Chapter 371: Bursting Attack

His mind was slightly triggered as seven hundred and twenty acupuncture points in his body suddenly became tense while raging negative force abruptly flowed out from his acupuncture points.

The First Sky of Rampage!

Feeling the horrendous negative power overflowing, ShiYan's body muscles suddenly became taut. A tremendous strength spewed out from his shaking muscle fibers.

In just a blink, ShiYan's force had soared several times.

The inky-black tentacles daringly rushed toward him, entangled him, and pulled him straight to that weird octopus's huge, dark mouth with skyrocketing force.

However, his sinking body suddenly stopped at the bottom of the lake. No matter how much strength that octopus was using, ShiYan was like a ten-thousand-year stagnant rock under the water, impossible to move.

In ShiYan's cold eyes, a ferocious beam of light zoomed over right on the octopus' enormous mouth. He slowly concentrated his mighty power inside his body, not taking actions hastily, only staring at the octopus's huge mouth. It looked like he was hesitating.

Ten zhang (1 zhang is equivalent to 3.33 meters) above his head, a trace of surprise appeared in AiYa's and CaiYi's eyes. They looked at ShiYan full of suspicion, not knowing why his sinking body had suddenly stopped.

They both had the Sky Realm cultivation base, and their full powers were considered to be equivalent to that of the octopus. Meanwhile, ShiYan only had the Second Sky of Nirvana Realm, how could he have such tremendous strength?

Ngải Nhã and CaiYi blankly looked at ShiYan who was now motionless near the octopus's mouth. Their faces were filled with shock and doubt. The two of them would never believe that ShiYan, who was only in the Second Sky of Nirvana Realm, could have the strength that was comparable to theirs.

While the two girls were still puzzled, his body slowly sank again. Fear in their eyes seemed to fade away. They secretly let out a sigh of relief and felt that ShiYan's earlier abnormality might be just because of the octopus's adjustment. After it had adjusted, everything returned to normal.

The octopus was indeed adjusting itself.

This monster was surprisingly wise. Every one of its tentacles was very abnormally sensitive. As soon as ShiYan's hidden strength had burst out, it immediately felt the aggressive power from ShiYan's body.

This vigorous strength of his clearly surpassed those of AiYa and CaiYi. Hence, as the octopus could feel something wrong, it then concentrated more of its power on ShiYan's body to reinforce the power of its tentacles and bind ShiYan more tightly in order to strangle him to death first.

Originally, the octopus had wanted to increase its power on AiYa and CaiYi, but it then retrieved that part of its power back and transferred it along those black tentacles all the way to ShiYan.

ShiYan was immediately aware of the entanglement of those tentacles all over his body.

With his unchanged face, ShiYan sneered coldly and calculated a plan. Not only did he not struggle tenaciously but he also suspended a burst of his strength. Under the pull of those tentacles, his body slowly sank to the octopus's mouth.

At this time, he couldn't help but look at AiYa and CaiYi above his head, seeing them let out a sigh of relief.

They want me to die...?

The resentment in his heart got deeper as he was calculating discreetly.

The distance from the octopus' huge, gloomy mouth was getting closer and closer. The two girls AiYa and CaiYi seemed to relax a little bit when seeing the octopus about to swallow him into its belly.

The beauty of their privates couldn't escape ShiYan's sharp eyes. There were not any secret places on their bodies that ShiYan didn't know. Everything had been revealed in front of his eyes.

As for AiYa and CaiYi, the fact that a stranger had seen their graceful bodies was unacceptable. Even if the octopus couldn't kill ShiYan, they would keep the idea of killing him and destroy him afterward.

Otherwise, ShiYan's existence would be a knot that never dissolved in their hearts that could probably affect their state of mind in the future as well as their Realm breakthroughs.

The two girls happily watched ShiYan's imminent death and secretly planned that when the octopus was busy devouring ShiYan, they would take this chance to escape the lake.

With that thought, AiYa and CaiYi paid more attention to ShiYan's every move. Their beautiful eyes were glued to ShiYan's body without a blink, watching him moving closer to the octopus's huge mouth and quietly waiting for their opportunity.

ShiYan's eyes were as cold as ice; the corner of his mouth curved up, displaying his ruthlessness. He stopped looking at AiYa and CaiYi above his head but stared at the octopus's enormous mouth which was coming closer and closer. He could even smell the stink from its mouth.

Fierce sword-like fangs flashed up with terrifying, chilling lights. Those fangs contained poison and the stench from the octopus's mouth, which also had powerful toxins, violently struck his nostrils.

Ordinary people once they fell into that mouth, would be paralyzed by the toxins and become flabby. Then, the octopus would take the opportunity to crush and devour them.

ShiYan sneered coldly inside his heart while looking at that huge mouth and was secretly on alert and well-prepared.

When he was around five meters away, the octopus's mouth opened, showing dense fangs that looked like two rows of wind blades, waiting for him to enter.

ShiYan was still resisting the tentacles with all of his strength. However, his body suddenly loosened.

ShiYan's resistance abruptly disappeared. Thus, under the tentacles' aggressive pull, his body darted out like an arrow and instantly went into its giant mouth.

The Octopus's tentacles wrapping around ShiYan instantly let go right at the moment he fell into the stinky mouth. At the same time, the octopus immediately closed his mouth, ready to push the venom into ShiYan and chew him.

AiYa's and CaiYi's countenance enlightened when the giant mouth of the octopus closed. They started to put forth their strength and use all of their techniques as well as secret treasures to get out of the tentacles.

Many beams of lights bloomed out from the two girls' graceful bodies and instantly cut off those tentacles, which were aggressively wrapping around them. However, more and more tentacles quickly flew over from below and bound the two of them again.

AiYa and CaiYi gritted their teeth urging all kinds of techniques and Upanishads to the most while strange lights continuously flashed up around them. A terrifying bunch of lights flew next to the two girls' white bodies, continually resisting the octopus's tentacles.

Their strength had been drained.

ShiYan was inside the huge mouth of the octopus, feeling the stench right up his nose. The viscid venom dripped down from the roof of the mouth, watering his entire body.

He released the Star Shield. Inside that giant mouth, Starlight dazzlingly sparked and was as thin as a mite's wing. The Starlight kept flickering nonstop, giving people an unpredictable kind of a mystery as if Heaven and Earth were hidden in those flashing star points of light.

In the lake, when the octopus's big, black tentacles had been wrapping around him, which were an aggressive mighty pulling force and filled with demonic power, it affected his ability to run his full strength.

It was precisely because of this, he, together with AiYa and CaiYi, could not display a defensive shield of light similar to this Star Shield.

When he fell into the octopus's giant mouth, the tentacles were immediately retracted. At the same time, he instantly opened the Star Shield which he had prepared earlier, protecting his whole body before more of its venom covered his body.

As soon as the Star Shield had formed, ShiYan slightly relaxed a little bit as he watched the Star Light sizzle when the venom fell on it, releasing a thin mist of smoke. ShiYan's face was solemn.

The venom inside the octopus's mouth was unexpectedly toxic. Even the essential power of the Star Shield was dissolving slowly with each drop of venom that dripped down.

Before the tentacles let go of him, his body had inevitably been stained with some viscid venom. Inside the Star Shield, he saw the Star Shield fuming under the effect of the venom. He then watched the stained venom slowly making his skin decay. ShiYan couldn't help but frown.

A mist of smoke also rose from the skin that had been exposed to the venom. The Octopus's venom was amazingly corrosive and was fighting with his two great Martial Spirits.

The venom corroded his skin and flesh, making many wounds. The corrosion of the venom was blocked by a peculiar power inside his muscle fibers. After a short while, the venom disappeared without a trace. Actually, his muscle fibers had infiltrated the venom and dissolved all of it.

Inside the Star Shield, ShiYan chuckled while looking at the roof of the disgusting mouth dripping down venomous drops, feeling this enormous mouth filled with mighty powers, seeing sharp fangs like wind blades approaching quickly. His peculiar strength flowed out, and his body trembled slightly. ShiYan finally took action.

A fist with power that could ram mountains.

A punch struck the wall of the octopus's mouth. His strike had caused a huge blood hole on the thick, dark-red wall of the monster's mouth.

The octopus screamed out loud.

In pain, a bright red tongue-like foreign body suddenly flew out and stormed toward him.

ShiYan's face remained unchanged. He put all of his power to take action; he didn't perform any techniques, but just relied on the mighty power of his body bombarding all sides of its mouth.

Torrential energy like a mountain avalanche burst out from ShiYan's muscle fibers, and he was extremely excited. His body had enough powers to kill everything. Inside the octopus's mouth, he continually shot out horrendous strength from his body.

AiYa and CaiYi were fighting with the tentacles with their full powers and suddenly felt that the pressure was loosened. They didn't know why those tentacles strangely twisted, shook off and stopped wrapping around them.

They were stunned as they subconsciously looked at the octopus, which was now crazily dancing and shaking on the bottom of the lake. Its tentacles were flying around while its giant body was moving wildly. It seemed to be getting torn apart from inside by some violent power.

The two girls' eyes and mouths were wide-open.

Chapter 372: Occupying the beauty

Even if AiYa and CaiYi were idiots, both of them were sure that the octopus's abnormality had something to do with ShiYan.

They just didn't know why ShiYan hadn't been killed yet, but on the contrary, he still had the strength to make the octopus resist strenuously while he was only in the Second Sky of Nirvana Realm. Moreover, he was kept inside the octopus's toxic mouth.

AiYa and CaiYi couldn't figure it out.

In these two girls' eyes, ShiYan was only an ordinary Nirvana Realm warrior and came from the Endless Sea, a barbarian land. What ability did this kind of warrior have to be able to make the Thousand-hand Ink Octopus not able to fight back?

CaiYi and AiYa both knew that this Thousand-hand Ink Octopus was a seventh level beast, living in the water with tremendous strength. The corrosive power of venom from its fangs was terrifying. Moreover, Thousand-hand Ink Octopus's tentacles all connected to its monstrous original power, and thus, once someone got entangled by those tentacles, one's defensive force was hardly performed.

The Thousand-hand Ink Octopus's killing method was to use its tentacles to wrap the opponent's body first, then pull the victim toward its huge mouth. Once the venom from its mouth touched the warrior, he would immediately weaken, and his skin and flesh would quickly be corroded.

When the warrior's body was rotten and exhausted, the octopus just needed to use its fangs to tear it apart. None of the warriors in this situation could withstand it, and they soon became a blood clot and were swallowed down into its abdomen.

CaiYi and AiYa also wondered about their cultivation base level; once falling into that octopus's mouth, if they weren't able to activate their defense light shield either, and thus, they would be rotted by the stinky venom and torn down into pieces.

That was why they had to struggle harder and emit their full power to resist the pulling force of the Thousand-hand Ink Octopus. They didn't dare to let themselves fall into that huge mouth.

Therefore, when ShiYan had fallen into the toxic mouth of the Thousand-hand Ink Octopus, they had been certain that he would have died and that there was no chance for him to escape death.

However, at this moment, the octopus was dancing crazily, which was obviously a masterpiece by ShiYan. ShiYan apparently wasn't dead, but instead, he was continuously taking action inside the Thousand-hand Ink Octopus's mouth, making it endure pain.

AiYa and CaiYi, on one hand, were struggling to get rid of the tentacles wrapping them. On the other hand, they looked down with surprise while their hearts were full of doubt, as they suddenly felt that this guy ShiYan seemed to be a little bit unusual.

However, at this time, horrifying demonic power abruptly flowed out from the Thousand-hand Ink Octopus's tentacles. It was aggressively moving its body as if its countless crazy counterattacks were finally coming.

AiYa and CaiYi understood this Thousand-hand Ink Octopus's habits as well as its attacking method. They knew that when Thousand-hand Ink Octopus was about to die, its demonic power would burst out through its tentacles, ruthlessly entangling creatures to death.

After having used a big amount of demonic power, Thousand-hand Ink Octopus was greatly exhausted. If it weren't this critical, dangerous time, Thousand-hand Ink Octopus would not have done so.

CaiYi and AiYa wore a frightened look, feeling the force of the tentacles around them. Their countenance finally changed. They forcefully struggled, using all of their techniques and secret treasures to cut off those tentacles that were wrapping around their soft, snow-white bodies.

AiYa was even better. Besides her exquisite cultivation base, her Storage Ring suddenly flashed up with a strange beam of light. Countless ice-like white light bloomed out densely.

