

Special Soldier 1531

Chapter 1531: Are my comrades out?

They have already searched before this, and there is no clue at all. It is impossible for such a few people to disappear out of thin air.

After returning to the Hunter School, Qin Yuan asked them to find the rest of them. There was no need to go any further, and there were no clues if they went looking for them. They were deliberately avoiding them now.

Now he could only continue to interrogate the only soldier who survived. After all, he acted with Hei Feng and the others, so he might know something else.

However, most people still feel that this is a kind of slander to their instructors. They have already passed a strict test, so why should they betray the organization?

Lao Hei and the others stood outside and blocked the others, not allowing them to enter the ward, only allowing Qin Yuan to visit.

"What do you mean? Why are you so overbearing? Can none of us go in? We all have the right to know the situation."

"Hey, let me tell you, our instructor is inside, let him ask first!"

"Damn! Why are you **** so overbearing? What are you doing?"

"Whatever you do, now our instructor is inside, no one can go in."

Seeing the tough attitude of these few people, everyone has something to see about their skills, and no one dares to act rashly, so they can only wait anxiously in the corridor.

After a while, Frank and the secretary also arrived, and everyone couldn't help complaining to him.

"Colonel Frank, go and have a look. This guy is really going against the sky. He doesn't give us room to discuss. He slanders our instructor at will and stays in the room so domineeringly. That's the only one. survivors!"

Frank ignored him, strode forward, and the moment he opened the door, he turned his head to look at him and said seriously: "Don't forget, the only survivor was also rescued by Qin Yuan, without him there would be Is this a survivor?"

The people in the corridor were silent for an instant. Indeed, if Qin Yuan really wanted to do something, there was no need to save people.

After Frank walked in, he saw Qin Yuan and the soldier sitting face to face. The soldier's injuries had already recovered, and now he had just gone through the disaster, so he was still psychologically traumatized.

He didn't say anything, just sat beside them quietly, and didn't interrupt their conversation.

"Recall carefully whether you have any special circumstances during this training, has Hei Feng said or done anything?"

The soldier also began to think carefully. What he was more anxious about now was to know whether those people had been rescued.

"Why do you ask that? But how are they doing? Have my comrades come out?"

"Don't get excited, answer my question first, and I'll tell you the rest. Your answer is also very important for us to find him. Remember not to let go of any details."

Hearing this, the soldier recalled carefully. According to his description, there was nothing special about it. It was just that Hei Feng called them together a week before the training.

That is to say, there are some negative aspects of the Hunter School. The main reason is that the Hunter School is too unfair now. On the one hand, the status is unfair, just like they are just ordinary instructors now.

There is no chance of advancement. On the other hand, it is to perform very dangerous tasks, but the salary is not so high.

Chapter 1532: the secret of many years ago

But at that time, they just thought it might be a simple complaint. For them, the treatment of the hunter school was already very good, and they could be regarded as able to win glory for the country and issue various tasks.

But Hei Feng's purpose was obviously not this. He kept instilling in everyone the idea that the outside world would be better and they could leave the Hunter School, but the team members opposed this idea as soon as it came out.

Hearing this, Qin Yuan interrupted him, "Who are the people who oppose it? Does it include you?"

Although the soldier didn't know why Qin Yuan asked, he still nodded. Speaking of which, he recalled that the people who fought against them seemed to be a little different.

When they were about to conduct confrontation training, they were suddenly divided into groups. There were a total of 30 of them, but the distribution ratio was very unfair. There were only nine soldiers in total.

Nine people were on defense, and their side was on offense, but it was training after all, and any situation could happen. Although the distribution was unfair, no one said anything.

Thinking about it this way, the problem is really too big. The team led by Heifeng still has heavy firepower weapons, like howitzers. At that time, the howitzers directly hit the mountain cannons. It took three shots in a row before the landslide occurred. , they were on the hillside, there was no time to run.

At that time, the accident happened so fast that he didn't have time to react, but now that he thought about it carefully, there was indeed a problem.

"Then how did you know for sure that their bridge collapsed at that time?"

When asked, the soldier was suddenly stunned. To be honest, he did not see the bridge collapse, but there was indeed a bridge opposite them. After he woke up later, someone came and told him that the mudslide on the opposite side had washed away the bridge, so other people Most likely fell off the bridge.

