

## Special Soldier 1491

Chapter 1491: \$30,000 for you

A few people appeared inside, and the men who appeared had no expression on their faces, they just looked at the people in front of them coldly.

"These products are quite healthy. I know you guys were introduced by Brother Hong, so there is absolutely no problem with the price."

"Don't worry, these people are all healthy, and none of their organs are enough for you to earn back your capital."

The doctor among them hummed his head when he heard this, what's the matter? They want to give them to the underground traders who sell these organs.

Not only that, they are sold directly, and their organs are freely available for them to use, but their whole bodies are available for them to use at will.

The doctor panicked completely, because he knew what consequences they would face once they got out.

He knelt on the ground and begged Qin Yuan non-stop, "Please, can you let me go? I really don't understand anything, and I was forced by them at the time."

"Hehe, what you are saying now is quite simple. When you treated those children, every organ on their bodies was removed one by one by your sinful hands."

The doctor can't control so much now, he knelt on the ground and kowtowed, and other people begged for mercy after seeing it.

The people on the opposite side didn't care that they were holding guns in their hands, and they were so scared that they didn't dare to move. They came over to check, and there was nothing wrong, they just saw the silly expression of the man just now.

"Brother, wait a minute, is there something wrong with this person?"

"You know the rules. For a fool like this, some organs can't be used, so the price may be cheaper."

Qin Yuan smiled knowingly, he almost forgot, because he was worried that this guy would expose them before, so he was abolished directly, and it is very simple to restore him, and Qin Yuan just wanted to restore him.

To make him feel that fear while he was alive, especially when he was awake for a while, and to give back bit by bit what they used on those children.

Qin Yuan touched the man's head lightly, then punched a box, the man woke up instantly, the previous him was like a dream, he turned his head and kept looking around.

"There is nothing wrong with this person. It was just pretending that the goods I gave you are guaranteed to be healthy. How about the price?"

"Okay, the one introduced by Brother Hong will give you 30,000 dollars."

Qin Yuan nodded, money is nothing to him, but he must have a use for this money, if he doesn't take it for nothing, he won't take it.

It was only then that the man realized that he had been selling others all the time, but he didn't expect to be sold by others now. This is really a big joke, and they can't do any resistance now.

What Qin Yuan has to do is to treat his own body in the same way as his own. As for those who are protected by officials and officials, they will be handed over to their country to deal with. This is all he can deal with.

There were two people inside who wanted to escape, but what they received was a severe beating. These people who came to deliver the goods were not good people, and the man was completely desperate. He knew what would happen if he was sold in.

After paying the money, Qin Yuan left satisfied. He didn't even look at the people behind him. Qin Yuan also gave the money to the orphanage anonymously.

Qin Yuan, the dean of the orphanage here, has inspected and found no problems. He is indeed a person who truly cares for the children. The money can improve their quality of life.

## Chapter 1492: Enter the Institute

In addition, Gao Shiwei's phone in Yanguo was about to explode. One after another, he called the Ministry of Foreign Affairs, and the highest commander above all came to ask if he was responsible for this incident.

Although the results of Dongguo's handling this time did not reveal any person in charge, after all, it was the person named Ham who exposed it himself, but until now, everyone still doesn't know why he suddenly exposed everyone.

Moreover, several main persons in charge also mysteriously disappeared, which made everyone suspicious. Dongguo just said hello and wanted to ask if they were involved.

Because there is no evidence for this matter, they dare not talk nonsense, and both parties are only in the stage of testing each other.

Gao Shiwei was also stunned. This is absolutely impossible. He checked it himself last night, and it was definitely not something wrong with him.

He was still a little worried. After getting dressed and came to the training ground, he heard familiar slogans. Seeing Qin Yuan and his team members undergoing training, he shook his head. It seemed that what happened this time really had nothing to do with them. relation.

Gao Shiwei called to report the situation on his side, and he repeatedly assured that this matter had absolutely nothing to do with him.

Three days later, Gao Shiwei found Qin Yuan, "Let you come to play chess, what are you doing?"

