

Special Soldier 1071

Chapter 1071: Changed He Chenguang

The man seemed very confident, and Qin Yuan didn't know what the **** this guy was going to do, anyway, he wasn't afraid, so he watched the man put up the video in front of him.

In the video is a war video. It was the previous video of the United States attacking the oil country, which is still very cruel. After all, the equipment and weapons of the two sides are different, so the fight was really tragic.

However, some soldiers in the oil process were still very persistent and adopted crowd tactics, but they were no match for the heavy equipment of the Mi Army. This is a very early video. Qin Yuan didn't know why this guy released this.

Then those American soldiers walked on the street with a smile, and began to shoot and kill local civilians with guns at will, and took pleasure in it.

Qin Yuan frowned when he saw this. What he hated most was this kind of behavior. With a gun in his hand, he shot and killed ordinary people at will. These people were unarmed, and they did nothing wrong at all.

Looking at Qin Yuan's expression, the man seemed very satisfied.

"Captain Qin, what do you think when you see this video?"

"I don't know what you mean by that. You let me watch this video for no reason. Isn't this the crime of those guys? They don't admit it until now, and they keep saying that they are helping people clean up their internal organizations."

"It seems that Captain Qin is still clear about this matter, which is power and violence."

The voice of this man wearing a mask has also been specially processed. Qin Yuan doesn't know who it is. More importantly, he has no system. Qin Yuan is planning that as long as he controls this man, he can get He Chenguang's whereabouts.

But the man didn't care at all, instead he was talking about his speech endlessly. He felt that these guys were using violence to destroy other people's homes.

So he thinks the best way is to use violence to control violence, because it doesn't make sense to reason with them, and he wants to use violence to solve the problem, so he established such a base.

In addition, when he recruited these people, he also wanted to establish his own power. Ordinary soldiers would be vulnerable in front of those powerful military weapons. That's why he came up with this method, using the system to improve these ordinary people.

But these ordinary people, not everyone can accept such a system intrusion, which is equivalent to implanting a virus, and some people will have a rejection reaction.

So he can only keep experimenting. Although many people have died, he feels that those people are all for the happiness of the majority, and it is worth sacrificing to this point, because the sacrifice of a small number of people can be exchanged for the vast majority. Part of the peace of the home.

And he is also using the members of these organizations to do good deeds. All he kills are those notorious criminal groups, and what he calls using violence to control violence.

It's just that the time is not yet ripe, because Mi Jun's strength is indeed very strong, and he can't solve it alone.

Qin Yuan didn't bother to talk to him. What this guy said became more and more aggressive and excited. He even stood directly on the opposite chair. The soldiers next to him were completely dumbfounded. They had obviously been brainwashed and cheered loudly.

At this moment, Qin Yuan made a quick move, and rushed directly in front of the man with a sprint, with the throwing knife on his neck.

The two people next to him were stunned by this scene, they didn't expect Qin Yuan to make a move suddenly.

"Enough, I don't want to hear your nonsense, where is my brother?"

Unexpectedly, the man didn't have the slightest fear, but laughed out loud.

"Captain Qin, don't you want to listen to my speech? Do you think what I said is unreasonable?"

"It's not up to us to control these things. What we have to do is our own work, and what kind of fallacies are you talking about? Using violence to control violence will only cause more violence."

Qin Yuan didn't want to explain more to him, so he used some strength in his hand and grabbed the man's neck directly.

"Bring out my brother, or I'll just crush your neck."

The two subordinates next to him were very nervous, and even the people on the outside rushed in when they heard the movement. Everyone raised their guns and pointed at Qin Yuan.

"gentlemen!"

Unexpectedly, the man just shook his head indifferently, "Don't worry, everyone, he won't hurt me."

Qin Yuan directly stabbed the knife into the man's shoulder, not hitting the vital point, but just to give him a warning.

"Do you really think I can't do it? Let me tell you, I don't have such a good temper. Where is my brother?"

The man gasped in pain, and the blood trickled down his shoulder, but he didn't care, and just waved his hand.

At this time, a person was brought in from outside, it turned out to be He Chenguang. At this moment, He Chenguang's expression was very dull. He was a little excited when he saw Qin Yuan, but he was not as excited as he had imagined before.

"Brother Qin, why did you come here?"

"Chen Guang, come here quickly, wait for me to rescue you now."

Unexpectedly, what He Chenguang said next shocked Qin Yuan completely, "Brother Qin, what do you mean? Why do you want to save me? I came here voluntarily."

"What nonsense are you talking about, boy? Hurry up and return to the team with me. When is this? What's going on with you? Are they threatening you with their family members, or something happened, please tell me quickly."

This is not in line with He Chenguang's style. I didn't expect him to say such a thing.

Unexpectedly, He Chenguang shook his head and persuaded Qin Yuan to let go of the man in his hands.

"Brother Qin, it's really wrong for you to do this. After all, it's for everyone's consideration to count him first. Why did you hurt him?"

Brother Qin felt something was wrong when he heard this, he stared coldly at He Chenguang in front of him, could this guy be a fake too?

"It's not He Chenguang at all. He is my brother and our special forces member. He would never say such a thing!"

At this moment, the masked man laughed.

"Captain Qin, why don't you accept the reality? He is He Chenguang, and I didn't kidnap him. He really came here voluntarily."

Moreover, He Chenguang made another move. He stepped forward and asked Qin Yuan to let the man go.

"Brother Qin, I will explain this matter to you properly. Let me go first, and I will explain it to you properly. Maybe you will understand."

Qin Yuan frowned tightly, what happened to He Chenguang? He asked the system again. After the system was tested, the person on the opposite side did not have a system.

Moreover, He Chenguang was worried that Qin Yuan would not believe him, so he directly pulled off his clothes, and there was a very obvious wound on his abdomen, which was left when they fought side by side.

"Brother Qin, if you think I'm still your brother, then put down the knife and let's have a good talk."

Qin Yuan really didn't understand the current situation now, and with his current strength, he was not afraid of these people at all, so he let go, and he wanted to see what kind of explanation He Chenguang would give him.

As soon as he let go, several subordinates rushed forward to check the wound of the masked man. He Chenguang also rushed over and apologized in person. His attitude was simply too humble.

"Sir, I feel very guilty. After all, I have caused you trouble, but I personally apologize to you. I hope you will forgive my captain for his recklessness."

The masked man didn't blame him, he walked up to him with a smile, and patted him on the shoulder.

"Chen Guang, I think you are really a very good soldier and an excellent soldier. I believe in you. Then you should explain it clearly to your captain. I hope we can resolve the misunderstanding between us."

When He Chenguang heard this, he felt that he was being reused and nodded his head, and his face was full of gratitude. He knew that the husband did not blame him.

The masked man turned around and looked at Qin Yuan with a smile, "Captain Qin, then I won't disturb your brother's reunion. Maybe I didn't explain clearly what happened before. I hope he can explain clearly to you."

"Let me tell you, what exactly did you do to my brother, I will never let you go."

He Chenguang hurried up, shook his head and said that he had no problem, and hoped that Qin Yuan would not be so excited.

After the masked man and his men walked out, Qin Yuan stepped forward and grabbed He Chenguang. He really wanted to ask what happened to this guy, and why he seemed to be a different person in a short period of time.

"What's the matter with you guys? These guys are not good people. Don't you know what you were talking about just now?"

"Brother Qin, don't be so excited. I think Mr. is a very good person. It seems that you misunderstood him."

Qin Yuan was almost stunned when he heard this. At first he thought that He Chenguang had some difficulties, but he didn't look like this guy at all, he was completely brainwashed.

The mask he followed suggested that he intended to use violence to counter violence and use violence to solve the current problem.

And He Chenguang also knows about the system, but he has not yet accepted the transformation, because before accepting the transformation, they need to strengthen their physique to withstand it, and most people will fail, so this is the choice of a narrow escape.

He Chenguang also signed the agreement directly, and he agreed to carry out the transformation, because he felt that he had to rely on his own strength to complete most of the peace.

Qin Yuan felt it was completely unreasonable. How could his brothers who had lived and died with him before become like this and still hang out with these people?

"I don't want to hear your nonsense now. Come back to the team with me now. I don't know what happened to you, but you are so wrong."

"Brother Qin, I don't want to go back. I know our country is very peaceful, but there are still many security risks, especially in foreign countries. They have not reached absolute peace!"

"What do you mean by that! Are you abandoning your brothers and your faith for these fellows?"

Qin Yuan was so angry that he punched He Chenguang in the face directly, trying to make this guy sober.

In an instant, blood flowed from the corner of He Chenguang's mouth. He stood up and wiped the blood without paying attention.

"Brother Qin, I know, you can't understand now, but the sky is really doing a great thing, I hope you and the team members can join in."

Qin Yuan only knew that this guy was crazy. At this time, the masked man also walked in, and his wound was completely bandaged.

Qin Yuan clenched his fists and rushed directly to the masked man. It was all because of this guy. I don't know what he said to He Chenguang to make her so desperate.

"You bastard, what did you do to my brother to make him become like this? Let me tell you, I will never let you go."

Unexpectedly, at this moment, He Chenguang suddenly stood in front of the masked man, and Qin Yuan's throwing knife could only be stopped.

Seeing that Mu Qinyuan was completely stunned, He Chenguang really changed, but at the moment he couldn't control that much, so he stepped forward and grabbed He Chenguang, knocking him out on the spot.

Now he just wants to take He Chenguang away directly, because he can't explain that much at all, he won't leave his brother behind, he only knows that if He Chenguang is left here again, there will be big problems.

Originally, he thought the masked man would stop him, but he just smiled and said, "Captain Qin, I can't stop you from making such a choice. If you want to take him away, you can random."

The main reason is that He Chenguang's state is really wrong now, Qin Yuan clenched his fists tightly, he wished to kill all these people, but now He Chenguang should be the main one.

"I tell you, I will definitely come back, you hurt my brother, I don't know what you did to him, but I will definitely return."

"Captain Qin, I think there is a misunderstanding between us. You said you wanted to take him away, but I never stopped you, and I didn't do anything."

Qin Yuan snorted coldly, directly resisting He Chenguang who was lying on the ground, and then looked at the masked man who rushed out quickly, his speed was very fast.

I turned my head and didn't find any pursuers. It seems that these guys really didn't chase them out.

When He Chenguang woke up, Qin Yuan was driving, and he was sitting in the co-pilot.

"Brother Qin, what are you doing? Where are you taking me? "

"I think you kid is really unconscious, you know? I'm saving you, what kind of stupid things did you really do?"

Unexpectedly, He Chenguang asked Qin Yuan to stop, and he wanted to go back.

"Brother Qin, this is my own choice. You can't interfere with me. I'm going back now. You can't stop me."

"You're really crazy, do you know where that is? And I'm saving you now just because you're my brother, do you know what you're talking about?"

"I am very clear about my choice. Following Mr. is the most meaningful life. I don't want to do this day after day!"

He Chenguang actually wanted to jump out of the car. Qin Yuan had no choice but to knock him unconscious again, and take him back first. After all, this guy was too emotional, and he really didn't know what the masked man was to What did he do.

Chapter 1072: retrieve memory

Latest website: No matter what, the real He Chenguang has been found now.

But Qingyuan was really tangled at the moment, why the other party let them leave so easily, and He Chenguang's attitude was really strange.

No matter what kind of brainwashing words that guy used, He Chenguang would never be fooled. He suspected that this guy did something to He Chenguang.

Just like this, when Qin Yuan drove back to the brigade, the team members also surrounded him. After all, they had seen the two of them clashing before, but now seeing them coming back together, they were somewhat worried.

Li Erniu came up to take a look, and He Chenguang, who was sitting in the co-pilot, seemed to be asleep.

"Brother Qin, where did you and Chen Guang go? This is so uninteresting, even secretly taking him to special training."

"This kid has been training for a day today, and he is too tired. I will take him back to rest now, you all continue to train!"

Qin Yuan could only find this excuse first and send He Chenguang back, and no one doubted it.

After returning to the dormitory, He Chenguang also woke up slowly, but he found that his hands and feet were tied up. He petitioned, but he was only worried that she would behave aggressively or try to escape, so he restrained him first.

Sure enough, when he woke up, he was very emotional. He looked at Qin Yuan and said, "Brother Qin, what are you doing? Do you think that if you bring me back to the brigade, I will be here obediently?"

"Think about what you said when you entered the brigade before, and what are you doing now?"

"That's because I haven't met Mr. before, so I don't know how important peace is. This requires us to save peace, and you are too selfish to do this. What are you doing for?"

Qin Yuan was dumbfounded when he heard that, what do you mean by being too selfish? If he was selfish, he would not have saved him at all.

"I said, do you have a conscience, boy? In my conscience, I have tried many ways to find you, and do you know that fake person? He has been following us, and you know what it means to put everyone in danger. ."

"No! Mister won't harm us, and I did it voluntarily. Now that we've talked about it, I'll tell you that I want to withdraw from the red blood cell."

crazy! It was completely crazy, and He Chenguang's emotions became more and more agitated. In order to control him, Qin Yuan directly invaded his consciousness, and then temporarily hypnotized him.

"System, you can detect if there is something placed in He Chenguang's body, and why he has such a big change."

"Answer the host, I'm just a recovery system that can only detect whether he has other positioning equipment on his body, but it's not clear whether he has been changed."

Hearing this, Qin Yuan clenched his fists tightly. No wonder those guys didn't chase them at all. They had already expected that He Chenguang was dead set on them.

Now he just wants to get his brother back from the fire pit, these ***** are too despicable.

