

Special Soldier 1651

Chapter 1651: The Vanishing Special Forces

There was something wrong with this, and it was the first time he had found this situation in other people, because at the beginning their research was basically foreigners.

He used the system again to make a detection system, but gave a very positive answer. The person sitting opposite was a semi-mechanized soldier.

When the squad leader saw Qin Yuan approaching, he also stood up politely, holding up the drink in his hand, "Instructor Qin, come and sit down, we just roasted the beef here."

Seeing that he looked very normal, Qin Yuan couldn't figure it out, so he could only sit down with a smile and chat with him.

During the chat, Qin Yuan knew that this person's name was Li Jun, and he was also a veteran who retired from the Southern Military Region.

So this person is very enthusiastic about Qin Yuan. After all, everyone came out of the army. Because of the team's regulations, they are not allowed to drink alcoholic beverages under any circumstances.

After all, you have to be ready to call the police anytime and anywhere. Qin Yuan pretended to be unconscious and asked while eating beef: "The southern military region is still relatively wide. Which regiment are you in? Let me see if I have seen it before."

"Our regiment's reputation is not very great, it belongs to the Mechanized 53rd Regiment, so it's normal that you may not have heard of it, but we all have heard of your reputation."

Speaking of this, Li Jun looked at Qin Yuan with admiration on his face. This person is a figure at the level of God of War. Qin Yuan paid attention to his expression. No matter from which aspect, this person's answers were impeccable, as if a normal person doesn't know anything about himself.

But the system's judgment is absolutely infallible. He stretched out his hand and patted him on the shoulder pretendingly. As expected, the feeling was stronger this time. He was indeed a semi-mechanical structure.

Just what the **** is going on? Is this person mixed in? He was able to hide so deeply that Qin Yuan tried to hypnotize him. After all, there were too many people around, so he had to be brought to the side.

At this moment, he stretched out his hand to pour Qin Yuan a drink, and suddenly Qin Yuan saw the long scar on his hand.

"What's the matter with you?"

Li Jun smiled, and without hesitation, he took off his coat directly, only to see that the scar extended from his forearm to his shoulder, and even spread to his back, making his back even more horrible.

He explained next to him that he was caught by some criminals when he was on an overseas mission before, and he was tortured at that time.

Hearing this, Qin Yuan was stunned. Could it be that he was reformed by others without knowing it? Because it looks like he really doesn't know about this matter.

He asked a lot of detailed questions. Li Jun thought that Qin Yuan was concerned about him, so he said it in detail, and it all happened several years ago.

At that time, they followed the large army to carry out the mission, but they separated completely at the back. They didn't expect that they were ambushed not long after they separated.

During this ambush, they were completely beaten, especially Li Jun. He was captured alive by the enemy. Mysterious base.

At that time, he thought that he would definitely not come back alive, because these criminals were so ruthless under such circumstances, and they must have a purpose, so they would stay alive.

But he stayed there for three days, and no one came to question him. Although he felt strange at that time, he didn't know what to do.

In this way, on the fourth morning, a car suddenly came and took him away. At that time, he was wearing a black hood, and he didn't know where he was taken until he entered a base, more precisely, he entered the In a laboratory, where he was subjected to inhuman torture.

It wasn't until later that he passed out completely because he couldn't bear the severe pain. When he woke up, he found that he had been rescued, and he was lying in the hospital at that time.

At that time, everyone also conducted a series of reviews on him. Although it was confirmed that there was no problem after the review, it still had a certain impact on his subsequent career, so he retired directly within half a year.

After retiring, I found that I was still only suitable for this kind of military life, so I resolutely joined the fire brigade, and I have reached this step today.

Speaking of this, he was a little emotional, pointing to the scar on his body, "Captain Qin, to be honest, I don't even know what they are doing, no one is pressing me, I feel like they are on my body It's like doing an experiment."

Li Jun is also very puzzled about this. Although he said this, he went through many physical examinations in the military hospital later, but nothing was found out, so he has been unable to figure out what is going on. He also feels very regretful when it comes to retiring. .

Listening to his narration, Qin Yuan almost understood the general idea. This situation is just beginning. When they just started the experiment, in order to ensure the success of the experiment, they had very strict requirements on the experimenters.

Those from troops like theirs would definitely become their primary experimental targets, but they didn't expect that Li Jun would be rescued by his own team members when he hit the right target, otherwise the current Li Jun would probably be controlled by them.

