

Special Soldier 1301

Chapter 1301: Praying Mantis Cicada

After all, the road ahead is very difficult and dangerous, and they dare not walk at all.

Qin Yuan came down and looked at the road ahead. The road was very narrow, barely enough for the wheels of a large truck, and it was close to the nearby wall.

There is no gap at all, and there are a lot of gravel rolling down the tires of the vehicle, which is impossible at all.

Unexpectedly, Qingyuan jumped into the car directly, just let them stay in place and pay attention to vigilance, just like this, he drove up with one foot of the accelerator, and the operation was very stable, and the people behind were terrified.

Long Xiaoyun Niannian nervously stood behind and kept looking up, Qin Yuan's operation was very stable, he firmly held the steering wheel.

It's not a big deal for him to use the skills of the system. After all, he has world-class driving skills. Under his control, Long Xiaoyun was relieved that the first truck passed successfully.

I didn't expect Qin Yuan's operation to be so superb, and he was able to pass such a thrilling section of road, which is really amazing.

As soon as he got off, the other team members hurried to use it, and they could see the marks of the wheels on the road, and the sides of the car were rubbed along the way.

"Brother Qin, you are so awesome, no one can do this."

"What's this? It's a piece of cake for me. You guys wait here, and I'll drive the rest up."

In this way, under the operation of Qin Yuan's old driver, there was a little accident, the car drove up steadily, Long Xiaoyun and the others started to clean up the traces behind, roughly cleaning up the marks and rubbed marks on the surrounding wheels a bit.

On the other side of the city, a search has already begun, because the buyer's information has been obtained from the black market boss.

"I really don't know where they came from. I only know two people, a man and a woman. Our rule here is that we can't ask them about their situation."

The man who spoke was the middleman who brought Qin Yuan and the others to the black market that day. At this moment, he had already been beaten to death.

But even under such torture, he really didn't know what was going on. In the end, he just took the military personnel to the place where Qin Yuan and the others got off.

Now they can only find this middleman, because everyone in the black dragon organization who knew the inside story has been killed.

At that time, the Black Dragon Organization was dispatched to ***** this batch of supplies but they didn't expect the praying mantis to catch the cicada, and the oriole was behind, and Qin Yuan and the others counter-killed it.

The insider was dead, so he could only hold on to the middleman. Aleem walked down and looked at the place where the middleman picked them up. The scope here is too wide.

But the scope is wide, and they can only investigate. In this way, he expanded the search scope and began to search around. After all, they have already blocked the entire process, and it is absolutely impossible for the materials to go out.

Aleim and the others searched the jungle where Qin Yuan and the others were before, but now Qin Yuan and the others have completely moved to another place.

Some traces of being crushed were indeed found in this jungle, but this did not mean that it was the truck from before, after all, there were people coming and going here.

They did find some suspicious traces, but they couldn't tell. After all, they were very professional in what they did. The tires on these big cars had already been wiped away.

Chapter 1302: swagger

It's just that some crushed plants cannot be restored.

Aleim followed the jungle to the dirt road that Qin Yuan and the others drove up. There were not many traces on this road, so he shook his head.

"I remember is there an abandoned village above this?"

"Yes, sir, that village has not been inhabited for a long time, do you suspect that the supplies are there?"

"Don't let go of any corner, and immediately send a small team to investigate."

After the soldiers got the order, they hurriedly led a team towards the village for a week. Some people inside were very suspicious of this order. After all, such a narrow road, such a truck could not be driven up at all. The trucks they carried were for military use. How could it be possible to get on this road with a large truck?

"I think these officers are just giving random orders to let us make a trip for nothing. How can their trucks get on such a narrow road? I think it is possible to get on a horse-drawn carriage."

"We can't let go of any suspicious situations, go up and check first."

In this way, they went up to the village and searched around, but there was no trace at all. Aleem looked at the people who went up and down and knew that there was no result. So where did the supplies go? Now they have launched a search all over the city, but it seems that the world has disappeared.

The soldiers in the United States have been aggressive all the time. Seeing that the stipulated time is getting closer and closer, Areem is also under great pressure.

According to the stipulated time, there is only the last day left, but they have already checked, and they have not found any places where the goods may be hidden, and even dispatched drones.

At this moment, Qin Yuan and the others found a village to stay at ease. There are too many large and small villages in the Yuan Kingdom, and they have no time to investigate, and the main direction of their investigation is the large truck.

So Qin Yuan and the others are very safe. Aleim is on fire in the office and has searched all the places he thinks may be hiding, but there is no news at all.

