

## Special Soldier 1341

Chapter 1341: not afraid of responsibility

"I shouldn't refute, but after all, this is not our personal business. What if there is any bad influence?"

"Don't worry, there's absolutely no problem. What I can do is after my guarantee. Besides, I will take responsibility for any problems. It has nothing to do with you."

"No, no, I didn't mean that. I'm not afraid of taking responsibility, but I want to remind you."

"Don't worry, I know, I will take care of this matter, you don't need to take care of it."

In this way, Qin Yuan also received an order from the base to prepare for the live broadcast of the connection. This time it can be regarded as a convergence of innovations in another sense. After all, they are astronauts from two different countries in the space station. Make a docking.

The number of people in the live broadcast room is constantly increasing, and everyone is looking forward to it. Every country is cheering for different astronauts.

Gao Shiwei felt very proud when he saw this scene. Now that they have their own space station, if others want to come, they need to come to visit them, and they don't need to beg others.

"All of you come into the computer live broadcast room for me to make the atmosphere up for me. This is what we should do. We can't let them watch the joke."

"Team Gao, you're out of date with this. Look, why do you need us? Everyone uses mobile phones now. Who still uses computers to watch live broadcasts?"

Gao Shiwei blushed for a while when he was told, he could only smile awkwardly, and then took out his mobile phone card, it was time for him to do something about these young people.

Everyone is actually looking forward to it, wanting to see what Yanguo's space station looks like, they can enter the interior for a visit.

Soon they had a simple docking in the space on both sides. The American astronauts were exhausted physically and mentally after such repeated tossing, but they could only force their spirits. Soon the live camera was turned on, and everyone has seen the scene in front of them .

When they completely entered Yanguo's space station, everyone was shocked, especially the astronauts of Xiaomao. They did not expect that the interior space design of the space station invented by Yanguo would be so large.

We must know that they are currently accommodating so many people, and it is very crowded. The main reason is that the interior is very crowded, and it is not because they have too many people. According to the current distribution of Yan Kingdom's space station, 12 people are more than enough.

Even the American astronauts are amazedAt first they had a condescending attitude and wanted to laugh at it, but they didn't expect that their equipment and these instruments are more advanced than theirs. advanced.

Qin Yuan, as the representative captain, also came out to greet them first, and then took them for a tour.

Looking at the exquisite equipment inside, they had never seen many things before, so everyone could only follow along and listen to the introduction. Qin Yuan even greeted the camera.

"Hello everyone, I am Qin Yuan, the space guide this time. You can follow my introduction and learn about the common sense of our space station one by one."

Qin Yuan's playful opening remark gained a large fan base in the live broadcast room.

Bullet screen loading...

"Did you see it? These are the astronauts of our country, they are so professional, hahaha, I really want to study hard with Guide Qin."

Chapter 1342: From Qin Yuan&#039;s hand

"I lament the greatness of the motherland, and even more lament the greatness of their astronauts!"

The bullet screens were refreshed crazily, and everyone was lamenting the progress of the motherland's science and technology, because Qin Yuan only gave a brief introduction to these instruments.

He didn't give a detailed description of most of the instruments, but just talked about their functions. Many things are not even installed on the space station in the United States. They are also very novel about these functions.

But this is not what they are studying, but inside their base. At this moment, everyone in the US base is staring at the screen intently.

But there is no way to distinguish these things with the naked eye. Only the approximate name is still useful, but it is too difficult to understand his internal structure. After seeing it, everyone can only shake their heads silently.

"Professor, I didn't expect their Yan Kingdom to develop so fast. This is the first time I have come into contact with such a sophisticated structure."

"It's just a pity that I didn't have the opportunity to go up and take a look for myself, otherwise I should be able to understand some basic structures, it is really too difficult."

The president is almost lying on the screen, but there is no way to tell. After all, their astronauts can't push the lens directly to the instrument, and can only follow behind at once.

In addition, Qin Yuan was also very defensive. After introducing them, he showed everyone their resting place. Everyone in the resting place had a single room, which surprised them very much.

And the internal space is very sufficient. At this time, Long Xiaoyun also showed off their usual sports.

"This is the equipment we usually exercise. If we are free at work, we can also do some basic exercises to avoid degeneration of our limbs."

The people of Xiaomao country dare not even think about it. After all, in their view, the space is already very large, and there is still room for movement.

There is a separate space here, which is specially used for exercising. All the equipment in it are designed according to these ten situations, and these things are all made by Qin Yuan.

