

Special Soldier 1261

Chapter 1261: don't be so arrogant

Not to mention these female soldiers, but today really opened his eyes.

As expected of a team trained by the God of War, every item is so strong, and their offenses are all ladder-shaped, and soon someone will make up. They have no time to react, and they are directly broken by them layer by layer.

Liu Chuan sat on the ground a little decadent, he didn't expect to be directly attacked so soon.

At this moment, the soldier named Daniu was eliminated by Xia Ying with a single shot. Xia Ying's marksmanship is also very accurate, which can only be regarded as a middle-level level in their team.

Unexpectedly, Daniel was very unconvinced after being eliminated, he rushed out again, and Li Hong in front warned him.

"This comrade asks you to abide by the rules. Now that you have been eliminated, you are equivalent to a dead man on the battlefield. Do you understand? You have already lost."

"Hehe, how can it be solved with one shot, let me tell you, I don't accept it."

Daniu quickly jumped down from under the opposite scaffolding. Long Baichuan and the others saw this scene outside, and he hurriedly asked someone to use the walkie-talkie to tell him that it was too dishonest for Daniu's assistant to follow the rules at all.

"Yes, his acting is over, please abide by the rules and take a stand immediately, you have been eliminated!"

But Daniel simply threw the headset on the ground, and then rushed towards Li Hong and the others. This guy was full of tendons, and he was two heads taller than Li Hong.

No matter what, he is not convinced, he can win with melee combat, why should he be killed with a single shot, he won't do it.

Li Hong was standing in front, she was the smallest in stature, she didn't expect that instead of retreating, she went forward instead, which made Danu unexpected, but the next second he was punched in the abdomen by Li Hong.

Taking a few steps back, he didn't expect the little girl to be so strong.

"I'm warning you once, it's better not to come here again, or I will really hurt you."

"It's my business to hurt me, it has nothing to do with you, but don't be so arrogant."

Daniu was ready to rush out again, this time he saw the timing and grabbed Li Hong's shoulder. Qin Yuan looked relaxed from the outside, because he knew Li Hong's ability very well.

Unexpectedly, it was Li Hong deliberately releasing water to let him grab the shoulder. With Daniel's strength, Li Hong jumped directly onto Daniel's shoulder.

Immediately afterwards, a pair of scissors pinched Daniel's neck fiercely, and he fell to the ground like this, his face turned red for a while, and he couldn't breathe at all.

As Li Hong deepened his strength, he quickly stretched out his hand and kept patting the ground. When Li Hong let go, he coughed violently on the ground. He didn't expect that the female soldier he looked down on before was so strong, and All are skill moves.

When the onlookers saw this wonderful scene, they couldn't help but stand up and applaud. In their traditional impression, they felt that female soldiers were at a disadvantage in close combat, because they definitely had an advantage compared to strength. .

However, Qin Yuan did not focus on special training in terms of strength in training them, because after all, this is a difference in certain aspects. What he trained was more skill. He is short in stature, but he can directly knock down a big bull.

Chapter 1262: Someone has to carry the burden for them

When Li Hong and the others came out, they won everyone's applause. Liu Chuan was silent beside him, and Zhao Min jokingly said when passing him:

"Comrades, thank you for your hard work. You will be our training partner starting tomorrow, but being our training partner is very hard, just like just now."

Just as he was talking, Daniel came out in pain, clutching his shoulders. To be honest, he didn't expect to be beaten so badly by the female soldiers, and he didn't even have a chance to fight back.

In this competition, their male soldiers had all kinds of advantages, both in terms of geographical location and numbers. They did not expect to be completely defeated by the female soldiers in this situation.

Long Baichuan immediately agreed to give them the official authorization of the Blade Commando to start accepting the mission tomorrow, but the environment they have to face will be worse than Jiang Xiaoyu and the others.

After the competition, Long Baichuan called them to the office and held a simple meeting for them, mainly explaining the environment they will face in the future.

They want to enter the enemy's interior, especially the special teams of some countries. After all, they have caught a lot of spy torpedoes in the sea in the past two years. These torpedoes were sent from those organizations to steal their information. confidential.

Although they have salvaged a lot in the past two years, this is a temporary problem rather than a permanent solution. After all, the organization has been producing continuously, and they are often unpredictable.

