

Special Soldier 1541

Chapter 1541: not the same kind of people

There is no password, as long as it enters the wrong three times, it will enter the self-destruct mode, and the weapon will also be automatically destroyed.

But this is also the last solution to protect everyone, but what they didn't expect was that the United States was insane in the end. They didn't play their cards according to common sense at all, and people from several other countries sent people.

Everyone wants to take these researchers out together, but in order not to let your secrets be leaked out, the United States sent a professional team and laid a bomb to kill everyone.

This professional team originally wanted to take the weapon away, but found that the security system below had been activated. We tried our best and couldn't open it rashly. Finally, the team notified the superiors above.

Scientists were immediately sent to check, but the security system was too powerful to be unlocked unless they knew the password, but two of the researchers who knew the password had already died in the explosion.

People from other countries also quickly reacted. After all, this weapon is not exclusive to them in the United States. Finally, this base was established with the joint efforts of several countries.

But this weapon has been below, and they have no choice but to take it out. Several countries can only send people here to guard it.

Adassi was the only one who survived knowing the code, he only knew half of it, and he didn't know the remaining two parts of the code.

These people can only temporarily imprison him. Over the years, they have used various methods, even threatening the lives of his family members, to get that part to be revealed, because this will make it easier for peripheral scientific researchers to decipher.

But Adasi also understands that as long as the password is spoken, he will have no meaning of existence. These people are doing whatever they can to save their lives. This password is the only way to save their lives.

Over the years, after deciphering by the scientific researchers on the periphery, there has been no progress at all. This security system is too strong, and if there is a slight mistake, it will self-destruct.

So he was imprisoned in this place. Qin Yuan couldn't help but lament the perseverance of the man in front of him after reading it. After so many years, he still kept silent.

And Qin Yuan also successfully found those codes in his deepest consciousness.

After understanding the ins and outs of the matter, Qin Yuan let go of the man's consciousness, and he woke up slowly. He didn't know what happened, and stared at Qin Yuan vigilantly.

"How many people have you sent over these years? I can't tell you clearly, but you'd better stop thinking about it, I won't say anything."

"I'm not the same type of person as they are, but don't ask me who I am. It's inconvenient to reveal it now, but I can assure you that I'm someone who can rescue you. Are you willing to go out now?"

Adasi couldn't believe it, but soon he sneered, because he thought this was their strategy.

"Hehe, do you think I don't know? You have used many methods over the years. Now you want to let me out to give me hope, and then you will force me to ask for my password when you go outside, right?"

Qin Yuan didn't say much to him, but stepped forward and whispered in his ear, "5623!"

Hearing these four numbers, Adasi's body couldn't help but tremble, how could it be possible? How could he know the password? This is the biggest secret he hides in his heart.

Chapter 1542: dare not let out the air

His eyes slowly turned to fear again. After waiting for so many years, is he still about to fail?

Qin Yuan knows that this scientific research talent is not a sinner, on the contrary, he has been protecting the password all the time to protect everyone.

Now, although people from several countries have united again and jointly established a protection base, this balance will be broken one day. Once this weapon comes out, it will kill everyone, so no matter what, he will No password will be provided.

"You don't have to be so shocked, you can trust me completely, and I won't reveal it to anyone, just remember that I'm here to help you."

"Can I trust you?"

He slowly said these few words, he was not on the bed, his eyes were dull, the secret he had been keeping for so many years was still known by others.

After a while, he sighed, "There were so many people at that time, there were a total of 362 people in this underground laboratory, and 362 fresh lives were infected and injured by him. In their eyes, these are nothing."

This is why he kept the secret. Qin Yuan said that he could take him out, but he shook his head and refused.

"Although I don't know who you are, I hope you can keep the things here. You know that secret. I don't know how many people outside know it."

"Don't worry, I used some special methods to know this number just now. At present, only you and I know it, but I'm not sure whether the two passwords you mentioned were really destroyed."

Adasi seemed to know something else, he was a little uncertain, and it took him a long time to speak.

"If the two researchers are not dead, it is very likely that this secret will still be known to others, and only the password can be opened."

He kept saying that only the password can be opened. This sentence completely awakened Qin Yuan. Do those guys have the password? Otherwise, they would engage in such a big battle.

The criminal group is gathering personnel everywhere, and they want to break in. Do they know that this weapon has been protected by the strongest security system, or do they already know the password?

These questions have been lingering in Yuanyuan's mind, and he doesn't know how to explain it. Qin Yuan intends to check the strongest security system first.

