

Special Soldier 1521

Chapter 1521: go through every day

At this time, he only heard a scream, and saw a researcher from a country fall to the ground with his shoulders bounced.

He threw out his throwing knives continuously, and soon all the militants inside were eliminated, and the leaders were also brought under control.

It's just a pity that there were already casualties inside, and the team that rushed in quickly called the people outside with the walkie-talkie.

Tomato read novels for free

"Medical assistance is needed here."

Qin Yuan was very angry. He strode forward and grabbed the captain by the collar.

"Who let you in? Do you know you killed them all?"

"What are you talking about? If we hadn't come in in time just now, you wouldn't be able to deal with them at all."

Qin Yuan didn't bother to explain to him, so he hurried over to check on the injured. Fortunately, there were no casualties on his side, otherwise he wouldn't let it go.

The captain of country C who was talking to him just now also ran in, and he spread his hands helplessly.

"I'm very sorry, but I can't stop them either. It was the leader above who ordered the team to come in."

Qin Yuan knew that this was the result, just now he felt that the leader would definitely do something bad, but this guy actually did it against himself.

That team was still very unconvinced, and felt that they had done a good job to Qin Yuan, and they were yelled at by him like this.

The squad leader was very unconvinced. When he stood up to check the corpses, he realized that the mouths that hit the fallen militants were very accurate.

According to this, if they really didn't come in, maybe there wouldn't be such a large number of casualties. This person is very powerful, at least it wouldn't cause the chaotic situation just now.

But he couldn't believe it, could he really do it alone? It's useless to think about it now, they combined with the medical staff outside to carry the injured researcher out.

Several militant leaders were also captured alive, including the one who made the most noise just now.

At this time, the leader also ran in, looked at the converter that disappeared on the table, and stared fiercely at the people on the ground.

"Where did you ***** take that thing?"

The militants didn't talk to him at all. They felt that they were tricked by them this time. They obviously put things up by themselves, and now they are still pouring dirty water on themselves.

At this time, the surrounding guards also searched around, but found nothing. The converter was still relatively large, and it just disappeared out of thin air.

The leader was very angry. He felt that these militants used some secret channel to transfer the things away, otherwise how could they disappear?

The person in charge just now had blood on his thighs and his face was pale. He struggled to lie on the single stand, "The leaders are them, they got XZ up!"

The militants were swearing, and they didn't move at all. At this moment, the person in charge had been carried down, and these militants were also taken down for interrogation.

Qin Yuan comforted his team members and told them that they are safe now.

On the way back, everyone was not very interested. After all, they had personally experienced the murder just now. Li Xiaoman's eyes were red. She was really frightened just now.

"Captain, do you have to go through something like that every day? I really can't imagine it."

They must be absolutely safe at home, but abroad, there is no guarantee.

Chapter 1522 There is nothing you can do

She had also heard about Qin Yuan's deeds before. As special forces, they always charged ahead.

"That's right, but it's not such an exaggeration. Many things vary from person to person. You have just experienced such a thing. You must not be able to accept it. Just go back and rest for two days."

Wang Wei sighed silently, "Although those Americans hate me, I really can't imagine that he was shot to death just now when he was sitting in front of me."

As soon as this was mentioned, Wang Wei thought of the ***** scene, which made him feel sick.

At this time, the bus had already left. Suddenly, the driver received a call and changed direction. It was a little strange, so he hurried forward to ask. The driver said that it was the news from the base.

It was supposed to send them to rest, but now it is said to send everyone back to the base.

I don't know what these guys are doing. The people in the car complained. The researchers in country A now have two serious injuries and one minor injury. The rest of them are terrified.

"What are you going to do? Why don't you send us back now? What are you taking us back for?"

"I'm very sorry, and I hope you can understand. This is an order from our leader. I want to take everyone back, and I may also want to better protect you."

