

Special Soldier 1511

Chapter 1511: Worried about whether the instrument is broken

This guy was just like a bewitched man, he didn't respond no matter what he was told, and even did such a shameful thing, he just left without looking back.

The man didn't know what he had done at all, he just looked at Wang Wei's proud face in front of him, and then looked at the oil stains on his hands.

Qin Yuan smiled, "Since their attitude of admitting their mistakes is so good and they have already wiped them clean, do you still want to argue with them?"

"Captain, then there is no need to worry about this, everyone is talented, let's be humble to each other."

The man's face turned red, he didn't know what he did just now, but seeing them so proud, he felt very uncomfortable, but there was nothing he could do.

After going upstairs, their captain yelled loudly, "I have said many times, don't provoke them, you just won't listen."

"But let this guy keep stealing the limelight today. He is against us in everything. I really can't stand it."

"You have also seen this man's ability. Just now you were so humble to shine someone's shoes. It really embarrasses us Americans."

The man lowered his head and didn't know what to say. At that moment, he couldn't even control his body, and he didn't know what ability Qin Yuan used.

The captain of the United States repeatedly warned them not to make trouble anymore, and it is best to stay away from this person.

Li Xiaoman admired the domineering Qin Yuan even more, "Captain, you were so handsome just now."

"It's nothing, you have to remember, as long as you are bullied outside, you must tell me, I will clean them up, I am here with strength, although some people can't see it, but I am there."

The person in charge was a little embarrassed listening, Li Xiaoman hurriedly brought the meal he had prepared in front of Qin Yuan, and the others dispersed after watching the excitement, since it was none of their business after all.

The next morning, Qin Yuan and the others set off to the base together, and it was not far to drive there, just two or three kilometers away.

The person in charge on the car was introducing the situation of the base to them. The conversion system they needed to see today had been delivered yesterday.

Qin Yuan suddenly thought that the detection instrument suddenly lit up yesterday, could it be that it was being transported? If this is the case, then the explanation makes sense, and he was worried that the equipment was broken.

In order to avoid other conflicts, this time the person in charge arranged the American man in another car, Qin Yuan felt out of sight and out of mind.

Soon everyone came down and walked into the base together. The base on their side is also heavily guarded, and they have to go through various tests when entering. All electronic equipment cannot be brought in.

If he was worried about the risk of leakage, Qin Yuan had already hidden the detection instrument inside the system. After passing through safely, Qin Yuan turned his head and looked inside the base.

There are cameras everywhere here, which is similar to their base. Everyone passed through three gates, and each time there was a strict security check, followed by a mechanized security check.

In this way, following the person in charge in front, everyone entered the interior of the base. The interior is composed of countless small spaces, and there is a very large platform in the middle. The detection equipment lights up just after entering.

Qin Yuan looked at the converter in the middle and it seemed to be similar to what he guessed. It should be when the instrument was transported around yesterday, so the detection instrument responded.

Chapter 1512: find opportunities

It seems that the same as the picture he saw before, these C country people are really despicable enough, take away their country's chips, and then apply them to their latest technology, which saves a lot of expenses, you must know that a chip The cost of the project has now far exceeded the previous estimate.

Qin Yuan stared at the converter in front of him intently, and the person in charge next to him looked smug. Yesterday Qin Yuan had a very arrogant attitude, but now he sees that the converter developed by his country is not learning obediently here.

He looked around for a while, there are too many surveillances here, but he also has a way to use the previous time to stop.

The only thing that is not good for them is that everyone's suspicion will be infinitely magnified, and there will be a lot of trouble at that time, so this matter still needs to be considered in the long run.

After all, the cost of this thing is too high. If it disappears rashly, or if something goes wrong, none of the people who come to visit can escape.

The person in charge of Country C stood at the front and introduced their equipment with great relish. Everyone was making detailed records. This time, after all, it was an exchange and study. After they finished their studies, they would bring this new technology back home So everyone is very serious.

Standing on the side, Li Xiaoman couldn't help sighing, wanting to manufacture a converter like this, on the one hand, is a technical problem, and on the other hand, it is an economic problem. Many internal structures are expensive.