At the same time, she immediately cast out Broken Blades. Each pointed blade appeared sparkingly then cut off more than half of the black tentacles and also condensed her body strength to prepare in case of this octopus's sneaky attacks.

CaiYi also knew that the Thousand-hand Ink Octopus's attack this time would be extremely sharp. She knew that it was impossible to cut off a majority of the tentacles in such a short time.

"Boom Boom Boom."

The tremendous power like a mountain avalanche broke out from the two girls' bodies. The tentacles that were wrapping around them burst out all of a sudden. Torrential demonic power crazily stormed toward their graceful bodies, seemingly wanting to destroy their defensive forces.

"Ptsui."

AiYa and CaiYi spurted out a mouthful of blood simultaneously. The light in their eyes dimmed. Their snow-white bodies were stained blood that burst out from the Thousand-hand Ink Octopus's tentacles.

AiYa spewed out a mouthful of blood and instantly saw other tentacles spreading over from the bottom, twisting, and once again wrapping her up.

This Thousand-hand Ink Octopus apparently hadn't given up yet. It was about to destroy all the creatures in the water.

Her face changed again and again. She fearfully looked at the crazy octopus and without overthinking, put forth all of her strength to fly up to the surface of the lake like a beam of light piercing through layer upon layer of the lake illusion, quickly getting out of this peculiar lake.

CaiYi also spurted out a mouthful of blood while her power, as well as her Profound Qi, seemed to be reacting a little chaotically.

Before she could organize her forces, the Thousand-hand Ink Octopus's tentacles had already spread toward her body again. It didn't let her flee, and once again bound her snow-white body.

Another intimidating demonic power burst out. The Thousand-hand Ink Octopus's tentacles on her body blasted. Raging demonic power rushed forward, destroying her defensive forces, instantly making her unconscious.

CaiYi's soft, white body was drifting in the water, slowly sinking, no longer able to fight against the Thousand-hand Ink Octopus's tentacles.

At this moment, Thousand-hand Ink Octopus was growling and screeching crazily in the lake. Sharp, weird sounds came up and spread in the water. The lake suddenly boiled up with huge bubbles.

That Thousand-hand Ink Octopus wiggled its body even more crazily but quickly weakened. Many blood holes suddenly appeared in its strange head. When those blood holes broke, the water instantly poured in and filled its brain.

The Thousand-hand Ink Octopus was gradually exhausted although it still wanted to gather its strength. Its black tentacles hovered around without any power.

ShiYan was in the Thousand-hand Ink Octopus's brain, continually releasing his violent body strength. Under the First Sky of Rampage and with the help of the hidden strange power inside his muscles, he transported his Profound Qi and launched powerful blows without using any of his techniques. The brain of this Thiên Thủ mặc chương Ngư was smashed down and splashed everywhere.

As the brain was destroyed, even if the Thousand-hand Ink Octopus was very dangerous, it hardly blocked ShiYan's violent attacks. It gradually no longer resisted and slowly began to sink.

Inside the crushed brain, ShiYan continued destroying everything wantonly like a brutal beast. His hands and feet stirred up this brain with immense force.

A fist-sized Demon Crystal gradually emerged at a corner of that crumbled brain, flashing up with strange black lights.

ShiYan burst into laughter. One of his hands clenched the Demon Crystal tightly while he was activating the negative forces which were used for the Death Seal's condensation to take out the Demon Crystal from the site.

A destructive power was launched, and the octopus's life was completely ended by his strike. It no longer had taken a breath, and thus the sinking speed quickened.

Like a sharp sword, ShiYan flew out from a blood hole on the Thousand-hand Ink Octopus's head and reappeared on the bottom of the lake, feeling very happy and satisfied as he had reaped a large harvest.

A seventh level Demon Crystal was extremely precious in the Dark Magnetic Noxious Mist. With this Demon Crystal, even if his Profound Qi had been consumed entirely, he could completely restore it.

After the Demon Crystal fell into the Storage Ring, ShiYan quietly suspended in the water, watching that Thousand-hand Ink Octopus slowly sink to the bottom of the lake with a cheerful face.

A slender, snow-white body suddenly appeared in front of his eyes. He raised his head up and realized that CaiYi was totally naked with a pale face and was gradually sinking to the bottom of the lake.

ShiYan stared at CaiYi with a cold face, revealed a chilling sneer at the corner of his mouth and quickly zoomed over to her like a fish.

Looking at her graceful body, her firm, big breasts, her small, boneless waist, her plump thighs and long limbs, ShiYan chuckled slightly. He then moved forward, stretched his arms out grabbing her, feeling the warmth from her body and the chaotic forces inside it.

After a quick check, he knew that CaiYi was just unconscious temporarily. A long while later, when her strength was restored, she would wake up again.

Holding her breathtaking body, ShiYan sneered while one of his hands bluntly moved around on her soft, white body.

After playing with CaiYi's beautiful breasts, her waist, her long legs, and her round rear end for a while, ShiYan slowly swam toward the cliff in the lake. After having dug out a cave quite easily, he held CaiYi and went inside it.

He retrieved the Star Shield and released the Dark Shield. The defensive Dark Shield relied on Profound Qi instead of the star power. As soon as the Dark Shield was taken out, the water of the lake was stopped outside the shield, and he and CaiYi stayed together inside it.

Sitting inside the wet cave, ShiYan held CaiYi's mesmerizing, snow-white body on his thighs, looking at her with dazed eyes.

His two hands bluntly moved on her body which drove countless males crazy, felt her smooth, white skin and her big, firm breasts. Although ShiYan had some evil intent in his mind, he was not that uncontrollable. On the contrary, he frowned and considered how to handle this beautiful girl.

ShiYan's big hands moved around while his face became cold; his eyes became chilled. Not long after that, he sneered coldly and was ready to violate her.

However, at this moment, strange power ran all over his body. Meanwhile, the purification of the three dead warriors' auras had finally finished in his acupuncture points.

The strange power suddenly overflowed like powerful snakes, converging into the Profound halo on his abdomen.

After an exhausting fight with the Thousand-hand Ink Octopus, ShiYan had consumed a large amount of his Profound Qi. However, during a short time of restoration, under that mysterious, strange power, his Profound Qi increased slightly.

ShiYan's body was agitated. He immediately closed his eyes, felt the transformation of the Profound Qi halo, immersing his mind into that marvelous ancient Profound Qi tree.

At this time, CaiYi was still unconscious; however, her eyelashes shivered slightly. It seemed she was about to wake up.

[God of Slaughter](#)

Chapter 373: Punishment

Mysterious power moved toward and penetrated the ancient Profound Qi tree, which contained vigorous forces, making it sparkling and crystal clear.

ShiYan closed his eyes, feeling the changes of the ancient Profound Qi tree. He was joyful as he knew that with his vigorous Profound Qi, together with the comprehension of his state of mind, he could break through the Third Sky of Nirvana Realm, making him one step further.

Entering the Dark Magnetic Noxious Mist this time, his main purpose was to temper himself with the fastest speed to enhance his cultivation base. When he returned to the Endless Sea later, he would take revenge on the Demon tribes and those forces which had wanted to obliterate him.

LinDa's and Xia ShenChuan's deaths had made him quickly realize that only having a mighty strength could facilitate him in doing whatever he wanted in this world instead of being someone else's stepping stone.

The transformation of the Profound halo made him very happy as he was one step closer to his goal.

At this time, the chaotic power in CaiYi's body gradually calmed down and regained its normal state; her eyelashes flickered slightly. She then woke up from being unconscious.

As soon as CaiYi's eyes opened, she saw ShiYan's cold face with his eyes closed. CaiYi subconsciously wanted to shout, but she immediately remembered the incident earlier and thus quickly suppressed her emotions. Instead, she stayed calm and considered the situation.

She was lying naked on ShiYan's muscular thighs. ShiYan's big hands were still caressing back and forth over her sensitive back and buttocks.

While ShiYan's hands were moving, CaiYi could feel an electric current zooming over her back, making her feel shameful, like she had never been so humiliated in her life.

Seeing ShiYan meditating with his eyes closed and feeling his hands caressing her body, CaiYi wanted to breathe out fire and could hardly restrain her anger. Thus, she secretly gathered her power. Then suddenly her jade-like pair of arms went straight for ShiYan's chest.

"Disintegration Variation!" CaiYi let out a shout.

The halos with yellow and red colors flowed out from the center of her palms. The two strange lights burst out, forming a robust power that darted straight to ShiYan's chest.

His powerful strength burst out from his chest. Hundreds of different red and yellow lights instantly penetrated ShiYan's chest as if they wanted to tear his lungs and heart apart.

"Boom!"

An explosive sound came up. ShiYan's back hit the hard stone wall with a thud, making rubble fall everywhere. This incident caused the stone cave to burst open; a block of stone from above his head fell hard.

CaiYi took this chance to take action like a female beast with resentful eyes. Many rings from her snow-white arm flew out instantly; she looked like she wanted to annihilate him for good.

While experiencing and observing the mutation of the ancient Profound Qi tree, ShiYan was suddenly CaiYi ambushed by CaiYi, which caused pain on his chest. The strange power inside the muscle fibers on his chest thus burst out, and his Petrification Martial Spirit reached its supreme. At the moment when CaiYi launched her violent attack, ShiYan's skin became purple, and his extremely strong defensive force had blocked her strike.

Hundreds of yellow and red powers flowed into ShiYan's chest and were instantly entangled by the mysterious power in his muscle fibers. Those yellow and red powers could not penetrate the strong muscles on his chest to crush his heart and lungs.

ShiYan's body shook violently. He suddenly woke up and threw a cold glance at CaiYi. He suddenly sneered and didn't care about CaiYi's next attack. Instead, he urged the Electric Shift and fiercely jumped on CaiYi's body.

"Boom."

CaiYi stood up and swung her snow-white arm, and the rings on her arm strongly clinked together. Before she could launch her next attack, ShiYan had already knocked her out to the lake.

ShiYan sneered with a cold face as he rushed out and moved next to CaiYi who had just fallen into the water. He stretched his left hand, grabbing her snow-white neck while the other hand held her body and then brought her back into the stone cave.

ShiYan's counterattack was exceptionally ferocious. His violent force burst out from his muscle fibers.

After the Petrification Martial Spirit had reached its supreme state, his body became the most horrible of weapons. He didn't even need to transport his Profound Qi; he just relied on the bursting force of his sturdy body to deal with CaiYi's attacks.

When CaiYi had been under the water, she had been severely injured by the Thousand-hand Ink Octopus, and her Profound Qi had been consumed. Thus, together with being unconscious earlier, her strength had been reduced significantly. Moreover, she was not good at hand-to-hand combat, and thus, launching a sneak attack on ShiYan in that small stone cave was not a smart move.

With her white neck being buckled in ShiYan's left hand, CaiYi's eyes were full of fear. She wanted to scream out loud but realized that her throat was being blocked, and she couldn't let out a single sound.

Just like that, with ShiYan's hand strangling her neck, CaiYi's heart quickly sank. A terrible burst of power transmitted from his left arm which frightened her mind. She knew that if she made another move, ShiYan would clench his fingers tightly, crushing her neck.

Therefore, CaiYi was in shock as she watched ShiYan in silence. She didn't dare to make the slightest move while the rings on her arm continued to tremble and finally subsided without acting recklessly.

ShiYan carried her and sat down again in the stone cave. His eyes burned, staring at her mesmerizing, beautiful naked body; the corner of his mouth moved slightly, a trace of lust glimmering in his eyes.

CaiYi was panicked. Her beautiful eyes looked at ShiYan sharply as she didn't know what he wanted to do.

ShiYan didn't say a word. His hand held her neck, carrying her up into the air. He coldly looked at her and considered thoughtfully.

He originally wanted to use a ruthless whack on CaiYi, killing her to steal the Demon Crystal in her Storage Ring. After that, he would leave this lake and meet the other people of AiYa, Borg and the two brothers LaoLi. However, he thought over it again. Right now, as his Profound Qi had already recovered and reached its supreme, if he killed CaiYi, he could have some mysterious power to add to his martial arts but not much, and thus killing her was somehow a waste.

In addition, if CaiYi died in the lake while he was able to get out of the lake alive, the other people would guess his true ability and thus would consider him an enemy and be aware of him much more than before.

