

He finally turned around and looked at the young lady who had sat behind him for more than one month. "I appreciate your affection towards me. Unfortunately, we don't share the same destiny. Here,

this pellet is for you. If you have it, you can retain your youth forever. You will live for five hundred years at least. Sigh, if our destinies cross again, we will meet.”

He sighed. Then, together with the skeleton and the little girl, they turned into three jets of light and tore the sky to leave.

The little girls held the pellet whose fragrance had filled the entire street, looking at the three rainbows zooming far away in the sky. Her tears rolled quietly, her face baffled.

God of Slaughter

Chapter 1507: Anger Against a Common Enemy

The other end of the chaotic space basin was a five-colored light curtain that was like murmuring water that was slowly revealing.

Shi Yan, Montecie, and Hiro gathered in the sky of Grace Mainland and observed the light curtain and the changing space streamers. It was the territory entrance. Crossing the light curtain, they could enter a branch of the currents to the seabed of the Sea of Annihilation. Then, they could get to the surface of the Sea of Annihilation.

“Hiro and I talked. We chose the territory. It’s called Cloud Mist. It’s not as vast as Desolate Territory and the earth and heaven energy aren’t abundant, either. However, it’s a rare and precious territory of our Phantom Clan. It’s suitable for warriors to stay and cultivate.”

Montecie’s eyes smiled. “Cloud Mist Territory is close to the White Bone Clan’s territories. We can visit each other more often. Hiro and I can join hands to create a passage to bring this continent to Cloud Mist Territory instantly from here. However, we need some time. We asked you here to confirm.”

Hiro looked at him, his eyes strange. “After ten years, your God power hasn’t increased, but your aura is close to the Territory Ancestor Realm. It seems that you have a special way to understand?”

Shi Yan was serene, his eyes peaceful. “I got some harvest.”

“What do you think?” Montecie wanted a clear answer.

“Okay,” releasing his Soul Consciousness, Shi Yan sensed for a while. Then, he nodded, “Precursor Hiro and Montecie, please stay and build the passage here. I’m going to the Sea of Annihilation for a while.” He turned to Emperor Sea Shark and explained, “Emperor Sea Shark wants to evacuate his fellows. I’m going with him.”

Emperor Sea Shark and Shen Ren were moved. They nodded and waited for Hiro and Montecie’s opinions.

“No problem. We need time to create the passage anyway. We’ll wait for you,” said Hiro.

Montecie nodded.

“I’m going with you,” Mei Ji beamed, “I’m familiar with the Sea of Annihilation. If something happens, I can help. I’ve collected information regarding the Sea of Annihilation’s condition recently. I think I can help you well.”

“What do you think?” Shi Yan asked Emperor Sea Shark.

“I have to thank Madam Mei Ji a lot for that. Thank you!” said Emperor Sea Shark with a stern face.

“Go.”

Shi Yan shot through the entrance territory and disappeared like a streak of a meteor. Emperor Sea Shark, Shen Ren, and Mei Ji followed him and disappeared into the territory entrance.

—————

Seabed, Sea of Annihilation.

“The seabed area seems smaller. It’s strange. Something happened, er?” Emperor Sea Shark moved around and knitted his brows. “This sea area belongs to me. I know how big it is. But, look at this; it’s getting much smaller...”

“That year, after Shi Yan’s bloody battle on the seabed, the Sea of Annihilation seabed shrunk.” Since Mei Ji had always paid attention to the Sea of Annihilation, she sent her warriors to measure the area carefully. She knew clearly. “The shockwaves from the Territory Ancestors’ battle had damaged the seabed seriously. Thus, the place changed.”

Mei Ji wore a violet dress; she was as beautiful as a bright flower. She was both charming and sexy. As soon as they left Grace Mainland, she returned to her mature, enchanting appearance. She wasn’t afraid of Emperor Sea Shark and Shen Ren as she pressed her voluptuous body against Shi Yan’s.

She couldn’t relax when she was in front of the elders of her clan like Montecie. But now, she could be herself and show her love. She pulled Shi Yan’s arm, her cheek blushing. “I heard that your subordinates haven’t had easy lives. The members of the five clans often come to this seabed to trouble them. Since you guys were gone, many of your enemies have provoked your warriors...”