Qin Yuan has been thinking of a way to get rid of the internal chips, and soon the morning explanation is over. Country C said it was an explanation, but it was actually promoting their technology, and the internal core did not involve anything. .

When Wang Wei and the others returned to the place, they felt very unhappy. It took such a long time, so they just took a look when they came here.

"They're too dishonest. They said it was an exchange and study, but all the questions they said were too official and didn't involve the core areas at all. We probably won't bring anything back this time."

"Don't think like this, after all, we have seen something, which is good for us, and there is a reason why people don't show it, even if the technology developed in our country will definitely not leak out. "

Hearing this, Wang Wei sighed silently. There is really no way now. After all, the technology belongs to others, and they will only give it if they say so.

Qin Yuan was a little absent-minded, he didn't listen to what he said this morning, his attention was completely focused on how to get the chip out.

In the afternoon, Li Xiaoman came to find him and called him several times before he could react.

"Captain, what's wrong with you? Are you feeling unwell? How do you feel that you have something on your mind?"

"It's okay, but maybe I haven't had a good rest recently, what's the matter?"

"They asked to visit another launch site this afternoon. They notified them this morning. They said it during the explanation. I think it's almost time. Come here and remind me before you come down."

It was only then that Qin Yuan realized that he was completely thinking about the converter in the morning, and he had long forgotten about it, and he didn't pay attention to what others were talking about.

He tidied up casually, and then went out with Li Xiaoman. Li Xiaoman dressed more formally today, mainly because of the morning explanation.

She turned her head and looked at Qin Yuan with a smile on her face

Chapter 1513: wasted too much time

Full of sunshine, "Captain, we are going to visit their launch base today. I will definitely study hard this time."

"But don't have too much hope. With their style of work, they probably won't learn much, but it's good to go and have a look."

Just when they arrived at the previous base, the detector in Qin Yuan's hand issued another prompt, and he realized that this might be a good opportunity.

After all, everyone has gone out now, and the security inside is so strict, even if he doesn't follow, there is no problem, no one will suspect them.

Even if someone suspects him in the end and launches an investigation, just investigating him alone will not find any results.

Thinking of this, Qin Yuan looked at the bus in front of them waiting for them to leave. He suddenly clutched his stomach with a painful expression on his face.

"Hey, my stomach may have been spoiled by eating this morning, why is it so painful all of a sudden?"

Li Xiaoman looked concerned, and hurriedly asked him what was the matter, and if he wanted to accompany him to the infirmary, and others hurried over to check Qin Yuan's situation.

"Looking at the situation, I guess I won't be able to go today, so hurry up and don't waste everyone's time, everyone is waiting."

"Captain! How is this possible? You are our core, and if you don't go for the key point, how will we explain it later?"

"Yeah, I'm going to talk to them now and let them wait a while at most."

"It's okay. It's the same when you go to see it and I go to see it. These people won't reveal too much. The main thing is that you look at those guys and make them wait a little longer. You must not want to. I don't care about it." Know when it's going to happen."

Wang Wei turned his head and looked at the person in charge on the other side of the bus, looking impatiently from their side.

These people didn't want to see them in the first place. If they were told to wait at this time, they probably wouldn't wait at all, and they might be reprimanded.

Seeing Qin Yuan's painful expression, Li Xiaoman immediately said that she would stay and take care of Qin Yuan.

Qin Yuan didn't expect this, and he quickly refused, "No need, you are all scientific research talents at the base, now is a good opportunity, everyone should study hard together and bring back the news."

Li Xiaoman was also very tangled at the moment, but he looked at Qin Yuan's trusting eyes, and in the end he could only follow the team members back to the car.

The person in charge who just went up there was a little unhappy, feeling that they had wasted too much time.

"Everyone is a rare scientific research talent. I think you still need to have a sense of time. After all, it is not your own time that is wasted. It seems that everyone's time outside is precious."

