

Special Soldier 1271

Chapter 1271: break the embarrassment

It will take at least ten years to achieve another breakthrough. After all, after so many years, when others are running, they have just learned to walk, and some things are really inferior.

At this time, Qin Yuan suddenly stood up, "Mr. Zhang, if this is the case, then let me design it, and we will take pictures of our own space station in a week."

Zhang Lao was stunned when he heard this, including the staff next to him, what's going on? Has Qin Yuan not understood yet? It has been made very clear just now, this is an impossible task, let alone a week, they have not been able to do it in the past few years.

A staff member only thought it was funny when he heard this. He felt that people who can say such things are really ignorant, and they are not gods of war.

"I said Captain Qin, please clarify the situation. We have made it very clear just now. Don't talk about such childish topics. It will easily make people feel ignorant."

At this moment, Long Xiaoyun and Yang Chongming felt very embarrassed beside them. After all, no matter what, they couldn't speak so directly.

"Oh, then I think it's just because you are incapable that you can't make it. Give me a day, and I'll get the blueprint right away."

The reason why Qin Yuan is so confident is because he has seen the blueprint of this space station in the system mall, and he did not take it seriously at the time, because its main target is still an aircraft carrier.

And with his current merit points, the blueprint can be exchanged, so he is very confident that he can provide the blueprint within a day, but the staff around him feel that he is completely talking nonsense.

"I don't think this guy is awake? It's okay to daydream, but we are all adults, so it's really ridiculous to say such a thing."

"I'm not kidding, I'm serious, I can design the blueprint today."

"Do you know what you are talking about? Look at the minimum level of education we are doing is a Ph.D. We haven't done it after so many years of research. You spent a day doing it?"

"Then what if I really figure it out?"

"If you can really figure it out, then I'll eat it right away."

Because he felt that this was simply impossible. They had spent so many years of research, but they only knew that there were a few superficial things and many things that they hadn't been able to understand in depth.

Qin Yuan showed a mysterious smile'walked over and patted him on the shoulder, "Sometimes don't put your ignorance on others, because there is a gap between people."

Mr. Zhang also stepped forward at this time, and he hurriedly broke the embarrassment, after all, it would probably get worse if he continued.

"Everyone, now is not the time for internal strife, Qin Yuan, I know you are thinking of everyone, but now is really not the time for joking, this matter is very serious."

"I know this matter is very serious, so I dare to say such a thing. I can provide drawings in one day, and I will do what I say."

Qin Yuan can take out the blueprints now, but if he shows them out now, others will definitely not believe it. He still has to go through the process that should be followed. He used this gimmick to forcefully enter a laboratory directly.

The people around were watching the excitement, and everyone thought his behavior was ridiculous. They wanted to see if this guy could really come up with the blueprint, so they wouldn't make a joke then.

Chapter 1272: blueprint of space station

Long Xiaoyun ran forward, because this is not their special warfare team. Although she usually trusts Qin Yuan, this space station is not a joke, it is different from all the fields they have come into contact with.

She knew that in this place, there would no longer be someone protecting them like in the brigade. If something really happened, it would be more troublesome to take some responsibility. After all, no one would help them deal with it.

The staff member who was arguing with Qin Yuan just now was even more disdainful when he walked into the laboratory.

"What does this guy mean? I admit that the qualifications of his astronauts are indeed very good, but he did not do these scientific researches. Does he know how expensive the instruments are? He probably won't be able to earn back one instrument in his life." Bar."

This is indeed a bit too much, Mr. Zhang hurried forward to stop it, "Can science be measured by money? Anyone can have the spirit of research."

"Teacher, I know it's not right to say this, but look at his tone, it's too arrogant. For us, researchers have been studying things that haven't been developed for so many years. What he said just now is so easy, isn't it true? Slap us in the face?"

He just felt that what Qin Yuan said was too ignorant, because it was something that was impossible to realize.

Long Xiaoyun was even more worried when she heard this. She wanted to enter the laboratory, but Qin Yuan had already locked the door and no one could get in. Mr. Zhang also came over, and he sighed silently.

