

Special Soldier 151

Chapter 151: Generous rewards

At this time, the people from the Fusang Club saw that no one seemed to catch up from behind, which was a sigh of relief.

But after slowly coming back to God, a man with a gray-headed face and the appearance of a leader took off the kerchief on his face, took out the phone directly, and dialed a phone call and shouted:

"Father! Didn't you say that all the masters of the Jacobite army were killed by you? Why is there anyone else doing it on us!"

Sakata Ichiro was about to vomit blood at this time. Thinking of the attack just now, he was still shaking with fear.

Know that as one of Fusosha's guardians, even Kameda Saga, who is weaker, can easily escape the resistance of ordinary snipers.

For example, the female sniper just killed three minions.

But just when they wanted to find a sniper and plan to fight back, they saw with their own eyes that, as the strongest master among their four great guardians, Fujiyama Ryuji was directly destroyed by another sniper!

The terrible sniper shot Fujiyama Ryuuji three times in a row.

At that time, Ichiro Sakata was standing next to Fujiyama Ryuuji, watching the desire for survival in Fujiyama Ryuji's eyes, using all his answers, but he still looked like an ordinary person, with no chance to escape. He was shot and killed!

At that time, Ichiro Sakata knew that if the sniper continued to attack, they would never have a chance to survive. This was the reason why they did not have any counterattack and escaped directly.

Thinking back to the terrifying bullet of the blocker, it was as if it were in his own soul, and it was impossible to avoid it.

At this time, the old man on the other side of the phone heard what Ichiro Sakata said, but he showed a playful smile and said with a hint of sarcasm:

"Mr. Bantian, I'm the one who says I've already cleaned up all the masters of the Jacobite army, then there will be no remaining. What's more, even if it's someone I missed, you even have the Jacobite army. I can't beat all the waste, dare to claim to be an elite, do you all look like elites in your organization? Ha ha ha."

Sakata Ichiro heard his father's ridicule, but gritted his teeth and said:

"Father, don't forget now. We are grasshoppers on a rope. If we die, you won't get any benefits. I can only remind you that that terrifying sniper seems to be a Yan Chinese! "

Yan Chinese?

Father also frowned. He thought that the Jacobite Army really hired some master, but now it seems that this is not the case.

Because the people of Yan country rarely become mercenaries, these people have a very terrible obsession in their hearts, even if they are poor, they are unwilling to attack their own country!

But in the end, the old man still laughed and said to the phone:

"What can the people of Yan country do? The people of Yan country are not three-headed and six-armed! Are you so afraid of the people of Yan country, do you dare to target each other like this? Oh, yes, I think of it, it seems that all your previous arrangements in Yan country have been wiped out. , I can understand this!"

"When I meet the Yan Nation blocker, I will help you get his head. It can be regarded as a small gift from me."

The old man finished saying this, and then hung up the phone directly, but in his heart he began to have a slight interest in a Yan Chinese.

At this time, on the other side, Qin Yuan and others directly found a car, and then sent the foreigners in the church to the embassy.

Qin Yuan rushed all the way along the way, and didn't know how many Red Turbans had been killed.

After Qin Yuan's car rushed directly into the embassy, Qin Yuan heard a sound directly in his mind:

"Ding Dong, congratulations to the host for completing the task and saving the potatoes to get a grid!"

"Ding Dong, congratulations on killing 158 Red Scarf at speed and getting three grids!"

"Ding Dong, rescue the diaspora mission, 75 has been completed!"

Hearing this series of prompt tones, Qin Yuan was immediately overjoyed. It seems that the gain this time is really great!

Now I gave Qin Yuan four squares at once, which can be regarded as a relief for Qin Yuan, and as long as Qin Yuan completes the treatment of all these overseas Chinese, he will be able to get two squares!

At this moment, Ambassador Fan of the embassy walked over and said to Qin Yuan with gratitude:

"Thank you so much for saving so many of our compatriots. Without your help, we really don't know how to rescue all of these compatriots. I really want to thank you from the bottom of my heart!"

Having said this, Ambassador Fan directly held Qin Yuan's hand, then put it to Qin Yuan's ear, and said to Qin Yuan:

"I know your identities. You did a great job this time. I will report to your superiors and give you a big reward!"

And Qin Yuan said with a smile when he heard such words:

"Although we are businessmen, we are also compatriots of Yan Nation after all. It is our duty to help our compatriots. There is nothing to be thankful for. Yes, when will the warship arrive? Is there anything we can do now? "

Hearing such words, Ambassador Fan sighed slightly and said to Qin Yuan:

"The battleship will arrive tomorrow morning, but we have a lot of wounded now. The Jacob's military has not given us much help, and there is not enough medicine. I don't know how many people will be able to persist until tomorrow morning."

Hearing this, Qin Yuan was also a little silent After all, they only have 10 people. It is already very difficult to protect these expatriates from reaching the embassy. I want these people to be harmless at all. It's simply a fantasy thing.

What's more, there are still many people from various countries in the embassy who have come to take refuge, and now these people cannot be driven out, so the drug situation is even more stretched.

At this moment, Qin Yuan's mind suddenly rang a voice:

"Ding Dong~ The system will issue tasks, complete the treatment of all patients in the embassy, and get three squares!"

Hearing this task, Qin Yuan sucked in a cold breath. Although there were many three grids, it was not easy to complete this task.

Although it is said that Qin Yuan has eight needles against the sky, if Qin Yuan is treated with the eight needles against the sky one by one for so many wounded, then even if Qin Yuan is exhausted, it will not be done!

Qin Yuan thought for a while and asked Ambassador Fan:

"I don't know in which direction the nearest hospital is."

Hearing Qin Yuan's question, Ambassador Fan did not answer yet, but a female doctor standing aside said to Qin Yuan:

"Don't think about going out to find medicine. Even the nearest hospital is 70 kilometers away from here, and it's still not sure whether it was destroyed by the rebels. You still have to die!"

Chapter 152: World-class surgery

At this time, Qin Yuan frowned when he heard this woman's words. Seeing that Qin Yuan's face was not good-looking, Ambassador Fan quickly said to Qin Yuan:

"This is Dr. Rachel, who has come to the Philippines for charity rescue. She is from the lighthouse country. You should not care about her."

Qin Yuan was also taken aback when he heard this. It turned out that he was not a native of Yan Guo, but he was helping with the treatment in the embassy of Yan Guo, indicating that this person was pretty good. In that case, Qin Yuan didn't plan to worry about him.

Qin Yuan directly asked Master Fan:

"Then is there any other place where you can get medicine?"

But the doctor named Rachel said to Qin Yuan again:

"You think this is in a developed country. There are only three hospitals in this city. The other two hospitals are areas occupied by the resistance army. We have emptied the medicine for the remaining hospital, but it is still not enough."

Having said this, Rachel's face is also a bit heavy. As a doctor, watching so many patients fall in front of him, but cannot be treated because there is no medicine, I have to say it is a big blow.

Hearing such words, everyone was helpless. After all, there was no medicine, and they couldn't directly change it. The battleship would not arrive until tomorrow, and it was not certain whether the medicine on the battleship was enough. Those injured really depend on luck.