Wang Wei couldn't bear to listen to the eccentric talk of the scientific researchers. When those Americans were late yesterday, he just caught them without saying anything.

"You're still ashamed to say that maybe the food here is not clean, and our captain ate it to cause problems. Otherwise, he would have gone with us long ago."

Hearing this, the American man next to him was even more proud, "Oh, what are you talking about? I can't stand it anymore. Why is there nothing wrong with us after eating it? Only he has something to do after eating it."

"you!"

Wang Wei still wanted to argue with them, but Li Xiaoman grabbed him. Now that the captain is not here, it is best to keep a low profile and not have any conflicts with them.

Chapter 1514: thinking about countermeasures

The person in charge didn't care about this matter at all, so everyone set off. Qin Yuan clutched his stomach and came to the gate of the base, where they were originally assembled.

Looking at the staff in front of him, he said with a painful face, "Hi, I'm having a stomachache, can you let me go in and use the toilet?"

Unexpectedly, the staff was indifferent, pointing to a building opposite, "I invite you to go to the opposite."

"No, I can't hold it anymore, don't you know me? I came to visit you yesterday and this morning."

"I'm sorry, we only have staff inside, and we can only enter under the leadership of the staff. You can go to the opposite side."

No matter what, the security personnel didn't let him in, and the security here was very cautious. When he was talking to this person, the people next to him also leaned over, including the people on the balcony.

It seemed that he could only look for other opportunities. Qin Yuan walked into the toilet on the opposite side and began to calculate the route to enter the base. Now his time is suspended and can only last for three minutes.

But the inside of this base is very complicated. Although it is confirmed that the converter chip is inside, if you want to enter the interior, you have to pass through the gates.

In addition to the password lock, there will be a facial recognition system in the future, which is too complicated. No matter how fast he is, it will take at least ten minutes.

When they entered the base in the morning, he roughly calculated that they passed through a total of five gates, each gate was guarded by someone, and there were countless surveillance cameras inside. It took close to 30 minutes.

If he wants to use time pause, it may be unrealistic for you here, at least you have to get involved before you can consider the issue of time pause.

Qin Yuan lay on the opposite wall and looked at the base. There can only be two situations now, one is going up from the ground through the underground passage, and the other is the exhaust passage above.

He knocked on the pipe next to him, wondering if the pipe on this side could be connected to the other side. If so, he could pass through the underground water pipe.

That chip obviously belonged to his own country, but there is no evidence now, so there is no other way but to take it secretly.

Qin Yuan, on the other hand, was still thinking about countermeasures. What he didn't know was that Li Xiaoman and the others were about to encounter danger.

Because Qin Yuan didn't come, Li Xiaoman couldn't be interested. She raised her chin and looked at the scenery outside the window.

Wang Wei next to her kept talking to her, but she didn't talk to her at all. Now she is not interested in anything.

He couldn't help complaining, "This car is so stuffy, when will we arrive? How far is it?"

The person in charge stood in front, "Everyone, please take a picture of everything. It is about ten kilometers away from our launch base, because the launch base is relatively far from here."

Then the person in charge began to talk about how extensive their launch base was, including the strict management there.

Li Xiaoman was not interested in these things, she was bored looking out of the window, at this time she found three small cars approaching suddenly, because they didn't meet any cars along the way.

Chapter 1515: Brother, I can't be the master

The main reason is that the three cars are similar, and the windows are also covered with black clothing, so it is impossible to see what is going on inside.

Just when she was curious, suddenly there was a loud noise in front of her, it was an explosion!

Everyone hurriedly covered their heads, not knowing what to do for a while, the driver was also forced to stop, only to see that the road ahead they had to pass had been bombed into a big crater, and there was no way to pass.

The person in charge is also a little flustered, what's going on? How did you get attacked? Moreover, the explosion just now directly blew up the security vehicle following in front of it instantly, and the casualties of the personnel on the overturned vehicle are unknown.

The person in charge quickly picked up the walkie-talkie and asked the security vehicles behind to quickly come up to cover their evacuation. The people in the vehicle were scientific research talents from various countries, and they dared not neglect at all.

