

Special Soldier 1281

Chapter 1281: Another 1 high-quality gold copper ore

The instrument the researcher is talking about is a nano-synthesizer. Unlike the traditional nano-manufacturing instrument, it is specially designed for the fine cutting and combination of parts on the space station. This instrument is very precise.

This technology is also firmly in the hands of the United States, so far there are only five in total.

Qin Yuan looked at this instrument, no wonder it is so expensive, he spent nearly 30,000 merit points for this small and broken instrument, and his merit points were obtained only after training a small team.

Although he was a little distressed, but listening to the researcher's explanation, he instantly felt that it was quite a bargain. After all, the reason why this instrument is expensive is that it is scarce.

"It's nothing, anyway, now that the equipment is available, everyone can start researching it."

"Mr. Qin, I'm really curious, where did you get these instruments? These things can't be bought even if you have money."

"This matter, keep it a secret. There are some things that you don't need to ask in such detail. I can get them. It's just my business. You just need to be responsible for your duties."

The staff nodded, this is true, they shouldn't ask so many questions, and Mr. Zhang didn't say anything. At this moment, Mr. Zhang is so fascinated by the instruments in front of him. He has done research on these instruments all his life. I thought I finally got it now.

"Mr. Zhang, I've found all these instruments for you now, so let's see when you start researching this. It should be possible to advance."

"It's true to say that, but we still lack a lot of materials, but we can do preliminary research first, and we can use the resources and materials we have to conduct research first."

Mr. Zhang intends to study the shell first step by step. After all, now that there are blueprints, many things can be done step by step. As for the materials needed for other precision instruments, we will add them later.

In addition to these exquisite instruments, the most difficult thing is the material. Many materials have been completely monopolized by the United States, and they have these resources in their hands.

"Mr. Qin, you know that a small country in North America was suddenly completely garrisoned by the US under the pretext of helping."

Of course he knew this, he nodded, because there was quite a commotion before, after all, that small country had called for help with them at that time, but at that time they were all in a state of being unable to protect themselves, so they couldn't care less about other people's affairs.

In addition, the United States declared to the outside world that they were helping them with their construction for the purpose of helping them. Unexpectedly, this kind of help occupied their territory for nearly ten years.

And what Mr. Zhang wants to say is that their help is fake. In fact, it is to occupy the resources there. That small country has a rare rare earth mine, which is specially used to make materials for space stations. They have that resource, so the research has been achieved. further breakthrough.

So up to now, the largest resource has been completely occupied by the United States, and many of the materials they need are occupied there. In addition to this rare rare earth mine, there is another high-quality gold and copper mine.

These things are indispensable for the manufacture of space station materials, Qin Yuan frowned slightly after hearing this, she thought about it

Chapter 1282: no danger

This shouldn't bother him, since he wants to get this resource, it's no problem.

Originally, he could exchange them from the system store, but now all his merit points are used to exchange for these instruments.

If he wanted to get resources, on the one hand, he had to get merit points to exchange in the system mall, and on the other hand, the most direct way was to find these resources.

"Mr. Zhang, since that place has been completely occupied by the country of the United States, where exactly is the high-quality gold and copper mine you mentioned just now?"

Mr. Zhang has done research on these things before, but it is a pity that they did find them in a primitive jungle before, but at that time the conditions were limited and there was no way to mine them.

"According to our current technology, there is no way to carry out large-scale mechanical mining. We can only carry out pure manual mining, but it is too dangerous, so it has not been carried out."

It turns out that the soil near this high-quality gold-copper mine is very loose, and large-scale equipment cannot be installed at all. If only relying on manual work, it will not only consume time and labor, but more importantly, the risk factor is very high. Collapse will occur.

So up to now, the research institute has not mined gold and copper mines, but that side has become a military restricted area, and there are people guarding it 24 hours a day. They have been researching methods that can be mined.

These materials are relatively scarce now, but Mr. Zhang has already led his research team to manufacture the external frame.

Qin Yuan planned to take his own team to find these scarce resources when Mr. Zhang made the external frame. Since ordinary people can't get down, he should have no problem, but he needs someone from the outside to approach.