So they need to be able to sneak into those organizations, steal the top secrets, and then let them directly escape and destroy these organizations.

What Long Baichuan said was also very clear. He also explained the danger of these missions. Unexpectedly, these team members were very calm, as if they had already accepted it.

"Are you sure you understand the dangers I'm talking about? This can be said to be close to death, especially for you women, it will be very dangerous inside."

But this is what they have to do. Someone must carry the burden for them and guard the safety of the people.

"Dragon team, don't worry, the instructor has already told us a lot before this, so we know what we are going to face next."

It seems that there is no need to say any more, Long Baichuan also asked them to go down to prepare for tomorrow's ceremony. These female soldiers are very happy. After training for so long, and after training to eliminate all kinds of devils again and again, they are finally formal. Become a commando commando.

Qin Yuan was about to leave too. Watching them come out of the office, Qin Yuan went over to say hello to them. He was about to go to other commando training, and now he wanted to increase his strength through these aspects. One's own meritorious service value, and then can continuously train a better special warfare team.

After their team is formally established tomorrow, Qin Yuan will be able to receive 20,000 meritorious rewards.

At the time of parting, although everyone was a little bit reluctant, they had to face it anyway. Before they had time to say goodbye in detail, the emergency assembly whistle sounded, and they rushed over subconsciously.

Long Baichuan stood in front with a serious face. To be honest, he didn't expect the mission to come so suddenly, but this was the news from their lurking members inside, and he hoped they would send their team members in as soon as possible.

Because the team member who is lurking now is about to be exposed

Chapter 1263: Seems to have evaporated

Therefore, he must evacuate as soon as possible, and a new person must be handed over to him, otherwise this line will be completely broken.

Long Baichuan didn't suggest either, and directly passed the information to Qin Yuan. They have already invested six comrades in this line, so they must not lose the chain at this time.

This organization is called the Baili Group. It is a huge military group in Myanmar. It is a legal existence there. Except for some military transactions, the more important thing is that they have found out that most of the radars are from that place. from.

Moreover, the latent radars they salvaged in the past two years basically showed that they came from this group, so they had to sneak in, find a suitable opportunity, and then completely destroy this organization.

Qin Yuan originally wanted to take over this task and sneak in, but Long Baichuan felt that since the special operations team had already been trained, he should be given this opportunity and let him see his true strength.

As for lurking, they have received long-term training, so it is not a big problem. Qin Yuan also knows that they should let them do it freely, and this time can also show the advantages of women. It is the best time for them to lurk in.

"You go ahead and do it, just follow our usual training. I believe in your ability very much, and you will definitely be able to do it."

In this way, the Sharp Blade commando team also set off. This is their first mission. Qin Yuan doesn't know who to send, because they also need to support them in the periphery. In addition to such latent missions, they don't know what to do at all. time will end.

Originally planned to give them an authorization ceremony the next day, it seemed that it was too late, and they had to complete the handover as soon as possible.

"You all came back safely. When you come back, we will definitely hold a conferring ceremony for you in a splendid manner."

Qin Yuan was very confident in them, and looked at Long Baichuan's worried eyes, "Don't worry, Dragon Team, the team I trained is absolutely fine, let's wait for their good news together."

Qin Yuan didn't get involved too much. Now that the training mission here is over, he plans to go back to the brigade to check the situation. Recently, Long Xiaoyun has been supporting there alone.

In addition, there is still one thing in his heart that has not been let go, and that is the masked man after such a long time This guy has not moved at all, as if the world has evaporated.

And Wells, this guy hasn't contacted him for a long time. He pays attention to the news every day. He doesn't know what happened. The organization disappeared in an instant.

23's clues are completely broken. After all, he has already been discovered, and the mask is so cunning that he won't suffer twice in the same place.

The only thing that makes Qin Yuan gratified now is that his system has been upgraded, and he is no longer afraid of the voice operation performed by the masked man.

Now he has to keep accumulating merit points. After all, the masked man is too cunning, and his organization is still researching, so he has to improve his system as soon as possible to reach a higher level.

Qin Yuan just walked into the brigade and hasn't been back for a long time, but there was no one on the training ground. As soon as he looked up, he found a red dot aimed directly at his forehead.