"Captain Gao, you know, don't I still have training over there? That's why I didn't have time to come here."

"Stinky boy, if you don't do something well, you still need me to wipe your ass."

Qin Yuan didn't react, and saw Gao Shiwei take out a throwing knife, "Look, this thing belongs to you!"

Qin Yuan scratched his head in embarrassment. At that time, they ran out in a hurry. In order to destroy the surveillance, he opened the surveillance camera with a throwing knife, and then they all ran out.

"Hey, you know, Team Gao, those kids are so pitiful, I can't ignore them."

"Okay, I don't know who is a child or not. All I know is that your kid slept here all night and was still training the next day. I don't know anything else."

The two smiled knowingly, everyone was doing it for the good of those children, of course Gao Shiwei also understood how he could put those bad guys to do a lot of evil, but everyone tacitly didn't say anything.

The problem here has come to an end for the time being, but Mr. Zhang has called many times to urge him. He kept asking Qin Yuan to hurry up. He has already selected personnel to carry out scientific research training.

Qin Yuan really couldn't turn him around, and after the matter at the research base was over, he had to form other special warfare teams to perfect the entire special warfare system.

This time Qin Yuan was even more famous than last time, Mr. Zhang sent a special plane to pick him up.

The research base was even more lively. Banners and flowers were all ready, and the staff who greeted them were also very enthusiastic.

Zhang Lao smiled and clapped below, seeing Qin Yuan hurried forward to greet him.

"Mr. Zhang came to pick me up as you. It's really inappropriate. I'm just an ordinary person, so there's no need to engage in such a big fight."

"You kid is just too humble. Do you know how much you have contributed to us this time? As far as you are concerned, I can say that it would not be a loss to trade three space stations for you."

Chapter 1493: Difficult to overcome technical difficulties

Mr. Zhang's metaphor is indeed a bit exaggerated. The cost of the three space stations is unknown, but it can be seen that he really cherishes his talent.

After coming to the laboratory, Qin Yuan looked at the personnel he had selected. Those with the lowest educational background were all doctoral students, and they had been with Mr. Zhang for many years.

The moment they saw Qin Yuan, it was like seeing an idol. After all, Qin Yuan broke their tradition and built a space station in a short period of time, and made great contributions to aerospace scientific research.

A female researcher stepped forward excitedly, "Mr. Qin, I finally saw a real person up close. Can I take a photo with you?"

Qin Yuan accepted it with a smile. It was not difficult anyway, and Mr. Zhang was not in a hurry. Anyway, Qin Yuan had already arrived at the aerospace base. He could start the class at any time, but Qin Yuan also had something to do, so he decided to take it the next day. Start the class in the morning and try to complete all the training content in one month.

However, Mr. Zhang is also a little worried about the class. Qin Yuan has no problems in training and becoming an excellent astronaut.

But this class is a science, it's not that he doesn't trust Qin Yuan, but there are many things that can't be uploaded by everyone.

For this reason, he specifically found Qin Yuan, and he began to inquire from the side, mainly to see what Qin Yuan meant.

"Qin Yuan, first of all, I don't mean to look down on you. It's just that this teaching has nothing to do with you personally. Do you have any difficulties in teaching? Or if you have any ideas now, you can talk to me first."

"Don't worry about teaching. I have absolutely no problem. I have taught teaching many times before."

"I've heard about this, but you have been doing special or systematic training before, these are theories after all..."

Qin Yuan scribbled down two theories on the paper, Zhang Lao closed his mouth instantly, did not speak again, and looked at the topic on the paper seriously.

What was written above was mainly the transformation of nanotechnology, and the synthesis of the latest silicon element. Qin Yuan continued to write on the paper. He quickly listed 123 of his own opinions, mainly to elaborate on these technologies.

Mr. Zhang was immediately attracted. They had studied these two subjects before, but they hadn't made any progress, mainly because they were not well prepared in terms of practice and theory.

Especially the synthesis of silicon element is still a technical difficulty that is difficult to break through, but at that time this step was completed by Qin Yuan.

