

## Special Soldier 1141

### Chapter 1141: Wells confession

Wells instantly sensed something was wrong, because only he knew that their actions were controlled by Qin Yuan.

He was very worried, Qin Yuanming had promised him that he would not act impulsively, why did he suddenly attack their team members? If this is the case, it will be difficult for him to explain when the masked man finds out.

The team members next to them were still trying to contact other team members. After the contact failed, they planned to go to a meeting point together to see what was going on.

Wells was very nervous along the way. He kept observing the surrounding environment, and was careful that Qin Yuan would appear. Although this is the Yan Kingdom, they can't do anything casually, but it is not ruled out that there will be accidents. After all, Qin Yuan Yuan is very powerful.

When they arrived at the meeting point, it was already completely dark, and they vaguely saw three people at the entrance of the alley.

These three people were also unclear about the disappearance of the team members, and they couldn't be contacted for some reason. They were all operating in two groups, but now those people suddenly lost contact.

Everyone gathered together, and one of the small captains among them seemed to have already mentioned everyone, and now there are still four short.

"Well, let me report to my husband first. After all, this is a foreign country. This is also the first time we made a mistake during the execution of the mission. The mission has not even started. How can someone disappear?"

Everyone agrees, but Wells hastened to stop it. Now it is impossible to let the masked man know the news so early. This is not good for him. If he investigates carefully, only his team members know about this matter, and it is impossible to happen. Such a coincidence, the team members disappeared before the action.

"You guys wait a moment. I have a suggestion. I don't think it's better to report it. Maybe there are some special circumstances that make the four of them lose contact temporarily."

"What do you mean? If something goes wrong, we won't report it, and we won't be able to bear the responsibility when the time comes when the husband blames it."

When several people said this, they couldn't help shivering. The punishment within their organization was horrific. If people were locked in a water prison, they could be tortured in the dark.

"I didn't mean to stop you from reporting, but you think about it, there is a problem before the mission has even started, what if Mr. thinks there is something wrong with us and pulls us all back to multiplication investigation?"

Over time, everyone's opinions diverged, and some agreed with Wells' statement. After all, the masked man was indeed terrifying.

Just when they were hesitating, a black figure suddenly appeared behind them, and another man with a system instantly noticed his ability, which was quick hearing.

"Who!"

As soon as the words fell, Wells could only smell a \*\*\*\*\* smell in the darkness. Subconsciously, he turned around and wanted to run towards the depths of the alley. After all, the people next to him were well-trained, and immediately formed a formation .

A pair of powerful hands suddenly grabbed his shoulders and pushed him under the side streetlight.

It was also the distance from turning his head, he saw it clearly, he didn't expect that it was Qin Yuan, this guy was too courageous to attack them here.

Before the two could say anything, Qin Yuan blinked at him, and then kicked him into the alley.

Then there was a sound of fighting. Wells couldn't see clearly in the dark, but slowly, he saw a blood moon seeping towards him.

They didn't know that these people were well-trained internally. They didn't expect that under Qin Yuan's hands, he would be like killing chickens, one at a time.

Only a few minutes passed, and the outside was completely quiet. Wells came out tremblingly, looking at the corpse on the ground, his face became completely terrified.

"You're crazy, you killed them all, do you know what that means to me?"

"Don't worry, I won't put you in trouble, it's just these people, they want to do something to my daughter, as long as anyone who dares to make up my daughter's mind, it will be a dead end!"

Wells didn't dare to say anything more. He did hide some news from Qin Yuan, because they made up their minds and planned to forcibly enter the barracks after gathering tonight, grab the child, collect blood, and retreat directly.

The main reason is that four people are missing now. They are worried that things will be exposed, so they gathered together and planned to make a final fight. Their task is to collect blood. If they can't collect blood, the masked man will not let them go. So just give it a go.

At this moment, Qin Yuan walked to the car on the side of the road, took down some tools, "I will deal with the corpses of these people, you clean up the ground, don't leave any traces, and then come to No. 67, Corner Lane to find me. "

After Qing Yuan finished saying this, he silently went over to chop up the corpse. Wells was completely stunned. He regretted what he said just now. In case Qin Yuan shot at him directly, he would have no chance to resist at all. .

Now he can only obey Qin Yuan silently and start to clean up the blood on the ground. These dozen people were completely killed by Qin Yuan within a few minutes. This guy's ability is really terrifying.

Qin Yuan put the body on the car and got off, and said again, "You'd better not play tricks on me, I will arrange the rest, remember the location I said."

Wells nodded again and again, how dare he resist now, seeing the back of Qin Yuan's car leaving, Wells was completely relieved, the oppression just now made him dare not even raise his head.

He smiled helplessly, not knowing whether his choice was right or wrong, he really jumped into another cycle like this.

After cleaning up this side, he didn't dare to delay at all. The main problem is that he is restless now. They already have the organization's chip on them. This chip is to monitor them. The scene just now Could it have been monitored?

But now he has no choice but to be worried all the time. When he came to the place Qin Yuan mentioned, he found that it was a small tavern, very quiet, and there were not many customers downstairs.

As soon as he entered, he saw Qin Yuan wearing a hat and standing on the second floor, greeting him with a smile on his face, it was impossible to tell that he had killed more than a dozen people just now.

He followed Qin Yuan into the private room on the second floor. The sound insulation here is very good, and the sound of music outside is completely inaudible.

But he still didn't dare to relax, without saying a word, Qin Yuan stood up, poured him a glass of wine, and placed it in front of him.

"Relax, I know what you're worried about, but it's okay, our communication is fine now."

Wells pointed to his head with a horrified expression. He wouldn't have forgotten that there was a chip in his head, right?

"Hahaha, so you are worried about this, don't worry, after my system has been upgraded, there is a function that can be interfered. My system has been doing magnetic field interference around, and you will not receive the news."

Wells was a little dubious, how could it be possible? The things produced within their organization will never go wrong, and how could it be disturbed?

He didn't know if Qin Yuan lied to him, looked up at him and asked: "How can I believe what you said, if you lied to me, then I can't go back at all, and you just now!"

He originally wanted to say that Qin Yuan killed all those people, but he was very vigilant and didn't dare to say more, so he opened his mouth.

"You have to believe that I have this ability, and I don't need to lie to you. Besides, if there are any problems, you think you can still live until now. Didn't you say that they have mastered the system?"

It seems to mean that, if there is really a problem, then they can't hold it for such a long time.

Knowing that he was not being monitored, Wells breathed a sigh of relief, "But even if we were not being monitored, you killed everyone and left me alone, you know what they will think, when the time comes I Can't get rid of the relationship."

"Don't worry, I will take care of these things, and you just need to stay here honestly, I will guarantee your safety, and then contact that guy now."

"What! Are you crazy? Let me contact him now, what should I say? I said that everyone was killed and only I was alive. Do you think he will believe it?"

Qin Yuan smiled, "Because you are an immortal, your ability can allow you to be reborn infinitely without dying, so how could he not believe it?"

Hearing this sentence, Wells was completely angry. He couldn't care so much, and stood up directly, because Qin Yuan didn't care about his life and death at all. Although he wouldn't die, he didn't know how much he would suffer. Tortured, he might be imprisoned directly by the masked man.

"You didn't think about me at all. Do you know what I'll face when I go back? Although my body won't die, they can take back everything about me at any time."

He almost roared to say this, but Qin Yuan didn't care, and sat on the sofa with his legs crossed.

"Your words are indeed good, but you want me to care about your premise, at least be honest with me. You haven't explained many things to me clearly, including your actions this time. You have been dishonest to me first. !"

Wells was completely stunned when he heard this. He looked at Qin Yuan in disbelief. Did this guy know their plan long ago? He absolutely did not disclose their actions to Qin Yuan tonight, why he would know, someone else must have told Qin Yuan.

"You! How on earth do you know?"

"This matter is not important. If I give you a chance, I just want to know other information about that old guy. Tell me everything you know. Remember, only I can save you!"

What Qin Yuan said was very clear. Hearing this, Wells slowly backed away. He really had no way out now. If Qin Yuan sent him back like this, the masked man would never let him go.

But looking at Qin Yuan's meaning, he is very confident. Does he have other solutions?

After struggling for a long time, Wells sighed deeply, and finally said a piece of news, "I really don't know the specific situation of the organization, but I only know that there is a miner base in the United States. Miners, but actually a major base of the organization."

"You know I'm not interested in these, I just want to know where the old guy is."

"I really don't know where he is, but he often goes to that miner's base, and there are many of our core figures in it. The place where we were given orders before was sent from there."

After saying all this, Wells completely slumped on the ground. He didn't know whether it was right or wrong, but he had already said it, and he had no room to retreat.

Originally, he kept these things for the last, intending to save his own life, because as the secrets were revealed little by little, his status would definitely not be guaranteed.

Qin Yuan laughed loudly when he heard this, and then clapped his hands, "Very good, what I need is your attitude, remember that you'd better tell the truth about the situation in the future, otherwise I won't guarantee that I can do anything. "

After he finished speaking, he walked under the table next to him and lifted the tablecloth, only to see four unconscious people \*\*\*\* inside.

When Wells saw it, he was completely stunned. These were the team members who lost contact with them before. They were not killed by Qin Yuan, but were hidden by Qin Yuan.

"This! What's going on here?"

"Of course this is the way to save you. Remember, you only need to have a good play with me later, and you don't need to worry about anything else. This is my reward for you!"

Wells admired the man in front of him more and more. He was calm and decisive in everything he did, and he had his own plan. He didn't dare to say anything more, but silently cooperated with Qin Yuan's actions. Now he just wanted to survive.

Qin Yuan patted him on the shoulder and asked him to help take the people out. They came out through the back door. There was a car parked at the entrance of the alley.

The two moved the four people up together, and then Qin Yuan drove them all the way to the suburbs.

After coming out, Qin Yuan took out a rope, tied Wells up, and told him his plan. Now, among these few people, he would choose a scapegoat.

And as long as he cooperates well, this play will do. Wells nodded to show that he understood, and just like that, he also lay down among those few people.

Anyway, these people are not good people. To say that they are innocent is really innocent, but what they have done can be said to kill them thousands of times.

Including Wells in front of him, Qin Yuan never thought of letting go of the drugs that he co-produced before. I don't know how many people were killed. Although he was forced, he didn't do anything. The change is only for myself.

Qin Yuan grabbed a person casually, and then walked aside. He watched Wells make a silent movement, and just slightly snapped his fingers to release the shield on them.

Chapter 1142: coordinated exercise

The shield was lifted, and the man also woke up. He looked at the person in front of him in a daze, with a look of surprise on his face, but he couldn't make any sound from his mouth.

Because at the moment Qin Yuan had a pair of big hands directly on his throat, he could only look at Ren Yuan with a look of horror.

Qin Yuan let go of his hand slowly, just controlling him with a charming aura, as long as he doesn't intrude and grasp his information, such a charm is not a problem.

The few people who fell on the ground also woke up. They found that their hands and feet were tied up, and they all looked at Qingyuan in horror.

Wells had to be said to be a playwright. After being yelled at by a few people next to him, he pretended to wake up in a daze.

According to the angles of the few of them, they could only see Qin Yuan chatting with that team member, but couldn't hear what they were saying.

At this time, Qin Yuan suddenly patted the team member on the shoulder, and the two laughed, as if they had reached some kind of agreement.

Seeing this situation, the team members who were \*\*\*\* immediately said viciously: "It looks like that guy betrayed us, he leaked all our information, that's why we were arrested."

Wells quickly pretended to be surprised and said, "What's going on? Why are some of us here? What about the other team members?"

"It's not clear yet, but we can use this opportunity to get away quickly."

Of course Wells knew what happened, but now he has to try his best to remove the suspicion from himself.

"Let's run away like this, what if we are caught by him? That guy is very strong."

Wells said this on purpose to attract the attention of several other people. Sure enough, one of the team members looked Wells up and down, "If I remember correctly, your ability is immortality, but you can't die. That's right, then you might as well protect us."

These few people were really fooled, and now their surveillance system has been fully activated, so they can speak without fear.

Wells pretended to be angry and said: "You are too selfish to do this? Although I will not die, but let me alone attract his attention, how is this possible? Then who will save me?"

"That's better than all of us dying here. Besides, you won't die. You can just run out quietly at that time. Now you can cover us and it's decided like this."

The other two looked at it and nodded in agreement. Wells could only resist on the surface, but his mentality was about to fade away, and everything was going according to their plan.

At this time, Qin Yuan walked over and walked towards Wells first, "I'll keep it, you just want to know some other clues, but there is no need for this now, you have to remember, you want to kill my daughter, you want to touch me Family, this is what happens."

He grabbed Wells, and taking this opportunity, Wells directly turned Qin Yuan over, and the two of them wrestled together. Seeing this, the other three quickly ran outside.

Those three people ran out quickly regardless of everything. Qin Yuan couldn't help but find it funny seeing Wells who was so cooperative in acting. Why didn't he realize that this guy's acting talent is so strong.

"Enough is enough, it's almost enough, you'd better wait until night before running out."

Unexpectedly, Wells shook his head and pointed to his nose, "No! You have to punch me a few more times. Although I can't die, I won't say I'm not injured. You have to beat me seriously. ."

Qin Yuan smiled, he happened to have no place to vent his worries, after all, this guy had never told the truth before, he punched him directly on the bridge of the nose, and Wells was so painful that tears came out.

The bridge of the nose must be broken, and this is not the end, Qin Yuan kicked him directly on the calf with a kick.

Although the pain was severe, Wells didn't dare to vent his anger, so he could only bear it stiffly. Qin Yuan only thought it was funny, this guy was totally doing it to himself.

Qin Yuan would also like to thank this guy for the information he provided. He will definitely go to the miner's base. Since there are so many important people, he will destroy that place first.

