

Special Soldier 1311

Chapter 1311: major websites

"Then you said the solution, what kind of solution is there?"

"It's very simple. I will publish this video on the Internet soon. Although some people in the United States are suppressing this matter, many foreign websites are very interested in this kind of video. Once they publish it like this, their There will naturally be a lot of pressure on the side."

The person in charge soon realized that this method was really good, it could be said that they kept their faces and let the outside world put pressure on them.

"But why are you helping us like this? What are you trying to do?"

"I just don't want to see those people continue to occupy this kind of resources in other ways. You know that if those guys occupy such resources, it will not be of any benefit to you."

After all, those guys are really like robbers forcibly occupying resources. These resources are in their hands, and they can still be used and given to other countries.

Thinking of giving it to other countries, Areem had a guess in his mind, but the face of the person in front of him was not that person.

Although he couldn't figure it out, he might have something to do with Yan Guo, but they didn't have any evidence to think about it. If they distributed this batch of materials, especially if they chose to cooperate with Yan Guo, it would definitely be better than it is now. situation is good.

Qin Yuan just put forward his opinion quietly. He felt that if they gave this batch of supplies to other countries to help everyone develop together, it would definitely be better than giving them to the United States.

"I know that everyone is a smart person. Now that we are in this situation, I hope you can do this sincerely. After all, we are sincerely cooperating."

Aleim also almost guessed the identity of the person in front of him, no matter what, he should be from Yan Kingdom.

But he didn't tell the truth, after all, this person is really helping them a lot, and they really need someone to step in to help them now, otherwise they will only be bullied by the Americans.

As he said, if they choose to cooperate with Yan Kingdom, these things will not happen, at least Yan Kingdom will not suppress them on the one hand.

Moreover, Yan Kingdom's strength is gradually growing, which is another kind of protection for them. They can form an alliance and work together to externalize. After all, providing supplies is a long-term plan.

After Qin Yuan finished talking about his plan, the person in charge pondered for a long time, and after a while, he finally made a decision.

He agrees with Qin Yuan's plan As long as this video cannot be released, and the matter has developed to this point, the result will be the same whether the country is offended or not.

This time Qin Yuan was aboveboard, and walked out from their gate without anyone stopping him. Aleim looked at Qin Yuan's back, "This person is really familiar, like a friend I know, that person's The ability is also very strong, and I think only he can do it, but the appearance is completely different."

"It's meaningless to talk about it now, let's do what this guy said first, maybe we really need to change another view."

After the person in charge finished speaking, now everyone can only wait for him to post this video on the Internet, and let the pressure of public opinion from the outside world overwhelm the United States.

Qin Yuan did what he said, and soon this video successfully entered the major websites with his help.

Chapter 1312: Reach another cooperation

After all, this matter is related to the United States, and it quickly entered the hot searches on major websites. The United States is also very powerful, and they intervened quickly as soon as they found out.

The main reason is that their clothes and equipment are too iconic, and they were quickly recognized by others. The Americans began to operate behind the scenes, trying to take the video off the shelves, but the click-through rate of so many websites is too high. high.

It was really not a big problem at first, but slowly under their operation, this video was quickly taken off the shelves.

The United States exerted a lot of coercion, and many websites did not dare to continue posting such videos, so they had to start taking them off the shelves.

This is also what Areem is worried about. He knows that the power of the United States is very strong. As expected, after they have been paying attention to the website, the popularity is very high. Most people are discussing this matter, but slowly The heat dropped.

Aleim felt that things were not good, if they continued like this, they would not be able to wait for them to make a fuss about the video, and it was very likely that the video would disappear completely.

When the American side found this video, they dealt with it immediately. They didn't know why such a video appeared on the Internet. To be honest, they did do such a thing before, but this time they really didn't.

The Ministry of Security of the United States immediately set up a special investigation team for this video. After all, it is indeed their soldiers in terms of clothing and scenes, but what is going on? None of their teams has received such a task so far.