After he told Mr. Zhang about his thoughts, he was rejected by Mr. Zhang unexpectedly.

"This is absolutely impossible. You have to know that I really underestimated you before. Your talent can be said to be our national research talent. You don't think there is any danger."

"Mr. Zhang, but there are some things that must be done by someone else, otherwise we will have no way to proceed to the next step."

"I know this, I have already applied to the above, and our team is actively communicating with other countries to see if we can buy this kind of rare earth mine at a high price, because not only there may be other places, but we need to go to Investigate."

Still waiting to inquire about the news, Qin Yuan felt that this was a waste of time. The most important thing is if people really have such resources, why would they sell them to them? Price is one aspect, and whether it is sold or not is one thing.

This kind of thing is too unreliable, it is better for him to mine directly, Mr. Zhang thinks this is too dangerous, he will never allow Qin Yuan to go, and he also told another surprising news.

"Mr. Qin, I think your talent can be placed in another place. You are too talented in that special warfare team. Your ability should be dedicated to our technology."

"That's no problem. As long as I'm not on a mission, I can come to the research base to assist with research at any time."

Unexpectedly, Mr. Zhang shook his head. He didn't mean that. His eyes were full of admiration when he walked over.

Chapter 1283: lurking in from the outside

The "No, no, you misunderstood me. I want you to stay here completely. Don't worry, your treatment will definitely be higher than that of you in the Special Operations Brigade, and it's not that dangerous. Isn't it a good thing to have the best of both worlds?"

The co-author of this old guy wanted to dig himself out, but Qin Yuan refused straight away. He couldn't leave his brother alone, and he had to do a lot of things by himself. It's really boring in this research base. , it is impossible for him to stay in this place all the time.

However, judging from Mr. Zhang's meaning, it seems that he has not given up. This old guy only wants to keep Qin Yuan, and now he feels that he will agree to whatever conditions Qin Yuan asks.

"Don't worry about this matter. You think about it slowly. Don't rush to answer me. The conditions I offer will definitely make you tempted. I will apply for these things with the higher authorities."

When the two were discussing, Long Xiaoyun came over. It seemed that he had heard the conversation between the two just now. Qin Yuan found an excuse and walked out, and Long Xiaoyun followed.

"I have heard your conversation just now, what do you think?"

"Don't worry, no matter what, I will definitely not leave the Special Operations Brigade. How could I leave my brother behind? There are still many things waiting for me to do."

Long Xiaoyun breathed a sigh of relief, she was actually a little worried, after all, Qin Yuan is now the backbone of the special warfare brigade, without him.

She really didn't know what to do. Before Long Xiaoyun shook her head, she didn't have the character of relying on others. Maybe it was because Qin Yuan was so strong that she always had the idea of being dependent.

"Don't worry, no matter what, I will not leave the Teshan Brigade. Then you are my other home. I will definitely not leave you, and you."

Qin Yuan also told Long Xiaoyun that he was going to find this rare ore, so he planned to discuss with Gao Shiwei tomorrow to ask him to transfer the team first, they need to find it.

"Don't worry about this, I will definitely cooperate with you wherever you are going, isn't it just looking for ore? Where have we never been?"

The two talked and walked towards the room. At this time, Qin Yuan felt the feeling of being watched again, which was exactly the same as the previous monitor.

Good guy, they put all the monitors near their room. No wonder the news was leaked before. It seems that they had prepared for it before, and these people really lurked in from the outside.

Qin Yuan calmly asked Long Xiaoyun to go back to the room first, because he had forgotten something in the laboratory.

Did Long Xiaoyun suspect that he went straight back to the room? During this process, he didn't notice anything else. Qin Yuan quietly walked through the corridor, then turned to the corner of the wall, and directly activated the system's capabilities.

He is now going to use his hacking skills to destroy this kind of monitor. Although he said he would startle the snake, they probably wouldn't be able to find out, because he destroyed it.

