

Special Soldier 1351

Chapter 1351: What's the problem

There's no other way, if he doesn't believe his own words, then let him go.

At this time, Long Xiaoyun suddenly looked around strangely, "Hey, what's going on? Could it be that they came up with us? Or did some food go bad?"

"What's wrong?"

Long Xiaoyun paused for a while, looked around again, and shook his head, "Maybe I was wrong just now, I actually saw a small bug, you should know that there should be no bugs in this place, but I took a closer look, and it's really not there."

When Qin Yuan heard this, he paid attention to it. After all, Long Xiaoyun was a very good sniper. It was basically impossible for a sniper to make a mistake. He immediately checked around vigilantly.

However, Yang Chongming felt that he was making a fuss over a molehill. If he had this time, he might as well go out with him quickly so that he could find the debris around him. He felt that it must have fallen in those places.

In the next second, Qin Yuan also discovered that it was indeed a bug, but at the moment that bug had already hidden behind the equipment, so it was not easy to be found.

Long Xiaoyun was stopped by Qin Yuan just as he was about to start. Yang Chongming only thought it was funny when he saw their cautious movements.

"What are you doing here, isn't it just a bug? What's there to be afraid of? Could it be that you two are still afraid of this bug?"

Before he finished speaking, Qin Yuan covered his mouth. What kind of bug is this? You must know that this is space. They have done various inspections of disinfecting equipment before entering, and it is absolutely impossible to bring bugs to this place. No pressure, let alone this little bug.

So this is definitely not a bug, but a monitor. Qin Yuan shook his head, motioning them to pretend they didn't notice this, and then he quietly wrote down his discovery on a piece of paper.

Yang Chongming was surprised when he saw it, and the three of them came to another space together. He couldn't wait to ask: "What's going on? This bug, no, when did this monitor come in."

"If I want to see it, they came in when they came. I'm very sure that there was absolutely no yesterday, because we are all operating our equipment and instruments, and everyone has already discovered any problems."

Long Xiaoyun frowned, "These two guys are too inhuman, we have been kindly helping them I didn't expect to want to spy on us!"

"I don't think so. After all, they have had enough. Those Americans really want to cooperate with us. You can see the soil samples they brought. It took a lot of effort to find them."

Yang Chongming didn't think so. He felt that Qin Yuan had a problem with people. It was obviously caused by these two guys, and some Americans were involved. They probably belonged to the same group.

This guy was about to go out to find trouble for those two people, but was stopped by Qin Yuan, "Can you use your brain sometimes and don't be so impulsive. If they are really being used, isn't it a misunderstanding? Innocent people, plus the real culprit behind the scenes, will also be stunned, such a simple truth, don't you understand!"

He was instantly stunned by this question. Qin Yuan seldom gets angry, but today he really can't stand it, this guy is too hard.

Chapter 1352: Mineral collection

Qin Yuan also noticed that his mood might be a little bad, so he adjusted it quickly, and then slowed down.

"Don't mind, I'm right and wrong, but I don't want you to spread some anger on other people, because we still have to use some relationships, do you understand?"

Yang Chongming couldn't figure it out. Although he was sprayed for no reason just now and was a little angry, he could still listen to Qin Yuan's words.

"What do you mean by this? We still ask for help from their little Mao country?"

"No, I just don't want to create so many enemies. There is no need to regard everyone as our enemy. This will add a lot of unnecessary trouble to us."

Qin Yuan's ability is indeed very strong, but he also understands that try not to set up so many enemies, sometimes there will be troubles, big and small, and it is said that it is difficult to guard against back arrows, and sometimes he will always worry about others coming from the dark First of all, the role of Xiaomao is that they are still inside the space station of the United States.

Just like when they just came, the people from Xiaomao country took the initiative to tell them about the soil samples, which was convenient for them to conduct further investigations, and also provided detailed soil samples.