Chapter 1264: Entry into astronaut selection

He Chenguang, who was lying on the opposite commanding height, was very excited, because this was one of the few times when Qin Yuan was caught.

In the usual training, there has never been such an opportunity, because Qin Yuan's reaction speed is 100%, and this time he has seized the opportunity. Qin Yuan has not come back for a long time, and the special warfare team is like returning home. , suddenly relaxed his vigilance.

He couldn't help shouting excitedly for Li Erniu and the others to come over quickly, "Erniu, what are you doing, boy? Hurry up and shout, now the captain is locked by us."

However, when Li Erniu was observing, he found that Qin Yuan had disappeared. The speed was too fast. At most, he turned his eyes away for a few seconds at most.

Soon he got used to it, the two raised their hands, turned around and Qin Yuan was already standing behind them.

"Brother Qin, how can you do it so fast every time? I think we've already achieved you this time, but I didn't expect you to turn against me."

"Boys, you guys are really too idle. No wonder you play tricks like this with me. But, it's really good. I just came in and I can find that it has made great progress compared to before."

He Chenguang shook his hand helplessly. He had never caught Qin Yuan before, so he was really used to it.

Under Qin Yuan's questioning, he realized that with the increase in the number of special warfare teams he trained recently, many places no longer need to apply to them, but use their local special warfare teams to solve tasks directly, so recently they It can be said that they are very idle, and they usually focus on overseas tasks.

"Brother Qin, you don't know how idle I have been these two days. I have already taken a look at how many bricks there are on our training ground."

"Then what's the situation with their wolf squad?"

"Basically the situation is the same, but Dragon Team seems to have gone somewhere to guide and study these two days. Anyway, there is no task, so Gao Team let her go."

After all, he just came back, Brother Qin still had to go to Gao Shiwei to report first, he didn't expect to find Long Xiaoyun was there after he went in, didn't he say that she was going to do some learning and guidance tasks?

"You brat really said that Cao Cao Cao Cao will be here, come here quickly, I just have something to discuss with you."

Qin Yuan found that the folder in Gao Shiwei's hand turned out to be that the aviation base was recruiting special training team members, to be precise, recruiting special training astronauts.

Qin Yuan was a little strange looking at this document After all, he still knows about the selection of astronauts, basically they are divided into several categories, generally they are selected from Air Force fighter pilots, and there are scientific and technical personnel, It's inside their air base.

Basically, it revolves around these two categories, and there are some other special ones, especially experts in this field from medical psychology can also conduct special training.

"Did I read the document Gao Dui correctly? He said it was a special recruit from the whole ** area, and this is the first time."

"It's not that exaggerated. It's not that special recruits are made from all the military regions, but two people are recommended from each of the five major military regions, and then selected."

A total of ten people were selected from the five major regions, and then screened, and only three people were left in the end. This process was very strict.

The main reason is that the current situation is quite special, because they are still using the International Space Station.

Chapter 1266: Unexpectedly, Qin Yuan!

There are many things that he can't take care of, and this kind of training is completely confidential. If he is selected later, he doesn't know how long it will take.

The main thing is to tell Li Kang to be careful about concealment, and then try to beware of Long Xiaoyun over there. Now it has been confirmed that this guy is a traitor, and he also asked Li Kang to be prepared. If it really doesn't work later, let Zhang Meng find a way to let her eat A little medicine.

Just stay asleep and avoid revealing their positions, because now the masked man doesn't know what's going on, and suddenly cut off all contact, he is always worried about what big moves this guy is making.

Now you, Kang, and the others are also people with a system, so you must protect them. If they are used by the masked man, it will be more troublesome.

Although Li Kang's strength is not as strong as Qin Yuan's, he is absolutely fine in dealing with people and managing interpersonal relationships. After all, he has been a master in the mall before.

If you say that he is also an old fox, if you want to hide Long Xiaolai, there is absolutely no problem. He reassures Qin Yuan that he will take care of the problem here.

Qin Yuan originally wanted to explain a few more words, but when Long Xiaoyun came over, he could only hang up the phone in a hurry, but Long Xiaoyun still found out a little clue.

"I said, why are you always so mysterious recently? What are you doing? Besides, with our relationship, do you still need to hide it?"