Adasi collapsed on the bed like a walking corpse. Qin Yuan went out and locked the door again. Now he can't startle the snake, he has to go out to verify something.

According to Adasi's memory, he came to a tent on the left. Before, he thought that this tent was where the soldiers stayed. It seemed that in order to hide the eyes and ears, he built a tent directly at the exit.

According to the previous method, he successfully entered the tent. There were many security personnel inside the tent. At this moment, they couldn't see Qin Yuan. Qin Yuan had already merged with the surrounding environment, and he didn't dare to show his air.

After bypassing these people, Qin Yuan followed the passage under the tent to the deepest point.

What caught his eyes was an iron gate with a height of more than 2 meters. The iron gate is like a large safe, and various laser instruments are set up around the iron gate.

Qin Yuan used his ability to successfully shut down the mechanism, and then came around the iron gate.

Chapter 1543: no one else knows

Except for a small opening for entering a password, there was nothing special about it. He stretched out his hand and pressed it carefully on the iron door, trying to sense something else.

"System, how about this thing? Can you analyze it here?"

The system has not responded, Qin Yuan can only change a method.

"System, recycle."

Originally, he wanted to use recycling to analyze the material of the current security system, but the system gave another answer.

"Ding! Remind the host that the security system cannot be used as a recovery!"

"Can you sense the power of that thing inside?"

After a while, the system made an analysis, and the system gave a series of data analysis, which was very intuitive. It directly analyzed the damage caused by the weapon once it broke out.

After seeing it, Qin Yuan could only describe it as being shocked. From the base to the periphery, everything has been turned into ruins, involving a very wide range.

There is a sea of flames everywhere, and there will be no living people in these affected areas, and many people will be reduced to ashes in an instant.

The harm caused by the scope involved is too exaggerated. It can even be said that, according to the final analysis made by the system, even Qin Yuan could not stop such damage, because such damage can instantly make the People become ashes.

"System, if I enter this security protocol, will I recover that weapon?"

"Can!"

The system still gives a cold answer. After all, it is electronic, and the system can only make objective analysis. The biggest problem now is how to break through this weapon. It is too dangerous. Qin Yuan thinks that it is better to keep it in his own system among.

He walked to the place where he had entered the password lock, stretched out his hand and began to sense slowly, he wanted to use his hacking skills to see if he could successfully decipher the password.

He tried it for a while, but found that it was not working. Although his hacking skills had reached the top of the world, the underground security system was beyond his imagination.

There is currently no way to decipher it, and this is indeed something that the five countries have not researched for nearly ten years.

Qin Yuan felt that there was still a risk of leaking this matter. Although it was the top secret, some survivors would emerge one after another.

Just like Frank, no one else knows until now, he is the one who knows the half-secret.

After going out from here, Qin Yuan came to the basement where Adasi was held again. He made a decision, and he still planned to tell Adasi what he knew. It can be seen how hard Adasi has worked to keep this secret.

After Adasi knew everything, he still couldn't believe it, because those people outside had used various means to interrogate him over the years.

"How can I believe this when you tell me? I wonder if you made it up."

"If you think I made it up, what about the password just now? Do you really want these things to be in other people's hands? Now you can completely trust me."

Adasi thought carefully for a long time, "I can trust you temporarily, although I don't know whether this password can guarantee security, but at that time, the few of us reached a mutual agreement, there must be no problem on my side, but I don't know Did the two of them leak out before?"

Chapter 1544: Scholar's Revenge

Ever since his password was leaked, he also began to have doubts. Now he has no hope. Qin Yuan intends to rescue him, but he just smiled and shook his head, it doesn't make any sense.

"You don't need to save me, you can go straight away, you already know about this, it doesn't make any sense to me now."

"I don't know what to say to make you believe me, but I'm definitely not what you think."

Adasi didn't say anything, just waved his hand, and then leaned on the bed silently. Qin Yuan saw that this guy really didn't want to go with him, so he had to go back first. Even he couldn't do anything about the password.

But he can indeed recycle the contents inside, and the weapon must not fall into the hands of others, no matter it is a threat to a country.

After going out from here, Qin Yuan found Frank and told him that he had gone there, and also said that he knew part of the password, and there were two parts left.

After Frank heard it, he didn't react, because as far as he knew, the guards over there were very strict, and there was no chance of getting close.