To be honest, Qin Yuan is very sympathetic to Li Jun's experience, but now he can only believe in seven or eight, and everything must be tested by himself to be completely clear. Now there are too many people, and it is inconvenient to start. He plans to Check his consciousness later.

If so, it would be too terrifying, because it is unknown how many other people have fallen into their hands and undergo such inhuman experiments.

However, according to the current situation, this probability will be even lower, because their experimental technology is fully mature. In the past few years, they still needed to catch people to conduct experiments, but now there is no need for this.

Li Jun ate something, and then said proudly: "However, those injuries didn't seem to have any effect on me at the time, and I felt that my body seemed to be stronger. Every time I entered the fire scene or went to the rescue scene, I No problem, this is how I achieved the position of squad leader."

It seems that Li Jun really doesn't know about the situation of his body being modified, maybe this kind of ignorance is more of a kind of protection for him.

Qin Yuan originally wanted to ask the captain next to him in detail and called him over. After all, he is still the protagonist today.

In this way, it was already late at night after everyone finished eating. Seeing that Li Jun was going back to the dormitory, Qin Yuan knew that there would be no such good opportunity next time, after all, he would never meet him.

"Li Jun, wait a moment, I have something to ask you."

He casually said that he wanted to ask about the Southern Military Region. The team members next to him heard that they were talking about their troops, so they didn't want to intervene too much, so they said hello and went back first. Now there are only Get off the two of them.

Qin Yuan saw that Li Jun directly invaded his consciousness in the next second, and he quickly probed into Li Jun's mind. Indeed, the situation was as he said, and he was forced to accept the transformation.

It's just that in this case, the place where he was transformed can't be seen. Mohu can only see a laboratory, and the other conditions are not very clear.

Qin Yuan was worried about two issues. One, if these people simply modified these videos indiscriminately, how many people would have been modified by them in this way.

On the other hand, the more difficult thing is, will these transformed robots obey their orders like those with systems before them? Will it explode at some point?

This is what he is more worried about now, but currently he has no way to detect deeper things with his system capabilities. He originally wanted to see if he could see other problems through this transformation, but the current system gives The detection can only judge that he is mechanized.

There was no other way, Qin Yuan had no choice but to let Li Jun go back first. During the subsequent training, he had been paying attention to Li Jun's performance, mainly because he was worried about whether there would be any abnormalities. He also asked many team members, and everyone thought it was nothing. The problem is that apart from feeling that he is a person, he is physically very strong in all aspects.

Just halfway through the training here, Qin Yuan received a call from Gao Shiwei, "You know, I usually don't call you, but this time the situation is more difficult, you should come back as soon as possible."

Although Gao Shiwei didn't say the specific situation, he also knew the seriousness of the matter, especially if any missions of their special warfare brigade were temporary, so the fire brigade said they could understand and asked him to deal with it quickly.

Before departure, Qin Yuan also set up a set of training plans, all of which were taken from the manual. He asked everyone to train according to this training schedule. He didn't know how long it would take, but he would start after he came back. Assessment, let the players not relax.

After Qin Yuan returned to the brigade, he felt the tense atmosphere in the brigade. He came directly to Gao Shiwei's side, only to see that the red blood cell team was waiting for him here, and everyone had already put on their equipment. .

Seeing him approaching, He Chenguang rushed to meet him, "Brother Qin, Captain Gao has already set off, he asked us to wait for you, and we will set off together when you come."

He didn't expect that even Lao Gao set off. Before he could think about it, everyone boarded the helicopter together. On the helicopter, He Chenguang said that it wasn't just Gao Shiwei, Long Xiaoyun led the Wolf Warriors team last night They had already set off, and the matter was too difficult for them to solve, so they called him this morning.

I didn't expect so many people to go there, "What's the situation over there, why did Lao Gao go too?"

"It's the members of the third team who are missing."

Qin Yuan was taken aback when he heard this, how is this possible? The third team was just trained by them. The players recruited this year, why are they missing now?

He Chenguang explained next to him that they were actually going to carry out a relatively small task this time. They had already discovered that a criminal's lair was located in the border area, and they had been following that criminal group for a long time. This time the third The team is mainly responsible for capturing the boss.