He Chenguang's condition was very wrong, Qin Yuan could only ask for a few days of sick leave for him, and announced that he was injured during training, and his teammates also came to see him, but did not find anything abnormal, after all, Qin Yuan had always been Hypnotized.

But going on like this is not a long-term solution. After Qin Yuan went out, he found Li Kang and the others. Now they are like grasshoppers on the same rope, and they still share many things with each other.

Everyone was shocked when they heard the news. They didn't expect that the people behind it actually attacked the people around Qin Yuan.

"Captain Qin, what do you think about this matter? Is this person an enemy or a friend?"

"Based on the fact that they used so many people for experiments, how can they be considered good people, and they even did something to my brother."

And now the most important problem is that although Qin Yuan has come into direct contact with that mysterious person, Qin Yuan still doesn't know who he is.

He mainly looked for Zhang Meng this time, because Zhang Meng belongs to the system of the treatment department, and her system can produce many medicines.

"Zhang Meng, this time I have something to ask you, can you produce some memory-eliminating drugs in your system, or temporarily make people lose their memory."

Zhang Meng thought about it, she really has this, but it doesn't last long, because she is only a healing support system, and the medicine in her system won't last long.

"I have no problem with this medicine. The system can release it, but it can only make the other party lose their memory for a short time, about an hour."

Zhao Tao frowned when he heard this, "One hour, then it's useless at all, the time is too short."

"You guys don't hurt your back when you stand and talk. Anyway, I can have an hour, which can be regarded as a bit of delay. After all, I am just a system of the healing support system!"

And Qin Yuan felt that this was enough, all he wanted was the drug itself, because his system could be recycled, and he also wanted to see if such a drug could get other effects after being recycled by itself.

Now he wants to combine everyone's strength to fight against the mysterious person behind him.

Just like that, Zhang Meng took out her systemic medicine.

It's just two blue pills, they look very ordinary, but they can make people temporarily lose their memory for an hour.

When Qin Yuan touched the pill, the system immediately analyzed and extracted it.

"Ding! The system detected whether the amnestic pills should be recovered?"

After Qin Yuan clicked Recycle, the system immediately reacted in other ways.

"Please host to make the following choices:

1. World-class memory master skills, able to extract other people's memories at will, without reservation in front of this skill, all memory fragments can be extracted.
2. World-class memory erasure skills, which can change the designated memory, recreate another memory fragment, and rebuild the memory palace.
3. World-class memory duplication skills, completely duplicating the effect of pills, can make people lose their memory for a short time, and the maintenance time is doubled for two hours.

Qin Yuan looked at the most usable one at present, and that was the second skill, so he directly chose the second skill.

This is the strength of his recycling skills. He can directly transform and recycle things that others have taken out.

As for extracting memories, he doesn't need them, because he can also hypnotize himself, and he can use psychedelic skills to confuse the other party. What he needs now is to erase He Chenguang's previous memories, and then reshape them for him.

With this skill, Qin Yuan can be regarded as relieved, at least there is no problem now, but he is really more and more worried now, if they can take away He Chenguang so easily, then other people around him will also be in danger .

So he still has to face this organization sooner or later, and this matter must be resolved as soon as possible.

He asked everyone to prepare well. It is unlikely that he will fight alone now. After all, the rest of us are skilled, so it is better to unite them all.

The opponents they have to face this time are also very difficult, including the systems on them, which are likely to come from the mysterious person behind it.

Qin Yuan returned to the brigade first, and erased and changed He Chenguang's memory fragments. He Chenguang completely forgot what happened there.

After he woke up, there was no change from before, and he didn't mention the previous things, including the so-called Mr.

Qin Yuan also thought about it carefully. That person was wearing a mask and his voice was specially processed. He didn't know the identity of the other person, but the person's words were quite convincing. After all, those around him were very convinced by him. , and willingly.

Those brainwashing speeches can only destroy those with weak willpower, and can easily make them waver and follow the other party.

When she was willing to find Zhang Meng and the others, Zhang Meng once again put forward her own suggestion.

"Captain Qin, although you went to that place, I know you must use your judgment as the standard, but I still insist on my idea. This Hongjian Printing Factory is really suspicious."

"It means that you have conducted other investigations on them later?"

"Yes, not only those inks, but also thanks to Li Kang's men, because you mentioned a detail before, they said they used military tents, I followed this line and found that their purchase record is this Hongjian Printing Factory ."

Qin Yuan couldn't help but look at Zhang Meng in admiration, this woman is really not simple.

I didn't expect that she could conduct investigations from these details. After all, who would pay attention to such purchase records, but Zhang Meng really noticed, and she went to investigate on purpose.

The main reason is that all these coincidences have already matched up. He just discovered a military tent, and then the Hongjian Printing Factory found a purchase record, and it was a large number of military tents.

Qin Yuan also agreed that it is possible to investigate directly from this detail.

"If this is the case, then we will split into two groups. The three of you will go to Hongjian Printing Factory and conduct a basic investigation first. After all, the place I went to is more difficult to walk, and it is all mountain roads. I will go and see their lair."

In this way, several people act separately, and if the three of them have Zhao Tao, Qin Yuan is more at ease, Zhao Tao's ability is also very strong.

In addition, in addition to Zhang Meng's medicines for treatment, she also has medicines for short-term coma, but the time limit is not long, but she can also protect them.

When Qin Yuan came to the place where he was looking for He Chenguang, he found that all the military tents had been completely dismantled. When he left, he left a coordinate on purpose. He would never admit his mistake.

Some of the surrounding plants had traces of being trampled, otherwise they would not be visible at all. There were people who lived here before, and the speed of these guys was really fast. I guess they had already retreated when I took He Chenguang away.

For a moment, Qin Yuan couldn't figure out what the leader of the organization wanted to do, and thought he was persuading himself to come to him, so he attacked the people around him.

The most important thing is the mysterious person behind him. He does not have a system on him. Such a situation is really very rare. Before, Qin Yuan thought that he might use a powerful system to control others.

But that guy is just an ordinary person, or is he just a puppet, and the person behind it is actually someone else.

The clues here have been completely interrupted, so Qin Yuan also rushed to Hongjian Printing Factory immediately, Zhang Meng and the others also sent a message, this Hongjian Printing Factory is really unusual.

It's obviously a printing factory, but they don't do any business with the outside world. They basically take on some small printing tasks, which doesn't match their expenses and expenses at all.

Such a large printing factory has many production workshops, but the entire production workshop is closed.

Li Kang used his identity to express his desire to cooperate with them, but he was directly rejected. You must know that Li Kang is very influential. In this case, he wanted to cooperate with a printing factory like them.

How could someone refuse in this situation, but their person in charge directly refused, so this is the strangest thing.

Qin Yuan told them not to act rashly, so they came to the outskirts of the factory. There are surveillance everywhere, and there are security patrols on duty 24 hours a day.

Looking at it this way, this printing factory is even more unusual. Qin Yuan, looking around, still had to act after dark.

"Tonight, I'll go in and check the situation first, and you will be responsible for supporting me on the periphery."

"This is no problem, but be careful, this printing factory is not as simple as it seems."

"Don't worry, with my strength, there is no one who can kill or deal with me."

Except for being able to threaten the people around him, Qin Yuan acted when it was dark, his speed was very fast, and he had world-class hacking skills.

The monitoring system inside was directly shielded from the periphery. Qin Yuan took advantage of this gap to rush in. He went very smoothly along the way. They saw the security guards on the periphery before, but this time they had disappeared.

More importantly, he directly entered the production workshop, and there were indeed workers in the production workshop wearing work clothes, who were printing on the production line.

Looking at it so far, there is nothing wrong with it. He can only continue walking towards the office. The further he goes in, the more he finds something wrong.

This office is more like a dormitory, and there is a training ground behind it.

This training ground is just some basic fitness facilities, and there is nothing wrong with it from the general direction, but Qin Yuan soon found out that something was wrong, because there was a lot of yellow sand on the playground.

These are generally large sandbag facilities that have been piled up for a long time. It seems that someone has cleaned them up in advance, and it should be the guys behind them. They have already noticed.

The training ground was very quiet at the moment. Seeing a dormitory building with lights on in front of it, Qin Yuan was approaching quietly. Suddenly, all the headlights on the playground were turned on.

Qin Yuan subconsciously took out the throwing knife, and there was a man standing on the opposite building, who was wearing the mask before.

Chapter 1073: not the real people behind

The masked man stood opposite and said loudly: "Your speed is quite fast. I didn't expect you to be able to investigate this place. It really surprised me, but it is worthy of being the person with the strongest system. It is really impressive." I admire it."

"What the **** do you mean now? And what the **** did you do to my brother?"

"Qin Yuan, you don't need to be so hostile to me. After all, in other words, you have to thank me. After all, I gave you these things."

"Then what do you mean now!"

Qin Yuan was really angry at this moment, mainly because of this unpredictable feeling, mainly because all his actions were once again seen through by this guy, and at this time.

The outside door opened, and Li Kang and the others were pulled in. At this moment, Zhao Tao was desperately resisting, but the other party had a gun in his hand.

When Zhang Meng was investigating, the man in the mask already knew about their situation. After all, it was the man in the mask who was investigating them in the first place.

"To be honest, I'm really relieved that you can investigate this. You can be said to be a perfect combination."

"Then what exactly do you mean now?"

"What I want is very simple, that is, you are all my test subjects in the first generation, and your fit is very good, much better than my current people. I hope you can return to the organization."

Qin Yuan snorted coldly. This guy kept talking about organizations, and he also talked about his plan. He said so grandly for the peace of all mankind in the world. In fact, he used violence to fulfill his personal ideals.

"You don't need to say these high-sounding words, but you are actually a hypocritical and despicable villain. How many innocent people have you died for the experiment!"

"Qin Yuan, you have always been my best experimental product, so I hope you can understand me, everything will be sacrificed."

At this moment, Qin Yuan didn't want to talk to them so much, he just threw the flying knife in his hand, and the other side also made a quick move. After Qin Yuan put the people around him down, Zhao Tao reacted quickly and took it away. shot the guns of the people around him.

Although he can't shoot, he can remove the current danger first. At this moment, the masked man smiled, and then he held a button in his hand.

With the activation of the instrument, Zhao Tao only felt dizzy for a while. The strength he could erupt just now suddenly disappeared. He only felt sore all over his body, as if he had lost the strength he had before.

He staggered, and then collapsed on the ground. Zhang Meng, who was next to him, also felt that something was wrong. She hurriedly asked the system to dispense medicine. She wondered if Zhao Tao was injured, but found that the system did not respond.

She kept calling her system, but she didn't get any response.

The masked man is very proud. The instrument in his hand is to interfere with their system, which can directly interfere with their system connection, causing them to lose contact with the system for a short time.

But what he didn't expect was that Qin Yuan didn't seem to be disturbed at this moment, and he was still at home among those soldiers. His reaction was quick, and no one could catch him.

But the masked man didn't think of this. He felt that Qin Yuan was a special soldier after all, so his movement skills would be more sensitive. At this time, the soldiers among them couldn't help but wanted to shoot, but the masked man yelled at him loudly.

"What the **** are you doing? Stop everything and don't hurt him. He is my most perfect and best work."

Then in the next second, a flying knife directly pierced a soldier's heart, and there was a scuffle below, and those soldiers were no match for him at all.

The masked man realized something was wrong at this time, because Qin Yuan's system was not affected at all, and his ability was still very strong.

Then he dodged and rushed upstairs. The masked man was a little flustered at this time, and quickly summoned a few videos. These soldiers all had systems on them, and their movements were more sensitive.

At this moment, a person said something loudly.

"stop!"

Qin Yuan turned his head and only saw Li Kang. They were already under control. Those guys put guns on his head, telling Qin Yuan to stop trying to threaten him.

Qin Yuan just snorted coldly. If he said it before, it would have threatened him. After all, he rarely used his charm ability in public, and he was also worried that he would be discovered, but it is different now. After all, everyone knows it well. Tomorrow.

He immediately released his charm ability, and in an instant, those members of the organization just put down their guns one after another, their eyes glazed over.

The masked man was full of surprises, and he clapped his hands behind him. At this moment, Qin Yuan jumped onto the platform on the second floor and walked in front of him.

The masked man clapped and said, "You are worthy of being my most successful work. Your fit with the system is simply perfect, and it is still getting stronger."

Qin Yuan ignored him, walked over and grabbed his neck, and lifted him up directly.

"Save your great principles for hell. I just feel worthless for those innocent people. How many people have been harmed by your brainwashing education?"

There was no fear on his face, but a hint of relief in his eyes.

At this moment, Qin Yuan was really curious about the identity of this person. He directly took off the mask of the masked man. Under the mask was just a very ordinary face, and it was ordinary that could make people feel unimpressed.

It can be said that Qin Yuan has no impression of this person who is frowning. He doesn't know such a person in the crowd.

"What are you still struggling with? Do it directly. After you do it, everything will be free."

"Why do you want me to do it, and the organization you have carefully built is going to be destroyed by me now, are you so willing?"

"Hahaha, you are my perfect work, don't worry, we will meet again."

The masked man left this inexplicable sentence, and suddenly he burst into laughter, then tilted his head, and died immediately, it turned out that he had swallowed the poison in his mouth.

At this time, Zhang Meng and the others also ran up, but there was no breath on the surface.

On the training ground at this moment, apart from the soldiers who were killed, there were also some wounded who were struggling on the ground, very chaotic.

Li Kang couldn't help but admire and said: "Captain Qin, your ability to do things is simply too strong. With the ability to hit ten with one, these people are like ants in front of you."