And now she is sure, as long as 23's memory recovers, he can find the real body of the masked man and kill that guy directly. The place where that guy appeared should be with the mastermind behind the scenes.

On the other side, the masked man saw the team members who had escaped all the way back, and he became even more angry, and asked them to go out to perform the mission. Not to mention that the mission was not successful, this time, out of so many people, only three came back.

The masked man also directly retrieved their chip records and began to monitor them repeatedly. There was indeed no problem with them, and the last few people couldn't explain how they were tied there.

Wells ran back with a limp in the end, and his injuries looked very serious. I have to say that this trick was really good, at least the masked man believed it.

But now he can't touch the miner base, Wells is still useful now, there is no need to expose him, and later he will come up with a plan to kill two birds with one stone.

This time, Qin Yuan handled the matter relatively smoothly. The safety of his daughter can be guaranteed, and all problems were completely resolved in three days.

Later, we will wait for the specific situation of 23. After Qin Yuan returned to the brigade, he received another notice that they will conduct a military exercise assessment in two months.

And this time they are under the command of the Southwest Military Region, and they need to cooperate with the Southwest Military Region.

Qin Yuan was a little surprised when he heard the news. Such a big exercise is usually notified in advance. Why didn't he know it at all, and now he only knows it is a month away.

Li Erniu smiled wryly on the horizontal bar, "Brother Qin has to say that you have been too busy recently, the notice has come down long ago, and you have been in the scene team all the time, Lao Gao asked us to tell you, but you have no time at all, we didn't say anything."

But this notice is really not important. Qin Yuan never paid attention to the exercise or something. Anyway, he can play according to his normal strength. It's just that they usually take the lead. No, he didn't expect it to be a cooperative battle this time.

This idea is quite novel. They are special forces, and they usually fight independently. Why did they become a cooperative operation this time?

He Chenguang explained from the side: "It seems that this is a new tactic developed by the Military Office. They want to try it and see if some of our special forces can act together with the brigade."

Speaking of this, it is understandable. After all, they are a unit, not a collective of individuals. If they can drive the actions of the entire military region and improve the survival rate of the entire military region, this is what they need to consider.

Qin Yuan carefully looked at the documents on the table. This time they belonged to the Blue Army and the defenders. They wanted to unite with the Southwest Military Region and stick to Height 321.

As for the main attacker in the eastern theater, there is basically no problem in this way, but Qin Zhengyang asked a little angrily from the side:

"Brother Qin, I just don't understand. They still have an air force base. If we fight in the air, will we be at a disadvantage?"

"What's the disadvantage? Nothing is absolutely absolute. War can happen at any time. It's impossible to predict what the enemy has. We can only defend as much as possible, understand?"

Qin Yuan felt that this battle was very interesting, and judging from this idea, it was very likely that An Ran proposed it.

There is still a month of preparation time, and in a few days they will go to the Southwest Military Region to run in with everyone. After all, this time they are no longer the leading force, but cooperating.

This time they set off with Long Xiaoyun's Wolf Warriors squad, and Gao Shiwei set off with these two squads.

When we set off, Gao Shiwei couldn't help explaining, "Let me explain clearly to you first, figure out my position, this time we will cooperate with the city to go to other people's military area. Don't be preconceived, we are guests after all, understand?"

Everyone knows this. The commander-in-chief of the Southwest Military Region is Gao Shiwei's former squad leader, so Gao Shiwei has always respected him very much. It is indeed the first time in history that he can cooperate with them this time.

Qin Yuan said with a smile: "Captain Gao, don't worry, you don't understand when I ask you, it's absolutely fine to keep a low profile."

"What I want to be wary of is that you are the one who is telling me now, you kid, you know how to keep a low profile, even dogs can climb trees!"

Qin Yuan spread his hands helplessly, "There's nothing I can do about it. I originally wanted to keep a low profile, but my strength doesn't allow it. After all, there are so many followers."

Although this was also a joke, which caused everyone to laugh, Gao Shiwei still said seriously: "Don't be too complacent, the troops of their military region have done well in the past two years. I heard that there is another A unique set of tactics."

This Long Xiaoyun is a little clearer. When she was transferred there to teach, she discovered that their combat quality in all aspects has gradually developed towards their special warfare brigade, and the various military strengths have become more and more powerful. improve more and more.

It can be said that this time they are completely on the road, and the terrain on the Southwest Military Region is completely mountainous and the terrain is very wide. This kind of terrain is very convenient for tanks and chariots, but it is also more convenient for the bombing of the air force brigade on the Red Army side. .

So even though there is still a month to go, they have to hurry up and get familiar with the battlefield as soon as possible.

The main thing is to prevent air power. Although they are backhanding this time, according to Qin Yuan's character, he will not honestly backhand.

Gao Shiwei talked low-key, but he acted more high-key than anyone else. Originally, they could go there by car. Most of the southwestern region is high mountains, so it would take more time to drive.

This guy simply transferred the helicopter directly, and everyone quickly descended from the helicopter. At this moment, many people's attention was attracted.

The commander-in-chief of the Southwest Military Region didn't care, and looked at them with a smile, while the secretary next to him frowned slightly.

"Commander, these guys are too arrogant. They called us earlier to tell us that they would keep a low profile, but they ended up holding a press conference. They came to us."

"Hahaha, it's okay, if he's not arrogant, he won't be called Gao Shiwei anymore, this old boy still hasn't changed."

"But it's too bad to have such an impact. Let others look at us like this, it seems that we lose face."

"Remember, we have to cooperate in our actions. Hurry up and discard your thoughts. It's best not to bring me into the team. People have the ability, so they have a big temper. I have always agreed with this truth."

The secretary didn't dare to say anything more, the commander seemed to be very protective of them.

And I have to say that their operation has indeed attracted a lot of attention. Some soldiers nearby have already heard of the prestige of the red blood cell team, especially Qin Yuan, the \*\*\*\*\* of war.

After seeing it today, everyone is talking about it, but there are indeed some who are not convinced. Although their red blood cell team has a great reputation in recent years, they are not vegetarians.

After all, we are all young people, and there will be some who are not convinced. The commander of the tank company on the side was directing the training, but when he saw this scene, he pouted.

"This special brigade is rich, unlike our tanks and chariots, which are usually reluctant to use."

"Company commander, don't even think about what kind of place it is. People say that you can train a pig if you send it in."

It can be regarded as a good wave of ridicule, saying that they are putting on airs, and the soldiers next to them all laughed.

But this was heard by Qin Yuan. Although he was far away, his hearing could not be deceiving. Qin Yuan stared closely at the company commander in the crowd.

He originally wanted to go over and talk about it, but he remembered Gao Shiwei's explanation before, he just came here, it can be regarded as a face for others, and he didn't want to cause trouble. The commander-in-chief also walked down, Gao Shiwei stepped forward with a smile, the two of them were talking about the past, and Qin Yuan and the others stood by.

Qin Zhengyang felt uncomfortable in the eyes of those around him, and felt that looking at them was like looking at monkeys.

Qin Zhengyang just wanted to complain, but Qin Yuan said: "Remember, keep our rules, it's best not to talk nonsense, so as not to be seen by others as a joke."

Originally, Qin Yuan was managing his own soldiers, but the company commander couldn't help laughing when he heard this.

"Oh, it's really a great official authority who just came here and started to give us a blow. I said you brats also stand up for me, don't be looked down upon by others."

Qin Yuan frowned, does this mean it's about to start? Sure enough, these troops have not been here for a long time, have they forgotten their identity?

The two sides began to compete secretly, seemingly standing in a simple military posture, but neither of them moved.

Chapter 1143: Give enough face

The They participated in the training this time, and the terrain of the exercise was mountainous, and it was also very wide. For tanks like theirs, they had the greatest advantage.

So this time, the task of their tank company is also more important. During the entire attack, they are responsible for the main offensive task, and they can take the initiative to attack and cover for teammates.

So it's normal to be a little frivolous, plus they are two different arms, they have never talked about tanks and chariots, although they have heard of Qin Yuan's name before, but now they really see Qin Yuan and the others were somewhat unconvinced.

The two teams are now secretly competing, and the two leaders next to them are just watching the show, Gao Shiwei casually smiled and said: "Look at these young people, I didn't let them disband, they won't disband."

The commander-in-chief of the Southwest Military Region felt a little uncomfortable when he heard this. The old boy was still leading his own soldiers before, but now he is breaking ground on Tai Sui?

"My soldiers are the same, it's just that you suddenly came to our place, can you adapt?"

It seems that the two are greeting each other, but they are actually competing secretly. After all, they are all bringing their own soldiers now, and they want the soldiers to win back.

"The old chief saw what you said. No matter what, you are also my old chief. I think it shouldn't be like this at the beginning. I will let them disband now. These boys just don't know the heights of heaven and earth."

The commander next to him was a little unhappy when he heard this. What did this guy mean? Are you looking down on your own soldiers?

"You kid, you'd better not move around. Let me tell you, if you stand like this today, I want to see who can't do it? Don't make sarcastic remarks over there."

When Gao Shiwei said this, he showed a sly smile, which happened to be his plan. He thought so at first, and their old chief had always been competitive all his life.

But now his pawns can't be underestimated by others. Besides, he is very confident in his pawns. If he wants to compare, he should do a good comparison, and give them a blow from the basics.

The soldiers around were all talking about it. After all, this was just the beginning. They still had cooperation in the future, and now they began to compete with each other. However, such a contest was normal. No matter what kind of contest they were, they were still on the same side.

The temperature today has reached 30°C, the scorching sun scorched the ground, and the soldiers watching the excitement gradually dispersed. Everyone started their own training, but the two teams remained motionless.

They have persisted for more than two hours now, the sweat on Qin Zhengyang's back dripped down his clothes, but everyone still remained motionless.

Gao Shiwei and the others have already arrived at the office, and they can see the team below from that angle. The commander-in-chief saw Gao Shiwei staring at the team outside the window, so he couldn't help but look at him and said:

"You old boy, are you not confident about your illness? They usually stand guard for longer than this, and they don't know the result yet. Come and play chess with me first."

Gao Shiwei smiled. He wasn't worried that his team would not be able to hold on. No matter what, he had to give others a face. Don't just come and make trouble, and they need to cooperate later.

However, this specific measure can only be determined by Qin Yuan. Qin Yuan stood motionless in a military posture without the slightest pressure.

He didn't feel any fatigue, and another three hours passed like this, and they had persisted in the sun for more than five hours.

The soldiers of the tank company couldn't hold on any longer, and the commander of the third company couldn't help but feel a little guilty. After all, in his impression, these special forces, they were all going to perform some special tasks. How could this basic war Can you stand in a stalemate with them for so long?

Afterwards, everyone was playing a game, and when it was time for dinner, the two of them were still competing.

Several soldiers on the side of the tank company couldn't take it anymore and fell down on the spot, but this didn't affect them at all. The third company commander looked at the red blood cells that were still holding on.

Until the evening, the people on the side of the tank company finally couldn't hold on any longer. You must know that the physique of the red blood cell team had been strengthened by Qin Yuan, so this kind of training was no problem at all.

What they exercised was endurance and perseverance. In the end, even San Lianchang's legs began to tremble, and finally he couldn't hold on anymore. He sat down on the ground and his legs couldn't help shaking.

Seeing this scene, Qin Yuan felt that the time was almost up, and began to wink at Li Erniu, and they also slowly began to pretend to fall down.

In this way, from the perspective of outsiders, it feels that the time of the two teams is about the same, with only a difference of one or two minutes.

The commander-in-chief didn't say anything when he saw this scene, after all, there was nothing wrong with it for just two or three minutes.

"Hahaha, it seems that my soldiers can still be compared with your soldiers. You charge forward in the front line, and we are not vegetarians in the back. We will do a good job of security at any time."

Gao Shiwei also hurriedly said with a smile beside him: "The old chief's words are good. Besides, we are still a cooperative relationship, and we all need to cooperate in the future. There is no need to make it so rigid."

"However, I did see a wonderful scene today. Although there was no fighting, this persistence of endurance further reflects that the stars of our soldiers are good. Yes, inform the cafeteria to give these boys extra meals."

From morning to now, they were indeed hungry. The reason why most of the tank companies did not persist was that they were in a state of hunger for a long time.

As for Qin Yuan and the others, they had done the hunger training for countless times, so they got used to it, and this time it was a step down for them.

Qin Yuan stepped forward and pulled up the third company commander who had fallen to the ground. His legs were completely numb and cramped constantly, and he was willing to massage his legs for him.

"Third Company Commander, your soldiers are all excellent. It seems that we are all on par. I also hope that in the future cooperation, we can show our greatest ability."

The third company commander felt ashamed when he heard this, he couldn't help but lower his head, "My brothers don't need to be so polite, it's our fault, you just came here, you shouldn't be like this, forget it, let's go, take you to the cafeteria, Let's have a good meal."

It has to be said that Qin Yuan handles these matters with ease, without hurting the other party's face, and they have made enough progress on their side, and will not make others think that their special forces team is weak.

After a brief meal in the cafeteria, Qin Yuan took the members of the red blood cell team back first. At this time, the commander of the third company sat in the cafeteria with a depressed expression on his face. The soldier next to him was unclear, so he limped forward and said:

"Company commander, you are not in a good mood. In fact, I think we have tried our best today. Don't you see that they just persisted for a minute or two longer than us?"

"Company commander, I don't think it's necessary. We all look the same. We are the same as the special forces. Our usual training has not fallen behind."

But the third company commander shook his head with a wry smile, "You don't know, they gave it to us on purpose, just to save us from embarrassing us so much."

The soldiers next to them were very surprised when they heard this. How is this possible? Everyone has persisted for so long. Isn't their special operations team human? Won't you be tired?