I don't know how to persuade him. He is very optimistic about Qin Yuan, but at this moment he also feels that what he said is a bit ridiculous. How can he provide blueprints in a day.

They have been doing research for several years, but they have only made a little superficial progress, because they started later than others, so many things can only wait for others to return after studying abroad.

And some people will choose high-paying jobs after studying overseas and stay overseas directly. This is also the reason for a large number of researchers.

There hasn't been much progress in these years, so I can only send the hope of others. Mr. Zhang looked at Qin Yuan and shook his head. Let him do whatever he wants, anyway, it only takes a day.

Long Xiaoyun was very worried outside, at this moment Yang Chongming stepped forward, he took a closer look at the situation inside the laboratory, blocked by the thick glass, everything could not be seen clearly, and no sound could be heard I think he was a little too impulsive this time. Although his abilities are very strong, this is a scientific research after all, and we are not good at it at all. "

"But what he usually says is very sure, and he will do it in the future. I have never seen him do something that failed. I think he is very likely to succeed in research."

"Captain Long, I think you are a bit too blindly confident like this? Think about it, the scientists here haven't researched it for so many years. Is it possible in just one day?"

Long Xiaoyun frowned when she heard this, she could only keep praying in her heart, she could only mention that it was really done as Qin Yuan said, otherwise it would be a big joke.

At this moment, Qin Yuan easily entered the system mall. He had already seen the blueprint of the space station in his memory. At that time, he didn't pay attention at all. Now that he looked carefully, he only needed 50,000 merit points.

Chapter 1273: I want to add half sugar and half milk

It can be exchanged, and now his merit points are very sufficient, absolutely no problem.

Qin Yuan immediately clicked Exchange, and soon a broad blueprint appeared in his mind, and then the blueprint gathered into bundles of ideas, which gradually became a paper blueprint.

The blueprint was displayed on the table, and the corners of Qin Yuan's mouth rose slightly. This blueprint was only made for them to see. All the steps, all the parts, and the instrumentation were all kept in his mind. Even without this blueprint, he would It can also be made.

Long Xiaoyun waited outside for over an hour, when Qin Yuan finally opened the door.

She stepped forward anxiously, "How's it going? Did you draw it?"

"Just a little more time, now? I need a cup of coffee."

what! Not only the staff outside Long Xiaoyun were stunned, what is this guy talking about? The staff member just stepped forward. He originally wanted to go straight into the laboratory, but was stopped by Qin Yuan directly.

Qin Yuan just stretched out his hand to cover his shoulder, but he didn't expect this guy to be unable to move, "What do you mean? Can I not even enter the laboratory? You are our territory. Logically speaking, people like you They are not eligible to enter."

"Whether I am qualified or not, Mr. Zhang has agreed just now, I can use what I need here, and now you have no right to enter."

"You! I tell you, don't go too far, and what are you doing now? Are you delaying time? It's no use telling you."

"Hehe, you need to worry about delaying the time. I will naturally hand over the blueprint later. Now I just need a cup of coffee."

This guy's tone is still so arrogant. This staff member feels that he has been provoked. If he really researches it, then all his years of reading books will be in vain.

He wanted to see what kind of joke this guy would make later, so he gritted his teeth, suppressed the anger he was about to get angry just now, and then ordered the staff outside to prepare a cup of coffee.

"Okay, if that's the case, then I'll see what tricks you can come up with, and now I'll let someone make coffee."

"By the way, I want to add half sugar and half milk, remember the temperature should be at 45°C."

This guy is really arrogant and Qin Yuan stepped forward and patted him on the shoulder, "This overseas research doctor, isn't he? By the way, I haven't had any drinks like yours. How about going to make me a cup of coffee if the coffee made by the doctor is not as good as you?"

"Do you know what you're talking about?"

The overseas doctor was already very angry. He felt that he was being teased. Mr. Zhang also walked over from his chair. He felt that it was a bit too much. No matter what, the people who can be here are all talented people.