"No, it's just that the SWAT team members who helped them train had some questions and wanted to ask me."

Qin Yuan quickly found an excuse to prevaricate, and the person who came to pick them up at this time was also urging them to get in the car quickly.

Sitting in the car, the two were confused about the unknown location. Even Gao Shiwei didn't know where they were going, including now that they were about to leave, they didn't know the exact location.

The car drove for more than four hours, wobbly, and now they are just driving, and then they will be picked up to a specific airport, where they will take a helicopter to go there alone.

At the beginning, you can still see the highway, but the road behind is completely dirt road. The road is very bumpy. I have to say that the driver is also very patient. No one said a word along the way, just set off in silence.

After more than three hours, they finally arrived at a very small airport. They just got off the car, and then directly boarded the helicopter without making too many stops.

In this way, they changed cars and passed the helicopter and finally came to the selection base. This is not the aerospace base they had been to before, but another independent place.

Just as Qin Yuan and the others got off the plane, they saw a staff member in overalls approaching and greeted him warmly.

"I really didn't expect it, Qin Yuan! You actually invited all of your great Buddhas here, and you, Team Gao, are really willing to do so."

Qin Yuan glanced at the staff member who spoke. To be honest, he didn't know this person. The person in front of him was about 40 or 50 years old, and he seemed to be smiling.

"By the way, look, I forgot to introduce myself. Just call me Mr. Zhang. I'm the person in charge here. I've heard your name before."

"Mr. Zhang, it's actually not that exaggerated. Everyone is doing things to serve the people, and it's just a gimmick given by them. I feel the same about the God of War or not."

Chapter 1267: no problem at all

At this moment, Mr. Zhang looked at Qin Yuan in front of him, and felt that this young man was much more low-key than the God of War he knew. The two walked forward and saw two other people sitting beside them. According to Mr. Zhang, this is their space base.

Only Qin Yuan and the others arrived in the other major areas, but the others arrived soon after.

The two of them also stood up and greeted each other slightly. After a while, the people sent from the western war zone arrived. Qin Yuan took a closer look, but unexpectedly, he was still an acquaintance.

Long Xiaoyun didn't know her, so Qin Yuan patiently explained to her that there was one person sent by the western war zone that he knew. This person was Yang Chongming.

Speaking of which, this guy is still his subordinate. After all, he went to the air force base over there to guide him many years ago. At that time, this guy was a combat staff officer there.

Later, after losing the bet with Qin Yuan, there was no news, but others said that he seemed to go to a military academy for further studies.

Just as Qin Yuan was talking, Yang Chongming came over and quickly greeted Qin Yuan first.

"Captain Qin really didn't expect to meet you here, but think about it. After all, everyone who comes here is a great god. It's a great honor to be with you."

Unexpectedly, after seeing Yang Chongming for a few years, his personality has become much more restrained. This is not like his previous personality. Qin Yuan remembered that this kid was very unconvinced at the beginning, and he was defeated by himself later, and then he didn't have anything to say.

I didn't expect to be so polite when we met again now. As the saying goes, don't reach out to hit a smiling face, Qin Yuan also stood up to greet him.

This morning, people from several other station areas came, the only difference was that there was only Long Xiaoyun, the only woman.

Just when Qin Yuan was curious about when it would start, Mr. Zhang walked over with a solemn expression, and he called Long Xiaoyun aside alone to prepare for a conversation.

At this distance, everyone can't hear it, but it is no problem for Qin Yuan. His hearing is not to mention this position, he can hear it no matter how far away.

It turns out that the selection conditions for astronauts are also very strict, especially for women, because when they go into space, some unknown factors may follow, especially in the long-term weightlessness in space, which will cause some irreversible damage to the body. damage.

It will have an impact on fertility in the future So for the sake of safety and caution, Mr. Zhang called Long Xiaoyun to the side to talk. If she still has to consider business issues in the future, it is recommended to give up.

When talking about this question, Long Xiaoyun turned his head and took a meaningful look at Qin Yuan. To be honest, Qin Yuan does not lack women, let alone An Ran has given birth to a child for him now, and the others are out of the question .

Thinking of this, he looked at Mr. Zhang more firmly, "Don't worry, I have already made a decision. I have already considered it before coming here again. I will not regret my choice."