At this time, the soldier from the United States strode in, still with that arrogant attitude.

"What's going on? What's the situation? The time is almost here. Can you hand over that batch of goods?"

"Now we are doing our best to investigate, and the whereabouts should be found soon, and there will be a situation soon."

"You said it very quickly, how long will it take? As far as I know, you haven't made any progress so far, right?"

The American side directly exposed his excuse, "Forget it, we simply don't have the patience to waste time with you here. If this is the case, why not let our army come in to assist you."

Aleem clenched his fists when he heard this, he had had enough these days, this guy kept pushing him with this, but the ***** shipment just couldn't be found.

He stood up directly, staring at the man in front of him angrily, "This is our country, we can make our own decisions, we don't need your army to help us, we will find it ourselves, besides, can we hand over this thing?" For you, it is up to us to decide."

Unexpectedly, the officer from the American country burst out laughing after hearing this. In front of him, he thought this man was very funny, and he was talking about something.

Chapter 1303: Do you have any evidence?

The "You think this matter can be decided by you as a small officer. Forget it, I don't want to talk nonsense with you here. There are some things that our diplomats should talk about."

The military officer of the United States walked out like this, he was unscrupulous, because he knew what his confidence was, and these people didn't dare to do anything to him.

The secretary next to Alem was also very angry. This guy was so arrogant that he threatened them like this, and his meaning was very clear now, and he wanted to let their army move in.

"Sir, I think this batch of goods is probably not the ghost of the organization here, it is probably their ghost."

Aleim was reminded by the secretary, and he reacted instantly, yes! Who can have such a great ability, except for them, the United States, isn't this their strategy?

He stared viciously at the American military officer who walked out, and then said loudly: "Catch that guy, I now suspect that he is definitely related to that batch of goods, they must have hidden the goods."

The soldiers next to him had had enough, since the officer had already given the order, they rushed forward quickly and directly subdued the American officer.

"You bastard, do you know what you're doing?"

Aleim stepped forward and slapped him directly on the face, "I now suspect that you swallowed that batch of goods, and now let us search here."

"What! Damn! What are you doing?"

At this time, the two American commandos stationed on the playground outside quickly surrounded them, but the surrounding soldiers had had enough, and immediately rushed forward to completely disarm their guns. After all, everything came too soon. Suddenly, those American soldiers didn't react.

They thought that these people would not resist at all, so they didn't have the slightest sense of vigilance, but they didn't expect that they would all be **** by them.

The American officer was cursing, he didn't know what this guy was trying to do, he was threatening to let Aleim release him quickly, otherwise he would report to the supreme commander immediately.

The military officer in Yuan State was also shocked when he heard the news that the American man was tied up. He didn't know what this Arem was going to do. When he came, he saw that the American officer had been beaten into a pig's head. .

He hurriedly stepped forward and yelled loudly, stopping the soldiers next to him and telling them not to make any more moves.

"What are you doing! Damn bastards! Are you going to kill everyone?"

While he was talking, the soldiers next to him could only help first. At this time, Aleim also came out.

"You should take care of your soldiers, you treat our friends so brutally!"

"Sir, I think you have to make it clear that they are not our friends. Now I suspect that the supplies were annexed by them, and then let us go find them again in the name of helping us."

"Do you have any evidence for this?"

"Recently, we have searched all over the Yuan Kingdom, but we just can't find this batch of supplies. Don't you find it strange? And just now he said that he will send a garrison soon."

The person in charge frowned tightly, but he didn't want to see it. Once the garrison entered, everything would be over.

But it's hard for them to explain that they tied people up without saying a word, but if this thing is true, then they have to pay attention.

Chapter 1304: They must have taken it!

In any case, this person is also from the United States. If something goes wrong, they can't bear the responsibility. This is not something that one or two of them can settle.

That American military officer had no position at all, and he was cursing. He knew that these people dared not do anything to him, and there was a strong force behind him.

"I advise you to put me in now, and apologize to me and my videos, otherwise I will immediately apply to the above."

Aleim asked his subordinates to directly plug his mouth with a cloth, so as not to let him scream here, and then took him down.

In this way, they were temporarily locked up. The person in charge next to him was very sad. He knew that this was only a temporary solution, and they still wanted to release these Americans in the end.

"Do you know the consequences of doing this? It will really cause problems in some aspects of us. We cannot afford to offend them in the United States."

"I know we can't afford to offend them, but the problem is the same whether we help them or not. He just said that he will sue immediately, and then let their garrison come in to help us."