"I just find it very strange why you haven't been disturbed. I couldn't use my system ability at that moment just now."

"I don't know the specifics. It may be because my system is relatively advanced, so it is not under his control. It's just a pity that this guy's speed is too fast, and I have no time to stop it."

Qin Yuan really can't figure it out, obviously this guy can escape, or he is too confident in his own things, he feels that he can completely control himself, so he chooses to wait here for himself.

He always felt that things were not that simple. His masked man had already lost his breath. He wanted to use his recovery ability, but he had no time to make poison. The attack time was too fast, almost within two or three seconds. Inside.

Zhao Tao stepped forward and kicked the corpse on the ground, "This kid is so rampant, I thought he was so powerful, but I didn't expect to die like this!"

"It seems that our investigation is indeed in the right direction. This time the matter has finally come to an end. At least the person behind it has been solved by us."

Zhang Meng was relieved. After all, they had ruined a conspiracy. They had been under surveillance before, and now they finally dug out the people behind it.

Unexpectedly, Qin Yuan squatted down at this time. He took a closer look at the masked man, especially the instrument in his hand, which looked quite ordinary. He immediately asked the system to recycle it.

"Can this system be recycled?"

"Ding! Answer the host, this instrument cannot be recovered at present, it is a product of other systems."

"What's the situation? Can you detect the products of other systems, is it from someone's system here?"

"This is not difficult, but it must be due to the high-level system. The people here are currently carrying low-level primary systems, and they don't have any ability to produce such high-level things."

Hearing this, Qin Yuan was stunned. He was more sure of the judgment in his heart. He stood up and said slowly:

"No! We haven't solved it yet, he is not the real person behind it, and he is just a puppet."

Hearing this, the people next to him were taken aback. How could this be possible? This guy is already enough for them. Why did he say that there are other people behind him?

"But you haven't seen this guy before, he must be the mysterious person behind it, and why did you make such a judgment?"

"That's because my system has been tested. The instrument in his hand is from an advanced system, but no advanced system has been detected here, and do you think they will be eradicated so easily by us?"

"You're saying it's all about experimenting with their position on us."

Hearing that the few people here couldn't help but gasp, then such a conspiracy is too big. I didn't expect them to go through such a lot of effort, and all they found was a puppet.

Qin Yuan's judgment is not unreasonable. After all, the person behind him can't die so easily. It can provide them with a system, and it can also control the system, which means that person is not simple. How could it be so casual? Dead person.

Qin Yuan jumped from the platform on the second floor. There were a few struggling soldiers on the ground who backed away when they saw him approaching.

He stepped forward to question these soldiers, but they knew nothing about other situations. They always thought that this was their general base, after all, they had never been in contact with other places.

I can't ask about other situations, and their secrecy measures are really good.

In addition, what made Qin Yuan judge that he was a puppet was that this guy actually committed suicide. If he was really the mysterious person behind him, there was absolutely no need to do so.

At this moment, behind the monitor, a person who was completely dressed like the dead man was sitting on a chair. He stared coldly at everything in front of the screen, and then clapped his hands in satisfaction.

"It is indeed my most successful experimental product. His judgment is simply amazing, and it is indeed very good."

A subordinate at the back stepped forward and whispered, "Sir, shall we go straight to Plan B now?"

"Yes, it's almost ready to advance. This is my perfect experimental product, so I'm curious whether his descendants can also withstand such a system."

This subordinate left directly after finishing speaking, and at this moment, Qin Yuan felt like being watched. She looked around and saw that there were surveillance everywhere.

He didn't know if it was his own illusion, he always felt that he was being watched all the time, anyway, those monitoring made him feel very uncomfortable.

Although the real mysterious person behind it was not found, but one of their sites was destroyed, Qin Yuan speculated that this was just one of their branches, and the real general base was not here.

After this incident, Zhao Tao and the others had lingering fears. After all, the ability of this system would be controlled by others, which made them feel very uneasy.

Qin Yuan could only comfort them. After all, he didn't experience that feeling just now. If he really couldn't use the system, he couldn't imagine it.

"The incident this time is just an episode, and the person behind it hasn't come out yet, so I hope everyone will be more vigilant. Only by relying on our own strength can we really find out the person behind it, and that is truly safe."

"Captain Qin, don't worry, I will continue to investigate this matter."

"There is no need to investigate any more. The person behind will definitely come to us again. It's just as long as everyone is prepared."

After all, their every move has been completely monitored by others. Even if they want to investigate, they will be known in advance, and the things here have been exposed, and the people behind will definitely come to them.

All they need to do is to wait quietly, there is no other way, Qin Yuan also wants to speed up the improvement of his strength, he always feels that these are not enough.

And what he wants to deepen is the strength of the red blood cell team. At that time, he can't rely on Zhao Tao, they can rely on their own team.

When he returned to the brigade, He Chenguang had completely forgotten what happened before, and now he was training with the players as before.

This time the matter can be regarded as a temporary conclusion, after all, when the people behind will come out, it can only depend on them.

In the afternoon, Long Xiaoyun came directly to the dormitory angrily, and grabbed Qin Yuan.

"What the **** are you doing again? Why did you **** the mission of our Wolf Warriors team again? Team Gao has already said it, and you took the initiative to talk to him."

Qin Yuan had black lines on his face, Gao Shiwei, an unreliable person, how could he sell himself in a blink of an eye?

Chapter 1074: salvage submarine mission

The main reason is that now he has to hurry up and do more missions, and only after completing the missions can he have meritorious value, and he wants to strengthen the strength of his team again to avoid the previous situation.

So he also took over the task of the Wolf Warriors team, and he wanted to overfulfill.

Facing Long Xiaoyun's questioning, Qin Yuan could only laugh, "Is there such a thing? Why didn't I know? Team Gao must have said that on purpose. He was the one who took the initiative to give me the task. Why now? Relying on me again?"

Long Xiaoyun had seen through them a long time ago and gave him a blank look.

"You guys and Team Gao are in the same group. You two are here to play football for me, right? What's the difference between our small team? You can't be so domineering, take over all the tasks, right?"

"It's not that I want to train them more. You think about the boy Qin Zhengyang who just came to our team, so we need to do more actual combat."

Long Xiaoyun didn't want to talk to him too much, now that Gao Shiwei has agreed, the task will be given to them.

"Let me tell you, don't take it as an example, and you, don't think about tasks all day long, you have children now, take time to go home and see your children!"

It was only then that Qin Yuan remembered that there were too many things going on recently, and the child would probably be able to walk now. Thinking of this, he felt a little guilty.

I have been getting more and more busy recently, and I have been looking for the mysterious person behind it. More importantly, the latest a2-type submarine has been developed in the United States. This type of submarine is mainly a spy submarine.

Recently, fishermen near their Marine Corps have also salvaged a lot of this kind of submarine, which is a threat to them, but the research team on their side has not yet given preventive measures.

Because this is a long-range radar monitoring that can detect the number of their warships, especially in their nearby waters, it greatly limits the travel of their marines.

The measures given above are to encourage everyone to report and let fishermen actively participate in the salvage of these submarines, but these submarines continue to flow.

The best measure is to re-develop and restrain the jammers of these submarines. Before Qin Yuan completed the task, he received system rewards and had the blueprint of the aircraft carrier.

This is what Gao Shiwei told them in a previous meeting. Now their research team is actively developing such a jammer, but the process is very slow. I don't know how long it will take, or even how many years it will be developed.

Qin Yuan also couldn't wait to ask the system about such reward blueprints. It would be more convenient to get them directly from the system.

"System, disruptors like this, do you have any blueprints for rewards?"

"Please wait a moment, testing is in progress."

After a while, the system gave a clear answer. Although it does not have jammers, it has another kind of anti-radar equipment. Specifically, it can also be said to be a jammer.

But this anti-radar equipment also has a surveillance function, not only can intercept their signals for interference, but also steal their information.

"How many merit points do you need to exchange for this?"

"Answer the host, this one needs to trigger a necessary task, and there is currently no way to exchange it."

That's why Qin Yuan was frantically following up on missions during this period, so that those in the brigade didn't know about it, and wondered if there was any performance target in their small team.

However, the missions he took during this period have not triggered the mission of the system, so he only got some merit points, but it is not a disadvantage to get merit words, after all, it can strengthen the people around him.

On the other hand, he has even strengthened the management of the team members. If there is any situation, especially going out, he must report it to him personally.

It was also to avoid a situation like He Chenguang's last time, where others got involved and they didn't even know about it.

And before he originally wanted to deal with the person who pretended to imitate and Chengguan, but when he went to kill the masked man for the second time.

No one was found pretending to be He Chenguang, because he was just pretending, and Qin Yuan didn't know the real face of that fake person.

During this period, Qin Yuan took the time to go to the military compound and saw his long-lost daughter, who no longer knew him, and the little guy could already walk.

Speaking of this, Qin Yuan really feels guilty. After all, An Ran is also very busy now. She was transferred to the Military Research Office, and now she is fully responsible for the specific office situation of the exercise, as well as the development of the game.

An Ran's side is completely sealed, because the development and research of such military games are absolutely confidential, so she hasn't come back from her side for several months.

But fortunately, An Ran's parents can understand them very well. Both of them are busy with work, and the two old people are also taking good care of their children.

The child didn't know Qin Yuan at first, and he didn't want to get close to him, but after a morning, he became completely familiar with him, and was clamoring for him to hug him all afternoon.

Qin Yuan also felt the long-lost family happiness, he secretly made up his mind to handle the matter here, and spend time with his daughter in the future.

After returning from the army compound, Qin Yuan has been participating in training and performing tasks every day, but the mysterious person has never appeared. He wondered if he made a mistake in his judgment. It has been so long, but the mysterious person seems to have disappeared suddenly average.

On this day, Qin Yuan and the others received a mission, which was sent out internationally. The competition for the strongest special team that Qin Yuan and the others participated in before came to an end in the middle, after all, it was due to human factors.

But they still became the strongest special team recognized by most people, especially the strongest teams in the competition had been completely wiped out, so Qin Yuan and the others also stood out.

And this time they received the mission to go to the waters under the jurisdiction of country F to salvage a submarine they had in the last century.

To be honest, when Qin Yuan received this mission, he was in a daze. It was all about salvaging a submarine, and there was no need for them to dispatch it.

But just after Gao Shiwei issued the task order, a system prompt sounded in Qin Yuan's mind:

"Ding! Congratulations to the host for triggering the necessary task, successfully salvaging the submarine and obtaining the internal information of the submarine to obtain a blueprint of anti-radar equipment."

After waiting for a long time, the necessary task this time finally came. Qin Yuan was overjoyed instantly, and agreed directly without waiting for Gao Shiwei to say more.

"Team Gao, don't worry, you will leave this task to us and we will definitely complete it."

"Hey, you guys have changed so fast! Didn't you still question such a task just now, how could you accept it? You are not a porter, why did you agree now?"

"Isn't it my bounden duty to obey orders? Besides, we can't pick and choose. After all, all tasks are necessary for us to complete."

"Why are you so enlightened all of a sudden, boy? Forget it, I won't talk to you about this, now go down to assemble the team and prepare to go, and I will explain the specific situation to you."

Every time Qin Yuan knows to hurry down to assemble the team, this time he can not only get merit points, but also get blueprints, which is simply killing two birds with one stone.

Before, he was obsessed with the mysterious man behind him every day, but now he thinks about it and counts it from day to day. More importantly, now he can use these tasks to quickly strengthen himself and strengthen his military strength.

Later, when Qin Yuan received a specific mission, he only realized that it was not just as simple as salvage, but that the pirates in that sea area were too rampant.

Before, because they were fighting drug dealers and those pirates in the Golden Triangle area, and then all these pirates fled to country F.

Therefore, the authorities of country F sought help from the international community, and then found Qin Yuan and the others and asked them to help salvage the underwater submarine. Their team will also deploy and control the surrounding area to attack the pirates.

After going to the helicopter, Qin Yuan explained the rules of the mission. This time it was relatively simple. The most difficult thing was to go underwater together. After all, there was a team from country F around to cooperate.

"Brother Qin, I find it strange that these pirates clearly know that there are troops there to control them, so why do they go there?"

"Because those pirates felt that what they salvaged was not the antechamber, but the value of the money itself. They thought it was a treasure treasured by previous pirates."

"According to this statement, then we will inevitably fight a fierce battle this time."

"It can be said that those pirates have also made sufficient preparations. The main reason is that they were suppressed too much before, and now they are all gathered there, so their authorities will ask us to help out together."

Qin Yuan also specifically explained that the task this time is not that simple, so everyone should be more vigilant and stay vigilant.

When they came to country F, their troops had already begun to deploy their defenses, but the number seemed a little small.

Li Erniu looked at them and felt a little strange. At that time, it was agreed that the large army would cooperate with their group. This is just a matter of three commandos. Isn't this a joke?

"Brother Qin, if I'm not mistaken, there are only three commandos, plus the sentries outside, there are more than 60 people in total. They are playing with us here."

"I didn't think of this either. Wait a minute, let's go down and see the situation."

After they got down, James, the person in charge of Country F, stepped forward with a smile and greeted everyone.

"Captain Qin, I've heard of your name a long time ago. I didn't expect to be able to cooperate with you this time. It seems that our hope of success is really great!"

"The key to the current problem is not this problem. The key is that you clearly know that there are pirates, but the strength of the troops around you does not match what you said."

James didn't expect Qin Yuan to be so direct, and he said it straight to the point, but this is something that he will have to face sooner or later.

He also sighed helplessly, and then explained that the civil war broke out in their own country in the past two years, so the domestic situation is very unstable, and most of the troops are used to defend against internal enemies and maintain the government safety.