The reason why Qin Yuan is so confident now is because he exchanged a scientific research Mahayana manual in the system mall.

He is very clear about all the teaching instructions in it, plus he has been exposed to the drawings before, he has an automatic recovery system that can analyze each part disassembled.

Mr. Zhang and Qin Yuan were studying tomorrow's teaching theory in the office. Mr. Zhang admired Qin Yuan more and more. He didn't expect that the young man in front of him was so knowledgeable and versatile.

"Are you really sure you haven't graduated from college yet?"

"Mr. Zhang, you can find out about this matter as soon as you check it. Do you think I have to lie to you? I was a soldier at the time, so I hadn't finished college yet. I was just a recruit, and I was laughed at at that time."

Chapter 1494: very unconvinced

You are simply gifted in this area. "

Mr. Zhang couldn't help exaggerating. Looking at the theory on this paper, it completely broke their previous difficulties. With this step-by-step list, the goal became clear in an instant.

The two are researching here, and Mr. Zhang feels that Qin Yuan has no problems. On the other side, there are thousands of choices, and the selected researchers are also actively discussing.

The female researcher who took a photo with Qin Yuan in the morning is called Li Xiaoman. She was also a core member of the space station before, but Qin Yuan was busy with work at that time and did not have any chance to communicate with her.

This time, he can finally be together and listen to Qin Yuan's teaching, which is very lucky for him.

She flipped through the photos she took with Qin Yuan in the morning, her eyes full of envy, "You don't know how powerful he was at that time, all of us don't know what to do with those core parts? They were all made by him from."

A man wearing glasses next to him was a little puzzled, "Is what you said true? How did I hear that this research was mainly done by your first group."

"Wang Wei, don't you know? These things are like this. That's because he didn't pursue any fame and fortune at that time. He said that these things were researched by everyone, so he was deliberately hidden when it was announced."

Wang Wei smiled disdainfully when he heard this. He thought it was possible for such a stupid person to not accept any signatures on the things he researched.

He thinks that this guy does have some talent, but it is exaggerated by everyone, and now he is said to be a god-like existence.

When the space station was built, he observed that there was no signature of Qin Yuan, and no other things were mentioned, so he felt that it was a bit too exaggerated.

After seeing Qin Yuan this time, he also felt very ordinary, but he didn't know what was so magical about this guy.

"I don't know about the others, but you all know that I graduated from Harvard before, and I have already carried out systematic studies there, and I also followed my mentor for three years of further study at the base in the United States. "

When Wang Wei mentioned this, he was full of pride. He felt that he was the closest person there, but he forgot that most of the people here graduated from excellent schools all over the country.

Li Xiaoman was very unconvinced when he heard this. What was this guy talking about, and hearing what he meant, he felt that he was very proud of being in the base in the United States.

"Since you have already been at the base over there, I haven't seen you make any contribution to our scientific research base."

He couldn't say anything, because at that time the base in the United States was very guarded against them. What they did inside were just some chores outside, which were harder than those handymen. To put it bluntly, they were free labor.

But he is proud of this, which is typical of a little xenophobia.

This is what Li Xiaoman dislikes the most. Seeing the awkward atmosphere, Wang Wei could only cough slightly, "Forget it, let's not talk about it. Since I have class tomorrow, I have to prepare well."

What he said about preparing was to prepare a few questions, and he wanted to see if the so-called teacher could answer them.

Chapter 1495: make others jealous

A man who hasn't even graduated from college wants to teach them.

The people next to them saw that the atmosphere between the two of them was a bit strange, and they quickly tried to persuade them. If this continues, there will probably be a quarrel. Li Xiaoman is a loyal fan of Qin Yuan, and he defends him everywhere.

Mr. Zhang also attached great importance to Qin Yuan. Not only did he arrange a separate room for him, he even hired a special chef for his meals.

Because he had heard before that the food in their special warfare team was better than anywhere else, he was very worried that Qin Yuan would not get used to it when he came here, so he even hired a chef.

All aspects are arranged very well. Some people think that he is too exaggerated, and it is unnecessary to make it too big, but only Mr. Zhang thinks that this is the way to treat talents.