"You didn't notice that although they also fell down, you noticed that when they came in, there was wind under their feet, and they didn't feel tired at all. According to my guess, they would be fine if they persisted for three or four hours. ."

what! Several soldiers were very shocked when they heard this. They stood up and saw that they had gone far away. Everyone in the red blood cell team maintained their formation and walked very neatly without being affected at all.

On the other hand, several soldiers on their side have already been sent to the infirmary. They persisted, and now their legs are still numb.

The third company commander looked at Qin Yuan's back, and felt that this person was too smart, not only in terms of tactics, there were many rumors about him before, although it was just a simple military posture competition, but he could also see his strength Quality.

In contrast, they were a bit stingy, after all, they just came to their team, and they gave them a bad blow as soon as they came.

In this state, they are really majestic enough. If you really want to press them down, you can definitely stand for a few more hours.

At dawn the next day, everyone started to get up, ready to go to the position where they were for the first reconnaissance, and they were going to start sorting out the battle targets.

The tank company of the third company commander is the strongest tank team in their regiment, and their regiment is also the main offensive body.

With their tanks and artillery suppression, not only can they suppress the Red Army rushing up, but they can also support them in the rear.

The former third company commander couldn't wait to show himself and recommend his team, but he didn't expect that when everyone arrived at the battleground the next morning, he didn't say a word and began to back down silently.

When everyone was assigning tasks, the third company commander hurriedly stood up and said: "Don't worry about us, I think our capabilities still need to be improved. We can use their special warfare team as a foundation first."

Their leader was a little puzzled when he heard this. This guy took the wrong medicine. He was so active before, but now he gave up the initiative to others. Besides, Qin Yuan and the others are just a special operations team. There are only a few people. Possibly as the main attacker?

"Your company must be the main attacker in the current situation. Although Qin Yuan and the others are strong, they are only a small team and do not have an advantage in numbers."

In addition, according to their traditional thinking, special operations teams like the red blood cell team generally perform secret missions and operate independently. If they really want to combine with a large force, it is still relatively difficult.

As for the commander-in-chief, Qin Yuan and the others have been assigned to the rear position, mainly to let them make a surprise attack and directly kill the Red Army's command post.

Judging from the tasks they are currently assigned, Qin Yuan and the others have no room to participate in at least the first half of the game. They just stay behind and wait until the Red Army is almost exhausted. They go in from the rear and directly find the Red Army's command post.

Gao Shiwei listened to their analysis silently, and did not speak the whole time. Anyway, they came to cooperate this time.

Commander Zhao next to him spoke impassionedly. He felt that his battle plan was absolutely fine. The main attacking team in the front was very strong, with heavy fire suppression, and there was an assault team in the back, and then the red blood cell team.

Looking at Gao Shiwei who was silent, he also asked politely: "Captain Gao, why don't you see if you have any guidance? After all, everyone is here today to discuss."

"If this is the case, I can say a few words. My team can not only be used as a sneak attack, but also can enter the battlefield with you and become the complete dominant side."

Several combat staff officers around were very surprised when they heard this, did they hear correctly? There are only seven people in the red blood cell team, so how do they allocate them?

"Captain Gao, are you right? They are just a team, and this kind of distribution can't be done at all. It's impossible for us to send a seven-member team."

"Don't worry, what I mean is that my team can be as strong as a company."

Commander Zhao next to him was furious when he heard this. This guy's words are too arrogant. Even if he is from the Special Operations Brigade, there are only a few people, so let's make jokes on his own.

"Captain Gao, I respect you very much. I know that you are a special operations team and you are also fighting on the front line, but although this is an exercise, I don't want you to take it as a joke."

"I never took it as a joke, but I was a little dissatisfied with your combat plan at the beginning. Your words like this did not reflect our advantages at all. You said heavy fire suppression, so how to prevent their air force attack?"

Speaking of this, Commander Zhao was stunned. He really forgot, yes, there is an air brigade in the eastern theater.

They still have to find a way to do a good job of air defense now. After their missiles hit, their assault troops will not be able to exert themselves. Even if they have tanks and chariots, they will not be able to resist such fierce artillery fire at all.

Head Zhao frowned, "But we don't have any ground anti-missile equipment at all now. We really have no way to prevent their air force. We can only disperse the team completely."

Gao Shiwei smiled disdainfully when he heard this, it seems that they still lack some practical experience in dealing with air power!

"This is absolutely impossible. If you completely disperse the team, wouldn't you just let the people from the south take advantage of it? The team is too scattered, and they can rush up in an instant. The terrain this time is not conducive to defense."

"Are you talking about what to do? This will not work, and that will not work."

Chapter 1144: sudden attack

The Gao Shiwei glanced at it contemptuously, and then slowly said: "That's because you have nothing to do, but it's a pity that we agreed this time, just to cooperate with you, and I can't take too much dominance, since If you want to say it like that, I can't help it."

"What do you guys mean? You objected to the opinions I put forward before, and now I want you to talk about your opinions, and you are pushing back and forth here. I think you know it clearly, but you don't know how to arrange it."

"I don't know, but if I'm not worth it, you don't do what I say. I just said very clearly that my red blood cell team can be used as a company's strength."

Everyone felt that this was impossible. No matter how the red blood cell team was distributed, there were only seven people in total, and it was impossible to achieve the strength of a regiment. The disparity in strength was too great.

If they are forced to be on the main offensive side, it is very likely that a gap will be successfully opened in this area, allowing the Red Army to take the opportunity.

Gao Shiwei couldn't say too much this time, after all, they really only came to play support this time, and everything had to be arranged according to others.

It's just that he couldn't help it. If he followed the battle plan mentioned by Commander Zhao just now, the entire army might be wiped out, and he couldn't afford to lose face by then.

As long as their air support comes to contact the bombing position, once they are disrupted, especially the soldiers of his assault company, they will not be able to work hard at all, and they will only wait for the life of the captured.

This kind of tactics was absolutely no problem in the past, but now they have to face a powerful air force, and their air force is not vegetarian.

It's just a pity that Commander Zhao is so arrogant and arrogant, and this time he is indeed the commander-in-chief, so Gao Shiwei can't overdo it.

Commander Zhao didn't say much, but instead studied other plans nearby. What she urgently wanted to do now was to keep the command post, and then placed the third company, which was the main attack, on the other side of the high ground. Can be temporarily used as air defense.

It is not impossible to use the air power to attack them, but if they do this, they will wholeheartedly find a way to deal with the Red Army's air power, and there is no way to arm the first side.

Gao Shiwei has rich combat experience. He has experienced not only large and small drills, but also actual combat. At first glance, there is no problem with such tactics, but the weak link is his commando.

Similarly, Gao Shiwei also directly pointed out the problem. Qin Yuan watched silently from the sidelines, and Commander Zhao was out of temper. It seemed that no matter what strategy he proposed, he would be gossiped by Gao Shiwei.

"I said, do you think I'm unhappy, and deliberately find fault here, and you have said what I propose, so I don't see you talking about it."

"Regimental Commander Zhao, please calm down. Our team Gao didn't mean that. He said this just for everyone's consideration. We should minimize the loss as much as possible. Everyone wants to win."

Hearing what Qin Yuan said, Commander Zhao snorted coldly, then pointed to the map and said, "Did you see it? I will ambush our two assault brigades from the valleys on both sides, and my The first company and the second company are the leading parties, absolutely no problem, so how many people can't resist their attack?"

Gao Shiwei smiled, since he thinks there is no problem in this aspect, then do as he said, anyway, he just said it casually.

After the meeting, Qin Yuan watched Gao Shiwei swaying with his hands behind his back as he planned to go to the command post, "Captain Gao, this is not in line with your style. If it was normal, you would have raised your opinion a long time ago. It is obvious that their formation is now There are still many loopholes, should we just look at it like this?"

"You brat, you can't see it yet, so why don't you say it?"

The two looked at each other and smiled, and they both understood what the other was thinking. First of all, this is not their dominant battlefield. If they said something, it would definitely arouse the other's dissatisfaction. In addition, they said everything this time, and the commander-in-chief was Commander Zhao and the others.

Anyway, this battle is doomed. No matter how bad the result is, Qin Yuan will become their last force. They have fought such a battle before. Winning more with less is no longer an attempt. Since they do not listen to persuasion , in the end we can only rely on them.

In this way, everyone began to follow the plan, training red blood cells repeatedly, and the group was arranged at the end of the team. They had nothing to do and could only watch others train like this.

Head Zhao's secretary brought them a map, but it only roughly marked the possible location of the Red Army command post, and asked them to search within this range.

Head Zhao's secretary had originally brought a map, but just after arriving, he turned around and saw Qin Yuan's red blood cell team lying on the ground, basking in the sun, very leisurely, and it was almost like the soldiers in front who were training hard to familiarize themselves with the terrain. In stark contrast.

He coughed slightly, and Qin Yuan, who was lying on the ground, was not moved at all, but Qin Zhengyang, who was beside him, stood up.

"Hello, what's the matter?"

The secretary was very speechless. As the captain of a special operations brigade, he brought his team members here so leisurely.

But I can't say much, so I can only hand over the map to Qin Zhengyang, "This is the order of our regiment commander, you should see clearly first, then your task is to find the command post of the red side, they are very cunning, this is We probably figured out the location."

Originally, it was quite normal for the secretary to finish this sentence, but when he was about to leave, he turned around and added, "However, according to this state, our regiment commander's battle plan is fine, and it is very likely that you all take turns. It's over before we get to the battlefield."

Qin Yuan, who had been closing his eyes just now, suddenly said, "Hahaha, that's a good relationship. It just so happens that we will have a soy sauce fight. After all, it's been a long time since we had soy sauce."

The secretary frowned slightly. This really was a Dou who couldn't be helped up. He wanted to stimulate it, but they didn't resist at all.

After handing over the map to him, he walked out directly. He didn't know how Gao Shiwei saw his soldiers. Lying on the chair next to him, basking in the sun with his legs up.

The secretary felt speechless for a moment. It seemed that they were really the same. Could it be that all special operations teams were like this?

In fact, the main reason is that Qin Yuan's training is much better than theirs, and they have already gotten used to it. Even if they relax now, there is no problem. In addition, they can't go to the Red Army's position now.

So during this period of time, when everyone was working hard for training, Qin Yuan's red blood cell team became the most idle people.

Besides basking in the sun every day when it was too boring, I even went fishing, and even joined the ranks of the cooking class.

The main reason is that Qin Yuan can't understand the taste of their cooking fish, so he might as well do it himself. This five-star technique is not bragging.

There are three days left, and it will be the day of the real exercise. Commander Zhao's soldiers have not let up for a moment, and they are training desperately every day. They are familiar with the formation and start to distribute the formation.

Qin Yuan saw that these soldiers were training intensively every day, so he just made a suggestion. After all, there are only three days left, so it is best to let them rest for two days.

However, it was strongly opposed by Commander Zhao. They were not vegetarians in the war zone, and they hadn't rested yet. How could they rest? It is necessary to train non-stop and maintain a high alert state at all times.

Since this is the case, Qin Yuan has nothing to say. Anyway, they don't seem to have much effect in this team, and the training can't get in touch with them.

Time passed quickly, and there were still two days before the exercise began. Qin Yuan and the others were lying behind to fight the landlord. As for the map, it was useless to Qin Yuan. He memorized it at a glance, and they marked Those locations are uncertain, but the specific command post of the Red Army should be seen in person on the ground.

Li Erniu looked at the soldiers who were still changing formations and sprinting in the distance and shook his head, "Brother Qin, you said that these people train so hard every day without any rest time, it is really too exaggerated. "

"Anyway, I have raised my opinion before. Such a powerful training will only consume their physical energy. In the end, there are only a few days left. It is better to take a good rest and bring out the best state on the battlefield."

At this moment, Qin Yuan suddenly heard a slight movement, a very low roar.

"Not good, everyone lie down quickly, everyone first hides in the air-raid shelter."

Because at this time they were fully equipped with security equipment, they did not expect the Red Army to act in advance, but yes, everyone just gave an approximate time, this means that the exercise should be closer to the war, and the war will not say how accurate it is. A few minutes.

So such a sudden attack was also normal, I was willing to rush forward to inform Commander Zhao and the others, but in the end everyone was training, and no one listened to him at all.

When the third company commander saw Qin Yuan running over, he looked at Qin Yuan with admiration, and quickly stepped forward and asked, "Captain Qin, what's the matter?"

"Third Company Commander, it's too late to explain, the enemy has already attacked, quickly take your soldiers into the air-raid shelter, now take care of the formation, and quickly hide."

The third company commander heard this and looked up at the sky. There was no movement, and there were scouts in front of them, so they didn't receive any news. How could this be possible?

"Captain Qin, I think you're overwhelmed. We still have radar equipment here, and the radar hasn't even detected it. How could you hear this? Stop joking."

Qin Yuan sighed helplessly, why did he not listen to persuasion? She pulled the third company commander and wanted to take him away. At this moment, the third company commander also heard the roar, and the entire camp began to be on guard.

Fortunately, these soldiers had done drills in advance. Although they faced the enemy's sudden attack, they quickly entered the prepared fortifications in an orderly manner. However, the enemy's attack came too suddenly, and soon the planes attacked above.

Thankfully, the third company commander was torn apart by Qin Yuan, otherwise the cannonballs would have fallen on the position where they were standing just now, and their company would be over before it even started.

I didn't expect the opponent to fight so suddenly, and the third company commander was indignant, why didn't they follow the rules?

"Third Company Commander, the exercise is meant to simulate a war, and it may happen at any time. Your regiment commander may come to command you soon. I'm going back to my place too. Be careful."

After Qin Yuan finished speaking, he turned over and returned to the rear while avoiding the artillery fire outside.

But the third company commander's heart could not be calm for a long time. He didn't know how Qin Yuan did it. The radar hadn't found it yet, but he was the first to discover it. It really saved them a lot of losses.