This time they salvaged the submarine to increase the strength of the government army. Although they could only send these people here, they were already dispatched from them.

Because when they are facing a civil war, they not only have to deal with rebels, but also peripheral forces. They must also pay attention to prevent others from taking advantage of it.

This Qin Yuan can understand, but it does increase some risks.

Anyway, the tasks are similar to him, he looked at James and asked: "Then when will we act, and what is the specific plan, what do you say?"

This time Qin Yuan and the others came to assist with the operation, and the main decision-making was still on their side.

"Captain Qin, it's like this, the specific plan, we will deploy and control the surrounding area to resist those pirates, and then your team can all go down to salvage the submarine."

Qin Yuan became nervous when he heard this, frowned, and directly raised his hand to refuse.

He can't just hand over his life to other people. You must know that they have disadvantages underwater. Of course, Qin Yuan is fine. He is like a fish in water underwater, but other team members are different. They have to carry oxygen tanks, and the underwater combat effectiveness is also greatly weakened.

On the other hand, they don't know anything about the situation above, how many pirates there are, and if they are surrounded by others, it will be troublesome.

This kind of thing is too unreliable, Qin Yuan would rather keep his own people on top, he will never take this risk.

"Mr. James, it's not that I don't believe you, but it's too risky for us."

"Captain Qin, to tell you the truth, the main reason is that our technology and overall quality are not up to that level. We tried salvaging before, but there was no way."

After talking for a long time, means is that they have already carried out salvage before, but their strength is not up to it, so they failed to salvage. The task of salvage is still to be handed over to Qin Yuan and the others.

"Since this is also possible, but half of my people must stay on the top. They are responsible for the safety of us below. We only need three people to go down here."

James was stunned when he heard this, three people, how is this possible? It is very difficult underwater, one is the difference in temperature, and the difference in water pressure.

The important thing is that after they go down, they have to hang the hook on the submarine, and then the ship above is carrying out mechanized salvage.

It was too difficult for three people to do it, because they calculated that according to the area of the submarine, at least six hooks were needed.

Therefore, 6-7 people need to go down to complete it together, otherwise it will increase the difficulty.

James frowned. Finally, after hesitating for a long time, he decided that he could also send someone to act with Qin Yuan and the others.

"Captain Qin, the three of you are really too few. I can send another person to work with you, so that everyone can take care of us when we go underwater."

Chapter 1075: Easy task?

"That's not necessary. After all, I have my own treatment plan, and three people are enough for me. I don't want to take care of other people underwater."

James frowned, he heard right, he obviously sent him a helper, but he still despises the people on his side as a burden.

Underwater, everything is unknown, and he was just out of kindness. After all, three people have to complete six hooks, which is not only a waste of time, but also a great challenge.

Besides, the underwater hook is not as easy as it is on land. They must first determine the location of the submarine, and then find a suitable hook after going down. Moreover, this hook weighs more than 50 kilograms, let alone six.

They also carried oxygen cylinders and other underwater equipment on their backs. The oxygen cylinders and those equipment already weighed more than 20 kilograms.

Coupled with the weight of the hook, each person can only give one at most, which is already very difficult, after all, they have done experiments before.

It is also very difficult to take these hooks down.

James felt that this was a bit exaggerated, and he felt that Qin Yuan looked down on his team, "Captain Qin, I know that our team is indeed inferior to your red blood cell team. After all, you are an internationally recognized team, but We're not bad either."

"I didn't say that I saw you clearly, but I was speaking according to the facts. Don't worry, I can stay with these hooks completely. There is absolutely no problem. I can also complete the task, but I just don't want to involve too many people."

The underwater situation has changed too much. Qin Yuan has to find a way to take care of his team members first. He can't control so many other people. For him, too many people are really just a burden.

Therefore, Qin Yuan's current plan is that he only takes two team members down, plus a total of three of him will be able to complete the task directly, and the rest will stay on the ship.

He must have his own people to ensure safety, otherwise it is too unreliable to entrust his life safety to others.

The members of the red blood cell team believed in Qin Yuan very much. After all, the decisions he made were correct. It was different for James. He felt that he was just messing around.

"If this is the case, then we still need to discuss it. I have to apply to our superiors, otherwise I can't make the decision at all, because this matter is of great importance."

The main reason is that James is also worried about the pirates robbing them. After all, those pirates are very good at water. Compared with them, those pirates hang out in the waters all year round.

Many unknown factors made James very entangled, so he planned to apply first.

On the other hand, Qin Yuan also suggested that if he could apply, he might as well apply for more soldiers. After all, since these pirates had received the news, a fierce battle would be inevitable. If there are more people, that is the key.

If you are willing to stay on the shore, you don't have to worry about his ability. Eliminating those pirates is not a problem at all. The key now is that he has to pour water to salvage them. Moreover, pirates have always been an unknown factor, and it is not certain when they will appear.

Otherwise, he would like to eliminate those pirates first, and then salvage them, but he can't afford to waste time.

If you eliminate the pirates first as he said, you don't know how long you will be delayed here.

James went back to apply. Qin Yuan and the others also observed the terrain. He took the radar map provided by this side, and the radar map had clear instructions.

The submarine was relatively deep, and it was in an unknown waters below. They had tried to salvage it with a submarine before, but it had failed. Because of the special nature of this submarine, their submarine was directly rejected as soon as it approached.

After so many years, that submarine has been working normally.

That's why they finally thought of the method of manual salvage, otherwise they could have adopted the method of salvaging submarines with submarines.

It's just that this method failed, and the value of that submarine is also very high. It is still in operation after so many years, and it can also repel other submarines, interfere with the signals of other submarines, and cannot complete the salvage.

This is a very research result, but this news does not know how to do it, and when it reaches the ears of those pirates, it becomes the treasure left by the pirates before them.

After all, the military is now in a period of civil war, and they are spending manpower and financial resources to salvage the submarine, and let the pirates confirm their guesses.

It just takes time for James, Qin Yuan and the others are resting in the temporary tent at the moment.

Now he wants to determine the few people who will go to the sea. He Chenguang is more intelligent and very stable. It should be no problem to keep him on top.

In this way, He Chenguang and Qin Zhengyang stayed on top, and Qin Yuan brought Li Erniu and Wang Yanbing into the water. It was absolutely no problem to have the assistance of the two of them, and with Qin Yuan's blessing, the endurance of the two of them was also improved, the load aspect is definitely not a problem.

It's just that in order to relieve their pressure, each of them carried a hook lock, and the other four hooks were all placed on their side.

Li Erniu was stunned when he heard this, how could this be possible, the pressure on Qin Yuan was too heavy.

"Brother Qin, this is absolutely impossible. Why don't we carry two hooks each, so that if we share them equally, you'll have no problem."

"Talk to me again, boy, and I will do what I say. Besides, I have that strength myself, so I said this. If the two of you carry more than 100 kilograms, this is underwater, not on land."

Li Erniu frowned, but Qin Yuan was carrying too much weight. Wouldn't it be too dangerous underwater with a weight of more than two hundred kilograms?

But Qin Yuan has already made a decision, he knows his ability, so it must be no problem.

The next day James had already discussed it, and he came to give an answer, but the person in charge directly said that they could do what Qin Yuan said, after all, their abilities were there.

"Captain Qin, even though you said that, we still have to remind you that if something goes wrong, we can't take too much responsibility."

In fact, to put it bluntly, it was because they were afraid that something would happen to Qin Yuan and the others, and they had no way to explain to Yan Guo.

"Don't worry about this. I am an adult and a soldier. I will be responsible for our own team first. It is because of my responsibility that I made such a decision."

James nodded. Since he had already made up his mind, he didn't have much to say. In addition, he and the government army applied for more than 30 people.

So there should be no problem at present, and finally they decided to salvage directly in the afternoon, the sooner the better, after all, they don't know whether the pirates have received the news, anyway, solve it as soon as possible.

Qin Yuan and the others were wearing equipment on the deck, looking at the hook next to it, James was also a little tangled.

"Captain Qin, are you sure you have to carry four hooks alone? This is completely impossible, because your pressure will be different, and it will be too much for you underwater."

"I said, why don't you believe me so much? I said I can do it, and I can do it."

Qin Yuan stepped forward, touched the hook with his foot, and picked it up easily. It didn't feel heavy, and he put it in the backpack casually, with two backpacks hanging on the front and back.

Li Erniu doubted himself when he saw this, the hook weighed more than 50 kilograms, and when he picked it up just now, he still had some difficulty.

As expected of being their captain, every time it feels like they are on the hook.

Qin Yuan also carried an oxygen bottle on his back. He didn't need this thing himself, but he just put on a show in front of everyone. On the other hand, this oxygen bottle was also reserved for emergencies.

After all, they don't know what they will encounter when they go down. If there is insufficient oxygen, then this can of oxygen cylinder can give them two team members.

According to their previous calculations, it will take them more than 40 minutes to dive down. They carry an oxygen bottle on their backs, which can maintain the amount of oxygen for more than three hours.

It takes 80 minutes to go back and forth, but the water pressure under the water is different. The more they go down, the more oxygen they consume, so time is the biggest key.

Especially when placing the hooks, they have to exercise themselves and can only rely entirely on oxygen tanks, so the consumption of oxygen is also very large.

After getting ready, the surrounding soldiers also patrolled the submarine. They were mainly responsible for the surrounding safety, because the pirates didn't know when they would be dispatched.

Li Erniu put on his clothes, and jokingly said beside him: "It seems that the food in our team is so good, you can't tell it normally, but when you put on this diving suit, your stomach will come out."

"You know it too, kid, so I said it's better to replace me."

"Whoever we go down is not the same. Besides, your mission above is more important, so you have to protect our safety."

"Okay, don't talk too much, now get ready to go directly into the water."

In this way, under Qin Yuan's leadership, Li Erniu and Wang Yanbing followed him into the water one after another.

They hold an instrument in their hands, mainly to identify the direction of the submarine, and they need to dive all the way from here.

Qin Yuan's speed was very fast, he didn't use oxygen at all, he had already closed the oxygen valve, and he carried four 50 kg hooks on his back, still didn't say anything about it.

He turned his head and looked at Li Erniu. They were still behind, and he also slowed down. After all, the water pressure down here was different, so he had to come down slowly at first, and he had fully adapted to it.

Not long after they went down, the soldiers patrolling around discovered that several ships were rapidly approaching them, and the soldiers in front immediately issued a warning.

I didn't expect the news of those pirates to come so fast. They just went down, and these guys came directly. This is very obvious. They just waited for them to salvage them and **** them directly.

He Chenguang was ready to load the bullets, and these pirates came prepared. Their big ship also carried some small howitzers, and they immediately attacked them.

Moreover, there was an anti-aircraft gun on a large ship that followed, but the warships they sent in the country F team were not jealous, and the two sides immediately fought fiercely.

Cannon fire was flying everywhere, and He Chenguang and the others were closely observing the movement of the battlefield on the deck.

"Brother Chen, these guys are not good at fighting, why don't we let them fight, that would be a waste of shells."

"Don't act rashly. Our division of labor is different. They still have an advantage in numbers. Although their combat effectiveness is not good, suppression is no problem."

"That's right, listen to Chen Guang first. Now our main task is to ensure the safety of the captain and the others. Now that they have entered the water, we can only guard here."

At this moment, Qin Yuan also heard it underwater. Li Erniu and the others were completely isolated from the movement from above. After all, they felt the pressure of water pressure underwater and could not hear the sound at all.

This kind of situation can only show that there must be traitors in the above team, and the pirates have disclosed the news, otherwise they would not have received the news so quickly and launched an attack directly.

Qin Yuan also sped up the speed. Now that they have fully adapted, the three of them went underwater. Looking at the red dot that had been flashing at the target point, they were almost approaching the target.

After a few more minutes, Qin Yuan saw a huge monster appearing below. It was really the submarine that needed to be salvaged. Without hesitation, he went down first, because he wanted to fix the hook.

He took out the hooks in the front backpack, hung two of them first, and then swam to the side to install the other two hooks. After he finished installing four, Li Erniu and his side also completed it smoothly.

Seeing this scene, Li Erniu had to give a thumbs up in admiration. Their efficiency is completely different, and he felt that this time it was quite easy. The task was completed in this way, now they go up on it.

Qin Yuan checked again and found that there was no problem with the hook, so he led his team members up, and when they were halfway up, Qin Yuan noticed that someone had entered the water, it should be those pirates.

He looked around and saw a few figures in front of him, swimming towards them quickly.

These guys are also wearing diving equipment, and there are quite a few of them. At first, there were only a few people, but now there are more than a dozen.

Underwater, Qin Yuan rushed ahead of them because he couldn't communicate. Underwater, he had a relatively large advantage, and it was not a problem to deal with these people.

It's just another problem underwater, that is, his throwing knife will encounter certain resistance when used. It is not as efficient as on land, but it can still achieve a hit rate.

A pirate in front swam over quickly, holding a special underwater soft bullet gun in his hand.

Then he quickly shot at Qin Yuan and the others, and Qin Yuan threw the flying knife directly, and shot the pirate in the heart in an instant. After a burst of blood, the pirate kept rolling.

Chapter 1076: tricky spy submarine

Li Erniu and the others were stunned behind, before they could see clearly, Qin Yuan threw the knife, but fortunately Qin Yuan threw the knife in time, the pirate had a gun in his hand.

The pirates still had ropes on their backs, and it seemed that they wanted to hang on the hooks and pull them to their boats.

At this time, the pirates also fired. Their underwater guns were specially made. For a while, Li Erniu couldn't dodge his oxygen bottle and a gap was instantly shot out.