Is it really coaxing a three-year-old? They would be so kind to help. To put it bluntly, it was because of their little resources. They had fallen out with Yan Guo before, because they had promised well before, and now they no longer provide this element to Yan Guo.

It is because the United States put pressure on the back and promised to give them certain benefits and buy this silicon element at three times the price, so they will resell it to the United States to provide it.

Unexpectedly, these guys just want to be white wolves with empty hands, don't want to give anything, and want to monopolize Yan Kingdom, and they can get this thing back without spending a penny.

Originally, the American side really thought so, but they didn't expect that because of the loss of this batch of materials, they would completely expose the prototype. To be honest, this batch of materials was also Qin Yuan's mistake.

But now Arem and the others feel that the supplies are definitely in the hands of the Americans, otherwise how could they not find them? Only they have this strength.

"I've dispatched so many people to search day and night, but I can't find these supplies at all. It's impossible for the world to disappear. It's definitely their fault, and it just happened by such a coincidence."

The person in charge of Yuan Kingdom also found it very strange. They could ask Yan Kingdom for help before, but things are not so easy to handle now. Since they did not provide materials, they have completely offended this road. Now They can't go back and provide supplies.

What they are now facing is a dilemma, and the reason why Aleim arrested all these people is that they are responsible, and the supplies are definitely in their hands.

But Aleim took his people to search for the place where they lived, but there was no whereabouts.

"I think this batch of materials should have been quietly shipped out of the country by them. After all, it has been a day since we knew about it. During this period of time, I think they can definitely do it with their strength."

The person in charge also nodded. He was clear about this. The crux of the problem is that they can't find evidence now, and the US side will give an explanation. Now their people have been detained, and the Ministry of Foreign Affairs has already put pressure on it.

Chapter 1305: don't want to hurt anyone

"We definitely have their people inside. Only a few hours later, they have received news from their side and kept putting pressure on us to release their personnel."

"So the current situation is that whether we commit criminals or not, the result is the same. Once their garrison enters, it will be completely finished."

Arem and the others are thinking of a solution to this matter in the meeting room. In fact, the best solution is to find this batch of supplies. Now they all believe that the Americans definitely took them, but if this batch of supplies is really sent out, can't find any evidence at all.

At this moment, their conversation was clearly heard by Qin Yuan who was outside, and he stuck tightly to the outer wall.

Qin Yuan didn't expect that his mistake would make them dog-eat-dog, but the American people are indeed hateful, they have already occupied the resources of several countries by such means, they are really full of ambitions.

He leaned on the wall outside and thought for a while, in this case, he might as well take this opportunity to completely break their relationship, and more importantly, to keep the Yuan Kingdom now.

Although this has nothing to do with me, this kind of silicon element has a lot of demand in the subsequent manufacture of various materials, including the manufacture of ship mothers.

After Qin Yuan upgraded from the system, he would know a general range of many things as soon as he touched them, so this element is very important.

No matter what, first of all, we must keep the Yuan Kingdom, which can be regarded as protecting the material from the side, and find a way to let them provide it to the Yan Kingdom in the future.

When several people in the conference room were in a state of desperation, a figure jumped in from the window. Areem became nervous instantly, and quickly picked up the gun on the table, but after a gust of wind, he saw that the person in front had arrived Arim's side.

"If I were you, I wouldn't take a gun."

"Who are you? Do you know where this is?"

"Of course I know everyone, you can lower your volume. If you hear the first person outside, it won't be fun. I didn't come here today to make trouble, and I don't want to hurt anyone, but..."

Before Qin Yuan could finish his sentence, a member of parliament next to him yelled loudly, which instantly alarmed the guards in the corridor. Qin Yuan shook his head helplessly. This is what they asked for.

Originally, he really didn't want to hurt anyone, but now his plan would be disrupted after alarming other people, and the guards outside rushed in in an instant.

But Qin Yuan's speed was even faster. Just after those guards rushed in, he rushed up and punched a person who was coming towards him.

A soldier on the left quickly picked up the short knife, willing to kick the knife away with a perfect sideways body, and then kicked the soldier's chin, and he fell heavily to the ground without moving. come up.

They were all knocked down by Qin Yuan within a few minutes. Qin Yuan didn't hurt them, but knocked them out completely. Everyone in the conference room was stunned, and Aleim kept looking for opportunities behind him with a pistol.

The people next to him kept asking Aleim to shoot quickly, "What are you doing? Shoot quickly!"