Emperor Sea Shark and Shen Ren’s eyes darkened. They sighed. How could they not know that?

Emperor Sea Shark wasn’t a Territory Ancestor of the five clans. He didn’t have a strong background. Once he offended someone, he had to endure it alone. Otherwise, he had to run and hide.

As soon as he left, his fellows became targets. It wasn’t strange that they had to live in trouble.

“I know they had to struggle a lot. Before Shen Ren and I left, I had asked them to give up the benefits and find remote areas to stay,” Emperor Sea Shark lowered his voice, “If not, why do I have to bring them to the Endless Sea?”

“After you reach Second Sky of Territory Ancestor Realm, we won’t be afraid of the five clans anymore. At that realm, even if they want to trouble us, they have to think about your wrath first!” said Shen Ren in a cold voice.

Emperor Sea Shark beamed a forced smile. “Reaching Second Sky of Territory Ancestor Realm? It’s easier said than done.”

“I’m sure you can, Sir!” Shen Ren had a strong belief.

Mei Ji sneered and didn't say anything. However, from her attitude, they could see that she didn't really appreciate Emperor Sea Shark.

To break through to the Territory Ancestor Realm, it didn't require only a new understanding of the realm but also enormous God power accumulation. It would take a lot of earth and heaven treasures. Since Mei Ji was a member of the Phantom Clan, Montecie had given her a lot of resources that the clan had treasured for years to help her reach the Territory Ancestor Realm in a short time.

However, Mei Ji understood clearly that she was at just First Sky of Territory Ancestor Realm. It would require an unimaginably enormous amount of energy and materials to reach the next realm. Also, even the Phantom Clan was one of the Seven Great Clans; it wasn't easy to continuously provide her with precious materials.

Emperor Sea Shark cultivated alone. He didn't have a force to back him up. He didn't have a natural territory that provided him with pellets and abundant cultivating materials. It wasn't easy to break through to Second Sky of Territory Ancestor Realm.

It was also the reason why his peers like Ferrell or Ricardo had to follow the five clans to seek support, no matter how arrogant they were.

Illicitly, Ferrell and Ricardo knew that they couldn't enter Second Sky of Territory Ancestor Realm with their own foundation.

Only the big forces like the Seven Clans could have enough power and wealth with dozens of territories supporting them by providing them with rolling and unceasing required cultivating materials.

"Emperor Sea Shark," Mei Ji pondered for a while and then smiled. She suggested seriously, "Have you ever thought about joining a clan like the White Bone Clan or our Phantom Clan? If you join our Phantom Clan, we can provide you with our resources. It will be good for your breakthrough. Ferrell and Ricardo do the same. You can do that too. At least when you join the White Bone Clan or the Phantom Clan, the other five clans won't dare to touch you."

Shen Ren lowered his head when he heard it from Mei Ji and said nothing.

Emperor Sea Shark didn't change his visage. Keeping silent for a while, he said indifferently, "If I wanted that, I would have joined one of the seven clans a long time ago. But I'd rather breakthrough slowly than lose my freedom. I'm really sorry. I appreciate your good will, but I don't want to work for you guys."

Mei Ji looked regretful. She just sighed deeply, but she didn't talk him into this.

As Emperor Sea Shark made his decision, the White Bone Clan and the Phantom Clan wouldn't help him resist the other five clans. When the five clans attacked him, they wouldn't offer help proactively.

As Emperor Sea Shark wasn't a member of their clan, it was like they were nosing into someone else's business. It went against common interests and rules.

Because of this topic, they had become relatively silent. They didn't try to talk furthermore.

Emperor Sea Shark guided Shi Yan and Mei Ji to move around the seabed. They had met a lot of warriors taking adventures. Shi Yan and Emperor Sea Shark had proactively avoided them to prevent encountering unexpected troubles.

Anyway. Shi Yan and Emperor Sea Shark were the five clans' targets, especially Shi Yan. At this moment, he was the nail in their eyes. Everybody dreamed of taking his Power Upanishad Symbol Tower. Once his whereabouts were disclosed, the experts of the five clans had to surround him like flies.

