

## Special Soldier 1501

Chapter 1501: muttering below

"Xiaoman, this time you are going with your idol, so you have to dress up properly, let's go, we will clean up for you."

"Don't be so troublesome. I think that since we are researchers, we must focus on research. I don't plan to do other tidying up these days. I just review my notes carefully."

The girl next to her burst out laughing, "Let me tell you, you are really a straight girl, what time is it now? You still want to study, since you are going to meet an idol, you must dress up beautifully Yes."

Li Xiaoman was a little embarrassed, and was dragged back to the dormitory by her roommates. Several people hurriedly told her how to put on makeup. Everyone was looking forward to this exchange and study.

Qin Yuan also looked at the list carefully, this time not only they went to exchange and study, but also from two other countries.

Everyone went to exchange and study. It was the first time for Qin Yuan to go to such an occasion. The time passed quickly, and the day of departure came in a blink of an eye.

Today's Li Xiaoman did not pull up her hair, but scattered her long hair between the two. Her hair was slightly curly, and she looked very ladylike.

The few researchers next to her were stunned. She was not like this in normal times. Li Xiaoman usually tied a ball head at random for the convenience of research work. Most of the time, she would stay in the laboratory for two or three days.

Now that he is dressed like this, it is indeed a little different. Everyone's eyes are involuntarily attracted, and Qin Yuan also turned around to take a look. This person is really eye-catching.

On the way out, Li Xiaoman also took everyone to sing together. This time, because she had someone she liked in the car, she also became very active.

This journey was quite joyful. This time, Qin Yuan and the others went together with a total of seven people, and they soon arrived at Country C.

The man who came to receive them was a man with a mustache. The man was very polite and walked forward politely.

"Hello, everyone. My name is Miller. On behalf of the research base in country c, I welcome everyone to study and guide me. I am also the person in charge. If you have any questions, you can contact me at any time."

After he finished speaking, he waved his hand politely and asked everyone to follow him and walk forward. There was already a bus outside the door to pick them up, and everyone got on the bus one after another.

This is a bit different from what they said about studying before. They were looked down upon before, so they would always be left out, but it doesn't look like it is different.

Several researchers were chattering below.

"You don't know that I also went to the last research and study, but that time was in Xiaomao Country. We all went to the research base by ourselves. No one came to pick us up. We were on the wrong road at that time."

"Is it so exaggerated? But it feels like it's pretty good this time."

"Isn't that because our International Space Station has been successfully ascended? So this is what we are proud of, and this is our hard currency."

Everyone nodded in agreement, and Qin Yuan felt a sense of pride.

It's just that when everyone arrived at the research base, they suddenly felt that what they just said was a bit redundant, because only they came in by bus, and the others were directly picked up by their special plane chartered by country c.

Chapter 1502: to move to another floor

This is really too much. There are three helicopters parked on the playground of the huge research base. Several Americans got off the helicopter. The staff next to them rushed forward to greet them and took their backpacks for them. The difference in treatment is simply too great.

Following them were people from Country A, who were treated similarly, but relatively speaking, the symptoms on the American side were very serious, and they were greeted with flowers.

Who would have thought that their space stations have been successful, and the space on their bodies would receive such differential treatment.

This is why Li Xiaoman is usually reluctant to come. These people are all snobbish, and they will keep fawning on anyone who is strong, which makes her very uncomfortable.

Everyone was very dissatisfied, but Qin Yuan was no longer surprised. In these places, you can only speak with your strength. Now that they don't see your strength, it only means that you are not strong enough.

Strong reading sacrifice. Wang Wei also followed this time, and he said angrily from behind: "These people are too much, they are treated differently like this, I will go to the person in charge now, and I will ask him what is going on."

"Don't go looking for it. It's useless. It's been arranged a long time ago. If you go to him, he will only think that we are causing trouble. Since he is looked down upon by others, we will speak more with our strength in the future."

Everyone sighed silently and could only follow behind Qin Yuan. After all, the captain didn't say anything, and they had no other right to speak.

