

Special Soldier 1291

Chapter 1291: Believe in Qin Yuan's judgment

The "Otherwise, I can dig directly to the place where there are ores, but it's still for the sake of safety. It's not realistic to rely on me to carry it alone. It must be supported so that everyone can go in together."

This is also what Yan Ming thought. After all, it is too slow to rely on him to collect ore alone. In this way, they brought a support frame. It took Qin Yuan more than two hours to finally hit the ground. His The speed can be said to be faster than the machine.

After a while, Qin Yuan crawled out of the tunnel again, this time holding a piece of golden ore in his hand, so if it was a gold nugget, it didn't look like it, its color was darker.

The researchers who were with Yan Ming and his team hurried up to check. This is the gold and copper mine they were looking for.

Before, they only found a small amount of such large pieces in exposed places, and this was the first time they saw them, and the researcher kept praising them.

"It's just astonishing, I've never seen such a large gold-copper deposit and it's big enough for us to study a lot of things."

"This is just the beginning, just wait, I will take my team down now and still have to rely on manpower to carry it down. The soil inside is indeed too loose."

Everyone believed in Qin Yuan's judgment. In this way, he led the red blood cell team to continue the relay by manpower, and the large equipment felt a little bit of vibration.

They had no choice but to dig the gold-copper mine with bare hands after reaching the bottom. Qin Yuan and his side made a breakthrough, and the news soon spread to Mr. Zhang.

The materials for this first step have been completely resolved, and soon a professional team will take over. They are mainly responsible for transportation and storage. The preservation of this gold and copper mine is also very particular.

They need to use another solution to extract before they can be converted into materials for making space stations.

However, these things are not what Qin Yuan considers. He only needs to be responsible for providing raw materials. Qin Yuan just carried out the first step of collection and reinforced all the places below. So far, there is no problem.

With Qin Yuan leading the battle, Yan Ming also led his team down to start manpower mining. After all, there are too few people who only rely on the red blood cell team.

As the number of people increased, mining became faster and faster. The problem of gold and copper mines was solved. Just when Qin Yuan was about to open up another mine and increase mining efforts, a message came from Mr. Zhang. Another news.

They are now simulating the outer shell of the space station, but found that another silicon element is missing. This silicon element is also a necessary material. They have been cooperating with Yuan State before, because this material is mainly unearthed on their land. .

There are very few found here in Yan Kingdom, and they have been completely mined a few years ago. This kind of thing is a limited resource. Both they and Yuan Kingdom paid a lot of money to buy it. Unexpectedly, at this critical moment , Yuan Guo actually terminated the cooperation.

The termination of cooperation again and again has to make Mr. Zhang consider another issue. It is possible that what Qin Yuan said is true. Their information line is too serious, so the US side has to be wary of them, and they must not Get them into the space station.

Wonder what the ***** are these guys doing up there on the International Space Station?

Chapter 1292: black eat black

The current situation is that without this element, their production can only be temporarily stopped. After all, silicon is another material used to make the shell, otherwise it is easy to dismember in space.

Although I don't know why Yuanguo terminated the cooperation, it is estimated that it has something to do with Miguo, and if there is really no one, we can only find a way from other places.

After many inquiries, this scarce element can be bought from some underground black markets in other countries, but those underground black organizations are doing shady collusion, and it is difficult to guarantee their integrity.

When Qin Yuan heard this, the question became much simpler. He still had to do it himself. Even if they wanted to cheat, they couldn't beat themselves.

When Mr. Zhang heard that Qin Yuan was going in person, he felt a lot of confidence in his heart. Qin Yuan has done everything he said now, and now there are gold and copper mines. It seems that this element should not be there. In other words, it is not an easy task to get in touch with those underground organizations.

"These members of the underground organization are very cunning. You must be careful when you go. No matter how much money is spent, we will apply to the higher authorities. You only need to be responsible for purchasing, and then ensure that the elements and you all come back safely."