Although this move was a bit risky, he didn't want to be under other people's surveillance all day long. Although he could be careful, but there were so many people in the experimental base, he couldn't be on guard, so he simply destroyed it.

Qin Yuan destroyed the monitor, and wanted to lure the snake out of the hole. When he saw suspicious people coming here, he used the system capabilities he had acquired before to conduct surveillance and come up with an anti-surveillance.

Chapter 1284: too few people

The three people in the room are observing the trend. At this time, the computer is still the same as before, and suddenly a black screen appears, and the three people are all stunned. What's going on?

"Why is it the same as last time? This is our last monitor. If something goes wrong, we can only reinstall it."

"This shouldn't be, this is the latest research and development of the organization class, and there has never been a problem during the test."

Scar is more vigilant, he still feels that they must have been discovered, and the monitor should have been destroyed by Qin Yuan, but the two people next to him think that Qin Yuan has such great ability, although this guy usually has very strong ability, but how could he destroy the monitor silently?

"I think you're just thinking too much. No matter how powerful he is, how could he do it? But our monitors are placed very concealed, and they have already escaped the search of the laboratory."

Although it is true to say so, Scar always feels that things are not that simple. If the monitor is broken for the first time, it may be an accident, but it happens again the second time. Is it really a coincidence?

"Okay, don't talk so much nonsense, go and have a look at it in the evening, I guess this instrument should be placed for a long time, so it broke down, and I will replace it with a new one at that time."

"Then are we still in the same position as before?"

"Change the position this time, and move the monitor to the front, to the door of the kid's room. I will observe it at any time, and it will be like reporting at work."

The three conspired in the room to reinstall the monitors. This was the only way for them to obtain information. Because of Qin Yuan's strengthened management, only core personnel could enter the real experimental base.

When it was time for dinner in the evening, we were very excited. Recently, because of the blueprints, their research progress has taken a big step forward. All we need to do is follow the blueprints, but the only shortcoming is that their staff is too small.

They were not so vigilant before, and basically everyone, especially the peripheral experimenters, came to study together, so the progress was very fast, and it could be said to be completed quickly in a week.

But now the only condition Qin Yuan puts on them is that only the research team under Mr. Zhang can enter his research team. There are not many people in the first place, and they are indeed some core members, but this way greatly slowed down their progress.

What Mr. Zhang didn't know was that Qin Yuan had already conducted in-depth research on this research team, and he had conducted the investigation with his own ability.

There was nothing wrong with this research team, and they were not the ones monitoring him, so he was relieved, but as for the others, he didn't know.

But there are too many researchers in the periphery, and he has no chance to investigate them all. In addition, not only the researchers, but also some other staff members, and the first so many people in the periphery, who is the one who got in? He didn't even know about the undercover agent.

So for the sake of safety, only Zhang Lao's research team was allowed to conduct research.

While eating, Mr. Zhang came over, "Mr. Qin, I just wanted to discuss something with you. The main reason is that our progress is too slow now. You also said before that you want us to improve the progress."

Chapter 1285: 1 Everything is for safety

The "But now our staff is too small, everyone can only work overtime."

Mr. Zhang has now changed the address of Qin Yuan. He used to call him by his first name, but now he has changed his honorific title. It seems that Mr. Zhang really appreciates Qin Yuan.

"Mr. Zhang, I know what you mean, but everything must be done for safety."

There are so many people in the cafeteria now, Qin Yuan didn't want to say much, but just used chopsticks to stand next to the soup, and then wrote two words on the table.

"tapping!"

Zhang Lao was stunned when he saw these two words? This is absolutely impossible, of course he knows what it means.

Their confidentiality work is very good. Everyone who wants to enter the research base has carefully gone through various audits before, and it is absolutely impossible for such a thing to happen.

But how could Qin Yuan say such a thing? He must have obtained some evidence, Zhang Lao approached Qin Yuan and lowered his voice.

"Did you find something? If you find something, tell me directly, and I will ask the security personnel to investigate immediately."

"It's hard to say now, but I can only tell you that there are ghosts inside, so I can only let your research team in. As for the security, I'm not sure."