Relatively speaking, everyone has checked and found that the number of people in the criminal group is relatively small. It is a small group of 30 people. For the special forces team members, this is not a big problem, and there are other team members to assist. There are armed police behind to assist.

In order not to startle the enemy, the armed police asked their special operations team to infiltrate first. However, after the third team infiltrated, they did not receive any prompts, nor did they hear gunshots.

This made them very curious, and they waited for more than ten minutes, but nothing happened. At this time, the armed police realized that things might have exceeded their expectations.

Immediately reported to the superior and asked them to enter and check. The superior also felt that the time was too long, so he agreed to their request, but when they arrived at the previously designated place, they found that the lair of the criminal group had gone upstairs. null.

The surrounding traces have been cleaned up, and no ammunition was even found, which made everyone feel very wrong, and they immediately led people to patrol around.

There were no traces around, until they came to the cliff behind, they saw a few ropes. It seemed that they retreated from this place, but the crux of the problem was that the members of the special operations team also left here?

At first, according to their judgment, it should be the special forces team that followed these criminals down together, but they have been unable to contact the special forces team.

It was not until later that Gao Shiwei was notified, and they lost contact completely afterwards. Everyone tracked them all the way to the bottom of the cliff, and saw the guns of the special operations team, as well as the positioning equipment on them.

No other traces were found This criminal disguised himself too well, it felt like a trap, their purpose was for this special forces member, after all, nothing happened in other conflicts .

Gao Shiwei was also furious. This was the first time this happened. The special forces team members were hijacked by criminals. If it spread, people would laugh at it.

He immediately sent Long Xiaoyun and the others to investigate, but there was no result, so he notified Qin Yuan to let everyone hurry up.

Soon Qin Yuan and the others arrived at the place where the missing team was. There were footprints all over the ground, and it could be seen that many people had been here.

Next is the location of the cliff. At this moment, He Chenguang said: "Brother Qin, Team Long and the others are in another place. Shall we go there and join them?"

"Don't worry, I'll take a look in the direction they're walking. I'll analyze it first to see where these people can go, and then go to meet them. Be as careful as possible."

Chapter 1652: find the real clue

Qin Yuan followed the traces here. He observed that the scene here was relatively well protected. He squatted down to check the ropes. The material of the ropes was also very ordinary. It can be said that even their special operations ropes Not really.

He turned his head to look at Li Erniu and asked, "By the way, how long did the armed police say they came here?"

"They still had to wait, and then searched for more than an hour before they came."

Qin Yuan nodded, he probably understood what was going on, and then he waved his hand to let Wang Yanbing, who was already hanging on the rope, come up first.

Wang Yanbing only climbed a distance of two or three meters, which is not too far, and there is still a distance of more than ten meters below.

"Brother Qin, why don't I just climb down in one breath and see if I can find any clues. If it's our special operations team, they will definitely leave clues on the cliff."

Qin Yuan shook his head, telling him to give up as soon as possible, basically this kind of possibility would never happen, and then he said something that shocked everyone.

"Give it up. They didn't go this way at all. There are probably only a few who went this way. The local armed members, and the others were all evacuated from other places."

Everyone was dumbfounded when they heard this. At that time, the armed police came up and started a careful search. How could they not find it? And it's somewhat unlikely from other places.

Qin Yuan's analysis is not unreasonable. According to the current situation of the rope, it can't bear so many people at all, and depending on the wear and tear of the rope, according to what the armed police said at the time, there are about 30 people in this criminal base. In addition to their special operations team, the number is at least 40 people.

But the wear of this rope is very light, only a little bit of wear, except that ordinary ropes can't bear so many people constantly wandering down, so the possibility of them going down here is too low.

Although you can see traces of trampling on the cliff, they are the first group of people to go down, probably four or five.

When everyone heard him say this, they immediately realized that they were preconceived before and did not analyze this matter, because there is a primitive jungle extending from the bottom of the cliff, so it seems that everyone is focusing on that primitive jungle. , everyone is looking there.

The scope of the original jungle is too wide, and this is in the border area, so it is really troublesome to investigate them.

So far, there has been no progress at all. Qin Yuan's analysis is currently the most reliable. He felt that in the situation at that time, these people just wanted to deceive others, create the illusion that they went down from here, and then divert all investigation directions go this way.