After a while, Commander Zhao also began to command. According to their previous action plan, the Red Army had already started to sprint. In front was the Air Force Brigade, which covered the Red Army in the rear, and they pressed up densely.

In this situation, Qin Yuan and the others are just watching the show. They can't do anything right now. According to the previous battle plan, they have to wait for both sides to have almost the same consumption before taking action.

The leaders at the top originally wanted to see if a special operations team like the red blood cells could work together with the large forces, but under their plan, they became the last unique operations team.

But there is no way to do this, and according to their plan, it is really too difficult, and I don't know how long they can last.

He Chenguang was lying on the hillside, looking at the situation ahead with a telescope, "My dear, this is too exaggerated, the Red Army is so fierce, it has already broken through the first line of defense on the left."

"Don't worry, what can't be broken is the hole they deliberately opened. This is what Captain Zhao did on purpose, just watch."

Sure enough, not long after, the Red Army that had just rushed in was completely surrounded by the first and second companies of Commander Zhao.

This regiment leader Zhao did have two skills, but in some respects, his experience was still insufficient. Although they had just wiped out a small part of the Red Army, the Red Army started a fierce attack from another place.

The representatives of the Red Army are not vegetarian either. They also have their own formations, which are a kind of hierarchical attack, and they also mix heavy weapons among them to attack the front positions.

Under the attack of heavy weapons and assault teams, they retreated quickly and then used aerial harassment.

The fight was really fierce. In an instant, the first line of defense set up by the Blue Army was completely broken. Under the suppression of those heavy firepower, Commander Zhao had no choice but to mobilize some tanks and chariots. to suppress.

Because it was a sudden attack at night, according to the previous plan, the third company should have been on the high ground on the other side, but it was too late.

Chapter 1145: Conflict broke out

The So now they can only temporarily change their tactics, and the heavy artillery of the third company is completely pressed in front. Although this kind of tactics can suppress the Red Army rushing forward, there is no way to do anything for air power defense.

The second wave of air strikes continued. There was artillery fire ahead, but Qin Yuan and the others in the rear were very leisurely.

With a grass in his mouth, Li Erniu was lying on a commanding height, looking at the artillery on the opposite side through the sniper scope.

"Brother Qin, I said that their style of play should be fine according to the scene. It may last for a few days. Maybe it's really nothing to do with us."

"You see what's the problem again, boy? You think it's very traditional for them to stick to this style of play. The front is completely suppressed with heavy firepower weapons, and the Red Army can't rush forward."

"That's right, so I guess there's really nothing going on. We may really be here for soy sauce this time."

"This situation is absolutely impossible. According to their style of play, they can persist for up to three days. Now it seems that they have the advantage, but they can't always suppress the heavy artillery in the front. A few more air strikes are simply unbearable. "

"Brother Qin, it's not okay to go on like this. Shall we go out and remind him, or go with us?"

Qin Yuan shook his head helplessly. It's not like he didn't remind him, and Gao Shiwei had already said it. After all, they were just playing support this time, and they weren't the main battlefield commanders.

No matter what the final result is, he will lead the red blood cell team to turn defeat into victory. No matter what, he is very confident about this.

At this time, Long Xiaoyun also came over with a depressed face, and she kicked on the ammunition box next to her. Qin Yuan saw that she was not in a good mood, and stepped forward and asked, "What's the matter? The front is so beaten It's intense, we just need to watch the excitement."

"I have never fought such a frustrating battle. We have no room for use at all, so we are arranged behind. Do you know what the people in our team are doing now? Helping them guard the ammunition depot."

Qin Yuan almost forgot, before Commander Zhao just said that the red blood cell team needed to go deep behind the enemy lines, but he never explained to Long Xiaoyun's Wolf Warriors team, he never expected to be arranged by him to guard the ammunition depot, no wonder Long Xiaoyun was so angry.

"Forget it, look, we are not talking about peace now, what's the difference between guarding the warehouse here? He doesn't arrange it."

"I think this is too much of a waste of our strength, and we can't show our true strength at all. This is not in line with your style. If it was like this, you would have gone to find someone a long time ago. How can you be so calm now?"

"Xiao Yun, let's calm down. After all, we are playing support this time, so just watch the excitement."

Long Xiaoyun rolled his eyes at him, "You guys really don't hurt your back when you stand up and talk. The reputation we have maintained for so many years, we don't want to be broken at this time. We were originally legends in the team, but we ended up being shot If you don't post it, you're really laughing to death."

But having said that, Qin Yuan felt that the ammunition depot was very important, and there was a possibility that the Red Army would attack their ammunition depot, so they had ulterior motives in arranging that position for Long Xiaoyun.

"I think Commander Zhao puts a lot of value on you, at least better than our red blood cell team. We have to finish it at the end. The location of your ammunition depot is also very important. I'm worried that they will launch an attack later."

"Don't worry, I have already prepared for it. I am very confident in my players, but I can't just sit like this forever."

Brother Qin stood up and stretched himself. It's not the right time yet, because Commander Zhao will definitely not believe what he says now. Only when he is completely cornered and has no choice, can he stand up at that time .

Veteran palms like them have very bad tempers, and they cannot confront him head-on. If they stand up now, they will only feel that they will lose face, and the two sides will have differences, which will be very unfavorable to their subsequent cooperation.

Anyway, this time they can no longer fight in groups like before, but have a group battle, which is what the leaders at work want to see.

If he wanted to fight in a group, it would still be the same as before. Now he could lead the team out and directly enter the command post of the Red Army.

But now he somewhat understands what An Ran and the others mean, but they are originally from the military game development department. They just want to see if a special operations team like this can fully integrate with the main force?

This is what Qin Yuan wants to try, so don't worry now, "Xiaoyun, anyway, you must put away the ammunition depot now, I wish us important, don't worry, I will lead everyone to turn defeat into victory later, It is absolutely impossible that the word "lose" does not appear in my dictionary."

Long Xiaoyun nodded, turned around and looked at the battlefield in front of him, the battle ahead was fierce, and they all seemed to have nothing to do now.

Long Xiaoyun sighed helplessly, and then continued to return to the ammunition depot. Qin Yuan was right, they had to prevent a sudden attack by the Red Army.

This battle was fought fiercely, and like this, the Red Army did not withdraw until the next morning, when it was just dawn. Last night they launched a total of nine charges, the first line of defense, the second line of defense. The third team was forced to retreat under heavy firepower.

The commander of the third company didn't even dare to follow the previous order, and hurried to the high ground on the side, ready to prevent air attacks at any time.

Taking advantage of the fact that the Red Army had completely retreated, they hurriedly repaired the fortifications. This battle was fought fiercely, and everyone was very tired.

It just started yesterday, mainly because the Red Army's aerial attack was more violent, so they eliminated more people here, but Commander Zhao is still relatively confident, but he kept looking at the previous combat deployment on the map.

The secretary next to him brought a cup of hot tea, "Leader, you haven't slept all night, or you can go to rest for a while, and I'll call you if there's any situation."

"No need, it's just that I haven't slept, and the soldiers standing in front haven't slept yet. By the way, let everyone take turns to rest, and don't waste all your energy on this."

The secretary couldn't understand what he heard here. For him, isn't this just a drill? I feel that their leader is so serious.

"Actually, this is just an exercise. You don't need to break your body. You haven't closed your eyes all night."

Hearing this, Commander Zhao frowned slightly, a little unhappy, "This is not just an exercise. In peacetime, this is a battlefield for us. I'm not afraid of losing, but I want to treat him as a real battle to fight."

As soon as he finished speaking, there was a burst of clapping and cheering at the door.

He turned his head and saw Gao Shiwei walking in with a smile, "Head Zhao is right, and he is really generous."

Commander Zhao, apart from his stubborn temper, he is usually right and wrong, and now he can also see that his face is full of fatigue. He is more stressed than ever, because he is the main commander of the battlefield this time. .

"How did you come?"

"Why isn't Head Zhao welcome? Am I here to share with you?"

After Gao Shiwei finished speaking, he waved his hand to the back, and the people outside brought a pot of hot porridge, "People are iron rice and steel, even if there is going to be a war, we have to rest and eat good food, otherwise we will break the body Now, what are you going to fight with?"

Head Zhao nodded, smiled helplessly, stepped forward, picked up the bowl self-consciously, and made a bowl of hot porridge.

"Now I can sit safely in the command post and drink this bowl of hot porridge, but the soldiers in front are still repairing fortifications and adjusting their deployment. I just ordered people to go down and let them take turns to rest."

"Don't worry, we have arranged all these, mainly because the enemy's sudden attack yesterday caught us by surprise."

Hearing this, Captain Zhao felt an indescribable emotion in his heart. In fact, he had been holding a stone in his heart. When he received the data this morning, he blamed himself.

They eliminated a total of 389 people last night. Under such a violent air attack, although we had built air defenses before, we were still caught off guard.

Although this is a market exercise, they try to simulate actual combat as much as possible. If viewed in actual combat, these 389 people have become martyrs, each of them is his soldier, and the death of each soldier is inseparable from his commander-in-chief .

He took a sip of the porridge slowly, looked at Gao Shiwei who was sitting across from him, "Captain Gao, I don't know if you feel this way, it's not easy to be the commander-in-chief, the pressure is really too great."

Gao Shiwei just smiled, and didn't say much, because he knew it was not time for him to speak, and it would be bad if he came out to leapfrog now. not bad.

On the other side, Qin Yuan's red blood cell team and the cooking team brought several carts of hot porridge and steamed buns to the front line of defense.

Anyway, they have nothing to do now, so they simply become odd jobs. After all, it's not time for them to make a move, so they just happen to do something for them.

It was quite harmonious to distribute the porridge at first, but suddenly several soldiers in the crowd were talking about it.

"Look, this is the special warfare brigade who said it would cooperate with us before, but now it's working as a cook for us."

"Yeah, I don't think it's even as good as us. Anyway, we fought all night last night, and what are they doing? Lying leisurely in the back, it's really embarrassing to think that it's us protecting them."

The squad leader next to him heard the conversation of these soldiers, worried about being overheard, turned his head and scolded in a low voice, "Enough, you can't stop your mouths from eating, hurry up and finish your food, and change shifts now to rest."

And this was also heard by Li Erniu, he was so angry that they were kind enough to help the cooking team to deliver food together.

As a result, hearing such words just after coming here is really chilling. If they can't go to the battlefield, is that what they can do? Now they are not the commander-in-chief, they can only obey the commander's arrangement.

In addition, if they are really fighting, there is no need to be so messy.

"Brother Qin, did you hear what those people said in human language? What can we do? And look at how they fought. If we came, we would have repelled the Red Army several times. It is necessary to Is it so embarrassing?"

Unexpectedly, just because of this sentence, the soldiers next to them were completely angered. They thought it was unfair. Why can the people of their special operations brigade lie down and rest leisurely in the rear, while they are desperately fighting in the front?

The soldier carrying the porridge threw the bowl on the ground, pointed at Li Erniu, and said loudly: "Hey! You really screwed up your special warfare team. I don't know what's so good about it. This place is terrible." Not your special operations brigade."

"What do you mean by what you guys said? Am I wrong? I can't fight after nine charges. I'm so embarrassed to stand here."

A conflict broke out between the two sides in an instant, Qin Yuan hurriedly pulled Li Erniu, no matter what, the conflict cannot break out during this time period.

"Er Niu, calm down, don't care about them, now is the most critical time, don't let others have any opportunities."

Unexpectedly, the soldier on the opposite side would not give up. He folded his hands and said disdainfully: "I have already been familiar with the set of your special warfare team. You have also come to teach me before. I am very grateful to you. In fact, everyone They're all about the same, they're all soldiers, it's just the title you gave them."

Originally, Brother Qin didn't intend to care about it, but by saying this, he had already risen to the honor of the entire brigade, and he let Li Erniu go.

"Our special operations brigade is really good. Take last night's battle as an example, at least it won't be as embarrassing as some people. If it weren't for the cover of heavy firepower, it is impossible for you people to stand here You! You are really crazy, it seems that you have not suffered any setbacks."

When Li Erniu heard this, he laughed instantly. This guy really dared to say it. Originally, he just wanted to have a few words with him, but he didn't expect this guy to be deliberately provocative.

"We are crazy because of our strength. If you don't believe in this strength, it's a big deal, and it's best to make it clear that if we were the commander-in-chief, we wouldn't have such a bad record."

It was this sentence that completely intensified the conflict. After all, they had already stepped on the bottom line of both sides, and everyone wanted to protect their own troops.

For a while, everyone gathered together and began to make a noise. Li Erniu was very disdainful, and he looked at the shouting soldiers in front of him.

"If you are not powerful, it's not up to you guys to say it with your mouth, it's better to play it for real."

"I also have the same idea, but the premise is good, we are just discussing each other, and if we get hurt, just don't file a complaint."

Chapter 1146: rivalry punishment

After the soldier finished speaking, he rolled up his sleeves and threw his hat aside. Anyway, he was prepared. Say these sarcastic remarks.

He also came into contact with the Special Operations Brigade a few times. Long Xiaoyun and his side had trained them a few times before, and he felt that they were all the same anyway.

When it comes to fighting or something, he has never been afraid that anyone who is not convinced will come to fight directly, and speak with strength.

The company commander next to him ran out quickly and stopped the two people who were confronting each other, "Aren't you all messing around? What time is it now? Are there not enough things before the incident? It's not chaotic enough."

The soldier was even more aggrieved when he heard this, turned his head and said: "Company commander, I didn't mean to provoke trouble, but listen to what they said, they didn't take us seriously at all, and even came to blame us, We are better than these idlers."

"Who do you say is eating idle food?"

He Chenguang couldn't take it anymore, the other party's tone was too arrogant, and now he had begun to mock him openly.