After all, what he has to do is to be more reasonable and humane, to make their space station look more humane.

At this time, the astronauts in the United States probably wanted to make things difficult for one time. After all, their things are so perfect, and they are still broadcasting live, which makes others feel that their space stations are too different.

"By the way, Mr. Qin, I would like to ask you, how to solve the problem of eating here? Like us, it is usually mainly steak and chicken breast."

Speaking of the astronauts in the United States, they are still very proud. After all, these are high-quality proteins, and they can bring them with them.

The food they brought up in space is also required. At this time, Yang Chongming smiled and threw a bag of food from the side at random.

"This is some small snacks we added. After all, we have not been able to get sunlight inside the space station for a long time, so we have prepared freshly squeezed juice for us, which can replenish vitamins in time."

what! There is now a bag of fruit juice. When it came to the matter, they didn't expect it. After all, it was in the space menu, because of the stress factor.

Chapter 1343: take the lead

Ordinary food bags are easy to be squeezed and ruptured directly. I didn't expect Yan Guo to overcome this problem.

Qin Yuan knew that this guy was deliberately embarrassing them, so he turned his head and asked, "Then what do you usually eat? The juice here is just some snacks, we have meat, vegetables and rice."

Yang Chongming also took advantage of the opportunity to open their storage room to them, where all kinds of labels were sorted, and all the food was available.

Speaking of this, the American astronauts paused, just smiled, and wanted to quickly change the subject. After all, what they ate were not ribbon-shaped juices, but all granulated vitamins.

They can only rely on these medicines to supplement their nutrition. They have been here for more than two months, and they have long forgotten what the juice tastes like.

Although there is meat in what I usually eat, there are very few vegetables, because vegetables are too difficult to preserve here.

It can only be supplemented by taking vitamins. When the people in Xiaomao country saw the bag-shaped juice, their eyes lit up, but it was a pity that it was in the live broadcast, otherwise they really wanted to taste what it tasted like.

It can be seen from these details that the strict technology has really far exceeded their imagination, and these details can be so powerful, not to mention other major aspects.

And at the moment during the live broadcast, the people below also found something different. The astronauts in the United States seem to be in poor condition. They seem to be struggling in the entire space. This is also because they have gone out to collect many times before.

But this also formed another kind of contrast, especially when they were with Qin Yuan, they seemed to be sluggish, and the people below were also discussing for a while. I didn't expect that the astronauts in the United States were nothing more than this.

Qin Yuan was always in control, and when the time was just right, he looked at his watch. "Everyone, this is the end of our speech today. I have already explained the small functions that should be introduced. I will continue to introduce you in the next live broadcast."

Before the United States could respond, he had already cut off the equipment first, after all, he wanted to take the lead.

Qin Yuan's speed was too fast, he reached out and turned off the live broadcast channel, and the astronauts in the United States didn't say a word from the beginning to the end, it was Qin Yuan who gave the introductory speech.

"What do you guys mean? We haven't given feedback yet, why did you close the live broadcast room? You have to know that it is very difficult to connect to the ground once."

Qin Yuan pretended to be very surprised, "What? Is it difficult for you to connect to the ground? We just need to do it every minute."

There was a cold face next to Michelle, this guy definitely did it on purpose, he still has a lot of work to do, and he hasn't had time to report yet.

However, he was stunned by Qin Yuan's operation in the next second. Qin Yuan just pressed a few buttons randomly, and soon the image of the ground was directly projected on their big screen.

Mr. Zhang at the base even greeted them. Everyone was stunned at this scene. They didn't expect that the technology on Yanguo's side could reach such a level. It was too easy to connect.

You must know that if they want to make such a connection, they need to prepare for at least half an hour before and after, and the frequency must be at the same level as the ground before the connection can be successful.

Chapter 1344: Option 2

Qin Yuan next to him has a relaxed expression on his face. He is very confident in this aspect, and he does it on purpose, because he always feels that these guys in the country of America are not at peace, and they let go time and time again before. They dove.

"Why do you think it's troublesome to connect to the ground? This is something that doesn't take a minute. Besides, don't you claim to be a technological powerhouse?"

This made Michelle not know how to answer for a while. They wanted to connect for at least 30 minutes, which was very troublesome, and the signal of such a video connection was very unstable in the middle.

He saw that the image of the connection screen between them and the base on the front side was very clear, without any lag, and they were directly connected in less than a minute, which was too fast.