Although he admired Qin Yuan very much, it was really too much to do so. He didn't expect that he would just take out a blueprint from behind as soon as he walked over.

Qin Yuan only showed one-third of the appearance, and tapped the drawing casually with his hand, "How is it? This thing has been proved well, right? I can finish the research soon, but I am a little thirsty now."

The moment Mr. Zhang saw the blueprint, he was completely stunned. This is definitely not the line on the top of the random drawing, and the mechanical arrangement on it. This is the composition of the space station.

Chapter 1274: not allowed behavior

I didn't expect Qin Yuan to draw so many paintings in such a short period of time. Who is this guy? Did he study somewhere before?

The research doctor who had quarreled with Qin Yuan just now was also stunned. Although this guy was a little arrogant, his previous study was indeed at a real level. He just glanced at it and immediately confirmed that it was indeed the research of the space station.

It took them many years to research a general framework, but they didn't expect Qin Yuan to draw all the internal structures one by one, which is really amazing.

The scene was very quiet, the drop of a needle could be heard, Long Xiaoyun hadn't realized what was going on, she slowly approached Qin Yuan.

"What's going on here? Did they see through the drawings you got from?"

Long Xiaoyun thought that Qin Yuan had other solutions, so he took out other blueprints to fool around first, but he didn't expect that this was the real blueprint.

At this time, Mr. Zhang was a little excited, his hands were trembling, he hurried forward and grabbed Qin Yuan, "You! You draw carefully, draw all the rest, I believe you."

Long Xiaoyun was confused by Zhang Lao's attitude, could it be true? She turned her head to look at the blueprint in disbelief. Although only a third of it was exposed, it was too complicated for her to understand.

Immediately afterwards, the people in the whole laboratory were boiling. Yang Chongming and Long Xiaoyun were confused by this sudden scene. What's the situation with these people? No, the drawing is real, right?

And Mr. Zhang was very excited, he hurried forward and grabbed the staff member just now.

"What are you still doing in a daze? Hurry up and make coffee for him, and do as he asks."

The research doctor couldn't say anything anymore, he turned around and ran outside, anyway, if the blueprint is real, he can do whatever he wants.

Mr. Zhang was a little excited, he turned his head and looked at Qin Yuan with flickering eyes, "You can ask for anything else, as long as we can meet it."

"It's nothing else. By the way, is there a rollaway bed? I may need to rest for a while."

You must know that this is a laboratory. When they usually go in, they have to wear work clothes and strictly follow the instructions. Not to mention drinking coffee or drinking water inside, it is not allowed.

But at this moment, Mr. Zhang has already seen the hope, what they have spent so many years not researching'Now this young man has really done what he said and has already drawn it.

In this way, a folding bed appeared in the laboratory after a while, and Mr. Zhang thoughtfully brought pillows and quilts.

"What are the requirements? Although it's not a problem for you to mention the time, it doesn't have to be drawn today. You study slowly, and you must not make mistakes."

Mr. Zhang was cautious at the moment, for fear that if he made a mistake, all previous efforts would be wasted, because he knew the importance of this blueprint, and no mistakes were allowed in the blueprint of this space station.

Qin Yuan just gave a lazy waist, and then took the coffee. "There is nothing else for the time being. I said today that I will definitely do it, and I can guarantee the accuracy of this drawing."

"Okay, okay, if we ask you anything outside, just ask."

At this moment, people outside began to discuss, and the whole room was filled with heated discussions for a while.

Chapter 1275: shouting with Qin Yuan

After all, this can be said to be a breakthrough. After so many years of research, it is just a framework, and they finally saw the internal structure just now.

"That's enough, everyone is quiet. It must not affect him and keep everyone quiet! Forget it, you go out first, so many people here will affect him."

At this moment, Mr. Zhang really regarded Qin Yuan as very important. He was afraid of losing it in his hand, and afraid of melting it in his mouth. You must know that it is a national treasure laboratory.

The sound insulation effect is very good, and there is no sound at all here, but Mr. Zhang still evacuated everyone for safety reasons.