Fortunately, apart from this difference, they are similar in other respects. The place where they live is also arranged in the same place, which is the pick-up place.

Qin Yuan and the others were doing registration, and the Americans were opposite them. At this time, there was a loud noise, and everyone was attracted by the noise.

I only saw a tall man in the United States impatiently pushing away the book in front, "I really don't know what your arrangement is, why do we not live in a single room, but need four people to live together?"

The staff was full of apology. After all, there were too many people coming to their base this time. There were people from four countries in total, so they could only arrange it like this. They couldn't let people from other countries separate together.

The front desk was explaining patiently, but these Americans didn't buy it. They all expressed that they wanted to live in a single room. At this time, an American pointed to the room allocation in the book.

This time 17\*bXWm Zhang Si. "It's an unlucky number for us, we don't live on the fifth floor, we're moving to another floor."

Control the big and the owl. A researcher on Qin Yuan's side scoffed a little when he heard this. What kind of harsh conditions are there is really a lot of things.

Li Xiaoman explained in a low voice beside them that Americans are still somewhat superstitious about numbers. They have a legend about Black Friday, so the number five is also somewhat taboo.

Just like the Yan people prefer six or eight, after all, it is just a room allocation, there is no need to make such an exaggeration, and it is not absolute, all are five.

The staff looked at the floor that the American was referring to, and said apologetically, "Sir, this place cannot be changed, because we have already arranged it before, and each country has one floor."

The man didn't care so much, he grabbed the notebook and studied it carefully. It turned out that the people of Yan Kingdom lived on the upper floor of them. Thinking of this, he was even more unhappy. Why should these people be higher than them?

Chapter 1503: We only meet each other when we eat

"No, if you have to change now, you have to change with them. Why are they higher than us? That's it, you don't need to say more, you can change it unilaterally, and then arrange them to live on the fifth floor, right? ?"

The staff was very embarrassed. She didn't change it unilaterally if she wanted to. They must have known it too.

These Americans are really despicable when they say it. At this moment, Qin Yuan came over. These guys are so loud, do they really think they can't hear?

"Wait, who said it was going to be changed? I didn't agree with it here. Everything is done according to other people's regulations. What are you ordering here?"

The man was a little surprised, he didn't expect someone to come out and fight back, when he turned his head, he stopped completely, he knew Qin Yuan.

How could I run into this guy anywhere? The man's head was full of black lines. He didn't want to make any more entanglements, so he could only shake his head.

"I'm sorry, you heard me wrong, we didn't say anything, forget it, we live on the fifth floor."

This guy's attitude changed too quickly, and everyone around him was confused. What's going on? Li Xiaoman felt that Qin Yuan was really handsome, and a simple sentence made them obedient.

In fact, it was because the man recognized Qin Yuan, who was among the world's top special warfare instructors. Although he had not had direct contact with him before, he had heard of his reputation.

But when these Americans arrived at their place of residence, the two people next to them complained a little, and they changed as soon as their captain said.

"Captain, what did you mean just now? Just because that guy said a word, you won't change. This will make us lose face. Why should we be afraid of them?"

"You don't understand, their captain has a lot of background, we can't afford to mess with it."

"There's nothing to offend, but are they just some yellow-skinned monkeys?"

Captain Mi shook his head. The matter was not that simple. He had a brother who was in the Hunter School before. At that time, he explained that he must walk around a person named Qin Yuan in the future. He had seen the photos at that time. Later, I also learned some deeds.

The captain was worried, and told the team members not to make trouble this time, they couldn't afford to mess with this person.

Others don't know. After all, everyone is in a different field. If it is in the special forces, it must be known to everyone, but these people are all scientific research personnel, so it is normal to not know. of.

Everyone just felt that their captain's behavior today made them too embarrassed.

In this way, after the episode just now, everyone finally lived in their respective floors. The Americans are currently on the fifth floor, Qin Yuan and others are on the sixth floor, those from country A are on the fourth floor, those from country H are on the third floor, and the restaurant is on the second floor. , the first floor is the lobby below.