At this time, Long Xiaoyun was safe, and the three women glanced at the wounded, and couldn't help directly closing their eyes.

As soldiers, they understand even more that if these wounded are not treated as soon as possible, there are really not many who can survive tomorrow!

At this time, An Ran looked tangled, and whispered to everyone:

"How about we lurking to see that hospital?"

But Long Xiaoyun directly refused:

"No, let's not say that we have other missions. Even if we don't have missions, just a few of us, in the face of so many resistance forces, will definitely suffer damage. Even if there is no loss, we won't necessarily get in. Can bring medicine."

Everyone fell silent this time, Long Xiaoyun was right, this is not the time to brave for a while.

Seeing everyone's heavy eyes, Qin Yuan suddenly thought of something, and then the doctor named Rachel asked:

"I wonder if we have any medicines and medical equipment left, can you take me to see it?"

Qin Yuan thought in his heart that although their medicines are not enough, there will always be some medical equipment, and Qin Yuan has just obtained 4 grids now, and the grids are much stronger than any magical medicine!

The last time Qin Yuan put the silver needles in the grid, he already got eight needles against the sky. If this time, if he put some medical equipment in the grid, I don't know what skills he will give him, maybe he can adapt to the current situation. The situation!

But this female doctor named Rachel glanced at Qin Yuan, but she frowned and said:

"What do you want to do? Are you a doctor? If you are not a doctor, then don't mess with us at this time, we are very busy."

After finishing these words, the doctor turned around and left, but she glanced at the dust and blood on everyone, and said to Qin Yuan and others:

"Although you are fighters, I advise you to clean up your body first. This country is suffering from a plague. If there is an outbreak of the Ramanra virus here, I am afraid that no matter how much medicine we have, it will not help!"

Seeing the unceremonious look of this female doctor, Wang Yanbing just wanted to say something, but Qin Yuan shook his head at the other party.

To be honest, as a doctor, it is a good thing to be serious and responsible for such infectious diseases and sanitary conditions. They are indeed covered with blood and dust.

Qin Yuan said to the players behind him:

"Okay, let's take a shower and change clothes!"

10 minutes later, Qin Yuan had already taken a bath, but instead of going to the doctor, he touched the equipment room directly.

Looking at the table full of medicines and surgical supplies, Qin Yuan was also a bit difficult to choose, and he didn't know what to put in the grid first.

But in the end, he chose a scalpel, which is the most important tool in Western medicine, and it should give him a good skill!

As Qin Yuan received the scalpel into the grid, he heard a sound!

"Ding Dong~The host recovery is successful, please start to choose!"

Qin Yuan's eyes suddenly had three more options, and seeing these three options, Qin Yuan's eyes suddenly brightened!

"1, get world-class surgical treatment!"

"2, get world-class scalpel manufacturing!"

"3, get a world-class scalpel technique!"

Sure enough, surgical treatment has been shown, but when he saw the third option, Qin Yuan was taken aback and asked the system:

"I don't know the difference between this scalpel knife method and the ordinary knife method."

"Ding Dong, answer the host, this is the use of the extremely sharp characteristics of the scalpel, and it is a close-knife technique for killers and assassins!"

Hearing the explanation of the system, Qin Yuan also nodded. There are many assassins and assassins in movies and TV shows who are indeed using scalpels.

However, what Qin Yuan needs most now is surgery, so he no longer hesitates and chooses the first item directly.

"System, I choose item 1!"

"Ding Dong The host selection is successful and world-class surgical treatment is obtained!"

"World-class surgical treatment: Let the host acquire advanced surgical treatment skills and become a world-class surgical master!"

Following the prompt of the system, Qin Yuan suddenly felt that there were many more Western medicine treatments in his mind.

Qin Yuan closed his eyes and carefully recalled the knowledge he had acquired in his mind, and found that these medical treatments were actually very simple, but they required a very good understanding of the human body and a lot of precision.

However, this effort is much less than the eight needles against the sky, and more depends on the patient's self-recovery ability, which is what Qin Yuan can use now!

Qin Yuan was suddenly surprised, and then he found a few scalpels and directly upgraded this skill to the cosmic level.

With the improvement of this skill, Qin Yuan felt that in his mind, not only had more surgical skills, but also a lot of research and insights on the human body.

After all, there is an important subject in Western medicine, that is, anatomy is necessary!

Qin Yuan feels that he has become the person who knows the human body best in the world. He knows where there are blood vessels and where there are joints, all of which are clear. In this way, Qin Yuan's martial arts has also been greatly improved. !

Chapter 153: No problem

Looking at the de-planing information in his mind, Qin Yuan couldn't stop sighing.

I didn't expect such an unexpected gain...

Qin Yuan smiled slightly, then saw another thing, his eyes lit up again!

In addition to a scalpel, it also needs gauze. Qin Yuan directly received a piece of gauze into the grid!

"Ding Dong, please start choosing the host!"

"1, get world-class hemostasis!"

"2, get a world-class bandage protection technique!"

"3, get a world-class tortoiseshell binding!"

Qin Yuan saw this third option, his eyes widened suddenly, what the **** is this?

"Ding Dong, tortoiseshell binding, can slowly improve the patient's recovery ability!"

Hearing the explanation of the system, Qin Yuan smiled with satisfaction. Now that he lacks medicine, this skill is very important to Qin Yuan!

"System I choose item 3!"

Qin Yuan directly chose this tortoiseshell tie. Although there are not many medicines here, there are a lot of gauze devices, and I am not afraid to use too much. Moreover, if I choose this option, it may be used in other futures. local.

Thinking of this, Qin Yuan couldn't help but laugh.

Then Qin Yuan directly raised this tortoise-shell binding ability to the universe level.

Feeling the various knowledge and techniques in his mind, Qin Yuan walked out of the equipment room with confidence. With these two skills, there should be a way to treat those patients now.

Then Qin Yuan directly took the surgical equipment he needed and walked directly into the hall.

In the hall, many patients are crying out in pain. They are all wounded, but without a doctor, they can only endure such pain.

Now all the doctors are treating the seriously wounded, like this kind of less serious ones, naturally they can only be put aside.

An Ran and others are also doing some simple treatments for these people. They can do some bandaging, but they can only simply bandage, and there is no way to perform operations on these people.

At this time, An Ran saw Qin Yuan walking over with a lot of surgical equipment, his eyes lit up, and he asked Qin Yuan:

"Do you have a good idea? The medicine here is really lacking!"

Qin Yuan raised his eyebrows when he heard this, and said to An Ran:

"What can I do, I am not a god, I can make medicine out of thin air!"

But An Ran saw Qin Yuan like this, but felt that Qin Yuan must have a way, and whispered to Qin Yuan:

"You are such a powerful person, if there is any good way, don't hide it."

"That's right, handsome brother, if you can really cure these people, what reward will my sister give you tonight!"

At this time, Anfisa also cast a wink at Qin Yuan.

Hearing this, Qin Yuan shook his head directly. If it is a reward, then I don't know who rewards whom.

But Qin Yuan still said to An Ran:

"Although I can't directly change the medicine, we can use other methods to reduce the consumption of medicine. In this way, we can not treat more patients!"

But An Ran shook his head in disappointment:

"We have paid great attention to the amount of medicine used. If the amount of medicine is reduced, then there will be no therapeutic effect."