Yang Chongming also said next to him: "And we also have to carry out some relatively confidential tasks, so it is not convenient to disclose them in front of the public. We also need to complete our own tasks."

He also made it very clear that he had issued an order to evict the guests, and wanted them to leave quickly. The people in country A still had a smile on their faces, after all, they dared not offend anyone.

The two people from Xiaomao Country were very polite, and they were a little surprised at the side, "Mr. Qin, I really didn't expect your technology to reach such a level. I really admire it. We have only connected to the ground once so far. ."

"This is no problem. If you want to contact your base, just tell me your signal, and I will help you connect at any time. You can borrow our equipment from our side."

When Matsushita heard this, his eyes lit up instantly. This is what he had been looking forward to. After all, they had been under the oppression of the Americans before, and they had no time to report many things. They were monitored by them at any time, and their every move had to be approved by them.

So far, although they have been here for more than two months, the tasks entrusted to them in China have not been completed for a long time, mainly because they have been helping the Americans to do things, which makes him very dissatisfied. A chance to stand up.

"Mr. Qin, are you serious? Can we really come here and use your equipment?"

"This is a small problem. Let me know in advance when you will come, but it's best to contact the ground. After all, I can agree, but it depends on whether you agree or not."

Panasonic didn't even think about it, and immediately agreed, what did they agree to? Everyone agreed, but he must not go back on his word, he must seize this opportunity.

And this guy is quite sensible, he knew that he had taken Qin Yuan's benefits, and he would definitely give him something back, but he turned his head and looked at the three American astronauts next to him, hesitating to speak, Qin Yuan instantly Just understand.

"Three, the visit is over now, please leave our space station, we need to conduct other research work."

The eviction order was issued again, and the three people from the American country had no choice but to exit the space station silently. When they turned their heads, they found that the people from the Xiaomao country hadn't followed, but it was too late for them to go in.

Michelle couldn't help cursing from behind, these two guys who eat inside and outside, he originally wanted to give them a good look when he went back.

Chapter 1345: very exhausting

But I also thought that these two guys now have a backer, and if they report the situation on the ground directly later, it will be bad for everyone.

Holding back his anger, he turned his head and took a vicious look before leaving unwillingly.

Seeing that they had already left, Matsushita did not hide anything, and directly shared all the information they collected in the past two months, but he did not bring the specimens now, which was a kind of verbal transfer.

"Mr. Qin, I hope you don't mind. After all, we came out in a hurry, and we didn't bring a lot of materials, but don't worry, I will make up for it when I go back. This is our meeting gift next time."

This saves a lot of work for Qin Yuan, but now his instruments and equipment inside the space station can perform multi-sample analysis, which can definitely analyze more than their equipment, but it is also good to be able to grasp something in advance .

Panasonic also told Qin Yuan about the new soil sample they found, "It's just a pity that I don't know the approximate composition of it at present, because those Americans have been hiding in hiding and are very guarded against us. I don't know what is probably the current what's the situation."

"This is no problem. Since you have already told us, if we go to collect later, pay more attention. If there are any, then I will notice."

Panasonic nodded, no matter what, now is definitely a good opportunity to win over Yan Guo, and Qin Yuan also promised to let them send a signal to contact their base.

This is absolutely impossible in the United States. Sometimes it is necessary to contact them with their consent, and their system belongs to the older generation. It takes more than half an hour to connect to the ground every time. Even their They are rarely connected to ground, let alone them.

It has been more than two months since they came up, but they have only contacted once in total, and under the constant urging of the United States, many work tasks have not had time to report.

Matsushita even said that when he goes out to collect tomorrow, he will definitely bring out a copy if he has the opportunity, and let them use it as a reference, mainly because all the previous ones have been taken away by Shemir and the others.

Qin Yuan's work here is going very smoothly, because the equipment in the space station is very complete, and there is no need for them to go out to collect, and they can conduct a detailed analysis of the content of all the air and microorganisms in the vicinity.

What they need to do now is to find the previous intelligent robot and collect the pattern that Panasonic said. After all, it can attract the attention of those Americans, which shows that this thing is also very important.

The next day, Qin Yuan and the others had a normal handover of work, and he left Long Xiaoyun inside the space capsule. After all, he now needs to go out to do other similar collections and look for the collection robot.

It is very strenuous to be outside. They wear heavy space suits, and because of farming, the whole movement is also very slow, which consumes a lot of energy.

This was their first time going out, but they had already conducted many simulation experiments at the base, so it was not particularly difficult for them. Yang Chongming quickly adapted to this rhythm.