Just when the country of Mi started the investigation, Qin Yuan made another big move. He knew that there was no way to completely deter the country of Mi with this method, so he used his own hacking skills.

Just when the Ministry of Security in the United States thought that the video was completely taken off the shelves under their interference, suddenly the next morning, on the busiest street in the United States.

All the videos on the street are playing advertisements, and another pop-up window suddenly pops up when the news is broadcasting, and not only that video, but also many civilians' computers are also forcibly implanted.

For a while, this video quickly became a hot topic, and the security department was also very anxious, because this video could not be turned off at all, no matter what method they used.

The head of the security department was getting angry, "I don't know what you guys do for food, can't do such a trivial thing well, now shut down that ***** thing immediately."

"Sir, we don't know what's going on. It can't be closed at all. It's like a virus that was forcibly implanted. All systems have been hacked."

"Are you really ashamed to say what we do? We are the Ministry of Security responsible for the security network of the entire country, but now our country's security network has been invaded, or some unknown virus."

They wanted to find out the ip address and source urgently, but there was no way to do it. At this moment, the corner of Qin Yuan's mouth was raised, and he operated in a leisurely manner. He began to type the codes. It is not so easy for these codes to exceed 100 million.

At least this video can be hung on their side for two hours, and the content on the video instantly aroused some discussion. Combined with what happened in the past two days, after all, the style of the United States is to use the public's mouth.

Chapter 1313: Yuan Guo strongly condemned

During this period of time, their disputes with Yuan Guo have been at the forefront. The main reason is that Yuan Guo detained their people. To publicize, I didn't expect things to be reversed now.

After all, it was because of this batch of supplies that the United States sent their personnel into the Yuan Kingdom in the first place. Unexpectedly, they took away the supplies themselves, and all kinds of discussions and condemnations continued for a while.

The ministers of the Ministry of Security, one head and two heads, wanted to shut down the video, but there was no way, and the video was still spreading in various ways, and it had reached the point of being uncontrollable.

Aleim was very satisfied looking at Qin Yuan's masterpiece. This guy did not disappoint him, but it was a pity that he didn't know what his identity was. Such a person was really terrifying. His ability

could not only escape alone , and his methods are very clever, able to make the United States helpless.

Under pressure, the American side could only let go of their attitude and discuss this matter with Yuan Guo again. They were also very confused, because they didn't send anyone to take away the supplies at all, but now there is a video to prove that it is indeed theirs. people.

They were full of confidence before, but now they can only lower their attitude and discuss with Yuan Guo. Now the battlefield has completely reversed, and Yuan Guo occupies the sovereignty.

In the end, under the pressure of various public opinions, the United States could only move out a scapegoat and issued a general statement, that is, someone pretended to be their rice army to transport the supplies, and they are also conducting a full investigation.

However, no one believed this statement at all. It was clearly made by them, and now they are making something out of nothing.

Although the material things were not returned to Yuan Guo, it also caused Mi Guo a big loss. Under Yuan Guo's strong condemnation, Mi Guo did not return the materials, but it still gave a certain amount of economic compensation.

Qin Yuan's move is really clever, killing two birds with one stone, not only getting the supplies for free, but also making the country suffer a dumb loss. After Long Xiaoyun knew about it, he secretly admired Qin Yuan's plan for being perfect every time. But how he proceeds is not known at all.

But I have to say that the American side is guilty of their own guilt. They usually do too many things like this So they are not sure which team of them took away this batch of supplies. The team has gotten used to it.

Under the suppression of such media and public opinion, they can only bow their heads. At this moment, Areem is more convinced of his judgment. Before, they had the wrong direction and felt that they chose to cooperate with the United States, but in turn they did not want to Cooperation, they want to seize.

"Sir, I didn't make any mistakes in my judgment before. These guys are full of ambitions. We couldn't choose to cooperate with them in the first place."