If it's them themselves, it may take a certain amount of time, after all, they have just arrived at this place, and to be honest, when the two people met for the first time, he had already reviewed them , basically there is no problem.

Qin Yuan believes in his own system very much, it can believe in judgment, so he needs to be on guard against those people in the United States, what he needs now is someone who can win over Xiao Mao, no matter how powerful he is, but now due to the constraints of the environment, he still needs Put these two people there, and provide him with some other information at any time.

"Then how do you know that we will be able to win them over? If they don't listen to us at all, and instead leak our situation to the United States, won't it pose a threat to us?"

"Which side do you think they will choose in their situation? Their space station in the United States is about to arrive soon, and they can only rely on us in the future. Do you think they will foolishly try to win over the United States again?"

Yang Chongming shook his head, these things are too complicated, he doesn't know very well, the things he can understand are straightforward, so he doesn't think it's so complicated.

"Forget it, then I don't care about this matter, anyway, everything is up to you, and you are the captain here, so how do you arrange us?"

"That's right What I want is your words, you do as I ask, and just follow the order properly."

Long Xiaoyun sat beside her silently to test, at this time she took out a blueprint report.

"I really didn't expect that the things provided by these two people from the small Mao country are really valuable. Although I haven't had much contact with such data, but you look, it contains a special magnesium element and peptide element."

After all, Long Xiaoyun is not a scientific researcher, so she can only get a general idea, and basically can only rely on the instrument designed by Qin Yuan for analysis.

When Qin Yuan saw these two elements, his eyes flashed for a moment. This is what he saw in his system before. If he remembers correctly, it seems to be some kind of element that needs to be used in the hydrogen bomb.

Chapter 1353: After all, it is a special environment

He immediately searched in the system mall, and he found the same substance, and the exchange points were very high, 500g needed 60,000 merit points.

He came into contact with the soil sample, and then the system quickly analyzed it. After all, the ability he acquired before can carry out detailed analysis of large and small data.

Soon he confirmed his idea, and it was really intended to be used in the light, but he didn't know if they needed this element below them, and if they needed it, they needed to collect more.

Qin Yuan immediately asked Yang Chongming to send the data here to the base, and judging from the current situation, the people in Xiaomao country must not know the importance of this soil sample, after all, those guys in the US country would not tell them.

"Captain Qin, what should we do now that we have analyzed the soil sample? Should we tell them?"

"We have researched it ourselves, why should we tell them? I told you just now that the relationship between us is only a short-term interest relationship, not a shared relationship. It is not necessary to tell them what we have!"

At this moment, Qin Yuan only felt that this Yang Chongming had such a simple mind. Sometimes he thought too simple, which was not good for him.

After all, according to the current situation, not telling them is the best result. After all, when they know that there is such a substance, they will definitely vigorously mine it. These resources are inherently limited, and the Americans may have already done it.

But the only flaw in the United States is that their communication equipment is not very developed. I don't know if it has been transmitted to the base. I wish they had already spread it in the first place.

Ten minutes later, Mr. Zhang at the base saw the research data they sent, stood up excitedly, and immediately issued an order to ask Qin Juan and the others to mine this material immediately, the more the better.

"I really didn't expect this kind of mineral to exist in that place! This kind of mineral is used in hydrogen bombs. In recent years, because all countries have been researching it, this kind of substance is already on the verge of extinction."

It is attached to the surface of a kind of ore, but because of vigorous mining, after all, most countries are still in the research stage of hydrogen bombs, and research requires a lot of analysis of this material, so it is mined globally for a while.

That's why this kind of mineral is on the verge of extinction I didn't expect to find it here. He immediately asked Qin Yuan to collect as much as possible, which can be regarded as a way to seize the opportunity.

After receiving the order from the base, Qin Yuan decided to go out to collect immediately, but was stopped by Yang Chongming. Yang Chongming felt very uncomfortable after going out just now. After all, in such a strong and high-pressure environment, Although they wear space suits, their bodies still suffer a lot.