After a short time, the four of them had entered an area filled with jagged rocks.

Emperor Sea Shark's face darkened. His eyes flared with cold light as they raked through the rocky area.

Shi Yan looked at him and sighed. "Restrain your grief..."

Boom! Boom! Boom!

Jagged rocks exploded and revealed a red area. Dead bodies of the Sea Clan warriors appeared from the cracks of the rocks. A massive rock carried around ten bodies, but the bodies were dismembered. It wasn't hard to imagine what kind of torments they had to endure before their death.

They were killed because the murderers wanted to squeeze out Emperor Sea Shark's whereabouts from them.

Emperor Sea Shark and Shen Ren shivered, their eyes burning with flames of rage. The thick murderous aura from them made Shi Yan frown. He worried that Emperor Sea Shark and Shen Ren couldn't hold it and would burst out to find the enemies.

"It's just one of our bases. Let's move and check another one!" Emperor Sea Shark bit his lip. Blood trickled from his mouth. He let out a low roar like a dying beast. The massive rocks and the dismembered bodies turned into jets of light that came to his territory.

He took Shen Ren, Shi Yan, and Mei Ji and moved away.

They had come to three different bases and found the same situation. His fellows were massacred. They were chilled when they saw the butchered bodies. No one was alive.

Shi Yan looked at Emperor Sea Shark and Shen Ren. He knew that they were about to explode. He knew that two of them were trying hard to press down their wrath. He was touched as he understood their grief and resentment.

They could see the marks of torments on the dismembered bodies. As he saw the chopped bodies, he blamed himself.

He was responsible for their deaths! He couldn't deny it!

If Emperor Sea Shark hadn't stood against Ferrell, Neptune, and Ricardo to help him, the five clans wouldn't have attacked the Sea Clan warriors; Emperor Sea Shark wouldn't have had to escape. If Emperor Sea Shark hadn't come to Desolate Territory, those people wouldn't have been killed so tragically.

"I don't care whoever did this. I promise you that I will join hands with you to kill the murderers!" Shi Yan said solemnly.

God of Slaughter

Chapter 1508: The Light in the Desperate Straits...

Countless tufts of algae grew like clusters of thick clouds that eyes couldn't see through. It was troublesome for the Soul Consciousness to extend through these clusters.

This was the last base that Emperor Sea Shark and Shen Ren had established. It was also the most mysterious shelter by the edge of the Sea of Annihilation. With terrifying dangers nearby, not many people dared to visit this deathtrap. Thus, Emperor Sea Shark and Shen Ren thought that it would be the safest shelter.

The closer they got, the more restless and worried Emperor Sea Shark and Shen Ren became.

They had checked around ten shelters and sent their fellows there to avoid the slaughter. However, they found no alive members. The tragic scenes hammered their hearts and made them bleed in agony.

They had hope for this last base.

If this place was also raided, they would be attacked so badly that they could even collapse directly.

While slowly advancing in the field of algae, Shi Yan also became tense. He released his Soul Consciousness to sense.

"There's life energy!" His eyes brightened. Shi Yan became sober and hissed, "Many people are gathering!"

As he cultivated Life power Upanishad, his sensing ability was more accurate than Emperor Sea Shark. Hearing him, the gloomy gleam in Emperor Sea Shark and Shen Ren's eyes subsided. They cheered up.

"Go!" Emperor Sea Shark let out a low shout and moved like a sharp sword thrusting into the area of thick algae in the center.

Shortly after, a strange area came to their views.

It was the center of the algae field where there were so many fungal plants. They were illuminating radiantly like lights. And, the space above their heads still had a lot of algae leaves like thick clouds that could hinder the eyes and the Soul Consciousness.

This area had many lamp-like fungal growths and vivid red coral with pieces of glass scattered, sparkling beautifully. Many fellows of the Sea Clan were packed in this area. They all looked sorrowful. Many of them had cut limbs and most of them looked desperate, their eyes blank while facing the sky.

The dispirited, heavy air filled the entire place and made people shiver. The Sea Clan warriors were all in low spirits. They didn't cultivate and just sat idly, waiting for death.