But looking at Qin Yuan's confident appearance, he knew he couldn't make a mistake, but he didn't expect that this guy was so capable, he could come and go freely like this, and it was said that even flies couldn't fly in that place.

So the most urgent task now is to find the boss of the organization behind which Hei Feng and the others have taken refuge.

I don't know if these guys want to attack by force, or they know the password, but these guys seem to have disappeared without any trace.

Soon the secretary sent the latest news. The boss of this group was code-named Scholar. This guy was very ordinary before, and basically no information about him could be found. He used to be from Southeast Asia, and he immigrated here later.

After many investigations, the secretary only found some basic materials, which were basically some photos and materials of the scholar when he was studying.

This looks like an ordinary person, but this scholar has completely disappeared since graduating from high school, and there is no trace of him no matter what.

Then, just four years ago, the particularly large black-spotted riot was mainly about the infighting between big gangs. At that time, the local police were just waiting to die. The hands of their own people, except these people.

What they didn't expect was that the gangs involved in the fighting reached some kind of agreement overnight, and then elected a new boss. The new boss led the remaining gang members to quickly

disappear into a position, and the local police rushed. When they arrived, nothing was found except the dead bodies.

This new boss is a scholar. According to the situation given in the information, this guy is gentle and gentle, and it is difficult to connect with the gangsters, but his methods are very cruel. A rule has been re-established in the whole gang. Their rule is that there is hatred. It must be reported, no matter who it is.

After eliminating those small gangs and re-establishing a big gang, his number is increasing. The scholar named this gang revenge.

Gradually, this organization is getting bigger and bigger, and they will also engage in some large-scale friendship activities, mainly because the people in their organization are too united, and it is difficult for them to find flaws.

Chapter 1545: passed the message

The unity within the organization is also thanks to the scholar's excellent leadership ability. It seems that this person is really not an ordinary person. Qin Yuan picked up his information and looked at it carefully. He wore a gold-rimmed glasses on his information photo, but it was just his student. The photos from the period look quite sunny and cheerful.

"Then have you found his family members based on clues? Are there any other relatives?"

The secretary shook his head, the embarrassment, at this point, he took out another document, that is, in the year when the scholar graduated from high school, a huge change happened at home, his parents and a pair of twins at home. Both sisters died tragically at home.

It was a sensation at the time. The scholar's family was very well-off. His parents were relatively well-known scientific research talents, but he did not expect to be killed at home. At that time, he became a famous suspense case. It has not been solved until now. After death, the guy simply disappeared.

Qin Yuan looked at the scientific researchers and fell into deep thought. Is there really such a coincidence?

Frank also instantly understood what he meant by knowing what he was willing to say. It seems that this guy should be a deliberate revenge for a long time, and his parents should know some clues.

That's why he was silenced, but the people behind him were too powerful. At that time, he was only a high school student, and he had no way to make any resistance at all.

"Go down and check some of the interpersonal relationships around this scholar, and see if you can find other clues from people around you."

The secretary sighed helplessly. He had checked everything he could. This scholar himself was a master hacker, and his own information had been completely destroyed many years ago. It was a blessing that they could find it now.

Speaking of this, Qin Yuan was even more sure that he should be out for revenge, mainly because the rights of those behind him were too great, and he had no choice but to protect himself as a high school student.

So his information was destroyed by himself, just to avoid being found by others. Maybe he was also on the kill list of those organizations at that time.

Frank was a little excited when he slapped the table. He felt that the scholar's parents must know what information should have been passed on to him before this.

This is a long-planned revenge. If this is the case, it will be terrible. Once the weapon is triggered, the consequences will be unimaginable. Frank is a little anxious, and he plans to report the matter to the higher authorities in person regardless of everything.

Qin Yuan told him not to be so anxious. This matter was more serious than they imagined. In addition, most of the people who knew what he said before had been wiped out. Now that Frank suddenly jumped out again, he might be silenced by others.

But at the moment, Frank can't control that much. He feels that their analysis is the most reliable. With the power of his lover's school, these crazy guys can't be stopped at all, and everyone should be mobilized to strengthen vigilance.

Qin Yuan couldn't persuade him either, so he saw Frank tidy up and leave the office in a hurry.

He felt that things would not be that simple this time. Although Frank's idea was good, those people didn't think so for the sake of profit.

Frank was sitting in the car, his gaze was very solemn, this time he couldn't care too much, he made the school's reputation very high now, how many people want to curry favor with him

Chapter 1546: hide your emotions

His position now is different from before.