"It's not that I don't shoot, but that my people are also inside, and it will hurt them then."

Chapter 1306: Let's talk about hurting Qin Yuan

Now the distance is too close, and Aleim is worried that he will hurt other people. The person in charge next to him keeps urging him to feel that he can't control so much now, and hurt Qin Yuan first.

Finally, under his urging, he could only shoot, but what he didn't expect was that Qin Yuan easily dodged the bullet and pulled the people around him.

Aleim was completely stunned, and then Qin Yuan kicked the person just now away with a side kick, and came directly in front of him in a flash.

This speed was so fast that he was shocked. Is this really the speed of a normal person? In the next second, there was a pain in his wrist, and the pistol fell to the ground, and was kicked out by Qin Yuan.

The people around were stunned, it happened so fast, Qin Yuan made a quiet movement again as the guards fell on the ground.

"I'll say it again, I hope you don't bring innocent people in again, otherwise I will really attack them again. No matter how many people you come, I can solve it perfectly, but this is not the purpose of my coming."

The people next to them were very disturbed, because this was their office building, and a stranger broke in, even though he said he would not hurt them.

He was very disturbed, but unexpectedly, Arem next to him put down his hand and sat down on the stool next to him.

"What are you guys doing? Are you giving up? This guy doesn't know who he is, and he passed it to us inexplicably."

"You don't have to be so nervous, just relax, I don't think he will hurt us."

"What do you mean? He won't hurt us, didn't you see? He stretched out his hand so hard just now, these guards were knocked down by him."

"I know I was knocked down by him, but I didn't really want to hurt."

Because when Arem shot just now, although Qin Yuan dodged the bullet, he could actually ignore the life and death of the person next to him, but he pulled the person next to him, which was a subconscious protection.

It means that he doesn't want to hurt the people here at all. This guy is not only powerful, but he also came with other purposes, at least he won't hurt them.

If Qin Yuan used his original face, then Aleem must have known him. After all, he had known him before at Aleem's level, but at this moment, Qin Yuan had already changed his appearance, and he was just an ordinary young man in front of them. people.

The person in charge also quieted down under Arem's suggestion, and everyone sat quietly like this.

"Tell me, What is the purpose of your visit this time? And I'm really curious, with your skills. What exactly do you want to do?"

"It's very simple. I'm here to help you. I know what problems you're encountering. The supplies are indeed in the hands of the Americans. I can find them for you."

Everyone was shocked when they heard this. After all, this is a very confidential matter. Unexpectedly, this young man knew it all, and Qin Yuan also directly stated their current problem.

"Then why do you think I believe you? Besides, you know what it means? Although you just said that you won't hurt us, but you come into this place, do you think I will let you out?"

The person in charge was very angry. After all, this guy's tone was too arrogant, and he told them how to solve it from the perspective of God.

Chapter 1307: Qin Yuan will definitely come back again

He still can't let others dictate, this is their own business.

"Because only I can solve you. Of course, if you don't need it, then wait and see, but I can wait. If you ask me, I won't know."

After Qin Yuan finished speaking, he smiled, and looked at Alim next to him with long eyes. He knew that Alim definitely understood his intentions, but they definitely couldn't make a decision based on the current situation. Just like that, he turned over and jumped out. outside the window.

The people next to him saw him jumping out of the window, and only reacted at this time. After a few minutes, the guards downstairs noticed the movement. When they ran up, they saw the soldier lying on the ground. Everyone was stunned. But nothing was heard.

The person in charge got angry at the side, "I really don't know what you are raising for food. If they come in and kill us all, I guess you don't know a bunch of trash."

The soldiers who were scolded were also a little at a loss. They really didn't hear anything and could only clean up the mess silently. Fortunately, the soldiers on the ground just passed out and did not suffer any real injuries.

It can be said that Qin Yuan's strength is very well controlled, and he didn't hurt these people, but temporarily made them lose their ability to move.

The person in charge was very angry. He felt that he had been played by others, first from the US side. Are they really so weak? Being bullied by others once and for all.

He immediately gave an order to send out all the soldiers to find this person and bring him back, but he was stopped by Aleim next to him.

"Sir, I don't think it's a good idea, and now we may be putting all our hopes on him as he said."

"What do you mean? Do we really have to rely on that guy? You look so arrogant, and how did he know our news? We don't know anything about these things, why should we trust him?"

"But there is still a practical problem in front of us now, that is, if the United States really has malicious intentions, we would have become corpses by now."