Datuk and Hu Jiao who used to fight Shi Yan were in this group. The warriors with strong competencies gathered by them. With a solemn face, they were discussing something. They looked like they were about to risk their lives.

Shi Yan, Emperor Sea Shark, Shen Ren, and Mei Ji moved through the algae leaves and quietly entered the area.

Looking at his low-spirited fellows, Emperor Sea Shark looked gloomy. He knew how harsh and terrible it was for his people to endure the torment.

Shen Ren sighed inwardly.

His sigh was like a thunderclap in this area that woke some warriors nearby. They jolted up as if they were encountering enemies and screamed, "They're here!"

It was their instinct!

That's what it had to be. They thought that the chasers had finally here, so they screamed when they heard a strange commotion.

Then, they turned around. With the sharp weapons in their hands, they were ready to have a deadly battle.

All the members of the Sea Clan in this area, whether they were the elderly or kids, wore resentful faces and clutched their weapons, showing a murderous aura.

"Sir Shen Ren! Sir Shen Ren!"

"Tribal Oldie!"

"Tribal Oldie is back!"

"It's the Tribal Oldie!"

All of a sudden, the entire area was boiling. The members of the Sea Clan had tears in their eyes. They finally saw hope in desperate straits. They cried while the women sobbed and whined. The cries created a chain reaction and expanded to all the members.

Whether they were the children, the elderly, or the bravest warriors, they were all weak like helpless kids who finally found adults that could help them out. They cried to vent their indignation.

Seeing the members of the Sea Clan crying, Shi Yan and Mei Ji also wore gloomy faces. They understood clearly that if Emperor Sea Shark hadn't helped them at that time, they would have endured Ferrell's sinister deeds. Also, because Emperor Sea Shark had helped them, he had brought his members a genocide.

Hu Jiao and the blood-iron warriors of the Sea Clan came and kneeled in front of Emperor Sea Shark. Hu Jiao said, "We didn't fail you. We have protected the Crystal Palace. However, it's very dangerous around; we have to keep it in another area."

"Tribal Oldie! Please take revenge for us!" Datuk's eyes were bloodshot. He gritted his teeth until blood trickled down the corners of his mouth. He grunted with deep resentment. "Ferrell and the Soul Clan had destroyed our shelters. Half of our population was killed. Please seek justice for us!"

"Please take revenge for us!" All the members of the Sea Clan cried in agony as if they wanted to cry their hearts out of grief.

“I got it. I know it. I will. I definitely will...”

Emperor Sea Shark had tears lingering in his eyes. He screamed his most solid promise that was imprinted in his soul and would never fade.

“Datuk, what happened?” Shi Yan walked to him and asked in a soft voice.

Datuk looked at him, his face so cold, but he said nothing.

He knew that everything that happened was related to Shi Yan. Without Shi Yan, the Sea Clan wouldn't have had to endure such catastrophes.

Seeing Datuk with discreet resentment, Shi Yan rubbed his nose and sighed. He didn't ask further as he understood the hatred the Sea Clan had for him.

“Datuk, don't be impudent. It's our choice. We owed him. We must pay back. It's not directly because of Shi Yan,” shouted Shen Ren. He pulled himself together and then asked, “What happened after all?”

Datuk pondered for a while and then told them what had happened...

At first, due to Montecie's slaughter, Ferrell, Ricardo, and Neptune had escaped the Sea of Annihilation. Although they had been aimed at the whole time, they still survived. They just needed to give up some benefits.

After Montecie had left the Sea of Annihilation, Ferrell and Ricardo didn't return. However, because they had joined the five clans, their subordinates had swaggered around and forced Datuk and Hu Jiao. They had to restrain themselves a lot and their territory was reduced.

During that time, they hadn't encountered any catastrophe.

This was until Shi Yan invited Montecie, Hiro, and Emperor Sea Shark to Desolate Territory. To find the entrance to Desolate Territory, the five clans had sent their troops to the Sea of Annihilation. Ferrell, Ricardo, and Neptune had also returned since the forces they had gathered were strong enough to not worry about Montecie's power.