"It's not that I want to cooperate with them, it's that we have nothing to do. If we don't give them what they want, it may lead to another result."

"So I think we can accept that person's opinion now, at least he didn't choose to hurt us when he could hurt us, and he solved the problem for us."

Chapter 1314: 100 million tons of grain

The person in charge frowned, and he was also thinking about whether he should follow his arrangement.

This time it was indeed Qin Yuan who helped them solve this problem, and if they cooperated with Yan Country now, the result would be better. Compared with supporting Yan Country to become stronger, it would be better than Mi Country.

In this way, under Qin Yuan's fueling this time, they began to contact Yan Guo and took the initiative to talk about the matter of coordinating supplies.

Qin Yuan also went back smoothly with this batch of free silicon elements. Although Mr. Zhang didn't know what method Qin Yuan used, he brought this element back without spending a penny.

But this time, the incidents between the Yuan Kingdom and the Mi Country were so violent that Mr. Zhang understood what was going on, but he didn't say anything.

The elements in the research base have almost been collected, and they can be put into research and production immediately. It can be said that under the push of Qin Yuan this time, the scientific and technological values of the research base have reached the effect of leaps and bounds.

Mr. Zhang is actually very curious about Qin Yuan's identity. Is he really an ordinary soldier? But he is excellent in all aspects, not only in his field, but also surpasses the average person in terms of physical examination.

In addition, Qin Yuan had already found all the instruments and materials they needed this time. You must know that before this, they had no way to collect so many.

Because there are too many issues that need to be considered, including this simple element of silicon, which is only available in other countries, but if you want to negotiate with others, they may not necessarily give it to you.

Mr. Zhang is completely impressed by Qin Yuan. Not only is this person outstanding, but he can reach a new height in all aspects. Mr. Zhang is becoming more and more eager to recruit Qin Yuan.

As far as the base is concerned, production is proceeding in an orderly manner. If there are no accidents, it will be completed in about 15 days.

In addition, Silicon Element has resolved a long-term problem this time, and the two parties signed a contract together. With the contract, it is useless to say anything.

The long-term problem of the material has been solved. After all, the scope of use of this silicon element is too wide, and Yuanguo is rich in it.

Not only that, they are now cooperating with the Yan Kingdom, and they can help each other in many ways. After the Mi Kingdom knew the news, they immediately terminated all trade and cooperation with the Yuan Kingdom, which is equivalent to cutting off their economic power. China exports about 100 million tons of grain to the United States every year.

But now the United States has turned its back on people and completely cut off this kind of trade. On the contrary, Yan State has quickly made a connection. No matter what, Yan State is also a large agricultural and food country, and it is not a problem to import such food.

For a while, Yuan State and Yan State developed a close cooperative relationship and carried out a large number of trade exchanges. In fact, Qin Yuan didn't expect this at the beginning, and it was an unexpected surprise, which could bring him more income.

Qin Yuan, Long Xiaoyun, and Yang Chongming are making preparations now. They also have to conduct specific training every day, after all, they have to adapt to the life of entering the space station later.

According to Zhang Lao's instructions, they must stay in the space station for at least a month

Chapter 1315: The environment we face is different

It is necessary to collect and collect various indicators, and record the data from this month to facilitate their next research.

So recently they are all making preparations, and Long Xiaoyun's diet has also begun to be specialized.

But after this series of events, Yang Chongming was a little worried, and he was a little absent-minded during the training in the morning.

Because they had to wear spacesuits and conduct regular training in a closed environment, they didn't expect that when he came out again, Long Xiaoyun was locked in the closed cabin for half an hour due to a misoperation.

Although Long Xiaoyun went up to apologize the first time he came out, Qin Yuan didn't accept it. In the situation just now, even Qin Yuan couldn't do anything about it. After all, they had to follow the operation.

These are all instrumented, and he can't use brute force to open them. He can only rely on the staff to slowly release the internal pressure under the command of the outside.