So far, researchers from several countries have not communicated with each other. They were temporarily arranged to live in their own rooms, and they did not meet until lunch in the afternoon.

When we met, we were polite, and we just greeted each other politely. The dinner here is in the form of a buffet, which looks very good. After all, all the people who come here are scientific research talents from various countries, and such talents are rare. Treatment is also very good.

It's just that those Americans were a little bit worried about Qin Yuan because of the room change.

This is just a place to stay, so the detector has not responded, and the situation can only be known after entering their real base.

Chapter 1504: rioting americans

At this time, a staff member came in to inform the leaders of their countries to collect the study materials and exchange them this time. They need to sort out these materials and submit them in a unified way. We will discuss them at the meeting tomorrow.

Qin Yuan explained and walked out. Li Xiaoman got up to get food for Qin Yuan. Although the food here is in the form of a buffet, each food has a corresponding portion, and everyone just takes it as needed.

It can only be that they are a little stingy here, so many people have to be counted on a head-to-head basis, and a small plate of fruit has to be cut into small portions and released in small portions.

So Li Xiaoman was worried that when Qin Yuan came back, there would be nothing delicious left, so he picked up the dinner plate to fetch things for him.

She walked over to look at the fresh watermelon and took a plate, and the beef next to it and took another plate of shrimp. When she passed by those Americans, a few Americans suddenly made a mocking sound.

"Look, I just said that these yellow-skinned monkeys like to take advantage of it very much. If one person wants to take so much, can she finish it?"

"Hahaha, they said before that I didn't believe it, but it seems that it is true. It's really bad luck to be with these yellow-skinned monkeys."

Although they used the local language, Li Xiaoman could hear it clearly. She was very angry, turned around and asked directly,

"What were you talking about?"

"Oh, it seems that she understands, hahaha, I thought these yellow-skinned monkeys had low IQs, and they basically couldn't understand what we said."

It was too much, and several researchers from Yanguo hurried over. This was simply a provocation, clearly bullying them.

"Apologize to us right now."

However, those few people didn't have the slightest intention of repenting. Instead, they looked indifferent and ate their food on their own.

Li Xiaoman is not that good, she swallowed her anger, and she slapped the table hard, "Apologize to us immediately, do you know what you just said? As a scientific researcher, I have received higher education, and you have such thoughts, I really feel very sorry." shameful."

"Sorry! But we didn't mention you, did you hear me mention you? You have to imagine it yourself, what's none of my business?"

The blond-haired man in front had an indifferent expression on his face, he really deserved a beating, Wang Wei really wanted to step up and beat him up, but Li Xiaoman held him back, telling him not to be impulsive.

After all, they are in a foreign country now, so it would be impolite for them to act rashly, so let's wait until the captain returns.

Seeing Li Xiaoman and the others leave, these Americans were even more proud, thinking that they were too timid to fight them head-on.

Everyone just didn't want to cause trouble. After a while, Qin Yuan came back and found that the atmosphere was not right.

But Li Xiaoman shook her head, saying that there is no problem. After all, it was just a small episode, and she didn't want to affect everyone because of this incident. There are more important things to do later.

He quickly changed the subject and focused everyone's attention on the information. This information was provided by them from country C. This is their latest research, which is why this academic discussion is held.

It's just that everyone was confused when they saw this research material, because this research material is all written in their language.

Chapter 1505: Contact me as soon as possible

There is no hint at all. The language of country C is not that popular, but this is too exaggerated. It feels a bit deliberately difficult for them to do this. After all, everyone is from a different country, so they cannot provide a translation document.

From the very beginning, Wang Wei felt that these guys were treating them differently. At this time, he noticed that the Americans on the opposite side were all in English.

People have already translated them all and then handed them to them. This kind of differential treatment is really infuriating.

"I don't know what these people think. Why should they be treated differently? Can't everyone arrange it uniformly? If it's in English, I can also translate it."

Qin Yuan smiled and said that there is no problem, just leave this little matter to him, he took everyone to prepare to go back to the room, and then on-site translation is no problem for him at all.

Just as they were about to leave, a person in charge of Country C came over hypocritically.