They weren't afraid of Montecie, so they began to find Emperor Sea Shark to take revenge. Neptune and Ferrell had launched their operation. They sent troops of the Soul Clan and Ancient Monster Clan to the seabed to hunt Datuk and Hu Jiao. They did that to force Emperor Sea Shark to show himself. They even wanted to kill Emperor Sea Shark altogether.

Datuk and Hu Jiao knew that Emperor Sea Shark had gone to Desolate Territory. They couldn't contact him, so they had to avoid the danger. Thus, they had to run away the entire time. The Sea Clan's shelters were raided until they retreated to this last resort. They finally got some time to rest.

However, they were still edgy as they were afraid that Neptune and Ferrell's warriors would come to hunt them down to the last member at any minute.

It was also the reason why they screamed in panic when they felt someone coming. They thought that their enemies had finally come to take their lives.

“Neptune!” Emperor Sea Shark gritted his teeth.

“Ferrell!” Mei Ji also sneered, “I have to find him too! He killed a lot of my subordinates. He killed Yu Lian! Does he think he can resist our wrath if he comes to the Ancient Monster Clan? Harrumph!”

“Neptune and Ferrell came to the Sea of Annihilation personally because of the territory entrance. It seems like they got some harvest...”

Shi Yan contemplated, his eyes flaring with light. He knew something...

“What do you mean?” Mei Ji reacted fast.

“Except for the warriors from Desolate Territory, only the Devouring Clan knows the territory entrance. As the Devouring Clan failed in Desolate Territory and I got the Power Upanishad Symbol Tower, the Devouring Clan wouldn’t let it slip away easily. I think the Devouring Clan will disclose the precise location of the territory entrance,” assumed Shi Yan.

“It’s true. Otherwise, the hotshots from the five clans wouldn’t gather in the Sea of Annihilation altogether,” Mei Ji nodded.

Shi Yan pondered for a while, his eyes raking through Datuk, Hu Jiao, and the others. After a long moment, he said, “Precursor Emperor Sea Shark, the urgent matter to do now is to take them to the Endless Sea first. We have to ensure their safety first. About taking revenge, I can commit that I won’t just stand and stare!”

“You?!” Datuk snorted, “You’re at the Immortal Realm. How can you manage that? Can you?”

“Shut up!” Shen Ren shouted and then talked to Emperor Sea Shark, “Tribal Oldie, deliver the kids to the safe place first. We will take revenge later. What do you think?”

Emperor Sea Shark wasn’t foolish. He knew what was wise to do. He nodded and then said, “Do as Shi Yan said. We will take our fellows to the safe area first. The Sea of Annihilation will become chaotic soon. The Great War will happen at any minute.”

Then, Emperor Sea Shark, Shi Yan, and Mei Ji escorted the Sea Clan’s remaining members. Emperor Sea Shark used his Territory Ancestor Realm power to transport them to the territory entrance to Desolate Territory.

So many black brocade flags with drawings of brutal souls and evil ghosts flew to the front of the algae area.

Hu Jiao observed for a while and his face turned icy as he grunted. “It’s them!”

“It’s the Soul Clan and the Ancient Monster Clan’s troops that had surrounded and destroyed our fellows!” Datuk gritted his teeth like a wounded wild beast, his face resentful.

“Kill them all!” hissed Shi Yan.

[God of Slaughter](#)

Chapter 1509: Discharge Resentment!

So many black brocade flags fluttered on the seabed. The members of the Soul Clan stood under the flags and most of them had profound realms at Incipient God Realm and Immortal Realm.

The leader of this troop was also a Commander at Singh's level, Worthy. He was at the Peak of Immortal Realm and he got Dark Energy, which meant that he was just one step away from the Territory Ancestor Realm.

Worthy had a close relationship with Neptune. He attacked the Sea Clan this time to force Emperor Sea Shark to show himself.

On the Sea of Annihilation seabed, Worthy had attacked Datuk and Hu Jiao many times. Hu Jiao couldn't resist him and he had let him kill many Sea Clan warriors.

A massive, shining black brocade flag hovered above his head. It was like his ghostly face!

Worthy had a lanky body and his skin was like tree bark. So many ghosts wound around his body and wore extremely ferocious and sinister appearances. He was infamous even in the Soul Clan.