Before the security vehicle behind got off, there was another explosion, and the vehicle was completely blown out, and the people in the vehicle screamed in fright.

Before everyone recovered from the explosion, they saw a few heavily armed people jumping off the three cars on the side just now.

The leader was wearing sunglasses and holding a gun in his hand, pointing in the direction of the cab, signaling the driver to open the door quickly.

This time, they really didn't think carefully. The glass of this vehicle is an ordinary bus that can't reach the bulletproof level at all, and the weapons in the hands of those militants are simply not enough for them to fight.

The driver could only raise his hands, and he didn't dare to act rashly. The Americans behind shouted to him not to open the door randomly.

"You'd better not move, you will kill us if you open the door."

While the driver was hesitating, suddenly there was a chug-chug sound, and the militants shot directly at the driver. In an instant, the front windshield shattered, and the driver was shot several times and fell directly on the seat.

This scene scared everyone so much that they didn't dare to act rashly, and they squatted down with their heads in their hands. Several militants jumped down, and the boss in front was cursing.

"Damn, I asked you to open the door just now. Is it deaf or something? Who is in charge in this car? Stand up for me."

The person in charge of country C was extremely arrogant just now, and now he dared not say anything under the gunpoint, his eyes were erratic, and he lay on the ground and did not dare to move.

Seeing that no one spoke, this militant casually grabbed the person in the first row in front and put the black muzzle of the gun directly on his forehead.

"It seems that no one is willing to cooperate, so we can only take other measures, say or not?"

This person had no choice but to point tremblingly at the ground. The face of the person in charge next to him was so dark that he didn't dare to look up.

The militant snorted coldly, walked over with his loose hand and kicked the person in charge under him.

"Drive the car to your base for me."

"This... big brother, I can't make the decision."

The militants didn't talk nonsense with him at all, took out the pistol on his waist and shot at the roof of the car. The loud gunshot frightened the person in charge to tremble.

The few Americans in the back were also frightened by this situation, but from what it meant, they seemed to be going to the base, and if so, it had nothing to do with them.

"Wait, I said, you can see clearly what clothes we are wearing. We are Americans. What you are going to the base has nothing to do with us. Let us go."

The person in charge had a wry smile on his face. These guys usually flattered them so much, but they ran quite fast at critical moments.

Chapter 1516: only he can do it

Unexpectedly, the militant looked at him and smiled, then walked over, and shot him directly in the head. The American man fell to the ground in an instant, his eyes widened, and the people behind him screamed in shock. .

"Damn it, don't pretend to be ordinary in front of me. What I hate the most are Americans, and I will kill you."

For a while, no one dared to speak anymore. No one knew what the purpose of these militants was. Now everyone dared not act rashly and could only follow their demands.

Soon the rest of the militants jumped into the car, this was the first time Li Xiaoman and the others had encountered such a situation, and the whole car was filled with a strong smell of blood, which made people sick.

The vehicle turned around and started heading towards the base. Because the distance was not too far, Qingyuan also heard the explosion, and he immediately became alert the moment he heard the explosion.

This is the main mine of 84 blasting! Qin Yuan had a bad premonition in his heart. Since the rebellion was quelled in country C, the whole country has been in a relatively peaceful state. How could there be such a blasting grenade all of a sudden?

Qin Yuan noticed that the guards at the door became vigilant immediately after hearing the explosion. He originally planned to go to the place where the explosion occurred, but he decided to observe the situation first.

He lay motionless on the wall opposite, and after ten minutes, the bus with a broken windshield slowly drove over. Qin Yuan took a closer look, isn't this the vehicle that Li Xiaoman and the others are riding in?

He carefully looked inside the car. Apart from the few researchers in front, there were also a few heavily armed militants, followed by two vehicles.

What's the situation? How was it hijacked?

The bus quickly arrived at the gate of the base. The militants inside were very arrogant and wanted to rush in with a kick of the gas pedal. At this time, the guards in front also rushed over and confronted them.

"Drop your weapons! Come down!"

"Hahaha! What are you talking about?"