As soon as he finished speaking, he saw several police motorcycles coming from both sides of the vehicle. Those guards had already surrounded the bus, which seemed to be protection, but in Qin Yuan's view, it was more like a kind of surveillance.

Soon the bus drove back to the base, and everyone on board was very puzzled, and everyone was in a state of panic.

Another person in charge came out from inside, and this person looked very serious, "Everyone, this is also for everyone's safety. It is very chaotic outside now, to avoid other problems on the way back, so everyone stays inside the base, and we make unified arrangements. ."

It didn't sound like a problem, and everyone followed suit, but what they didn't expect was that everyone was assigned to a separate room.

Qin Yuan didn't understand, Li Xiaoman was very scared now, she held Qin Yuan tightly, unwilling to let go.

"What are you doing? We shouldn't be separated now, but we should all be unified so that we can take care of each other."

"Sorry, this is our arrangement, and it is also for better management. Please cooperate."

They all said so, and everyone had no choice but to walk down one by one, and were led into small rooms one by one under their leadership.

He and Qin Yuan guessed right, although it seemed to be protection, but they were all under surveillance, and they didn't know what was going on, and they heard footsteps after a while.

Because Qin Yuan was in the first row, he was taken out first, and the man in military uniform next to him asked him to follow.

Soon they took Qin Yuan to another separate office, where there were four people in uniform.

These guys always like to do these things, Qin Yuan didn't bother to talk to them, and told them to put him back quickly.

"Mr. Qin may not be able to put you back now, and you must cooperate with our investigation now."

"What does this mean? What else do you need to investigate?"

"That's because our newly developed converter is missing, everyone here is suspicious."

Chapter 1523: understand so thoroughly

No wonder everyone should be gathered together. These guys couldn't find the militants, and they couldn't find any other tunnel exits. The converter just disappeared mysteriously, so everyone gathered to investigate.

"I just feel very ridiculous about your behavior. As researchers, you didn't protect us well, but put us in danger, and now you still doubt us."

"Please understand with your cooperation. We are also investigating things now. If we don't find out, everyone will be suspicious."

The next step is to start the normal cross-examination, basically there is no problem, and Qin Yuan also rushed in to save people, his suspicion was cleared first, and the converter is so big, even if they want to take it out will also be found.

Afterwards, everyone was brought in for questioning. The investigation progressed very quickly, after all, they were all carried out separately.

When it came to the Americans, an American said an important clue. These people were also very dissatisfied with their investigation. He felt that they could not be investigated at will like this, which was a violation of their will.

And casually cast doubt on them, so far they have suffered terrorist attacks, and they have not even offered an apology.

But country c's attitude is very tough. After all, what they lost is not trivial. They have already interrogated those militants and they don't know anything.

There was no other way but to bring everyone present for interrogation.

This American had conflicts with Qin Yuan and the others before, "You have time to look forward to each other here, why don't we ask those Yan people carefully, you must know that those people in the hall at that time were the only ones who didn't touch them. "

what! Hearing this news, several people present were very shocked. What is the situation? Why didn't anyone mention this when they were interrogating just now?

Everyone knows that their American team members had conflicts with them before, and it is not ruled out that they said this out of deliberate revenge.

"Now we are investigating what happened. You must tell the truth. If there are other false behaviors, then we will definitely pursue it strictly."

"Hehe, do you think I'm lying to you? You can ask people from other countries about this matter at will. At that time, the militants only let them go. Why? I also asked if they were from Yan country , I feel that there is something tricky in it."

Several people in charge glanced at each other, it seems that there must be something tricky in it, so they can only be called out to ask again.

They called out other people and asked about the situation, and everyone responded that it was indeed the case.

Could it be that the people of Yan Kingdom colluded with those militants and staged this drama with them, but now that the militants have been caught, it doesn't make any sense for them to do this.

The captain of the special warfare team in country c is very protective of Qin Yuan. He has repeatedly stood up and said that they will never have any problems. In addition, he can understand those militants, because Qin Yuan has a great reputation in the outside world, basically No one dared to provoke them.