On the other side of the ship, He Chenguang and the others also noticed something strange. From the other side of the pirate ship, there were several pirates who were wearing equipment and looked like they were about to go into the water. There were also a few floating pirates in the water who were going down. latent.

He Chenguang felt bad when he saw this, so he shot directly at the pirates.

"All these guys even came to a dark place, fighting with us online, but they have already quietly sent people down in private!"

Qin Zhengyang was even more worried. After all, there were only three of Qin Yuan and the others underwater. These pirates did not know when they went down. Now they only saw seven or eight of them. I don't know how many people went down just now.

"Brother Chen, no, I'm going into the water now. I think Brother Qin and the others must be very dangerous. After all, there are only three people below them."

"You boy, don't make any more trouble. Get rid of the pirates on the top as soon as possible. Don't worry on the bottom. With Brother Qin here, there will be absolutely no problems."

"But look at the equipment they are holding. These are all underwater guns. They will definitely encounter danger below."

He Chenguang is actually a little tangled, but now he must ensure the final safety, he can only choose to trust Qin Yuan, and must not rush into the water, and going into the water now will only increase Qin Yuan's burden.

"Concentrate now, don't let those guys go down, and leave it to Brother Qin."

At the moment, the situation below them was not very good. Qin Yuan reacted quickly, and he quickly dealt with all the pirates who swam over.

The only bad thing was that Li Erniu's oxygen tank was damaged, his oxygen leaked out quickly, and the oxygen mask had leaked a little, which is not good in such a deep sea.

At this time, Qin Yuan directly handed over his oxygen tank to Li Erniu, because the pirates in front continued to come down again, and now he has to deal with the underwater pirates wholeheartedly.

It seems that he really hasn't been dispatched for a long time. These guys directly and openly challenged their majesty. They were scared of them before, and they would walk around when they heard the name of red blood cells.

Li Erniu looked at the oxygen cylinder on Qin Yuan's body and shook his head desperately. He definitely couldn't take it. In this deep water situation, the oxygen cylinder is equivalent to each other's life. How could he consume Qin Yuan's life? .

It's just a pity that he can't speak now, otherwise he would definitely refuse directly, but Qin Yuan didn't delay him too much, put the oxygen cylinder on him directly, and then swam towards the distance.

Being underwater is also a great challenge to eyesight, because of the fight just now, the whole seawater became turbid, and it was difficult for Li Erniu and the others to distinguish the direction for a while.

I can only vaguely see a few figures in front of me, but I can't see clearly the weapons used by the other party, as well as their equipment.

At this moment, He Chenguang kept looking at the time. It had been more than an hour for Qin Yuan and the others to go down, but there was still no result. He was really worried.

The pirates over there have been dealt with by them, but there are still a steady stream of pirates around, and the surrounding soldiers fight with them, and there are gunshots everywhere.

More than ten minutes passed like this, and suddenly a head popped out. With quick eyesight and quick hands, He Chenguang jumped into the sea and dragged people out. The first person who came out was Wang Yanbing.

They have to overcome the water pressure problem underwater, and they have to fight those pirates after being underwater for such a long time, so it takes a lot of energy.

Wang Yanbing's stamina and physical strength are also very good, but at the moment when he came up, he panted heavily, and then pointed to the water, He Chenguang immediately understood, and he immediately jumped down again.

After two minutes, Li Erniu was also pulled up by him, mainly because of the oxygen consumption underwater, so it was very exhausting.

But after another ten minutes, still did not see Qin Yuan, He Chenguang jumped into the bottom of the sea again, he dived to the limit in one go, the bottom was very cloudy, he didn't see anything.

Oxygen was not enough, so he followed up to take a breath. He went back and forth two or three times without finding Qin Yuan. He kept searching on the sea surface, and the team members beside him were also very anxious. Li Erniu couldn't believe it.

"It shouldn't be. Brother Qin has been following me since he finished dealing with a few pirates just now. It stands to reason that our speed is about the same. How could it be like this?"

"It's all my fault, because brother Qin gave me his oxygen cylinder, that's why it happened like this."

what! !

He Chenguang was very surprised when he heard the news. This is not their usual training ground, nor is it their sea area. In such a boundless sea area, without oxygen cylinders, it is unimaginable.

He still didn't give up, and Qin Zhengyang jumped down with the oxygen cylinder on his back. Just like that, the two of them searched the bottom of the sea one by one, but found nothing.

There were gunshots everywhere, but at the moment they couldn't care less, now they just wanted to find Qin Yuan.

At this moment, a pirate ship on the opposite side suddenly exploded, the entire hull tilted completely, and the pirates on the deck fell into the sea one after another. He Chenguang squinted his eyes and saw a familiar figure.

It was Qin Yuan who jumped off the deck just now. When did he go there?

Before everyone could react, he was very fast, and directly boarded another pirate ship, and directly eliminated all the pirates on board.

The surrounding soldiers also had the power to breathe, so everyone quickly surrounded them and wiped out the remaining pirates together.

James was completely stunned when he saw this scene, he didn't expect Qin Yuan to be so powerful! In such a wide sea, he is like a fish in water, and he is very fast.

You can go directly to the pirate ship and attack them directly, and greatly reduce their damage.

At this moment, Qin Yuan climbed onto the deck, shook the water off his head, and made an OK gesture.

"There is no problem with the submarine below. I will leave the rest of the pirates to you to solve. After all, I will give you a chance to show off."

James nodded again and again in agreement. His combat capability against the red blood cell team had once again been refreshed. Unexpectedly, relying on three people not only successfully completed the task, but also Qin Yuan overfulfilled.

He even came up to help them deal with the pirates on the outside, which shocked James.

The rest of the pirates were like defeated soldiers. They wanted to escape, but they were completely surrounded. At this moment, the pirates recognized that they were fighting with the red blood cell team just now.

The captured pirate leader was half-kneeling on the ground with his hands raised up. At this moment, he didn't even have the thought of resisting. If it was these government soldiers before, it would definitely be fine.

It's just that now that the red blood cell team is involved, they have no chance of escaping.

"I didn't expect that country F would send your team to do such a mission this time."

"What are you doing with these words, one day I will catch you all, and this is just the beginning."

After the remaining pirates were dealt with, James also began to arrange to salvage the submarine, and now the hooks are under control.

As the machine started, the submarine was slowly pulled up. When the submarine surfaced, everyone found that the submarine was much larger than the military submarines they usually saw.

And the equipment inside seems to be still working, but this has nothing to do with Qin Yuan and the others, after all, it is an internal matter of their country.

Generally speaking, their mission this time was also successfully completed. Qin Yuan received a system prompt just after the submarine came up.

"Ding! Congratulations to the host, complete the necessary tasks to kill 36 pirates, get 5000 merit points, successfully salvage the submarine and get a set of blueprints for anti-radar jamming equipment."

Generally speaking, the harvest this time is very good, and the merit points have also been blessed. After Qin Yuan went back, he found Zhang Meng and the others to inquire, and they did not have any abnormalities. information.

Zhang Meng even wondered whether Qin Yuan felt wrong, whether they had completely disappeared that mysterious person last time, and there was no one else behind him.

"I think it might be that you are too nervous. We have completely solved them before. It has been so long without any movement."

"This is impossible. According to the analysis given by my system before, all the data do not match."

Qin Yuan believes in his system very much, because judging from their current situation, there will never be something produced by an advanced system.

More importantly, the person who imitated and pretended to be He Chengguan before disappeared. Even though they killed many members of the organization before, although Qin Yuan didn't see the real face, he could feel that none of those people was the person before.

So Qin Yuan was even more sure that there were other forces behind them, and these guys just took the opportunity to escape.

For Zhang Meng's side, he can only explain a few words, let everyone pay attention to safety, and report to him in time if there is any situation, so that both parties should pay more attention.

After he came back, Gao Shiwei was hastily called to a meeting by the General Military Region, and met Qin Yuan just as he was leaving the house.

"Qin Yuan, let me tell you, you boy, be honest with me recently. It may take three days for me to go to the meeting this time."

"Captain Gao, look at what you said, am I the kind of troublesome person? It's just that you go too often this time, I remember you just went to a meeting last week."

"Is there any way to do it now? It's all caused by those spy submarines. Everyone is paying attention, and their marines have already dispatched warships to start salvage, but this can't solve the actual problem."

At this time, Qin Yuan suddenly said mysteriously: "Captain Gao, I can help you with this matter. I will go with you, because I know the solution."

"Stinky boy, don't beat around the bush, just tell me what you have, this time I went to the general military region for a meeting, it's not a joke, all of them are the big chiefs, don't make me any trouble."

This is what Qin Yuan wants, and maybe ordinary people can't decide. After all, what he wants to enter this time is the core research factory of military science and technology.

He has already inquired before that the manufacture of such anti-radar submarines or high-tech equipment is carried out in the 701 Military Factory.

Even Wang Qianjin couldn't make the decision. He was only in charge of their field artillery. He was fine in these aspects, but he couldn't do anything about it when it came to scientific and technological research. That's why Qin Yuan thought of going with Gao Shiwei.

Gao Shiwei is also very troubled by this matter at the moment, if this kid Qin Yuan really has a way, then he can be taken with him.

In this way, Qin Yuan followed Gao Shiwei to the general military region, and he kept explaining along the way, hoping that Qin Yuan would not cause him any trouble. After all, they are all big palms, not good explain.

Before entering the meeting room, Gao Shiwei frowned and said, "You brat, you won't tell me what's going on until now, you're so mysterious."

"Captain Gao, it's not that I don't tell you, but that it's not clear if I say it like this. You'll know later."

In this way, they entered the meeting room one after another. There were already some people in the meeting room, and those sitting in the row up were from the Marine Corps. This time even Jiang Xiaoyu and the others came, because they were in charge of salvage. .

They mainly came to report the specific work progress of the salvage. In addition to the warships, they also dispatched special salvage combat troops, but the number of submarines was too many, and they were hard to guard against every day.

The chiefs of several major military regions have already arrived at the scene. The meeting officially started, and the Marine Corps took the lead in reporting. The current situation is mainly to report on the spy submarine they salvaged.

In just three months, they salvaged sixteen spy submarines one after another. The number of spy submarines is very large, and they have been monitoring them all the time. After they are salvaged, they can only be destroyed in situ.

More importantly, these spy submarines have also begun to make changes. It was relatively easy to salvage before, but now there are mobile devices installed inside the spy submarines, which can be controlled remotely, which also increases the difficulty of salvage.

The head of the Eastern Military Region looked at their report, frowned and asked, "You have been salvaging, and I just want to know where these submarines entered from."

When it comes to the Marine Corps, people feel aggrieved, and they may think that they are not good at keeping an eye on it. In fact, the entire coastline is very wide. They also want to monitor it at any time, but they are hard to guard against.

Chapter 1077: want to join the seminar

According to their feedback, these spy submarines have undergone different changes in the past two months, which are quite different from the ones they salvaged before.

According to Jiang Xiaoyu and his team's inquiries, these submarines should be in two parts, that is to say, two different people are launching them.

At this time, a chief of staff below raised a question, "Your statement is a bit too far-fetched. Even if the submarine itself has changed, it may be that the person they launched has changed in another way."

"Because these are two different signs. We salvaged them later. This second type of submarine is completely different from the previous ones. It also has anti-reconnaissance and anti-radar features, which is difficult for us to catch."

The Marine Corps is also very troubled by this situation. The solution is to rent fishing boats from nearby villagers and use fishing boats to salvage, because if the warships are dispatched, it is easy for these spy submarines to detect other information.

Now everyone is holding a meeting to discuss the solution, because the source cannot be found, these submarines are still being launched continuously.

The Military Research Office of their Marine Corps also gave a plan, but it was really difficult to implement it.

It is to set up a large-scale radar interception network, which can prevent other submarines from entering, but it is very difficult to achieve such technology, basically it is difficult to achieve.

And according to their current research situation, it will take a long time to develop such an interception network.

A chief on the opposite side listened for a long time, didn't this result in nothing? He was a little impatient and slapped the table hard.

"What do you mean by this? After so long of salvage, there is no progress, and there is no way to solve it, so what's the point of opening this?"

Facing this doubt, Long Baichuan had no choice but to say, "The reason why we all hold this meeting is to find a way. It is impossible to throw all the blame on our side."

"Since your seminars are not good, send the experts from the General Military Region out."

"It's easy to say, why didn't you send it out? Three months ago, the research team of the General Military Region had already arrived at our side, and now it has no effect at all."

Gao Shiwei and the others really had nothing to do. After all, he represented his special brigade, so he could only give some specific opinions. For the salvage of the submarine, he said that he could send personnel.

"I can send personnel to salvage the submarine, but it's really not the way to salvage it like this. After all, the source has not been solved, and it will only continue to flow."

"That's why we came to discuss this matter today. Do you think anyone has come up with a way to get the best of both worlds?"

At this time, Qin Yuan stood up behind him, "Commanders, I have a solution, but I hope that the chiefs can fully trust me."

Long Baichuan took a closer look. Why did Qin Yuan come here? He didn't notice it just now, "You have a lot of ideas, but tell me, what kind of solution do you have?"

"The method I said is also very simple, that is, let me enter the seminar, and I can directly develop another anti-radar device, mainly for these spies, and submarines can completely intercept them."

Qin Yuan didn't either, he just said it out of hiding. When he said this, everyone around him was shocked. How is this possible? This kid is completely insane.

There was also a staff member of the seminar next to him, and that staff member frowned.

"Captain Qin, what do you mean by that? Do you think the threshold of our seminar is too low?"