"You bastard, do you know what you were doing just now? I said that no matter what you do, cheer up and do your own thing well, and don't hurt others."

Long Xiaoyun quickly stood up to ease the atmosphere, after all, at this critical moment, she didn't want to quarrel because of anyone.

"Qin Yuan, I'm fine, needless to say, as long as I come out safely, I'll be fine."

"It's not a question of whether you have a problem, but his own mistakes. He has been like this for the past two days of training, and I know something will happen. If he makes such a mistake again in space, no one outside Rescue, can rely on ourselves, this is not a small mistake."

It was rare for Qin Yuan to be so serious. Yang Chongming next to him knew he was wrong, so he didn't dare to say anything. He lowered his head.

"This matter is indeed my fault. I will review it immediately. I shouldn't be like this. I should keep my attention during training. I'm sorry."

"I don't know what you think, do you know? Any small mistake may lead to a different environment for us and the environment we face this time."

Speaking of this, Yang Chongming sighed deeply. It was precisely because of this that he was absent-minded.

"I'm very worried about this, so I made a mistake just now. Because of the problem with the space station before, I always feel that they don't know what the ***** is going on, and we are thrown into space like this, so I am very worried."

Qin Yuan looked at him, and knew that people had normal fears. After all, they were going to space, and they would indeed be isolated and helpless.

He also had the same guess before, the International Space Station suddenly rejected them so much, and since knowing Qin Yuan's identity, everything began to change, they began to make things difficult for them from all aspects, preventing their normal plan.

This is also the direction Qin Yuan wants to investigate. The more this happens, the more he wants to go up. He wants to see what these people are doing. In addition to the traitors planted inside them, he has already started counter-investigation.

However, these three traitors are relatively cautious. They have not found any news for a while, and they dare not act rashly, so they are willing to make no progress yet.

But as the day when the space station is successfully developed is getting closer, various situations will follow, so Qin Yuan wants to advance his plan.

Chapter 1316: find signal point

He deliberately asked Mr. Zhang to explain the situation. Now there is still a relatively big problem in the part of their aerospace base. Although there was a big investigation before, this time there was still the problem of internal rape.

Just like the leak of their list this time, since the list was confirmed, the attitude of the United States began to reverse.

So Qin Yuan was even more suspicious that they were conducting some kind of secret experiment in the space station, and worried that he would discover the clues. This time they had their own

space station. Although they could not contact them directly, they were still worried that they would sabotage them from other aspects.

Qin Yuan also produced his own substantive evidence. Mr. Zhang was also very shocked when he learned that three traitors had successfully mixed into their base. This was something he had never thought of before.

"I really didn't expect that under our strict screening, there would be people sneaking in. We had conducted a total of three screenings before and after."

"So this is where they are cunning. I even suspect that we have made mistakes in many experiments because they leaked the information. When we obtained the materials, we encountered various obstacles along the way. ."

At the beginning, those research doctors under Mr. Zhang were still a little dissatisfied with the matter that Qin Yuan only let his group get in touch with. After all, they all wanted to develop this matter as soon as possible, and it must require the strength of many people.

When they learned that there was such a mole inside them, they were also relieved. Fortunately, Qin Yuan was in charge, otherwise if something went wrong, no one would be responsible, and everyone's hard work would be in vain.

"Teacher, what should we do now?"

Mr. Zhang frowned slightly, and he didn't know what to say for a while, after all, he just found out that the three traitors had other accomplices.

Unexpectedly, Qin Yuan has a confident face. At this moment, he has completely grasped the overall situation, "Don't worry, I haven't found any other problems during the surveillance during this period. At present, these three people are suspected, and they have not been involved with other people. There was too much contact."

It was impossible for them to come in under such strict scrutiny before, and it was already very reluctant for so many people to come in.