"What you said about reducing the use of drugs is the same as what I said? I mean it's better to make the wound area smaller, so that it can not reduce consumption!"

Said this, Qin Yuan patted An Ran on the shoulder, and then walked directly towards a patient.

Seeing Qin Yuan's movements, An Ran showed a strange expression and asked Qin Yuan:

"What do you want to do?"

"Of course I am treating these patients. Don't forget, I am a very good doctor."

Saying this, Qin Yuan blinked at An Ran, but at this time, An Ran suddenly remembered the scene when Qin Yuan treated himself for dysmenorrhea.

Thinking of Qin Yuan's big warm hands, An Ran couldn't help but flushed, but she showed a trace of confidence in Qin Yuan.

Qin Yuan was very good when he was treating that kind of disease, and now there should be a way for this kind of injury!

And Anfisa also had a hint of curiosity. She really didn't know what Qin Yuan should use to treat these people.

Qin Yuan walked directly to Long Xiaoyun's side. Long Xiaoyun was cleaning the wound of a patient at this time, his face was heavy.

There was a big hole in the arm of the patient in front of me. Although it was a penetrating injury and did not leave the bullet on the arm, it had cut off a piece of flesh and blood. It looked ***** and terrifying!

Qin Yuan glanced at the patient and said to Long Xiaoyun:

"It's not a big problem, let me sew it for you, and you will recover soon!"

At this time, the patient's face was forced with a dog's expression. In his case, there is no big problem? Is this guy a barefoot doctor?

Long Xiaoyun looked at Qin Yuan and asked with a hint of suspicion:

"Are you really good? I remember the last time you used that strange stitching method, it seems to consume a lot of you, don't be aggressive!"

Hearing Long Xiaoyun's words of concern, Qin Yuan also smiled and said directly to Long Xiaoyun:

"Just look at it, alright, don't be stunned, come over to clean up! And you two come together!"

Hearing what Qin Yuan said An Ran and Anfisa were also taken aback, but they also came over obediently.

The three women directly cleaned up the three patients. Qin Yuan glanced at the speed of the debridement of the three, but shook his head and said directly to the three people:

"You guys are waiting here now, I'll go and see if there is anyone with a lighter injury over there!"

Hearing Qin Yuan's instructor's words, Anfisa and Long Xiaoyun both frowned slightly. Is this too slow to dislike them?

But when they looked back at Qin Yuan, they were extremely surprised to find that Qin Yuan helped a patient with a leg injury in a few seconds, cleaned up the wound, and then gave this patient a short time. The stitching is completed.

Moreover, the stitched wounds are still very small, which naturally saves a lot of medicine.

After the stitches were completed, Qin Yuan gave the patient a very strange way of dressing.

"I go?"

Anfisa's eyes widened. Even the fastest and best surgeon she had ever met, did not have the speed like Qin Yuan.

Long Xiaoyun just wanted to ask Qin Yuan something, but found that Qin Yuan had already started treatment for the next patient, so he had to hold back the doubts in his heart, and the patient asked:

"what do you think?"

Chapter 154: Rachel

And this patient also looked at Long Xiaoyun blankly, and said dazedly:

"What's the matter, I haven't reacted yet, so he sewed up my wound, but I don't think the wound hurts much! It's warm!"

It's warm and sweet!

Long Xiaoyun couldn't help but want to complain, but looking at the patient's appearance, it really didn't seem to be lying.

Then Long Xiaoyun and Anfisa asked a few more patients and found that these people were extremely satisfied with Qin Yuan's medical skills.

"This little brother's technique is really great, he is the doctor you specially invited!"

"This brother is so powerful, my wounds don't hurt anymore!"

"What's his name? So handsome!"

Hearing what these people said, Long Xiaoyun knew that his worries were wasted again!

And Anran and Anfisa also showed a smile.

The three women looked at each other and then resumed their work.

With Qin Yuan's treatment, the eyes of the three women looking at Qin Yuan became brighter and brighter. The man in front of him was truly incredible, no matter what kind of encounter he was in, he could give others Bring a different surprise!

In this short period of time, Qin Yuan has cured more than 90 patients, and even the speed of debridement of the three women is no better than Qin Yuan's treatment alone.

At this time in the operating room, a little nurse said to Rachel:

"Doctor Rachel, you should take a break, you are already undergoing the fifth operation."

Rachel gently wiped the sweat on her forehead, but also felt that she was a little dizzy and had reached the limit.

If you continue to do it, I am afraid that mistakes will occur. She also nodded and walked directly out of the operating room, wanting to breathe the air outside.

But at this moment, Rachel saw the bandaged patients outside. Not only did she not have any smiles on her face, but she showed an extremely serious expression, and directly shouted:

"Who treated these patients? Don't you know if we don't have medicine now!"

At this time, Qin Yuan, who was squatting on the side, quickly completed the stitching of a patient, stood up, and said to Rachel:

"I did it. Is there anything wrong?"

"What's wrong, do you know that we don't have any medicines at all now. I want to save these medicines for the critically ill patients. Although these patients have injuries, if those critically ill patients are not treated with drugs, then Even my life is gone!"

As a doctor's criterion, it is to save lives first, then treat illnesses. Rachel had already announced this news before, and everyone in the field had already agreed. Now that they heard Rachel's words, everyone bowed their heads.

Qin Yuan shook his head, glanced at his task progress bar, and found that the treatment task had been completed 90, so he swayed his neck and said to Rachel:

"What are you in a hurry? I didn't take any extra medicines. The medicines I used were all assigned to these patients with minor injuries!"

what?

Hearing this, Rachel was shocked immediately. The drugs she allocated to these patients with minor injuries were just enough for these patients to barely deteriorate, but only accounted for 30 of the total drugs!

This kid can use limited drugs to cure all patients with these drugs?

"You are simply killing people, do you know? If you don't have enough medicine, even if you sew the wounds of these patients, they will still become inflamed and necrotic, but it will aggravate their condition. You are simply harming them. people!"

At this time, Rachel's angry hair was about to stand up, and he yelled at Qin Yuan. At this time, An Ran on the side saw Rachel's appearance, and quickly explained:

"It's not like that, Qin Yuan's treatment is..."

"Shut up, you are soldiers and not doctors. Don't make any comments in your non-professional fields!"

Rachel yelled at An Ran again, and Qin Yuan frowned directly when he heard such words.

Although Rachel is also a very beautiful woman, this is not the reason for her bullying!

"Hey, do you have the guts to make a bet with me? You can open the wounds of these patients and see if they find any damage. If not, you have to apologize to me, and to them! "

Qin Yuan said with a sneer on his face.

Seeing Qin Yuan's arrogant face, Rachel was also full of anger, and said to Qin Yuan:

"What if you lose?"

"If I lose, then I will help you find enough medicine no matter what price it will cost. Even if it kills the entire Philippine continent, I will take the medicine I used and help you make up for it. kind?"

Qin Yuan said with a chuckle, and when Rachel saw this guy's annoying look, she gritted her teeth and directly agreed:

"You said this, not what I forced you!"

Rachel was originally a headache for not having enough medicine. Now that some people are willing to risk their lives to look for medicine outside, she naturally cannot ask for it!