After all, the members of their seminar have been researching for more than three months without any progress. Unexpectedly, Qin Yuan directly stood up and said that he could develop another device. Isn't this a slap in the face for them?

Although the old guy Gao Shiwei often scolded Qin Yuan and the others, he was also a calf protector.

"What are you guys talking about? We're just putting forward our opinions. Are you looking down on Qin Yuan? Don't you know who Qin Yuan is?"

"Of course I know this. After all, who doesn't know about the famous God of War? It's just that the God of War has to figure it out sometimes. Scientific research is not as simple as you said."

Qin Yuan frowned when he heard this. What does this guy mean? Doesn't it mean that they can't do it? And he feels that scientific research has nothing to do with himself, as long as it can be developed.

"Comrade, I just want to remind you that although I am the captain of the Special Operations Brigade, I also have my own research and development projects. At least I have modified a variety of firearms and special artillery. These things are easy for me."

"But those so-called thermal weapons are fundamentally different from scientific research like ours. You just modified the basics, but this one is completely the production of something from scratch, do you understand?"

What this guy said was really inappropriate. Long Baichuan from the Marine Corps couldn't stand it anymore. He knew Qin Yuan's ability, and he knew that Qin Yuan would not boast so easily.

"Guys, don't be so excited. Both parties calm down. Since Captain Qin has expressed his opinions, maybe he can really do it."

The researcher turned his head and looked at Long Baichuan strangely. What does this mean?

"Captain Long, I think you need to figure it out. He is just a captain of the Special Operations Brigade, and he has not gone through real academic research. Can he really be transformed?"

"Sometimes, there is no need to look down on people so much, Qin Yuan, he is not only the God of War, but he can create many possibilities."

The people around applauded when they heard it, especially Jiang Xiaoyu and the others. They had a close relationship with Qin Yuan before, so of course they were very supportive.

It's just that the chiefs next to him didn't speak. The chief of the Eastern Military Region looked at Qin Yuan, "What kind of tricks are you going to do? I know you can come up with something, but you have to be clear that this is scientific research Research is not weapon transformation."

"Chief, then I'll just say it straight. This time our high team brought me here. I didn't even tell him why I'm here. I hope to get everyone's approval. I want to enter the seminar and develop my own knowledge. something needed."

"You have a big tone, kid. Do you know what the minimum standard for seminars is? Even the minimum standard for our students is doctoral students."

The researcher couldn't help but refute, he absolutely wouldn't allow such a thing to happen, he felt that Qin Yuan's words like this were totally looking down on them and treating them as something, could any cat or dog enter their seminars? ?

"Comrade, don't be so anxious. I'm just expressing my opinion, and I generally don't speak big words. I only say what I can do."

"But you are completely fooling us. This is absolutely impossible. How could you do it?"

Qin Yuan sneered, it has been a long time since anyone said that about himself, it seems that he really has to show his hand, and this time is also a foundation.

Once its research and development is successfully won this time, he can enter a more confidential military factory and directly produce aircraft carriers. He now has two blueprints of aircraft carriers. These are rewards from the previous system and have not been used.

And he doesn't know what's going on, he vaguely feels that he should join the seminar, and it seems to have something to do with the mysterious person behind it, but this is just his guess, and the system currently doesn't give any hints.

For a while, heated discussions started at the meeting site. After all, it is not a trivial matter to join the seminar, but Qin Yuan said that he can develop something aimed at these spy submarines.

"It's fine for you kid to tell me no earlier. Is it necessary for me to say hello to their chief? Say it in front of so many people. If you kid can't figure it out later, we won't be able to get down."

Gao Shiwei's worry is not unreasonable, after all, Qin Yuan has never been in touch with such technological things.

He said it, but he was still a little worried about the actual implementation, so he said this.

"Don't worry, Team Gao, I will never embarrass you, and you know that I'm not the kind of person who speaks up easily."

"Although I said that, I'm curious, how did you do it? Did you master some formula, or what happened?"

The two spoke in a very low voice, but Long Baichuan still heard it, and he said with a smile:

"Captain Gao, I think you may have misunderstood Qin Yuan. Even if you have mastered the formula, it is very difficult to do such research. For our research team, I have spent every day in the laboratory. The first two are big."

Qin Yuan even patted his chest to assure him that he was fine. The reason why he did this was to prove himself in front of everyone.

Everyone was talking about it, but they didn't have an idea. After all, asking Qin Yuan to join the seminar directly seems to be against the rules, and his identity is also inappropriate.

Finally Qin Yuan stood up, looked at the crowd, and said loudly: "I know that everyone has various ideas now, but I still want to promise you this matter, since I said it, I will definitely do it."

The staff of the seminar stared at Qin Yuan coldly, did this kid eat a bear's heart and a leopard's guts? How dare you make such a guarantee.

"Let me tell you, our seminar is not easy to get in, even if you make such a guarantee, what's the point?"

"I'm not saying this because of a guarantee, but I really want to share everyone's worries. This matter has happened for more than three months, but it has not been resolved."

The staff of the seminar quit, he stood up directly, pointed at Qin Yuan and shouted: "I respected you a lot before, after all, your record is there, but what do you mean by that? Are you mocking our incompetence?"

"Hehe, I didn't mean that. It just depends on how you understand it. I just want to do my best to contribute to everyone."

This is what Qin Yuan said, and if everyone refuses, it's not good to say, so, the meeting unanimously decided to let Qin Yuan join the seminar, let's see how he is doing first.

But in the face of this situation, the staff of the seminar reacted very strongly, and he strongly disagreed with this view.

"Heads, the threshold for our seminars doesn't have to be so low, and you can't just stuff people into our seminars just to solve problems casually."

Qin Yuan looked at the person in front of him. This guy is completely ignorant of his words. He not only lowered himself by saying this, but also denounced those chiefs. How could he buy it? After all, the temper is very hot.

"That's enough. You, a small researcher, can't decide on this matter. This is the result of our general military region's discussion. Don't you have any dissatisfaction with this result?"

For a moment, the researcher was stunned. He was indeed a little excited, mainly because he felt that all this was too embarrassing. They had worked so hard to get into the seminar.

But Qin Yuan was directly assigned to the seminar with just a few words.

Up to now, he couldn't say anything more, he could only sit down silently with his head down, while Gao Shiwei next to him was a little nervous.

"Qin Yuan, you kid, don't let me lose the chain halfway. You didn't see that these bosses are all on your side now. If you really can't make any achievements, then you will be in trouble."

Qin Yuan smiled, this is what he wanted, he was very confident in himself, and just after the chief agreed, the system suddenly issued a notification tone.

"Ding! The host triggers a random mission Find out the real operator behind the spy submarine and get 30,000 merit points!"

Qin Yuan frowned slightly when he heard this, as expected, it seems that Jiang Xiaoyu's previous analysis was indeed correct, this is the second batch of spy submarines that appeared.

At present, it should be that the real submarine has not been touched, so the system has not given specific mission indicators. He doesn't know if the submarine is related to that mysterious person?

Recently, he didn't know if it was a demonic obstacle, or because he was too worried about the mysterious person behind him, no matter what he thought of, he always felt that it could be related.

This meeting can be regarded as over. Some people are happy and some are worried. The researcher who is more worried is that he wants to take Qin Yuan back this time.

His attitude is not very good, but it is still necessary to pay attention to Qin Yuan's identity and Gao Shiwei is also nearby.

"Captain Qin, please make some preparations, we will set off directly this afternoon."

"Yes, this is no problem. The efficiency of the work you asked is quite high. I thought it would be delayed for a few days. It seems that it would be better to leave this afternoon."

Chapter 1078: Completely angry!

Having said that, the researcher was still a little unhappy. He looked at Qin Yuan and said slowly: "Captain Qin, you should understand some disciplines. Our seminar is absolutely confidential, so I hope you will cooperate with us when the time comes." work."

At this time, Qin Yuan still didn't understand what he meant. Anyway, if he cooperated with the work, there would be no problem.

Gao Shiwei felt that, after all, this is the efficiency of the army. Since it is in the afternoon, it is better to go early and return early.

And it's good to be able to go back with Jiang Xiaoyu and the others, "By the way, it's impossible for you to give me a few months this time."

"Captain Gao, according to what you said, don't worry, I'll be back in a week or so."

"That's fine too. After all, after you leave, Xiaoyun is the only one in the brigade. I'm a little worried. He has to lead the team again, so it's a lot of work."

Qin Yuan nodded and said that he will definitely do it as soon as possible. Anyway, after the research and development is completed, he will return to the brigade without wasting time.

But chatting well here, the researchers next to him looked very unnatural, and he felt that Qin Yuan was completely mocking them.

And this guy's tone is too loud. It is absolutely impossible for a week. They have been developing it for more than three months, and there is no effect.

And they also have a research team from the General Military Region. This is absolutely impossible, and almost no one can do it, because this thing is completely a concept, and they can only develop it step by step.

In this way, in the afternoon, Qin Yuan and Jiang Xiaoyu came to the Marine Corps together. He is quite familiar with this place, after all, he has trained with them before.

Everyone was talking and laughing along the way, except for the researcher, who sat in the front without saying a word.

Sitting in the back, Zhang Chong couldn't help but said: "I don't know where I got used to this temper, isn't he just a researcher? We catch a lot in the brigade, what's so cool about it?"

Long Baichuan coughed slightly, signaling this guy not to talk nonsense, these researchers are quite tempered, and some of them are from the General Military Region.

Turning his head to look at the researcher next to him, he didn't say anything, but closed his eyes and rested on his seat.

In this way, everyone came to the Marine Corps together and took a taxi. Jiang Xiaoyu was very excited. After all, Qin Yuan hadn't been here for a long time.

In addition, they also helped train Qin Zhengyang before, so everyone wanted to get together.

"Brother Qin, don't be polite to us. Let you come to our Marine Corps to taste our Navy's food. How is it different from you?"

"Then what's the difference? Our special team's standard food is better than yours."

While several people were discussing, the researcher next to him said something coldly.

"I'm sorry, Captain Qin, as I said just now, you have to accept our work arrangement. Since you really want to invite us for a seminar, the chief also said before, let me arrange everything."

"That's definitely no problem. I really want to do it according to your arrangement, but it depends on what aspects you are referring to."

"Don't worry, since the chief has agreed, I won't say anything more, but you have to follow our rules and procedures. After all, you also know that the army is relatively strict, especially our seminars."

Before everyone could react, this researcher called the other two staff members and asked Qin Yuan to register.

This registration is too much, there are three big forms for everything, Jiang Xiaoyu looks at it from the side, it's a big headache, what the **** is this guy doing? To register, there is no registration in this way. Their previous registration is to show a military officer's card.

"No, comrade, what the **** are you doing? I've never seen one registered like this before. You're exaggerating. Besides, who doesn't know Qin Yuan?"

"I made it very clear just now that if he wants to come in, he must follow the rules and regulations of our seminar. Can anyone come in in our place?"

"It's too exaggerated for you to say this. Do I think you are targeting me? Let me tell you, you have to figure out your identity."

After all, he can catch up with the household registration survey. The following table is really a household registration survey, so don't exaggerate.

Originally, Qin Yuan wanted to have a fit, but after thinking about it, let it go. After all, he hasn't entered yet, so it's better not to make trouble.

"Forget it, let's not say a few words, just register, and we will follow other people's rules and procedures."

Jiang Xiaoyu and the others were aggrieved by the side, but Qin Yuan had said so, and they had no choice but to give up, thinking that this researcher was too much.

After registering three forms in this way, this is still not over, and he has to be searched and asked to hand in all the weapons on his body.

This can be regarded as human nature. After finishing all this, Jiang Xiaoyu wanted Qin Yuan to have dinner with them, but unexpectedly, he was rejected by the researcher.

"Everyone, I'm sorry, Captain Qin is about to accept our review, so you can't contact him either."

"What do you guys mean? Don't think that I don't understand how there are so many rules in your seminar. You are just targeting."

"I'm just acting in accordance with the rules and regulations. If you are not convinced, you can directly ask the chief above and see how they answer."

Qin Yuan could only grab Jiang Xiaoyu quickly and let them talk less, there will be plenty of time to get together later, and now let's focus on business.

In this way, Qin Yuan followed the staff of that seminar and got into a jeep. The place of the seminar was quite mysterious, even Qin Yuan had to wear a blindfold when getting in the car.

Qin Yuan didn't say anything along the way. Anyway, he should follow other people's rules and regulations first, even if they went to the Special Operations Brigade, they would be treated in the same way.

After shaking like this for more than two hours, it finally arrived. When Qin Yuan got out of the car, the researcher wanted to make a fool of him, so he deliberately didn't let anyone help Qin Yuan and let him get out of the car by himself.

But this little thing, how could Qin Yuan be so rare, he is like walking on the ground, this blindfold is a bit redundant for him, it is the same whether he wears it or not.

Just like that, he strode away without saying anything about the effect at all.

"How? Can't I take off the blindfold now? It's already at your place."

Seeing that Qin Yuan hadn't been dealt with, the staff member was a little reconciled, so he had to ask someone to take off his blindfold.

"Yes, this is our seminar. This place is also absolutely confidential. I hope you can cooperate with our work. After all, this is for everyone's benefit."

It is really possible to wear a high hat. After all, Qin Yuan is recognized by those chiefs. According to this situation, this process can already be skipped.

But this guy is just holding a chicken feather as an arrow, and he said like this, and no one else refuted it, so Qin Yuan went to the door and registered for the second time, and the registration this time was even more complicated.