Thinking of this, Qin Yuan turned his head and began to look at the surrounding terrain. To be honest, it is very complicated. There is a hillside on the opposite side of the cliff, and that hillside is undulating, with several mountains connected. It is very likely that they are hiding in the that location.

He pointed to that place, and now everything is just a guess, go over there first, but he brought himself in, if he wants to take so many people from here, the biggest possibility is to turn over that mountain.

Because it takes a lot of time to climb over that mountain, and there are so many armed police members behind, in order to get rid of these people, they must find a way to attract their attention first, and they can definitely pass the rest of the time.

In this way, Qin Yuan and the others came to the opposite hillside. As expected, there was nothing abnormal in front of them, but along the hillside at night, they could see some fine footprints, because it was raining that day, and the whole soil was relatively soft. , so now the footprints still exist.

Li Erniu was completely stunned when he saw this. He gave Qin Yuan a thumbs up in admiration. He had to say that Qin Yuan's reflexes and attitude of analyzing things were really admirable.

And it can be ruled out that these footprints were left by their armed police members. At present, those armed police members mainly wear combat boots. The footprints are very shallow and basically do not leave any traces, but the current footprints are very deep, basically those are those left behind by criminals.

Everyone is walking down the hillside. At this time, you can see some traces left on purpose, and you can see some branches being broken.

At this time, He Chenguang, who was walking in the front, exclaimed even more. He saw a watch, and the name engraved on the back of the watch belonged to one of their special forces members.

Everyone was very excited about this discovery, and Qin Yuan hurriedly informed Long Xiaoyun and the others, telling them not to waste time in the primeval jungle, and hurry over to invest in the investigation here, maybe they can find clues.

Soon Long Xiaoyun and Gao Shiwei were able to catch up. Gao Shiwei was also very worried about the sudden disappearance of the team. He didn't expect that everyone was tricked and completely deviated from the direction.

Soon everyone came to the top of the mountain under the leadership of Qin Yuan, where a large area of traces could be seen, indicating that their special forces may have struggled in this place, because here you can see the situation below, it is possible They were all hidden here at that time.

Fortunately, except for the traces of struggle, there was no blood stains, which showed that the special forces members were still safe, but they were under some kind of coercion.

Finally, following these walking traces and coming to a tributary below, you can see many fine footprints on the shore. It seems that they uploaded here, and then escaped directly through the river on both sides of the cliff. There is no one in this position. People discover the situation.

The armed police who were investigating with him were also very regretful about the battle. He didn't expect these criminals to slip away under his nose like this.

He slapped himself hard, "I'm sorry, it was indeed my mistake this time. I wasted everyone's time, and I haven't found the crux of the problem yet."

Qin Yuan shook his head. It's not his fault. The main reason is that these criminals are too cunning. Now that this tributary extends to too many places, it is too complicated to investigate.

In fact, it is mainly a matter of time. If Qin Yuan could come here earlier, he would have found out that he might be able to trace it immediately. However, the climate of this place is also special, and it rained for a day and a night. So far, there is no smell. Totally watered down.

Everyone can only try their luck to drive a small boat to start searching on the diversion. At first, it was a main tributary, and there were no clues to be seen on this kind of river.

But at least one point, they will not disembark here, because there are cliffs on both sides, and there is no place to stay at all.

If they go further, there will be many branches extending, and the water flow below is also very extreme. It is not known where they can go. boat.

Qin Yuan has no other choice now, he can only choose a route at random, and then search along it, but there are too many places to stop along the way.

The place where the footprints were found before was blocked by trees, so the footprints existed until these stranded areas behind, all of which were exposed and almost washed away by the rain.

rice ball reading

In this way, they searched until night, but there was no whereabouts. The storm was still followed. In this case, it was too dangerous for the boat to walk in the tributary.

Gao Shiwei had no choice but to give the order to retreat. He couldn't let everyone out to take risks, and this retreat was also suggested by Qin Yuan. At present, the current inside is too fast.

Qin Yuan's strength was a little uncontrollable, not to mention the other teams. For the sake of everyone's safety, everyone had to return to the designated place.

But after everyone went ashore, they found that there were a lot of people missing. This group of people was taken out by the captain of the armed police. He took four people out together.

Gao Shiwei felt a little strange, and he used the walkie-talkie to report again, but there was still no answer from the other side, and he had a bad idea in his heart. Could it be that the water flow was too fast, and what unexpected situation did they encounter?