"Captain Qin, I know I have to follow your arrangement, but it's too risky for you to do so. It's too dangerous to go out again for such supplies. We should try to rest as much as possible today and go out tomorrow."

"I didn't ask you to go out, you just conduct research at the base, I will be responsible for other aspects, and the collection work is completely entrusted to me."

Long Xiaoyun was also a little surprised. Although he knew that Qin Yuan's physical fitness was usually against the sky, this was a special environment after all.

Chapter 1354: Rely on collection robots

Although she also wanted to persuade her, but think about it or forget it, Qin Yuan is very sure in everything he does.

And they still have to make other reports, especially the chip of the collection robot, the chip with such a high cost is gone, although Qin Yuan said that it was taken by country C, they have no substantive evidence now, so they can only talk to the base. Side report not found.

These things need to be confirmed by Qin Yuan in the future, but the most important thing now is to seize the opportunity.

At this time, the two people from Xiaomao Country also finished their report and came out of the airtight space capsule. Panasonic looked grateful.

"Mr. Qin, thank you very much for giving us the opportunity to contact our base and report our tasks in time."

"You're welcome, this is all within your ability, and you can come and report anytime you need anything in the future."

"Thank you very much, but don't worry, we will definitely not let you do this in vain. I have backed up all our research data during the recent period."

After Matsushita finished speaking, he took out a USB flash drive, which contained all their recent data research, but this guy was too thoughtful, and he kept a part of it.

In any case, some data still has to be kept by himself, which can be regarded as the capital behind, but his sincerity can be seen from these things.

Qin Yuan did not refuse, after all, the door-to-door business should not be ignored. After receiving the data, he handed it over to Long Xiaoyun for analysis, and let them come to the space station at any time.

After dealing with this side, Qin Yuan decided to go out and collect directly. Qin Yuan put on his equipment and was ready to go. Yang Chongming came out again to persuade him.

"Captain Qin, since you are our captain, you should be responsible. If something goes wrong with you, what should we do!"

"I will handle this matter myself, don't worry, I know my body well."

Qin Yuan was very persistent and didn't want to explain to him, so he set off directly. Although Long Xiaoyun was also very nervous, he was still working on the data in hand.

"I said Captain Long, no matter what, you are also part of a brigade, right? He just took the risk to go, shouldn't you advise him, what if something goes wrong and we are here alone and helpless?"

"Don't worry, it's impossible for any of us to have problems with him. I know him very well!"

"Are you kidding me? You didn't go out at all You don't know that kind of high-pressure environment, I can't even breathe. I really don't know what you guys think!"

Long Xiaoyun smiled, did not speak any more, and continued the research at hand. Yang Chongming saw that one of these two people was stubborn and the other was cold. "I really don't understand you two!"

And Qin Yuan's side came out very smoothly. To be honest, with his physical fitness, even without the protection of this spacesuit, there would be no problem. His body could withstand such a great pressure.

He has already memorized the appearance of that kind of soil, and it is not very difficult to find it. After all, his speed is very fast, so their collection is in trouble because it is very difficult to walk in this space. Reduced their speed.

They have no choice, so they can only rely on the collection robot.

Chapter 1355: because of tools

However, there are also problems with the imaging of the collection robot, which requires human manipulation, and the amount of collection under such manipulation is also limited.

The United States is using this kind of technology now. Of course, in such an environment, even collection robots will go on strike.

"Damn it, this is already the second robot that has a problem! Jason, you will bring the robot back later."

"Continuing like this is not an option. We still have the last one ready. Do we need to use it now?"

"Then what can we do? We don't have enough personnel in terms of wages. There must be two people staying here, and only one person going out to collect. Those two guys from Xiaomao Kingdom are unreliable."

This greatly affected their efficiency, "We have already reported to the base, the president asked us to speed up the collection, the more the better."

"Forget it, since this is the case, take out that robot as well, this will increase the chance a little!"