This is the key problem. Qin Yuan looked at Frank next to him and told him what he found. At that time, he found something was wrong, because in the direction of the bridge, it found some fine shell fragments. attacks.

Only then did another mudslide erupt, because that location is still relatively far from the direction of the bridge, even if they fall due to the impact of the mudslide, they will immediately realize that it is impossible for them all to fall.

Speaking of this, Frank's face was serious. It seemed that the chances of these people colluding with those criminals were too great.

The current inferred situation is that they were covered by landslides. These few people are definitely not accidental, but because someone among them should have discovered Hei Feng's secret, or they could only kill him if they didn't cooperate with Hei Feng.

Qin Yuan also couldn't figure out what made this guy suddenly so crazy. He had a duel with himself before, and it seemed that something went wrong.

After a while, the secretary opened the door and came in. He presented the results of his investigation. Before they discovered that area, there was only one group of militants stationed there, but they slowly disappeared after being suppressed by them.

Those militants are now slowly expanding, because with the suppression of various forces, they can only unite together and slowly become a large group.

It seems that if Hei Feng and the others wanted to join the enemy, they would most likely go to their side, where the treatment is very good.

Chapter 1533: bad guess

In the last month, they were still recruiting a large number of various mercenaries from the world, and the treatment they gave was also very generous.

They also have a photo of the ringleader and some basic information.

However, this boss is very low-key, and usually does not cause any major incidents. The main thing is to let some of his subordinates solve it, so they only discovered the trace of this boss in the past two years. During the previous arrest operation, this The boss fled, and the militants disappeared.

In addition to this, they found other clues. Following this clue, they found that they had been recruiting people not long ago.

It can be said that it has merged all the small criminal groups around it.

Seeing this, Frank was very surprised. So many people have merged, what exactly do they want to do?

And the secretary also gave another news, something happened in Hei Feng's family, he urgently needs a large sum of money, his daughter is going to have an operation and needs a large sum of money.

Judging from the combination of back and forth, Hei Feng and the others have indeed entered this organization. Although the secretary can't believe it, all the evidence now points to that.

They searched for these four or five days, but found no clues. They said that if you are alive, you must see people, and if you die, you must see corpses. They are already beyond the range of the river, but there is nothing.

While the secretary was on the phone, he marked a few marks on the map, "According to our intelligence personnel, the area where they have been active recently is near these points, and their activities are relatively frequent."

"Then can you still monitor it now?"

"There is no way now, and these activity points were all last month, and there are no recent ones, because the intelligence personnel we have placed there have been discovered and can only be evacuated."

The secretary was also very helpless, that was all he could grasp now, Qin Yuan stepped forward and looked at the marked points on the map, his child's hole tightened, something was wrong with this situation.

"Come and see the circle of their activities. It is very regular. It doesn't look like they are trading, but they seem to be observing somewhere. There is something in this place."

Although these militants would keep changing places in order to avoid the detection of some police, but these are the places they changed back and forth.

When Frank stepped forward, he had a bad guess in his mind, but he still asked the secretary to verify it.

"If I remember correctly, if their purpose is really that thing, then this matter is too big."

"What does it mean?"

"It was many years ago. At that time, I hadn't even come to the Hunter School. To be precise, the Hunter School hadn't been established yet, and I was still serving in the Marine Corps."

Frank lit a cigarette, and then slowly recalled that it should be that place in his memory. He was unwilling to recall it for so many years. Small squadron leader.

But he was the only one of the 20 people they went together that time. The task that time was very special, and the distribution leader didn't say anything about the task. There are also special forces from other countries.

Chapter 1534: The file is also destroyed

A total of people from five countries participated in the operation. When they arrived at the place, they knew that the exact mission was in an underground experiment base, where riots broke out, and they needed to rescue the experimenters.

And what they researched there was an illegal experiment, which belonged to the underground project conducted by the United States. At that time, the weapon they experimentally researched and researched at that time, as long as it was released, it was enough to destroy the existence of half of the earth. horrifying.

So that operation was also carried out under absolute secrecy. Frank who participated in the operation did not know how serious the matter was, but when they entered the laboratory to rescue the experimenters, one of the doctors was very abnormal and hugged a doctor tightly. box.

In the end, in desperation, he handed the box to Frank and asked Frank to take it out. At that time, Frank's goal was to take all the experimenters out. He didn't understand what this person was going to do.