Qin Yuan's collection speed is very fast, although he doesn't know what kind of pattern Panasonic is talking about

Chapter 1346: gear up and get ready to go out

Since the people of Xiaomao country completely confronted them, the people in the United States have started to have yin and yang, but they are not as obvious as before. After all, they can contact the ground now.

Although they were not afraid before, they were mainly worried that Yan Guo would come to hold a live broadcast from time to time. If they revealed some bad news to the public, the public opinion would be too great for them.

Michelle speeded up the connection, but it was a pity that they had connected three times this time, and they still hadn't reached a frequency, so they all showed that the connection failed, and there was no way to report the situation on their side to the base.

Finally, after many times of connection failures, they finally succeeded, but their pictures are very blurred, compared with Qin Yuan and the others, it is really not a star and a half.

"How about the specific situation when you went to the interior yesterday? Did you figure out their internal design? Did you see any clues?"

"President, I'm very sorry. We didn't find anything different when we went yesterday. He was very defensive against us, and his speed was very fast. We couldn't see things that were too sophisticated."

This is also expected by the president. After all, Qin Yuan and the others are so cunning, how could they be able to see through it. At this time, the president looked at them, and after making sure that there was no one else around, he asked them to carry out the second plan mentioned earlier.

"President, are we going to implement such a plan now? Would it be bad? After all, they are doing live broadcasts at any time now, what should we do if we are discovered?"

"Don't worry, this is our latest research and development achievement. It was intended to be produced in other countries. I didn't expect them to bump into the muzzle of the gun. Let them do an experiment first. They will never find this thing."

With the president's order, they are also trying to find a way, but now it is too difficult to enter Qin Yuan's space station again, and they can't run there every day.

Even if they enter again, they will be on guard against them. In this way, they may fail before they enter the plan. They must think of a way to get the best of both worlds. At this time, they turned around and found that the two people from Xiaomao Kingdom had already put on their equipment and prepared out.

Michel stared at these two people coldly. These two guys had been using various excuses yesterday to say that they were not feeling well and it was inconvenient to go out, and now they put on their equipment and started to go out to collect.

"I said, what are you two going to do? Didn't you say yesterday that you were not feeling well and couldn't go out to collect? What are you doing now!"

"I'm sorry, we are carrying out the tasks assigned to us by our country, this has nothing to do with you!"

The American astronauts next to him clenched their fists when they heard this. These two guys are getting more and more arrogant now. Don't forget that they are still living in their own space station.

"What are you talking about? I'll give you another chance to express clearly. I didn't understand. You should know that you are still with us now! We led you up and took you in!"

"Hehe, you don't pretend to be good people here. How much benefit did our country give you in order to successfully send us up?"

Chapter 1347: Spread fire on country A

It can be said that we spent more than 300 million grains in exchange for such an opportunity! "

The people from country a just listened silently. They didn't expect that the little Mao country would pay such a high price, but after thinking about it, they knew that they wanted to come up with the people from the American country, which must have brought a lot of benefits.

It's just that they didn't expect that both of them paid such a big benefit and tried hard to please these Americans, but they were all out of some wolfish ambitions, and they didn't care about this small favor at all, but became more wanton.

The two people in Xiaomao country can't bear it anymore. Their country has spent so much energy to send them up, but now they have not completed a lot of research. They get the job done normally.

We can't put all the work on them. They can't even complete their own goals. Wouldn't this be a failure of the country's hard work? So these two people completely quit, and they will take good care of themselves from now on.

"So you don't talk to me in that tone. From now on, we will not interfere with each other. If you charge us, then we are equal. What we do has nothing to do with you, and you have no right to order us."

"You bastard, what are you talking about!"

The astronaut from the American country next to him couldn't listen anymore, and wanted to rush up to beat someone, but he didn't expect the astronaut from the Xiaomao country to pat his chest, only to see a small red dot flashing on his chest. He actually turned on his body camera.

"I didn't want to argue with you before, but as your demands are getting higher and higher, I can't help it. If you want to call, I will record it at any time."

Michelle next to him held him back. No matter what, they can't do anything now. Once they do, they will rush to the peak of public opinion. In addition, they belong to the weak in this space, and they don't know what will happen when the time comes. What was said by those media.

In the end, they could only watch them leave silently. After the two people from Xiaomao country left, the astronauts from the country of America were so angry that they could only turn their heads and spread their fire on country a.