Qin Yuan didn't think much, and jumped into the boat directly. The others wanted to follow him, but he turned his head and gave strict orders to everyone not to act rashly. He knew what the current meant. Others didn't have the ability to come up. It will only add to the chaos in the future.

Qin Yuan had just jumped into the boat, and the upstream water had already rushed down. He could only try his best to control his figure, and it was too late to let the people above let go of the rope.

Everyone can only watch him slowly disappear in the darkness. Gao Shiwei is also very nervous. Although Qin Yuan is a person who is more at ease in doing things, the current situation is really dangerous and he does not want anyone to come out. matter.

Qin Yuan held the walkie-talkie in his hand, and kept calling the captain of the armed police, but there was no response after a long time, and soon he crossed the main stream, mainly because he didn't know which branch they were diverted from.

At this time, the walkie-talkie finally responded, but the signal on the other side was not very stable, and there was a rustling sound.

"Captain Qin! Come quickly, our captain is in a very bad situation. Our boat was overturned by the current just now, but we can't get on. We are holding the boat and stuck in the tributary here, but I guess it won't last long."

"Which direction did you come out from?"

"East...South...Left..."

At this point, the contact was completely cut off. Qin Yuan kept calling from behind, but there was no response. He didn't hesitate, and quickly inserted into the diversion on the left.

He began to carefully analyze the memory. When he set off before, he probably glanced from behind. Long Xiaoyun also left and there was Li Er and the others on the left.

He thought about each team carefully, and instantly understood which one they chose to choose. His memory was really amazing. Among so many diversions, he could remember so clearly.

But at the moment on the other side, the condition of the armed police captain is no longer very good. They are struggling to support the boat, and now the boat is stuck in a small tributary and rock wall.

It was basically impossible for them to climb up, the water kept beating and hitting their faces, and the worst case was that the captain of the armed police seemed to have injured his hand.

It can be seen that the wound on the shoulder has been soaking in the cold water, and the condition of several other people is not very good. Everyone is holding on to the boat tightly, not daring to let go, otherwise they will be washed down if they are not careful.

The captain of the armed police blamed himself even more at this moment. Originally, he brought all these people out, but he did not expect that something unexpected happened halfway because of the rush of the water.

"Brothers, I'm really sorry for this situation. I didn't expect this boat to capsize."

"Captain, what do you mean by this? How can we blame you? Besides, let's wait for the rescue to arrive soon."

The captain of the armed police gave a helpless wry smile. He knew what it meant. First of all, the walkie-talkie had completely lost its function because it had been soaked in water. Just now they didn't even have time to tell the location. There are so many people, how could they wait for rescue.

In addition, the hull of the boat is completely unstable now, the weight of the four of them is stuck on the boat, and the stone walls beside it are a little loose.

The main reason was that the water kept beating against the deck of the boat. According to the development of this situation, they really couldn't hold on anymore, and he was also making a decision in his heart.

If it really doesn't work in the future, he will be the first to let go, which can be regarded as relieving the pressure of the whole group and leaving hope for life to them.

He turned his head and looked at the team members next to him as if explaining his funeral, "Xiao Zhang, you must remember what I said now. No matter what happens to the cargo, you all hold on to this boat tightly. Let your figures deviate in any way, understand?"

"Captain, what do you mean by this!"

"Stupid boy Listen to me that this boat can no longer hold up, and if I can't hold on later, then I will choose to let go. Don't worry, I am very good at water. If I rush down, I will still survive. Yes, I hope you guys will stay here and wait for rescue."

When everyone heard this, they immediately raised objections. Such a rapid current, let alone good water quality, even national athletes cannot survive in this situation.

But the captain of the armed police knew that if he didn't make this sacrifice, then everyone would be doomed. Seeing the stones next to him gradually coming in, he knew it was time to prepare.

Xiao Zhang next to him held him tightly and refused to let go. When the two were at a stalemate, suddenly a light came from a distance. It was the light on Qin Yuan's boat.

"Captain, look quickly, that seems to be someone who came to save us!"

Everyone saw hope in an instant, and started to shout towards that side. Qin Yuan also saw their situation, and now he had to find a way to get there, mainly because the current was very fast, and he had to find a way to control the hull, otherwise, if he didn't pay attention, it would be very difficult. Might knock them off.