The leaders here are basically high-level, and they don't have such a thorough understanding of the outside world, especially among the special forces.

Chapter 1524: training accident

In this way, Qin Yuan was called in again. This time, apart from him, there was also the person in charge who was injured before. Had to.

Qin Yuan originally wanted to take advantage of this opportunity so that he would not have anything to do with him, but he didn't expect to be called by them to investigate.

The few people who examined him before he entered were very angry, because they got nothing from the militants, so they could only continue to interrogate the remaining people.

"I don't understand what you mean by this. We haven't given us an explanation yet. Call all my people here—what are you doing for interrogation?"

"Mr. Qin, you can't say that. Everyone is suspicious now. We are just doing things normally."

Anyway, they couldn't find that thing, besides, these guys were more guilty than himself, Qin Yuan crossed his legs to see what they had to say, this thing is very safe in the system.

The person in charge next to him turned pale, and he was very grateful that Passionate rescued them at that time, but he did hear those militants say that they would not kill the Yan people.

So these few leaders are holding on to this matter, they think that Qin Yuan must be in collusion with these militants, otherwise, why would all the Americans and A people be killed, but they would not move them.

After a long time, Qin Yuan didn't speak. The man sitting opposite was afraid that the man couldn't bear it anymore, so he stood up and slammed the table.

"What is your attitude? We now have every reason to suspect that you are colluding with these militants."

"Where's the evidence? Come up with the evidence."

Seeing Qin Yuan's attitude, everyone didn't dare to do anything to him, after all, there were too many things involved.

In this way, the two sides have been in a stalemate for more than two hours, and there is no result. This is for sure. After all, Qin Yuan really has nothing to do with these militants.

They can't keep Qin Yuan here for interrogation, and they can only let him go in the end. If it takes a long time, it will definitely have a bad effect.

Qin Yuan stood up and moved his body, then turned his head and looked at those people coldly.

"You are incompetent yourself. You are not optimistic about your own country and rely on others. I just want to talk about this time. I will not let it go like this. I will remember your insults to us."

The special operations captain from Country V was also nearby. He quickly stood up and wanted to explain, but Qin Yuan didn't buy it at all. From the very beginning, they treated people on his side specially, so why should he give them good looks?

After Qin Yuan left, the special commander sighed silently, this time he had offended Qin Yuan.

Soon the country of Yan sent people over to negotiate, and took all the researchers back. The country c had no choice but to let them go back first.

The converter they developed this time is very expensive, costing a total of 500 million US dollars.

The cost of the chip must also be removed. The chip was taken from the robot in Yanguo. In the end, the converter just disappeared. The explanation came out, but they really don't know the whereabouts of this converter.

Chapter 1525: the lost converter

The person in charge of country c stood on the roof of the base, looking at the vehicles that had gone away, for some reason, although they have no evidence now, they still feel that this matter has something to do with their Yan country.

Unable to grasp the evidence, there is no way to say anything, and they can only watch them leave.

On the way back, Li Xiaoman and the others were quite frightened this time. Everyone was silent along the way. They were lucky to be protected by Qin Yuan at the last moment.

At this moment, Wang Wei also changed his opinion. He also felt that the reason why Qin Yuan didn't come to the research base was that it was too noble. After all, who would refuse such a job.

At this moment, he really understands that his ability should be used in other fields. He can protect thousands of people, just like this time.

Back at the domestic aerospace base, Qin Yuan mysteriously found Mr. Zhang. This time the research team was brought out. Before leaving, he wanted to give Mr. Zhang a gift.

Mr. Zhang originally planned to take the wind for them, but the study this time can be described as difficult and dangerous, and they almost couldn't come back.

"It's a good thing you went with me this time. Otherwise, if something went wrong, I don't know how to explain it to the base. Each of them is a rare talent."

"Mr. Zhang, everyone has their own mission. You and I understand your situation. Some places really need me. I will also help you with your research."