"Hey, did you mention your sore spots? I'm talking about you, a group of idlers. We were training every day a while ago, and what are you doing? I really don't know what to ask you to do."

It's all said for this point, if there is no real competition, there is no way to end it, Brother Qin also stood up, looked at the company commander with a smile and said: "Anyway, we are all young people. It's normal, I think everyone is too energetic, it's a good thing to learn from each other."

The company commander also meant the same thing, but because of his status, he stood up and said a few words. In fact, he also wanted to see the difference between his soldiers and these special brigades.

Now that we've talked about this, let's compare. Moreover, he is quite confident in his soldiers. Recently, they have also worked hard in training and teaching before.

The soldier was also ready, and he secretly tried to force Li Erniu to rub against the ground.

Unexpectedly, at this moment, Li Erniu stood up, he shook his hand, "Forget it, I won't fight with you."

"Why hasn't this started yet? I'm afraid, hahaha, look at this is the Special Operations Brigade."

Li Erniu snorted coldly, "After all, I'm worried that if you hit you on the ground with one move, you will lose face, and people will say that our special warfare team is bullying people."

"You! Damn, you kid is really too arrogant."

"Don't worry, we won't bully people like that, and you also stand here all night. If I fight with you, I feel sorry, after all, I feel like I'm bullying you."

After Li Erniu finished speaking, he walked over and patted Qin Zhengyang on the shoulder, "Well, let the youngest in our team come and fight with you. This kid is really a recruit who just joined the army this year. He's a rookie."

After the soldier heard it, he was even more angry, mocking himself inside and out.

"What do you mean by that? Let me fight a recruit, and I will fight your captain directly."

Qin Yuan didn't expect that he was watching a show and eating melons, but it turned out to be him.

As soon as the soldier said what he said, the red blood cell team laughed and fought with their captain. Did they hear it right? This kid is completely looking for his own death, even they can't beat him, let alone this brat in front of him.

Hearing the laughter of the red blood cell team, the soldier became even more angry, "What do you mean? Don't you look down on me? Let me tell you, I am the fighting champion of our company for two consecutive years."

"Ah, is it great just to win the championship in the company? By the way, I remember that our captain seems to have won the national championship."

He Chenguang stepped forward and added, "Erniu, tell me about your memory. Our captain Monkey has won all the national world championships. There is also a gold belt in our team."

Having said that, Zhang Zhang burst out laughing, this kid really doesn't know the heights of heaven and earth, he just opened his mouth and wanted to challenge their captain directly.

This is simply playing big swords in front of Guan Gong, Qin Yuan also smiled, "Forget it, everyone is just discussing, there is no need to be so serious, although Qin Zhengyang is just a recruit we just joined this year, but his overall strength is also very good, Let's just have fun."

Now the soldier held his breath, no matter what, he would defeat them one by one. Since he wanted to send that new soldier out, he should come out to fight first.

"Anyway, you can say whatever you want, but let me say first, if I defeat him, then any of you will accept my heads-up."

Hearing this, Li Erniu laughed so hard that he couldn't straighten up, "Zhengyang, you must persevere, I really can't control it, he thinks he can beat you."

"Brother Niu, why do I feel like I'm not confident?"

The people next to him were making preparations. The soldier smiled disdainfully when he heard this. Everyone was cleaning up the place. It seemed that he was really a new recruit, and he was already scared before he even started.

But even if this is the case, he will not be merciful. After all, this is about honor. Unexpectedly, what Qin Zhengyang said in the next second would instantly surprise him.

"I think I should be able to solve the battle within five minutes, but now I don't think it's necessary. It's probably three minutes."

The corner of Li Erniu's mouth twitched. This kid really perfectly inherited Qin Yuan's arrogant physique, but he likes it very much. Anyway, their special warfare team has this strength.

At this time, the venue was completely cleared, and the surrounding soldiers formed a circle. Qin Yuan also specifically explained, "Remember, it's just a discussion, don't make any trouble."

The soldier thought the words were meant for him, and said disdainfully, "Don't worry, Captain Qin, I won't hit him too hard, just beat him to the ground."

Qin Yuan shook his head helplessly. Young people nowadays are really arrogant. It seems that this wave of reminders has not been in place, and there will be a good show later.

This soldier is indeed a fighting champion, so he knows how to preemptive strikes. He just wanted to attack the enemy with one move, and wanted to grab Qin Zhengyang's shoulder with a grabbing hand, but Qin Zhengyang's reaction speed was several times faster than him. He dodged and dodged. It was empty in an instant.

He couldn't believe how this kid's reaction was so quick to know? In their company, his speed was already very fast, and after a few consecutive moves, he couldn't touch Qin Zhengyang's body.

Qin Zhengyang moved his body a bit, "Now it's my turn, I've made you do so many tricks."

"Stinky boy, don't talk nonsense, you have the guts..."

Before he finished speaking, Qin Zhengyang was very fast, punching him in the chest, and then kicking him in the abdomen. Before the soldier could react, he fell to the ground, and everyone around him was completely stunned. , and fell to the ground in less than a minute.

The soldier was completely shocked. This was too exaggerated. He gritted his teeth and stood up again. He couldn't believe that he was knocked down like this.

However, Qin Zhengyang completely knocked him to the ground the second time and the third time like this, and Qin Zhengyang also held back his strength, otherwise he would not be able to stand up when he hit him the first time.

The company commander next to him also saw the clues. At this time, Qin Yuan also stood up to smooth things over, "Okay, okay, it's almost done, everyone is just talking about it, there is no need to be so serious."

But that soldier didn't want to do it anymore. After all, what he said directly just now ended up being slapped in the face.

"Wait a minute, it's because we were always ahead last night, so we didn't have the strength to be knocked down by him."

The company commander next to him was about to turn black with anger. This kid was causing him trouble all day long, so he hurried over and pulled the soldier up.

"What time is it now? Enough is enough!"

Of course, the company commander knew that it would be embarrassing if they continued to compete. Judging from the current situation, the strength of this new recruit in their special operations brigade was stronger than the few people in their company.

This is not a question of insisting on fighting overnight, but that they can't beat them in terms of skills, and in terms of strength.

Although the soldiers were not convinced, they could only obey the arrangement of their own face. At this time, someone hurried to the command post.

"Regimental Commander! It's not good, the members of their Special Operations Brigade are too bullying. They are now fighting with our soldiers in the area of our first line of defense."

what!

Gao Shiwei and Captain Zhao stood up from their seats at the same time. What's going on? Now that the war is imminent, they have just started to fight when the battlefield is being repaired.

The two officers didn't care too much, and hurried to the place where the defense line was. When they went, it was already over, but they saw a soldier sitting on the ground with a bruised nose and a swollen face.

Gao Shiwei felt that his soldiers shouldn't be like this. He stepped forward and looked at Qin Yuan, "You brat, what's going on? I'm not here for a minute, and you will cause me trouble ."

"Old Gao, you are too mean. Besides, do you think we are the ones who caused the trouble? It's not that the kid is ignorant, so let's teach him a lesson."

Before Gao Shiwei could speak, Head Zhao had already started criticizing over there.

"It's really funny. There are so many people in the whole company, and I can't find a single person who was beaten up like this. I'm ashamed to sit here, so I just retreat and go home."

This guy is not angry at his soldiers for fighting, but angry at not being able to beat them, which is really embarrassing for him.

The soldier was so scolded that he bowed his head, and the people around him were afraid to speak. The second company commander stepped forward and began to explain.

"Leader, I am also responsible for this matter. Originally, everyone wanted to discuss it."

"Hehe, this is what you guys call sparring. It's really a big joke to be able to spar people like this."

Gao Shiwei finally heard it. Although this guy was blatantly teaching his soldiers a lesson, he was actually saying that his men were too ruthless, beating people to this extent.

Since he is protecting the calf, he is not a vegetarian, but no matter what, he still has to give others a face. After all, Qin Yuan and the others are really a little unethical in this situation.

"Qin Yuan! Look, this is the good thing you led the team to do, come out! Two hundred push-ups!"

"Yes!"

Commander Zhao was not to be outdone, and turned to look at the second company commander, "Since you are the company commander, let's take you as an example, 300 push-ups."

Good guy, even the punishment is 100 more than his side. Gao Shiwei is also very helpless.

However, Qin Yuan could see it. He knew that Gao Shiwei was inconvenient to speak now, so he simply stood up and said, "Captain Gao, I think it's because I didn't manage my soldiers well. In this case, I will punish myself by 500 yuan." !"

Everyone was stunned when they heard this. 500 push-ups will be useless. Isn't this too exaggerated? Is it necessary to fight so hard?

The second company commander was not to be outdone, and said directly: "Since Captain Qin is 500, then I am also 500!"

Everyone exclaimed again, how did these two people do these 500 push-ups all of a sudden? It's not a joke.

But then there was a jaw-dropping scene. All the members of the red blood cell team began to report, then stood up and silently did push-ups beside them. Each of them was 500.

This is simply too exaggerated. The soldiers of Commander Zhao next to him saw this scene and wanted to do it together, but they were scared off by Commander Zhao's eyes.

Are they comparable? These soldiers have just come down from the battlefield. Although it is not a real battlefield, they have stood firm all night last night. No matter in terms of physical strength or energy, they are simply incomparable. Gao Shiwei also took the initiative to step forward. Said: "Commander Zhao, this time it's my soldiers who are wrong. No matter what, they shouldn't choose to compete at this time, so I will punish them slightly."

"I heard that Captain Gao tends to protect his weaknesses, but now it's not like the legend!"

"Regimental Commander Zhao, after all, if something is wrong, we should take the initiative to admit it, and I don't think the Second Company Commander needs to do so much. After all, I just got off the battlefield, and it is indeed my soldiers who are wrong."

"What? Captain Gao, I am managing my own soldiers, do you also want to intervene here?"

Gao Shiwei shook his head. It's none of his business anyway. He just wanted to persuade him, but this guy didn't appreciate it. He knows the bottom line of his video. It's absolutely no problem for this group of kids to do 500 push-ups, and another 10 kilometers. It's all right.

But it's not easy to have a seizure, so I can only turn my head and say loudly: "Look at the trouble you guys have caused, after doing the push-ups, and then maintain all the weapons and ammunition of the second company, let our brother troops have a good rest a bit."

Chapter 1147: total attrition campaign

Qin Yuan felt nothing. Of course he knew that Gao Shiwei was looking for a step down for his team.

After all, what occasion is it now? Just after they got off the battlefield, they had a discussion with the soldiers of the second company. The discussion was nice, but there was indeed a little conflict.

The second company commander on the opposite side, who hadn't closed his eyes all night, ended up doing push-ups so intensely that he couldn't hold on anymore, and the soldiers next to him were all cheering for him.

He raised his head and looked at Qin Yuan on the opposite side. This guy is too exaggerated. He did it so fast. The 500 push-ups were like a joke, and the people next to him counted to more than 300.

Head Zhao couldn't help turning his gaze to Qin Yuan when he heard the voices of the soldiers yelling. At first he thought that the soldiers were making a false report, but upon closer inspection, he found that his movements were not only standard, but also very fast.

He shook his head, and had to say that no matter what, he was still a member of the Special Operations Forces. There was really nothing to say about his physique, and there were only a few members in his team, so there would be no problem at all after it was done.

Gao Shiwei deliberately said: "It's also my fault for not taking care of these brats. If I don't pay attention, you will cause me trouble if you look at them. Don't worry, I will definitely discipline them more when I go back."

No matter what, they gave enough face this time, and Captain Zhao knew that although the people in their special warfare brigade were very proud, they didn't just say that, if they fight, they fight, there must be someone provoking them for a reason.

He looked at the soldier sitting next to him with a bruised nose and a swollen face. The guy felt a little guilty and quickly lowered his head.

Instantly understood what was going on, evil gave a step, and looked at Gao Shiwei with a smile.

"Captain Gao, it's too polite of you to say that. Originally, we all cooperated together. Now we all have to work together, and we only need to punish slightly."

"Oh, how can this work? It's okay, my soldiers are just in need of cleaning up, 500 push-ups are nothing, remember, brothers, give them the money later, and let them clean it."

After such a wave of operations, Captain Zhao felt very shameless. Not only did his soldiers lose in the fighting competition, but he also saw that his situation was bigger than his own under the eyes of everyone. After all, his attitude is really not a cover of.

And at this time, the Second Company Commander had done half of his push-ups, and he couldn't hold it any longer. Even if Commander Zhao wanted to save face, he couldn't keep forcing him. After all, last night was a night of hard work.

Looking at Captain Zhao lying on the ground, he shook his hands helplessly, and then asked two soldiers to send him to the infirmary.

"Captain Gao, I really made you laugh. It seems that soldiers like me still need to train hard."

"What did Commander Zhao say? I think everyone is very good, and they all just came down from the battlefield. Last night's exercise training was really tiring."

The two chattered a few words like doing Tai Chi here and then left. After Qin Yuan led the red blood cell team to finish the push-ups, he stood by the side and waited to close his gun like a normal person.

Seeing this scene, the soldiers next to him couldn't help talking, this is simply too exaggerated! All 500 push-ups are done.

And Qin Yuan didn't pant at all, he stepped forward and said, "Brothers, then follow your commander's order and go to rest first, just hand over the gun to us, and we will take care of the rest."

After such a wave of operations, Erlan is a little embarrassed. Everyone has found out before that it was indeed their people who provoked them first. After all, they also kindly brought them breakfast, but they were ridiculed. Whoever it is, definitely can't stand it.

Everyone was very polite when handing over the guns, but the red blood cell team really became a handyman this time, delivering food again, and now started to clean up the battlefield behind.

Qin Yuan was happy to take it easy, anyway, things were not in a hurry and took his time, looking at it like this, Captain Zhao would not let go easily.