Their talents cannot be buried, and sometimes one of their ideas and creations can make them advance others for decades.

When Zhang Laoyi mentioned this, his face was full of excitement. He felt that he had discovered a rare talent, and he was very low-key. Doctors are much easier to treat.

The secretary next to him brought the prepared list, "Mr. Zhang, take a look. This is Mr. Qin's daily menu. There are also some usual needs. If there is anything else that needs to be added, please take a look."

Mr. Zhang came to check carefully. He knew that Qin Yuan liked to drink tea, and he specially bought more than a dozen kinds of tea because he didn't know which one he would like to drink. Even the coffee was ready.

"There is nothing else, but the only thing to pay attention to is that you must absolutely keep quiet, and no one can approach him, and you can't disturb him, understand?"

"Don't worry about that. No one will go there. I'm rich. Xiao Liu and the others have set up a gate there, and only he can enter."

"Okay, then there's no problem."

The secretary felt that Mr. Zhang's preference this time was too obvious. Only Mr. Zhang knew that those so-called overseas returnees had made a little bit of inconspicuous achievements, so he would start asking for things.

But Qin Yuan made such a great contribution this time, he was unknown, not only gave up his signature to all the staff of the research institute, but also didn't ask for it.

It was all worthwhile for him to do all of this. Mr. Zhang made it so grand this time that it made other people jealous.

Looking at the newly built access control, Wang Wei felt a pang of sadness in his heart. He felt that he had never been treated like this when he came here. This was too exaggerated, so he lived alone in an independent building.

And I heard that there is not only a private chef, but also a private swimming pool for him to swim and exercise every day, and the gym is also alone.

As a senior doctor who came back from studying abroad, although he has his own independent room, the conditions are indeed not as good as Qin Yuan's.

Qin Yuan didn't care much about these things. Anyway, he had lived in any kind of conditions, and he could accept the poor ones.

At this time, a small truck slowly drove in, and everyone couldn't help but look at it curiously, only to see that a lot of supplies had been moved from the small truck, and there were even live sheep.

Someone stepped forward and couldn't help asking curiously, what is this for? Other things are easy to understand.

The staff in charge of transport said: "This is specially arranged by Mr. Zhang. This goat milk must be supplied fresh every day. We also have special staff to process it to provide Mr. Qin with high-quality nutrition."

Chapter 1496: wonderful class

Everyone felt even more unbelievable when they heard this, the treatment is too good, and even the freshest supply of goat milk is too exaggerated.

Take their entire research base as an example, no one has ever received such treatment, including Mr. Zhang.

Standing next to Wang Wei, Zhang Yang said with a bit of yin and yang, "What is this? Don't you know? Mr. Zhang also hired a doctor alone, the kind who can be on call, and the treatment is not a problem even if the president comes. Exaggerate."

"Hahaha, it's too exaggerated for you to say this. After all, Mr. Qin is a national treasure, at least in our base. His talent cannot be compared with anything."

Zhang Yang smiled disdainfully, he didn't want to say anything more, but looked at the supplies unloaded from the car with some envy, everything was the freshest distribution.

Because Mr. Zhang's special treatment sparked everyone's discussion, but the protagonist under discussion, Qin Yuan, is resting in bed at the moment. He doesn't want to care about these things. He has already done all the preparations and is waiting for tomorrow morning. Attend class.

And now there is another important problem that is bothering him, that is, the Long Xiaoyun I saw on the helicopter before, that woman has been completely changed, and when he contacted her, he found that she did not have a system.

That can only show that he was undergoing another kind of transformation. For the masked man, any transformation is possible, and that guy is just crazy.

Every time I see the masked man's organization or the people related to them, there will be a different situation. They are changing all the time, and they seem to be getting stronger every time.

Qin Yuan is always alert to himself, he must become stronger in order to protect the people around him and himself.

In this way, Qin Yuan fell asleep in a daze, because the next morning was Qin Yuan's first lecture, so Mr. Zhang also made special preparations, and he planned to come and listen in person.