When Mr. Zhang knew that there were only these three people, he made up his mind. He will report to the superior now, "Since this is the case, then these three people must not be kept. I will notify the security department now."

"Wait a minute. If this is the case, why don't we take a long line to catch big fish? Now that they don't know that I have carried out anti-reconnaissance, why don't they send the false information back to see what will be done there."

This is an excellent plan. After all, they have leaked so much information before, if they are imprisoned, it will not have any real effect. It is better to use a countermeasure as Qin Yuan said.

What's more important is that Qin Yuan has been monitoring them for such a long time, and they still don't know which country they belong to. After all, they haven't contacted the higher authorities until now, and they have always been called by code names.

It can be said that they are very cautious and worried about being rebelled against, so they have always been talking about code names, so it is not yet clear who is above them.

This is also the reason why Qin Yuan has been standing still

Chapter 1317: still no breakthrough

If he wants to completely monopolize, he can only wait for them to be completely exposed. Last time, if their plan is successful and they can pass the fake news back, then they can follow the clues and know which country is monitoring.

At this moment, the three of them didn't know that their every move had already been monitored by Qin Yuan, and the situation was still the same as the situation reported above. When the three of them were preparing to investigate, suddenly a first-level alarm was heard in the base.

Then all their grassroots personnel were summoned back to the hall, and the three of them were stunned, after all, such alarms rarely occur.

After a while, I only saw Mr. Zhang appearing on the front stage and announced a news. Unexpectedly, what Mr. Zhang announced was that the space station they developed this time failed.

"I'm very sorry to tell you this news. The space station project research we conducted this time has been declared a failure. We still lack a lot of experience. Although there are drawings, the drawings are not perfect."

Hearing this, the three of them glanced at each other. This news was considered good news for them. After all, the higher authorities had previously required them to monitor at any time, and they could destroy their plans if they had the ability.

When they learned that they had obtained the blueprint before, they immediately contracted the news, which is why Yuanguo suddenly did not provide silicon elements.

Anyway, they want to do everything possible to prevent Yan Kingdom from entering space for research, because now they have discovered a new substance in another field, and this substance is also a raw material for making a super weapon.

In fact, Yan Guo has already made preliminary progress on this kind of experiment at the beginning, but they used robots to collect soil samples after they went to space and entered the moon, and the soil samples contained what they needed to study. this substance.

But the cost of the robot above is very high, and in that weightless situation, the difficulty of collecting is also very great. The collected things are only enough for dry research, and many projects are forced to enter the suspension stage, so they have to send People went up to carry out another step of collection research.

In the United States, they have been working on this research for many years. Although they have enough research materials, they still have no breakthroughs in other aspects.

They were also worried that Yan Guo would take this opportunity to make a breakthrough in another aspect, so they could only suppress their strength in all aspects to prevent Yan Guo from succeeding.

This is just a general situation that Qin Yuan learned during the monitoring during this period. For the specific details, we must find the real mastermind behind the scenes to know what the ***** these guys are doing, whether it is really suppressing or something else.

After Mr. Zhang announced the end of the failure, he also lifted other supervision. Because the name of the space station was to be built before, everyone, especially the external grassroots personnel, were not allowed to enter the laboratory, but now it has been completely broken.

For this result, most people feel very sorry. After all, many people are looking forward to it. They feel that there are already blueprints this time, and they think that there should be no problem after looking at the supplies that have been delivered in the past two days. Failed.

The three of them have returned to their place of residence at this moment, and they will resume their normal work from today onwards

Chapter 1318: Why are you doing it to me?

You can enter and exit the laboratory normally.

"Hurry up and send this message to 01 later."

"I really didn't expect their research to fail again this time. It seems that they should be suppressed from above. They can't get many things, so even if they have blueprints, they can't research them."

"Before I was worried whether we had been exposed, but it should be fine from the looks of it, it's just that there was something wrong with their research."

Scar nodded, "Well, I'll transmit this message later, and then I'll see what instructions will come up above, and then follow the order."