Seeing Rachel's look, Qin Yuan's face showed a sneer. The system product must be a boutique product. Not only does the wound of these people do not become inflamed, but even the basic pain is reduced a lot. He won this time deal!

Qin Yuan directly untied a patient's gauze, and said to Rachel:

"This patient is my first treatment, , you can open his wound to see if there is any inflammation!"

Rachel saw Qin Yuan's self-confident look, but snorted coldly and directly found another patient.

She glanced at Qin Yuan's bandaging methods, and she frowned:

"Why are you bandaging the wound like this?"

Qin Yuan cast a glance, realizing that it was his tortoise-shell binding method, and shook his head and said:

"This bandaging technique can speed up wound healing! Do you want to learn? If you want to learn, I can teach you!"

"Nonsense! What bandaging technique can heal the wound!"

Rachel snorted coldly. She just thought it was Qin Yuan's bad taste, and then she untied the patient's gauze and checked his wound.

But when she saw the wound, Rachel was surprised, because the stitches of this wound were so beautiful and the stitches were fine, it was like a perfect work of art!

However, Rachel used a pair of scissors to cut the thin thread on the wound. After looking inside, he found that Qin Yuan not only sewed the skin, but even the muscles and blood vessels inside. !

"Is this tang stitching?"

Rachel was really shocked at this time, and couldn't stop screaming!

Chapter 155: Want to learn?

Tang suture is a special technique specially used for hand surgery!

This technique can only be done under a professional microscope, which can greatly preserve the muscle activity of the hand.

Not only that, this time the stitching is so beautiful and neat, if it is placed internationally, I am afraid it will be awarded!

But this kind of high-level surgery that requires a lot of preparation and is not necessarily able to complete, Qin Yuan is in this hall, directly completing this kind of suture with the naked eye, how is this possible? !

Rachel feels that her three views have been impacted. She feels that all her medical skills have been learned for nothing for so many years!

Maybe this is just an exception!

Rachel carefully comforted herself in her heart at this time, and then quickly uncovered the gauze of another patient.

But she was extremely surprised to find that the same technique, the same stitches, the same amount of bleeding, and the same meticulous wounds!

The cold sweat on Rachel's forehead was all coming down. She was not afraid to apologize to Qin Yuan, but she was really shocked!

To complete this kind of operation in such a short time, is this really something a person can do?

And Rachel also discovered that although the wounds of these patients did not reach a sterile environment, they did not have any signs of purulent inflammation, and most of them had begun to heal!

Recalling the smile on Qin Yuan's face before, Rachel had to admit that it seemed that the weird bandage technique really promoted the patients, because the patients who were bandaged by Qin Yuan were very big. Some of them can no longer feel the pain caused by the operation!

"This is impossible, this is impossible!"

Rachel murmured, and then she looked at Qin Yuan's eyes, as if she was looking at a prehistoric monster!

Seeing Rachel's reaction, Qin Yuan smiled:

"What's impossible? You just said that this is tang therapy. Doctors like you should have seen tang therapy. As long as it is more detailed, you can always do it!"

But Rachel wants to roar, be more careful, is this just a more detailed question?

Qin Yuan's operation is almost like a graduate student returning to elementary school and doing elementary school test questions. Although the results are the same, can the process be the same?

At this time, He Chenguang, Wang Yanbing and others laughed at Rachel's demented face.

They just love to see these people who don't know Qin Yuan, they are shocked by what Qin Yuan has done, and they have forgotten that they had exactly the same expression when they first saw Qin Yuan!

"Haha, what do you think other people can't do, our boss can't do it?"

"That's right! Our captain is omnipotent from heaven to earth, can a little woman like you understand?"

"Aren't you arrogant before, now even your best medical skills are better than our captain, do you still have the face to talk?"

At this time, Rachel heard the ridicule of those people, her face was green and white, and then she remembered Qin Yuan's words, and also said to Qin Yuan from Nono:

"I wonder if you can teach me?"

Senior doctors like Qin Yuan are too rare, and Rachel doesn't want to waste this opportunity.

"Please, Miss Rachel, don't forget our bet just now. You haven't apologized to me yet, you want me to teach you?"

Qin Yuan looked at Rachel with a playful look, with a smile on his mouth.

And Rachel heard what Qin Yuan said, but did not have any doubts, bowed at 90 degrees, lowered her head towards Qin Yuan, and said sincerely:

"I'm really sorry, I didn't know Tarzan, I misunderstood you, and you three ladies. I sincerely apologize to you for my previous actions!"

After finishing these words, Rachel looked at Qin Yuan hopefully, as if asking: Can you teach me now?

Qin Yuan was also taken aback by the directness of the female doctor, but after reacting, he had a better impression of the female doctor.

It is estimated that the more such a pure person is, the more he understands what he should do. Qin Yuan smiled and said to Rachel:

"This technique can't be learned in a day or two, but you can follow me and take a closer look at my method of treating wounds. As for whether you can learn it, it depends on your own ability!"

Hearing this, Rachel couldn't help nodding. She knew that a doctor of Qin Yuan's level would be very good to be able to do this step!

Qin Yuan glanced at the progress of the task, then asked Rachel:

"How many critically ill patients are still there, can I go take a look?"

"Of course it couldn't be better. Many of our doctors are already very tired. If you can help us, it will be like sending charcoal in the snow!"

Seeing Qin Yuan's medical skills, Rachel naturally recognized Qin Yuan a lot, and soon led Qin Yuan into the ward where the critically ill patient was.

Leng Feng, Long Xiaoyun and others also followed because of curiosity.

It's just the scene inside, but it's like hell, so permeating!

There are people who have their thighs broken by bombs, people who have all their bones broken, and people who have been hit by bullets.

These people are groaning in pain all the time. and the patients who are able to groan are lucky. After all, most of those who did not have a voice did not survive and died directly on the bed. !

At this time, looking at these patients, Leng Feng and others' moods were also depressed. Although they were all fighters, seeing these civilians suffered such a blow, it was very uncomfortable in their hearts.

"It's all the **** Red Scarf!"

"That is, how can they attack ordinary civilians?"

"It's like a horror!"

Only hearing such words, Qin Yuan shook his head and said to the comrades behind him:

"It is not the rebels who are really hateful, but the people behind these rebels who make trouble! It's like the Fusang Club! They just want to use the war to take away everything we have here!"

"Think about it, this war is still here. If this war takes place within the territory, it would be terrible. So this time, we must uproot all these **** one by one and let them know Our reputation will tremble when we hear our voice! Let them never dare to have any ambitions against us again!"

Hearing Qin Yuan's words, the breathing of Leng Feng and others suddenly stopped, and then their eyes became resolute.

Chapter 155: Dr. Chen

Qin Yuan is right, if such a war should happen in the territory, they simply can't imagine!

Thinking about the serious consequences, Li Erniu suddenly said with a murderous look:

"Kill all those people!"

"Kill all!"

"Uprooted!"

Seeing the murderous look of these people, Qin Yuan also showed a slight smile, and his military spirit was available!

.....

I don't know how long it took, Qin Yuan shook himself, his head a little heavy, he heard the system prompt, and he was immediately happy:

"Ding Dong, the host completes the task and gets three grids!"