Long Xiaoyun and the others couldn't figure out the situation, so they could only go out together. At this time, Qin Yuan silently put the blueprint on the table. Although they have already researched it, they should be hanged.

Wait until he wakes up first, and just like that, he lay comfortably on the folding bed, and when it was past five o'clock in the afternoon, he stood up, and it was almost time.

Seeing the door of the laboratory slowly opening, Mr. Zhang and the others hurried forward. At this moment, Qin Yuan gently showed the blueprint in his hand.

Mr. Zhang's hands were trembling with excitement. He touched the blueprint carefully, and was amazed at the precise structure on it.

The surrounding researchers also cheered and surrounded them all. After all, such an achievement is rare for many years.

Everyone looks at this blueprint without any doubts. After all, they are all professionals. Of course, they know the authenticity of this blueprint. The structure inside is really too precise, and every detail is fully displayed. hundred times.

Mr. Zhang is very sure that this drawing is absolutely fine, because many years ago he was lucky enough to have seen a foreign space design drawing, but it was just a glance.

Moreover, because of the confidentiality of the drawing, many details were not shown, and it only highlighted a large part of the concept.

Now Qin Yuan's paintings not only have the frame and the internal structure are all marked, but also all kinds of equipment and mechanical equipment are displayed one by one.

Mr. Zhang couldn't help but praised again and again, "I really didn't expect that you not only have outstanding personal abilities, but also have such great accomplishments in this area. Have you ever studied abroad before?"

"I'm actually just an ordinary person. I have nothing to do with studying abroad. I just want to make a little contribution to us. I can study what they can research."

This Mr. Qin Yuanzhang had a little understanding before. Before that, he helped the tank brigade to carry out the transformation, as well as the transformation of firearms. He also participated in the transformation. I didn't expect that he could even design the space. This is really a genius.

Everyone was very excited when they looked at the design drawings, and there was enthusiastic excitement around them. It can be said that they finally designed the drawings. After so many years of work, they finally achieved results today.

The researcher who quarreled with Qin Yuan before had tears in his eyes. Although this person is indeed arrogant in some aspects, he has to admit that the blueprint is real and very precise.

"This is what happened to us for so many years. We have been relying on other people's research, and relying on the research of other countries. It feels like charity, but now we have our own blueprints."

Chapter 1276: I will fix the equipment!

They have had enough for so many years, just like this time they still need to queue up to apply for the International Space Station, and their application was submitted five years ago, and they finally queued up. With one kick, those people didn't take them seriously at all.

"Now we have our own drawings, as long as we develop them, we don't need to rely on them at all."

But when it comes to research and development, the atmosphere on the scene has become dignified again. After all, there are blueprints, but research and development is also very critical, and this research and development is also the biggest problem.

Mr. Zhang pointed out that the mechanical structures above rely on these instruments. They don't have any instruments produced here. Now they still use the ones that were eliminated by other countries before, so they can only barely use them.

"This drawing is really perfect, but unfortunately, we are still working on many materials."

Qin Yuan was a little curious. I have all the blueprints. Is it really so difficult? He couldn't help asking: "Mr. Zhang, judging from the materials and instruments we currently have, how long will it take for this space station to be designed?"

"Currently it will take at least three years."

Qin Yuan frowned when he heard this time, three years, that is really too long, and this is still Zhang Lao's conservative estimate, because they still don't have many materials.

"I'm not exaggerating, but you see, first of all, we used other countries to eliminate the lifting equipment specially designed for the shell of the space station, and bought it at a high price at that time. Although we are also developing this now, we can barely do it once. , but nothing else."

There are other materials that they haven't studied before, and now they need to wait for him to make a clear list to see what is missing.

"In this way, Mr. Zhang, you make a list and show me first. I will solve the specific things and equipment that are missing."

"You? Can you really solve it?"

"Let me see. If possible, I will try my best to solve it. After all, three years is too long. Just now you were conservative. If you can't develop it in three years, then you have to wait until when."

Mr. Zhang nodded. He is pinning his hopes on Qin Yuan now. After all, Qin Yuan can even design blueprints, so it shouldn't be a problem.