Because they didn't receive any news recently, they didn't spread it upwards, and there was no reason for any signal to be detected. As long as they transmit the news this time, Qin Yuan can seize this opportunity.

And this is what Mr. Zhang is most confused about. There is no way to use any electronic equipment at their research base, and they use a special watch.

It is limited to internal communication and phone calls, and it stands to reason that they cannot bring in any electronic equipment.

Mr. Zhang originally wanted to set up a special investigation team to monitor the three of them, but Qin Yuan was very confident that his monitor was absolutely fine, and he would never startle the enemy.

So he could only wait for Qin Yuan to monitor, but at night, Scar was ready to set off to announce the news, and he came to the rooftop.

There are also their staff standing guard on the rooftop. Scar walked to the signal tower next to it. After all, this signal tower is also very unique. Although it cannot be used internally, it is a signal tower for monitoring data.

After Dao Scar went up, he showed his work card first, and then said with a smile: "Comrade, I'm here for routine inspection and maintenance, mainly to check the current signal situation."

The guards on the roof looked at it and issued their certificates. There was really no problem, and then they let Scar to test it!

It turned out that this guy spread the news in this way. He used the signal tower to perform a reverse input. The only drawback of this signal tower is that it can connect to the outside world.

They came into contact with this opportunity and quietly transmitted the information through this line. After all, the current technological means are really hard to guard against.

As soon as Scar's front foot transmitted his breath, his back foot was directly pressed to the ground by the person next to him.

"Hey, comrade, I said what are you doing here? I'm here for normal maintenance inspections, why are you doing it to me?"

"Hehe, let's talk about it later when we go down."

Scar was quickly brought under control, and the toolbox on his body was also confiscated. He stared at the toolbox intently, a little worried, but this is a new technological means developed internally by them, and even if they were to be inspected, they would not be able to check it. what's wrong.

He thought it was just a normal inspection. He didn't expect to be dumbfounded when he went down. The other two companions had already been arrested. The three of them looked at each other, not knowing what happened.

The three were taken to a room, and the person next to them pointed a gun at them, and no communication was allowed.

If one of them was taken away, it may be a coincidence, but all three were taken below, which is somewhat unreasonable

Chapter 1319: convert first

After a while, the door was opened, and Qingyuan and Mr. Zhang walked in. Mr. Zhang walked in and stared at these three people angrily. It was these three guys who transmitted their messages again and again, completely destroying their relationship. plan.

"I really didn't expect that there were three bedbugs in our space station. I said why the previous experiments were all good, but they all failed."

"Leader, what do you mean by this? We don't know what you are talking about at all. After all, we are working normally."

At this time, the three of them are still arguing, and they really don't cry when they don't see the coffin.

Qin Yuan went up to the premise and picked up the toolbox, and then connected it to the computer next to him, and then he could see a clear transmission route.

"Let's explain this signal point."

Scar saw that the matter was exposed. After all, the signal point that appeared inexplicably was where they were transmitted, but it was too late to cut it off at this moment, so Scar just kept doing nothing and stared at Qin Yuan viciously.

"Hehe, since you have discovered it, there is nothing you can do, but what can you do now? I have already transmitted the signal, and even if you want to stop it, it is too late."

"Are you a broken jar now? But don't worry, it doesn't matter if it's transmitted, it's not real anyway."

"what!"

The three looked at Qin Yuan in shock, and only then told the real situation beside them. The experiment did not fail at all, on the contrary, they had already completed it ahead of schedule.

And Qin Yuan needed to go through this signal point to find their last hiding place. Scar now regretted it very much, but he didn't expect this technological means to trap them.

Originally, they wanted to use this technological means to carry out anti-reconnaissance, but now it was too late to stop them. The three of them could only watch Qin Yuan's operations, and finally located the disappearance of the signal point.

On the other side, in a dilapidated small village, several men were tinkering with a computer.