It took Qin Yuan more time to treat these critically ill patients.

One after another, Qin Yuan didn't know how many operations he had done!

But fortunately, everyone was saved.

At this time, Rachel looked at Qin Yuan's eyes as if she was looking at a god, she couldn't believe everything she saw.

The man in front of him is so terrible, no matter what symptoms the patient is, he can quickly analyze the cause, and give a treatment plan, the speed of surgery is faster than human imagination.

Various inscrutable surgical techniques, just like a large-scale show!

"Okay, you should go to rest as soon as possible. After such a long operation, you have worked hard."

Qin Yuan has always been from day to night, Rachel has always followed Qin Yuan's side, acting as Qin Yuan's assistant, and with the speed of Qin Yuan's surgery, Rachel is exhausted today!

"You are the real hardship. You have cured all the critically ill patients. I sincerely thank you for these patients!"

Saying this, Rachel bowed to Qin Yuan again, but this time she didn't have any utilitarianism. She truly felt that Qin Yuan was an extremely great person!

At this time, Long Xiaoyun and others also looked at Qin Yuan with admiration. Healing patients and saving people was originally a profession that was very easy to make people feel good about. On the operating table, Qin Yuan was calm, serious, and strategizing, just like Like a god!

Qin Yuan looked at the worshiping eyes of these people, and he was secretly refreshed. He smiled, pointed directly at the people who were having the bonfire party, and said softly:

"Okay, let's go relax now!"

Said these words, Qin Yuan went directly to the crowd and began to twist his body!

And Leng Feng and others have already joined these people, seeing Qin Yuan's movements, and even twisting with Qin Yuan!

While twisting and twisting, Qin Yuan was surrounded by four women, and then entered the room.

Early the next morning, Qin Yuan came out of the room refreshed.

Although nothing happened last night, it was just that these women took turns to give Qin Yuan a massage in order to treat Qin Yuan, but Qin Yuan was already very satisfied.

The warship has almost arrived, so as long as Qin Yuan transports these overseas Chinese to the warship safely, he must leave here. Their mission has not yet been completed.

At the port, Ambassador Fan arranged for the overseas Chinese to board the ship in an orderly manner, but it didn't take long for Ambassador Fan to quarrel with Captain Ding!

"We can't give up Dr. Chen. Dr. Chen is a very important person. If he died here, our loss would be great."

"We currently have no way to directly enter the territory of other countries. We can only rely on internationally allocated aircraft for rescue!"

"That's impossible. These people are so frantic. Do you know what they can do? What is the status of Dr. Chen? You don't know!"

While the two people were arguing at this time, they looked directly at Qin Yuan who was standing on the side, with a hint of hope in their eyes.

Qin Yuan had already heard what they were talking about. They were because of Dr. Chen and some overseas Chinese.

Now Dr. Chen is in a hospital 50 kilometers away, and in a Chinese-owned factory 80 kilometers away, dozens of overseas Chinese have not been evacuated!

Captain Ding walked directly in front of Qin Yuan and paid a military salute to Qin Yuan:

"Mr. Qin, I know you have other tasks, but the situation is really urgent this time, I don't know if you can help us!"

Qin Yuan naturally understood the difficulties of these navies. They were not qualified to enter the Philippines. Only anonymous people like them could directly enter the Philippines. So he stood up and said to Captain Ding:

"Captain Ding, businessmen like us, can go to rescue Dr. Chen and the overseas Chinese in the Chinese-owned factories."

Captain Ding also knew Qin Yuan's identity. Hearing this, he also nodded to Qin Yuan, showing a wry smile:

"I know this is a bit difficult, but we really don't have any good solutions. You can only rely on you for all this. Please be sure to protect the safety of Dr. Chen and the overseas Chinese!"

Speaking these words, Captain Ding saluted Qin Yuan again!

Captain Ding is not Qin Yuan's direct boss after all. This time Qin Yuan has other tasks. If Qin Yuan refuses, he cannot force Qin Yuan to do such a thing.

"It's just a turn around, nothing!"

Qin Yuan's task of rescuing the overseas Chinese has not been completed, so naturally he will not give up those people easily.

At this moment, Qin Yuan's mind also had a sound.

"Ding Dong~ Protect Dr. Chen's safety, unlock a grid!"

Hearing the missions that the system had already released Qin Yuan stopped saying anything, and directly saluted Ambassador Fan and Captain Ding, then greeted his team members and drove away!

Just when Qin Yuan wanted to leave, Ambassador Fan suddenly grabbed Qin Yuan and reminded Qin Yuan:

"You must be careful about this action. I have received news. It seems that it is not only our group who are looking for Dr. Chen, but other people are eyeing the research results in Dr. Chen's hands. So this time, there may be For other dangers, please pay attention to safety!"

Ambassador Fan said to Qin Yuan solemnly, this time the task is considered to be imposed on Qin Yuan, if something happens to Qin Yuan and others, even if they are not responsible, they will feel sorry for it!

Hearing this, Qin Yuan's eyes were also directly narrowed, but he clearly remembered that the old folks were also looking for Doctor Chen!

"Don't worry, I will definitely bring Dr. Chen back safely!"

After saying this, Qin Yuan directly said loudly:

"set off!"

At this time, looking at the back of Qin Yuan and others set off, Ambassador Fan and Captain Ding both exclaimed:

"Fortunately, our country still has such soldiers, otherwise I really don't know what to do this time."

"Now, we can only pray for them!"

Chapter 157: antibody

On Qin Yuan's side, two jeeps were advancing quickly.

"Drive faster, now there is another group of people looking for Dr. Chen, we must find Dr. Chen before that group!"

With Qin Yuan's order, the speed of the jeep was one minute faster, and the distance of 50 kilometers arrived in no time. Soon, the two jeeps directly entered a small city.

It is a small city rather than a refugee camp. There are not even any decent houses around. Most of them are tents. Only a few of them still have tin huts. They look very poor and backward.

Qin Yuan observed the bodies of the surrounding residents and found that some vesicles appeared on their bodies. He reminded the team members:

"Everyone must be careful. This place seems to be infected with the Ramanra virus. You must not be injured. After being injured, you must keep your distance from these people. This virus is very scary. In case of infection, it is not so easy. for treatment!"

Hearing this, everyone's heart sank, but at this moment, Long Xiaoyun, who was driving, saw a child suddenly appeared in front of him. He was shocked and slammed the steering wheel, reluctantly. Escaped this kid!

But the jeep hit a tent directly, rolled over and fell into a large pit next to it.

Leng Feng and others who followed also quickly stopped the car, hurriedly found Qin Yuan and others' jeep, and said to them:

"Master, Captain, are you all right!"

But at this moment, Li Erniu who followed behind said with a hint of horror:

"Corps...corpse!"

At this time, everyone was a little horrified to discover that this huge pit was filled with various corpses, all of which were covered with vesicles. It was obvious that this was a poison pit dedicated to handling dead bodies!

Qin Yuan directly kicked the door open and glanced at the surrounding environment. This was a reminder to Long Xiaoyun and others:

"Everyone, come out quickly. These corpses should have been infected with the virus. Has anyone been injured?"