The person in charge didn't know how to return this sentence for a while. This is indeed true, but now he still has no way to believe Qin Yuan.

Then we can only wait and see, Aleim knows that Qin Yuan will definitely come back again, this guy knows everything so well, and more importantly, he said that he knows that these things are made by Americans, It seems that he must know the inside story.

This is what Aleigh and I thought. He knew he would not guess wrong. Sure enough, the supplies were taken away by the Americans. It was really a good show to force this thing on them After Aleim went out, he also followed Qin Yuan's running direction to investigate carefully. There were still guards there, but the guards didn't find anything.

These things surprised him very much, why is this person so skilled? This is their office building, surrounded by layers of guards, how did he escape unscathed?

Regarding this point, he really couldn't figure it out, there were only a few people with such good skills, he shook his head, thinking it was impossible.

On the other hand, after Qin Yuan went back, he told Long Xiaoyun and the others about his plan. Now that this is the case, he should simply use his tricks and let the matter of this batch of goods be harmed to the Americans.

Chapter 1308: plan

"Then what is your current plan? It is still very difficult to implement."

"I also know that it is difficult, but this can also provide us with a certain foundation for obtaining their material resources in the future. We will use a lot of such materials in the future, and we can't trade with them again and again for these black things Well, there will be a flaw one day."

In addition, they were lucky this time, and if they sent other people next time, they might encounter other situations.

This is indeed the crux of the problem. In addition, there are still many unresolved problems in the follow-up. They need long-term material support, which is very rare in their Yan country.

It would be a good thing to have a long-term cooperation, "Okay, anyway, we can't go out here for the time being, and there will be a risk of exposure after we go out, just tell us your plan, and we will follow your plan Do."

Long Xiaoyun and the others are very supportive of Qin Yuan, after all, the decisions he makes at any time are for everyone's sake.

"I need to make a video later, and you all have to cooperate. My original idea was to throw this batch of supplies to the US side, but I don't want to make them so cheap."

Qin Yuan's initial idea was to dump this batch of supplies to the realm of the United States, and then let the media report this matter, but he felt that it was with those capital means.

This enthusiasm is likely to be suppressed quickly, and then the batch of materials will be taken away by them silently, which will not have any substantial effect.

Anyway, everything is fake, so it's better to put on an excellent performance directly, these Americans are not good people, they have already seized the resources of many countries by such means, so it's better to take advantage of the chaos.

When it was dark, Qin Yuan came back again, and this time he brought some clothes of American soldiers, as well as some of their basic equipment.

He asked Long Xiaoyun and the others to change their clothes first, and after a while, he drove the car down, but he only drove one car, after all, to make a video.

He came to the place where the grove was before. This place has been inspected by Aleim and his people, and some traces have been found here, but nothing else has been found. Qin Yuan knows that a smart person like Aleem must have discovered it. There are clues, but unfortunately no other evidence can be found.

So I took this opportunity to implement his plan here. When Long Xiaoyun and the others changed into the clothes of these American soldiers, and the sky was dark, it was really unclear at first glance. In order to pretend it looked more like He Chenguang and Li Erniu were still smoking cigarettes

across the street, and Qin Yuan was in charge of filming in the distance. Under Qin Yuan's signal, they pretended to carry the goods, but it was just a back view.

In this way, he simply filmed this clip, and then hid the car to the previous place.

Although Long Xiaoyun and the others didn't know what to do, they all chose to believe in Qin Yuan.

During this period, he also called back to inquire about Mr. Zhang's situation. They were still manufacturing the external frame. The next step was to wait for Qin Yuan to send this batch of silicon elements back, and it would not be a problem.

This time they are the real empty-handed white wolves.

Chapter 1309: The person in charge hesitates again 3

This is called the mantis catching the cicada, with the oriole behind, one chain after another.

As time went by, the United States even issued a final order, asking them to release the personnel immediately, otherwise they would immediately send personnel in to assist in the investigation.

The person in charge is anxious like ants on a hot pot every day, because the US side has issued a final order. If they have no evidence and detain their personnel without reason, then they will use force to solve the problem. Not a good thing for them.

But the problem now is that even if these people are released, they will still not let it go, and will still use another method to force them in.

When the person in charge was in a state of desperation, Aleim walked in. He quickly stood up, stepped forward and asked, "How's it going? Is there any news?"

Aleim shook his head, no matter whether it was Qin Yuan's side or they had searched for supplies before, there was no clue.