Mr. Zhang nodded, and Qin Yuan's meaning became clearer. Now he is about to leave.

Li Xiaoman stood at the gate of the base, looking at Qin Yuan from a distance. At this moment, she was also struggling in her heart. She wanted to go with Qin Yuan, but she couldn't leave her identity here.

At this time, when she saw Qin Yuan waving at her, she could only greet Qin Yuan with tears in her eyes, and she made up her mind even more.

After Qin Yuan left, Mr. Zhang opened the gift that Qin Yuan gave him. The moment he saw the gift, he became uneasy.

Unexpectedly, it turned out to be the converter lost in country C. This kind of converter is used on manned spaceships, and the cost is very expensive.

In addition to its own cost, it is also very time-consuming, and it is also very difficult to collect various scarce materials. This time, country c notified the outside world that it was this converter that was lost in the terrorist attack they encountered. I did not expect it to appear in the here.

Many bad thoughts popped up in Mr. Zhang's mind. Is it true that Qin Yuan colluded with those militants as they said?

There was a handwritten letter next to the converter. Mr. Zhang picked it up and read it carefully before he realized that the chips inside the converter belonged to Yan Kingdom. These guys stole chips from their country to make things. Even if it is returned to the original owner by mistake, it can be regarded as a part of the interest.

After Mr. Zhang finished reading the letter, he silently threw the letter into the shredder, pretending that this hadn't happened, and then took the converter into the laboratory. on the spaceship.

Mr. Zhang was very satisfied with this gift, and Qin Yuan could be settled for a while. After returning to the Special Operations Brigade, he saw He Chenguang and the others training.

Qin Yuan felt that after this experience,

Chapter 1526: How could it be so serious?

Both parties can't delay him to complete the task quickly, which is why he came back. Only by completing the task can he get merit points and he can get more research blueprints.

This day, Qin Yuan and the others set out a small mission to cooperate with the encirclement and suppression operation. The merit points were a bit small, and they only got 2,000 merit points, but this was also a slow accumulation.

After he came back, he was rushed to the office by Gao Shiwei. It turned out that it was Frank who contacted him again, as if there was something important.

"I see, now your reputation is bigger than mine. When I asked him what was going on, he didn't say anything. He had to wait until you passed."

"Captain Gao! This is not the same. Think about it, I am going to save face for us. Besides, this time I will go to blackmail some things and come back. This is not a matter of killing two birds with one stone."

Gao Shiwei thought it made sense when he heard this, so he asked Qin Yuan to go over to see what was going on first. Frank was also anxious when he said this, because it was a training problem anyway.

Qin Yuan knew what it was supposed to be. Before that, he made a bet with the people there, as long as they could train a team, he would let himself compete with them.

This is probably the case, but now less than a month has passed before the stipulated time, why are you in such a hurry?

It would take at least three months for him to do these basic trainings, not to mention these people, and he couldn't figure it out for a while, so he could only go and have a look first.

When he came to the hunter school, he realized that something was wrong. From a distance, he saw a flag descending, and it was at half-mast. In this case, soldiers usually died.

It should be said that the disability and fatality rate of the training in the Hunter School is also very high, but such cases of lowering the flag at half-staff are very rare, which can only show that it is an internal employee of the Hunter School.

As soon as Qin Yuan got off the helicopter, the secretary next to Gao Shiwei came up to carry the backpack for him. Only then did Qin Yuan realize that something happened during the training.

"Ah! This black front is really going to break up the Hunter School. The accident this time is too big. Our principal was called to talk."

"Isn't it just normal training? How could it be so serious?"

"He just wants to beat you, and he has a special way of training. The difficulty of training is getting higher and higher, and the risk factor is also very high. In the end, something happened."

While the two were talking, they came to the playground. Qin Yuan looked from a distance and saw eight stretchers placed under the flags on the playground, and the people on the stretchers were covered with the flags of various countries.