"I am not injured!"

"I was not injured either!"

An Ran and Anfisa both answered, but Qin Yuan didn't hear Long Xiaoyun's voice and quickly looked at each other.

"I have a little wound!"

At this time, Long Xiaoyun said in a deep voice, it was Long Xiaoyun who suddenly overturned the car.

Seeing this situation, Qin Yuan hurriedly unfastened the seat belt on Long Xiaoyun and gently pulled Long Xiaoyun out of the car:

"Attention! You must never touch these corpses!"

Long Xiaoyun also knew the seriousness of the matter, nodded to Qin Yuan, and carefully climbed out of the car.

But at this moment, Qin Yuan heard a prompt sound in his mind:

"Ding Dong, a powerful virus invasion has been detected, and the world-class virus resistance has been launched. The host is immune to this virus invasion!"

Hearing the system's prompt, Qin Yuan's eyes suddenly brightened. He had thought that this virus resistance ability would work, but he didn't expect to use it so soon.

But at this moment, An Ran suddenly let out a scream, and Qin Yuan glanced around and found a dead body's hand, suddenly grabbing An Ran's ankle!

An Ran screamed in shock, and stepped on the man's arm with one foot, and immediately kicked the man's arm off!

He Chenguang squatted down and checked, and said to Qin Yuan:

"This person is actually dead, just now it was just a flashback!"

But Qin Yuan's face was very ugly. He looked down at An Ran's ankle and found that a small wound had appeared on An Ran's ankle.

Qin Yuan asked An Ran nervously:

"Do you feel nauseous, vomiting, or chills all over?"

An Ran saw the wound on his foot and heard Qin Yuan's extremely concerned words, but only shook his head.

She has just contracted the virus now, of course there will be nothing unusual.

Qin Yuan's face was very ugly. He didn't touch the corpses much just now, but he heard the system's prompt sound, which proved that his team members were probably suffering from the Ramanra virus!

And Enron in front of him was 100% infected with the Ramanra virus!

Although Qin Yuan possesses the ability of eight stitches against the sky, this stitch technique can only save an emergency. If it were performed on everyone, I am afraid that Qin Yuan would also be abolished!

And even if Qin Yuan cured the infection, he would not develop antibodies to this virus.

The best way is to find Dr. Chen and see if the other party has a vaccine!

"Everyone quickly get the car out. We set off immediately. Dr. Chen must be rescued. There may be a vaccine in his hand."

After hearing Qin Yuan's words, Leng Feng's people also knew how urgent the situation was, and quickly pushed the car out of the dead.

At this moment, Qin Yuan saw a piece of flesh and blood still stained on the tire, and kicked it off with disgust.

But looking at this piece of flesh and blood, Qin Yuan suddenly had an idea:

I don't know if you receive this thing in the grid, will it surprise you?

Just do what he said, Qin Yuan took advantage of Leng Feng and others not paying attention, and put the thing away. At this time, the system directly sounded a prompt tone:

"1. Get world-class low-quality protein!"

"2, get the stock solution of Ramanra virus!"

"3, get Ramanra virus antibodies!"

Seeing these three options, Qin Yuan's eyes suddenly brightened!

It seems that the system also thinks that this piece of meat has no effect, so it didn't provide Qin Yuan with any skills, but instead brushed out the most important thing!

That is the Ramanra virus antibody!

Qin Yuan's heart was overjoyed and he chose the third option directly!

"System, I choose the third item!"

"Ding Dong~ The host selection is successful and Ramanra virus antibodies are obtained!"

Then Qin Yuan directly saw that there were two more things like capsules in his grid . After taking them out, Qin Yuan found that the capsule was very strange, like a crystal. Like honey.

It seems that this is the so-called Ramanra virus antibody!

Qin Yuan nodded slightly. Since this method worked, Qin Yuan did not hesitate to return to the side of the corpses, quietly taking out a few pieces of flesh and blood from them, and placing them in the grid.

And with a soft noise, there were a few more yellow capsules in Qin Yuan's grid!

Qin Yuan took out the capsule directly and said to everyone:

"If you eat this thing, you should have a certain resistance to the virus!"

Chapter 158: Hopeless?

After hearing Qin Yuan's words, everyone didn't hesitate, took the yellow capsule and ate it directly.

Although they don't know how this capsule came, they knew that Qin Yuan would not harm them!

But Qin Yuan left a capsule. He has virus resistance, so he doesn't need this antibody.

The urgent task now is to rescue Dr. Chen quickly and see if we can use this antibody to imitate more virus antibodies. If the Ramanra virus is transmitted to Yan Nation, that will be the real big problem!

"Everyone, hurry up!"

Qin Yuan gave an order and everyone got into the car. The jeep roared and rushed out in an instant, but they hadn't taken two steps before they saw a group of Red Scarf soldiers rushing over.

The Red Scarf Army heard what happened here and came to see what happened. It was just that these Red Scarf Army saw that Qin Yuan and others were all armed, but they were stunned, with a trace. He hesitantly said to Qin Yuan:

"Are you here to find Dad? Why did you come to such a place? Dad is in the hospital now."

Hearing this, Qin Yuan immediately understood that these Red Turbans obviously regarded them as old men's mercenaries.

What's more worthy of Qin Yuan's attention is that now that Dad has arrived at the hospital, Qin Yuan winked at Leng Feng's people, and soon this team of Red Scarf was completely resolved.

Then Qin Yuan said to everyone:

"Daddy is at the hospital now, we must go there quickly. Get in the car. Wait a while, you will rush in directly behind me!"

This time Qin Yuan directly sat in the driving position and smiled at Long Xiaoyun beside him:

"Better grasp it!"

The jeep made a roar in an instant, like an angry beast, it rushed out directly.

At this time in the hospital, Dad hung up the phone, glanced at the people who were kneeling in the hall, showing a very cold smile, and then said to these people in front of him in a playful manner:

"My boss is already urging me, so can you please hurry up and tell me who is Dr. Chen?"

Hearing what the old man said, everyone at the scene understood that this was a red-and-naked threat, but they all knew that Dr. Chen was a real good person specifically to help them treat the Ramanra virus in the Philippines, so they They all lowered their heads, and didn't look at the old man's eyes at all.

Seeing the attitude of these people, the old man was also full of helplessness. He nodded slightly to the big bear on one side, and the big bear directly grabbed a young man, pointed the gun at the other person's head, and asked with an aura:

"Hurry up, who is Dr. Chen?"

Although the young man couldn't help shaking with fear, he still said to the big bear with a firm face:

"I do not know!"

The big bear slapped the man's face with a heavy slap, and two or three teeth flew out in an instant, but when the big bear wanted to continue to interrogate, the person said first:

"I really do not know!"

Seeing this situation, Da Xiong wanted to continue beating, but the old man was a little impatient. He shot the young man in the chest and said to Da Xiong:

"Since he doesn't know who Dr. Chen is, then he is useless to us. Why do you tell him so much?"

Seeing that the young man was shot, the people below also let out a scared scream.

Then the old man stood up from the chair, wandered around, and said directly to these people:

"I have given you a chance, since you don't want to say, then we will have a good game!"

After saying this, the old man walked directly to a little girl, squatted down, pointed the gun in his hand at the little girl's head, and asked faintly:

"Are you Dr. Chen?"