Mr. Zhang woke up early on purpose. He felt that he hadn't discussed it yesterday. He didn't know what time Qin Yuan planned to start the class. Usually, when professors like them give lectures, it is basically after 10 o'clock.

He deliberately came to the multimedia classroom, intending to adjust the equipment first and make preparations. He was a little worried about the other staff, and planned to come and see for himself. Unexpectedly, when he came to the multimedia classroom, he found that Qin Yuan had already been working in it. Well everything is ready.

"I really didn't expect you to come so early. Is it because you are not satisfied with the place I arranged for you to sleep?"

Mr. Zhang was very worried that Qin Yuan was not used to it, but the reason why Qin Yuan got up so early was because of his powerful biological clock. Every time they gathered for training, they got up on time at 6 o'clock. Under this powerful biological clock, no matter how comfortable it is impossible for him to sleep late in the environment.

One after another, some researchers also came to the classroom. Although the researchers were carefully selected this time, there were still more than 50 people.

After all, Mr. Zhang only wanted to contribute to the research institute. Apart from some grassroots staff, these people basically worked in the research institute as well as core members and some other external members.

This time Qin Yuan had a very rare opportunity to teach, so he wanted to choose well, try to let everyone get such an opportunity, and cultivate more talents.

Chapter 1497: Wang Wei is very proud

Li Xiaoman was sitting in the first row. She had always regarded Qin Yuan as her idol, so she valued it very much. After Qin Yuan finished his introduction, he planned to go straight to the topic and start lecturing. He remembered almost the same content in the manual.

So there is no need to do teaching and processing like other people. He made a PPT, mainly for the convenience of the researchers below.

What they are mainly studying today is nano-conversion technology. This technology is relatively common in research bases, but it is also a very difficult obstacle to overcome.

Just when Qin Yuan was speaking with gusto on the stage, someone raised his hand, and someone raised a question.

Mr. Zhang who was at the side was also very interested in listening, because what Qin Yuan said was all the main points, without any nonsense.

Everyone frowned, a little dissatisfied. They didn't know who it was. They turned their heads and found that it was Wang Wei. This guy stood up.

"I have a question, can I ask?"

Those who don't know this attitude think that he is the teacher talking, especially when he is not polite at all when asking questions, Li Xiaoman really hates this.

Fortunately, Qin Yuan didn't mind, "You can ask any questions you want."

"It's like this. Why didn't I hear about the nano-conversion technology you mentioned just now in the United States? They seem to be using another more advanced conversion technology, the system micro-conversion technology."

This guy is obviously here to criticize, after all, what they are studying now is this topic, why should they bother about others?

"Wang Wei, I said can you stop finding fault? Everyone is listening to the class seriously, what trouble are you looking for here?"

"It's not that I'm asking for trouble and questioning the topics he's talking about, shouldn't I? I've been at bases in the United States before, and they stopped using this technology a long time ago."

When it comes to his base in the United States, Wang Wei is very proud. He uses this matter to suppress others every time. After all, the United States is a powerful country in terms of military or technology.

Just like the United States was the first to land the manned spaceship, among these researchers, very few came out of the bases in the United States, because most of them chose to stay there.

Even if it comes out, you won't get any core content, just like Wang Wei, who has only a half-knowledge, or even only a little superficial understanding.

But just based on this point, Wang Wei felt very proud, because he felt that the United States would definitely not make mistakes.

People have already eliminated technology, and they are still doing research. He feels that it is completely unreasonable, and more importantly, he just wants to demolish Qin Yuan. Although his theory is very well explained, he always feels a little Not convinced.

Mr. Zhang was a little puzzled when he heard this. Since this is the case, why didn't he say it before?

"Wang Wei, why didn't you ask such a question when you were doing research with us? Since when have you not used nanotechnology?"

Wang Wei was stunned for a moment, he is a relatively selfish person, and in that case, he would definitely not take out all the things he saw and learned.

He originally planned to wait until later to take it out little by little, because there are already many researchers in the space base, and the chances for him to be taken seriously are very few.