The guards at the gate all knew Qin Yuan. After all, he was the God of War, so everyone knew him. However, this researcher still acted like a businessman, forcing him to register. Just like that, the registration took more than half an hour.

Qin Yuan was holding back his anger, which was a little too much. If the registrations just now, he didn't think it would work? But now it's starting all over again, and he is really angry.

The five documents have been filled out. At this time, the guards said that it is ok, but the researcher suddenly called out Qin Yuan.

"Wait a minute, although you have already registered on your side, we need to check these materials."

"What do you mean you need to verify, then I want to ask how long it will take, and what kind of verification method do you want?"

"Of course, we will go to your original troops, as well as the basic troops you filled in and the existing troops to investigate, including your hometown, and we will also visit."

Qin Yuan gasped, this guy is too much, how long does it take to register? Can't do it for a week.

"Then I want to ask, before you find out, what should I do now?"

"It's very simple. Now you can live directly in our camp, and we will arrange a special room for you."

This is actually a form of imprisonment in disguise. Qin Yuan came up angrily when he heard this, this guy was completely messing with himself.

He clenched his fist tightly, and hit the table in front of him with one punch, and the table became torn apart in an instant.

Shocked by this scene, he didn't expect Qin Yuan to make a move suddenly. At this moment, the researcher stuttered a little. How could he have seen such a scene?

"You... what are you going to do? Don't you know that this place is in our military research, do you want to play wild in this place?"

"Let me tell you, I was patient all the way, because I really wanted to make some contributions to us, and really get some results, but look at these things you have done."

Qin Yuan was really angry at the moment, he didn't know how many days it would take if he continued to delay like this, and this guy was endless.

The guards at the shop didn't dare to act rashly. After all, they were God of War-level characters. They alone were not enough to fight, and the matter had not been clarified yet. If a fight really broke out, it would be bad for everyone.

At this time, two jeeps drove up to the door, and the specifications of the cars were relatively high-end.

As soon as the researcher saw the vehicle, he ran over immediately, and looked like he wanted to flatter him.

At this time, the car window was rolled down, and an old soldier wearing sunglasses asked slowly, "What are you doing? Don't you know what is causing trouble here?"

"Deputy Commander Liu, you came just in time. This is the kid who doesn't obey our management at all."

The commander frowned slightly, who is this? So rampant, they dare to make trouble at the door of their seminar. After all, this is a military center, and their positions are absolutely confidential.

Qin Yuan was also a little dissatisfied when he heard this. It was all the rules and regulations created by these guys. He strode forward.

"You don't need to say these words to slander me. Today is an eye-opener for me. This is the so-called seminar. Don't worry, you don't want me to come here. I don't want to be here yet."

After Qin Yuan finished speaking, he was about to leave the army commander in the car, and directly called him out that the army commander was a little angry, and strode down, and the guards behind him also hurried forward.

"Wait, what do you mean kid? How did our seminar provoke you?"

"I originally wanted to do something for the army sincerely, and I also wanted to contribute my strength, but helpless, some villains have been blocking it."

Qin Yuan deliberately put the word villain very seriously, and the staff at the side looked a little unnatural because of the time.

"What's going on? Tell me clearly."

At this time, the staff next to him faltered and hawed for a long time, but didn't make it clear, and Qin Yuan didn't have the opportunity to directly tell how he came here, and what he experienced on the way.

At this time, when the army commander heard Qin Yuan's name, he was very excited for an instant, and he stepped forward and pulled Qin Yuan, "So it's you, boy. I said just now why you are so familiar? Misunderstanding, this is really all Misunderstand."

"Chief, I don't think there is any misunderstanding. After all, your people don't welcome me here. After all, I am now regarded as a spy by others, and I am a third-level investigation assistant."

Deputy Army Commander Liu was a little angry when he heard this, turned his head to look at the researcher and said, "Who gave you such great power, don't you know who he is? If you do it like this, it's like throwing all our faces into disrepute." It was thrown away."

"Chief... I I am also following the prescribed method, after all, we have done what we have stipulated before."

"Fart, I never stipulated this kind of thing. Besides, it is said to be flexible now. You are still doing these dead-headed things. I really don't know why the higher-ups would send someone like you."

The researcher who was talking about it for a while was ashamed, of course he knew he was wrong, after all he was deliberately making things difficult for Qin Yuan.

At this moment, Qin Yuan carefully looked at Deputy Commander Liu in front of him. He found it strange that the weather was obviously cloudy and the sun was not out, and he even put on sunglasses, which was quite pretending.

As if he had seen Qin Yuan's thoughts, the deputy commander did not hesitate, and directly took off his sunglasses. Only then did Qin Yuan realize that one of his eyeballs was fake.

If you look closely, you can see a scar stretching from the corner of the eye to the cheek, which still looks very miserable.

Deputy Commander Liu went instead, pointing to the scar and said: "I tell you, boy, I know you because of this scar, don't look at it, it was hit by fragments of the 856 howitzer, and the eyeball was scrapped, this one of mine. The eyes are also sacrificed."

Chapter 1079: half an hour

Qin Yuan frowned slightly when he heard this, what does this have to do with him?

"Hahaha, don't get me wrong, I mean it's because of this scar that I know you."

It turned out that Deputy Commander Liu had served as the head of the Chinese Corps back then, and it was at that time that he was a field commander and went to the training ground to check the distance of the shell, but was scratched by the shrapnel of that shell.

At that time, Qin Yuan happened to be in Wang Jinjin's group. He used his superb skills and made accurate judgments, which greatly reduced their damage.

Because shells like this are generally far away, they use telescopes to observe and then determine the distance.

Then, if the blasting range of the shell itself is damaged, it must be accurate to meters. This requires personnel to go up to measure, so accidents will happen.

Later, under Qin Yuan's guidance, especially when he changed the systems of those research teams at that time, they didn't need to send soldiers to take measurements at the training ground ahead.

Instead, he made accurate data directly on the computer. At that time, Qin Yuan didn't expect that it was just a small move. He mainly wanted to change it so that they didn't need to be so troublesome. Unexpectedly, it reduced their casualties.

"Although my eye is useless, you saved the other soldiers. Now we don't use that traditional method anymore."

"Chief, that's what happened. I was shocked. I thought we hurt you during our confrontation?"

"You brat, why didn't you say hello to me when you came here? I heard that a soldier from the Special Operations Brigade was coming to our seminar. At that time, I thought it was strange, but I didn't expect it to be you."

"Hey, it's mainly this time. I do have my own plan for these spy submarines. I just want to do some research here."

Deputy Commander Liu was very happy to hear this. He patted Qin Yuan on the shoulder and led him in. The researchers behind him were completely stunned.

"I really didn't expect it. I wanted to ask you kid to do research for us before. I didn't expect you to really have this ability. Walk around and come in directly."

Deputy Commander Liu had just walked in when he suddenly thought of something and turned his head to look at the researcher coldly.

"And you, I don't want this kind of thing to happen again, do you really not know who he is? Let me tell you, you almost delayed our big event."

The guard at the door was completely relieved when he saw this scene. Fortunately, he didn't do anything just now, otherwise he really wouldn't be able to make sense of it. After all, Deputy Commander Liu is relatively gentle and rarely loses his temper.

The researcher was a little embarrassed, so he could only follow behind disheveledly. Deputy Army Commander Liu was very enthusiastic and kept introducing the situation of their research association to Qin Yuan.

"You have just arrived, so don't be so anxious. You can stay with us for a few more days. Don't worry, it doesn't matter how long you stay."

"Chief, mainly I still want to develop it as soon as possible. After all, if a spy submarine stays in our waters for one more day, it is a threat."

"Yes, yes, you see, I didn't even think of this. This matter still needs to be dealt with as soon as possible. As long as the matter is settled, it doesn't matter how long you want to stay with us."

Qin Yuan is a favorite. After all, he has developed and modified weapons and blasting grenades before, so Deputy Commander Liu will definitely not miss this opportunity.

The staff member almost turned Qin Yuan away just now. He wanted to find love in the special brigade a long time ago, but thinking that they have special tasks after all, it would be unreasonable to clean them up by themselves.

Qin Yuan was also more active. In this way, under the leadership of Deputy Commander Liu, he came to their base laboratory without any hindrance.

After coming in, you need to change into work clothes first. The process here is relatively strict. After all, what they are doing is scientific experiment research, which is stricter than Wang Qianjin's military factory before.

"Qin Yuan, what surprise are you going to bring us this time? How long will it take to do the interception thing you mentioned just now if it is done according to your request?"

"If there are no accidents, I can finish it directly today."

Deputy Commander Liu clapped his hands and applauded, the sooner the better, he had personally seen Qin Yuan's strength before, and now he also wants to see how to do research.

Those staff members were also more cooperative. After all, the people brought by Deputy Army Commander Liu were not neglected, and Qin Yuan was assigned a research office alone.

After an associate professor heard about it, he rushed over, "Deputy Commander Liu, why are you here in person? If you need anything, just tell us."

"Don't make such a fuss, you can just do your own work, and it won't affect anything."

The associate professor was a little nervous. He hurriedly called a few staff members to assist Qin Yuan, but Qin Yuan refused him directly.

"If I do research, I like someone."

Deputy Commander Liu said beside him: "You heard me, go out quickly, from now on, never disturb Captain Qin, let him do research with peace of mind."

"Chief, the people I'm talking about include you. I like to do it quietly by myself."

At this moment, Deputy Commander Liu was a little embarrassed, but he also quickly smiled, "Oh, look at my brain, I've forgotten about it, don't worry, I will definitely not disturb you, I will go out now."

Deputy Commander Liu was turned away, and everyone was even more curious, who is here? It's too exaggerated to even reject Liu Fu's military factory.

The staff member at the meeting said in a low voice: "This kid probably came through the back door. He is the Qin Yuan War God of the special brigade."

"Why did God of War come to our side? Besides, our work does not interfere with them."

"Who can say for sure. After all, the leaders above have the final say. Anyway, we can just watch the show later. This kid is very crazy. He said that this matter can be resolved in a week. Isn't that a slap in the face for us? "

The associate professor had a cold face just now, and this kid can really speak, so that the leaders above will think of the staff of their seminars as idlers.

"Professor, don't worry, just relying on that kid, how could he research it? We have been breaking through for so long, and we have no clue at all."

"Of course I know this, but now I'm thinking that if he can't research it, how can I give him a bad name? Has he been so big since then, or did Deputy Commander Liu personally bring it?"

These few people were discussing in low voices outside. Deputy Commander Liu was a little anxious at the door. He couldn't see the situation inside clearly. At this moment, Qin Yuan was concentrating on manipulating the instrument.

Qin Yuan's system reward this time is a multifunctional anti-radar infrared device, which can intercept these spy submarines and anti-track them.

After more than half an hour like this, Qin Yuan walked out of the laboratory.

The staff behind hurried forward, most of them were watching the excitement, and the associate professor just said directly:

"Captain Qin, don't blame me for speaking harshly. After all, what we are doing is scientific research, which relies on mental activity. You can't hold on for half an hour. This is not like fighting and killing on the battlefield."

What he meant was that Qin Yuan was simple-minded and well-developed. Unexpectedly, Qin Yuan stretched out his hand directly, and there was a capsule-sized object lying in the palm of his hand.

Everyone felt very strange, such a small thing, his research or what kind of tricks did he do?

"This is what I call multifunctional anti-radar. Infrared equipment can completely intercept and track those spy submarines."

He had just finished speaking, and everyone around him burst into laughter. Everyone obviously didn't believe it. After all, such a small thing was thrown into the sea, and it disappeared completely. How could there be anti-tracking?

The associate professor took the capsule in his hand and looked at it. There was nothing unusual about it. It was impossible for such a small thing.

"Captain Qin, I didn't hit you. Don't say it's the sea, just throw this thing into the cup, and it will disappear in a while."

"It's hard for me to explain clearly to you. In this case, let's conduct experiments directly to see if I'm right."

The associate professor was very unconvinced, this kid pretended to be too big, and he wanted to use this kind of thing to fool them, it was simply simple-minded.

He would like to see how to expose him later. In this case, it is better to go directly to those spy submarines and see his so-called effect.

These spy submarines are now housed within the Marine Corps, where they are kept centrally.

Deputy Commander Liu was actually quite strange. He walked up to Qin Yuan and whispered in Qin Yuan's ear, "Qin Yuan, are you sure you're all right? Don't come down to the stage when the time comes, this little thing really has such a big effect."

"Chief, don't worry, this thing must be fine, anyway, isn't there a saying? It's a horse or a donkey that pulls it out."

"I'm not worried, won't you come down to the stage then? But don't worry, I will take care of everything."

Qin Yuan smiled, these people still don't have confidence in him, so let's wait and see the results.

In this way, they came to the laboratory where the spy submarines were stored. There were more than 30 large and small. These guys were really crazy and invested in such submarines in large quantities.

And there is another small spy torpedo, which can sink into the deep sea, and the degree of salvage is also very large.

Qin Yuan always felt that these things might have something to do with each other? They were ordered to salvage that submarine before, and now it is related to the submarine.

At this time, the system suddenly issued a notification sound, "Ding! The host triggers the mission process, and the progress of investigating the mysterious person behind the submarine is 5%!"

This sentence was reminded inexplicably, Qin Yuan couldn't figure it out for a while, he could only ask quickly: "System, what's going on? Is it related to the mysterious person behind it."

"To answer the host, I can't reveal too much at the moment, but I can only say that it is indeed related."

Qin Yuan narrowed his eyes when he heard this, and he looked at the spy submarines in front of him, and it was as expected as he guessed, no wonder he had a feeling that this guy finally appeared.