"Damn it, the signal in this place is really bad. Every time I want to receive it, I have to come up from the roof."

"Don't complain, Scar and the others have already given instructions, and they will be able to receive the news soon."

After more than ten minutes like this, they finally received the success message and quickly cut off the power.

After all, this was done for the sake of safety. Cutting off the power supply can cut off all signals, but what they didn't know was that Qin Yuan had already located it in the first place.

After they got the news, they quickly converted and analyzed it, and sent it directly to the headquarters. They didn't have to be so cautious here. Just as they were tinkering, there was a knock on the door.

The man was a little impatient, but he wasn't worried about the risk of being exposed. After all, they had been lurking in this place for nearly a year, and they were almost integrated with the village.

It's just that the surrounding villagers are too enthusiastic and come to the door every day, but the man has to deal with it, after all, it is a critical period now.

"You guys do the transformation first, I'll go out and have a look."

Just like that, the man stood up, but there was no movement for a while, and several people in the room were still wondering why this man didn't respond when he went out.

But immediately after that, a group of people in uniform rushed into the room and directly controlled all the people in the room.

Chapter 1320: collection robot

The man who was operating the signal just now was instantly stunned. What's going on? Why did such a large group of people rush in so suddenly?

"Hold your head and squat down!"

The remaining few photos can only be followed, and the person who took the lead in the search is Qin Yuan. He is conducting a detailed search, without missing any corner, and then starts to manipulate the computer next to the controller.

Other signals disappear here, and they will send the information here to another level, and this address is the location of their headquarters.

In this way, Qin Yuan managed to find the unknown location where they sent out. It was indeed in the country of America, but the signal gradually weakened when it reached here, and only the approximate range could be known. It was indeed in the country of America, but it was not clear where exactly. , it seems that only these few people can be brought back for interrogation.

A few people were taken back in this way. Of course, they felt that there must be a traitor inside, otherwise how could they find them so easily.

However, although the people were brought back, the result was a little disappointing. Even these people didn't know where the specific departments they belonged to. They only knew to send messages according to the address on the website, and they didn't know anything else.

The people who are usually responsible for sending and receiving signals are nicknamed monks. According to their account, at first they were only engaged in some fraudulent activities in the border areas, and later they were bought at a high price. After all, the price given outside was too high. They were tempted by the high price , This is engaged in the docking work.

So they are just chess pieces from the beginning to the end, and they don't know the outsiders at all, and they don't know who they should be connected to. It's just that after they complete the task, there will be stable funds in their account every month. .

These Americans are also very cunning, let them find a hidden small village, such an underdeveloped village, no one cares who comes.

"The Exploitation of the Vegetable Skeleton"

Moreover, they also said that they were in the vegetable business and had rented a few pieces of land in the village, so no one doubted it.

Because the matter was so important this time, the local side attached great importance to it. After interrogation layer after layer, there was really no problem found, and the others really didn't know about it.

They have only started to receive information from here in the last two years, and they don't know anything about the previous situation.

Qin Yuan also wanted to check based on the account they used to send money to, but it was useless at all. The account was an account name bought from the black market. After checking it, no clues were completely broken.

Although I don't know who the organization behind it is and who they are doing things for, they are inseparable from the Americans, and this time it is their conspiracy every time.

According to the current situation, it is still impossible to find out the specific organization and specific department behind it, so Qin Yuan decided to take a long line to catch big fish, and handed it over to the department he belongs to, and let them be responsible for supervision and investigation. The main thing is to supervise these people for a long time. Let them keep sending fake news back.

In this way, on the one hand, they will relax their vigilance and will not send more people in. Otherwise, a situation like this is really hard to guard against. Now there are too many people who are interested in profit, and they can do anything.

On the other hand, we can also take the opportunity to take down that evil organization when the time comes.

Qin Yuan had a hunch that this matter probably had something to do with the masked man, who had disappeared for such a long time