Chapter 1498: have to believe

This was originally what he planned to use as his hole card in the future.

Hearing Mr. Zhang's question, he could only defend himself quickly.

"That's right. I had just arrived at the research base at the time, so I didn't know what was going on here, and I didn't dare to speak casually."

Li Xiaoman exposed it on the spot. She felt that this guy was selfish. He clearly knew that the United States had developed other technologies, but he didn't say anything at the time.

"Doing things with a colleague like you really makes me feel too despicable. We all do things for the research base and the country. You are a selfish guy."

As soon as Li Xiaoman's words fell, Qin Yuan stopped her from speaking, and there might be a quarrel, because Wang Wei's face was already flushed.

"I think it should be like this. Maybe Wang Wei doesn't know that their research is just a name change. Relatively speaking, their research is not as advanced as ours now."

what! Everyone was shocked to hear the news.

how can that be? That is the technological powerhouse of the United States. Their aerospace technology research is decades behind others. They have already started research. They are now in their infancy. How can they be more advanced than others?

Qin Yuan began to explain slowly. He explained everything he saw in the space station, including his freehand drawing of a blueprint of the US space station.

From this point, everyone felt incredible. He didn't just draw a composition, but he drew every detail of the space station, just like printing it out.

And Qin Yuan just used the portable video equipment carried by the two people in Xiaomao country, he extracted effective information from it, and then described it. After all, those pictures are fragmented and not coherent at all. are all connected together.

Looking at the fully restored US space station, Wang Wei was completely stunned. He never thought that someone could do this.

If it was placed before, he must have felt that this person was cheating, and might have stolen other blueprints, but now Qin Yuan drew it one by one in front of him, so he had to believe it.

Qin Yuan began to explain one by one after he finished the description. The micron technology that the American people said was just a different name, which was the first generation of nanotechnology, and now they are researching the third generation.

Seeing that Qin Yuan's words were clear and logical, basically without any adulteration, Wang Wei couldn't believe it. Did he learn all this for nothing?

"How is this possible? Is everything you said true? How did their technology become like this?"

"It can be said that the first generation has fully satisfied all the structures of the space station, but the third generation we are currently carrying out has been completely upgraded, and there is no need to waste so many materials for direct synthesis."

Qin Yuan was also worried that they would not understand, so he directly turned on the computer and did a 3D synthesis. He did a lot of preparation, and it can be said that this class was very exciting.

Everyone was completely dumbfounded. It was already past lunch, and the staff outside were debating whether to ask them to come out for dinner, but at the moment everyone was fascinated by what Qin Yuan said. Every step is explained well.

Chapter 1499: Cultivate more researchers

As he said, the nanotechnology in the United States is now in the phase-out stage for him, and he doesn't bother with that kind of technology at all.

After Qin Yuan finished explaining, he walked down slowly and watched Wang Wei pat him on the shoulder.

"Not necessarily. Those people's things are good. They hide a lot. Some things are just made on the surface for you to see. In reality, it depends on how much their things are used."

"this..."

Wang Wei's face turned red, and he didn't know how to explain it. He stayed at the base in the United States for three years, but to be honest, he didn't learn as much as today's class.

Qin Yuan is also the person who has the most right to speak. During these stages, he has experienced everything. He has personally been to space, entered the space station, and also contacted those Americans. He has contacted all kinds of technologies. arrive.

Everyone also began to actively participate in the discussion, and Qin Yuan fully answered each of their questions.

Wang Wei was completely convinced by this operation. At first he thought that Qin Yuan might rely on the help of Mr. Zhang, but now after getting in touch with him, he found that Qin Yuan really has real talents and practical knowledge. He answered without any hesitation.

At this time, Qin Yuan raised his watch and looked at the time. It was already past two o'clock in the afternoon, and the time passed so fast that everyone was immersed in his explanation without any notice.

For the first time, Wang Wei felt that time passed so fast, and he hadn't had time to digest many notes, and it was already afternoon.

Qin Yuan smiled and asked everyone to go down to rest first. It is already past two o'clock, but everyone's enthusiasm is still high, because his explanation is also very interesting.