This is of course no problem. Qin Yuan handed this over to Yan Ming for the time being, and asked them to mine according to their own route. At least the mine is safe now, and he has fixed all the support points, so there is no big problem. .

Now he has to find this silicon element, Long Xiaoyun made a suggestion beside him, "I think so, anyway, what those underground organizations want is money, we might as well let the leadership come forward to solve it, let them find someone to talk to , we don't need to go, after all, it's better for the people above them to solve it."

Long Xiaoyun was worried that they didn't know much about this silicon element. If they were deceived or couldn't find other ways, then this matter would be more difficult.

Qin Yuan shook his head. Although this plan sounds the most reliable, let other upper-level people discuss this matter, but this matter is very light, and Yuan Guo will not provide that silicon element at a critical moment.

It is very likely that others are colluding, so they have to hide their identities this time, and they cannot expose themselves. No matter what, they must first get the silicon element.

In this way, Qin Yuan and his entire team came to the border area after disguised, and then came to the Yuan Kingdom through the border.

This time, Mr. Zhang couldn't help them too much. After all, they would have been alerted by inquiring before, so Qin Yuan could only rely on Qin Yuan and the others for the rest.

But none of these were difficult for Qin Yuan. After he came to the Yuan Kingdom, he quickly found the local underground black market, which was basically completely monopolized by some local organizations, and he could buy anything he wanted. This place full of sins of all kinds.

What they didn't expect was that the underground black market in Yuanguo was very rampant and very large-scale. I would rather they find a middleman to express their intentions. In the future, as long as they pay a favor fee, they will directly take them to the trading place and buy anything. It will be all right.

It's just that when the middleman came, there were too many of them, he shook his head, and even said with gestures and gestures.

Chapter 1293: Silicon element

The "There are too many of you, I can only let two people follow, and you can't bring weapons."

You Erniu are not happy to hear this, what does this guy want to do without a weapon, isn't it obvious that he wants to be black and black?

"What do you guys mean? Are you trying to cheat? If something happens, wouldn't you be better off?"

This middleman patted his chest and promised that such a thing would never happen? They are also for safety considerations. People who go to that place to trade will not carry weapons, and they can guarantee absolute safety.

Seeing that this guy was so persistent, Qin Yuan and the others had no choice but to take Long Xiaoyun with him in the end. If there was any problem, both of them could take care of it.

In this way, Qin Yuan and Long Xiaoyun got into their car together, the middleman still had a gun on his waist, he saw Qin Yuan was looking at him, he turned his head and said with a smile:

"Don't worry, we are honest. I know that you bosses will come and go in business. We are not doing one-off business. That will never happen."

That is the role of the middleman. With the black market, there are such middlemen. They charge a certain fee by taking people to the black market, but they have to ensure the safety of this line back and forth.

"By the way, you can just call me Laoba. I don't care what you buy when you go in. I won't bother. It's just that you have three hours, and I will wait for you at the exit for three hours."

Qin Yuan nodded, and just like that, the vehicle detoured into another alley, which was a street after coming out from the small, and then stopped at the gate of an iron fence.

The old bus went down first to communicate. After a while, Qin Yuan and the others also came down. The fence door next to it opened, and there was an old black leading Qin Yuan and the others inside.

This is Qin Yuan's first visit to such a large-scale black market, but when he entered, he was completely stunned. It was quite formal, and when he entered this street, he could see there were people holding weapons on the street to maintain order. .

When they entered the door, they just searched their bodies symbolically to make sure there were no weapons, and then issued them two masks.

"Two guests, please follow me. Here we absolutely guarantee the privacy of the transaction."

This was quite formal. Qin Yuan followed the people in front of him to another trading center. He went through several handovers along the way. It seems that the business here is not easy.

In the end, Qin Yuan and the others followed a bearded manTell me directly what you need to buy, and then I will take you directly to the item and the seller, anything is fine. "

Qin Yuan didn't speak at all. After all, he was wearing a mask now, so the privacy was better.

He approached the bearded man's ear, then lowered his voice and said three words, "Silicon element."