"How could this be? This is too risky, no, I have to respond to the above and ask them to transfer us another team."

"If you do this, you will only scare the enemy. Now I have finally found a trace of them. If I call in other teams, it is very likely to make them vigilant. At that time, I will not be able to do it at all."

Mr. Zhang frowned, what should we do now? Now is the critical period of the experiment. He doesn't want his hard work, and so many people's hard work, to go to waste. If someone really sneaks in and leaks their information, it will be a waste of money.

"Mr. Zhang, you don't need to be so flustered. You can leave it to me with confidence. I am very sure about these things. You just need to trust me now."

Mr. Zhang raised his head and looked at Qin Yuan. This guy always looked confident. From the beginning, he said that he would draw pictures and provide instruments. He was always very mysterious, but every time he did what he said.

In this case, he didn't say anything more, nodded, and then patted Qin Yuan on the shoulder.

"If you need anything, just tell me I will definitely do my best to help you."

On the other hand, Qin Yuan's application has already been submitted, and Gao Shiwei must have approved it with all his hands. After all, this is for their scientific research, and this must be no problem. He immediately transferred the red blood cell team.

However, the red blood cell team did not come directly to the scientific research base, but was ten kilometers away from the scientific research base, just to prevent being discovered by some interested people.

Qin Yuan took Long Xiaoyun to the primeval forest to search for special gold and copper mines. Yang Chongming originally wanted to go with him, but Qin Yuan still trusted him among these people and asked him to stay alone for Ensure the safety of the laboratory.

He didn't know if the guards outside would be effective at critical moments. Anyway, if Yang Chongming was around, at least someone would report to him the situation here in time.

Just when they were about to leave, Qin Yuan and Long Xiaoyun returned to the room to prepare things, and suddenly found two staff members appearing in the corridor

Chapter 1286: put him on guard

After all, this is where they live alone, so generally no staff will come over.

Qin Yuan immediately became vigilant, and he stepped forward, "May I ask what you two are doing here?"

"It's like this. We are responsible for checking the lighting facilities here. After all, the person in charge said that we must make preparations for the security work."

"Lighting facilities? As far as I know, there is nothing wrong with the lighting here?"

"Yes, there is no problem, but we are only doing routine inspections, routine inspections."

The two thought they were talking seamlessly, but at this time Qin Yuan also walked back, and what they didn't know was that Qin Yuan had hypnotized them just now without knowing it?

And obtained some other information from their minds, these two people are his security monitors, the people who have been monitoring him.

Qin Yuan's ability is to be able to do so without anyone noticing, neither of them has any awareness, and Qin Yuan has already obtained all the news.

After returning to the room, Qin Yuan pulled Long Xiaoyun and told her what happened just now, because he had suspected that there was a mole before, but he never found evidence, and now he was finally caught.

"Then what should we do now? Let's quickly report this news to Mr. Zhang and ask him to take precautions."

"No need for now. I will let Yang Chongming remember these two people. After all, I don't know if there are other accomplices in the company. It will be troublesome to startle the snake."

That being said, it was indeed Qin Yuan who told Long Xiaoyun to secretly investigate who these two people were mainly in contact with, as well as their departmental information, and then passed it on to Yang Chongyu.

As for the fact that he only needs to operate the system now, in addition to extracting their information just now, Qin Yuan also transferred the monitor to them, and combined with Long Xiaoyun to get the news, then he can monitor remotely .

After a while, Long Xiaoyun came back. He had found out that these two people were from the basic technology department, but the two of them had been in the base here for a long time, nearly three years.

It seems that these spies are really hard to guard against, and they can even lurk in this position.

Long Xiaoyun had some lingering fears. After all, this matter was of great importance. She still wanted to report it to Mr. Zhang so that he could be more vigilant, but Qin Yuan's relaxed look told her not to worry. Don't worry, It's not our turn to worry about these things now, what we have to do now is to set off to find the ore, He Chenguang and the others are already waiting for us there. "

The two set off in the dark, and it can be said that no one noticed. They jumped directly from the window of the room and bypassed the monitor. The reason why Qin Yuan didn't destroy it was because he didn't want to startle the snake.