So he can fully participate in it now, mainly to prevent this disaster from happening.

On the other side, Qin Yuan also started to make his own preparations. He always felt that Frank's going this time was too dangerous, so he immediately called Lao Hei and the others together and asked them to leave the hunter school first.

Qin Yuan also wanted to call other people, but how could those people obey his command? He just hopes that everything is because he thinks too much, but this reserve force still has to be sufficient.

The abilities of Lao Hei and the others are obvious to all, and this team is also very strong. Qin Yuan took them away from the hunter school and arranged them in a hidden place, letting them lurk in this place first.

And also prepared food for them for nearly a week. After all, the sixth child is the captain of this team. He looked at Qin Yuan's preparations and was a little curious.

"Instructor, what do you mean? Is there any special operation? Why are we lurking here?"

"I can't say for sure now, but it is very likely that you are the last hope of the hunter school. This time, the hunter school will have two choices."

"How did this happen? Why did things become so serious? What the **** is going on, instructor?"

"Now I have no way to explain to you what's going on. I hope that I worry too much about all this, but you must be prepared and listen to my orders at any time."

The sixth child nodded solemnly. He believed in Qin Yuan very much, but everything was normal when they came out of the hunter school this morning. Everyone was still training, and many rookies were sent to them for training. There is no difference from usual.

Now Frank is too excited. He thought that he didn't want to let more innocent people die, but he didn't think about it. In order to kill the insider, those people even hurt many innocent people. They didn't take human life seriously.

Qin Yuan also left the hunter school, he planned to go to investigate around there, if he was lucky enough to meet the scholars, people from their organization, then he could take them down in advance.

At the same time, on the other side, a man wearing a top hat sat on the sofa and played a Rubik's cube. In front of him was a huge monitor, and the picture on the monitor was a home video.

In the picture, a boy's birthday is being celebrated. Everyone is singing birthday songs happily. The boy in the picture is a scholar. At this moment, he is watching the video with a blank expression. Is his happiest time.

But all of this was ruined when he graduated from high school. The scholar was working hard, when he was suddenly disturbed by a knock on the door, and he felt a little unhappy.

But he still put away his angry expression. Over the years, he has learned to endure and how to become an excellent boss, that is to hide his emotions first.

"What's the matter? Didn't I say before that when I enter the secret room, no one is allowed to disturb me?"

"Sir, it's our intelligence personnel at the Hunter School who sent back new news."

Hearing this, the scholar was a little interested and motioned for the man to continue.

"They say Frank left the office anxiously this morning"

Chapter 1547: 1 subtle smile

"Then the car seemed to be going to the Mida Company. This Mida Company is the largest shareholder of their Hunter School, and it can be regarded as Frank's immediate boss."

The scholar showed an imperceptible smile. It seemed that this guy couldn't bear it anymore. After so many years, why is this guy so naive?

Originally, he wanted La Frank to join the gang at first, because he had already seen clearly the faces of those people, and they would not take the lives of civilians as their lives at all.

From the moment his parents died, he completely gave up on those people, and he would never believe their nonsense anymore. He knew that only he had the ability to completely kill those ***** and avenge his parents.

Over the years, his influence has penetrated very quickly, including in the Hunter School, Black Front is just his pawn, and he has other eyeliners in the Hunter School, so their news can be so accurate.

He is very good at taking advantage of people's psychology, and he is also very good at grasping the weaknesses of some people, not only in hunter schools, but also in various places like some special mercenary training camps, where he also arranges his own people.

For so many years, he has been waiting for an opportunity, waiting for those people to develop their own team, and then bring himself here.

At the very beginning, he selected those members of the organization, and some of them were loyal ministers first. After so many years, he can still gather all the people together. This is his ability.

He looked at the man who came in to report, "Let our people be prepared to retreat at any time. The Hunter School has no meaning, and this school will disappear soon."

The man was a little surprised when he heard this. Your school is considered a relatively famous special training school, and it has such a great reputation.

Over the years, many criminal organizations have wanted to eradicate it, and they have many enemies. It is not an easy task to really eradicate them.

"Sir, is what you said true? There are quite a few elites at the Hunter School."

"Then let's wait and see. There are indeed many elites, but can they compete with those above them? Those people's power and power are several times theirs."

After the man finished speaking, he turned around and walked into the room, looking at the picture on the screen, "Mom, Dad, sister, I will definitely avenge you this time."