In fact, this thing can not only be used to make materials for space stations, but also many guns, weapons and protective clothing materials will also have this element.

So the bearded man didn't have any doubts, so he took Qin Yuan into the trading hall and asked them to wait for a while before he went to negotiate.

After a while, led by Big Beard, Qin Yuan and the others met the seller, who was also wearing a mask, very mysterious.

Chapter 1294 Special Origin

"I'd like to know why you need this thing? It's not easy to get this thing."

"What you said is a bit redundant. Isn't the rule in this place just not to inquire about any whereabouts? If you are willing to sell, I am willing to buy. This is a matter of course."

The person opposite didn't find out anything, smiled, then patted the table and said: "This is indeed, as long as the money is in place, you can do anything, but the price of this thing is very high, and we do have a batch."

"As long as you have it, you can set the price first."

The man stretched out his hand and compared a number, "Eighty million!"

Qin Yuan frowned slightly, this is really a lion's mouth, such a high price, how much can he have?

"Your price is indeed too high and outrageous, I just want to know how much you can have?"

"The price must be linked to the quantity. We have three cars of this thing."

Because this also exists in a certain ore that needs to be extracted, so the quantity should not be a problem. In addition, this is in the black market, so the price will indeed be a little high, which is normal.

Qin Yuan pretended to think, and then came out to discuss with Long Xiaoyun. Long Xiaoyun was stunned when he heard that the price was higher than they expected before, but Mr. Zhang said that any price is not a problem.

After negotiating in this way, Qin Yuan also made a decision, but the man said that they need to give them a week to prepare the goods.

Qin Yuan fully agreed to go up to fight the man, and unknowingly placed a monitor on the man.

How could this 80 million be so cheap? In addition, these people are not good people in the first place, and they have the same things when they get them. He wants to see where these guys go to get them, and then he will start ahead of time and ***** the things away.

In this way, Qin Yuan and the others will come back first, and the middleman will take them there next time. The trading place has always been here, so it is safer.

After returning, Qin Yuan couldn't wait to check the monitor placed on the man. After checking, he realized that this guy didn't have any elements in his hands, but they knew that a batch had been unearthed locally.

He said he would give him a week, in fact, to rob him, and then resell it to himself after he robbed it, to be an empty-handed white wolf, to take other people's things and sell it to himself, and more importantly, this guy's plan is still up to no good. It was seamless.

They planned to grab the silicon element and sell it to Qin Yuan, and then report it to the people above to get reward clues.

Although it is said that their current transactions are secret and they trade in this underground black market, once they go out of this range, the people in the black market will not make any guarantees.

That guy was just looking for this vacancy, as long as he delivered the goods to Qin Yuan, and then snatched the goods back.

In a room at the moment, the man just now looked at the leader next to him excitedly.

"Boss, we're going to get rich now. That kid looks like a breakup. It should be the first time he's here to trade, so it shouldn't be a problem."

"Are you sure? That kid won't have any special background!"

"Don't worry, boss, I have sent Amin and the others to follow up. Amin said that they just got into the old bus and their car. What kind of big shots can the people introduced by the old bus be?"

Having said that, the man is relieved, he plans to make a fuss outside

Chapter 1295: push the price up

Not only will he not give the goods, but he will also take back the money.

Several people conspired in the room, and Qin Yuan already knew their plan, as expected, such a situation would really happen in a foreign country.

Qin Yuan told the team members the clues he had just learned, but Long Xiaoyun was surprised. How could Qin Yuan know such a detailed plan?

"You guys really have more and more secrets. What's going on? Tell us quickly, and where did you know it?"

"Don't worry, this is absolutely fine. I installed a bug on that guy. Since he wants to cheat, we will eat him first."

Li Erniu and the others were all gearing up when they heard this, after all, they hadn't done anything for a long time, and these guys were so naive that they really wanted to do something to them.

Now Qin Yuan just needs to monitor them at all times, wait for them to intercept their supplies from above, and then they will do it.

