

Special Soldier 110

Chapter 110: Scalp tingling

Xiao Hei was full of excitement. He just wanted to run towards his companion, but at this time, the old cat heard the click sound just now and did not disappear, his face suddenly changed, and he shouted:

"Get down!"

But when I heard the old cat's words, the people around me were all taken aback, isn't it all right now? Why get down.

But before they had time to question, they suddenly heard a terrifying sound coming from around!

Click!

Boom boom boom!

This is on the surrounding tree trunks, in the soil, several mines directly exploded!

Flame shrapnel!

steel ball!

Glass slag!

These things are like raindrops, directly hitting these people.

It's just that the rain drops are with a powerful lethality. The bodies of these people, like they are breaking dance, can't stop shaking!

When finally fell to the ground, it was already a sieve!

also had a quick response, without any hesitation, and went straight down, naturally avoiding the disaster!

It's just that when they carefully climbed up from the ground and looked at the corpses of those hapless companions, the despair in their hearts was about to overflow!

And the little black just now was even worse. There was a mine under his feet, and he was blown directly into the tree, leaving only half of his ass!

"Mother Thunder!"

At this time, the old cat who got up from the ground said in a daze, this time the attack was really unexpected, and they were already half dead!

There are also some people who have been seriously injured, and they are constantly wailing. The screams make people feel hairy!

"Haha, boss, we are finished, we are really finished, sure enough all those rumors are true, Yan Country is indeed a forbidden place for us people, we can't go back!"

At this time, a stick soldier yelled directly, and then he walked directly into the forest like the little black just now!

And the old cat saw this situation, but he raised his hand with a shot and broke the stick!

At this time, seeing the eyes of the little brothers around him full of fear and doubt, the old cat explained:

"In this situation, if he wants to move again, it will bring unpredictable danger to others and kill us all."

Hearing this, the boys around nodded, and Xiao Hei's lessons for the past are right in front of him. Just now, they had a quick response and good luck. Of course they didn't want to do it again!

It's just that even so, they are vigilant in their hearts. Although they may not have their lives out of this jungle of landmines, can people around them take advantage of it?

Now that the number of people is no longer an advantage, it has become a disadvantage. After all, no one knows the consequences of a small move by someone.

Even no one knows, whose heart will completely collapse in the next second!

The one who is dead now is this stick!

Who is the next person to die?

"Don't worry, we take your time and we will be able to go out."

At this time, the old cat wiped the cold sweat from his forehead, soothed the players' emotions, and then led them to move on.

At this time, on the other side, the Wolf Squadron, which had already changed its equipment and was finishing up, heard the continuous gunshots and explosions, and there was a hint of surprise in its eyes.

"It's like the sound of a landmine detonating. Did they enter the minefield?"

Hearing this, Long Xiaoyun's face suddenly sank. In such a night, if he enters a minefield, it is a very dangerous thing.

"Send an unmanned reconnaissance plane over to take a look!"

At this time, Long Xiaoyun gave a command to a teammate, and soon a small drone was able to fly, but it didn't take long for the remote control drone personnel to say with an ugly face:

"Captain, the graphite powder in the air has not been completely dispersed yet, and the drone cannot fly over."

After hearing this, Long Xiaoyun's face became more gloomy, and then he whispered:

"Get ready, let's go and take a look."

At this time, Long Xiaoyun's heart could not stop worrying about Qin Yuan. They just contacted Qin Yuan, but they couldn't get in touch.

But Long Xiaoyun had a hunch in his heart that this mine explosion might have something to do with Qin Yuan.

"set off!"

Long Xiaoyun gave an order and directly led a few members of the Wolf Squadron to rush out.

After all, the place they are going to is a minefield, and crowding is not an advantage!

"Qin Yuan, Qin Yuan, you have to live well!"

At this time, Long Xiaoyun said in his heart, and then suddenly pulled down the night vision device and ran forward!

When Long Xiaoyun took the people from the Wolf Squadron to the explosion site, looking at the horror in front of him, it made Long Xiaoyun directly open his eyes, and it also completely shocked the people in the Wolf Squadron!

"My mother, is this a bit too scary?"

At this time, Banzhu looked at the corpses that were blown to pieces, and couldn't help swallowing!

At this time, Shao Bing squatted down directly and inspected the corpses. From these corpses, he took out a piece of iron with crumbs, took a closer look at the number on it, and said with an ugly face:

"This is an old-fashioned mine jumping. Depending on the model, it has a history of 20 years. This place is not a former minefield. Why are there mines?"

And Leng Feng glanced around, was careful to find a mine shell that was thrown away.

When they saw this mine, the people in the Wolf Warriors team suddenly became nervous, but Leng Feng waved his hand and said to everyone:

"Don't worry, everyone, this mine is fake!"

Time is running out. Although Qin Yuan has a lot of raw materials, it is impossible to bury all the mines.

And those mines before, partly because it has been too long, became completely unusable.

So Qin Yuan directly removed the useless mines and combined them into new mines!

and those mines were demolished, there is no waste, Qin Yuan directly made them into fake mines that are easy to find!

Hearing such words, everyone was immediately relieved, but Leng Feng's expression was extremely weird and ugly.

Long Xiaoyun also slowly discovered that something was wrong, and directly asked these cold fronts:

"You mean, all the landmines here are second-placed booby mines by others, right?"

"Yes, these mines were not only placed twice, but were also dug out by others from previous minefields!"

As a sniper, Leng Feng has naturally done some research on the placement of geography, but even so, he can't think of how Qin Yuan dug out all the mines alone! !

And looking at the appearance of the corpses around, Qin Yuan not only re-installed these mines, but even modified them!

Looking at the corpses on the ground, the people of the Wolf Warriors team, only felt a cool breeze blowing, a little scalp numb!