The militants lifted the person in charge just now, put their guns on his head, and shouted at the people in front, "Show me clearly, open the door now, if you don't cooperate, then I will kill someone."

The guards in front did not dare to act rashly. How could they be allowed in under such circumstances, but they had hostages in their hands.

"Wait first, don't be impulsive, I will go to our leader now, I need the leader to negotiate with you."

"Stop ***** nonsense and open the door now."

The militants were very emotional, and they were not given a chance to think about it at all, and they were asked to open the door now.

But the guards in front said that they did not have permission to open the door. This one was connected by a computer host, and the door would only be opened with the approval of the leader above.

The militants couldn't believe it. The person in charge next to him was about to cry. He quickly explained that the door really needs the consent of the leader, and they don't have permission.

The militant was a little unhappy when he heard this, cursed, and then discussed with the person next to him.

After a few minutes, he asked the guards to call the leader quickly, and only gave them five minutes to open the door, otherwise he would kill one person in one minute, until he killed all the people in the car.

The guards didn't dare to delay, so they hurriedly reported to the leader.

At this moment, Qin Yuan has quietly walked around to the back.

Chapter 1517: plant them

It is no problem to deal with these militants with his ability. Just when he was about to do it, he checked that all the team members in the car were safe. At least the team members on their side were sitting in the back position without any threats. .

It's possible that this is an opportunity. These guys also want to enter the base, so it's better to take advantage of the chaos and take the converter away.

Now he only needs to ensure the safety of his own personnel. If they want to hurt their own team members, it is not too late to do so.

Just like this, Qin Yuan lay silently behind. After a few minutes, the leader rushed over. This matter was no small matter. There were researchers from various countries in the car, but the base was also very important to them.

The leader also brought negotiating experts, "Brothers inside, you don't need to be so excited and do such extreme things. If you have any needs, you can tell us as soon as possible. We will definitely meet them, but you must ensure the safety of the hostages." ."

As soon as the negotiator's words were spoken, he was shot dead by the militants in the car.

The leaders were stunned, what's going on? It was the first time they met such an extreme person, and they did not accept any negotiations.

Seeing the militants on the opposite side shooting, everyone hurried around to find a place to hide.

"I made it very clear. Now I'm going to enter your base and open the door for me. I don't need any
**** negotiations."

The leader wanted to delay the time a little longer. He kept talking to the militants in the car, saying that he would give them a lot of money, or that they needed other weapons, whatever.

But the militants in the car were already very impatient. At this time, the Americans in the car quit. These guys really wanted to kill them.

The captain of the U.S. stood up and shouted loudly towards the outside of the car; "What are you
**** doing? You know, if something happens to us, our people will not let you go!"

As the Americans yelled, people from other countries also stood up. They are the elite talents of all countries, and nothing should happen to them.

"Quickly agree to their request, do you want to watch us die?"

Under such pressure, the leaders in front had no choice but to agree to open the gate of the base.

Although the guards outside the window started to confront them with guns, no one dared to act rashly, so many people were in their hands.

What they didn't notice was that a figure quickly flashed under the car behind, and this person was Qin Yuan.

Taking advantage of this chaos to take things away and then planting them on them is really killing two birds with one stone.

The gates of the base were opened layer by layer, and vehicles could no longer drive in. Those militants drove all the researchers out with guns.

Because Li Xiaoman and the others were sitting in the last seat, they were the last researchers who had never seen this kind of scene when they got off the car. They slipped in fright and fell directly behind. This action caused the militants alertness.

The militant came over cursing, with the gun already bolted in his hand. This guy's temper is not easy to mess with.

"Don't! Don't kill me!"

Hearing his words, the militant froze, "Are you from Yan Kingdom?"

"That's right, I'm from Yan Kingdom, big brother...it's easy to discuss, don't do anything."

Chapter 1518: Whats the situation?

The militant didn't speak any more, but turned around and left. The younger brother who followed him couldn't understand, "Brother, why didn't you just do it? I think those guys outside are not honest, why don't you use this opportunity to stand up for them. "

"Let me tell you, none of these Yan people can move."