Mr. Zhang saw that Long Xiaoyun was also a relatively persistent person, so he didn't say any more, after all, he had already persuaded him where he should be persuaded.

He has already informed of the risks that should be involved, and in addition, the selection is very strict now, and it may not be successful. You must know that almost no female astronauts have been able to go to space in recent years, only a few other astronauts on their side The country has never had such a precedent.

Chapter 1268: design space station

Long Xiaoyun insisted on her decision even more when she heard this, she felt that she would be able to win glory for the country and become a domestic precedent.

After the conversation, Mr. Zhang gathered them together. There are now 12 people in total including the people in the aerospace base, and three people will be selected from among them.

Qin Yuan usually selects other people, but he did not expect to enter such a selection today, and the selection of astronauts is really different, not as fast as he thought, instead, Mr. Zhang settled them down first, and let them go first. adapt.

This is a completely independent area. After Qin Yuan and the others entered the compound, he turned his head. There was a high wall outside, and a power grid was set up. There were patrolling soldiers around. It seems that the secrecy measures here are also very good. , and all electronic devices are strictly prohibited in this place.

Under the leadership of Mr. Zhang, they settled in the dormitory. Everyone has a separate room. The conditions are very good, not only that, but their food conditions are also very good.

It doesn't look like they are here for selection, it feels like they are on vacation. Among these people, except for the people in the two aerospace bases who don't know Qin Yuan, the people in the other theaters all know Qin Yuan. Mars.

But among them, they are special, only Qin Yuan and Long Xiaoyun, because although they came from other theaters, they all belong to the Air Force Brigade.

At present, the selection of their astronauts is very strict, because first of all, it is the level of physical fitness. For example, the selection of their Air Force Brigade is also very strict. If you want to become an air force, you must first have excellent physical fitness. Speed is tested.

However, fighter jets are very simple for Qin Yuan. The only person he has driven here before is Long Xiaoyun, which is a new starting point for him. It is very difficult. The first level will be eliminated.

The next morning, the staff took them for a physical examination, which is a basic examination for astronauts. They must be healthy and free from diseases, and their mental health must also be checked.

The inspection items were too detailed, and it took them a whole day to complete all the inspections. It can be said that they talked about it from beginning to end, even whether they were allergic to anything.

Long Xiaoyun had never been in contact with it before, so she was very nervous during the inspection, and she was very worried that she would not even pass the inspection.

However, fortunately, Qin Yuan has actually been encouraging her from behind, telling her to insist on finishing the examination, and after the basic physical examination, other selections will begin.

First of all, the selection training they conducted turned out to be breath-holding training in a confined space and the ability to operate in a confined space.

They need to complete the precise construction and installation of equipment in a confined space, and complete it within the specified time.

Everyone started at almost the same time. The equipment and measures on this side are very good. Everyone operates independently. Not surprisingly, Qin Yuan completed it first. This is really too simple for him.

It was the first time for Long Xiaoyun to practice in such a confined space. Fortunately, she succeeded in the first attempt, but her results were not very good, and she was the last among these people.

Chapter 1269: what happened

After all, their fields are different. The others are at the level of combat pilots, but Long Xiaoyun is different. They have more or less received such training before.

The subsequent training became more and more difficult, and Qin Yuan also appropriately used merit points to increase Long Xiaoyun's physical skills. Soon she was able to adapt to the intensity of the confined environment.

In this way, after a week of basic selection, two people from the southern combat zone were eliminated. After all, this thing is not suitable for everyone, and each item is very strict, which can be said to be one in a million.

This is what Mr. Zhang didn't expect, because Mr. Zhang was in the experimental base recently, and the other selection work was done by his assistants. He didn't expect Long Xiaoyun to stay.

Before, he always felt that women's physical conditions were not suitable, but he didn't expect Long Xiaoyun to persist.

In the future, they will have to conduct anti-vertigo and weightlessness training selections. These training selections are not a problem for the players who have been flying fighter jets for a long time. This is basically their daily training.

As the selection progressed, people kept leaving because their bodies couldn't adapt to such a high-pressure environment. They wanted to enter the space capsule, which was a completely closed environment.