If something happened to the rookies who were trained before, it would be understandable. After all, they have never received such a high-intensity training before, but judging from the situation, it is the instructors inside the school. They have gone through so many hardships, and they did not expect something to happen. .

Qin Yuan stepped forward, and the people around silently stepped aside. He checked one of the corpses, and just glanced at it. It was too tragic, and the face was completely destroyed.

The secretary explained next to him that Hei Feng took 30 people into Alishan, which is more than 50 kilometers away, for training three days ago.

But the climate here is also quite special. After all, this is a tropical rainforest, and it has been raining for more than a month.

Chapter 1527: What about the rest?

Frank had suggested at the time that he should not rashly take soldiers to such a place for training, as it was prone to landslides.

It has been raining for more than a month, resulting in loose soil. They have all reduced going out for training, and basically they are training inside the school.

But this guy was desperate to take these instructors there. He said that the harsher the environment, the more people can be trained.

Hei Feng went through layers of selection, and now there are still 30 people eliminated, and he still needs to choose a suitable team among these 30 people.

Unexpectedly, an accident happened on the second night of our trip. A distress signal came from their walkie-talkie. When everyone rushed there, they saw that the place with the signal had been buried by scattered stones and mud.

Below is a very deep ditch. Now because of the rain for more than a month, the water in the ditch has risen, and the rest of the people were washed in. After searching and rescuing them, only nine people were found, and eight of them were dead.

There is another person who is currently being rescued in the infirmary, and the doctor is also a little helpless.

Qin Yuan hurriedly interrupted the secretary when he heard this, and there was another person who wanted to at least know what happened, so he hurried to the infirmary.

The doctor wanted to stop him, but he saw the secretary behind him waving at the doctor, because Frank had told him that as long as Qin Yuan wanted to do anything, he had to cooperate with him.

The person on the hospital bed was also seriously injured, with a thick gauze wrapped around his head, and he was still in a coma.

After all, when Frank arrived with his team, they had been buried below for a full three hours. The terrain over there was relatively steep and there were sharp stones everywhere. It was a miracle that this person survived.

Although the secretary didn't know what Qin Yuan was going to do, he could only wait anxiously outside the door. After a while, Qin Yuan came out, and he signaled the secretary to go in.

When the secretary went in, he was stunned because he didn't know what method Qin Yuan had used so that the person on the hospital bed could sit up and communicate with him normally.

At this moment, the soldier on the bed looked around, and then covered his face and cried bitterly, "I really didn't expect that we advised him before, but he didn't listen, and he even laughed at us as cowards."

"What happened? What about the rest? What happened?"

"That lunatic! He wants us to conduct confrontation training on that hillside, and all of them use live ammunition. I don't know who used the rockets. The power of the rockets is too great. Under the vibration, the next thing happened Landslide."

He was lucky. At that time, there was a big tree behind him, and the big tree carried most of the pressure before he was rescued.

The rest of the people stood on the bridge opposite the hillside. The said bridge was actually built by them, and there was a deep ditch underneath.

There was a landslide, and the simple bridge couldn't bear it at all, and it broke. He just heard a lot of shouting, and then he was also knocked unconscious.

It seems to be similar to what they judged at the time. The secretary has a serious face. Now they have organized people to search along the direction of the ditch, but there has been no clue.

"Captain Qin, the situation is like this. It is similar to what we judged before. That's why the sir asked us to invite Mi back. I hope you can help us."

Chapter 1528: find clues

This is not a problem, Qin Yuan immediately formulated a plan, and it is still in the rainy season, they all stay outside, and the danger will increase every day.

Frank is now dealing with this matter with representatives of various countries. After all, although they work in the Hunter School, they are also outstanding talents belonging to various countries.

Qin Yuan asked them to prepare air power to carry out reconnaissance in the air at any time, and to rescue immediately as soon as there is a distress signal.

Now everyone feels that air power is the best hope of finding those people, because now after the rain, there are landslides everywhere in that jungle.