"Everyone, I'm very sorry. This time due to the mistakes of our staff, we didn't prepare well, so we only prepared the language system of our own country. If you have anything that you don't understand, you can ask our professionals, and we will help you. Do the translation."

Saying this is the same as not saying it. It is obvious that they want everyone to beg them. They have just come here, so they will give everyone a blow.

If they were really sincere, they would have prepared quickly. After all, translating is not a difficult task. It is completely useless to arrange someone to come here.

Qin Yuan led the team out of the restaurant, and when he passed by the staff member, he smiled.

"Mr. Qin, do you have any questions? We have hired a professional teacher here, so you can..."

Before he finished speaking, Qin Yuan interrupted, "We don't need it."

The person in charge nodded politely, and then waited for them to walk out, looking at him with contempt on his face. He wanted to see if this guy could translate it. Although the language in their country is not so common, it is still quite Difficult, there is no local translation of many technical terms, how could he understand.

This guy turned his head and changed another face, and walked over to the American with a smile, "Is there anything unclear, everyone? You can contact me as soon as possible."

This guy can say that he has achieved the ultimate in the word licking the dog. He has prepared a complete English translation for them, and he is afraid that they may not understand some words, so he is waiting by the side.

People from the other two countries have no choice but to apply to send teachers over to ask them for advice. It can be said that this wave of dismounts has been very generous.

Because there is really no way for such a small language, and all this stuff involves technical terms, even if there is someone who understands the local language, there is no way to fully translate it.

People from country A shook their heads helplessly. This thing is really too difficult. The captain of the team felt dizzy when he saw the densely packed text. He knew a little bit of language in country C, but the professional knowledge involved There were too many numbers, and he couldn't handle them all.

"I don't know how those Yan people did it. They should have the same documents as us, but he is very relaxed. This is very strange. There are too many literary terms in it, and we can't figure it out at all."

Chapter 1506: mutual understanding

"Then leave them alone, we don't have much time left now, and the academic discussion meeting will start tomorrow, we must quickly familiarize ourselves with the materials."

Country A raised his hand to signal for the professionals over there to come over. The professionals were full of pride, walked over with a haughty expression, and began to guide them.

Although I feel a little uncomfortable in my heart, there is nothing I can do now, after all, I have to count on others.

But Qin Yuan's side was more relaxed. He asked everyone to take out their notebooks as soon as he returned. He read the content on it while asking everyone to take notes seriously.

His translation is too fast, and the content he translated is more detailed than the information, and also implements his own meaning, so that everyone can understand it more deeply.

Wang Wei was full of admiration after hearing this. The more he gets along with Qin Yuan, the more he can discover other abilities in him. He can easily translate like this.

The Americans are ready to see a joke, because the material in front of them needs to be studied carefully in many aspects of professional processing even when it is translated into English, let alone the things that have not been translated.

No one gave them a warning before, this time the Americans have to seize this opportunity, they have to see how these guys participate in the academic seminar the next morning.

Soon the academic seminar began, and everyone followed the order of the person in charge. He didn't know if it was intentional or just a coincidence. He arranged Yan Guo's in the front row, which attracts everyone's attention.

The Americans sat in the back, and several people stared at Qin Yuan with jokes all over their faces. They thought how could it be possible to translate so much information in just one night, and the content in it was very profound.

Moreover, the speeches of the academic seminars also came in the order of the seats. Qin Yuan and the others sat first, and they were the first to speak.

Qin Yuan was very confident. He didn't even take the materials in his hand, and most of them walked onto the stage. This scene was ridiculed by the people below. An American in front said very disdainfully:

"Hey, I think you are so nervous that you forgot all the information! Relax, everyone is a scientific research talent, there is no need to be so nervous."

"James, it's wrong for you to say this. We need to understand each other. Maybe they haven't seen such a big scene."

This blatant ridicule caused everyone to laugh, Qin Yuan didn't pay attention at all, "What? Does each of you still need to explain it with the materials? How can it be said that it is my own understanding? In my opinion, that is nothing more than Just read it, do you really understand it?"