Soon Qin Yuan arrived at the meeting point. Mr. Zhang gave him a map with coordinates on it. They needed to drive to the designated airport, where a helicopter would take them there. Now it has been completely closed for management.

This time there was no problem on the way to the mission, the key problem was the scarce gold and copper mine.

He Chenguang and the others didn't know what the mission was at first. After Qin Yuan explained it to them in detail, everyone thought it was too simple. Go down to get the ore. This thing doesn't sound too dangerous.

Chapter 1287: there is still a possibility of survival

The "Brother Qin, this is still very mysterious. I thought there was something wrong with it, but it seems that it's nothing more than that. Besides, just take an ore. Don't worry, I'll just go down."

Li Erniu patted his chest and assured that it would be absolutely fine. After all, there were mines in the mountains behind his house before, but they were some other ordinary ores at that time. He didn't study at that time, and he went down there a few times, so there was absolutely no problem.

"Don't take this mission as simple. There is no mechanical equipment that may require us to enter with bare hands, and it is very difficult to carry the ore out. We will see the situation when we get there."

Everyone couldn't figure out what kind of ore it was, and the equipment couldn't go down, so they became more and more curious. In this way, they followed the helicopter to the designated coordinate point, and just as they got down, they saw someone quickly surrounding them. A series of checks and checks.

After checking their identities, a few people in camouflage uniforms brought them in. It seems that the secret measures here are very good. Qin Yuan roughly looked around and said nothing about the snipers lurking here. There are six of them.

It seems that the higher authorities still attach great importance to the safety of this side, after all such ore resources are very scarce.

The man who came to meet him was called Yan Ming, "Hello, Captain Qin, it's true that seeing is believing. I didn't expect you to come here to intercept this mission."

"Captain Yan, I want to know what's going on here? Because what Mr. Zhang said wasn't very clear at the time, can you give me a brief introduction?"

"Of course this is no problem. I can take you to the core area, but we haven't even gone down there. We don't know the specific situation."

In this way, they walked into the hinterland of the jungle with Yan Ming, and saw the big mountain in front of them through the jungle.

When they reached the big mountain, they saw that there were more than a dozen caves, large and small, around Sanbi. These caves could just accommodate a person to enter, and the largest cave was on the left.

But there was a cordon there, and no one approached, strictly pointing to the place where the cordon was raised.

"Their scientific research team came here before, and it should have been six years ago. At that time, the largest mine was opened, but everyone didn't expect that the mine had just been opened, and it collapsed as soon as the talent entered. Now there are still A few people were buried."

Speaking of this, Yan Ming sighed silently, they had no choice but to watch helplessly as the person was crushed below.

"Didn't any rescue measures be taken at that time? There should be a possibility of survival."

"We had tested it with a life detector at that time, and there was no sign of life. In addition, the drawings below were very loose, so rescue was very difficult. Two of our rescuers were also crushed below."

It seems that it's not that they didn't save them, but that measures have been taken and sacrifices have been made, so the mine was sealed.

Yan Ming introduced the surrounding situation. Those large and small mines belonged to their scientific research teams. They used other instruments to test, but it was useless, and there was no way to enter.

Over the years, they have kept having scientific research teams to carry out research, but no one has ever been able to successfully obtain the ore, to be precise, no one has succeeded in going down.

Chapter 1288: successfully entered the mine

The Yan Ming said with a serious face, "Many people have been here over the years, but to be honest, there are no people who have come up."

This was something Qin Yuan did not expect. He thought that the research was just terminated, but he did not expect that many people have gone on and off for so many years.

No wonder Mr. Zhang tried his best to prevent him from coming to this place. It seems that since it is so dangerous, and according to Yan Ming's introduction, there have been more than a dozen scientific research and construction teams here. At that time, there was no way to do it.

Qin Yuan walked to the closed entrance of the cave, squatted down and took a closer look. Just at the entrance of the cave, he could feel that the surrounding soil and rocks were very loose.