A seventh level Demon Crystal was exceptionally precious in their eyes. If CaiYi died, he would become their target. If AiYa, Borg, LaoLi, and LaoLun united, he was not sure if he could win.

The most important thing was that he was not familiar with the Dark Magnetic Noxious Mist. He still wanted to borrow these people's abilities to discover more of its mysteries. Thus, before he understood everything about this Dark Magnetic Noxious Mist, he didn't want these four people turning their backs on him.

If CaiYi didn't die or was under his control, he could still hide his true strength. By putting Thiên Thủ Mặc Chương Ngu's death on CaiYi's hands, he could have CaiYi restrain AiYa and know more about the Dark Magnetic Noxious Mist's mysteries and the Devine Land's situation through CaiYi.

With that thought, ShiYan finally had his calculation.

His cold eyes and CaiYi's horrified eyes met. ShiYan let out a low shout, and the third eye inside the Sea of Consciousness of his host soul opened. A beam of light flashed up. He then poured his soul consciousness into this beam of light and carefully instructed it to infiltrate CaiYi's head.

"Let go of your Sea of Consciousness, or else I will kill you!" ShiYan coldly looked at CaiYi and intimidated her.

CaiYi was terrified at heart; her beautiful eyes filled with fear. She kept shaking her head as she wanted to refuse.

"If you refuse, I will kill you. But if you accept, I will only leave a mark on your host soul. As long as you obey me from now until my business in this Dark Magnetic Noxious Mist ends, I will remove this soul barrier for you." ShiYan was like a devil using both intimidation and enticement at the same time.

At this moment, CaiYi looked at ShiYan with deep fear inside her heart. She finally understood that ShiYan, whom she hadn't even laid her eyes on before, was the most thoughtful one in the group. He had hidden his true strength and had evil ambition without any human emotions from the beginning.

Right now, she could only see ShiYan's brutal face but didn't think that she had been involved in his calculation from the beginning. She could only remember that she was resentful the Thousand-hand Ink Octopus hadn't killed him when they were under the water, and she had also tried to take his life earlier.

Just remembering someone else's fierceness but finding it impossible to see one's own wickedness was common in the human world, and CaiYi was not an exception.

"I'll count to three. One, two,..." ShiYan's face looked cold and cruel, showing a trace of impatience. He started to count without waiting for CaiYi to respond.

CaiYi kept looking at ShiYan, and now she was certain that ShiYan was a ruthless person, not a soft-hearted one. Hence, CaiYi instantly nodded her head before ShiYan finished counting. She finally let go of her Sea of Consciousness to let ShiYan's soul consciousness in.

In the soul consciousness, although ShiYan was only in the Nirvana Realm, his soul cultivation was much more than that of an ordinary Sky Realm.

Different kinds of spirit Upanishads of Demonic Sound Clan were all profound. In that abandoned land, he had used the group of PanZhe to carry out his soul experiments. This time, his host soul and the Nine Serenities Soul Devouring Flame now gathered in one place, and thus doing this was somehow like 'once a thief, always a thief'.

After his soul consciousness had entered CaiYi's head, he made use of the Demonic Sound Clan's Upanishads. After leaving a spirit seed in CaiYi's host soul, ShiYan quietly explored a little bit more and saw that everything was normal. He then retrieved his soul consciousness that had penetrated her head. Under CaiYi's frightened look, ShiYan suddenly grinned, dashed forward with his evil eyes, and fiercely kissed her ruddy lips.

"Whining..."

CaiYi's beautiful eyes glinted with a trace of shame. She wanted to struggle but couldn't make any move as her body was under ShiYan's control.

Mercilessly kissing her, ShiYan moved his tongue on CaiYi's full lips and then bit them. Blood spread from her lips.

Finally, the hand, which was buckling CaiYi's neck, loosened its grip, and ShiYan detached from her. Looking at the beautiful girl bleeding, he was suddenly overwhelmed with resentment inside his heart. He sneered, "You should have died in that lake, but I have saved you. But earlier, you just required good with evil, and of course, I had to teach you a lesson. So, it was punishment."

"You are even more despicable than AiYa." CaiYi's face was full of resentment, cruelly staring at ShiYan and cursing him.

ShiYan burst out laughing, "the same, the same."

[God of Slaughter](#)

Chapter 374: Coming Ashore

CaiYi's eyes were flooded with hatred, viciously staring at ShiYan. She was resentful that she couldn't kill him right away to vent her flame of anger. Unfortunately, she knew that killing ShiYan at the bottom of the lake was a difficult mission and nearly impossible to do, especially now that her host soul was under his control. As long as ShiYan's mind could be triggered, he could use the soul barrier which had been planted in CaiYi's host soul to obliterate her host soul immediately.

Inside the Dark Shield, CaiYi gritted her teeth while her heart was overwhelmed with hatred and shame. She didn't say a word, took out a set of fluttering ribbon clothes from her Storage Ring and put them on, covering her snow-white body.

ShiYan's look was evil, gazing at her as she put her clothes on, not having the consideration to turn away.

CaiYi was extremely embarrassed and full of resentment, but she knew she couldn't do anything to him.

After she had dressed, ShiYan suddenly smiled and said coldly, "That octopus is dead, and I don't want AiYa and the others to know that it was dead in my hand. I also hope that you can cover for what happened under the water after AiYa left."

"You've confined my host soul. What do you want?"

After having dressed, CaiYi's mood had stabilized. When she remembered how bad ShiYan had treated her, her neck reddened. She now realized that ShiYan was not someone she could control, and she

secretly regretted proposing to keep him before. This was like she had bought a rope to tie herself up. Not only did she fail to use ShiYan to constrain AiYa, but she ended up harming herself.

"I do not know much about this Dark Magnetic Noxious Mist, so I hope you can explain it to me in detail. I am also curious about the identities of the five of you, so, you will tell me about that as well," said ShiYan emotionlessly.

"As for the Dark Magnetic Noxious Mist, LaoLi has told you quite precisely. For other things, I think we can talk about it later." CaiYi looked a little anxious, watching the water. "We should be in a hurry. If we return late, AiYa and other people may think that we are dead and will probably leave this place. Although AiYa is a hateful person, she had many secret treasures in her hands. Staying with her, you can detect something unexpected and avoid a lot of trouble."

Thanks to her reminder, ShiYan realized that the time he stayed in the water was too long. He thought a little bit and then nodded, "Anyway, you should remember that I have planted a soul barrier in your host soul. If you dare to have any wicked intentions, don't blame me for being merciless." CaiYi's face lost its color. She gritted her teeth, nodded, and secretly cursed ShiYan for being a shameless brat.

ShiYan looked at her with a faint smile. He knew that CaiYi hated him a lot, but he didn't really care about it. At least before the soul barrier inside CaiYi's host soul is lifted, he wouldn't need to be worried.

"Did you kill the Thousand-hand Ink Octopus?" CaiYi looked at the lake outside the stone cave, thought for a while and then asked him.

ShiYan rubbed his chin and nodded.

CaiYi knitted her eyebrows and then flew out of the stone cave, sinking toward the bottom of the lake to find the Thousand-hand Ink Octopus's dead body. ShiYan didn't know what she wanted to do and thus followed her flying out of the cave with suspicion. He suspended in the water, frowning and looking at her.

CaiYi dove all the way to the bottom of the lake. When she reached the bottom, her delicate body gracefully moved like a rainbow toward the Thousand-hand Ink Octopus's dead body. She took out a splendid, radiant dagger and dug out the octopus's eyes.

Not long after that, CaiYi flew up next to ShiYan, holding the octopus's eyeballs in her hands and then said to ShiYan, "This seventh level the Thousand-hand Ink Octopus's eyeballs can form a fantasy. We couldn't see the real scene under the water before due to the effect of these eyeballs. You have got the Demon Crystal, so these eyeballs belong to me. Are you okay with this?"

"You just take them," nodded ShiYan.

CaiYi immediately put the octopus's eyeballs away. She contemplated for a while before aggressively looking at ShiYan, "I hope you will keep the secret about the incident that happened in the water. I don't want anyone to know about this no matter what. You should also be careful with AiYa. She is the daughter of the castellan of White Emperor City. In White Emperor City, we are pampered girls, who are always to keep ourselves pure. As you have seen our bodies this time, with AiYa's personality, I am afraid that she will not spare you. You should keep that in mind."

"White Emperor City..." ShiYan muttered, didn't ask for details, just nodded and said, "I know."

CaiYi didn't continue their conversation, suppressing her hatred for ShiYan with a reddened face. She then flew up toward the lake's surface.

ShiYan immediately kept up with her.

On the lake...

When AiYa got out of the water, a brilliant halo fully covered her wonderful curves. She quickly found a remote place to put on new clothes, and only after that did she go to see Borg, LaoLi, and LaoLun.

The three of them had been impatiently waiting for a long time. As soon as they saw AiYa came out, they hurriedly asked about the situation. AiYa told them a little bit about what took place at the bottom of the lake and also said that CaiYi and ShiYan might not return.

Right after hearing about the seventh level the Thousand-hand Ink Octopus, the faces of the three of them changed slightly. They were secretly glad that they hadn't recklessly broken into the water, or else they were afraid that they would have had the same consequence as that of ShiYan and CaiYi.

AiYa told them about the situation in detail, blankly staring at the water without daring to go back in again.

Borg and the two brothers Lao were in a daze waiting with worried faces. They were ready to abandon ShiYan and CaiYi. If ShiYan and CaiYi didn't come out soon, AiYa and the others would leave.

Borg had always been together with CaiYi. However, seeing CaiYi in danger, he was not ready to save her, but just frustrated. He was considering what he should do if he was alone with AiYa and the other people from now on.

While the four of them were waiting impatiently and about to give up on ShiYan and CaiYi, two figures suddenly flew out of the lake. They were ShiYan and CaiYi.

Borg was overjoyed and quickly shouted, "Sister, are you alright?"

After CaiYi had flown out of the lake, her face regained its normal state. She threw Borg a cold glance and nodded, "I am fine. ShiYan and I united and killed the Thousand-hand Ink Octopus." After talking, CaiYi couldn't help but look at AiYa and grunt.

In their critical point of time when they were trapped, AiYa hadn't seen CaiYi as her partner, hadn't lent her a helping hand, but left her in danger instead. CaiYi understood it well and thus was extremely dissatisfied with AiYa.

A trace of surprise flashed up in AiYa's beautiful eyes. She stared at ShiYan with surprise as her countenance became odd.

She would never have expected that ShiYan wouldn't have been killed inside the Thousand-hand Ink Octopus's mouth. When she was at the bottom of the lake, ShiYan had seen her entire body and her forbidden privates. If ShiYan had died, she would have been relieved. However, ShiYan was still alive, which somehow made her uncomfortable.

In her eyes, ShiYan's calm and cold eyes contained a lustful look like a thorn poking her side.

After throwing ShiYan a quick glance, AiYa was very panicked; she wanted to take action but couldn't find any suitable excuse. She couldn't tell other people about what had happened in the lake either. In this dilemma, she felt frustrated without any clear reasons.

"That's good. I need to recover. I think that you guys should use Demon Crystals to restore your Profound Qi. See you soon." After talking, AiYa turned around and left. She didn't dare to look at ShiYan because she seemed embarrassed as she quickly flew away.

ShiYan watched her leave, showing a look of ridicule on his face. He sneered but didn't say a word.

"Yes, we need to recover a bit." CaiYi complicatedly glanced at ShiYan, and then nodded toward Borg, and flew away to the opposite direction of AiYa.

Borg hurriedly caught up with her. When they came to a remote and quiet place, Borg asked quickly, "Sister, what happened at the bottom of the lake? Why do you and AiYa seem to be weird after coming out of the lake?"

"You ask too many questions." CaiYi's face looked cold. "You knew that I was in danger at the bottom of the lake, why did you still stay ashore? Borg, do you want me to die as well?"

Borg's face stiffened, he was very embarrassed and then revealed a wry smile, "Sister, you are in the Sky Realm but still got trapped at the bottom of the lake. I was afraid..."

CaiYi snorted coldly and didn't say anything further. She then took out a Demon Crystal, closed her eyes for meditation, not mentioning anything about what happened at the bottom of the lake.

Although Borg was extremely curious, he couldn't do anything when CaiYi didn't want to tell him. Moreover, he felt ashamed, so he didn't dare to continue asking, only stayed next to CaiYi to do his job of guarding.