When Qin Yuan said this, the people below couldn't help laughing. What does this guy mean?

Immediately afterwards, he stood on the stage and started his explanation. He didn't take any materials, but explained the contents of the materials one by one according to his own thinking, and pointed out the key to the problem.

Just like this material mainly explains the conversion and utilization of core elements, most of what is said in that material is slobber and has no effect. Qin Yuan knows that it is impossible for people from country C to write such important material directly. .

Instead, he explained his understanding more deeply. The researcher from Country C sitting below couldn't sit still. How did this guy know? And it's more transparent than they understand.

Chapter 1507: didn't figure it out

After Qin Yuan finished explaining, the whole venue was very quiet. Immediately after, warm applause broke out, and the researchers from country C took the lead in standing up and applauding. They did not expect Qin Yuan to be able to achieve such a level of transparency by relying on his own understanding.

The former person in charge originally wanted to wait and see a good show, but he didn't expect that he was even more powerful than he imagined, which made him feel that he was a bit out of place.

The few Americans didn't care. At this moment, Qin Yuan didn't intend to let them go. Qin Yuan had already given a very wonderful explanation just now, and now it's their turn.

"By the way, these American researchers, right? Just now I saw that you were very excited and enthusiastic about my speech on stage. Now that I have finished speaking, let's see your performance next."

A few Americans looked at me, and I looked at you. In the end, they had no choice but to stand up.

It was only one night, and it was impossible for them to remember so much content in the materials. The captain of the United States hesitated again and again, but still took the materials and walked onto the stage.

"Wait a minute, what you said just now is very powerful, why do you still need to hold the materials when you are speaking on stage?"

Qin Yuan didn't miss this opportunity. Usually he doesn't provoke others, but just now these guys have been challenging his bottom line.

"Because these are the notes we have recorded, we have no time to write down many things, so we need to go up together with the manuscript."

It makes sense to say so, Qin Yuan sat down and knocked on Erlang's legs, watching the show.

The captain of the American country was already very anxious on stage, saying that the notes they sorted out were actually not there at all, and they had no understanding at all. They just took a rough look at the contents of the materials yesterday.

After talking for a long time, Qin Yuan couldn't take it anymore and stood up to interrupt him.

"If that's the case, then it's too boring. There's no need to keep following the book. We all know the content of the information now. Are you here to read it to us?"

"you!"

The captain held back for a long time and didn't know what to say, because now he was watching everyone's attention, his palms were already sweating, what Qin Yuan said was indeed true, and they didn't figure it out.

Fortunately, the person in charge next to him came out to smooth things over quickly. He didn't want everyone to cause trouble, and since he was from the United States, he didn't want to cause problems in his own territory.

"Everyone is a rare research talent. After all, this time is different, and everyone's understanding is also different. We have distributed the materials this time, and we hope that everyone can familiarize themselves with it."

Wang Wei looked at them very disdainfully. These guys really have two faces. It was clearly stated that today is a seminar. Everyone should be familiar with the materials, and then conduct research and discussion. Now it has become just familiarity.

Just imagine, if they couldn't speak out, then today's result would not be the same. None of these people would speak for them, instead they would make things worse.

Still have to follow what Qin Yuan said, they have to use their strength to speak, and now Qin Yuan has used his strength to witness everything.

With Qin Yuan's wonderful speech just now, it is a joke that the captain of the country of Mi is on it now, he hesitated and couldn't speak, and was stopped soon.

Chapter 1508: enter the base

The captain of Mi Country blushed when he came down, he looked in Qin Yuan's direction, wondering what the \*\*\*\* this guy was doing.

Unexpectedly, they not only translated it, but also wrote down all the content, and understood it according to their own ideas, which was indeed beyond their imagination.

In order to avoid other embarrassing situations, the person in charge also made adjustments as soon as possible. It was expected that people from every country would come up to speak, but according to this situation, it is estimated that only Qin Yuan and the others fully understood.

Moreover, Qin Yuan has already stated all the important points, so there is really no need for others to come up again.