Because he knew that Yan Country had a special operations team called the Red Blood Cell Team, and the captain of that team was a lunatic, a completely devil-like existence, no one dared to provoke them, if he dared to touch people from their country, he would be able to run three feet away come out.

The guards behind were also able to keep up, and the militants could only press down on the researchers and start walking in, and drove all the people inside out.

The leader stayed in the monitoring room and watched the monitoring. He could only watch them walk forward step by step.

When they were about to reach the laboratory with the converter, the militants in front raised their guns and knocked out all the monitors in the room.

"Where's that thing you've been studying recently?"

The person in charge just watched them kill as soon as they said they wanted to kill, so how could they dare to resist, so they could only take them on a walk, and then used the password to open the laboratory.

Several militants looked at the thing in front of them. They didn't know what it was for. Anyway, they were entrusted by other people. As long as someone gave them money, they would dare to do it.

Bring this thing back, and they will directly give them 80 million US dollars, which is a very good deal.

The younger brothers in front are already cheering, they have so many hostages in their hands now, they don't have to worry at all, and they are all scientific researchers, people outside dare not move around at all.

At this moment, the leader of the militants heard a burst of small footsteps, what's the matter? All of them are here now.

Before he could react, he suddenly lost a moment. It was because Qin Yuan controlled the time. He now has three minutes.

Qin Yuan's speed was very fast, and he quickly came to the converter. At first, he just wanted to take away the chip, but when he bought it, he must not waste this opportunity in vain, so thank them for their research.

He took the converter away, and then quickly retreated out. When the militants woke up, they found that the converter in front of them had disappeared. Everyone was shocked. What's going on?

The militant pointed his gun at the person in charge on the ground, "You're **** kidding me, is it this thing?"

The person in charge was also confused, didn't they take it away? I didn't move anything.

After Qin Yuan put the converter inside the system, he walked out through the back door, and rushed to the front with an anxious expression on his face.

The door has been cordoned off to prevent anyone from approaching, "What are you doing? Let me in quickly, all my team members are inside."

"Sorry, there was an emergency inside, you can't go in."

Qin Yuan directly threw out his ID, "Why, as the captain of the special operations team, can't I even get in in this capacity? You will only kill the people inside."

The guard had also heard of Qin Yuan's name, so he could only quickly notify the leader. At this time, the leader was like an ant in the past, and he didn't know what to do. He notified all the people from the special forces team here. Everyone surrounded the outside helplessly.

Chapter 1519: get them all out

The leader received an invitation to swear over the phone call outside, when is this? Find him for anything.

"What Qin Yuan is not Qin Yuan? I don't know him at all. What time is it now?"

When the special operations captain of Country C next to him heard the name, his eyes tightened instantly, "Wait! Invite him in!"

"what do you mean?"

"It can be said that only he can save the people inside, and none of us can."

The leader was also shocked, and finally asked the guards to bring Qin Yuan in. Qin Yuan just came in and saw many acquaintances. They had participated in some training camps before, so they were very familiar with them. Come and say hello.

Their speed is fairly fast, and they rushed here in the first time, but the situation inside is too complicated, and they dare not act rashly.

"Captain Qin really didn't expect it. It's great that you are here this time. If you are here, there will be no problem."

"Hey, it would have been nice if I had gone with this incident. I didn't go with it because of my health."

The leader next to him was stunned, he didn't know what the two were talking about, but seeing that the special operations captain respected Qin Yuan very much, he knew that this person was not simple.

"Don't worry, leave everything to me."

"Okay, we all follow your command, you see how you need to go."

"No, give me a gun, I'm all that's needed."

The captain of country C actually agreed, because he knew Qin Yuan's ability, this guy can defeat a hundred with one enemy, but the leader next to him disagreed, he didn't know what these two guys were going crazy, he wanted to go in alone, Isn't that a joke?

"Wait, what are you doing? Those people inside are research talents from various countries, absolutely nothing can happen, you go in alone, isn't this nonsense?"