However, just as they left the laboratory, a violent explosion suddenly occurred, and a group of masked armed men suddenly shot at them. At the same time as the explosion, these people also rushed up.

They didn't have time to react, and the powerful explosion shattered them to pieces. Those researchers were also killed and injured.

Frank's luck was better. At that time, he was blown into an abandoned pipeline and escaped the catastrophe. He vaguely heard the order from those people, which was to kill these researchers and not release them. any researcher.

They don't care about the soldiers who were killed, but they re-injured the wounded so that they could not fight back.

Frank hid in the pipe and watched all that indifferently. He watched his comrades fall one by one in front, but he didn't dare to make any sound.

At this time, he remembered that the box in his hand was given to him by the doctor before. What is it that is so insane that it wants to kill everyone.

But because of the violent explosion just now, the contents of the box were also damaged. Only half of the box was still in his hands, and the other half had been completely burned, and the documents inside were also destroyed.

Frank, according to the remaining half of the clues above, only roughly learned that there is a very powerful weapon that is also very destructive, and what they are studying is this project.

There is also half of the researcher's notes inside. Most of the things recorded in the notes have been destroyed, but some fragments can be seen imitated.

Probably because their research was very peaceful at the beginning. All five countries participated in the research, but after the research was completed later, everyone began to reveal their nature. After all, everyone wanted to obtain this powerful weapon and did not want to share it equally.

Disagreements arose later. The United States wanted to seize it directly because their military capabilities were number one at the time.

They have already sent people to take action twice, but they all ended in failure. After all, the defenses in the basement are also very strict.

After that, they turned their faces completely. In the end, in order to appease everyone, people from the five countries could only send their respective teams to take the experimenters out to study and temporarily stop. As for the research on weapons, we will talk about it later.

Chapter 1535: just our guess

Then Frank and the others dispatched to rescue these people, and the last thing became like this.

Frank was already injured at the time. He endured the pain and destroyed the notebook and the remaining information in the passage. He knew that he might be the last to know about it.

In the end there was another powerful explosion, and Frank was completely stunned. When he woke up, he was already in the hospital. He was the only one who came back from their team. One or two survived.

But no matter how they asked at the time, Frank said that he reported it himself, but he knew that a group of armed men rushed in and blew them unconscious, because he knew the seriousness of the situation and could not disclose this matter to anyone.

At that time, he was not strong enough, and he didn't know who to trust, so he could only keep the secret.

He didn't expect that this criminal group is now surrounded by the place where they acted before. He didn't know if it was a coincidence. Now that many years have passed, he himself has strength, and Qin Yuan can be trusted.

After listening to his story, Qin Yuan was even more curious about what kind of weapon it was.

"Didn't you investigate after that?"

"I do have the ability later on, and I want to investigate, but that side has been sealed as a military restricted zone, and there are people on duty all year round, so I can't get in at all."

Frank sighed. He hoped it wasn't the place he mentioned. If those guys were targeting that place, once that destructive weapon came out, it would really be a threat to the whole world.

But things often don't develop in a good direction. When the secretary came to report, he accurately mentioned the place, Mount Santo. When this place was mentioned, Frank's eyelids twitched involuntarily, reminding him of those Painful memories.

The secretary hurried forward and asked him what was wrong? Frank shook his hand. It seemed that things were really as they predicted. The target of these militants this time was not that simple, but everything was just speculation.

"It's been so many years now, the place has been well preserved, and it's just speculation on our part, I hope it's not true."

"Now we still need to consider the worst of the situation. There are too many things involved in this matter. I hope everything is a coincidence, but they are recruiting talents everywhere, and even the hunter school has been poached. Suspect."

Frank is a little unwilling to accept the facts, so he is making excuses for this matter. In this way, the chances are indeed too high.

Qin Yuan said that now he should notify other people immediately, let everyone be vigilant, and mobilize everyone's strength to find these criminals.

To avoid greater losses, if the situation really exists as Frank said, they use that destructive weapon.

Frank was a little excited and stood up, "Absolutely not, I may be the last person to know, I'll go tell them what they will think now? These are some top secrets..."

Speaking of this, he hesitated to speak. Frank knew that although he had made a lot of achievements over the years and had a hunter school, he really couldn't afford to offend the people behind these secrets.

Not only the country he was loyal to before, but also the other four countries, and now he doesn't know where the situation has developed.

Chapter 1536: devastating weapon

This matter cannot be revealed for the time being, he stood up and looked at Qin Yuan solemnly.