They started to lead the car. The whole venue was explained by the scientific research personnel of country C. The new technology they developed this time is mainly to convert the core elements.

This is mainly aimed at the transformation of the core elements inside the space station, and it is also a very important step. Everyone is conducting academic discussions.

The Americans have been in contact with these relatively early. Although they are not familiar with this latest core conversion technology now, they are familiar with the previous solutions.

The captain of the United States seized the opportunity. He felt that this was the real opportunity to prove himself. He couldn't always lose face. He stood up and spoke quickly.

Listening to the speeches of the American people, Wang Wei was very disdainful. This was something they had ten years ago, and they still show it off now.

Before that, he had studied things at the base in the United States for three years. They started doing these things in those years, and they are still these things now. They are all old-fashioned solutions, and they will never be changed.

Even though it was these old-fashioned plans, there were still many people who cheered after they said it, especially the person in charge of country C took the lead in praising it.

"I really didn't expect this to be a wonderful speech, allowing us to learn about the previous technology earlier. You, the United States, are also leaders, and we should learn a lot from you."

"Everyone is learning together. Although we are leaders, we also hope that everyone will innovate more."

The captain of the U.S. has finally found his home court. He is proud of himself at the moment. Although he has lost face before, they are still relatively strong in some aspects.

This guy, if someone compliments him casually, he really takes it seriously. I don't even know what the latest understanding is, so I still put it here.

How could Qin Yuan miss this opportunity?

"Wait, I have a question!"

Qin Yuan stood up with his hands raised, and the captain of the country of Mi turned dark when he saw that it was Qingyuan again. He couldn't hide from this guy anywhere today.

"Okay, if you have any questions, you can ask them at any time."

"This is not a question, but the things you just said were many years ago. To be honest, everyone doesn't use this technology anymore. Let's take the core conversion mentioned today as an example. It has been updated. It has been several generations, and some old things should be thrown away."

Qin Yuan directly threw the problem to the American side, so that they had no chance to go down, which meant to let them stop talking about the old things.

The Mi Country was speechless one after another. This Qin Yuan had really met him. There was no other way. In the end, he could only swallow his breath silently.

The person in charge came out to smooth things over again, but fortunately he told another news, Qin Yuan was not interested in what he said before, these things were too one-sided.

Chapter 1509: deliberately pretend not to understand

Tomorrow they will go to the research base in country C to have a look at their core technology. Although they can get close to it, what they see is superficial.

This is a good opportunity for Qin Yuan, and he will be able to get access to the chip. As long as the location of the chip is confirmed, he will definitely find a way to get it back.

The rest of the team didn't realize it at all, and they were still discussing the technology in the morning. For them, these things were quite novel. Qin Yuan had already understood them thoroughly, thanks to the book in the system .

Qin Yuan stayed in the room. Suddenly, the detector in his bag responded, and he turned over and sat up. What's going on? Had a chip been found near where they lived?

He checked around with the detector, and the detector was constantly flashing bright light.

At this moment, there was a knock on the door, and it was Li Xiaoman who asked him to go down for dinner.

"Captain Qin, we can go down to eat."

"It's okay, you go down first, I still have something to do here, I'll come down later."

Qin Yuan is now focused on the chip, and Li Xiaoman didn't bother him much, but at this moment the detector suddenly turned off, so he hurried to the window, and even after several attempts, there was no response.

What's the situation? He slapped the detector a few times, but nothing went wrong.

After tinkering for a long time, he couldn't figure out what the problem was, so he had to wait until tomorrow to check it out. He still carried the detector with him when he went out, just in case, and he always carried it with him at any time. If there was any reaction, Take it out and check it out.

On the other side, Li Xiaoman was still helping Qin Yuan with cooking. Wang Wei and the others went to find a table first, because not only they were eating in this restaurant, but also some other staff members.

At this time, they found an empty table in front of them, just as they were about to sit down, they found some oil stains on the empty table, and they didn't know who was stupid on it.

We had to change tables first, Wang Wei first found an empty table and waved to everyone, but before their people came, a few Americans came over.

These few people were very domineering, and they put the dinner plate on the table without saying a word.