"Brother, you and CaiYi are powerful indeed. You guys killed the Thousand-hand Ink Octopus. I really admire you." LaoLi laughed out loud and said, "I am not afraid if you laugh at me, but we didn't dare to go into the water when you were trapped at the bottom of the lake. We were scared of being killed by that Thousand-hand Ink Octopus. It is such a shame." Lao Lun revealed an embarrassed smile, nodded his head and frankly admitted to being a coward.

ShiYan had soon come to know the personality of these two brothers, so he didn't tell them about what had happened at the bottom of the lake. He shook his head and said, "My luck is still good, I think. If it weren't for AiYa and CaiYi, that Thousand-hand Ink Octopus wouldn't have died."

After a short pause, ShiYan nodded toward these two brothers and said, "I need to find a quiet place to recover for a while."

After talking, ShiYan quickly flew away and didn't say anything more to the two brothers, LaoLi and LaoLun.

ShiYan went to the same place as before, lazily leaning against an ancient tree, quietly feeling the changes in his body.

The three dead warriors' auras transformed into a mystery power pouring into the Profound Qi, recovering his consumed Profound Qi entirely, and also slightly enhancing his strength.

According to this progress, he would soon have a chance to reach the Third Sky of Nirvana Realm.

Everything was developing in a good direction.

ShiYan was satisfied as he raised his head looking toward the deep area in the Dark Magnetic Noxious Mist, guessing what he would encounter in the deepest area of it.

Suddenly, his eyes slightly narrowed while blooming out a cold light. His lazy posture suddenly straightened up. An imposing and violent momentum flowed out from his whole body.

A shadow quickly approached from the distance. Her clothes fluttered, making her look like a frosty crystal flower in the cold snow. She was AiYa.

AiYa was emotionless with an indifferent look. She gently flew over like a slender willow.

ShiYan's face didn't change. He felt cold at heart but was secretly on alert and ready for war.

God of Slaughter

Chapter 375: The hunter

ShiYan soon found out that AiYa was a ruthless person and no better than CaiYi. At the bottom of the lake, when he had been sinking toward the octopus's mouth, he had clearly seen AiYa let out a sigh of relief.

Before leaving the lake, CaiYi had also reminded him to be careful with AiYa. She had told him that AiYa was the daughter of the Master of White Emperor City, very arrogant and crystal pure. As he had seen her naked body, she certainly would want to kill him.

Therefore, seeing AiYa suddenly approach, ShiYan secretly stayed alert and was ready to deal with AiYa's attack.

Wearing a cold face and fluttering clothes, AiYa quickly flew over and stood in front of him.

ShiYan's face remained unchanged. He indifferently looked at her, but was secretly well-prepared and grinned. "Didn't you go to find a quiet place for meditation?"

AiYa's beautiful eyes intensely looked at ShiYan, and she didn't hurry to answer. Her beautiful eyes flashed up with countless points of light, wanting to see through all ShiYan's secrets.

A faint smile hung on ShiYan's face. He calmly confronted her, not revealing any trace of fear as if nothing had ever happened at the bottom of the lake.

AiYa stared at ShiYan for a while and then gently nodded and said, "I really want to meditate to restore my Profound Qi. The Thousand-hand Ink Octopus injured me, and thus, I have lost a considerable amount of strength and must meditate immediately. It is just that this place seems to have many abnormalities, and I am now injured and very weak. So, I need someone to guard while I am meditating."

ShiYan was startled.

He had originally assumed that AiYa came here to kill him so that her heart could release its predicament. Not only could this put her state of mind at ease but it could also preserve her pure body from being stained by his eyes.

He didn't expect that AiYa came here to ask him to guard for her without mentioning the incident at the bottom of the lake as if nothing had ever happened.

Although he was suspicious, he didn't reveal it. He just nodded and said, "Ok."

AiYa didn't say a word as she sat down in front of ShiYan. The storage Ring on her finger flashed up; sparkling Demon Crystals emerged one by one in her jade-like palm. These Demon Crystals were different in size, and there were total ten pieces which contained the power that could be absorbed directly. It should be AiYa's entire gains during her time here.

Her hands held a piece of Demon Crystal. She seemed to be sure to take that one to restore her Profound Qi, but then she suddenly looked hesitant.

ShiYan bewilderedly looked at those sparkling Demon Crystal in shock as he didn't expect that AiYa could have harvested so many.

With as many Demon Crystals gathered in the same place, any warrior in this Dark Magnetic Noxious Mist would probably be greedy and rob her of these precious Crystals.

However, for ShiYan, although these Demon Crystals were precious, they couldn't make him lose his mind.

AiYa held each of those Demon Crystals and observed them while tightly knitting her eyebrows. Not long after that, she picked a red diamond-shaped Demon Crystal and put the rest back inside her Storage Ring. She then told ShiYan, "I am severely injured now. Don't let anyone come close. Otherwise, if I encounter a sneak attack during my meditation, I will not be able to bear it."

ShiYan's face slightly changed. His heart stirred a little bit while his body was agitated. He suddenly understood what was happening.

It was an explicit enticement.

She had taken out all of the Demon Crystals to engender his greed. She had even told him clearly that she was now injured seriously to make him think about ambushing her.

AiYa apparently wanted to kill him but couldn't find a suitable excuse. That was why she had used the Demon Crystals as bait to raise his greed, and thus trying to make him desperate to take this chance when she was meditating.

Each Demon Crystal was a piece of bait. She had even said that she was wounded and afraid of other people coming close, which actually encouraged him to buy into her plan.

ShiYan coldly sneered at heart figuring out AiYa's intention. He secretly cursed her for being deceitful and ruthless. If it weren't because he didn't need Demon Crystals to restore his Profound Qi, he would probably have taken the bait. If he decided to take action, he was sure that AiYa would have told CaiYi, Borg, and the two brothers about it and used it as a suitable excuse to kill him.

Greedily depriving and killing a companion for Demon Crystals was an extremely appropriate reason.

When AiYa was meditating, ShiYan was coldly looking at her. He was struggling inside his heart while his eyes kept changing.

If he took advantage of when she was meditating to cast out his hidden full strength, perhaps he would be able to kill AiYa even though AiYa had prepared her own calculation toward him.

However, the risk was big. If he tried to kill AiYa with just one blow and failed, they both would get involved in a fight, which would definitely draw the attention of other people. When those people rushed over, he would hardly succeed. Once AiYa successfully avoided his single strike and was still alive, it would not be easy to try and kill her a second time.

While he was quietly considering his gains and losses, Shi Yan's eyes kept changing unpredictably. He finally decided to give up; he wanted to keep things going on to see if she had any other tricks up her sleeve.

He then stood next to AiYa, leaned against a tree with a lazy pose, pretending to keep guard for AiYa.

A long while later, with his soul consciousness, ShiYan suddenly realized that something wasn't quite right with CaiYi.

On the other side, CaiYi secretly wanted to look at the soul barrier in her host soul, but her body then suddenly shook, her face turned pale, holding her head miserably.

"Sister! Sister!" Borg was panicked. He even assumed that CaiYi had fallen into a 'possessed by the Devil' state (a Chinese term used to indicate that something has gone wrong in spiritual or martial arts training) and hastily cried, "How are you? Are you ok? How can I help you?"

Damn bastard!

CaiYi secretly cursed ShiYan in her heart, holding her head as she whined in pain for a while. Her beautiful face was full of resentment while her body gradually stopped trembling.

She knew that it was ShiYan teaching her a lesson, but he hadn't really hit her soul yet. Otherwise, with this soul barrier, she would not be able to bear even one single blow.

"I am alright. There was something wrong with my power, but it is fine again." CaiYi barely sat straight, didn't dare to continue to peep at the soul barrier. She then used a Demon Crystal again to restore her Profound Qi.

Not far away, ShiYan revealed a cold smile, raised his head and glanced at CaiYi.

After a long while.

AiYa slowly opened her eyes, the power of the Demon Crystal in her hand had been absorbed entirely, and it became an ordinary stone.

She was a little disappointed, looking at ShiYan, as she silently stood up and said, "I am done. Let's go find CaiYi and the others."

ShiYan nodded but coldly sneered in his heart and kept silent.

He clearly saw a trace of disappointment flash up in Ngãi Nhả's eyes. Through those eyes, he figured out that AiYa didn't have a good intention indeed. She had still stayed alert while meditating. If he had a go at her, AiYa would obviously release a full-power strike to kill him.

Women's hearts are the most ruthless.

ShiYan secretly scolded her, following AiYa while his eyes were stuck on her moving butt and back with an unpredictable look.

AiYa suddenly turned around; her eyes showed her coldness.

ShiYan was startled. His Profound Qi started to churn up, and a frenzy of power couldn't help but burst out from his body.

AiYa looked at him fiercely and said coldly, "You should keep your eyes clean." After saying this, she turned back and continued to fly up.

ShiYan was stunned, shook his head and slightly smiled, not saying anything more.

CaiYi, Borg, together with LaoLi and LaoLun soon appeared in front of him. As soon as CaiYi saw him coming, her beautiful eyes aggressively stared at him, shooting out looks of resentment.

Shrugging his shoulders, ShiYan revealed a faint smile, pretending that there was nothing to talk about. "Should we depart now?"

CaiYi knew that she had the lower hand and tried to restrain her anger. She stopped looking at ShiYan and then spoke to AiYa, "Let's go."

AiYa nodded, looked at the other four people CaiYiBorgand said, "Follow me." After taking out the compass to identify the direction, AiYa led ahead like before, and continued to go to the deepest place of the Dark Magnetic Noxious Mist.

A long period had passed.

They kept following AiYa going deeper inside the Dark Magnetic Noxious Mist. Every time AiYa detected something abnormal, she would instantly let ShiYan step forward to take the risk, waiting for ShiYan to be dead in the demon beasts' mouths or be killed by other warriors. ShiYan let her down every time. In all kinds of dangers, he could always turn danger to safety, which he made look like it was because of his great luck and nothing to do with his strength.

During this time, ShiYan and the other five people had encountered several flocks of beasts and had harvested some Demon Crystals through killing them. They had also met other teams of warriors, and both sides had started fighting. In the Dark Magnetic Noxious Mist, there were no rules at all. Those who were powerful could always plunder Demon Crystals from the weak. Every time they saw other groups of warriors, the people of AiYa's and Thái Y's group instantly jumped in to kill them without saying a word. They were even more ruthless than the beasts.

ShiYan had still been preserving his strength.

His demand of Demon Crystal was not much. Every time they encountered beasts, he didn't wholeheartedly take action or fight with AiYa's group for Demon Crystals. When confronting warriors,

he didn't make it look very strenuous either, didn't seem to have interest for the Storage Rings on those warriors' body. He let AiYa and CaiYi take the trophies. He didn't seem to be greedy as he just stood and watched the scene.

However, by absorbing the auras of those dead warriors, ShiYan could always refill his Profound Qi to the max as if he just began, which also helped him progress in breaking through the Third Sky of Nirvana Realm.

However, many times after that, the mysterious power didn't flow to the Profound Qi halo anymore but burst into the Star Martial Spirits instead. This made ShiYan realize that the Profound Qi halo in his body was mighty enough. If he wanted to make progress, it probably would require him to reach the Third Sky of Nirvana Realm.

Therefore, he quietly paid attention, considering breaking through the new realm was his main purpose.

One day, the group of six people, including ShiYan, was temporarily resting on a suspended bare hill in the Dark Magnetic Noxious Mist.

Suddenly, ear-piercing sounds came up from around the hill. Warriors in gold costumes instantly appeared, grinned and rushed over to the six of them.

Along the way there, other warriors had become the prey of AiYa's and CaiYi's group. However, right now, seeing those warriors in gold costumes, the faces of AiYa and others immediately changed as if they were confronted with a pandemic. They quickly got up.

ShiYan frowned as he looked around. His heart felt chilled just after a quick glance as he was afraid that they would become someone else's prey this time.

God of Slaughter

Chapter 376: Filled with golden silk threads

There were eight warriors surrounding them. All of them were wearing gold costumes with a pattern of a palace afloat on the golden clouds, which was embroidered on their chest in golden threads.

The eight warriors were all outstanding youths, only around twenty or thirty years old. Three of them were in the Sky Realm; the rest were in the Second or Third Sky of Nirvana Realm.

The leader of these eight warriors had short, silver hair, each strand of which stood straight up. He looked full of vitality.