I have to say that some organizations in the black market here are really arrogant, even daring to grab the things above, but these things have nothing to do with Qin Yuan, anyway, they will go through a process, and they will be the fisherman's profit when the time comes.

Three days later, Qin Yuan noticed that the men and the others had made a move. Qin Yuan immediately took the team and followed them closely, ambush in the dark like this, as long as they grabbed something, he would act by himself.

This feeling of praying mantis catching cicada and oriole behind is really exciting. You must know that this is not allowed in China, but it is not necessarily the case abroad. After all, these people are not good people.

Although these underground organizations are very rampant, it is also because they have a certain strength that they did not expect to completely disperse the escorts in their country.

Qin Yuan originally thought that these people could use up their strength, but he didn't expect to leave the vehicle behind and everyone ran away after only half an hour.

However, it is also understandable. After all, the Yuan Kingdom had not recovered from the war for a few years before, and various organizations poured in, so the situation was still unstable.

People from this organization hurried forward to check, and the things they robbed were indeed just more than what they had budgeted for before, and there were four cars in total.

The men negotiating with Qin Yuan every day almost laughed out loud when they saw the four carts of supplies. This time, they can extort another sum and raise the price even higher.

After getting the money, they did it directly. When they were transporting the supplies and going back, after all, they had just finished grabbing them now, so they had to go back first. Unexpectedly, Qin Yuan and the others rushed out on the way .

These people are no match for Qin Yuan and the others, the difference is the difference between the miscellaneous army and the regular army. Qin Yuan and the others are very fast and have a clear division of labor. It took only five minutes to stop the vehicle directly. The boss in the vehicle did not understand what happened. What, he took out his gun viciously, and someone dared to control his way here.

"Damn, I think you are really looking for death, do you know who I am?"

As soon as the words fell, Qin Yuan's gun was aimed directly at his head. The boss was shot in the head in an instant, and all the dragons had no leader for a while. People around wanted to run outside, but they were all dealt with by Li Erniu and the others.

Soon these members of the organization were dealt with by Qin Yuan and the others, which can be regarded as eliminating harm for the people, after all, these things were not obtained through legitimate means.

Chapter 1296: Receive goods

The Li Erniu rushed to the car excitedly. He didn't expect this time to go so smoothly. After all, these guys are really vulnerable. Although they also have weapons in their hands, compared to the well-trained special forces Say, not worth mentioning at all.

Now that the material has been obtained, what they need to solve is to transport this batch of materials back to the country. If they walk, it will definitely not work, and they can only look at transporting by sea.

Qin Yuan immediately contacted Mr. Zhang, and he immediately sent a cargo ship to respond after receiving the news. After all, the situation was special, so he could only take some fake photos to respond to them, but it took a long time, at least three days. .

So Qin Yuan and the others need to wait here for three days, and then leave after the goods arrive. This situation can only be hidden as deeply as possible. Qin Yuan asked everyone to drive into the nearby jungle together, and wait for the boat to arrive. The goods will be loaded immediately upon docking.

In the past two days, Qin Yuan and the others didn't know what happened in the city from the inside. After all, these supplies are very precious.

The main problem is that Yuanguo has promised to provide these materials to the country of Mi, but they were robbed halfway, and they were still in their territory. This is a great shame.

The person in charge of the Yuan Kingdom was very furious about this matter, and immediately set up a special action team to investigate this matter, and must find that batch of supplies, so now all major ports and communication points have set up checkpoints.

When Qin Yuan went to buy supplies, he realized that the streets outside were more regulated than usual, and there were patrol cars everywhere. A bad premonition arose in his heart.

Sure enough, the fishing boat that was supposed to come to pick them up in three days could not come in now, because in order to find out the whereabouts of this batch of supplies, Yuanguo had closed all the ports and roads, just to avoid the loss of supplies.

Now this batch of supplies is in their hands, but they can't take them out, and if they are discovered as time goes by, it will be troublesome.