Mr. Zhang quickly set up a professional working group to let everyone complete the list as soon as possible, as well as the statistics of the items they needed, and then hand them over to Qin Yuan.

As for Qin Yuan, he was completely famous at this time. After all, being able to design the blueprint of the space station is a big deal.

The next day, Mr. Zhang excitedly found Qin Yuan. He said that he had already reported to his superiors that the superiors were very shocked to know about this incident, and that there might be people from the news media to report in the afternoon.

Unexpectedly, Qin Yuan quickly shook his head and refused, "I don't want to report this news, and I don't want to publicize it so high-profile."

"What does this mean? It took us so long, and we finally made progress because of you, so we must not publish it, let the public know our efforts."

"Mr. Zhang, maybe you have been researching here, so you don't know much about the peripheral situation, just like this time we were rejected by the International Space Station."

Chapter 1277: i need 1 car

"Maybe they have already discovered some clues, so they rejected us."

"You mean you?"

Qin Yuan shook his head. This was just his guess. After all, they were fine before, but they were rejected all of a sudden. Maybe they already knew that they were going to enter the space.

Although the United States usually does some despicable things, they have turned their backs on this matter and have been severely condemned by the international community, but they don't care at all. That can only explain one problem. They are on the International Space Station. It is estimated that there is something secret on the Internet, and I am worried that it will be exposed.

And Qin Yuan is quite famous, so there is only one reason. It is estimated that their list has been leaked, so they will be wary, even the space station will not give them a chance to go up.

When Mr. Zhang heard this, he suddenly realized, yes, we can't expose this matter now, it's better to wait until everything is successful.

Speaking of this, he couldn't help but look at the young man in front of him with admiration. He was really impressive. Not only was he talented, but he was also very low-key.

You must know that if many people encounter this kind of situation, their heads will be overwhelmed, and they would like to let the whole world know that this is his research result, but at the moment they are very calm.

Mr. Zhang quickly reported to the higher authorities that only the people in their laboratory knew about the blueprints this time. As for other peripheral people, they hadn't had time to get in touch with them yet. Qin Yuan's previous list would only be accessible to peripheral personnel at that time. There is a risk of leakage.

In this way, this matter was concealed first. Qin Yuan meant to wait for everything, including even the design of the space station, before reporting to the higher authorities. By then, even if someone wanted to destroy it, it would be too late.

After concealing the matter, Mr. Zhang also made a list. This is all the materials and instruments they sorted out.

"This self-guided navigation system must be produced by professional equipment, otherwise ordinary equipment cannot do it at all."

Looking at the names of these devices, Qin Yuan didn't hear many things, so he could only search the system mall first, but he didn't expect that there were all of them in the system mall.

According to his current merit value, it can only be said that he just bought these equipments. As for the materials, he can only find another way.

Seeing Qin Yuan frowning, Mr. Zhang didn't say anything. After all, it's good if the blueprint can be developed, and he can't put all his hopes on one person. How can Qin Yuan have such great ability?

"Don't worry Don't put so much pressure on yourself, I know it's hard, don't worry we will..."

He was interrupted by Qin Yuan before he finished speaking, and Qin Yuan just gave birth to a finger.

"I need a car!"

Mr. Zhang was stunned. The self-confidence of this guy is completely inimitable. Could it be that he really has a way to get those instruments and equipment?

With the problem of studying the blueprints before, so now he trusts Qin Yuan 100%, and hurriedly prepares the vehicle, but no one knows where Qin Yuan is going.

After the vehicle was ready, Long Xiaoyun originally wanted to accompany him, but was rejected by Qin Yuan. After all, his things were all taken from the system mall, so it can be said that for these people, they were created out of thin air. , he had to find a hidden place.

Chapter 1278: Ask the host to make the following choices

This matter cannot involve too many people, so he chose to act alone, and Mr. Zhang even raised his hands in favor. As long as Qin Yuan can get the equipment, he can do anything.

In this way, Qin Yuan drove off. This was the first time he came out of this experimental base. The experimental base on this side is on a desert, and beyond that is a deserted Gobi desert. There are no people within a hundred miles. of.