As soon as this person arrived, he burst into laughter which was echoing and ear-piercing. He looked at CaiYi and AiYa with extremely lustful eyes and an ambiguous face.

The remaining seven warriors lined up, sharply looking at ShiYan's group with an unfriendly attitude.

AiYa's and CaiYi's beautiful faces slightly changed and were no longer calm as before. Borg was obviously in shock and fear.

The faces of the two brothers LaoLi and LaoLun looked odd; their eyes beamed a vague light. They seemed to be considering an escape plan.

The overall strength of this group of eight warriors was much better than that of ShiYan's side. Sharp lights spilled out from the eyes of the three Sky Realm warriors who were overwhelmed with an arrogant and relentless momentum that shouldn't be underestimated.

When Shi Yan saw the emergence of these warriors and AiYa's and CaiYi's complexions, he immediately realized that these eight warriors must come from a mighty force since AiYa and CaiYi looked like they were encountering a pandemic. He knew that they would certainly have a bitter fight later.

"NingZe, what do you want?" AiYa slightly squinted, quietly gathered her strength, coldly looked at that young leader, and said, "The Fighting Union and the Heavenly Palace have never had any conflicts before. As you are now converging on us, you have probably prepared for this war?"

"Hahaha," that young leader laughed out loud, as he obviously didn't care about AiYa's threat. "If we run into each other in the Divine Land, I naturally would not give you a hard time. However, this place is the Dark Magnetic Noxious Mist. We come to this place to provoke a fight with all kinds of forces obviously. Since you guys also come to this place, if you are strong enough, I don't think you would be kind to us either."

After having heard that warrior's words, AiYa's face darkened. She then said, "Do you really want to pick a fight?"

"Not really," NingZe revealed a faint smile as he secretly winked at the other two Sky Realm warriors on the sides, exposing a smiling face. "AiYa, you are the daughter of the castellan of White Emperor City. I am also influential in the Heavenly Palace. As long as you promise to marry me, I can spare your life and even join forces with you in this Dark Magnetic Noxious Mist. How about it?"

"Keep dreaming," AiYa pouted and expressed a disdainful look.

"Are you forcing me to use my strength?" The smile on NingZe's face suddenly disappeared, and his eyes became cold. "AiYa, although you are noble in White Emperor City, you are nothing in this Dark Magnetic Noxious Mist. Ha ha ha, if you are not willing to accept my offer, I can only offend you to achieve my purpose."

After saying so, NingZe suddenly shouted with a cold smile, "Leave the two girls alive. Kill the rest."

After that command, the eight Heavenly Palace's warriors let out a hoarse shout and took action simultaneously.

The two Sky Realm warriors next to NingZe's scattered and respectively stormed toward AiYa and CaiYi. The remaining Nirvana Realm warriors fanned out, attacking ShiYan, Borg, LaoLi, and LaoLun.

These Heavenly Palace's warriors wore unified in their gold costumes and had extraordinary realms and resourceful Storage Rings. They were wealthy and powerful.

A Third Sky of Nirvana Realm warrior with a thin face was currently dashing toward ShiYan while his hands suddenly swelled, turning into a beam of dazzling golden lights.

The warrior's two hands instantly shot out brilliant lights with a sharp momentum.

A trace of refined Profound Qi emerged from between his hands. His hands were swelling more and more, which was extremely weird.

His hands unfolded, and the lines in his palms released thread-like silks. These golden silk threads connected to his palms. They seemed extremely sharp and dexterous like a steel needle flying straight for ShiYan.

"Buzzing."

A harsh whistle came up. Those golden threads scattered everywhere, extended more and more, became denser, and then covered ShiYan entirely.

ShiYan's face remained unchanged. He frowned and suddenly turned into a bunch of star light, following the star trajectory and quickly teleported himself to the side.

Those golden silk threads intensely submerged ShiYan's previous spot that he had just left. They then crushed the rocks there into pieces like cutting tofu.

"Golden Silk!"

A cold laugh reached his ears. Those gold threads were like electricity that shot out again, spearing themselves toward ShiYan.

These Heavenly Palace's warriors seemed to be very good at strange martial arts. Inside of their palms had this kind of golden silk threads which contained sharp ardor that could cut everything off.

After attentively looking at the others, ShiYan realized that they were afraid of those golden silk threads, and didn't dare to let them come close.

Seeing those golden threads dashing forward, the people of AiYa's group immediately scattered as they were afraid of being pierced by the golden threads.

NingZe stood motionlessly, not really caring about ShiYan. His lustful eyes fell on AiYa's and CaiYi's bodies; he seemed to be waiting for both of them to be arrested so he could enjoy pleasures with them.

ShiYan didn't know the origin of either the Heavenly Palace or the Fighting Union. However, after having heard the conversation between AiYa and NingZe, he realized that they belonged to the Divine Land and were very powerful forces.

Although AiYa and NingZe were still very young, they had already reached the Sky Realm. Thus, ShiYan could imagine how powerful their forces were.

Golden threads above their heads were extremely flexible and breathtaking, flashing out with harsh, ear-piercing sounds.

The warrior who was chasing and attacking ShiYan didn't seem to be worried after he had missed his first shot. He continued urging his power.

The Golden silk threads flying out from his palms extended longer and longer with fierce momentum, continuing to chase ShiYan without giving up.

There was a trace of a feeble soul on the golden silk threads. The Heavenly Palace's warriors seemed to bind their soul consciousness onto the threads, making them able to lock the target. Regardless of how hard ShiYan tried to avoid them, these threads could always find him again.

Those warriors' hands were swollen and constantly released extremely sharp, glittering lights.

Gradually, the golden silk threads soon covered the entire sky like countless golden lightning bolts interlacing in the sky. This made people feel frightened.

"Wailing."

Borg suddenly let out mournful screams. He had been avoiding the golden silk threads but carelessly let one of them cross him and cut off a part of his leg. Blood overflowed like a spring.

Borg kept screaming nonstop as he fearfully looked at CaiYi, wanting her help.

The rings on CaiYi's arms had all flown out. Those rings hit each other, producing crisp, sweet sounds and blooming numerous dazzling lights which then formed into many circles of lights and covered her entire beautiful body, protecting her from being damaged by the golden silk threads.

A Sky Realm warrior's swollen hands looked like they were perfused with golden juice which now slowly flowed out.

Golden silk threads flew out from between his swollen hands like tiny pythons jumping cheerfully and gradually blockading the space around her.

Her graceful posture moved tenderly. The circles of light and the golden silk threads collided, sparking dazzling light spots everywhere.

Although CaiYi's cultivation base was high, she couldn't get out of the thick golden silk threads around her. She saw Borg unable to resist anymore but it was impossible for her to reach out to help him.

"Golden Silkworm Split."

The warrior who was dealing with Borg revealed a cold sneer. More than ten golden silk threads flew out from his swollen hands, heading toward Borg and fully covering him instantly.

Brilliant golden light flashed up, under ShiYan's gaze, Borg's body suddenly turned into broken pieces of flesh and bones.

Borg, who was in the Third Sky of Nirvana Realm, was unable to escape and had been cut into countless pieces under the coverage of those golden silk threads.

Before Borg's death, ShiYan had seen a golden wire coming out of Borg's back.

A warrior who was fighting with LaoLi had suddenly spared a part of his force and had quietly used the golden threads to pierce through Borg, making him unable to gather his strength.

The magical Golden Silk was the unique martial arts that only the Heavenly Palace's warriors had. If they wanted to cultivate it successfully, they needed to collect the silks taken from the Myriad devouring golden silkworm in a secret place of the Divine Land and then cultivate and absorb it into their bodies.

Each warrior who practiced this secret magical technique all golden style Martial Spirit. They then used this martial spirit and their Profound Qi to nourish this Golden Silk, blending their blood, soul consciousness, and Profound Qi into Golden Silk.

After many years of arduous pilgrimages, the Golden Silk that was cultivated and absorbed into the warriors' bodies not only possessed the special features of the Myriad devouring golden silkworm but could also connect with their minds and stay under their control.

Cultivating this secret Gold Silk was extremely dangerous for the Heavenly Palace's warriors. Their bodies could instantly be divided if they were careless.

Heavenly Palace's warriors who could cultivate this secret technique were all cruel and ruthless, not even thinking about risking their own lives.

The warriors would become extremely dangerous when they cast the Golden Silk out. Once performing this secret technique, if there were no strong means of defense, this Golden Silk would split other people's bodies.

Borg didn't have much means of defending himself with one of his legs cut off, and the Golden Silk pierced through from his back. Because of those things, Borg apparently couldn't escape death although he had the Third Sky of Nirvana Realm cultivation base.

As soon as he died, his scattering aura flowed into ShiYan.

ShiYan was avoiding the golden silk threads. However, when seeing Borg had died, ShiYan quietly moved forward and absorbed the aura from Borg.

Feeling the influx of Borg's aura, ShiYan calmly looked at the golden silk threads flying around in the sky, and suddenly grinned in silence as he just came up with a vicious plan in his mind.

[God of Slaughter](#)

Chapter 377: Add wings to the tiger!

Right after Borg had died, that Empyrean warrior looked more relaxed.

The Empyrean's side had a total of three Sky Realm warriors including NingZe. The remaining warriors were at the Second or Third Sky of Nirvana Realm. All of them had cultivated this evil secret technique of the Empyrean.

When they united, it didn't matter who they were fighting.

Borg was dead, and LaoLi and LaoLun immediately fell into danger.

Although these two brothers were only in the Third Sky of Nirvana Realm, they were very good at joining forces. They stood back to back; two different forces passed each other through their backs, making their momentums soar. Their bodies were covered with a mixed green and blue halo.

That halo covered the two brothers entirely. When the golden silk threads in the sky came close to them, they hurriedly took actions, wearing their gloves from where strong momentum flowed out.

Their momentum was like martial art conception that had been tempered on their gloves.

These gloves were naturally not just ordinary things. Under their martial art conception, these gloves released a terrible and fierce power.

Under this violent power, those golden silk threads were punched aside before they could come close to the two brothers. Those threads, which occasionally showed up next to the halo, couldn't destroy the blue-green halo that was covering the two brothers.

However, after Borg's death, the warrior who had dealt with Borg now retrieved his power, looked at the two brothers, and cast it again toward them.

Hundreds of golden silk threads intertwined and dashed forward. The golden threads like lightning split open, releasing numerous sharp sprays, making the two brothers a little confused.

While their gloves were releasing the martial art conception, they also had to unite to deal with this stealth at the same time. Thus, they didn't seem to be able to resist anymore. More and more golden silk threads were approaching and getting closer to them.

ShiYan's eyes were cold and cruel. He relied on the Star Light to avoid the winding golden threads. He was both absorbing the aura of dead Borg, while quietly observing the situation in the field.

Not only did AiYa and CaiYi have many secret treasures on their bodies, but they were also extremely good at martial arts cultivation. Therefore, in the encirclement of the golden silk threads, they were still safe and sound.

Although they couldn't get out of those golden threads, they didn't seem to be defeated, and they were still able to persist for a long time.

Carefully watching the situation, ShiYan coldly sneered. He quietly released his Profound Qi, the star power, the negative forces, and the yin power from inside his body and sneakily manipulated them toward the Empyrean's warriors who were besieging LaoLi and LaoLun.

The Ice Cold Flame, the Holy Spirit God, and the Earth Flame had been integrated into his body muscles before the completion of his martial spirit's mutation. Although his body's muscles contained a surge of violent power, it could not be separated or taken out of his body.

Therefore, a Gravitational Field was formed this time only relying on the Profound Qi, the Star power, the negative forces, and yin force.

These four forces created the Gravitational Field. As soon as it appeared, it suddenly condensed into an entity, forming an enormous gray tornado, inside of which the four sharp forces spanned aggressively.

The Gravitational Field used to hide without revealing any trace, but it was unknown why it turned into a real entity here.

In that gray tornado, the four forces flew around and mutually entangled, resulting in a strange, fierce power. Even ShiYan felt that it was very dangerous for him if he were inside it.

His power increased.

In this Dark Magnetic Noxious Mist, although the Gravitational Field had turned into a real entity and couldn't be concealed anymore, its power had increased more than double. It seemed to coincide with a sort of Heaven and Earth principle in this Dark Magnetic Noxious Mist. It kept spinning, which made it seem like there was an existence of strange fluctuations inside the Dark Magnetic Noxious Mist, forming a link with the Gravitational Field.