"Brother Cambay, I heard that precursor Ferrell had accepted you as his disciple. Congratulations! You also cultivate Lightning power Upanishad. Following him, your realm will advance rapidly!" Worthy grinned and looked at Cambay standing next to him.

Cambay was a member of Ancient Monster Tribe at Third Sky of Immortal Realm, but he hadn't gotten Dark Energy. After Ferrell had joined the Ancient Monster Clan, Cambay volunteered to be his subordinate because he also cultivated Lightning power Upanishad. He wanted to learn stronger techniques from Ferrell.

It was Ferrell's plan to send him to the Sea of Annihilation this time to slaughter Emperor Sea Shark's warriors. He was also willing to do that, anyway.

He wanted to use this chance to prove his talents and prove that he had wholeheartedly followed Ferrell. He hoped that Ferrell would teach him his profound power Upanishad.

Cambay and Worthy were here to hunt Emperor Sea Shark's warriors. They knew each other and now, their target was the same. Of course, they would go the same way.

During this time, while Neptune and Ferrell had exerted their efforts to find the territory entrance, the two of them had taken the troops to kill half of the Sea Clan warriors on Hu Jiao and Datuk's side. After the others had found the territory entrance, their mission here was going to be done too.

However, at the last moment, they had encountered trouble. Hu Jiao and Datuk had disappeared.

They understood that this sea area belonged to Emperor Sea Shark and they knew there would be some traps around. They knew that Hu Jiao and Datuk had hidden the remaining members of the Sea clan around this area. However, they had searched around for a long time and found nothing. They became skeptical.

"We should finish them early. It'd be better," Cambay laughed. "I heard that Edgar of the Soul Clan found the territory entrance's location. He invited people to wait there. Rumors say that Desolate Territory has so many marvels. We should finish here as soon as possible so that we can go there too."

“I think so,” Worthy guffawed, “Hu Jiao has retracted his head. He thought we couldn’t find him. But it’s good then. Once we find them, we can harvest the whole batch. It will save us from many troubles.”

While talking, they saw a big mass of algae moving fast. Their eyes brightened.

Checking for a while, they cried in surprise as they realized that they were Hu Jiao, Datuk, and the remaining members of the Sea Clan.

They stirred up immediately. They ordered their troopers to align in formation to cover that mass of algae.

The groups of the Soul Clan and Ancient Monster Clan became dark and cold, their brutal aura emitting. They began to move around the mass of algae and stand in formations.

“Hu Jiao! I know you’re there. Our request is simple. You tell us where Emperor Sea Shark is or you die!” Worthy pulled a dark face and grinned. “But even if you choose to die, I won’t let you die easily. Muahaha, perhaps you know how your fellows were killed. They didn’t have an intact body, did they?”

Inside the mass of algae, the Sea Clan warriors had red eyes like beasts that saw blood.

The images of the dismembered corpses emerged in their heads, which churned their resentment in their hearts. They became restless.

“We shouldn’t show up. We don’t want them to run away. If we want to kill them, we will kill them to the last member,” Shi Yan muttered.

Mei Ji nodded quietly.

Emperor Sea Shark and Shen Ren wore dark faces. After a while, Emperor Sea Shark said, “Hu Jiao, lure them in! As long as they get in, we can kill them all!”

Hu Jiao became excited as if each of his cells revived. Inside the mass of algae, he shouted, “Worthy! Cambay! Even if we become ghosts, we won’t let you go! Tribal Oldie will seek revenge for us!”

“Muahaha!” Worthy crackled sinisterly. “Become ghosts? Haha, I, Worthy, want to make you ghosts! Haha, my ghosts!”

The brocade flags above the Soul Clan troops changed. Many ghosts appeared and they were all the members of the Sea Clan!

Worthy had killed them and dragged their souls; he refined them to be his brutal souls and ghosts. They were now an energy source for his weapons.

“It’s... the kids’ souls.” This mass of algae was strange. After Shen Ren had sent his Soul Consciousness to it, it became transparent. The Sea Clan experts inside could see the commotions outside. Thus, they realized their familiar fellows on those flags.

After those souls were refined, their consciousness was omitted, which made them bloodthirsty and evil. They didn’t have any human emotions.