This place is relatively safe, and there is no need to worry about other risks of leakage, and anti-radar equipment is installed in this area to prevent others from peeping with drones or satellites.

After all, several of their scientific research bases are near here, but when Qin Yuan came out, he found something was wrong, he always felt a feeling of being spied on.

If it is a normal person, it will definitely not feel it, but he carries a system and has system capabilities, so the various senses are more than ten times that of a normal person.

He looked back in the rearview mirror, there was no sign of human activity around here, and there was no trace of tracking, but the more he drove, the more he felt something was wrong.

That feeling of being spied on is always there, not around, but in this car?

Thinking of this, he touched the steering wheel calmly, "System, can this car be recycled?"

He is a recycling system himself, so this is definitely no problem. Now that his system has been upgraded, not only can it recycle, but it can also delicately detect the function of recycling things.

Soon the system carried out a recovery test, and the system issued a prompt after a while.

"Ding! Remind the host that there is a detailed tracker on the recovered items, whether to recover or not."

Qin Yuan smiled, he was really playing tricks on him, he didn't expect Mr. Zhang and his lab to be so strict that someone would sneak in.

"Choose recycling."

After a while, the operating system recovered the tracker, and successfully recovered the tracker's ability.

"Please host to make the following choices"

"1. Unlimited tracking ability, non-physical tracking ability, the target will not be aware of it, and non-physical monitoring and tracking anytime, anywhere."

"2. Tracking and implanting capabilities, which can invade the target's system for anti-reconnaissance, but the distance is limited, only within the target positioning range"Tracking Sky Eye system, can enter any target's computer system, implement real-time monitoring."

Qin Yuan seriously thought about these three abilities. The tracking Sky Eye system is a bit similar to his hacking system. After all, these two abilities are similar. He has hacking skills, and he can hack into the host computer of the other party at any time to steal their secrets. It is not a problem.

After much deliberation, the first one is the most reliable, it can be anti-surveillance, and it is incorporeal, so maybe you can get more things, and he can also use it to deal with the masked man in the future.

In this way, Qin Yuan chose the first ability. After the tracker here was recovered, the feeling of being spied on Qin Yuan disappeared in an instant. He whistled relaxedly and headed towards the Gobi Desert ahead.

At the moment, in an office, three men in black clothes were staring at the monitor, and Qin Yuan was clearly on the monitor screen, but after a while, the entire screen suddenly went black, and the signal was interrupted.

Chapter 1279: no one is allowed to approach

"Scar, what's going on?"

The man named Scar hurried forward to check. This should be impossible. He has been using this device before, and there is absolutely no problem. He also obtained a lot of secrets by relying on it.

Could it be that the line was interrupted? He kept checking that there was no problem with the connection of the equipment here.

"Strange, this shouldn't be the case. I have conducted many experiments before, but there are no problems."

"Could it be that he has already discovered it, so he destroyed this device?"

"It shouldn't be. I installed this tracker inside the tire. How could he find it? Besides, does he have any equipment?"

The three discussed for a long time without any result. In the end, they only thought that it might be because the distance is too far. After the system equipment fails, they can install it again.

It's just a pity that the monitoring can't be found this time, because they don't know too much information. They only know that Qin Yuan wants a car, and they don't know where this guy is going mysteriously. This was originally a good opportunity .

"What should we do now, sir? They have been waiting for our reply, should they just give up like this?"

"Since this system can't be relied on, why don't we hurry up and set off now, maybe we can catch up and see where he can go."

"Are you kidding me? There are guards everywhere around here, we can't get out at all, and there is desert over there, we are easily exposed when we go out."

"Then what should we do now? Neither will this work, nor will that work."

"Okay, don't talk about it. If you continue to talk, you will probably quarrel. This time, you can only say that the action is temporarily terminated. Anyway, wait for him to pull back later, and we will track it. If the device is interrupted because it is too far away, then come back later. Then we'll see."