The gray tornado released a whirlwind up to the sky with tremendous momentum. As soon as it appeared, it instantly drew all the creatures around.

Fierce long thin golden threads like lightning in the sky were pursuing ShiYan, LaoLi, and LaoLun. When that Gravitational Field emerged, the whole space seemed to be affected by the impact of the suction. The golden threads were no exception.

The fierce golden silk threads were all sucked into the Gravitational Field. Even the Heavenly Palace warriors couldn't prevent their golden threads from being pulled in.

When the golden silk threads went into the Gravitational Field, each of the Heavenly Palace warriors who held the Golden Silk screamed in panic while their faces suddenly changed.

The body of a Heavenly Palace warrior with the weakest cultivation base, which was the Second Sky of Nirvana Realm, was also pulled into the Gravitational Field. Because the Golden Silk was connected with the warrior's body, he was also being drawn into the Gravitational Field, and he couldn't withstand the suction of the Gravitational Field anymore as he was finally pulled inside.

Inside the giant gray tornado, four different strange powers flew around and pulled the Gold Silk that was circling inside as well. Right after that warrior had been drawn into the field, he was instantly killed by the Gold Silk and then cut into mixed flesh and blood.

When these Empyrean warriors cultivated the Gold Silk, they connected their palms to it. The lines on their palms and the Gold Silk had formed a delicate, subtle connection, and they could use their minds to control it. Unless they had reached the God Realm, they couldn't detach the Gold Silk from their palms to freely chase and kill their enemies.

Therefore, after the Gold Silk had been sucked into the Gravitational Field, as the palms of their hands were connected to the Gold Silk, the warriors were also affected by the strong suction force from the Gravitational Field. Moreover, the Gold Silk inside the Gravitational Field also created a huge pulling force. The warriors looked very miserable as they struggled hard to escape from the gray tornado formed by the Gravitational Field.

"It's you!" CaiYi's eyes suddenly brightened up. When she had been at the bottom of the lake, she had known that ShiYan was not easy to mess with. At this critical time, the gray tornado appeared in front of ShiYan.

ShiYan had a mocking sneer on his cold face as he watched the Empyrean warriors being pulled into the Gravitational Field and minced into bloody pieces of flesh. CaiYi now realized that ShiYan was the one who was changing the situation here.

CaiYi exclaimed in shock, which drew the attention of the others to ShiYan.

A strange light flashed up in AiYa's eyes. She didn't seem to expect in this critical time, ShiYan, who was only in the Nirvana Realm, would be the most effective one. With a cruel look and a cold sneer, he used some kind of secret technique to strangle those warriors, which made her extremely shocked.

Laoli and LaoLun had been in danger and would have probably been killed by the Empyrean's warriors.

At the most dangerous time, ShiYan suddenly took action, creating the Gravitational Field and forcing those warriors to divide their strength in an attempt to resist. Thus, the strength they had been focusing on the two brothers LaoLun and LaoLi was reduced, which made the two brothers surprised and frightened at the same time. They kept thanking ShiYan.

ShiYan's eyes were furious. He coldly sneered while continuing to maintain the Gravitational Field, bringing it toward the rest of the Heavenly Palace warriors who were gathering at the same place.

Under the irresistible pulling force, another two of the Heavenly Palace's Third Sky of Nirvana Realm warriors were drawn into the Gravitational Field.

The Gravitational Field was full of Gold Silks which were all fatal. Once those warriors were sucked into the Gravitational Field, the forces inside completely controlled them, and thus, they could hardly form a fully defensive halo for their entire bodies. As a result, their bodies were exposed.

In this situation, being strangled and cut off by the four strange forces of the Gravitational Field, those warriors couldn't escape from death.

Just after a moment, the two Heavenly Palace warriors who had fallen into the Gravitational Field were all dead.

As soon as these two warriors were ripped into pieces, the remaining warriors were all filled with panic. Seeing the Gravitational Field approaching, even the two Sky Realm warriors, who were dealing with AiYa and CaiYi, were frightened, and thus loosened their force toward AiYa and CaiYi to hurriedly move aside to avoid the Gravitational Field.

However, although these two warriors dodged very fast, the Gold Silks that they had released failed to escape the great suction of the Gravitational Field.

As the ferocious Golden Silks were forcefully pulled into the Gravitational Field, the two Sky Realm warriors who were deviating from the Gravitational Field were also being pulled.

Because these two warriors were connected with the Gold Silks, they were also gradually pulled into the Gravitational Field.

"Young Master, save me," a Sky Realm warrior screamed out loud. His fierce eyes looked at ShiYan and shouted, "It's that kid who has troubled us."

NingZe didn't take any action, but just coldly watched the changes in the field. When the two Emphyrean warriors had been crushed into powder, he hadn't revealed any trace of fear. It seemed that the death of those Nirvana Realm warriors was nothing to him.

However, when the two Sky Realm warriors who had released the Gold Silks had also been pulled into the Gravitational Field and screamed out loud together, NingZhe finally showed a grave look.

"Be careful!"

AiYa and CaiYi didn't bother with their hatred for ShiYan, simultaneously letting out a scream and flying toward the front of ShiYan. One on the left and the other on the right, they were both protecting ShiYan, coldly looking at NingZe who was storming at them very fast.

Although AiYa and CaiYi were ruthless and wanted to see ShiYan die sooner, they still understood their current situation. If they wanted to defeat the Heavenly Palace warriors, they had to rely on the gray tornado that ShiYan had created.

Therefore, when NingZe was about to make a move, both of them immediately rushed to ShiYan's side, wanting to join forces to protect him.

ShiYan was about to take action and then became panicked seeing the two girls suddenly fly over. After realizing the girls just wanted to offer him protection, he shook his head and smiled and was not in a hurry to release his power.

He stood behind AiYa and CaiYi and continued manipulating the Gravitational Field.

The Gold Silks that were released by the Heavenly Palace warriors were extremely sharp and evil, able to cut everything. Those Golden Silks had fallen into the Gravitational Field, stirred up by the forces of the Gravitational Field, and thus, their power was skyrocketed instantly. Anyone who fell into this Gravitational Field would be crushed into powder by the Gold Silk.

Seeing the Gold Silk fly into the Gravitational Field aggressively, ShiYan's heart dissipated. He then had an idea that he would try to collect as much of the Gold Silks from this Myriad devouring golden silkworm as possible.

This stuff and the Gravitational Field together was indeed a killing machine.

Chapter 378: Reaping

AiYa and CaiYi stood in front of ShiYan with solemn faces, coldly looking to the other side, taking precaution against NingZe's mischief to kill ShiYan.

In this battle, the key person had some transformations. AiYa and CaiYi, who were in the Sky Realm, couldn't be as effective as ShiYan.

Only if ShiYan was alive could the Gravitational Field then dissolve the Gold Silks released by the Heavenly Palace warriors.

Except for ShiYan, AiYa, CaiYi, and the two brothers simply couldn't do anything.

Apparently, NingZe also saw the role of ShiYan in this battle. Hence, he stared at ShiYan and then rushed toward him while speaking up, "Kid, you dare to treat us like your enemy. Regardless of what your identity is, you will not be able to escape death."

ShiYan ignored him, not really caring about NingZe's threats, and continued putting forth all of his strength into controlling the Gravitational Field to deal with the two Sky Realm warriors of the Heavenly Palace.

The two Sky Realm warriors, who had released the Golden Silks, which were fiercely pulled into the Gravitational Field, were now also affected by the suction of the Gravitational Field, being hauled toward the Gravitational Field closer and closer. The situation didn't look good for them.

"AiYa, since you resist, do not blame me for my ruthless means." NingZe coldly sneered and then took out a gold leather bag. He untied the leather bag's buckle, and a fist-sized golden silkworm suddenly flew out from inside, aggressively showing its fangs and turning into a bunch of gold lights, dashing toward AiYa and CaiYi.

The golden silkworm was as big as a fist. There were seven gold stripes on its back. It spread its wings and flew over, producing a buzzing sound which seemed to be able to penetrate a warrior's Sea of Consciousness.

"Myriad devouring golden silkworm!"

Seeing that silkworm approaching, the beautiful faces of AiYa and CaiYi suddenly changed in extreme shock.

The rings on CaiYi's arms burst a bunch of strange lights which gradually spread out like layer upon layer of rippling waves, diffusing around CaiYi's body and forming a marvelous halo.

When those strange lights appeared, CaiYi immediately held her breath and spat out a bunch of silver lights. As soon as the bunch of silver lights was spurted out, they instantly turned into a long silver crystal sword with many strange symbols on it. It sparkled and glowed and then flew toward the flying golden silkworm.

"Want to die!"

NingZe coldly sneered, his eye pupils flashed up with golden lights as if he was communicating with the golden silkworm.

The golden silkworm stormed into the strange lights next to CaiYi, aggressively hitting the silver crystal sword.

CaiYi's silver crystal sword was hit and destroyed terribly by the golden silkworm. The golden silkworm suddenly spat out a fierce golden thread which then tightly wrapped that silver sword, making it unable to move.

CaiYi's beautiful eyes darkened. She suddenly opened her mouth and spat out a mouthful of blood. Her five fingers kept changing the magical tricks, trying to retrieve the silver crystal sword which was being tightly bound by the golden silk thread.

However, the golden silk thread was extremely tenacious, wrapping around the sword. The silver crystal sword staggered as it was suffering the silk threads' entanglement, its crystal lights became dark. The spiritual aura on the sword seemed to be corroding while CaiYi's aura was being consumed quickly.

NingZe sneered and suddenly let out an ear-splitting scream.

The golden silkworm flapped its wings, flying out and forming a bunch of dazzling gold lights that instantly pierced through the circle of light which CaiYi had created and rushed toward her.

AiYa was frightened as if she was helpless to do anything against this gold silkworm. When seeing this silkworm's attack, she quickly threw out a coin. A powerful suction force suddenly came out from the hole in the center of the coin, wanting to catch and tightly tie the silkworm up.

The golden silkworm spat out a golden silk thread again. This thread was as strong as a steel needle and instantly went through the hole of that coin, disappearing without a trace.

The ancient coin emitted gold lights. Ancient scriptures engraved on the coin suddenly looked livelier as if they were enhancing the power of the coin.

The gold silkworm was not afraid of it. After the golden silk thread had disappeared into the hole of the coin, it seemed to freeze the coin, preventing it from exerting its power in suppressing the corrosion of the golden silk thread. Hence, the coin couldn't actually trap the gold silkworm.

The Myriad devouring golden silkworm was a bizarre beast. It was small but very powerful. It could corrode all kinds of secret treasures.

Each golden silk thread spat out from the golden silkworm's mouth could quickly erode the spiritual aura of a secret treasure as soon as it touched the metal treasure, consuming and damaging it. The longer the treasure was damaged, the more deterioration it would have, and finally, it would become an ordinary thing without a single trace of aura. As NingZe relied on the Myriad devouring golden silkworm to deal with his opponents, many people in the Divine Land could do nothing against him. Warriors at the same level or different kinds of secret treasures would be tied up and suffer the corrosion impact of the golden silk threads as soon as they touched the threads.

Facing this Myriad devouring golden silkworm, many secret treasures hardly performed their effects. Meanwhile, the golden silkworm was immune to all kinds of sabers and swords. Very few secret treasures could damage it, and many kinds of forces found it hard to strike the silkworm and kill it.

AiYa and CaiYi knew that their secret treasures would hardly resist the golden silkworm, but they still had to send the treasures to hinder the gold silkworm a little while so that ShiYan could have enough time to clean up the two Sky Realm warriors.

"Be careful!" CaiYi suddenly screamed out loud in fear.

The golden silkworm wildly spurted out of the coin, flying around AiYa and rushing to ShiYan.

The golden silkworm spat out golden silk threads like golden lightning as hard as steel needles, piercing straight toward ShiYan.

ShiYan saw those golden silk threads fiercely darting toward him while he was controlling the Gravitational Field with all of his power. He suddenly shivered and raised his palm.

The Life Seal blasted.

Seven handprints quickly merged and turned into a board-sized palm, and then rushed directly toward those golden silk threads and the golden silkworm.

The Life Seal's intimidation was incredibly great. When it was released, it produced a sound like booming thunder.

After the Life Seal had passed through, those golden silk threads became cotton threads fluttering around. The Life Seal could only scatter the golden silk threads but couldn't cut them off completely.