The American side is dominated by robots, and they will definitely not be able to bear their bodies when they go out, and it has been almost two or three months since they came up.

At this moment, not only are they going to collect work, but they also put monitors inside Yan Guo's space station to monitor every move there. These guys are indeed despicable enough. Bring it in.

"The captain is a little strange. I don't know why the picture can't be displayed all the time, and the sound is also very vague. Could it be a signal problem?"

"This should not be the case. Our technology is very advanced and is generally used for investigative work. There have never been any problems in previous experiments."

"Let's debug it again, it may be a frequency problem."

What they didn't know was that Qin Yuan had already discovered their conspiracy, and had specially dealt with the spy who lurked in, so they would definitely not receive any news, but this was not a long-term solution.

After Qin Yuan's reminder, Yang Chongming no longer minded the spy bug, but he always felt weird.

"This thing is so small, we can find it now, but if he moves to other places later, what should we do if we can't find it?"

"Of course I have a solution for this thing. It must not be destroyed now, otherwise I don't know what kind of countermeasure they will come up with to deal with us."

Qin Yuan intends to keep this thing first, and he will definitely be of great use in the future, and he must teach these guys a good lesson.

Qin Yuan's efficiency is very high here He quickly found that kind of soil samples, and he found that there are a lot of them in this place. Before they collected it slowly, mainly because of the problem of tools.

Qin Yuan knelt down and looked at a small pit in front of him full of this kind of ore material. He took out the collection tool and began to load the ore on the surface.

If there were equipment, they would mine faster, but Qin Yuan didn't need him at all, and his punch, which was powerful enough to perform miracles, was definitely more effective than machines.

In this weightless situation, the effect of force is mutual, of course Qingyuan knows this truth, when others think that the collection task is very serious, Qin Yuan has already collected their amount for a week.

As for the chips, he can only go to the back to ask. Although the chips are also available in the system mall, he doesn't want to make it so cheap in country c.

Chapter 1356: Over-done

Just like that, when Qin Yuan came back, Yang Chongming was stunned. This must be too much. There is a whole big bag, all of which are the ores he collected.

"Captain Qin, how did you do it? Did you collect such a collection with your own strength?"

"Otherwise, what method do you think I will use to collect, after all, it is just like training, it is very simple."

Yang Chongming had been outside before, so he knew how harsh the outside environment was, and even walking was very difficult in that weightless condition, but he did not expect that he overfulfilled the collection work.

This made him really admire Qin Yuan's physical stamina, which might really be beyond ordinary people. Under such a job, he didn't have any problems.

And he said it so easily, Qin Yuan has already overfulfilled the collection work, he just needs to change to another place tomorrow, such ore is indeed very rare, even in this place, he has no way to carry out deep collection.

If there is a robot, then there is no problem. The previous collection robot can directly probe the detector to a depth of tens of meters, breaking through the factor of gravity.

"It seems that we need to report to the base, but even if there is a collection robot, there is no way. After all, the robot's probe can't reach that deep."

Yang Chongming clicked on the data analysis next to it, not just them, at present, the collection robots produced by the technological level of these countries cannot reach such a deep level.

Because the detection arm of the robot is limited, and under such gravity conditions, it is already very deep to reach a maximum of 5m.

Even if they use collection robots now, the efficiency will not be very high, and the collection robots will collect other work after they leave, and now they mainly rely on manpower for collection.

So they need to apply, whether to collect the robot now, Yang Chongming thinks that the cost of this robot is too high, and try not to use it if he can.

"We can't lose the big because of small things. I know that the cost of this robot is very expensive, but these elements are rare things there. If we can seize the opportunity, we will try our best to seize the vitality."

Long Xiaoyun also nodded in agreement, she felt that at least there was a possibility of recreating this robot, but if the ore was not collected, it would be gone.

In this way, Qin Yuan took the collection robot out for the third time. This time, he could use the collection machine to reach deeper underground, and then he would collect it and bring it back.