"I really don't know what you two \*\*\*\*\* are still standing here for. Hurry up and do something for me. Double up on today's drawings, otherwise no one will come back!"

Although they knew it was a threat, and the nameless anger was directly directed at them, the two of them didn't dare to say anything. This is their situation. win over the United States.

At this time, Michelle suddenly thought of a good idea, because he noticed these two people, and said yesterday that he would go to Qin Yuan to contact their base, so they would have a reason to enter the space station directly. This is a rare opportunity .

As soon as the people from Xiaomao came out, they heard Michelle's voice from the pager next to them, "This is the main station, the main station is making a call, asking 01 and 02 to return to the cabin quickly, there is an urgent matter to discuss. "

The two of them were stunned when they heard this. What are these guys planning? What do they want to go back now? According to the regulations, they really have to go back, after all, it is the order of the main station over there.

Chapter 1348: insect? ? ?

Panasonic had originally made up his mind to collect the previous soil samples today, and then gave them to Qin Yuan. This was as a gift for them to get straight to the point. After all, if they want to contact the base in the future, it probably depends on Qin Yuan.

But now he received a call from the main station, so he felt that there was something wrong, and when the two were discussing whether to go back, the voice of the call came from the headset again.

"Matsushita-san, I think we should go back and see what these guys are going to do. We have recorded it now, and you don't dare to do anything to us."

"I think so too. I'm mainly worried that if we don't go back, if they make a fuss about this matter and later say that we don't cooperate, then we will have to put a big hat on it."

In the end, the two had no choice but to go back. Just after entering, they saw Xie Mier coming over with a small smile, holding a small oxygen bag in his hand, "You forgot to take this thing, I remember that you went out for a long time before, There will be a lack of oxygen later on, so you should bring this thing with you!"

The two stared at each other when they heard this, what's going on? These Americans would take the initiative to care about the supplies they gave them before, but that was very limited. It was clearly stated that all the material guarantees would be provided by them before they came up.

But everything has changed since they came up, and they have to follow their regulations completely, so they often deduct supplies, including food, and what they can eat at present is the food according to the portion.

They didn't dare to waste at all, and the oxygen bags and other things they used were very economical, but they didn't expect these Americans to be so generous, and took out a few from the back with them.

"Colonel Michel, what do you mean? Is this thing really going to be used by us?"

"Of course, after all, you have been helping us a lot before doing things for us. This thing must be another supplement for you. If you need any supplies in the future, you can tell me directly."

This reversal of attitude was too quick, and the two of them were a little confused. Although they couldn't figure out what they wanted to do, anyway, we can talk about it after we get the supplies.

In this way, the two set off again after taking the oxygen bags. This time they were going to a farther place, mainly to collect soil samples.

However, what they didn't know was that during the contact just now, Michelle put a gadget on them without anyone noticing, and they were manipulating it in the space capsule at the moment.

The two didn't pay attention at all. They were concentrating on searching for the previous pattern. Qin Yuan and the others also came to the outside, but their directions were completely opposite, because according to the last location left before, they now need to find the collection robot first.

Yang Chongming kept searching in the previous direction, but found nothing. At this moment, Qin Yuan pointed behind him.

The two turned their heads and saw a bunch of strange things not far away. When they approached, it turned out to be a collection robot. The current robot is completely deformed and can be described as a pile of tatters. This is obviously caused by external attacks. Sincerely.

Yang Chongming looked at the destroyed collection robot, and squatted down to examine the fragments carefully.

Chapter 1349: someone wants to destroy

"Captain Qin, look quickly, there are depressions everywhere here, not ordinary stones."

This is of course, and Qin Yuan also expected it. After all, if someone wants to destroy the exposed weightless space, there is no way to use ordinary stones. Everything is not profitable. In that state, Even if you lift the stone high, you can't reach that strength.

But there were no traces around, only fragments of the collection robot could be seen. When Yang Chongming was puzzled, Qin Yuan said coldly, "I know what's going on."

Qin Yuan said that the material used to attack the collection robot was a special dry ice material. After being destroyed in this weightless space, it would completely oxidize and disappear in this space.

Yang Chongming was a little strange when he heard this. He didn't know how Qin Yuan found out. Anyway, he didn't see anything at the moment. The reason why Qin Huai made such an explanation was because when he first contacted, Some pictures were actually transmitted to his mind, which is another effect of the system upgrade.

He can be like a movie playback, as long as he touches the damaged object, he can quickly restore the picture before the object was damaged.