Chapter 1653: Pakistani players missing

Next, the captain of the armed police saw a scene that shocked him. Qin Yuan's strength was so great that he forcibly controlled the direction of the boat with only one arm. above the rapids.

This kind of strength is really amazing. The other hand directly threw a rope, let the person on the opposite side grab the rope, and pulled them all up in this way. The whole process can be said to be without any danger.

The captain of the armed police was completely stunned when he saw this, because Qingyuan's arm strength was so amazing, one hand could control the entire hull to keep it balanced, and the other hand just pulled them up like this.

He was lying on the boat panting heavily, this is really the afterlife, "Captain Qin, thank you so much, if it wasn't for you, my brothers and I would have died here today. "

"Besides, you came here to find our people, and I want to ensure your safety."

Because the current weather conditions are really bad, Qin Yuan took them up the river and returned to the place where they started before. Gao Shiwei and the others were relieved to see Qin Yuan come back safely, but now everyone To face a bigger problem, the waterway is impassable, so we can only start searching from the shore.

Qin Yuan raised his head and looked at the heavy rain. He didn't know when it would stop. There was no way, everyone could only split up and start searching on both sides of the bank. After searching like this for two days, there were almost no clues.

What's more strange is that they have not received any information so far. They don't know where the militants mainly took these team members. If they are going to blackmail, they should have sent a message very early.

In the past few days, everyone has not given up and has been searching in the jungle. At this time, Gao Shiwei received another message.

Unexpectedly, it was the distress request sent by the Ba Kingdom. The relationship between the Yan Kingdom and the Ba Kingdom is considered very good, and they also have a very deep diplomacy, so everyone is helping each other.

Gao Shiwei received a call from the leader above, asking him to immediately send a small team to support there. They don't know the specific mission situation, and they need to coordinate.

He had no choice but to send Qin Yuan out for the time being. Qin Yuan's ability here is relatively strong. He kept Long Xiaoyun and the others and continued to search for clues here, because the people he found here The clues are too low, so the efficient Qin Yuan can only be sent out first.

Soon Qin Yuan and the red blood cell team were ready to set off to the place mentioned by Ba Guo. On the plane, no one knew what the specific task was, because Ba Guo didn't mention it in detail, but only said that he wanted their help. , to rescue them.

Li Erniu was a little bit aggrieved, he looked at the scenery outside the window, "Brother Qin, I really don't know what the leader of the distribution is thinking, now we are sent out at this critical moment, and our own affairs are still messed up." .”

"This is what we basically do as soon as people arrive. Besides, no matter what, since people can make such a request, it means that the situation is still relatively serious, and we can't be perfunctory."

He knew that Pakistan seldom told them that it would send such a special rescue, so the matter should be more serious, and the leaders also attached great importance to it. Well refused.

As for the matter of their special operations team, Qin Yuan felt that it was not that simple. Even if he stayed there to search, it might not be of great significance to find it. If it took too long, people would have moved away long ago.

After a while, everyone arrived at the airport on the Ba country, and saw a small team waiting for them from a distance. After Qin Yuan got off the plane, the team leader hurried up.

The moment the team leader saw Qin Yuan, he showed a gratified smile, and the two sides were acquaintances. They both knew each other when they participated in an international competition before, and they had cooperated before. The team leader's name is Als.

At that time Ars hadn't been the captain, he was just an ordinary team member, and now he was able to take charge on his own, Qin Yuan walked up to him and greeted him.

"Chief Qin, you are finally here!"

It could be seen that Als was very excited, and soon a bus drove up to pick up Qin Yuan and they started to go out. Qin Yuan had other things to deal with, so he directly asked what the specific situation was this time. .

Als hesitated a bit. He looked at the players behind him, wondering if he should say it now, because he didn't come to talk about these things. To be honest, he was just a greeter now.

Seeing his attitude, Li Erniu was furious. They still had important matters to deal with, and he hadn't dealt with the results yet.

"Hey, I said, can you be serious and don't waste our time, what's going on? Hurry up and finish it, we'll settle it quickly, we all have other things to do."

Qin Yuan quickly glared at Li Erniu. This kid was always so outspoken. Looking at Als who was not looking very well beside him, he also hurriedly explained.

"I hope you don't mind with him. This kid is so straightforward. The main reason is that we did encounter some problems. We want to solve this quickly and then go back."