He threw the Rubik's Cube in his hand on the table, and now he is waiting for an opportunity, and the time is not yet, but he did not expect that the Hunter School would be out so soon, and he originally wanted to use the Hunter School to create some chaos, it seems that there is no This is necessary.

In one of Meida's offices, which is the largest shareholder's office, the person in charge walked in after receiving the notice. He didn't know what Frank was going to do. Why did he come to the company headquarters at this time?

"What? Is there anything going on at the school recently? Or do you need some cash flow?"

He was drinking coffee leisurely. These things were not important to him. The benefits created by the Hunter School were unprecedented. He just provided as much money as needed.

But what Frank said next completely shocked him.

"Mr. Enke, I am not here for funding, but I want you to approve and apply with the people above. I will lead the team to participate in the protection of 064 Heights."

Chapter 1548: reverse black and white

The spoon in Enke's hand stopped turning, and he squinted at Frank in front of him.

"What does that mean? Frank, do you know what it means?"

"I know. I was the only one who survived that operation. I also know some inside information. There is no need to hide now. I just want to protect those innocent civilians."

Originally, Enke wanted to put this matter in a perfunctory way, but he didn't expect Frank to directly tell what happened back then. He gestured for the secretaries next to him to go out.

"Do you know what you mean by these things? These things should not be your business. Get out of my office immediately. I can pretend that this thing didn't happen. The two of us have worked together for so many years. I don't want to make other excessive things." matter."

"Mr. Enke, the hunter school is different from before. The power we are in charge of, our mission is to protect those innocent civilians. This is the junior high school of our school."

Enke laughed loudly when he heard this, saying that the original intention of those missions is too false, he has long since ignored these, and now only the interests are maximized.

The hunter school can bring him huge profits every year, and the tasks they complete every year and the standards for recruiting publicity are a huge piece of fat.

But Frank doesn't think so now, he wants to drag himself into that vortex, and he was born to warn him again, telling him to ignore the things inside, because none of them can offend the forces behind it, including him, the beauty. The boss of the company.

Frank couldn't believe it. In his mind, Mita was already the highest level of existence, so he came to ask to participate in the action.

Enke looked at Frank in front of him calmly. Just now, this guy just mentioned that he was a survivor back then, and didn't say anything else about how much this guy has mastered.

He picked up the coffee, took a sip slightly, "How about this, tell me what you know, after all, I can't send all the people to you at will, in case what you said is not true."

It was too late to think about the seriousness of this matter so much, it was devastating, he told all about his injuries many years ago, and about seeing the documents.

But he didn't notice that just as he was speaking, the person opposite had shown a fierce look.

At the hunter school, the secretary was investigating the whereabouts of the scholar according to Frank's instructions. At this time, he increasingly found that something was wrong.

Originally, he had inadvertently wanted to check on the situation of Hei Feng and the others, because there were really no clues about where they were born, and only after this look did he

discover a big problem. The few people who came in with Hei Feng and the others seemed to know each other. Either they were from the same region, or they had entered the hunter school in the same year.

All of this was a bit too coincidental, even including the competition with Qin Yuan, it seemed that all the timelines were planned by them.

Especially before he wanted to investigate the situation at Hei Feng's home. His daughter was in urgent need of surgery, but when he went to investigate now, he found that the number had become empty, and even the address had been completely moved away.

A bad thought flashed in his mind, it is very likely that there are other people in the hunter school.

Chapter 1549: So close, absolutely fucked

He checked the black front line, but it involved some other things. He found that since last year, some strange signals have been intermittently sent from the hunter school. Their side is completely closed, and these electronic devices are completely closed. It is a unified treatment, but the management later is not so strict.

Looking at it this way now, it feels like those electronic signals are revealing information to the outside world.

The secretary himself was taken aback by the idea that other undercover agents had been mixed into the hunter school. Their hunter school was recognized as a special forces school.

Other countries send their outstanding talents here to practice, and their information is completely kept secret. If someone knows that the information of these special forces is completely sent to the outside, it will be a huge leak!

You said hurry up and tell Frank the news you found, but you made several phone calls in a row but were unable to get through.

He was a little anxious, and worried that he would startle the snake, so it seemed that he could only ask Qin Yuan about the situation first, and when he came to the place where Qin Yuan lived, he found that Qin Yuan was not there at all.

Where could this man go? It was only when he turned around that he realized something was wrong. Today's playground is really too quiet. There are usually training videos, but now it is surprisingly quiet.