The two people next to him nodded. They could only do this now. Everyone at the experimental base was very nervous. Mr. Zhang stood on the opposite tower and kept observing the surrounding area.

Although he didn't know where Qin Yuan was going to get these instruments, he knew from the look in Qin Yuan's eyes that he could be trusted.

When the sun was about to set, he finally saw a car from a distance, and Mr. Zhang was instantly overjoyed.

The so-called soldiers from before also hurried out at this time, and everyone formed a formation to surround Qin Yuan's car inside, and no one was allowed to approach.

With the matter of the previous follow-up period 'Qin Yuan has already made a report with the experimental base in advance, and he asked Mr. Zhang to prepare.

The vehicle slowly drove into the experimental base. Apart from the soldiers on duty, only Mr. Zhang and a few core research members remained.

Mr. Zhang didn't know why Qin Yuan was so cautious. There must be no problem in their laboratory.

As soon as he got out of the car, Mr. Zhang went up to meet him. He couldn't wait to check the situation inside the car, but was stopped by Qin Yuan.

"Mr. Zhang, don't worry. I've sealed everything inside with a box. They will carry it to the core experimental base later, so that no one else can touch it."

"Fine, fine, do as you say."

Some experimenters on the periphery were a little unhappy. After all, they were too wary. They were all contributing to the research cause, so they shouldn't be so guarded against them!

Chapter 1280: sabotage monitor

The latest website: The only ones who can get close to that car now are Mr. Zhang and the research team following him. The others must be unconvinced when they see this scene.

"I really don't know what kind of tricks this guy is doing. Didn't he just research the blueprint of the space station? Is it necessary to be so guarded against us?"

"But Qin Yuan did it for safety's sake. Besides, that thing was originally of the highest level. How could we know that?"

Having said that, the staff next to him was even more unhappy. Why did everyone revolve around him after this guy suddenly airborne, with him as the center, and broke many rules? Can ordinary researchers really make the space station?

"I'd like to see what abilities he has. If he keeps guarding against us like this, then let them go. I don't believe it. It's absolutely impossible for a few of them to really build the space station."

After the staff member finished speaking, he turned around and left, but the people next to him didn't notice that there were two staff members following behind him, and these three people were the ones who had been monitoring Qin Yuan before.

Originally, the three of them wanted to take advantage of Qin Yuan to drive the car in to find out some effects, but they didn't expect that the equipment still hadn't been restored, and they couldn't figure out what the problem was.

Moreover, Qin Yuan has also strengthened the prevention and control, there is no way to get close to the vehicle, and he doesn't know what state the machinery and equipment are in now.

The three of them returned to the room and began to discuss countermeasures. They thought that the monitor should be discovered, otherwise why would they be so defensive all of a sudden?

"What should we do? Do we want to retreat now? I will immediately warn our superiors to retreat quickly. If we are discovered, the consequences will be disastrous."

"Wait a minute, what are you panicking about? Don't get confused. How did you know we were discovered? Maybe there's something wrong with the equipment. This guy is already cautious, so he will naturally improve his security."

Scar nodded when he heard this, mainly because he had been lurking here all these years, and he always felt that it was nothing to go on like this, so he just wanted to evacuate as soon as possible.

They have provided a lot of information to the organization over the years, and the information that they can contact me at the base here has been completely transmitted back, so he can't wait to evacuate.

But how could the organization that they lurked in with great difficulty give up such a good chess piece, so they issued a death order to keep them here.

On the outside, Qin Yuan took Mr. Zhang and the others into the core of the experimental base. Even the guards couldn't get in here, and they had to verify their identities before they could enter.

After the guards put down their things, they went out and began to guard outside. Qin Yuan stepped forward to open the box, and all the things he exchanged from the system mall were displayed in front of everyone.

These staff members were very excited. They had only seen many instruments abroad, and some had never even seen them before. They did not expect that they were all brand new, and they were presented in front of them like this.

"Mr. Qin, how did you do it? You were able to get all of these instruments. As far as I know, there are only five of these instruments in the world, and basically all of them are completely controlled by the United States and Xiao Mao. gone."