"What are you doing? Didn't you see that we came to this table first?"

"What? I don't understand what you're saying."

Several people began to deliberately pretend not to understand. Wang Wei kept telling them to leave this place, obviously he came here first.

"I don't understand what you're talking about. This table is already empty. Let's sit when we come! It's not your thing, everyone can sit wherever you want."

"I think these yellow-skinned monkeys don't understand the rules. After all, they are in the deep mountains and old forests, and they are used to coming to this civilized place, so they don't understand."

Everyone laughed loudly when they heard this, and even the staff next to them couldn't help laughing. Seeing this situation, no one came out to dissuade them.

Wang Wei is not a vegetarian either, and has been swallowing their anger with them. These guys are really bullying. He walked over and pushed the American people's dinner plate aside.

"Here we are first!"

A team member next to him quit directly, he stood up and poured the bowl of soup directly on Wang Wei's feet.

"What kind of thing are you barking here? Let me tell you, I can sit anywhere I want."

Chapter 1510: Do you think I'm afraid of you?

Seeing this scene, Wang Wei rushed forward and grabbed the man by the collar, and the two clashed like this, and the people next to him also hurried over to try to persuade them to fight.

After all, they are all scientific researchers, but the American is tall, a head taller than Wang Wei, and Wang Wei is thrown aside by him like a chicken.

Li Xiaoman hurried forward, "Are you all right? How are you doing?"

"It's okay, it's just these \*\*\*\*\* who are really bullying people."

The person in charge next to him just had an expression of watching the fun, pretending to persuade him to fight, but in fact he didn't take any substantive actions at all, it was obvious that he was just watching the fun.

In addition, they didn't want to offend the American people. At this time, a loud voice sounded from the stairs, and everyone turned their heads to see Qin Yuan walking down slowly.

"Stop it all!"

The aura from Qin Yuan's body slowly radiated out, and the men next to him were stunned. Looking at Qin Yuan's eyes, he instantly became very scared, and he didn't know why those eyes seemed to see through his soul.

"The man who gave you the courage to hit me here."

The man became stuttering for a moment, and his aura just now weakened a lot in an instant, "No...yes, he did it first."

Wang Wei hurriedly explained to the side that this group of guys would really bite back, but he didn't do anything, this \*\*\*\* is too bullying.

Qin Yuan walked over and stretched out his hand to pat the American man on the shoulder. It seemed like an easy move, but the American man felt a pain in his shoulder instantly and fell to the ground.

The person in charge also hurried over at this time. When the Yan people were being bullied just now, this guy didn't show up. Now seeing that the Americans had the upper hand, he ran out instead.

"Everyone, let's discuss everything carefully. After all, everyone is a rare scientific research talent. Don't do anything because of this matter."

Qin Yuan snorted coldly, ignored him at all, and walked in front of the American man just now.

"It's you who spilled the soup on my people's feet, didn't you? Wipe it all off now."

what! Did you hear me right? And Qin Yuan didn't seem to grab him jokingly at all, so he brought him in front of Wang Wei and asked him to wipe off all the soup on his feet immediately.

Although the man was afraid, he still clenched his fists and looked at Qin Yuan with red eyes, "I don't know what trick you used just now, but do you think I will be afraid of you?"

Qin Yuan lowered his head and looked into his eyes. The man lost his moment of mechanical crawling in front of Wang Wei, and then wiped his shoes with his sleeve.

Wang Wei was stunned, what's going on? Qin Yuan signaled him not to move, let this guy clean up.

Several team members on the American side were stunned, and hurried forward to pull him, telling him not to lose face here, this is completely embarrassing behavior.

But the man in front of him couldn't hold his body out of control at all, so he pushed the few people who came to pull him back very vigorously, just to wipe the shoes clean.

"Don't move. He wiped it voluntarily. I didn't say anything. Besides, whoever splashed it is the worst."

Several people couldn't figure out what was going on. After the man finished inserting his shoes, he slowly stood up and his eyes gradually recovered.

Their captain looked at the man in front of him very angrily