Moreover, in the area where Qin Yuan and the others stayed, there were security personnel under the instructor's accommodation area, but there was no one there.

The secretary became more and more uneasy, and just as he turned the corner, he smelled a pungent smell of blood.

Then he heard footsteps, he was so frightened that he didn't dare to breathe out, bent over, and then slowly moved to the inner room, lying under the bed.

After a while, several armed personnel came up, the leader held a **** dagger in his hand, and a pistol with a silencer in his right hand.

"Strange, what happened to the sound that was clearly heard just now? We have already cleared this building, and there are basically no living people."

Hearing this, the secretary was so frightened that he didn't dare to move. He tightly covered his mouth. What's going on? Someone dared to break into their hunter school.

When did their security system do this? People have killed all the people here, and no one knows yet.

At this time, the man on the periphery spoke again, "It doesn't matter how many people there are, the time bomb has been planted now, and within a few minutes, you will be turned into ruins, and this school will no longer exist."

Several people came in to look around, and then searched from room to room. The secretary breathed a sigh of relief when he heard the sound of footsteps walking away slowly.

After waiting for a long time, his legs were already numb. He slowly crawled out from under the bed. Before he could figure out what was going on, suddenly a person came out from behind the door.

"Hehe, there really is a fish that slipped through the net. It seems that you, a little fish, can't escape."

The pistol in the man's hand was aimed at the secretary, and the secretary was ready to die. After all, he didn't have any weapons on him now, and he was absolutely finished at such a close range.

He closed his eyes tightly, but he didn't hear the sound of gunfire. When he opened his eyes slightly, he saw that the man was already lying in a pool of blood, and a figure appeared beside him.

He turned his head and found that it was Qin Yuan. At this moment, Qin Yuan shook his head at him to signal to stop talking.

Chapter 1550: excited secretary

The corners of his mouth trembled, he finally saw hope, just now he thought he was dead.

Qin Yuan led him out of the building slowly, and turned out from the back window. At this moment, the secretary noticed a few people squatting in the grass, and they turned out to be Lao Hei and the others.

"What should we do? We have to notify Principal Frank immediately, and the school was attacked by militants, we have to call for help."

Qin Yuan shook his head, telling him not to be so excited, it's too late now.

"It's safest to stay here now, and it's best not to move around."

"What do you mean, aren't we going to rescue them now? Those people kill people without blinking an eye. I heard just now that they also set time bombs."

"We can't save other people at all now. They are all surrounded inside. Take a good look. The number of these people is several times that of your school."

Following the direction of Qin Yuan's finger, the secretary's widened eyes were surrounded by densely packed armed personnel, and even armed tanks drove to the door.

At this time, gunshots were heard inside the hunter school, and someone discovered their actions, but all this was in vain. The number of these people on the periphery was several times their number, and their weapons were more sophisticated than theirs.

It's not that Qin Yuan didn't save them, but it was meaningless to save them. Compared with those people's power, he couldn't do anything. He could only hide the last team as a backup force.

This is the right of those people he said before. It is too easy to make a school disappear. No matter how well-known the school is, there will always be their way. Even if they rush out now, it doesn't make any sense.

The secretary didn't understand. He felt that Qin Yuan was greedy for life and afraid of death. He stared at Qin Yuan viciously.

"You bastard, don't think that if you save me, I will give you good words. Now that you are leading this team, why don't you go up and make a gap, at least one can be saved."

Qin Yuan couldn't explain so much to him, the things inside were too complicated, and Lao Hei and the others followed Qin Yuan's arrangement.

In order to avoid being discovered, Lao Hei stepped forward to beat the excited secretary directly when he saw the excited secretary.

"Instructor, don't worry, we all follow your arrangement. I think it is absolutely right to listen to you, but I don't know where these people come from."

"Look, even you have seen the problem. Without the instructions from the people below, how could they know so clearly? Look at them, they have a clear understanding of all the layout of the Hunter School, and attack from the weak points. "

So it is completely futile for them to go in to save people now. After ten minutes, they will start to clear the area, and those people will guard the outside.

Old Hei and the others clenched their fists tightly, but they couldn't do anything. Those were all their former comrades in arms.

Although they usually look down on these people, they have feelings no matter what, and they didn't expect that they all fell under the gun.

It wasn't over yet, after a while, they were almost cleared up, and then a huge explosion sounded, and a series of explosions followed the end of the explosion, and the time bomb was activated.

Within a moment, the entire Hunter School was engulfed in flames, even in this case