The Life Seal fell onto the golden silkworm. The golden silkworm got hit but just staggered and rolled over in the void. After the Life Seal's power had passed, the golden silkworm then stabilized its body and darted toward ShiYan again as if it hadn't suffered any damage.

"Ha ha ha, the Heavenly Palace people have captured and raised these golden silkworms. We already have three silkworms at the seventh level. Each of them has been existing for tens of thousands of years. They are immune to any swords and guns, are not scared of any attacks by different forces, and they can dissolve all kinds of secret treasures. Do you want to use your ordinary method to deal with my golden silkworm? You should have saved a little bit of your power then." NingZe burst into laughter, used his mind to control the golden silkworm, and once again threw another attack toward ShiYan.

With an ear-splitting buzzing sound, the golden silkworm started to attack again.

ShiYan's face changed. He felt that this golden silkworm was indeed tough to deal with. Secret treasures weren't effective, different kinds of forces couldn't strike this silkworm to death. Hence, to deal with this silkworm, it seemed he could only use some special means.

Seeing the gold silkworm rushing at him again, ShiYan couldn't maintain his energy to continue to control the Gravitational Field. Instead, he had to put all of his strength on the golden silkworm.

However, at this time, the Blood Vein Ring suddenly burst out blood red lights. A scorching power quietly bred from inside the Blood Vein Ring and quickly spread out.

ShiYan was worried as he didn't know how to handle this. He then suddenly felt the message sent by the Ten-Thousand-Year Earth Flame. Without waiting for ShiYan to issue any signal, a group of red burning fires flew out from the Blood Vein Ring.

This group of fires was as big as a cattail leaf fan. A strand of horrible heat burst out together with the Sun's burning power.

When the Earth Flame jumped out, it instantly wrapped around the silkworm without waiting for it to rush at ShiYan.

At the place where the Earth Flame was burning up, golden silk threads, which were spurted out from the golden silkworm, didn't seem to be able to bear the heat of the Earth Flame and began to dissolve.

After having been swallowed by the Earth Flame, it was 'buzzing' screaming as if it saw its nemesis. It struggled hard inside the Earth Flame, wanting to fly out.

ShiYan watched the Earth Flame swallow the golden silkworm with a stirring mind. He realized that the Earth Flame was weakened, and didn't seem to be as strong as before.

Even so, the golden silkworm couldn't escape from the siege of the Earth Flame. It was kept inside and was crying sharply. It seemed to be extremely frightened, and despite how much it struggled and flew around to find an escape, it couldn't get out of the Earth Flame. The golden silk threads that had been spat out earlier were also melting.

ShiYan was surprised and happy at heart; he couldn't help but burst into laughter.

AiYa, CaiYi, LaoLi, and LaoLun, who were facing danger, suddenly saw ShiYan with a group of burning fires swallow the golden silkworm, making it unable to do anything. They couldn't help but feel overjoyed, looking at ShiYan with surprise.

AiYa and CaiYi exchanged looks and could see the joy in each other's eyes. They then simultaneously looked toward NingZe.

NingZe's originally ruddy face gradually turned pale after the Earth Flame had swallowed the golden silkworm.

This golden silkworm and NingZe's mind seemed to have a connection. His god soul force was consigned to the golden silkworm, and thus, when the golden silkworm was burning up, his god soul force that was attached to it was also suffering, which injured NingZe's host soul and made him realize the situation was not going well for him.

"True gold is not afraid of fire. Ha ha ha. It seems that your golden silkworm is not a real one. Even though this fire just refined it a little bit, it soon couldn't stand it." ShiYan pouted, coldly sneered, as he disdainfully looked at NingZe and mockingly said, "Want to kill me? You don't seem to be able to do it. Friend, next time, before talking a big game, you should be sure about it first."

After having swallowed the golden silkworm, making it unable to escape, the Earth Flame didn't seem to want to expose itself too long and thus pulled the gold silkworm, flying toward the Blood Vein Ring on ShiYan's fingers.

A bunch of fire flashed up. The Earth Flame wrapped the golden silkworm and disappeared into the Blood Vein Ring together.

"Ptsui."

The gold silkworm instantly fell into the Blood Vein Ring. NingZe's face turned pale once again with frightened eyes. He couldn't help but spew out a mouthful of blood.

When the golden silkworm had gone into the Blood Vein Ring, the connection between him and the gold silkworm had been completely terminated, which was like being cut off by a sword.

As he and the golden silkworm were closely connected, he also suffered a heavy blow. Whether it was his host soul or his state of mind, both were affected. His strength dropped significantly.

Chapter 379: Faded Astral Wind

"Go."

NingZe spewed out a mouthful of blood. He staggered a little bit and then suddenly turned into a beam of strange light, rushing toward the deep place inside the Dark Magnetic Noxious Mist.

Seeing NingZe fleeing, the two Sky Realm warriors finally showed fear on their faces.

Hesitating a moment, their fingers, which had released Golden Silks, suddenly burst out. The two of them cut off their own fingers, terminating the connection with the Golden Silks. Without any more hesitation, they immediately turned around and ran away.

ShiYan's face was cold and ruthless. He coldly sneered and instantly chased after NingZe.

A Third Sky of Nirvana Realm warrior of the Heavenly Palace was also trying to cut off the connection with the Golden Silks and flee with the other three fellows. When seeing ShiYan fly over, his face changed instantly. He opened his hands, and a glowing golden light flashed up from his swollen golden palms, suddenly attacking ShiYan.

"Ha ha ha," ShiYan coldly laughed. The negative forces appeared altogether. His mind was slightly triggered, and his skin turned to purple red while each one of his muscles felt like they were jumping up.

"Bang bang."

An avalanche of explosive forces burst out from his muscles. He ignored these golden lights, rushing all the way to them.

The golden lights that penetrated his body were destroyed and simply couldn't hurt him.

After his Petrification Martial Spirit had reached the peak and mutated, such a level of strength could hardly cause him any damage. Falling into the golden lights, except for a little pain he felt, there was nothing causing discomfort.

ShiYan's mind was slightly triggered, and the five negative feelings suddenly flew out from his Sea of Consciousness, turned into a real entity, piercing through the golden lights outward, attacking that Third Sky of Nirvana Realm warrior.

The five Devils silently grinned, stretched out their ferocious claws, seizing the warrior's limbs and head, pulling forcefully.

Blood splashed everywhere. The five Devils split this warrior. His head, two arms, and two legs were all torn apart. He immediately died on the spot.

Under ShiYan's mind control, those five Devils clutched the corpse, the man's arms and limbs, and then threw them into the Gravitational Field.

Blocks of flesh and blood splattered in the Gravitational Field which now looked like a huge meat grinder machine blending flesh and blood. The Gravitational Field also became blood red. That gray tornado turned blood red which frightened people out of their wits.

ShiYan put forth all of his strength this time. When they were face to face, he instantly beheaded this Third Sky of Nirvana Realm warrior without hiding his real strength.

Having killed this warrior instantly, ShiYan didn't stop but continued to chase after NingZe.

The Gravitational Field ground his flesh into small pieces. Under the control of his mind, it looked like a whirlwind was following behind him.

AiYa, CaiYi, LaoLi, and LaoLun's eyes all popped out, and their jaws dropped.

ShiYan had suddenly broken through the adversity, which had already scared the four of them. At this time, they knew that ShiYan had hidden his real strength the whole time, and had never revealed his full power.

He kept silent all the time, but once he spoke up, everyone was stunned.

AiYa and CaiYi, the two Sky Realm warriors, had been a little bit helpless in the encirclement of the Heavenly Palace warriors. It didn't seem that they could have done anything when they faced the Golden Silks and the golden silkworms. However, ShiYan was different. As soon as he took action, the Golden Silks and the warriors were defeated, as well as NingZe's golden silkworm, which had destroyed NingZe's mind and made him leave immediately without lingering.

Powerful ShiYan had totally shocked the other four.

AiYa's face kept changing while she was watching ShiYan's figure until he disappeared. Her eyes looked extremely complicated.

CaiYi was completely agitated. She had been looking for opportunities to kill ShiYan and remove the soul barrier in her host soul. After ShiYan's breakthrough, her face displayed bitterness as she felt powerless and frustrated.

"This fellow is really from the Endless Sea?" LaoLun smiled and shook his head. "Didn't you say that the Endless Sea's warriors are not as good as those of our Divine Land? How can he be that powerful? Even NingZe had no way to deal with him."

AiYa and CaiYi also shook their heads at the same time with thoughtful faces.

"Should we chase after him or not?" LaoLi hesitated a little bit and said, "We all know about NingZe's tricks. He was humiliated this time, and he will be certainly crazier to deal with next time. If he is not dead..."

"Chase."

AiYa took a deep breath, turned into a beam of light rushing out and following ShiYan.

CaiYi was a little hesitant, but she finally followed AiYa. The two brothers, LaoLi and LaoLun, also flew out without too much hesitation.

"Young Master, that kid could defeat the golden silkworms. What is his origin?"

In the Dark Magnetic Noxious Mist, three silhouettes were aggressively flying all the way. Among them, the Sky Realm warrior who had broken fingers wore a panicked face. He looked at his ten bleeding fingers and said miserably, "We have had a great loss this time. I was cultivating this secret technique for many years, and it is now ruined by a kid. I am not sure if we can make up for this loss when we go back later."

"This kid is not a person of White Emperor City." NingZe gritted his teeth and said with a ruthless face, "If White Emperor City had a powerful young master like him, we would have received the news. He is only in the Nirvana Realm but could control us entirely as if he has a special way to deal with golden silkworms and Golden Silks. This person is our nemesis. Absolutely, he cannot live."

"Young master, what should we do? Your golden silkworm has been taken. You will be severely punished when you go back."

"No worries. I will quickly contact another team. Wait until we gather our strength, we will make this kid suffer." NingZe grunted, "The secret technique which the other team has cultivated is different from ours. It must be able to defeat that kid. AiYa and CaiYi, these two damn girls, I will make them lose their faces. They dare to harm me."

"Young master, that kid is chasing after us," a Heavenly Palace warrior who was lagging behind turned his head around and suddenly screamed out loud.

"Catching up already?" NingZe turned around, had a quick glance, and suddenly laughed, "It's good that he is here. I haven't dared to enter the Fearful Land ahead. That kid doesn't know life from death. We can entice him to go inside and take advantage of that Fearful Land to kill him."

As soon as NingZe finished his words, the eyes of the other two Sky Realm warriors brightened up, and they both spoke up at the same time, "Master is wise!"

ShiYan had chased after the three people of NingZe's group the entire way. The Gravitational Field was following behind him. The auras of those warriors who had died in the Gravitational Field massively overflowed and poured into his acupuncture points, freshening up his whole body.

Dashing like a rocket in the air, ShiYan turned his head and realized that AiYa and CaiYi were also following him. He let out a sigh of relief and was more determined to kill NingZe.

The three people of NingZe's group all had Sky Realm cultivation base. Although the three of them were all injured, ShiYan knew that his full strength alone couldn't handle all of them in a battle. Perhaps he would even be killed.

However, together with AiYa, CaiYi, and the two brothers, the situation would be different.

As long as the four of them could handle the two Heavenly Palace Sky Realm warriors, he was confident that it would not be difficult for him to use his real power to get rid of injured NingZe.

That was why he continued chasing NingZe's group.

A mountain peak covered with fog suddenly appeared in front of them. Gray smoke hovered around without dispersing. The three people of NingZe's group moved forward and disappeared behind the mountain.

ShiYan also rushed into that gray smoke below the mountain without thinking too much.

However, as soon as his body entered that area, he immediately realized that it was not good.

That gray smoke area looked like an invisible mud. As soon as his body entered the place, it immediately got trapped as if it was confined deep inside the mud and could hardly move. The more he struggled, the deeper he would sink. The other three people of NingZe's group had disappeared without a trace.

ShiYan's face changed. He was afraid that he had fallen into NingZe's trap, accidentally entering a Fearful Land of the Dark Magnetic Noxious Mist.

He didn't even have any reaction yet, but the other four figures had already appeared behind him.

In their screams, none of AiYa, CaiYi, and the two brothers could escape. They were all surrounded by this Fearful Land; their bodies couldn't move as if countless invisible vines were wrapping them.

"Fearful Land!"