At this moment, in a huge meeting room, several responsible persons of Yuan Guo were having a meeting, and the military chief responsible for this operation was sitting on the left.

"According to what we know so far, this batch of supplies was accepted by the local Black Dragon Organization, but according to our further investigation, the Black Dragon Organization was killed on the way to inoculate the supplies."

The congressman sitting next to him was a little puzzled. The Black Dragon Organization was a relatively well-known underground organization in their locality, and their abilities were considered outstanding. Why was it suddenly silenced?

"What did you do locally when such a large shooting happened? As far as I know, this shooting took place for more than ten minutes. What are your security personnel doing during these ten minutes?"

The military officer next to him, Arem, was a little unhappy when he heard this. After all, the situation in the country is very unstable now. Although they are on the official side, they are very poor, and their weapons are not as good as others.

Just like this time, the people below them were responsible for the escort, but all the weapons in their hands were defective products eliminated by the Mi Army before, and they were useless at all. On the contrary, look at the M11s of the Black Dragon Organization.

Under the contrast of such weapons.

Chapter 1297: Mi equipment

The They have no ability at all, and coupled with the lack of morale in the army, they cannot be gathered together.

That's why the materials were robbed by other organizations, but to say the least, these organizations are also very courageous, their cars are directly marked with their logos, and these people even dare to ***** their things.

"Mr. Jamie, now that the problem has already happened, it doesn't make any sense to ask about our responsibility now. It's better to find a way to solve the problem."

"Yes, I'm just asking you to solve the problem. It's been three full days now. Have you found any clues? You should be responsible for this incident, especially you."

Aleim clenched his fists at this moment. Whether he could find out or not was not up to him. In addition, their equipment was so rudimentary. If they did find out any clues, they would not dare to directly fight with them.

Seeing that the person in front of him was being aggressive all the time, and wanted to put this ***** bowl on his head, he stopped doing it, and simply stood up and said all the problems.

"If you want to say that, then I can't help it. All of our weapons are obsolete products, and we don't have enough personnel. How do you ask me to check? There is no way to find out."

"This is your problem, not mine. I'm just in charge of coordination. What we need is the result. You need to be responsible for the whole process, understand?"

When the two sides were arguing, the door was suddenly opened, and there was a middle-aged officer in uniform. This guy looked like a representative of the Mi Army.

Unexpectedly, people from the country of America would also send people over. After all, they had already ordered this batch of supplies. Everyone watched the people from the country of America walk in, and no one dared to speak for a while.

The military officer from the United States walked in, looked at their cowering appearance, and showed a contemptuous smile. He really came to solve this problem. If it wasn't for the supplies, he wouldn't be bothered to provide weapons and equipment to these bugs.

The officer came over, took out a list from his arms and patted it on the table. This is the supplies they provided this time.

All of them were equipped with rice equipment, and they also provided two commando personnel to assist in this investigation.

Aleim's eyes lit up instantly when he saw the supplies on the list. With these supplies, what is there to worry about? As long as he has money, he has no problems, isn't it just some underground organization? He can dig them all out.

After all, the target of his suspicion now is that the underground black organizations are fighting with each other, and there is a black-and-white situation, but this will go to the underground black market to investigate.

First of all, you need to find a buyer. After all, this item is sold, so someone will come to grab it. After all, these underground black organizations have no idea what this thing can be used for. All they need is someone to buy it, and they are responsible for it. Come on.

The military officer of the United States looked domineering, walked over and kicked the stool away, "I have provided you with all the supplies and personnel this time, and now I only have one request, which is to find these supplies within a week."

This tone is really too arrogant. Although the people present are not convinced, they dare not resist. After all, their strength is there.

And then he also said a shocking news, "If this batch of supplies is still not found."

Chapter 1298: How could it be so easy to take it back

The "Then I can only apply to the above and send our garrison to help you find it!"

Hearing this, everyone understood that the so-called garrison actually meant another kind of occupation. If they were really allowed to come, it would be fine, and it was basically impossible to go back.