Yang Chongming is not surprised now. After all, he can't persuade him. Qin Yuan definitely wants to complete the task quickly, and then finish the work here. There are still many things waiting for him to do.

Under Qin Yuan's collection, their overfulfilled tasks were originally scheduled for 60 days, and they needed to complete the 60-day collection in space. The daily quantitative workload has standards, but they would rather spend only one week. Overfulfilled.

Not only this newly discovered soil sample, but also some other data Qin Yuan has completely collected.

It seems that they can go back early, and Qin Yuan immediately reported the situation to the base, which Mr. Zhang never thought of.

Chapter 1357: The collection task was overfulfilled!

After six years, they launched the manned spaceflight program. They did not expect to achieve such a great success.

Seeing Qin Yuan's outstanding performance, Mr. Zhang became more determined to keep it. He always felt that Gao Shiwei was unwilling to give up on him.

"It seems that our research can go further in advance, and the data they brought back are really useful to us."

"Before I said that it would be absolutely fine to have them join. It seems that our strategy will change in the future. Don't worry, with this kid, I don't think we will be too bad in the future."

Everyone in the laboratory of the base is cheering. It can be said that they have achieved the greatest success in recent years. It took more than two months to go to the United States. Qin Yuan and the others only took one week to complete the work base. This side also approved their return.

Knowing that he was going back, Long Xiaoyun was also very happy. No matter what, it was a good thing to be able to go back early. The Mi Country and the others soon knew that Qin Yuan and the others were going back.

"Hahaha, I don't think those three guys have researched and collected anything, so they have to go back. I said how could their technology in Yan country be so advanced, and they have nothing, so they went back in a hurry ."

"Yeah, how can I compare with us? Our robots are 100 times more advanced than theirs. I want to see how these guys compare with us."

The astronauts from Xiaomao Country shook their heads helplessly beside them. Only they knew what the real situation was like. These guys were so self-righteous that they didn't even know how powerful they were.

This scene happened to be seen by an American astronaut. He rushed forward and grabbed Panasonic, "What were you doing just now? Are you not convinced?"

"By the way, I almost forgot that the two of you were not very arrogant before? I always thought that I had their protection. Now that they are gone, I can see how arrogant you are!"

Panasonic just pushed his hand away lightly, "I don't think it matters, I just think you are very pitiful. It's been so long, and I haven't even figured out the details of him."

Now he doesn't care anymore, anyway, he has already made it so clear before, and they will come up through Yanguo's space station later, where they will conduct scientific research work, and will not have any interference with Miguo in the future.

"What do you mean by that? It's best to tell me clearly, otherwise you won't be able to return to the ground safely!"

Michelle began to threaten. He said that enough is enough during this time, their spy bugs don't know what's wrong, they haven't listened to any news, they are in a state of no signal, they want to check, but do not know what excuse.

"What I mean is that I think you are very sad. It's been so long, and the credit is not as great as others. Do you know why they went back? They have already exceeded the collection task!"

what! Panasonic's words completely shocked the people next to them, and the people in country A were also full of surprise. They couldn't believe that these talents completed the task within a week after they came here. It may be that the situation of the task is different.

"How is this possible? We've all been here for so long, how many things did they collect and then go back?"

"We don't know about this, it's a secret after all.

Chapter 1358: All in 1 space station

But if you think about it, it's not easy for them to go up. They must have collected enough before going back. It's ridiculous. "

When Michelle heard this, he fiddled with it almost crazily. He felt that there would be absolutely no problem with this. After all, they had done so many experiments before.

In the next second, the spy bugs they placed suddenly heard a voice. This time they could hear the conversation very clearly, but they had just heard a few words clearly before there was no sound again, and the sound behind was very low.

There is no other way, a few people can only wear earphones and put them as close to their ears as possible so that they can hear more clearly. At this moment, Qin Yuan on the other side looked at the right time and stomped **** the spy. Make a loud electrical noise.