These people can be regarded as the top talents of the major military regions, and they were gradually eliminated. In the end, only Qin Yuan, Long Xiaoyun, Yang Chongming and a space base were left.

Among the four of them, one needs to be eliminated, and then they will officially enter the final training stage. After they become pre-selected astronauts, they will have to undergo special closed training. After the training, they can officially enter the take-off stage.

Mr. Zhang was very surprised by Long Xiaoyun's performance. She was better than men in many aspects, and she completed all these projects one by one.

It seems that they are going to create a historic scene, which is to successfully train female astronauts. Mr. Zhang was very excited, and he immediately held a meeting. After all, judging from the current achievements of several people, Long Xiaoyun is very stable and can definitely enter the finals.

After the final elimination, only Long Xiaoyun, Qin Yuan, and Yang Chongming were left. The selection here has ended, and they will be accompanied by the recent closed training.

The main thing is to simulate life in space, because it will take at least a month for them to go to the space station this time. During this month, they will collect samples, record experiments, and transmit data back to the ground.

Mr. Zhang was very surprised by Qin Yuan's various physical qualities and assessment standards. This can be said to be the best data they have obtained since their research.

When everything is ready, they just need to wait for the final preparations, and then they can carry the manned spacecraft to the International Space Station together.

However, something went wrong at this critical moment. In the emergency meeting they held, Qin Yuan watched the staff rushing to the laboratory one after another, not knowing what happened.

Moreover, the previously set time has also begun to be pushed back, and it has been postponed for a whole week. At this time, Mr. Zhang found Qin Yuan.

"It is very likely that our project this time will be postponed indefinitely, because there is no consensus with the US side."

What's going on? Fortunately, they only found out after Mr. Zhang's explanation.

Chapter 1270: Plans can't keep up with changes

It turns out that the International Space Station has indeed allowed their manned spacecraft to enter after their communication.

But at this time, country A suddenly stepped in. They broke the previous contract and entered in advance. In this case, the International Space Station can't accommodate so many people, so they can only postpone it.

Qin Yuan was a little puzzled when he heard this, "Then when will this delay be possible?"

"This is also a question we have been communicating with recently. After all, if it is not our own space station, it must have their permission. Their answer is to be determined."

This matter is really aggrieved. He clearly promised something before, but now he directly denies it. Everyone is ready. Mr. Zhang has been visibly aged recently.

For this manned spaceflight program, they have prepared for six full years. They never expected that at this juncture, all the preparation work and all the research experiments were ready, but they temporarily regretted it.

As for the country, it is just a plan. After all, these things need to be reported in advance. It seems that they did it on purpose. After all, it is their space station.

Yang Chongming clenched his fists when he heard this. Isn't this an obvious bully?

"What the **** is this? Is the contract we talked about before completely void? This is too exaggerated."

"We really can't do anything about this. After all, we haven't developed it yet in space. We can only use their International Space Station, so..."

Mr. Zhang sighed silently. He turned his head to look at Qin Yuan and Long Xiaoyun. He had to say that the data of the two of them was the best in the past two years. It can be said that they will be able to complete the task after they go up, but it is a pity that there are some things The important thing is to make a wish.

He didn't know if his old bones could wait until that time. Many things were too late. He had devoted his life to the space manned program, but the plan couldn't keep up with the changes.

Mr. Zhang bent over and walked out slowly. He knew that it was meaningless to talk to them, because it could not be solved at all. Their staff kept communicating with them, but the communication had no effect for more than half a month. .

After all, it's not his own stuff, so there's no way to be tough. If people say they won't let it go, they won't let it go. Yang Chongming's heart is full of anger. This is really too exaggerated. I don't know where it came from It was completely bandit behavior, he slapped the table and stood up, "Then why don't we build our own space station, is it really that difficult?"

The elder just walked to the door, and smiled helplessly. This is not to say how difficult it is, but to build their own space station. All kinds of parts are really very difficult.

At present, they are only halfway through the research and development of the blueprint, because it involves various materials in it. Many materials are scarce on their side. It is not a problem that can be solved domestically. It depends on whether foreign countries sell them some things that are completely rejected by the United States. for monopoly.

After Mr. Zhang finished speaking, he laughed at himself. It seems that he really can't wait for that day. They did have such an idea before, to build their own space station.

But according to the current situation