Many roads have been blocked, and it took them a long time to move forward, so they can only hope to be on the helicopter.

Qin Yuan led his people to search on both sides of the river. Now the river has risen a lot, and the surrounding bushes have been completely submerged.

And because all the water from the upper stream rushed down, many branches appeared in the river, which is why they haven't been found for a long time. They don't know which branch they will rush to.

It was still raining heavily in the sky, Qin Yuan was sitting on the lifeboat, he observed all the clues around him, and the secretary next to him also looked anxious.

"Captain Qin, you can see that there are dozens of branches here. We have already sent people to search for them, but the number of people is limited after all. Now we have sent a total of 16 speedboats."

This is not the most dangerous, mainly because there are still many crimes lurking in this tropical rainforest, which is why the Hunter School is here, and they can effectively attack at any time.

However, due to the complex terrain, there is no way to eliminate them all at once. These criminals use the natural terrain to escape and form natural fortresses in these places.

Branches of rivers like this, if they respond in a timely manner, are not fatal. After all, everyone is a special soldier, and the problem is that they are worried that militants will appear behind them.

While they were searching, they suddenly heard gunshots coming from the southeast. Everyone was nervous, and Qin Yuan immediately ordered people to move in that direction.

When they arrived, they found a small group of militants on the opposite bank, and they were shooting at the soldiers on the speedboat.

Qin Yuan and the others quickly fought back. This was just a small group of militants among the large tropical rainforest. It is unknown how many people are still lurking.

With their support, this group of militants was quickly wiped out, and they deliberately left alive, but these militants didn't know anything, and they didn't see any people coming ashore.

Due to the non-stop rain, many clues will be washed away by the heavy rain, and they have not seen anything of value.

At night, everyone still did not give up searching, and night was also the best opportunity. At around 8 o'clock in the evening, the rain finally stopped, and everyone kept searching along the direction of the shore on the speedboat. There were a lot of mosquitoes in this place. .

The secretary next to him took out a bottle of mosquito repellent water and handed it to Qin Yuan. It is still necessary to protect it properly. The mosquitoes here are not a joke.

Qin Yuan waved his hand and refused, and he also found that for some reason, Qin Yuan didn't have any traces of being bitten.

Just when he was about to spray some more on himself.

Chapter 1529: 1 clue found

Qin Yuan pressed his hand to keep him still.

"Wait, don't spray! It will affect my sense of smell. I can smell fire smoke in the air."

The soldiers at the back thought this guy was joking. Now that the air humidity is so high, even the military dogs they brought have lost their sense of smell, and there is no way to find them. Qin Yuan said that he wanted to smell the smoke.

Qin Yuan stood in front of the speedboat, and then carefully sniffed the smell in the air. As long as the distance is not too far, his system has been upgraded, and he can distinguish the smell within one to two kilometers.

The people behind were all watching the jokes, because they thought it was impossible. The humidity in the air was too high now, and they couldn't smell anything, only the smell of rain.

But Qin Yuan suddenly made a gesture, telling them to walk towards the left branch.

"Captain Qin, I remember they searched here yesterday, so if we go now, isn't it a waste of time?"

The soldiers behind were a little dissatisfied. He raised doubts. He couldn't just let everyone run for nothing. Everyone ran around in a mess at night without a clue.

"Do as I say, no problem."

The soldier could only obey Qin Yuan's arrangement, and steered the speedboat towards the left branch. After driving like this for more than ten minutes, Qin Yuan asked him to go towards the right again.

Because it was night, although everyone turned on the lights, they had been circling seven or eight times in the river branching here from left to right, and the soldiers behind were also a little impatient.

"Captain Qin, can you figure out the direction first, it feels like you're playing us."

In fact, Qin Yuan cannot be blamed for this. Now that the wind direction has completely changed, it is actually more difficult to smell that smell. He can smell it in all directions, and he can only search for it with simple smells.