In addition, they can still hold these materials in their own hands now, and they can become some bargaining chips. It will not be so easy to say when they actually move in.

The military officers of the United States walked out directly after speaking. This is their capital. After a while, two trucks came in from the yard outside, and those people began to unload supplies.

Everyone in the conference room stood at the window and watched everything outside silently. At this time, two assault teams from the United States also came in, and those American soldiers began to set up tents in the middle of the playground.

The people who were still arguing before have become extremely united at this moment. After all, they know that no matter how much their insiders quarrel, it is their internal affairs, but now someone from the outside is getting involved, so now no matter what, they must find that Batch of supplies.

"It seems that this time the matter is more serious than we thought, and it is possible that the supplies are just an excuse."

Aleim frowned, and then strode out. Now he had to race against time, because the time limit given to them by the US side was only one week.

He had to find the **** supplies within a week. At this time, it was raining again. Qin Yuan had just distributed the food he bought to everyone. The city was not very peaceful recently, and there were patrol cars everywhere.

And the bad news came soon after. They don't know when their ships will come to the port. Everything is unknown.

These supplies are inconvenient to conceal. These large carts of goods can only be driven in this jungle, but it is not a long-term solution at all.

"Brother Qin, what should we do now? It's really cumbersome to carry these materials with us. I'm mainly worried that it will be troublesome if they find out. After all, our identities are quite embarrassing now."

"Today I saw that the participation of American people is definitely not that simple. Since this is the case, this batch of supplies should not be allowed to them."

"Brother Qin, what I mean is whether we can give up this batch of supplies. Let's talk about it next time when we find a chance. After all, if we are discovered, we won't be able to explain it clearly later."

"It's impossible for me to give up this batch of supplies. Since it's in my hands, how can I take it back so easily?"

Qin Yuan snorted coldly, then asked everyone to stay where they were, and he went out to check the situation, but for now they are relatively safe here, after all, it is far away from the urban area, even if they want to find it, they will not be able to find it for a while. Can't find it here.

On the other side, the underground black market was already in chaos, and many local soldiers in camouflage directly rushed into the underground black market.

Those little guys have never encountered such a situation. After all, the local soldiers dare not rush in like this. Their armed forces are very strong. These underground organizations have their own set of military management.

However, what they didn't expect was that the weapons and equipment they brought this time were stronger than those of these organizations, and they directly forcibly opened the black underground door. After bursts of explosions, the door completely collapsed.

Chapter 1299: underground black market

The leader of the underground black market was also very shocked when he heard that his market had been attacked. Which organization dared to take such a bold move.

The boss in charge immediately rushed to the underground black market with his subordinates, but when he got there, he didn't expect that the whole black market had been controlled by the local military.

He frowned and walked forward without any fear at all, because he knew his strength, and he had given them a lot of benefits over the years.

"What's going on here? Where is your officer in charge? Tell him to come and see me now."

Unexpectedly, the soldier in front of him ignored him at all, and was about to unload his weapon as soon as he stepped forward. The younger brother behind him hurried forward to shoot, and a gun battle broke out between the two sides for a while.

The boss in charge didn't expect their weapons to become so good. The two sides fought fiercely for a while, and the military also had a great advantage in numbers. In the end, he could only stand up and surrender with his hands up.

The former all-powerful boss didn't expect to be pushed to the ground directly, and the person in camouflage uniform controlled him. After a while, Aleim came over.

Although the boss was being controlled, he was full of disbelief. He didn't know what happened, he gritted his teeth and raised his head to look at the person in front of him.

"I really didn't expect it to be you, Areem, what the **** are you trying to do? Come here and ruin my business!"

"Don't talk nonsense, now I want to ask you a question, has anyone bought silicon here before!"

"Why are you yelling at me here? Let me tell you, although I'm being pushed to the ground by you now, but you wait, do you think I'm the only one who has the final say in this place?"

Aleim smiled disdainfully. This guy still didn't seem to understand the reality. After he finished speaking, he snapped his fingers, and the men next to him dragged a man with a bruised nose and a swollen face from the car.