When everyone heard this, they immediately understood what Dad was going to do. As long as a normal person knew, this little girl could never be Dr. Chen!

But they also knew that Dad used this method to force them to tell who Dr. Chen was!

The little girl was trembling with fright, she couldn't speak at all, and the old man was full of helplessness when he saw the other person's appearance:

"It doesn't look like Dr. Chen in your situation, then you are useless to us. Bye!"

Having said this, the old man directly opened the insurance on his pistol and pointed it at the little girl's forehead. He saw that the old man was really planning to kill the little girl. The people kneeling around couldn't bear it. I went down, stood up suddenly, and took the gun directly from a Red Scarf Army!

It's a pity that they are just medical staff. They have not been systematically trained. Their movements are too slow. The sniper Athena who stood on one side fired a single shot, and instantly knocked these daring ones to the ground!

But seeing the person who had been shot, the people around them instantly became nervous and shouted: "Dr. Chen! Dr. Chen!"

Hearing these people's words, the old man also opened his eyes wide, and grabbed a person by the neck:

"You said this guy is Dr. Chen!"

"Yes! You have killed him!"

"Fuck!"

The old man yelled vigorously, and then threw the man aside fiercely. His boss told him that he must catch Dr. Chen.

As long as they can use the other side to develop the antidote to the Ramanra virus, they can control the entire country by spreading the Ramanra virus, and even spread directly to the entire Philippines in this way!

But now this very important Dr. Chen has let his men killed.

The old man asked the medical soldier on the side:

"Is there any help?"

The medical soldier had an ugly face and said to his father:

"Shot in the lungs, it can't be saved."

Hearing this, the old man breathed a sigh of relief, but he also understood that it was not Athena's fault, but he must now think about how to explain to his boss.

Only when I saw that my father was going out Big Bear asked:

"Boss, what do these people do?"

"They are useless, just kill them!"

The old man said casually, as if he was dealing with some useless garbage.

Hearing such words, everyone below was desperate, but there was no way.

But at this moment, the old man suddenly felt a strange vibration, suddenly turned his head, and looked in one direction.

But he saw a jeep flying over in the sky outside!

Chapter 159: Treat

frame!

The car directly knocked over the glass above, and then slammed into a Red Scarf.

A figure jumped out of the car in an instant, and the pistol in his hand kept moving, directly killing the sniper Athena!

This person is Qin Yuan!

Seeing that his beloved woman was dead, Da Xiong immediately let out a roar, grabbed the machine gun on one side, and shot Qin Yuan.

Qin Yuan reached out and grabbed the blocking gun in Athena's hand, and when he squeezed the trigger, it instantly hit Da Xiong's forehead!

Boom!

The big bear fell directly on his back to the ground. The eyebrows are the most important key to the human body. Hit here, he didn't even have any chance to react, he died instantly!

Long Xiaoyun, who followed Qin Yuan, Anran Anfisa and others, also took the guns in their hands, used this jeep as a stronghold, and began to attack the surroundings, killing more than half of the mercenaries and the Red Turban army in an instant!

The old man hiding in the door looked at his men, and he was killed so many in one face, he immediately understood that the situation was gone, and he screamed loudly, then knocked over the glass and ran outside.

Long Xiaoyun was about to chase after him, but Qin Yuan said:

"Don't chase, let the cold front outside deal with it, you can help me clean this place first!"

Said these words, Qin Yuan raised his hand with two spears, and directly killed the two Red Turbans.

And Long Xiaoyun glanced at the two people who had been shot, and immediately understood what Qin Yuan meant. The three formed a small team and began to guard Qin Yuan.

Qin Yuan directly squatted down, looked at Dr. Chen who had been shot, and said to the opponent:

"Dr. Chen, I was sent by Ambassador Fan to save you!"

But Dr. Chen was hit in the lungs. At this time, he kept vomiting blood bubbles out, but he couldn't say a word. He just kept pointing at a little black girl next to him, wanting to say something. what.....

Qin Yuan saw Dr. Chen's appearance, and while taking the bandage, he said to Dr. Chen:

"I understand what you mean, this is your daughter Casa, you want me to help you take care of her, it's best to send her back home, right?"

Hearing this, Dr. Chen suddenly showed a smile of relief, but when he heard Qin Yuan's next words, his eyes stared.

"I'm sorry, I don't particularly like black girls, so if you want to raise a daughter, you'd better do it yourself."

Qin Yuan said with a smile, and Dr. Chen almost vomited blood when he heard it. Unfortunately, at this moment, Qin Yuan stuck a needle in Dr. Chen's chest and fixed the vitality in Dr. Chen's body. This is what the nurses on one side said:

"Are there surgical equipment, I want to perform surgery on Dr. Chen!"

Hearing what Qin Yuan said, the eyes of the surrounding nurses suddenly lit up. Is this person still a professional doctor?

But they searched around, but found that all the important medicines had been taken away by the people of the Red Scarf. They only found some gauze, not even sterilized tweezers!

"I will find disinfectant alcohol!"

"I will check if there are any other medicines in the warehouse."

These nurses were in a mess in an instant, and Qin Yuan understood that it was not time to delay, so he said directly to Dr. Chen:

"You bear with me a little bit, I may be rougher."

Hearing Qin Yuan's words, Dr. Chen grabbed Qin Yuan's arm abruptly, and struggling to say:

"You...can't save...I...save...my daughter."

But Qin Yuan pinched slightly, and instantly pinched Dr. Chen to a faint, and then muttered:

"Let's talk about it later, it's so verbose now."

Hearing Qin Yuan's words, the people around looked at Qin Yuan in shock. Is this something that a guy who is healing and saving people can say and do?

And what surprised them even more was that Qin Yuan suddenly tore open Dr. Chen's clothes, checked the other's wound, and then reached into the wound with his finger, suddenly hooked, and a bullet flew out instantly.

Seeing such a situation, some nurses and doctors around felt dizzy!

It's over, it's over! This is all over! Dr. Chen could have been saved, but after Qin Yuan, he couldn't be saved!

But after Qin Yuan took out the bullet, his left hand suddenly took out the silver needle, and launched the eight needles against the sky.

And Qin Yuan's right hand took out a suture needle, trying to sew up Dr. Chen's wound.

Qin Yuan's eight needles against the sky, as long as a person is not dead can be saved, coupled with Qin Yuan's newly acquired cosmic-level surgical operation, combining Chinese and Western, can he not deal with a small gunshot wound?

Soon, this puff-puff-blooded wound was directly sutured by Qin Yuan!

At this time, Qin Yuan also heard a sound in his mind:

"Ding Dong, congratulations to the host for saving Dr. Chen and unlocking a grid!"

Hearing the system prompt, Qin Yuan also understood that Dr. Chen must be no more serious, showed a smile, directly helped the opponent up, and slapped the opponent on the back!

Dr. Chen wowed, just vomiting a large mouthful of dirty blood, staring at the people around him in shock!

They really hadn't seen Qin Yuan's pig-killing treatment method, and they felt a little panic just looking at it.

Seeing these people around who looked like murderers, Qin Yuan shook his head and said to them:

"What do you think of me doing like this, , I'm not trying to get Dr. Chen's lung congestion out?"