"I'm pretty sure I can bring them all out, and the **** bastards, and I'll take care of them all."

"I don't have time to play jokes with you guys any more, so I have to find a solution, especially if there are those Americans in there. If something goes wrong with them, how can I explain it?"

Qin Yuan looked at him very disdainfully, "For you, do you think the most important thing is those Americans? To me, everyone is equally important, so I will rescue them all."

"This Star Really Wants to Retire"

After speaking, he strode towards the inside, Qin Yuan's words completely shocked everyone's heart.

The leader was very anxious. He felt that this was all nonsense, "Hurry up and stop him, what do you mean? If something happens, none of us can take responsibility."

"Enough, trust him, only he can solve it, none of us can do it."

The militants inside the laboratory felt that the person in charge in front of him had tricked him. After all, he was looking at the existing converter just now, but it disappeared in the blink of an eye. This guy must have played tricks to hide the converter.

The gun in his hand was aimed at the person in charge, and told him to take out the converter quickly, but the person in charge was so scared that he even peed, how did he know where the converter went?

"Brother, I really didn't know I was here just now, I didn't do anything."

"Boss, I think it's these guys who see that we don't do anything, and think that we are easy to bully, so they just kill a few people and let them.

Chapter 1520: almost broke something big

"I think it's the same. You have to do this so that you can be honest, don't you?"

The researchers behind were terrified. It seemed that these guys were really going to kill people.

"What the **** did you do? Hurry up and give it to them. It's already this time, why do you care about it? Isn't our life worth these things?"

The person in charge listened to the accusations of those researchers, and he was also very helpless. He didn't know where this thing went.

He really didn't know, otherwise he would have taken it out long ago. The militants didn't give him an extra chance and shot him directly in the leg.

"If you don't say anything, you will be hit directly on the head next time."

The person in charge fell to the ground clutching his thigh, screaming in pain. He said that he really didn't know what was going on.

"Boss, this guy is too stubborn. It seems that we really need to talk to them."

At this moment, the lights in the room suddenly flickered, everyone was very nervous, and the armed boss next to him didn't take it seriously.

"What are you panicking about!"

He picked up the walkie-talkie and started to contact people outside, but there was no response. He was a little anxious for a moment, what's going on.

He also left seven or eight brothers outside the laboratory, just in case, so that no matter what, they have a way out, there are people inside, and there are people outside.

But now he couldn't get in touch at all. He looked around, and then asked a researcher who told him that there might be signal interference inside, so he couldn't get in touch.

The armed boss was cursing, and asked a younger brother next to him to go out to see what was going on, and let the brothers outside come in first, and we can discuss it together.

The armed boy walked over, and just as he opened the door, he saw a figure rushing in, followed by a throwing knife, which hit him in the head.

Those researchers were already lying on the ground, so I was willing to ignore them too much. Now his target is these militants, and the gun and throwing knife in his hand are dispatched at the same time.

The three militants were eliminated in an instant. The moment Li Xiaoman saw Qin Yuan, tears welled up in her eyes. She knew that Qin Yuan would definitely come to rescue them.

These militants were also desperate. Seeing that the situation was not right, one militant directly pulled the grenade from his waist and ran towards Qin Yuan.

Instead of hiding, Qin Yuan went up to him and kicked him on the chin. The militants flew tens of meters away, followed by a powerful explosion that shook the glass of the laboratory smash.

Just when Qin Yuan felt that he could cooperate with them all, suddenly footsteps came from outside, and a special warfare team burst in from the side.

These militants were originally desperate, but when they saw someone rushing in, they panicked and started shooting indiscriminately.

You must know that there are still many researchers here, and there is no time to care about so many, Qin Yuan can only rush to protect his team members, throwing a few throwing knives, and deal with the militants in front first.

He pushed Li Xiaoman down, and several bullets hit him directly behind. Li Xiaoman was too frightened to move.

Qin Yuan looked angrily at these guys outside the door. Whoever let them in completely ruined his plan. In such a scuffle, Qin Yuan could only try his best to protect his team members.