After all, Qin Zhengyang just joined. He didn't know what Qin Yuan was going to do in the future, and when he was helping them organize their guns, he was a little unhappy.

"Brother Qin, I don't think we are really to blame for today's incident, and they have gone too far. Now that we have really become odd jobs, who can we ask for reasoning?"

"You kid just joined. You still don't understand a lot of things. Learn slowly. Believe me, everything will get better in the future. You still have to rely on us."

"But do you think this battlefield will really end so suddenly? I'm worried that this time we'll really become handymen. Their heavy weapons have already pushed forward, and they won't be able to deal with us in the rear."

Qin Yuan smiled, all of this is just a superficial phenomenon, their deployment is absolutely fine in general, but the details behind it simply cannot stand the long-term consumption.

When everyone was eating at noon, the Red Army carried out another wave of air strikes. This time the air strikes were greatly reduced by the suppressive firepower of the front.

But such air strikes were repeated, and they even used drones. This small drone could easily cause interference under radar detection, and they wasted a lot of shells for a while.

Commander Zhao looked dignified, sitting in the office and was analyzing the current situation, when the Second Company Commander ran in disheveled.

"Reporting to the head, we really have a situation on the ground."

"Don't talk about it, I know it all. How did you fire so many shells? Thousands of rounds were fired. You and I are joking. There are only a few waves of attacks. What fight?"

Although these are training bombs. But don't be so joking, all of them have been typed out, and they seem to be very passive for a while now.

At present, the ammunition depot on the side of their headquarters still stores a small amount of ammunition. At that time, for safety reasons, there was a large ammunition depot, but it was about 10 kilometers away from here.

So now he needs to send people to \*\*\*\* the ammunition over. Needs to be replenished ASAP.

The second company commander was also very helpless. They didn't expect the Red Army to be so cunning. They used radar interference to send out small drones, which consumed a lot of ammunition for a while.

Moreover, such repeated doubts were their large fighter jets, and he was not sure for a while after going back and forth.

Looking for the head of the regiment, I feel that the military exercise this time is different from the previous ones. This time, in a relative sense, it is closer to the real battlefield, completely simulating the reality, just like their current ammunition situation.

Now we are fighting a war of attrition, "How long can the current ammunition last? How many waves of attacks can it withstand?"

"In this case, we can persist for three or four rounds of attack at most, and it depends on their number. You should know, leader, that there is no way to be sure that this kind of energy will be consumed, so I can only say roughly."

Commander Zhao thought for a while, and planned to send people from two squads to pull ammunition. At this time, the second company commander asked with some doubts: "Commander, do you want to send our people out? They have a red blood cell team." Aren't the Wolf Warriors squad also here with us? Don't we use them all the time?"

Unexpectedly, Captain Zhao shook his head, "Of course I know their abilities, but it's not that we don't need them, but they are our last pawns, and they can be regarded as our last trump cards. They are going to attack the command post, so we must keep our strength. I don't want any surprises to happen."

Head Zhao actually valued the red blood cell team very much, so he always wanted to keep them until the end. Up to now, he didn't even want to distribute the task of delivering ammunition to them. He wanted to completely hide this trump card.

On the other side, the Red Army is also monitoring their actions.

A secret team was lying on the hillside and saw that the blue army had sent two squads of soldiers. The squad leader lying on the side took out the walkie-talkie and reported the situation in a low voice.

"01, 01, I'm 02 here, and now I see soldiers from the two squads of the blue army moving towards the back mountain, probably in the southeast direction, are you tracking them?"

Just received the news, the Red Army command post is very excited, not only because of the ammunition problem, if they send troops on a large scale at the ammunition depot, they must have

no choice but to use sneak attack tactics, and the most important thing now is to This is only a team that transports ammunition.

What the Red Army is most afraid of is actually the Wolf Warrior Squad and the Red Blood Cell Squad. After all, their combat effectiveness is obvious to all, but the battle has been going on for so long, and there is still no trace of those two squads.

That's why they came up with this method, and they really wanted to consume a lot of the blue army's ammunition in order to trap them.

Now they start by consuming ammunition, and other units of the Red Army have already started to move. They not only want to break through, but also slowly infiltrate and completely surround them.

After the Red Army team here received the order, I followed up. Now they can be sure that they must be members of the special warfare team.

They can take advantage of this opportunity to deal with these two special warfare teams on the way. In order to get this opportunity, the Red Army even sent a company of soldiers to slowly infiltrate and encircle them.

At this time, a soldier behind couldn't help asking: "Squad leader, if it's really that guy, can we really beat him? After all, he is at the level of a God of War."

Unexpectedly, the squad leader gave a bright smile, "I have inquired about this before. He is famous as the \*\*\*\*\* of war. Apart from marksmanship, the most powerful ones are sword skills and close combat. Of course, we only need to fight him at a long distance. Just pull it."

They had already figured it out before, as long as they completely distanced themselves from each other, they would not be able to be promoted. If they attacked them directly, they could be regarded as taking advantage of a loophole in the rules. After all, this was not a real battlefield, but just a drill.

And they are just a small team now, and when their planes come to cover people from other companies, they can come in directly. It seems that they are attacking their blue army's position, but they are actually coming around from behind.

The soldiers in the two squads in front didn't notice that someone was following them, but they just stepped up their speed. After all, the battlefield ahead was still waiting for ammunition.

There is still a company of soldiers on duty in the ammunition depot over there, so basically there is no problem.

Qin Yuan, who was at the camp, soon heard the roar of the plane again, and seemed to have gotten used to it repeatedly. Anyway, they were sitting in the tent and preparing their guns.

At this time, Long Xiaoyun walked in anxiously, "The battlefield ahead may change, we must be prepared at any time."

"Where did you get the news, what's going on?"

Long Xiaoyun's small team is now in charge of guarding the ammunition depot here. The ammunition depot on the camp side is relatively small, basically there is no problem, but when they were in charge of guarding it, she paid attention to the amount that was transferred this morning.

It was found that there was a serious shortage of ammunition, so it is very likely that Commander Zhao has already sent people out. The problem is that the team has sent people out now, and the team has not returned for two hours. You must know that it is ten kilometers away. Not so slow.

Qin Yuan frowned slightly when he heard this, the ammunition was short, and Commander Zhao never said anything about it.

"It's been two hours. It seems that there must be a problem on the way. This batch of ammunition can't wait anymore, and the Red Army's plane will come down a few times. It is estimated that they will not be able to support them in front of them."

"I don't know what the \*\*\*\* they are going to do. Obviously, our two teams have nothing to do now, so we can let us go, and it turned out like this."

Qin Yuan smiled, anyway, the good show might be about to start soon, but he hoped that this stupid battle would end as soon as possible.

On the other side, Commander Zhao suddenly lost contact with the soldiers who had been transporting the ammunition.

He sent another member of the guard platoon to investigate the results, but there was no news about the people he sent out.

A very, very bad idea also popped up in his mind. It is very likely that people from the Red Army have already infiltrated, right on the mountain where they are stationed.

Thinking of this, Commander Zhao hurriedly ordered everyone to be vigilant, and planned to send out the people from the third company to start searching on the mountain. It is not a good thing for the Red Army to infiltrate now.

Unexpectedly, as soon as his words fell, before the secretary had time to prepare, the rumbling voice came from the front position again.

This time, the second company commander was eliminated before he had time to report. He saw thick smoke billowing from his body, and kicked the stone next to him angrily.

"This battle is really aggrieved. In fact, we shouldn't be so passive. We should take the initiative to attack when we have been backhanding in this place. Now we are being beaten like grandchildren, and we can't even get out of this place."

The soldiers next to him were also complaining, but what's the use of talking about it now? This is the matter of the commander-in-chief, and they will only be asked to do what they can, and they can only do what they can. Head Zhao always feels that now is not the time to go out, and they still need to strengthen the fortifications.

Chapter 1148: change of command

For a while, thick smoke began to billow from the position they were stationed at. The Second Company Commander sat helplessly on the ground. He has nothing to do now.

Moreover, the Red Army's air strikes continued, and the soldiers in their front positions could only temporarily hide in the air-raid shelters.

There is no way to face such an attack, but such ammunition is relatively equal to the Red Army, and everyone is consuming it, just because the Blue Army did not deploy well.

The most important position right now is the Second Company Commander's company. Now the Second Company Commander is sitting on the ground, looking at everything in front of him, and the soldiers on the opposite side are anxiously running towards him.

"Company commander, what should we do now? We can't resist their attack at all."

"Don't ask me, I'm already a corpse, on the battlefield, on the real battlefield, can you ask me?"

"Company commander, but this is not a real battlefield. If we don't react, the whole army may really be wiped out here."

The Second Company Commander sighed helplessly. Although such an approach was indeed against the rules, he had no choice. If the stalemate continued, their tank company's heavy position would be completely lost, and so many iron boxes were paralyzed here. thing.

"First platoon leader, you lead the second and third squads to open a gap, first withdraw the remaining tanks and chariots, withdraw from this high ground, and go to the low-lying area, their artillery fire will not be able to exert their strength."

After the first platoon leader got the order, he acted quickly. Now their position was in chaos, so they could only find a way to quickly open the gap and withdraw first, because the encirclement circle of the Red Army soon closed.

Moreover, Head Zhao was also anxious like ants on a hot pot. They wanted to rescue the people of Sanlian, but they were beaten back time and time again.

Qin Yuan didn't need to observe the situation ahead, but He Chenguang and the others were very excited and reported the situation at any time.

"Brother Qin, you are really predictable. I didn't expect them to solve the high ground. Now their tanks and chariots can't fight at all. They probably have to withdraw all of them."

Qin Yuan picked up the cup and took a sip of water, very leisurely, "It's not that I predict things like a god, but based on his tactics. If I were the Red Army, I would definitely try my best to deal with his heavy weapons first. No one is stupid."

If nothing else happened, Head Zhao even sent a company to search for the infiltrated Red Army, which was completely meaningless.

Because they already knew that the soldiers of those two squads must have been intercepted halfway, and he was sending people out now. It was like a gourd baby saving grandpa, and he would completely disperse his own troops, which led to the current situation.

They wanted to rescue them, but they didn't have enough manpower, so they had to stick to their positions. The people from the tank company could withdraw, but Qin Yuan probably lost a lot.

The second company commander sat helplessly on the ground, he only knows these things now, so what's the point? It is good to be able to withdraw, and it is estimated that most of them will stay in this position.

A few soldiers next to him didn't understand, so, "I think we might be able to detect it. After all, our tanks and chariots are not vegetarians. We just need to open a hole, fight back and go back."

"Boy, you are still too young to understand the rules on this battlefield. Think about it, our current number is in stark contrast to the Red Army. The number of people they infiltrated is still unclear, but we have sent a company."

So now they are the only ones who want to save themselves. This time, he has given instructions and reminders at the risk of violating the rules.

He couldn't help thinking carefully, if it happened on a real battlefield, what would these soldiers do?

This kind of military exercise is really necessary, and they can directly find out what their problems are, just like he has never considered the current situation now, so he never worries about it.

Once his company commander fell, he lost his backbone in an instant, and the soldiers on the battlefield swarmed around like headless chickens. He was in command of the final order to retreat, including how to transfer.

Although such tactics are no longer used in modern battlefields, these are the foundations, and any situation may happen.

After more than an hour, the tank company was finally withdrawn, but they suffered heavy losses. In that position, a total of seven tanks and chariots were lost, and only two platoons of one company returned.

At this time, even worse news came from there. The company that Commander Zhao sent out to find the escorting ammunition team was also ambushed.

"Regimental Commander, the enemy really caught us by surprise. We didn't expect them to change into our soldiers' clothes. We couldn't tell the difference, so we were plotted against."

"What do you eat? If your company is plotted against, wouldn't you resist?"

"Head, now I'm trying to find a way to get out of the encirclement..."

Before the situation was reported, the signal was suddenly interrupted, and the regiment leader suddenly felt that he was under attack. The air strike ahead made his position impossible to assemble, so the soldiers could only hide in the air-raid shelter first.

And the most important thing is tanks, and the artillery and ammunition of tanks are also in short supply.

At this moment, Gao Shiwei walked in, followed by Qin Yuan's red blood cell team.

"Commander Zhao, if you don't mind, I have a solution now. If possible, then I will send my soldiers directly. I believe my soldiers will be fine."

But it's already at this time, Captain Zhao still can't believe it, he said helplessly: "Captain Gao, it's not that I don't believe you, but just these two teams, what do you think should we do? The situation is very critical now. , the front and rear are full of people from the Red Army, it seems that this time we have lost."

Only two days later, the situation on the battlefield took a turn for the worse. Commander Zhao didn't know how he was commanding, and he completely messed up the rules. Obviously, according to his initial expectations, it was very good.

"But I dare to assure you that my two teams can bring your people back to fight back. If you believe me, according to my current combat plan, you will definitely be able to turn defeat into victory."

Gao Shiwei's attitude was as polite as possible. After all, the commander-in-chief this time was Commander Zhao, so he didn't say much, just a tactful reminder.

Just when Commander Zhao was hesitating, another bad news came. It was from the ammunition depot. The company they were in charge of guarding the ammunition depot was suddenly attacked by the Red Army.

Hearing the news, Gao Shiwei was also a little anxious. If he didn't make a decision, they would have no way to turn the tide.

"Captain Zhao, you are a commander-in-chief. Now is the time for you to make a judgment. You have no choice now. You might as well leave it to me. I promise to give you a good fight."

"But... I think I can still fight, but the ammunition depot is not enough, so I have to give up."

"Commander Zhao, you are really confused. The ammunition depot has been abandoned. What should we do? You don't think the rest of us will organize a big charge, do you? It's absolutely impossible."

In fact, Gao Shiwei just mentioned the idea of finding a regiment leader. What he wanted was to organize a big charge for everyone, but what he didn't expect was that the Red Army had more troops than him.