"Sir, it's not that I intend to favor anyone, but this batch of materials is just like what I guessed before. No matter how we look for it, we will definitely not find it. They have already been taken away by their own people. How can we find it?" ?"

"But..."

To be honest, he didn't know what to do anymore, and now he was in a dilemma. At this time, the phone in the office rang again.

It was the call from the Ministry of Foreign Affairs, asking them to make a decision as soon as possible. They are also under great pressure. The embassy is making trouble every day, and the United States has given them an ultimatum.

The person in charge was also having a hard time, and at this moment, Areem made his suggestion again.

"Sir, I think if this is the case, it's better to follow what that person said that day. He feels that he is very clear about the material matters. It's better to ask him to come and see what he can do."

"What do you mean? Is there really no way I have to ask such an outsider for help? I don't want my handle to be taken advantage of by him. "

"Sir, but we really have nothing to do now, and it is too easy for him to get some of us, because he knows that there must be a lot of inside information. If he really wants to harm us, he has already announced it to others. "

"You mean that he should have other evidence in his hand, but he found us first. If he really has that kind of thought, he will definitely notify the United States first."

Alem nodded. This person may have other purposes, but at least he can really help them in this respect.

The person in charge hesitated again and again and finally nodded, but now they agree, what can they do, they don't know where to find that person.

"Where did that person go at the crux of the problem? We can't find who he is. Even if I agree now, what can we do? It's useless to find someone."

"Don't worry, this person will definitely follow the time he agreed, and he will come in three days. Today is already the second day. If there is no accident, he will show up again tomorrow."

The person in charge was a little surprised. He saw how Arem said such certain words. Could it be that he had some kind of collusion with that person?

"Sir, you don't need to look at me like this. You know that I am wholeheartedly for the sake of the country. I will definitely not do such a thing, but I have such an intuition."

Chapter 1310: won't betray

The person in charge nodded slightly. He knew that Aleim would not betray them no matter what, so it was the third day.

Everyone was still in the conference room, and it was very quiet in the conference room at the moment. Everyone was staring at the window intently, not knowing how this guy would come in this time.

The person in charge actually put all his thoughts on this, so he deliberately relaxed the vigilance around the perimeter, hoping that he could come in successfully and not cause too much noise. The United States kept putting pressure on it, and he might be last hope.

Just as everyone was staring at the window intently, the door of their conference room was suddenly opened.

I didn't expect Qin Yuan to come in through the main entrance this time. You must know that it is more difficult to enter through the main entrance than through the window. The office building on their side is on the fourth floor. I didn't expect this guy to walk in so easily.

This guy really surprises people time and time again, how strong is his ability? In addition, they didn't hear any movement below, so Areem got up and walked to the window, and saw soldiers patrolling back and forth downstairs.

He really couldn't figure it out. At this moment, Qin Yuan stepped forward and remained silent. He silently walked to the computer and inserted a USB flash drive.

"what do you mean?"

"Before I said that the batch of things you are looking for is in the hands of the Americans. Of course I have evidence, so this is the evidence I said. In addition, I know that you are waiting for me today. You have shown your sincerity. Of course I And show my sincerity."

Although these words sounded a little uncomfortable to the person in charge, after all, it was a tacit agreement and Qin Yuan's help was needed, but there was nothing he could do in this situation.

Soon the projection on the computer started, and then they saw the video. The video was shot at a long distance, and it was night, so it was not very clear, but they could see a clear sign. Areem saw the piece When I was in the jungle, I stood up excitedly.

"I took people to look for this place before, and indeed found some traces, but nothing new."

Qin Yuan didn't speak, motioned them to continue watching the video, and soon saw a truck slowly driving over, it was the one they lost.

Then the soldiers began to carry supplies towards the vehicle, and the distance was relatively far. Although they couldn't see their faces clearly, they could be seen from their clothes as Americans.

The person in charge clenched his fists when he saw this, these ***** really know how to splash dirty water***** their supplies in such a despicable way, and then let them continue to search.

Just as everyone continued to look down, where they were transporting the supplies, suddenly a US soldier turned around and fired a few shots in the direction of the video.

Then the video was completely black, without any movement. It was obvious that the person who took the video was found, but I don't know why this video was kept.

Seeing this, I feel very curious. Countless questions arose in Areem's mind. Who shot this video? Whether the person who took the video is still alive, after all, he must be an eyewitness.

Qin Yuan also explained slowly beside him, "Don't worry, this video is absolutely true, but how did it come about? I can't tell you for the time being, but this also explains the situation you have encountered. This batch of supplies It's really in their hands."