AiYa was shocked, couldn't help but shout. "Not good. We have fallen in NingZe's trap. It is dangerous this time." In the Dark Magnetic Noxious Mist, every time before AiYa had moved forward, she had always taken out the compass not only to identify the directions but also to detect dangers around. Once she suspected that the area ahead was dangerous, she had asked ShiYan to move first to pioneer the path.

This time, since the pursuit of NingZe was too hasty, and she thought that there was no danger as NingZe was ahead, she hadn't taken out the compass before she entered the Fearful Land.

The countenance of the three people of CaiYi, LaoLi, and LaoLun also changed. At this moment, their bodies were all tied up, and they realized that something was wrong. They kept struggling and thus slowly sank into that thick gray smoke area.

After the five people of ShiYan's group realized that the more they struggled, the fewer possibilities they had to get out of this Fearful Land. Their faces darkened as they couldn't figure out any way to leave this Fearful Land

Unfortunately, this Fearful Land was very mysterious. No matter how hard the five of them tried, they couldn't break this area to escape in a just short time. Instead, this Fearful Land slowly pulled them down.

Feeling a little bit dizzy, ShiYan suddenly couldn't see anything around him as if he was going into the Transfer Formation. His Sea of Consciousness was affected and became chaotic.

This kind of feeling soon passed very quickly.

When he could adapt to the situation, he then realized that he was going into a marvelous area full of gray clouds bobbing around his body. Gray clouds were thick and endless like a sea of clouds.

In this sea of gray clouds, the foggy mountain was hardly seen; only gusts howled and growled fiercely.

Those gusts were extremely violent and contained mighty powers. Those strong energy fluctuations were a little bit devilish as they seemed to be able to lead the Sea of Consciousness, making it unbearably chaotic.

"Faded Astral Wind."

A terrified scream came up from a place not far from there. AiYa looked at that howling gust, and her face was full of fear.

The faces of the three people of CaiYi, LaoLi, and LaoLun also changed. It seemed that those growling flurry of the wind over there were even more frightened than NingZe and other Heavenly Palace warriors.

"Faded astral Wind?" ShiYan frowned. "Is this gust very dangerous?"

"Extraordinarily terrible!" The four people of AiYa's group all replied at the same time with a grave look on their faces.

God of Slaughter

Chapter 380: Turn the tide

"This Faded Astral Wind is the most mysterious in our Divine Land. It doesn't have any impact on warriors' bodies, but once it blows our soul consciousness away, our Sea of Consciousness would be obliterated. After the soul consciousness in the Sea of Consciousness has been blown away, the host soul will be directly exposed, torn apart and crushed by this Faded Astral Wind entirely." CaiYi attentively looked at the Faded Astral Wind in front of ShiYan and slowly flew over there. Her face kept changing in fear.

AiYa, LaoLi, and LaoLun helplessly watched the Faded Astral Wind coming closer, and they didn't seem to be able to have any reaction.

"Guys, do you have any soul defensive secret treasures?" CaiYi looked at AiYa and ShiYan, asked hurriedly. "Only Soul Defensive Power Secret Treasures can prevent the Faded Astral Wind's impact. Otherwise, once our soul consciousness is blown away, our host soul will be torn down."

If the host soul was gone meant the spirit was eradicated and it was impossible to use any means to survive in this world.

AiYa, LaoLi, and LaoLun frowned. They all shook their heads after CaiYi's inquiry was made.

CaiYi looked at ShiYan. Her beautiful eyes expressed a trace of expectation.

The tree people of CaiYi were all stunned, looking at ShiYan as they expected that ShiYan could have some mysterious trick to stop this Faded Astral Wind.

"Why are you guys looking at me?" ShiYan was astonished and revealed a wry smile. "Do you think that I can help you? I am from the Endless Sea. Endless Sea's warriors are not as good as those of Divine Land. Even you guys cannot do anything, so what can I do?"

"You and other ordinary Endless Sea's warriors are not the same." LaoLi reluctantly smiled. "Although you only have Nirvana Realm cultivation, not only could you break the Golden Silks of the Empyrean but you also took in the golden silkworm. Even if it was in our Divine Land, not many young warriors could reach this level of yours."

CaiYi and AiYa also shook their head at the same time as they both seemed to agree with LaoLi's point of view.

Previously, in the most difficult time, ShiYan had defeated Golden Silks and the golden silkworm of the Heavenly Palace and saved the girls from NingZe's hands.

ShiYan revealed some traces of mystery which made the four of them secretly frightened. Hence, they could not treat him like an ordinary warrior of the Endless Sea.

The way that the four of them looked at him had changed subconsciously. They felt that he was not as simple as a common Endless Sea warrior.

"I don't have any soul defensive secret treasure either," ShiYan shook his head, looked at the Faded Astral Wind which was slowly approaching and said reluctantly, "You better find another solution."

"What else can we do?" LaoLun sighed, watching the Faded Astral Wind coming closer and closer, as he said disappointedly, "Would this fierce Faded Astral Wind destroy our host souls even before we have reached the deep area inside the Dark Magnetic Noxious Mist? Sigh, this trip is miserable. If I knew about this sooner, I wouldn't have come to the Dark Magnetic Noxious Mist."

"What is the point of these words now?" LaoLi snorted and suddenly sat down. "I hope that we can resist for a while and think of a way to get out of here. Otherwise, this Faded Astral Wind will tear our host souls apart."

AiYa and CaiYi wore reluctant faces. It was useless to be hasty at this moment. They helplessly watched the oncoming Faded Astral Wind but could do nothing.

The Faded Astral Wind was gradually approaching. No matter whether people wanted to face it or not, they all had to bear it.

The Faded Astral Wind shrouded all of them from every direction. This fierce Faded Astral Wind seemed to have consciousness. As soon as it realized that some living creatures had come in, it immediately stormed out from every corner, wanting to kill all those creatures, and not allowing this Fearful Land to have any living creatures.

It was not that ShiYan had thought about avoiding it, however, as he saw that the entire area was filled with this devilish powerful Faded Astral Wind, which was continuously surging, they simply didn't have a chance to escape.

After all, the Faded Astral Wind came and covered all five of them at once.

It turned out as CaiYi had said. When this devilish Faded Astral Wind had just arrived, ShiYan's body didn't have the slightest change. He felt that the wind was not violent as if there was nothing special about this creature.

However, after a moment, he realized that the volatility of his Sea of Consciousness suddenly became stronger. After his host soul that had condensed in the Sea of Consciousness fluctuated for a while, the soul consciousness wrapped around the Sea of Consciousness like gossamers slowly flying out of his Sea of Consciousness following that Faded Astral Wind.

The peripheral soul consciousness of the Sea of Consciousness had already lost more than ten strands after such a short moment.

As time was ticking by, his soul consciousness in the Sea of Consciousness was gradually affected by the Faded Astral Wind and thus fluctuated even more violently as if his soul consciousness gathered in the Sea of Consciousness wouldn't be able to resist for much longer.

Soul consciousness was fundamental to form Sea of Consciousness. The composition of the Sea of Consciousness was made by the condensation of countless of strands of soul consciousness.

The host soul existed in the Sea of Consciousness under the protection of the Sea of Consciousness. Once the soul consciousness dissipated entirely, the host soul would be exposed without any protection.

This Faded Astral Wind would disperse the soul consciousness first and then tear the opponent's host soul apart. Its purpose was to let the warrior's spirit perish. Once the soul consciousness in the Sea of Consciousness was all blown away, death would find the warriors.

Strands of soul consciousness dissipated one by one, which made ShiYan unable to concentrate and made his mind become dazed as if it was occupied.

He was sort of half-conscious, and his mind was in a bad state. He couldn't even conduct the simplest things.

He looked at the other people of AiYa's and CaiYi's group and realized that these four were in the same state as him. Their eyes were soulless while their dissipated soul consciousness was a little bit chaotic and was gradually leaving the Sea of Consciousness.

That was not a solution.

ShiYan gritted his teeth, made every effort to gather his attention and carefully considered.

He needed to have a soul defensive secret treasure to get rid of the Faded Astral Wind. However, he didn't have that kind of treasure. Other soul skills performance required soul consciousness to be the core source, but he couldn't display any soul skills while his Sea of Consciousness was vibrating violently like this.

Without soul consciousness, the soul skills were useless.

In accordance with the current situation, he would gradually lose his consciousness which would make it impossible for him to think of something by himself.

Must think of a solution as soon as possible.

Firmly believing in his own belief, ShiYan was even calmer when facing adversity. He temporarily forgot the fluctuations of his Sea of Consciousness, gathered all of his power and considered a way to reverse the situation.

Sky-breaking Shuttle!

ShiYan's original soulless eyes suddenly flashed up with a trace of consciousness; an idea emerged in his mind. He remembered the secret treasure from the Chasm Battlefield.

When he had entered the Chasm Battlefield before, his purpose at that time was to catch the Sky-breaking Shuttle.

In legends, this Sky-breaking Shuttle could break all kinds of formation techniques and barriers. He had spent a lot of effort to get this Sky-breaking Shuttle.

After having had the Sky-breaking Shuttle, he had communicated with it and received a message from the Sky-breaking Shuttle saying that as he hadn't reached the Nirvana Realm, he could hardly use it.

In the Hengluo Sea, he and his forces had expanded everywhere. By hunting and killing many warriors and Demon Dwellers, he had progressed in reaching the Nirvana Realm. He had made every effort to

enhance his own strength as well as have the insight of the powerful ChiYan. Thus, although he knew that he could use the Sky-breaking Shuttle already, he hadn't used it yet.

He knew that with his Nirvana Realm cultivation base, even if he went to the Fourth Demon Area to find the secret place where Yang Tian Emperor was confined, it was still difficult for him to use it to save the Yang Tian Emperor from that place.

ChiYan and BoXun were too powerful. Even if the Holy Spirit God, the Ice Cold Flame and the Earth Flame fused together, he was not sure that he could rescue and run away from BoXun's White Bones Dharma Body, let alone that he had completely consumed the power formed by these three great living forms.

Therefore, although he knew that he could use the Sky-breaking Shuttle, he hadn't used it just yet. It was because he understood that with his cultivation base, recklessly entering the Fourth Demon Area was a dead end.

It was not the same now.

A series of thoughts flashed up in his mind. He finally had a solution. He tried to take out the Sky-breaking Shuttle, immersed his mind in it, and communicated with the consciousness of the Sky-breaking Shuttle.

"It seems that you have entered the Nirvana Realm. Excellent. Nirvana Realm's power is enough for you to use me. Are you ready for it?" A feeble message suddenly came out from the Sky-breaking Shuttle. "What do you want me to help you with?"

"Get out of here." ShiYan hurriedly sent out his message.

"Possible!" The Sky-breaking Shuttle transmitted a very brief message. "If you pour enough power into me, you can urge me. If you want to leave this area, you better do it quickly."

"Pour the power in?"

"Yes."

"How much do you need?"

"You are now in the Second Sky of Nirvana Realm, so pour two-third of your Profound Qi, I can immediately tear down all the barriers and obstacles here. The stronger the formation techniques, the more power I need. The defense here is not very strong, so you only need to pour two-third of your Profound Qi, and it will be enough."

ShiYan' face changed slightly.

Feeling the soul consciousness passing gradually, he didn't have time to think too much; he immediately concentrated his strength and poured a massive amount of his Profound Qi into the Sky-breaking Shuttle in his hand.

When two-thirds of his Profound Qi was poured into the Sky-breaking Shuttle in the flying shuttle shape, it suddenly became extremely powerful as if it could tear everything down. It strongly flew out from his palm.

Silver fish scale-like waves were shot out from the Sky-breaking Shuttle, piercing through the layer of gray clouds in the sky.

This Sky-breaking Shuttle was indeed all-conquering as if it could cut off all kinds of blockades and barriers tearing the formation technique, which was like mire above their head, apart.

A silver beam of light drilled down from above, which looked like a silver galaxy plunging toward ShiYan's head.

AiYa, CaiYi, LaoLi, and LaoLun, who were in a daze, suddenly realized a silver channel had appeared in the sky and had pierced through the Fearful Land which was like a swamp covering above their heads. They both showed a frightened look on their faces and couldn't help but scream out loud.

"This is, this is...?"

"Did ShiYan make it? He is not simple indeed."

AiYa, CaiYi, and the two brothers couldn't help but shout in shock because of ShiYan's performance. They didn't know what ShiYan had done to tear the Fearful Land open.