His charge completely consumes the crowd tactics, which is meaningless. Even with the heavy weapons in the rear, the final loss will be very large. He will only be completely broken up by the Red Army again and again, and there will be no room for choice at that time. .

The bad news that came one after another gave head Zhao a headache, and finally he made a decision and collapsed on the chair helplessly.

"Okay, I'll leave it to you to take command this time, and I want to see what you can do to clean up this mess."

Hearing this, Gao Shiwei raised the corner of his mouth, turned his head to look at Qin Yuan and said, "Now is the time for you and the Wolf Warriors team to perform, can you plug that gap?"

"Team Gao, don't worry, I promise to complete the task, everything will come to fruition tomorrow morning."

The Red Army has completely disrupted their deployment and crossed their defense line. Now there are soldiers infiltrated by the Red Army all over the mountains and plains, so the ammunition depot also needs to be resolved, and these soldiers of the Red Army must be driven out.

However, when Commander Zhao heard Gao Shiwei's deployment, he was even more surprised that this guy only wanted these two teams to go up the mountain.

"Squad Gao, did I hear you right? The Red Army doesn't know how many people have infiltrated. You rely on these two squads to support the ammunition depot and drive them out. It's impossible. Bar?"

Now that Gao Shiwei has obtained the command, he didn't explain much, "You can just watch this good show from the sidelines. The soldiers on the ground now start to rebuild the line of defense, and the Red Army cannot have any chances." Take the opportunity."

Head Zhao had no choice but to follow what Gao Shiwei said, and now he really handed over his fate to Qin Yuan and the others.

Qin Yuan started to act together with the Wolf Warriors team, and it was finally time for them to show their talents.

"Everyone, everyone has rested for so many days, now we have to play a good game, do you have confidence?"

"Brother Qin, don't worry, let's set off quickly, I can't wait now, after all, I really have enough time these few days."

Qin Yuan was also waiting for this opportunity. In this way, they entered the back mountain directly. According to his current plan, he planned to find the ammunition depot first and save the ammunition depot first. As for the Red Army on the mountain, they were slowly searching.

At this moment, the fighting at the ammunition depot was very intense, and the number of the Red Army was increasing. They continued to pour in troops from the opening of the breakthrough.

At this time, Qin Yuan killed them suddenly, caught them off guard, and attacked them directly from behind. Seeing reinforcements from the ammunition depot, he became more confident, and everyone began to resist.

Under such circumstances, Qin Yuan walked vigorously and eliminated the two commanders directly. For the command of the commanders, the remaining soldiers lost their positions in time. Taking this opportunity, the two teams began to attack separately.

The two commanders were eliminated by Qin Yuan before he could even react. They stared at the smoking spots on their bodies.

what's going on? Because they thought that the one who intercepted and transported the ammunition before was from the Special Forces, but they didn't expect the real Special Forces to appear in front of them now.

After the Red Army outside the ammunition depot was dealt with, a small part of the Red Army began to flee down the hillside.

Qin Yuan first went to check the situation of the ammunition depot. There was not much ammunition in it, but the ammunition on the right side was damaged.

But there was no problem in general, he immediately asked Long Xiaoyun to lead the Wolf Warriors team to start transporting some ammunition back to the position.

He took the red blood cells, and the team began to clear the rest of the Red Army. Just as he was making the deployment, the soldiers on the side of the ammunition depot realized that something was wrong.

The company commander stationed at the ammunition depot trotted all the way over, "Wait a minute, I read that right, you only have people from these two teams."

"Yes, do you have any questions?"

The company commander gasped when he heard this. The combat power just now was simply too terrifying. Almost in an instant, a large number of soldiers were eliminated by them, and their combat power could even be called a company.

This is more terrifying than a company, the cooperation is very close, and the opponent is eliminated without any loss at all.

"Captain Qin, don't get me wrong. I didn't question what you mean. I didn't expect you to be so strong. If that's the case, I can also call out my team and go with you to encircle and suppress those Red Army."

"There is no need for this. You stay here well. You must guard the ammunition depot. This place is very important. Don't worry, as long as I drive the Red Army out, you will have no problems here."

Qin Yuan said it very easily, The company commander next to was already dumbfounded in surprise, and he had already prepared everything, this time the clearing operation is bound to be won.

In addition, the Red Army began to flee in all directions. The soldiers of the Blue Army who had been encircled and suppressed had no idea what had happened, and discovered that the Red Army that had encircled and suppressed them had begun to retreat on a large scale.

Immediately afterwards, they saw a team of people rushing over quickly. The company commander was about to shoot, but found out that it was a familiar person, unexpectedly it was Qin Yuan.

It's too exaggerated for a small unit to chase the soldiers of a company and flee immediately! And those Red Army soldiers were not vegetarians either.

Qin Yuan ran up to look at their clothes, and confirmed the company commander again. He was very impressed with those company commanders before, and he was even more impressed with this company commander. He also looked down on them before. .

"Sixth Company Commander, you have nothing to do here now. Our people have already transported the ammunition back, so you should retreat to the position as soon as possible. Remember to block the gap, and leave the rest to us."

Chapter 1149: start to act

The company commander was completely taken aback, this guy is too crazy, how could he fight so many Red Army soldiers?

He hurried to catch up, "Captain Qin's matter should not be underestimated. I will take my team with you to make them very cunning. We have suffered from them when we first came. I am worried that you will do the same." Make the same mistake."

"This is unnecessary. After all, if there are too many people, I am worried that you will not be able to keep up with us, and you will be easily spotted by the Red Army."

Because what Qin Yuan had to do was not only to drive back the soldiers of the Red Army, but also to sneak in while they were retreating back, and then find their command post.

The field involved in this exercise is very large, and the position of the Red Army is even more infinite. It is really very difficult to find the command post.

Qin Yuan here was kind enough to remind him, but the company commander next to him felt very uncomfortable when he heard this, so he stood up and said, "Captain Qin, I know that your special warfare team is powerful, but there is no need to say that, you soldiers We also don't have a saying that we can't catch up."

The soldiers around were also a little dissatisfied. Why do they say that? Let's talk about it. They fight in the jungle, but they train every day, so there is absolutely no problem.

Qin Yuan smiled helplessly, since he didn't listen to persuasion, then give them a try, anyway, these guys can't keep up.

"Well, anyway, I have already reminded you in place. This is also your own choice. You can do whatever you want, but I can't control you now."

"Hehe, don't worry, we will follow wherever you go."

Qin Yuan looked at the members of the red blood cell team, and everyone understood what it meant. They will speed up later and must drive out all the soldiers of the Red Army.

Can't go on here anymore, Qin Yuan kept chasing behind, and encountered a Red Army assault team on the way, and was eliminated by Qin Yuan at that time, this assault team has not reacted yet, I saw a figure flashing in front of me, and then white smoke rose from my body.

The captain of the assault team didn't know, so he shouted loudly: "It's a foul, it's definitely a foul, and we haven't come close to us yet, why are we eliminated? Absolutely impossible."

Unexpectedly, Qin Yuan came out from behind the big tree at this time, "Stop yelling, there is no foul at all, let's see what is on you?"

After the captain heard this, he looked down and was instantly shocked. There was a throwing knife hanging on his shoulder, and the other soldiers were the same.

No wonder they were eliminated. Qin Yuan used the throwing knife to trigger the alarm, and Qin Yuan's strength was very good, and it would not hurt them, and it was just right.

The captain of the assault team was stunned, this was the first time he had seen this elimination method.

Qin Yuan and the others didn't respond at all, and continued to walk forward. The captain of the assault team said loudly: "Wait a minute, this one is very unfair to us, I am not convinced."

Qin Yuan turned around and walked to the side, picked up his throwing knife, "Do you want to try again?"

"You are simply a lunatic. With this method, aren't you afraid of accidentally hurting us? This is just a drill."

"If it was someone else or someone like you, you would worry about accidentally injuring others, but now I am the one using the throwing knife, and I am absolutely sure that if I want to hit your right ear, I will definitely not hit the left. "

Qin Yuan's tone was very arrogant, the team leader thought about it carefully, who could use a throwing knife so madly, and so awesome.

Suddenly he thought of something, his face changed drastically, and he looked at Qin Yuan in shock, "You! You are the God of War! That red blood cell team."

"That's right, it's not wrong for you to die, after all, I haven't really made a move yet."

Qin Yuan walked over and patted him on the shoulder again, "Remember, you are a corpse now, it's best not to talk nonsense, otherwise I will hold grudges very much, and I will try my best to find out ."

These words reminded the commander next to him that he was sweating all over. This guy was a serious threat, but he couldn't do anything about him, so he sighed helplessly.

Qin Yuan and the others just left the captain, threw his helmet on the ground, and sat down directly.

"Before this is over, our intelligence made a mistake. This is the real red blood cell team. I said, how could it be wiped out by us so easily? That kind of power is not them at all."

The soldiers next to them were also very helpless. Before, they happily reported that the red blood cell team had been wiped out.

"Captain, I think it's over this time. Their red blood cell team is dispatched. Can our command post be kept?"

"I'm not sure about this, but I can only say that they may not be able to find it this time, so they can only delay the time. I hope the brothers over there will be more helpful."

As soon as the voice fell, it came again from behind

The sparse voice was the company commander who followed up just now.

He kept urging the soldiers behind to run faster, "I said you brats, who usually let you eat, run the fastest and are the most active, but now you can't run anymore, look at the shadows of others."

"Company commander, let me tell you what this group of special forces eat. How can they run so fast? It's even more exaggerated than rabbits. I saw a figure just now, but now I can't even hear a sound."

"People are human beings, so aren't you human beings? It's useless to train you all the time. It's best not to embarrass me."

"Company commander, I didn't say that, our company is the fastest in this jungle, right? Look at them, they are walking on flat ground."

"Stop talking nonsense, adjust your breathing, and run faster."

Although the company commander said this, he was running out of breath, and he still gritted his teeth and insisted. When he came to see the eliminated Red Army, everyone stared at him, a little embarrassed.

The captain of the Red Army commando also pointed out, "They ran in that direction."

The panting company commander gave him a blank look, "Shut up! You corpse."

The commando captain was very helpless. He obviously wanted to remind him kindly, but he was complained about in the end.

At this moment, Qin Yuan fully opened up all his senses, and he led the team to run at the front. He found all the snipers hiding in the grass ahead and killed them directly, and soon came to a stone bridge.

At this time, the fourth company commander ran up with his talents, but he really couldn't catch up, and Qin Yuan and the others had to deal with those Red Army soldiers on the road, which wasted some time, otherwise they wouldn't even be able to see their shadows.

The Fourth Company Commander gritted his teeth and ran forward, his face flushed red, looking at Qin Yuan who was sitting by the bridge, "Captain Qin, what do you mean? We... are we still leaving?"

"Of course I have to go, but I can't make it through now. Wait a few more minutes."

I didn't expect that the fourth company commander would suddenly be competitive at this moment, and he simply ran towards the bridge with the soldiers, and the love had no time to stop him, who knew he would do such a reckless thing.

"and many more!"

As soon as Qin Yuan finished speaking, he heard a burst of explosions, and then the fourth company commander in front and the soldiers behind him completely billowed with white smoke.

"This! What's going on here?"

Li Erniu shook his head helplessly, these guys don't look at anything and just rush forward?

A time bomb was placed in front, and they didn't pay attention to such an obvious mechanism, and if they really wanted to leave, they would have left long ago.

It's not that Qin Yuan doesn't want to demolish it, but this kind of time bomb is a kind of remote control. He is worried that they will explode it remotely when he is about to dismantle it.

It would be wrong to die at that time. After all, under such circumstances, they will be eliminated. Elimination is more embarrassing than death. For Qin Yuan.

So they have been waiting for an opportunity to see if they can go around under the bridge, but they didn't expect the fourth company commander to be so reckless, and rushed over directly with people, without listening to explanations at all.

At this moment, looking at himself covered in white smoke, he was also dazed, not knowing what happened.

"Why didn't you remind us?"

Qin Yuan only thought it was funny, but now that something happened, he blamed himself instead, "I didn't let you follow us before, but you insisted on following, and after you came, you charged inside without saying a word, how could I stop you? ?"

"You! But you must at least shout."

"Then ask your soldiers, did I shout, don't you even ask where we dare not go!"

Now the fourth company commander stopped talking, it was indeed his mistake, he was a little too anxious just now, he didn't want to fall behind, he wanted to catch his breath, but in the end he completely lost his judgment.

Now that the mechanism has been stepped on by them, there is no use in the future, Qin Yuan continued to lead the team to set off. At this time, he looked at the soldiers who still wanted to follow, turned around and said loudly:

"Now we are going to perform other tasks. You will only be exposed if you follow. Go back first, there is no need to follow all the time."

The rest of the soldiers turned their heads and looked at the company commander. Without them, they didn't know what to do when the company commander gave the order.

At this moment, their company commander felt that he was completely finished. He didn't expect to die on this bridge in a moment of carelessness. This way of elimination is really too aggrieved.

Qin Yuan frowned slightly as he saw the soldiers still hesitating.

"What the \*\*\*\*\* do you mean? Don't you understand what I'm saying? I made it very clear, tell you to leave quickly and don't interfere with our mission execution. We have a separate mission issued by your regiment leader."

Perhaps because of this sentence, these soldiers stopped their actions. Qin Yuan was very helpless, and he continued to run forward with the team.

"At that time, they kept saying that they had nothing to do with us soldiers of the Special Operations Brigade.

The difference, I think the difference is really too big. "

Even Qin Zhengyang could see that there was a problem. After all, in their team, if something happened to Qin Yuan, then anyone who stood up could be the captain, and anyone could be the leader.

Although the company commanders on their side seem to be very powerful, they can't stand the passage of time at all, especially if the company commander has a problem, the soldiers below are like headless flies for a while, not knowing how to deal with the problem.