"It can be said that you are the second person who knows about this matter. After that incident, the people I went to inquire about. At that time, they found no other documents and knew nothing about that attack."

Frank was worried that Qin Yuan would not believe it, so he took out a document from another cabinet. Qin Yuan took it over and examined it carefully, and it turned out to be the investigation record of that incident back then.

It was just a photocopied version, and it seemed that Frank at the time was unwilling to let it go, so he deliberately participated in the investigation.

The above is the transcript of several survivors at that time, because the operation at that time was considered a complete failure, and all the researchers were killed. The overview of this incident is that they suddenly suffered an armed raid, and there is nothing else.

Qin Yuan turned to the next few pages, and there was nothing else, so Frank was very sure, but he was the only one who knew about it, because the pair of researchers they sent with them was also quite special, and they were the core members.

"But it's been so many years, will that weapon be transferred and what's the situation over there?"

Frank shook his head. He knew nothing about these things. The situation at that time was too complicated, and there were some things that he should not know.

Including that although he has some abilities now, he still can't fight against those people. It was kind enough for them not to kill everyone back then. After all, if everyone died in that accident, it would be too far-fetched .

So there are still a few survivors left, but they don't know anything about these survivors.

Not only that, Fran took out two other photos, which were two other people who survived at that time.

"This is our survivor at the time. One of them was seriously injured and was not rescued. I have heard about these two people's whereabouts over the years, but they all disappeared."

The reason why Frank was able to reach this position today is also because he knew that only by desperately climbing towards the top would he have a chance of surviving.

Now he is considered a public figure. After all, he is the principal of the Hunter School. This place can be said to be the safest place. There are so many elites under him. If someone really wants to assassinate him, it will not be easy.

In recent years, many criminals have put him on the killer's wanted list, and paid a lot of money to buy his head, but the hunter school is not easy to provoke, and he has passed these years safely.

Frank was a little melancholy when he said this, "Let's put it this way, I don't know whether these arrest warrants were issued by those criminals, or by those who wanted to destroy all evidence before."

"I didn't expect such a thing to happen back then."

"I know that your ability is very powerful, but you also know that offending these people behind you will not end well, so we have to investigate now, we can only investigate in secret."

In fact, from the beginning when he transferred Qin Yuan here as an instructor, he was observing Qin Yuan, because he knew that this matter could not simply end. Although it has been so many years, he has been making preparations, including so many teams from Hunter School.

Chapter 1537: core area

Now it is really a coincidence that Hei Feng and the others are missing, so he can start searching all around openly.

Qin Yuan understood the seriousness of this matter. Frank was a little worried after talking to him, and asked his opinion again. If he wants to leave now, he can do it at any time. Happened because it was too big.

Seeing that Qin Yuan has not spoken, Frank is quite reasonable.

"Things are very easy to understand. If you have other concerns, you can go directly now. I have absolutely no other excuses. I will send someone to send you back immediately."

"This is not necessary. I said before that the thing I like to do the most is challenging."

After Qin Yuan finished speaking, he showed a smile, and then walked out of the office. This time things really became more and more interesting.

Because Frank is special, he can only let Qin Yuan lead the team to search on the previous routes.

The criminal group seemed to have disappeared without any traces. These criminals would trade around, but it had been a week and no records of their transactions had been found.

Qin Yuan was also a little uneasy, which further explained why they were preparing for the action.

The goal of so many people is really too big. Since I already know the place Frank mentioned, I might as well go and check it out first.

Qin Yuan turned around and explained to Lao Hei and the others, asking them to lead the team around and continue to look for him. There is something that needs to be dealt with.

It was completely dark, and the entire jungle was very quiet. Qin Yuan slowly approached that area. Under such circumstances, his eyesight was brought into full play.

When he approached that area, he found that there were already patrolling guards lurking in various places in the jungle, but none of these troubled Qin Yuan. He passed through smoothly and escaped these detections.

Passing through the guards here, he speeded up, and now the night is his best time to hide, his figure has merged with the night.

With the super skin ability obtained before, he can adjust the temperature of his body at will, even with a thermal sensor, there is no way to find him.

At this time, he suddenly squatted down. He really didn't expect that this area was really special. It was about 1 kilometer away from that place, and it was densely buried with landmines.

There are also various ways to cover these landmines. Some landmines cannot be eliminated at all.