The members of the Sea Clan inside the tufts of algae felt their hearts bleeding as they saw their families and friends like that. Emperor Sea Shark clutched his chest and shivered. He looked like many lightning strikes struck him. He looked extremely grieved.

“We’re not going out there. We will defend this place until our Tribal Oldie comes back. When that day comes, you all have to die!” Hu Jiao looked at Emperor Sea Shark, shouting.

“If you don’t get out here, we will go there to catch you. Muahaha, how do you have the guts to talk to me like that?” Cambay shook his head, waved his hands, and then said to his subordinates, “We don’t have time. Don’t waste more. Let’s go. Follow me.”

“Get in!” Worth ordered and signaled his troopers to be careful.

Worthy and Cambay took their warriors and attacked the algae mass. They urged their God power. Their entire bodies sparkled as they were cautious to prevent any ambush.

Magically, they didn’t encounter an attack as they moved toward the algae mass.

Worthy and Cambay became skeptical. They thought that Hu Jiao and Datuk didn’t have enough power to set up an outer defense. They relaxed more, so they called for the other warriors guarding around to come. All of them had finally entered the vast field of algae.

This algae field was really immense. Perhaps it was even several times bigger than the Immortal Island. The thick algae leaves had covered everywhere. Moving through the area, they all felt their visions and Soul Consciousness hinder. It was hard to check the life energy fluctuations here.

Apparently, with Worthy and Cambay’s competence, they couldn’t sense Shi Yan’s and Emperor Sea Shark’s life energy fluctuation.

Thus, they only saw fungal plants, red coral, and shattered glass after entering the algae field.

They also saw the Sea Clan warriors in helter-skelter conditions. They saw Hu Jiao, Datuk, and the fierce appearances on their faces.

Worthy and Cambay didn’t notice. They thought that Hu Jiao and Datuk was now at the end of their strength, so they just laughed, “It’s your last force. It’s good that we can kill you all here and then run to the territory entrance.”

Mingling in the crowd, Shi Yan felt chilled as he knew he was right. Edgar of the Devouring Clan had disclosed the entrance’s location.

Hu Jiao and Datuk wore cold faces as they watched Worthy and Cambay came one after another. They didn’t hurry. Emperor Sea Shark and Shen Ren hiding behind them didn’t show themselves yet.

Gradually, most of Worthy’s and Cambay’s troopers had entered the place. Receiving their leaders’ signals, they grinned and showed their fangs to accept the killing mission.

At this moment, Emperor Sea Shark and Shen Ren finally walked out of the crowd. “I heard you guys wanted to see me?” Emperor Sea Shark tried to suppress his anger, his voice relatively calm.

Boop! Boop! Boop!

Flows of sharp water like darts shot out from behind Emperor Sea Shark. Shortly after, dozens of Soul Clan's and Ancient Monster Clan's warriors were pierced through.

Those water arrows seemed to have consciousness. After they had pierced through those people, they acted as sharp blades that chopped off their bodies!

The pungent smell of blood emitted from the center of the algae field. Blood dyed the seawater red like there were so many beautiful red flowers.

"Emperor Sea Shark!"

Worthy and Cambay screamed at the same time. They acted as if they had encountered ghosts. They became restlessly frightened.

"You... aren't you in Desolate Territory? Sir Edgar said that he met you there. How could you be here?"

"It turns out that you knew about my whereabouts right from the start. You just made an excuse to slaughter my fellows! No wonder you're here instead of the two bastards Neptune and Ferrell! They knew I couldn't be here!" Emperor Sea Shark's wrath erupted as he shouted crazily.

Emperor Sea Shark took action!

Shi Yan and Mei Ji exchanged looks and also took action.

Icicles shot out from Mei Ji's eyes like Death Scythes. The warriors from the Soul Clan and the Ancient Monster Clan couldn't resist. They were frozen and broken.

Shi Yan had space vines slither in his eyes like snakes.

Sharp space sabers emerged invisibly. Worthy and Cambay's warriors were minced like cubes of tofu that were cut off equally.

The Sea Clan members were cheering happily as they saw Worthy and Cambay's subordinates being killed tragically. Finally, they could discharge their heavy resentment!