"Ah! Damn it, my ears!"

Michelle quickly threw the headset out, but a powerful noise came from inside, unexpectedly their spy bug was destroyed.

But now he is more worried about another problem. He doesn't know if Qin Yuan has discovered it, or if the bugs were destroyed by accident.

"Captain, what should we do now? Do we need to send someone out to investigate?"

After all, Yan Country will return to the ground soon. If there is any situation, if the matter of this spy bug is expanded at that time, it will be troublesome in the future.

"What's the use of asking someone to interfere now? They're going back soon, so I can only pray, it's just an accident."

He stared out of the window with a solemn face, it was dark outside, and there was a light in the distance, it was the space station of Yan Kingdom.

After Qin Yuan's destruction was over, he collected it. This thing was used as capital for their negotiations after they went down. It's up to them to argue with this thing.

Qin Yuan wanted to investigate the chip matter, so he could only start from the country of Mi. It is unlikely that it is just the country of V. He does not believe that the country of Mi is not involved, after all, they are all inside a space station.

This worm is the key to the problem. They are also making preparations now, requesting to return to the ground. This time, the collection work has been very smooth and overfulfilled. The base has already done all the preparations.

The public didn't know about this news. After all, their collection tasks were also kept secret. They only knew to do some scientific research on it, but they didn't know what it was.

Qin Yuan and the others came back, and there was a vigorous live broadcast at the base. Everyone was paying attention to this matter, after all, not only must the launch be successful, but also land safely.

Everything went very smoothly. After returning to the ground, Qin Yuan and the others were interviewed by the media, but it was only a few minutes of exclusive interviews. Soon they were transferred to another room, because now they wanted to change the weightlessness of their bodies.

It is necessary to start to adapt, which means that some astronauts will be very uncomfortable after staying in space for a long time, but Qin Yuan and the others only stayed for a week.

It's not that exaggerated to get used to it. Qin Yuan's physical recovery is the fastest. He has just returned to the room and he can move freely. He plans to go to Mr. Zhang to explain the situation, and he still has a lot of things to do.

The assistant outside the door was stunned when he saw that Qin Yuan could move freely. This is too exaggerated, isn't it?

Chapter 1359: How did Qin Yuan do it?

They just came back from space, did his body get used to it so quickly?

Before the assistant could react, Qin Yuan grinned, "Now I want to talk to Mr. Zhang, after all, I have made a major discovery here."

"No... no problem!"

At this moment, Mr. Zhang is extracting minerals from the soil samples brought back by Qin Yuan and the others in the laboratory. These elements are very much needed by them. Now that he is getting older, many things are done by his assistants and his students. .

It can be said that Mr. Zhang has been contributing to the scientific cause of Yan Kingdom all his life. Even if someone else is doing the operation, he will also guide it.

But when Mr. Zhang heard the news that Qin Yuan had fully recovered, he couldn't believe that they had only been out of the cabin for less than three hours, and they recovered so quickly?

Just when he was wondering, a familiar figure appeared at the door, and Qin Yuan strode in, everything seemed normal.

"My God, what kind of physique is your kid? Doesn't it affect you at all? Look at that guy Yang Chongming is still on the bed now, and even needs help from others to turn over."

"Maybe it's because I have a special physique, so he shouldn't have any problems, right?"

"It's okay, this is all normal. After all, your muscles and joints have not been active in the stomach for a long time, so it is normal for such a situation to occur."

When Mr. Zhang said this, he stared at Qin Yuan with joy on his face. He was really more and more satisfied with Qin Yuan. Mr. Zhang was already carefully checking the data they sent back, as well as the soil samples they brought back.

Then Qin Yuan took out the fragments of the spy bug he had collected before, "This time you asked us to look for the collection robot, but the chip was not found, but I know who took it away."

Mr. Zhang nodded. Yang Chongming had reported this before, but they found new soil samples later, so they didn't pursue this matter any further.