It seems to be related to the geology here. At this time, the sky suddenly began to rain. Yan Ming explained that the climate here is very strange, basically it is the rainy season all year round.

So this is why the soil here is extremely loose, and it has been eroded by rainwater for a long time. The soil is very loose and cannot support it at all.

The rain was getting heavier and heavier, Yan Ming took them back to the place where they lived, far away from the mountains, in another relatively flat area.

The place where they are stationed is still some distance away from here. According to Yan Ming, sometimes it rains too much and landslides often occur, so they have to build the station far away, and then they usually come here patrol.

It seems that the situation here is more severe than he imagined. Qin Yuan observed the surrounding terrain, and there was a damp smell everywhere.

The soil is very soft, and the soil is also very strange. It has only rained for more than ten minutes on the mountain, and puddles have formed, just like stepping on a sponge. When you step on it, the water below will come out.

This is also the first time Qin Yuan saw this situation. Originally, they planned to go down tonight, but seeing this situation, Yan Ming hurriedly stopped by the side.

"Captain Qin, you have never lived here, so you don't know the climate here. Once it rains, the drawings will become looser, and a little movement will cause landslides, so I suggest waiting for the rain to clear before we talk about it." ."

It looked like this would indeed be the case, no matter how powerful I was, I couldn't do it like this, Qin Yuan and the others could only go back first, and the rain lasted all night.

The next morning the rain finally stopped, and the weather here when the sun came out was really weird.

It may also be because of this climate that such scarce ore was produced. Qin Yuan followed Yan Ming and walked around the station casually, only seeing a few small pieces of equipment.

"At that time, helicopters were used to bring some large-scale equipment, but they couldn't support it at all. After seeing it, experts said that it couldn't support it, otherwise the whole area would collapse, so we can only use this small equipment for excavation."

However, the shortcoming of this kind of small equipment is that the depth is not enough, and it cannot reach the ground at all. It can only be manually excavated by hand, and it will collapse after digging.

Now they can't be in a hurry, they can only wait for the sun to come out and bake for another two days, so that the soil will not be so soft.

However, Qin Yuan has not been idle for the past few days. He has been conducting anti-investigation, and I have to say that the system ability he gained before is really good.

Chapter 1289: Crow mouth!

The monitoring and investigation can be carried out anytime and anywhere.

Now Qin Yuan is probably sure that the accomplices are those three people. He immediately notified Yang Chongming at the experimental base. The main reason is that he is currently monitoring and only knows that these three people are accomplices. Pay more attention to avoid alarming the snake.

Originally, he wanted to notify Mr. Zhang directly, but sometimes the information was leaked during the transmission process like this. After all, Mr. Zhang focused on scientific research, and he was not very clear about many things, so the enemy would take advantage of his loopholes.

After receiving the news, Yang Chongming began to secretly follow up and observe the three of Scar and the others, mainly to pay attention to their movements, prevent them from approaching the laboratory, and pay attention to who they came into contact with.

For Yang Chongming and Qin Yuan, he was still very relieved. This guy was also very capable. Just like this, a few more days passed. Fortunately, it didn't rain these days.

Qin Yuan looked at the weather, the sun is very good today, it seems that it is very suitable to go down and have a look first, no matter what, he has to take the lead and see what's going on below.

Yan Ming led him to the entrance of the mine. There were more than a dozen mines, large and small. Yan Ming pointed to the larger mines ahead.

"These ones have already collapsed, and the other small ones are only halfway through. They decided to collapse, so they quickly evacuated."

Qin Yuan nodded, put on the equipment, and then picked up a backpack, which was full of mechanized supporting equipment. In this case, it can't collapse. It is necessary to find enough fulcrums and have a good understanding of architectural structure.

Looking at the collapsed mines, Long Xiaoyun was a little worried. She planned to go down with Qin Yuan, but was directly rejected.

"No one knows what the environment below is like now, and there are dangers everywhere, so don't go down with me, I'll go down first to check the situation."

"But I'm really worried, if the two of us go down, under what circumstances can we help each other."