If one of them is accidentally triggered, it will be a piece. There is no way at all. All the wires are connected together. If the person who arranged the mines at that time was also an individual, he used a wire to hit all the mines on the ground. Together, more than a dozen mines passed by in a row.

Qin Yuan circled the minefield in a circle, the density of the discharge was too great to go around at all, and the width was also very large.

These mines completely protected the front. He squinted his eyes and climbed to a tree, only observing the faint traces of someone smashing in front of him. He saw that some military tents had merged with the surrounding woods.

Since there are people stationed in front, it is the core area.

Chapter 1538: 1 some military tents

They have been guarded all the time. From the looks of it, they should be resupplied with support from the sky, otherwise such dense minefields would be impossible to get through.

The span of this minefield is too large, more than two hundred meters at least. Qin Yuan looked at it and wondered if he could jump over it.

He has a world-class jumping ability now, and the speed should be about the same, because of the distance problem, he just made an estimated range, there are about 200 meters of minefields, but whether it exceeds this range, he will Some are uncertain.

At this moment, he kept thinking about the things Frank said before, the powerful weapon that caused destruction, and he became more and more interested.

Finally, he took a deep breath and adjusted his breath. He took a few steps back and borrowed the diving posture, coupled with his own speed, combined with his absolute jumping ability.

He showed a perfect arc in the air, and finally landed steadily, exceeding the range of 200 meters he estimated just now.

After Qin Yuan stood firm and looked back, he had to say that his judgment just now was really thrilling. The minefield has been completely extended, and the fan-shaped position will only become wider and wider. No wonder he saw more than two hundred minefields just now. Meters, fifty or sixty meters more than the actual distance.

But fortunately, his jumping ability is not a problem at all, he directly surpassed the width just now, and landed firmly on the ground. He looked forward, and there would be no problem here. Domi.

I saw electron pillars inserted one by one all around. These electrons live in the dark and flicker microscopically. It seems that there is nothing unusual, but this is the latest mechanism ray.

This is more effective than artificial guarding. There are electron beams around, let alone someone passing by, even a small animal will immediately sound an alarm.

I really didn't expect the security here to be so strict. It has been said that it has reached the highest level, and the importance of the things inside can be seen even more, and it can be said that nothing has been transferred.

Qin Yuan couldn't be bothered by this. His eyesight has been completely upgraded. In the dark, he can not only achieve the effect of a thermal imager, but also clearly distinguish the laser rays in front of him.

In the darkness, he posed in various poses, dodging the miscellaneous rays, and slowly passed through the area.

Just when he jumped over, he saw the sniper hiding in the dark, but he didn't expect the sniper to fall asleep. It's also because the defense here is too tight, with so many layers, the sniper will be careless sometimes.

Qin Yuan walked past this soldier without a sound. He didn't notice anything. He hid his aura. When he went to the front, he saw a patrolling team, and then he saw some military tents. According to those military tents, Judging by the wear and tear, you've been here a long time.

That destructive weapon is indeed there, but these soldiers are just wearing ordinary uniforms, and they can't tell which country they are from, and he doesn't know, but according to what Frank said before, it may be that several countries have joined forces to put it here security forces.

He circled around. It should be that the security outside is relatively strong, so he was a little lax when he came to them, except for the team members who were patrolling just now.

Chapter 1539: how did you get in

The other tents were quiet, and he counted four.

The guards inside were a little lax, but when I walked inside, I saw an iron fence, and there were four guards there, one of which belonged to the heavy machine gun point, so there are such heavy guards arranged in this place, could it be Is that the weapon?

The four stood in a few corners and did not speak. Qin Yuan only used time to pause so that he could enter. After all, once found in this place, it would be quite dangerous.

The main reason is that the back of the weapon below is not clear. Qin Yuan used the time to pause the iron door that he successfully passed through, but the lock on the iron door is an ordinary lock, not an electronic lock, and it doesn't look that strict. .

He quickly opened the iron door, and then restored it to its original state. The writer pretended to go in before he woke up. After entering, there was a long passage, and there was a relatively large space below.

Finally seeing that weapon, Qin Yuan was also a little excited, but just after he walked in, there was a room in the innermost room, and a door with a lock on it.

The door locks are all ordinary, and they don't look like places where important weapons are often kept.

But it was all here, he still unlocked the door, the moment the door was pushed open, he saw a small bed inside, and a man was lying on the bed, but the man was already in a state of white hair, when he heard the movement He turned around slowly.