"Although the cost of the chip is very expensive, there is nothing we can do after that place is gone. We can only think of other ways."

"But I have news here. I'm pretty sure that it was taken by country C. Although I don't know how to prove it, the country of America is also inseparable from this matter. We can take this opportunity to knock it from the side."

After finishing speaking, Qin Yuan took out the fragment of the spy bug, and then he played a recording. Hearing this recording, Mr. Zhang's eyes widened instantly. did it.

Because the recording is the conversation of Michelle and his fellow astronauts mainly trying to figure out how to bring the bug back to Qin Yuan's space station.

"How did you do it? How did you manage to capture such a recording! It's really amazing."

"I just used a little trick. They think that this kind of technology is already ahead. In my opinion, it's just a small fight. I conducted a counter-investigation, changed the route, and then resumed. Engraved their previous conversation."

If they just took out this spy bug, the US side would definitely not admit it, but now that they have this recording, they have no choice but to admit it.

He intends to use these things as capital to negotiate with the base in the United States, and to find out the whereabouts of their chips.

Chapter 1360: Wang Yanbing's accident

Mr. Zhang was speechless in surprise. He didn't expect Qin Yuan to have such great achievements in manufacturing. He picked up the fragments of the bug and examined it. Under the microscope, there was a very precise structure inside the bug.

It can be said that they couldn't develop such a sophisticated structure in the laboratory. Qin Yuan only slightly changed it, and was able to obtain its previous news.

"I really didn't expect your strength to be so strong. The more I get along with you, the more I can discover your excellence. It seems that I really want to keep you."

"Mr. Zhang, you don't need to keep telling me how powerful I am. This is everyone's credit. I am stronger in some aspects. I can help you, but this is not where I should stay."

"Don't feel burdened, is it because your captain won't let you come? Don't worry, I will discuss this matter. The country needs scientists. There are really not many talents like you. There can be many captains of special forces. , but there is only one scientist."

Qin Yuan shook his head helplessly. Mr. Zhang didn't look like he was joking, and he couldn't bear to just break his fantasy. No matter what, he would definitely not stay at the base here.

The matter of the masked man has not been resolved yet, his lover, children and brothers are all over there, how could he abandon them and come here?

Qin Yuan quickly interrupted Zhang Lao's fantasies, "Hey young man, I said Zhang Lao, don't talk to me about these big truths, I feel a headache when you talk like this, I have to go back to rest first."

"Look, you didn't listen to me just now, so I told you that you just came down, you will definitely not get used to it, go and rest quickly."

Qin Yuan took the opportunity to slip outside quickly, and after he got out, Mr. Zhang realized that this guy was alive and kicking, he didn't look like someone who had a bad reaction.

But no matter what, he will definitely communicate about this matter, Qin Yuan's talent can be maximized here.

Long Xiaoyun and Yang Chongming have recovered for two days, and it can be regarded as slowing down. They just started to feel a little uncomfortable, and now they are basically fine. They need to slowly extract research.

Qin Yuan also planned to go back to the brigade to see the situation. They had not contacted the outside world for four months since the selection, so he couldn't wait to go back.

Mr. Zhang is a bit reluctant He is worried that Qin Yuan will not come again after he returns, but Qin Yuan reassures him, after all, he still has to investigate the matter of the chip, so he will definitely come again.

On the way back, Qin Yuan was very happy. They planned to send Yang Chongming back first, and then return to the Special Operations Brigade.

"It's been a long time since I saw Er Niu and the others. I don't know what's going on with this kid. If I'm not here, they shouldn't be lazy."

"I don't think so. After all, the red blood cell team is relatively mature. The special operations team has a strong sense of autonomy and independence, so there won't be such a problem."

Yang Chongming praised him without hesitation. He really appreciates the red blood cell team. It was also the place he yearned for before, but it is a pity that his physical condition is not good. This time he had the opportunity to work with Qin Yuan, which also opened his eyes. , Qin Yuan's ability is really strong.