"Everyone, it's not that I'm stingy and don't want to continue explaining to you, but I need a process of digestion the most. I also forgot the time today. Everyone needs to go down and understand it first, otherwise there will be too many things at once. Way to digest."

Li Xiaoman nodded. She agreed with what she was talking about now. She probably understood about 70% of it. The rest was still a bit confusing, so she had to go back and look at the notes.

Mr. Zhang looked at Qin Yuan with satisfaction. He felt more and more that the decision to invite Qin Yuan to the research institute was correct, but it was a pity that his ambition was not here. This time he also understood Qin Yuan's own ambition clearly.

During this period of time, he hoped that Qin Yuan could teach more and train more researchers.

After this meaningful class, no one raised any doubts. Wang Wei and the others thought it was unfair before, but now they feel that talents should be treated like this.

These days, besides teaching them scientific research, Qin Yuan also started to investigate the chips carefully.

The cost of this chip is also very high. Qin Yuan planned to exchange it directly in the system before, but the merit value required for the exchange is also very high.

Besides, how could such a high-cost chip be so cheap for others? Need to find an opportunity to enter their base, and then investigate.

Regarding the matter of chips, Mr. Zhang had also heard from Qin Yuan before, but unfortunately they have no evidence now, and they have no way to start collecting any aspects.

"Although I don't know how you knew it was them who did it, I believe you. It's just a pity that there is no way now."

Chapter 1500: differential treatment

"Recently, I've been thinking about this issue too. Our things must not be given to them so cheaply."

Mr. Zhang frowned, and he was also thinking about countermeasures. At this moment, he slapped his head, "That's right! I remembered something. Next week, we will send a research team to Country C for exchange and study. , then have the opportunity to enter their base."

This is a good opportunity, as long as they can enter their base, they can find the whereabouts of the chip, and the chip will definitely be on their side.

In this way, Qin Yuan hit it off immediately, and planned to select a few researchers from the school to take with him, after all, as an exchange study, he couldn't leave empty space.

On the one hand, he wants to investigate the whereabouts of the chip, and on the other hand, he can also see how their technology is and have a real exchange.

Mr. Zhang even lamented that if he was a few years younger, he would definitely go with them. Unfortunately, this is the age of their young people. Old guys like them should retire and leave these opportunities to young people.

But he can do a good job of security in the rear, Mr. Zhang took out a controller and handed it to Qin Yuan.

"This is the supporting equipment when the chip was produced before. If the chip is sensed, it will send out a prompt."

Qin Yuan took the gadget, which was a small blue button with a five-pointed star engraved on it. Mr. Zhang said that if he could reach near the chip, the button would emit light to remind him.

This is more convenient. In fact, Qin Yuan can use himself to detect. He has a system and can detect any equipment. This detection equipment can be sensed within a range of 500 meters nearby.

The news that they were going to exchange and study the next day came out quickly, and everyone began to sign up for Yongyue. This time, Qin Yuan would also follow, they all wanted to learn more.

To be precise, it was actually Qin Yuan. As the main leader of the team, Li Xiaoman signed up without hesitation. This surprised others, because she had never participated in such a learning opportunity before.

"Xiaoman, what's your situation this time? Why are you so impatient to sign up?"

"What else? I just want to study hard and learn about their research situation."

The girl next to her smiled, and poked her quietly, "Now it's just the two of us, don't talk about those big words, I know, you never looked down on these countries before, why are you going now? Is it because of Qin Yuan!"

Li Xiaoman blushed when she heard this, "Don't talk nonsense, I don't have anything."

In fact, her own actions have already betrayed her. She never went to these countries before, it was because these people were very arrogant, and because Yan Country was behind such technological research for several years, so those people always had a superior attitude .

This time Qin Yuan also went, and she definitely wanted to go with her. She didn't know why, ever since she saw that man, she couldn't help but want to be with him all the time.

Li Xiaoman was very happy when she thought of this, she bounced out of the laboratory, and the roommate next to her was also happy for her, they all came out of the same batch, and they have been at the research base since they came out of school.