The man seemed to be a little unconscious in sleep, rubbed his eyes, and after seeing Qin Yuan clearly, his eyes became excited.

This was the only person he had seen outside the station in these years. He stood up quickly, and Qin Yuan stared at him vigilantly.

"Have you come to pick me up? Are you planning to let me out?"

The man asked several questions in a row, but Qin Yuan had no idea what he was talking about. Is this man imprisoned?

"Calm down first, who are you? Why are you here?"

The man was shocked when he heard this, Qin Yuan didn't even know his identity, so how did this guy get in? Could it be that the people above have withdrawn, and there is something wrong with this weapon, but it should be impossible.

His excited hands trembled slightly, and he hurriedly asked Qin Yuan about the situation outside.

"Where are those people, and those guards, how did you get in?"

"You don't need to worry about this, but I must have come in without them noticing, of course I have my ability, I'm just curious, why so many people are guarding you but you, don't you mean that you have a major weapon? ?"

After listening to Qin Yuan's narration, the man understood that Qin Yuan just came in secretly, and didn't take him out. The light in his eyes completely dissipated.

A full ten years have passed, and he never went out, staying in this dark and small room.

He didn't know how to describe it. The moment he saw Qin Yuan, he saw hope, but the news Qin Yuan brought drove him to the bottom of the valley again.

"Maybe you can tell me about your current situation, and you may help me. If you are not my biggest second-level person, why do they lock you up?"

The man just kept sneering, he thought it was right, he was not a sinner in the first place, why did these people take care of him and let him waste so many years of time.

"I don't know how much you know about that weapon, and I don't know your identity, so why should I tell you?"

Chapter 1540: surviving researchers

Qin Yuan didn't intend to talk to him either, and planned to go directly to check his situation. If this entanglement continued, it would be more troublesome to be discovered. He was really curious, why there are so many guards here, but only one person?

Just when he was about to approach, the man suddenly jumped on the bed, and then took out a dagger from nowhere.

"I know you were sent by them. You don't want to get any news from me. As long as you dare to come over, I will kill myself."

Qin Yuan snorted coldly, he couldn't control these things at all, no matter how much the man killed himself, he could save him.

"Do you think you can threaten me?"

The man's hands were already trembling, and he threatened Qin Yuan not to approach him, but Qin Yuan ignored him at all, and instead walked towards him step by step.

He was willing to go all out, and directly stabbed at Qin Yuan with a dagger, but with his little means, Qin Yuan easily punched him directly on the bed.

The corner of the man's mouth was bleeding in an instant. He could not move in the smallest space these years, and his body was not as good as before. Unexpectedly, he fell on the bed from this punch and could not get up again.

He huddled on the bed and kept backing away. Qin Yuan stepped forward and pressed on his head, directly invading his consciousness.

The man just felt that he lost control in an instant, his mind went blank, and he didn't know anything, and Qin Yuan quickly read it in his consciousness.

It took a long time for Qin Yuan to figure out the truth. It turned out that this man was not a criminal, but a researcher at the research base. His position is very important.

Back then, the five countries jointly developed this weapon. After the weapon was successfully developed later, the United States had a strong ambition. They wanted to monopolize the power. The reason they gave was that they usually paid the most money.

A lot of money has also contributed a lot of talents to do research here, so they have the first right to use it.

But everyone knows that as long as the US has the right to use this weapon, there is no chance of returning it. This weapon is so terrifying that it can destroy everything. With this weapon, the US will never let everyone go. In the eyes, let alone return.

Several countries were in a turmoil in an instant. Everyone was arguing. This weapon did not want to be meddled by others. The United States took the lead. They came to ***** it many times, but failed. They also planned inside the laboratory. The people who use them want to create internal conflicts.

But everyone understands that no matter who this weapon falls into, it is not a good thing, and the situation inside is not optimistic compared with the outside.

The core personnel of the weapon development is the man in front of him, Adasi, and several other core research members have been killed, but before that they have worked out a plan together, and everyone knows that this weapon will be released after it goes out. What a dire consequence.

They jointly developed the most powerful security system and sealed the weapon underground. The three researchers are in charge of the code together. Each of them only knows part of it. To open it, three codes are required to activate at the same time.

This is an underground security system, and its protective devices can withstand the explosion of nuclear weapons.