"You have forgotten who I am. I don't need you to stay on it. I just want to give me the greatest guarantee. Well, I will hand over the safety rope to you. If there is any situation, you must pull me out."

Hearing this Without saying a word, Li Erniu took the lead and stood in front, holding the rope tightly, "Brother Qin, don't worry, unless my arm is broken today, I won't let you You're broken inside."

"You brat, I haven't even gone down yet, you're crow's mouth here!"

"Bah, bah, bah, look, I'm just not very good at talking. Anyway, Brother Qin, don't worry, we will definitely not cause you any problems."

Qin Yuan also said this on purpose, just to let them stay on top with peace of mind, so that he can concentrate on doing things more after he goes down. He told everyone that they must not follow behind him, otherwise it would be too late for him to retreat.

In fact, if he wants to retreat or something, the speed is definitely not a problem, but he is just worried that something unexpected will happen. If they go down, he will not care at all.

In this way, Qin Yuan took the lead to go down with his equipment on his back. The only protective measure on his body was the thin safety rope around his waist. If something happened, they could pull it out immediately, but everyone knew that this kind of protective measure was too simple. .

Chapter 1290: too fast

The Once the inside collapses, it cannot be pulled out at all.

Yan Ming originally wanted to explain a few words, but seeing Qin Yuan's insistence, he didn't want to say anything, he could only pray for his safe return.

Qin Yuan has already made preparations. Even if he flips over, it will not be a big problem. He can hold his breath for a long time in the water, even if he is down there, it will not be a problem. In addition to his own recovery ability, there are all kinds of problems. Protection measures, absolutely not a problem.

When he really entered the mine, he could hear the sound outside at first, but he could only hear his own breathing in the back. Yan Ming also prepared a gas mask for him, mainly because he was worried that there were other harmful substances in the mine. Qin Yuan took off the gas mask.

It was not a big problem for him here. At first he was able to stand upright and come in, but later he could only bend over. He found a few weak places and began to put on the support frame.

He walked like this while padding the support frame, and when he got inside, he found that it was not worth his waist at all. The whole person was completely half-prone, and he began to dig into it here.

Qin Yuan's excavation speed was very fast, and the repairs were also perfect. He quickly opened up the mine completely, and he was carrying a testing instrument on his back.

The key to affecting the speed is that he has to stop from time to time to look at the ore situation below.

In this way, he used the support frame to support each tribe point while going down. He knew the structure here very well. Even if the soil here was loose, as long as he did the preliminary work well, it would basically not be a problem.

However, only Qin Yuan can do this. He Chenguang and the others who were outside slowly noticed that the safety rope on their hands had moved a few times. Everyone tensed their nerves and

stared at the safety rope tightly. There was a strong pulling force, and everyone was very nervous, so they could only pull it out desperately.

He Chenguang and the others thought that Qin Yuan was short of oxygen inside, after all, anything could happen in this situation.

It's just that after everyone pulled it out, they found that one basket after another, soil was constantly being transported from it.

And they only need to be responsible for pulling out the baskets outside. These baskets are also left over from the previous batch of excavation teams, and they dare not dig deeper.

In this way, he continued to dig for more than an hour. Yan Ming next to him couldn't believe it. Just relying on Qin Yuan alone, his digging speed was so fast.

In a short period of time, a hill will be formed next to it, which is too exaggerated! After more than ten minutes, no soil was brought out again, mainly because the supporting frame in Qin Yuan's hand had been completely used up, and he had to bring in the supporting frame from the outside.

As the depth continued to deepen, he originally wanted to use the walkie-talkie to let them send him in directly from the outside, but he couldn't get in touch at all. In the end, he could only crawl out from the passage.

As soon as he came out, Yan Ming and the others quickly gathered around to check the situation. Qin Yuan only had some dirt on his body and head, but he seemed to be in a very good spirit.

You must know that this is the first time to enter such a deep place, and the safety rope is no longer enough.

"Captain Qin, I didn't expect you to actually do it, and your speed is too fast, you just dug so fast by yourself."

"What is this? It's just that there is no support frame!"