The boss in charge who was lying on the ground took a closer look, but he didn't expect it to be Huolong, the leader of another organization he partnered with.

Only relying on his own strength, it is definitely impossible to manage this underground black market in such a standardized way. This fire dragon is also very powerful. The two of them cooperated together to manage and establish this underground black market.

But Huolong usually advises him behind the scenes, and then does some management work. The boss is responsible for the specific operations.

Unexpectedly, even the fire dragon was beaten into a pig's head, and he didn't know what was going on.

Huolong came down tremblingly at this moment, ran forward and grabbed him, "What do you know? Tell me quickly, this time we got into big trouble, tell us what you have, or you won't be able to save your life."

"What's going on? What about your subordinates? You have more subordinates than here."

"Hehe, what are my subordinates? They played too big this time."

Just as he was talking, he saw several armored vehicles driving directly over. Unexpectedly, even these heavy weapons were used. The boss of this organization also realized the seriousness of the matter.

He quickly stood up and expressed his willingness to assist in the investigation. He went to find the transaction records of the last week, as well as the person in charge. Their management here is relatively standard, as long as they find the person in charge to be connected, it will be fine.

Chapter 1300: Start full search

The At this moment, Qin Yuan is lying not far away, observing every move here. In this case, they will be found out soon. He must find a way to transport the supplies as soon as possible. He is not afraid of these things People, just worried that it will have a bad impact on Yan Country.

In addition, this batch of materials is also very important. Now Mr. Zhang and the others are waiting for this batch of materials to build a space station. With the oppression of the United States, it may be difficult to obtain this element.

Qin Yuan retreated quietly. He went back to the jungle and told everyone about the situation outside. Now he had to find a hidden place. He also brought a local map. The terrain here is very steep.

Long Xiaoyun frowned and pointed to the mountain road next to him, "I wish you that I checked it out this morning, it's too narrow and very steep, and it's impossible for a big truck like us to get through it, unless we can get some small vehicles now Transport them to the mountains in batches and hide them."

A big truck like this can't drive up at all. The road conditions here are very bad. The road is already very narrow, and it's all mountain roads.

But the crux of the problem is that the outside inspection is very strict now. If they go to build trucks now, they will be discovered easily.

In addition, there is not so much time to wait for them to find a truck to slowly unload the goods. The best way is to drive directly up.

"Well, I'll drive later, and you will be responsible for guarding the periphery. After you drive up from here, there is a pine forest on the side, which can perfectly cover up these trucks."

"No, the road over there is too steep, and there is a cliff next to it, so it's too dangerous."

Long Xiaoyun objected just as Qin Yuan brought it up. After all, it was really dangerous. She had already surveyed that road this morning, and it was impossible to pass.

But this is the only way, Qin Yuan intends to try it first, watching him walk over and looking at Long Xiaoyun firmly said: "I don't think there is any problem with me, I can definitely drive through, I have driven on even the worst road conditions, Trust my skills."

Long Xiaoyun frowned. It wasn't because of his belief in his skills, but because the road conditions didn't allow such a weight. After the truck drove up, if it collapsed a little bit, the cliff next to it would mean that the car crashed and people died. .

But Qin Yuan was very persistent, and in the end they had no choice but to go up with Qin Yuan and try the road ahead, and they could still drive together.

The reason why there is such a dilapidated dirt road here is because there is a village on the top of the cliff, but with the development in the past two years, that village has long been deserted.

Because the road conditions along the way are really bad, everyone drives with trepidation. The road is too narrow. It has not reached the most difficult part. The most difficult part is the road section that Long Xiaoyun saw this morning.

"If I don't think the Dragon Team can do it, we will rely on a few of us to carry all the supplies up the mountain and hide them in that deserted village."

"This is definitely not possible. If we want to memorize these things, it just takes time for the few of us, but we can think of that deserted village, and so can others."

The road to the top will only become narrower and narrower. Everyone can only be more vigilant, and finally they can't go up halfway.