The secretary told the soldiers in the back not to speak, and just follow Qin Yuan's arrangement. After walking like this for more than 20 minutes, Qin Yuan asked them to stop at the side, and several people jumped down, and they found footprints on the bank.

The secretary was also very happy, he finally found a clue, he quickly took the walkie-talkie and asked others to come here quickly to meet up.

I walked forward along the direction of the footprints, but it was strange that when I reached the deepest point, I only saw a pile of burned ashes, and no one else was found.

They should not move easily at night. Qin Yuan squatted down and touched the temperature of the ashes. They had been away for at least an hour. No wonder he couldn't find his way just now, but he could smell the faint smell of fire smoke .

The soldiers behind him didn't dare to say anything more, because the trick of wishing was too powerful, and they could find clues in this situation, although they didn't find anyone.

Others also began to scatter and search in this area. After a while, a soldier found some bandages, but there were no other clues.

Qin Yuan felt that the matter was not that simple. He looked at the secretary next to him, "In this area, please check if there are any criminals entrenched here?"

The secretary nodded, "Do you mean to worry about them being hijacked by those militants?"

"Hijacking can't be called hijacking. You can see that there are no traces of fighting around. It seems that they left voluntarily. Moreover, the sound of our speedboat was relatively loud just now. They should be able to hear it."

Chapter 1530: who will collude with

In addition, their speedboat has been turning around here, and the jungle is very quiet now, and the sound travels relatively far, so it can definitely be heard here at that location.

Coupled with the fact that they still have air forces searching for them, even if the communication equipment on them is damaged. But these people's hands are not ordinary, at least they can send out a distress signal.

But now he has been searching for three days without any clues. Now he found this tiny clue. It was obvious that they didn't want to be found.

After listening to Qin Yuan's analysis, the secretary was shocked. This matter was too big, because what Qin Yuan meant was that it was very possible that they had collusion with those militants.

"Before the truth of the matter comes out, we should not speculate at will to avoid misleading others. We are still looking for it."

Qin Yuan can understand him, no matter what, he can't doubt his own people, but at present, this kind of statement is getting closer and closer to the truth. These people are not ordinary soldiers, they are all excellent instructors of the Hunter School.

How could it be possible that they have been missing for three days, so that no one else has any clues. They are very experienced and can leave clues at any time, so that others can find them.

Everyone searched around and found no clues, and they must have someone to respond to this black light, otherwise they will soon lose their way in this jungle.

The secretary didn't want to give up yet, so he called other people over the walkie-talkie, and everyone continued to expand the scope. Qin Yuan felt that it was unnecessary, and it was obvious that someone had come to respond.

"Hurry up and check now. The area is expanding to see which criminal group is here. If there are any clues to them, it's probably it."

The secretary looked puzzled, he didn't want to believe this would happen, after all, those people were excellent instructors.

The soldiers in the back quit, and he and Hei Feng were quite familiar, so he immediately stood up to speak out for Hei Feng and the others.

"Captain Qin, I know you are very powerful, but you don't need to keep stirring up our relationship, right? I know that Hei Feng is a very upright person, and he won't collude with anyone like you said."

"But now that's what I've judged. Do you think normal people will leave this place at night? Besides, with so many of us searching for them, are they carrying fire sticks? As soon as a shot is fired, all of us Everyone knows."

This is indeed a relatively big problem. Since their disappearance, no gunshots have been heard.

"It's possible that they lost their equipment when they were washed into the water, and that happens too."

"Hehe, it's really funny. They are not ordinary soldiers, they are all excellent special warfare instructors. How many times have we said this sentence? We have never lost in so many trainings. How could we lose it here?"

This statement is too far-fetched. If only one person is lost, then it is possible that there are so many of them, and it is impossible for all of them to lose their guns, right?

The secretary also felt that this matter was true, and the impact would be too great. He quickly got in touch with Frank and told Qin Yuan's thoughts.

In fact, Frank also had this suspicion before, so he invited Qin Yuan here.