This is also the result of their training at the beginning, and it has nothing to do with their training methods in the future, which is not the point here.

Li Erniu looked while running, and the soldiers behind him were indeed not keeping up, "I really don't look down on them, this is too exaggerated, with such little physical strength, you still want to follow us, and even if you die yourself, why not?" If it depends on us, I'm afraid this old boy won't join us."

"Anyway, I have let him go for so many years, and you all know that I have offended many people. He can think whatever he wants. Anyway, I am not afraid of the shadow."

After running across the bridge, Qin Yuan dealt with a few Red Army soldiers who were trying to hide.

According to this situation, they have basically been driven out by them, so now he can take the opportunity to touch the Red Army's defense line.

On the other side, the leader watched his people come back scatteredly, but many of them were eliminated, and felt even more aggrieved.

And the Wolf Warrior squad had already delivered all the ammunition early on, so they didn't need to worry about it at all. Now all the hidden dangers on the ammunition depot have been removed, and Qin Yuan has completely removed the Red Army soldiers who were hiding here and infiltrating in. Chased out This gave him a feeling that as long as there is a red blood cell group, he is not needed at all.

It's just that Gao Shiwei's command right now is with Gao Shiwei, so he doesn't want to mention it. All his people are on standby, sitting on the normal defense, and the Red Army is not launching an attack. After all, those who infiltrated them have been killed. After being driven out, most of them were eliminated by Qin Yuan.

In the end, Commander Zhao couldn't sit still anymore. He stood up and looked at Gao Shiwei and asked, "Captain Gao, am I just sitting there waiting to die? Don't we take the initiative to attack?"

"Head Zhao, you finally got the point now. I warned you before taking the initiative to attack, but you denied it at the time. Now you finally know, right?"

Head Zhao was a little embarrassed to hear this. In fact, he was also a fan of the authorities and a bystander. He could only see the layout clearly after he came out completely.

Up to now, Gao Shiwei's layout, as long as Commander Zhao's soldiers stick to the position, they have to give the opponent a false impression, and now that the shells are sufficient, they can fight back with all their strength.

Speaking of this question, Head Zhao suddenly asked suspiciously: "Group Gao, we can counterattack, but have you ever thought about a question, if we want to counterattack, we must bring heavy armored weapons, but the current problem we They can't take it away at all, and their air strikes will come at any time."

Gao Shiwei smiled confidently, "Don't worry about this matter, we will receive a signal within an hour at most from now on."

Commander Zhao was in a daze. What signal did he receive and what did it have to do with the air strike?

Chapter 1150: final charge

At this moment, Qin Yuan had come around to the Red Army's defensive base. He Chenguang was lying on a commanding height, silently observing everything on the opposite side. Opposite was their small ammunition depot, but the strength was not very sufficient. It seemed that there were only two at most. squad of soldiers.

"Brother Qin, I see the Red Army on the opposite side. I don't know what the \*\*\*\* is going on. It's not like their general ammunition base, but we've already found half of the hillside. It seems that this is the only place."

Qin Zhengyang observed for a while, and then said: "Brother Qin, if I think about it, it may be that they carried most of the ammunition in the base, so there is a small ammunition depot here."

He felt that as long as this ammunition depot was destroyed, it would be another way for the Red Army to suppress and consume their ammunition.

However, Qin Yuan shook his head. After observing carefully for a while, the ammunition in this ammunition depot was all basic equipment, which was not enough to equip the entire Red Army.

"You can take a closer look at the situation here, as well as the consumption of the entire equipment of the Red Army. They will never put that much, but it is not only very dangerous to put it in the camp, but once the ammunition depot explodes, it will cause a chain reaction." reaction."

"Why is there only this? We searched so many places just now but didn't see it."

"I made a bold assumption, which shows that their ammunition depots are bound together at the military base, and their ammunition can be used. Air transportation is safer than ground transportation."

When Qin Yuan said this, everyone suddenly realized, yes, they have air support, why didn't they think of this?

And according to this, they have searched most of the hillside, and only found this small ammunition depot, which can only mean that most of the other ammunition and equipment are at the air force base.

"This can be regarded as an opportunity for us. As long as it is confirmed that the ammunition depot is at the air force base, there is no need for Commander Zhao and his soldiers to cooperate with us."

Originally, Qin Yuan's original plan was to cooperate with Captain Zhao and the others, but he was not sure whether the other party could understand her meaning. He had already talked to Gao Shiwei, but he was still worried that there would be unexpected situations. This kind of choice is in the hands of others, it is better to put it in your own hands.

"Brother Qin, do you mean you're worried about their launching problems?"

"That's right, if a little error is discovered by them in advance, then we will all be exposed, which will make them more vigilant. Although such vigilance is useless to us, I want to be completely error-free."

When Qin Yuan does things, what he requires is perfection, especially for such a large-scale exercise.

And now as long as it can be confirmed that the ammunition depot is also in their flight base, the explosion that can destroy the ammunition depot together is powerful enough to trigger the entire alarm system.

However, there is nothing wrong with the ammunition depot in front of him, but Qin Yuan wanted to get clues from it. After all, these ammunition were dispatched from that base.

Anyway, for this small ammunition depot, He Chenguang and Li Erniu cooperated to occupy the commanding heights.

Immediately afterwards, the two heavy machine gun points in front of him were eliminated in an instant. Before the two machine gunners were still there, white smoke was rising from their bodies.

Qin Yuan rushed forward quickly, and cooperated with Qin Zhengyang in the rear, and instantly eliminated the soldiers in front.

Just as the downed soldier was about to speak, Qin Yuan directly made a silent movement and stepped forward to cover his mouth.

"Remember, you must abide by the rules of the game. Now you are just a corpse, you can't say anything, you can't move anything, just lie down."

The soldiers were very unconvinced, and they were too aggrieved to die. They were eliminated out of nowhere, and their speed was too fast, so they didn't react at all.

But the rules are like this, and if it is on the real battlefield, he has no chance at all.

Qin Yuan looked at the fallen soldiers with great interest, "But I really have a question to ask you, is your ammunition depot in your air force base?"

There was a look of shock on the soldier's face. He didn't know how Qin Yuan knew about it. Could it be that there was an inner ghost among them?

"Sorry, no comment, after all, I'm just going to the corpse now."

"You kid is really good at learning and using it now!"

But Qin Yuan suddenly stood up with a smile. He looked at He Chenguang who came out of the room with a small laptop in his hand.

"Brother Qin, it's done, the coordinates have been found, we can set off."

At this time, the soldiers sitting on the ground realized that Qin Yuan had no intention of asking him, nor did he intend to get the information from him. They directly used high-tech means to celebrate their system and walked to the coordinates of the air force base.

This is simply a combination of the modern battlefield and the technological battlefield, and their special operations team is like this

They infiltrated in such a secret way, and no one has discovered them until now. This ammunition depot is more than ten kilometers away from their main battlefield, and there is no way to notify them.

When Qin Yuan walked past the soldier, he patted him on the shoulder, "Brother, relax, this is just a game."

We all know that this is a game, but this is a game that simulates a real battlefield, and they still lost. To be honest, it would be really scary to encounter such an enemy on a real battlefield.

Qin Yuan and the others have grasped the coordinates, which are about 300 kilometers away from here. Thinking of this, the soldier was relieved. After all, the distance is so far, if they meet their Red Army patrol halfway, they should be spotted.

And with such a long distance, even if they had to forcibly march, they would not be able to arrive at least until the next night.

However, this soldier completely underestimated Qin Yuan's ability. Qin Yuan and the others did encounter a Red Army patrol team on the way. It happened to be a coincidence that Qin Yuan and the others easily eliminated the Red Army patrol team, and then swaggered and drove their car for a change. top clothing.

In the office, Gao Shiwei looked at his watch and looked at his watch. It has been 15 minutes since the time he said before. Qin Yuan should not be so unpunctual. Could it be that something happened on the road?

Commander Zhao was gloating at the show, he thought that now that their special operations team was on board, he wanted to see what tricks he could come up with. To be honest, the results were really good, at least the situation on the ammunition depot was over. stabilized.

But now it seems a little exaggerated.

"Captain Gao, what signal did you say you could receive?"

Gao Shiwei smiled awkwardly, why is this Qin Yuan so unreliable all of a sudden? Before releasing his pigeons, he agreed that as long as he found the coordinates, he would immediately send a signal to them, and then the heavy fire weapons on this side would be fired towards that side.

He originally wanted to contact Qin Yuan, but now that Qin Yuan had entered the enemy-occupied area of the Red Army, if other electronic signals were detected, it would be easy for them to be exposed.

Head Zhao looked at Gao Shiwei's embarrassing expression, but instead he looked relieved. In this case, he himself is not ashamed. It seems that everyone's soldiers are similar, and they will lose the chain sometimes.

He walked over, patted Gao Shiwei on the shoulder, and handed him a cup of hot tea, "In fact, Team Gao, you want to open some, anyway, everyone is the same, after all, it is very difficult. As for the surprise you mentioned, I'm looking forward to it."

Gao Shiwei was cursing in his heart, this old boy was just watching the fun on purpose, and he still said it so nicely.

However, at noon, the Red Army, which had been attacking them before, suddenly began to retreat, and there had been no air strikes for more than three hours.

After a while, the office phone rang, but I didn't expect it to be from the Red Army Command Post.

The Red Army command post was very angry, "Commander Zhao, I really didn't expect that your trick is really six. I really underestimated you, and even blew up my ammunition depot and my air force base."

Commander Zhao was surprised and happy when he heard this. This is too exaggerated. He just took care of the air force base.

"Oh, after all, you also know that this is a simulation of a real battlefield. Although we usually have a good relationship, there is nothing we can do about it. We all act according to orders."

"Let me tell you, Old Zhao, you don't want to get close to me here, kid. Don't think that if you blow up my air force base, I won't be able to deal with you. My soldiers are not vegetarians either!"

After the other party finished speaking, he hung up the phone, and Commander Zhao was so happy that he almost jumped up. No wonder he said why there was no air power all the time. It turned out that the air force base was gone.

He pulled Gao Shiwei excitedly, "Hahaha, it's really enjoyable, Captain Gao, your move is really unexpected, I have to say, the red blood cell team really did not disappoint."

This guy really has a double standard, and he changed his face in an instant. He was a little gloating just now, but now he knows that the red blood cell team has taken over the entire air force base.

Gao Shiwei didn't care about these things, but something might have happened in the middle, so Qin Yuan didn't let this side cooperate.

"Taking their air force base is certainly a good thing, but this is not what the upper hand wants to see. What they hope is that our team can fight with your large army. If the battle breaks out this time, it is very likely To our side."

Head Zhao nodded, but he agreed with what Gao Shiwei said, "Captain Gao, how about this, anyway, the command right is in your hands now, and you can send my soldiers as you please, and we will fight wherever you say, what should we do?" We will do whatever we want."

This guy was finally convinced. After all, if he didn't take the initiative to give up, he would be completely hopeless, because their red blood cell team was still holding up the entire battlefield, so the leader couldn't see the effect at all.

What they need is to see the combination of special warfare soldiers and these mechanized troops.

Can another effect be achieved? so this time

Gao Shiwei is also the first innovation. Before commanding so many people to fight, he only needs to manage his own team well.

Of course Qin Yuan knew this truth, so he silently lurked in their red army's defense.

If he could, he could even directly find the command post of the Red Army and take them all at once, but this is too boring, and it is exactly the same as their previous style of play, without any reference value.

So he and Gao Shiwei have already discussed another way of fighting, which can mobilize the entire blue army to fight a counterattack together.

Gao Shiwei also quickly made a command. Although he had never commanded such a large-scale one, his tactical pace was fine. Now with Qin Yuan's cooperation and without air attacks, their field tanks came in handy.

Thanks to the soldiers, they can grit their teeth and rush forward. They have been attacking them in the air before, and there is no way to do it. Now they will start to take the initiative.

Gao Shiwei sent out the tank company completely, plus two companies' strength, and on the battlefield, he boldly left only one company's strength, plus two guard platoons as duties.

Moreover, he completely dispatched the Wolf Warriors squad, so that the Wolf Warriors squad would act as the main charging force in the front, and could also combine with Qin Yuan and the others, cooperating internally and externally.

The situation on the Red Army's side is not optimistic either, because with Qin Yuan's intervention, a lot of troops have been lost.

Worse news came, the small ammunition depot on their side has been completely destroyed. Now he can say that he has no air support behind him, and now all the ammunition is concentrated in their defenses, at most only last for a day.

But the Red Army didn't give up either. He thought that if he could persist for a day, he might as well gather all the soldiers and make a big charge.

An ambush can be fought by using the terrain, but she didn't expect that the blue army's speed is very fast, and their tanks have already begun to press towards the position, because such terrain is really suitable for tanks.

The bad news of Jieliang made the Red Army command post have to give it a go, because they didn't have any backup force. It can be said that the key position for the reversal of the battle this time is Qin Yuan's red blood cell team.

If Commander Zhao had used the red blood cell team to send him to deal with the air force base in the first place, the battle might have ended long ago, instead of dragging on for three or four days.

The morale of the blue army also increased greatly. Everyone wanted to get back the face they had lost before. Soon, the blue army was suppressed by the battlefield artillery.

They broke through the two lines of defense of the Red Army. They wanted to make a big charge before, but they couldn't charge it at all. In the face of such heavy firepower.

They could only keep dodging, and were completely broken up. The formations formed again and again could not withstand such heavy fire attacks at all, and a large number of soldiers were eliminated.

The remaining soldiers and the guard platoon began to cover the command post and began to retreat. They could only push the line of defense to the back. As long as they persisted, they might be able to fight an ambush in the jungle and persist.

It's just that Qin Yuan's red blood cell team is still hidden behind them.