He saw some solid materials made of dry ice, which are generally used to clean the space capsule. At first, Mr. Zhang suspected that some small meteorite fragments had fallen, which caused the damage , but it looks artificial.

Although the image is very blurry, after all, the time is relatively long, but Qin Yuan can vaguely see that it is a person wearing a space suit, and the specific national flag is not clear, after all, their national flag is very small, just on the chest of the space suit The location, so Qin Yuan didn't see it clearly.

Now there is no other way but to look for the chip. Yang Chongming is still squatting on the ground to search carefully. He thinks it must be around. After all, there are too many debris here, but Qin Yuan walked over and patted him on the shoulder, signaling to go back to the space station first. Besides.

"Captain Qin, don't give up so quickly. It must still be there. Let's look for it quickly. After all, Mr. Zhang said that the cost is very high."

"It's not that I want to give up, it's that I'm not here anymore. Go back, and I'll tell you again when I go back."

Yang Chongming was full of doubts in his heart. From Qin Yuan's statement that the thing was smashed by the solid material of dry ice, and his conclusion that the chip was gone, it must be unbelievable for him.

So Yang Chongming didn't give up yet, he still squatted on the ground to search until he collected all the pieces, but he still didn't see the whereabouts of the chip. According to Mr. Zhang's previous description, the chip was very large, about the size of a playing card. So it must be easy to spot.

If he couldn't find it, he could only give up, so the two returned to the space capsule. Long Xiaoyun was very concerned about the situation outside, and they picked up the fragments of the robot they brought back as soon as they came in.

"I didn't expect you to find this robot."

"Hurry up and see if the chip is in the fragments. Anyway, I brought back everything I could bring back. I didn't find it there at the time. You can see if it is caught in these fragments."

As soon as Yang Chongming's words fell, Qin Yuan directly stopped him.

Chapter 1350: backed out silently

"Don't look at it, it's definitely not here, because this chip has been taken away by someone else, how could it be here."

He is full of question marks now, he doesn't know what happened, but Long Xiaoyun believes in Qin Yuan very much, "Do you mean it was taken away by those Americans?"

"It's not them, I can say with absolute certainty that it's from country C!"

This result surprised Yang Chongming very much, because he had thought about many possibilities, how could this be involved by people from country C? But Qin Yuan couldn't explain it now.

Because in the image he saw, as the figure slowly approached, he saw clearly that the sign on it was indeed a fruit, and they came over and took the chip away directly, with a very clear purpose.

And six months ago they did come up in country c, but they went down after only 12 days. Although Qin Yuan couldn't explain it, he was very sure that he would find a way to report to the base later on, or he Go straight to retrieve the chip.

"Captain Qin, I don't know why you can give such an affirmative answer, but you can't be so hasty now, what do you have to make such a judgment?"

"Anyway, you just do what I say, and there will be absolutely no problems. At present, the chips definitely don't exist here, and I have my confidence."

It was as if there was no explanation, Yang Chongming just sighed silently, and then continued to fiddle with those pieces, no matter what he didn't want to give up, because he felt that what Qin Yuan said was too unreliable.

While a few people were researching, people from Xiaomao Kingdom came. I didn't expect them to send the latest soil samples. This is enough to show their sincerity, and they really took the trouble to find it.

"Mr. Qin, this is our sincerity. I really hope that you can help us. We want to contact the base now, so this is the price we paid."

This thing is indeed okay, and Qin Yuan has already agreed to it before, so he took the thing along the way, anyway, don't want it for nothing.

Then he inquired about the signal frequency of Xiaomao Country. Just like that, within a few seconds of speaking, he directly contacted the base over there. Before realizing what was going on, I saw the two of Matsushita staring at them.

"Mr. Qin, this speed is too fast, the connection is successful in this way, and the picture quality is so good!"

"Don't worry, you can report here with peace of mind. I won't ask anything else. Your confidentiality measures are very good."

Qin Yuan respects people very much, he retreated silently and let them report on their work in this airtight cabin, Panasonic looked at Qin Yuan gratefully.

Compared with the American people, this is really great. No matter in terms of their attitude towards them, they have always maintained a lot of respect, and they have also given them a lot of help in terms of technology.

The two of them also seized the time to report on their work. It has been such a long time, and because of the relationship between the Americans, they couldn't say a lot of things clearly, so they can have no scruples here.

After Qin Yuan came out, he saw that Yang Chongming was still tinkering with the pieces, and Long Xiaoyun was beside him assisting him.