Qin Yuan suddenly pulled out the silver needle with eight needles against the sky. Dr. Chen took a breath of cold breath, and his eyes widened, and he came back abruptly!

Seeing that Dr. Feng really woke up, the people around him were so scared that their jaws were about to fall to the ground, and the eyes of Qin Yuan looked like a monster!

Can this kind of treatment save people? ?

Dr. Chen was also at a loss. He felt that his wound did not feel so painful anymore.

Seeing Dr. Chen's appearance at this time, Qin Yuan smiled, took out the Ramanra virus antibody directly, and said to Dr. Chen:

"Dr. Chen, this is the Ramanra virus antibody that I have researched out. You can see if it works, it is best to replicate it in large quantities! This is very precious, you should study it carefully!"

Hearing these words, Dr. Chen immediately regained his energy, and he also reacted. It was Qin Yuan who saved him. Although he did not know what method Qin Yuan used, he knew that Qin Yuan was not an ordinary person, so he struggled to the other side. 'S little nurse said:

"Help me up, I want to see if this thing is true."

Seeing Dr. Chen's spirit, Qin Yuan also showed a smile. Sure enough, he was right to give this thing to Dr. Chen.

Chapter 160: storm!

But at this moment, in Qin Yuan's headset, Leng Feng's voice rang:

"Master, the guy just ran away, should we just catch up?"

"No, we will meet each other sooner or later."

Dad's escape was also in Qin Yuan's expectation. After all, Dad was a rare master!

But the most important thing now is to send Dr. Chen back to the embassy safely. Dr. Chen's research results are much more important than an old man.

At this time, the old man who fled in embarrassment found that no one was chasing him, he was finally relieved, took out his mobile phone bitterly, dialed a number, and said to the person inside:

"Hey, I let a group of Yan Chinese attacked, hurry up and send someone to pick me up!"

However, in the mobile phone at this time, there was a voice that made the father very shocked:

"Hehe, daddy, didn't you not put the people of Yan country in your eyes before? Why are you persuaded now?"

Hearing a burst of Fusang from the phone, the old man's expression instantly became ugly:

"Ichiro Sakata, why are you here?"

"Why can't I be here? It's not your stronghold, why? Didn't you say that the people of Yan country had no three heads and six arms, and wanted to bring me the head of the Yan country sniper? How come they are now a bereaved dog, Ou The mercenary with the highest bid in the continent, I look like that!"

Hearing the ridicule of Ichiro Sakata, the old man gritted his teeth and said to Ichiro Sakata, "I'm telling you, we are in the same group!"

But Ichiro Sakata laughed loudly:

"Oh, I seemed to have said this to you before, how did you react?"

Before being ridiculed by his father, Ichiro Sakata was naturally depressed. Now that I saw that his father had also fallen to this state, Ichiro Sakata's heart was naturally extremely happy!

"Ichiro Sakata, let me tell you! It doesn't matter if we die, but if we don't complete the boss's mission, it will be more uncomfortable than death. Then all of us will not be able to run away!"

Hearing what the old man said, Ichiro Sakata also fell silent, and then said to the old man:

"Then you come to the Chinese factory 20 kilometers away, I am here waiting for you."

He hung up like this when he heard the call, and the old man yelled! The **** didn't send anyone to pick him up, but after a while, the old man still walked in the direction of the Chinese factory.

Because the task hasn't been completed yet, he can't just leave like this, but Ichiro Sakata doesn't seem to be trustworthy. After thinking about it, the old man took out his phone and dialed another number above.

"Dear brother, I met a real master. If you meet him next time, remember to be careful."

Having said this, the old man directly sent the secretly taken photos of himself, and then he sighed, his eyes became gloomy.

At this time, in the hospital laboratory, Dr. Chen walked over with a look of excitement, and said to Qin Yuan:

"It's amazing, it's amazing! Your antibody against Ramanra virus is almost like you people strangling the Red Scarf Army. How did this research come out?"

Qin Yuan smiled when he heard Dr. Chen's voice. Of course, the product of the system was not comparable to human resources.

However, since seeing the effect of this antibody, Qin Yuan didn't plan to stay here longer, and directly said to He Chenguang and others:

"We have two teams, five of the red blood cell team. You are responsible for sending all the people here to the embassy. I will take the remaining people to the Chinese-owned factory to rescue the remaining overseas Chinese. If you complete the task, Just go to the Huazi factory to gather with us."

"It's the captain!"

The people in the red blood cell team all agreed, but Qin Yuan smiled after hearing such words:

"What kind of captain is it called, the boss!"

He Chenguang and the others immediately laughed.

However, Dr. Chen quickly grabbed Qin Yuan:

"No, no, you can't go to the Chinese factory right now. I have heard that the Chinese factory has been occupied by the Red Scarf army. If you go there, are you looking for death?"

Then Dr. Chen looked at Qin Yuan carefully and said to him:

"Especially you, although I don't know if this thing was researched out by you, but it is so dangerous, you can't go. There is no eye on the battlefield, and no one can be sure that you will be able to come back alive, a senior like you Talents should go to the laboratory to participate in scientific research and achieve higher achievements, instead of fighting on the battlefield like an ordinary soldier. If you die, our loss will be great!"

After Qin Yuan heard this, he smiled slightly and said to Dr. Chen:

"I'm really sorry, Dr. Chen, if I chose to be a scientist at the beginning, then maybe I will listen to you now, but since I am a businessman in the country, I will let them know the fate of dare to provoke the businessman in the country. !"

Although Qin Yuan was talking about a businessman, Dr. Chen knew incomparably that this was a soldier of the Yan Kingdom, and he did not expose it, but looked at Qin Yuan in a pity.

Since he was a soldier of Yan Nation, he knew that he couldn't persuade Qin Yuan at all.

After saying this, Qin Yuan directly gave orders to the remaining people, and then left the hospital directly!

Soon, Qin Yuan's people had already arrived near the Huazi factory, but there was a lot of time delay on the road, and the night slowly became dim.

Long Xiaoyun took out his binoculars and checked it, but found that the people in these Chinese factories were dancing around the campfire. Although the Filipinos love to dance by nature, they can still be happy when such precarious times are inevitable. Get up?

"Hey, it must be the old man group, forcing these people to show up and attract us to the bait!"

Qin Yuan smiled. Sure enough, Long Xiaoyun took a closer look at the faces of these people and found that although there were some smiles on these people's faces, they were extremely stiff. Obviously, what Qin Yuan said was right.

"Then what do we do? They are obviously ambushing us. We have only five people now. How can we protect the safety of these people while destroying the enemy?"

Long Xiaoyun said worriedly, these people on the other side are not considered mediocre. If something happens, the five of them will not be able to do anything at all!

But Qin Yuan smiled:

"What to do, directly attack, and I will mark the opponent's location for you later, I rush in from the side, as long as the opponent dares to appear, you can just kill them directly!"

These people also specially arranged a pocket array, but what they didn't know was that it was night now, and Qin Yuan's thermal imaging capabilities and night vision capabilities could be used again!

Those who did not go to dance were as conspicuous as a lice on a bald head in Qin Yuan's eyes!