Now the most important thing is to do the experiment first, the staff can't wait, they put the spy submarine into the pool in front.

This is also an experiment they have done before. This pool is only filled with seawater in proportion, and it is calculated according to the density of seawater.

"Wait a minute, there is no problem with the test. After all, these spy submarines can no longer be activated. Why not just take me to the sea area over there, and then I will test it myself."

The associate professor next to him snorted coldly, "What tricks are you trying to do? You can't even test it, let alone go to sea. To be honest, do you want to escape?"

"I never wanted to escape, but this place is too small to test my things at all."

The associate professor just wanted to have a seizure, but he thought that Deputy Commander Liu was beside him, so he couldn't say anything more, so he could only agree to go to the place where the spy submarine was discovered.

Just like that, it didn't feel like a big deal for that associate professor to watch the excitement, and he called everyone in the Marine Corps. After all, it was a big deal. He wanted to see how this guy ended up. He wanted to give Qin Yuan a bad start, but he didn't. Thinking of Qin Yuan, he didn't panic at all.

In this place, the strength of his equipment could not be highlighted at all. In this way, everyone came to the sea together. This sea area is very wide. Long Baichuan also walked on the deck, and he looked at Qin Yuan.

"Qin Yuan, is the equipment you mentioned just now the thing in your hand? Is such a small thing really okay?"

"Dragon team, don't worry, I will let you experiment later, as long as its data is connected to the computer, we can see it clearly on the computer."

Qin Yuan is very confident about the things in the system, Just like that, he connected to the computer after some operations, and everyone was staring at the computer screen tightly. Qin Yuan looked around and threw the capsule directly.

Everyone shook their heads when they saw this scene. This is simply a sea of stones. In such a wide sea, if you drop this small capsule, you don't know where it will spread. It is completely dissolved in the sea water.

However, the screen started to light up in the next second, and the associate professor's eyes widened. He didn't expect this to be so incredible.

On that screen, it seemed that the first class of publications could not be distinguished at first, and then as the capsule covered the bottom, the clothes were gradually revealed, and those submarine radars were all pointed out in precise directions.

This is simply a complete precise positioning, which is much more accurate than what they detected before.

In just a few minutes, all the torpedoes and submarines have been completely exposed, which is simply incredible.

They needed to send their own submarines and radar sensors to search little by little, but they didn't expect that all the situation in this sea area had been figured out in a short time.

Chapter 1080: start tracking

Long Baichuan was completely dumbfounded, and he couldn't help asking: "What's going on here? How come there are so many submarines? We were salvaging every day before, so logically speaking, there shouldn't be so many."

"Because my equipment is going to be used for the entire sea area, and it is completely monitored."

Hearing this, I couldn't help but take a deep breath. What kind of concept is this? That is to say, everything is completely under his control.

That small capsule actually completely covered the entire sea area, including their hunting range.

The associate professor couldn't believe it at all. He ran forward and kept staring at the screen. There were red dots flashing on it. As the mouse moved, he clicked on one of the targets, and the data of that target would be analyzed.

This is simply unbelievable, and the researchers next to them are all talking, and they can't believe everything in front of them.

"The whole sea area, you are not kidding me, are you? How can this be absolutely impossible."

"I, Liu You, knew that you would say that. Now I just let you see the situation above and wait for me to go down and salvage."

After Qin Yuan finished speaking, he took off his clothes on the deck, and before he could finally react, he jumped into the sea water. Everyone was completely shocked when they saw this scene. Does this guy not bring any equipment? ?

Jiang Xiaoyu is very confident. He has witnessed before that Qin Yuan can swim under the sea for half an hour without any problem.

"Just wait, Brother Qin is absolutely fine. He was the first person I've ever seen diving before."

"But wouldn't this be too reckless? What if there is any danger going down?"

He was talking about Deputy Commander Liu, and he was very worried about problems. After all, Qin Yuan's strength lies there, and he is a rare talent.

"Deputy Commander Liu, don't worry. Besides, Brother Qin is not reckless. He has the strength. He doesn't need to wear equipment at all."

At this moment, Qin Yuan rushed directly to the position below. He could see it clearly underwater. Even without the equipment above, he knew the specific positions. After a while, he saw a spy torpedo .

He stepped forward, and the torpedo system issued a notification sound just after touching it, "Ding! Congratulations to the host for contacting the spy torpedo for reconnaissance produced by the advanced system."

However, it was produced by the advanced system. Hearing the system's prompt, he was sure it was the ghost of that mysterious person.

"System, can this be recycled?"

"The things that leave the factory in the system cannot be recycled, but this thing has no meaning and can be destroyed."

Since he couldn't recover it, Qin Yuan simply took him off. Everyone on the deck stared at the sea intently. After all, Qin Yuan had been down for more than five minutes.

According to the physical condition of most of them, five minutes is already a limit.

Even the associate professor was a little anxious. At this moment, a torpedo was thrown out of the water and hit the deck heavily. Everyone couldn't help but took a few steps back. Only then did they see clearly that Qin Yuan was also slowly climbed up.

When the associate professor saw the salvaged torpedo, he was completely stunned. It was simply unbelievable how he dived into the deep sea.

Seeing this scene, the soldiers of the Marine Corps applauded one after another. They are the real masters. They went directly to the deep sea without any equipment, and then salvaged the torpedo.

Qin Yuan shook the water from his hair, and then slowly said: "Now you can carry out large-scale fishing according to my location, and you can dispatch warships, because all their signals have been interfered by my interception system, So there won't be any problems."

Not only that, Qin Yuan walked to the computer, pointed to the coordinates on it and said, "This is an anti-reconnaissance system, which can determine where the submarines came from based on the trajectory of these submarines."

Long Baichuan was very excited when he heard this, and it was finally resolved. They had been holding their breath for several months, and now they could finally fight back.

"This time we must take these guys out of the pot, sending us time and time again, these spy submarines, I don't know how many messages have been tricked by them."

"Dragon team, don't worry, this time I will follow you all the way, these guys, I will also help you catch them all in one go."

The Marine Corps is celebrating. After all, the matter has been resolved. They have obtained such an interception system. Such a system is simply too heaven-defying, not only for precise positioning and salvage.

Moreover, it is also possible to counter-detect and locate the location where the submarine was dropped, which directly solves the source problem.

These researchers were completely stunned, especially the one who tried to stop Qin Yuan before. He didn't expect Qin Yuan to really do it, and he designed such a thing in just half an hour.

Now everyone started to act in batches, some of them began to salvage these submarines and torpedoes, and then Qin Yuan led Jiang Xiaoyu and the others to act together.

Those researchers at the moment, that associate professor didn't say a word, just silently doing what they were doing. This time, they were the ones who were slapped in the face, and they really felt ashamed.

In the end, he still walked over cheekily, "Captain Qin, I really want to know what kind of principle this is? Why can you be so precise?"

"This, this is scientific research. You may not be very clear about what I said to you. After all, you work in the office every day, which is different from those of us who go to the battlefield."

Qin Yuan took out what he said about himself before, refuted it, and went back to get an associate professor with a very bad face.

"But don't be discouraged. I have already made this thing. If you want to study it, you can think about it later. After all, my time is relatively limited."

Although this is very arrogant, what they are talking about is this fact. In addition, they have researched everything for them, so they can only do research based on what they have, and figure out the principle.

Deputy Army Commander Liu laughed beside him. Sure enough, he saw the right person. He knew that Qin Yuan had his own uniqueness.

At this moment, Qin Yuan and Jiang Xiaoyu are ready to set off. If this time it has something to do with the mysterious person behind him, Qin Yuan can't wait to verify it, maybe he can find the mysterious person.

Everyone followed the trail on Qin Yuan's equipment and came to a small island. Unexpectedly, it was very close to the sea area they were patrolling, and it could be said that it was only a few kilometers away.

"I really didn't expect that these guys are right under our noses. We were busy salvaging submarines and torpedoes before. We didn't expect them to be near us. No wonder they couldn't be salvaged."

"This time, thanks to Brother Qin's equipment, we got them all in one go."

Qin Yuan was very cautious. He stared intently at the small island in front of him. At present, there was no movement. He still felt a little strange. According to this situation, if they were really lurking on the small island, there should be someone. The guard is right.

"Everyone, pay attention to the situation inside the alert. There seems to be something wrong, mainly because it is too quiet."

Just like that, everyone nodded, their warship slowly arrived in the direction of the island, and was completely close, but still no one came out.

Until everyone went ashore completely, at that time, Deng Jiuguang pointed to the drag marks next to him and said: "Look here, they should be transporting submarines to this place, and there must be large submarines."

"It seems that we really found the right place, but this small island is very strange, why is it so quiet?"

As soon as Jiang Xiaoyu's words fell, Qin Yuan suddenly yelled and pushed him away, and then a shell fell directly on the place where they were standing just now, and a big hole of more than ten centimeters was blown out in the ground in an instant.

Unexpectedly, there were so many of these guys, and they directly fired small howitzers.

Everyone reacted quickly, and then took advantage of the nearby stones to cover up, "Brother Qin, have you seen the enemy?"

"There are ten o'clock directions and three o'clock directions. Don't show your heads yet. I'll go out and see the situation."

The main reason was that Qin Yuan was worried that there would be snipers, and that the howitzers on the opposite side still had no intention of stopping, and kept firing at them.

Qin Yuan turned over, dodged the shell attack, quickly concealed his figure by the dust raised by the shell, and rushed in.

Jiang Xiaoyu next to them, they really couldn't stand such a fierce attack, they could only keep backing up, and if they backed up again, they would retreat underwater.

At this moment, Qin Yuan finally saw clearly that the person who was manipulating the howitzer was a member of that mysterious organization, because they were all dressed in the same blue uniform.

The flying knife in Qin Yuan's hand was thrown out directly, and the man who had just prepared the shell was stabbed in the throat and fell backwards.

The people next to him reacted and quickly shot in Qin Yuan's direction. Their agility and coordination were very good, which can be regarded as the level of a special warfare team.

But Qin Yuan was faster than him, and the poker cards in his hand flew out like a goddess scattered flowers. He also quickly shot the poker cards, and combined with the assault gun in his hand, he immediately eliminated all the enemies in front of him. up.

Taking advantage of this gap, Jiang Xiaoyu and the others also rushed up quickly. Without the attack of howitzers, their pressure was relieved a lot.

Qin Yuan could only see seven or eight people at the moment, and quickly retreated towards the center of the island. He snorted coldly, and wanted to run even at this time.

Zhang Chong and the others quickly chased after them, and followed their direction. Qin Yuan rushed over first. He felt something was wrong just as he stepped on the ground.

"Wait, don't come here, there are landmines."

He didn't step on it, but the system issued an early warning, so he hurriedly reminded Jiang Xiaoyu and the others behind him.

Jiang Xiaoyu frowned and looked at the road ahead. He didn't know the specific situation of the mine at all. They didn't bring any mine-sweeping equipment.

At this moment, Zhang Chong couldn't wait any longer, so he took out two grenades from his waist and threw them to the opposite side.

"I don't know, what are you doing with the fire, just blow it up and it's over."

"Why are you such a tiger?"

Qin Yuan and the others quickly retreated, and there were bursts of explosions in an instant, and the fragments of the mines below were blown out directly.

This kind of demining method is also possible, but it lacks safety hazards. The most important thing is that many mines have not been detonated after being exploded in this way. Once they step on it, it will be finished and the formation will be completely destroyed.

Seeing that the front had been blown up into a mess, Jiang Xiaoyu was furious, Zhang Chong was really in a hurry.

"Tell me, you are an old player now, why do you still do these unreliable things?"

"Then what's the matter now? You didn't say it earlier just now."

Qin Yuan looked ahead, and then told them to stop arguing, and now find a way to get over.

"You follow me now."

Qin Yuan has systematic reminders, so he can avoid the landmines. As long as they keep up with his footsteps, there will be no problem. Everyone also believes in Qin Yuan very much, so they followed his footsteps and walked through the landmines.

After walking out, everyone breathed a sigh of relief. At this time, those people had completely disappeared, and some buildings could be vaguely seen in front of them, so they rushed up quickly.

This time it was still Qin Yuan who took the lead. When he walked into this building, he didn't find anything unusual. He was about to wave his hand to let Jiang Xiaoyu and the others in, but suddenly he felt dizzy.

The system also kept sending out reminders, trying to keep Qin Yuan awake, but it was useless at all. He shook his head, just picked up the throwing knife in his hand, and then fell down heavily.

Although he fell down, Qin Yuan was completely awake. He actually wanted to know what this mysterious man was going to do, and at that moment just now, he was indeed affected, but it was only a few seconds. Already fully awake.

As Qin Yuan fell down, the outside door closed with a click, Jiang Xiaoyu and the others were very anxious outside. Qin Yuan was fine when he went in, why did the door close immediately.

At this moment, there was a sound of footsteps coming from inside, first a few people came to check on Qin Yuan's situation.

"Boss, he passed out, this guy is really a **** freak."

"He can't be killed by a howitzer and he can't handle a landmine. He is completely crazy."

At this time, there was another hoarse male voice, which Qin Yuan was very familiar with. The masked man also had this voice, and their voices were all specially processed.

"What do you know? A bunch of trash, he is my most successful experiment."

Just when the man was approaching, Qin Yuan suddenly jumped up from the ground, and then threw the throwing knife in his hand.

What Qin Yuan didn't expect was that the man was equally agile, and he dodged the flying knife directly, only to be stabbed by a subordinate next to him.

The few people next to them were completely stunned. They didn't expect that they would be able to wake up in this state, which is simply incredible.