Als nodded to express his understanding. He smiled helplessly, and then told the general story. After he finished speaking, the people in the car were really shocked. Wasn't this just an accident? It turns out that there are also two special warfare teams in Pakistan that disappeared inexplicably.

It is a great shame for others that the special operations team members can disappear inexplicably, but they have been searching for half a month, and these two special operations teams seem to have disappeared without any news.

The military strength of the Pakistani side is relatively still in the developing stage. The main problem is that these two special operations teams belong to the top special forces of their eight countries.

In order to cultivate these two teams, they can be said to have spent a lot of financial resources and energy. Qin Yuan had also trained and guided these two teams before.

Now that such a thing happened, no one was willing to accept it, but they couldn't find any whereabouts. The people in Ba suspected that someone was deliberately targeting them, so they asked Qin Yuan and the others for help.

Everyone is very worried that things will become more complicated, so they want to solve this matter as soon as possible. The main worry is that someone will make a fuss about this thing. Now the two special warfare teams have disappeared without a trace. No one is alive or dead.

Hearing He Chenguang's solemn expression here, he glanced at Qin Yuan quietly, and Qin Yuan gave him a wink, implying that he should not reveal his situation, maybe things are not that simple.

Under the leadership of Als, they came to the military base where the special team was located before. This place is not a secret base. Qin Yuan also trained here before.

Because Als didn't know the specific situation, he was mainly responsible for welcoming them this time, and cooperating with Qin Yuan and the others in their actions. The specific process still needs to be discussed with the leaders above and Qin Yuan in person.

The person in charge of Ba Guo was also very polite. He didn't shy away from it and told all the details as much as possible. The main reason was that he sincerely hoped that Qin Yuan could help them and find the missing team members as soon as possible.

After hearing the details, Qin Yuan planned to go to the place where he disappeared to check first. Although half a month had passed, he still hoped to find some clues.

Als immediately understood, he said he was going to organize the equipment, and then Qin Yuan came out of the office in this spare time, and quickly exchanged information with Li Erniu and the others.

It turned out that the process of their disappearance was exactly the same as the disappearance of their team members. They were all going to destroy a so-called small criminal organization, and then they were ambushed inexplicably, and then disappeared.

For such small armed criminals, everyone didn't take it seriously at all, and they didn't expect such a thing to happen.

He Chenguang also seriously analyzed, "Brother Qin, do you think this is a huge conspiracy, not only on our side and Pakistan, but maybe other places have such problems."

Qin Yuan nodded. To be honest, he hoped that such things happened everywhere. At least it was not another kind of coincidence. If only they and Ba Guo were left, it would be difficult to explain. their plot.

No matter what, they still have to learn to preserve their own strength, and don't reveal all of them. Regarding the disappearance of their domestic players, Qin Yuan kept everyone tight-lipped.

At this time Ars waved to them from the opposite side, indicating that his side was ready, and Qin Yuan hurriedly led the team members to follow everyone in a car and came to the place where the team members were missing at the beginning.

This place is a piece of Gobi Desert, and some traces of battle can still be seen now. Als said that this was the scene when they discovered that the team members were missing, and the scene was also protected, but many people came here to investigate Without any clues, they just disappeared out of thin air.

Qin Yuan took a look, probably he knew that these things were meaningless, and the most important thing was those militants.

"What is the situation of the militants you mentioned? Do you know the name of their specific organization or their number?"

Speaking of this, Als shook his head. He said that those militants are also very mysterious. Up to now, they don't know what happened. They only know that someone reported it at the beginning.

Said that they were trading here, so they sent a special warfare team to carry out the encirclement and suppression, and this happened.

Just like their previous investigations, these militants are very stealthy and completely concealed their whereabouts. From these aspects, no results can be found at all, just when Qin Yuan was thinking.

Als suddenly provided an important clue that these militants had impersonated a local criminal organization, but unfortunately, no matter how they interrogated, this criminal gang never revealed anything about it.

This may be the only clue they know. Qin Yuan's eyes light up when he hears this. Others can't find out through interrogation, but he can.

Led by Ars, Qin Yuan and the others came to a military prison. The militants who had taken away their special operations team had sneaked in by impersonating the identity of a local organization.

During the conversation, the staff inside brought out a bearded man, and Als introduced that man, nicknamed Dulong, as the leader of their local criminals.

At that time, it was this criminal group that they wanted to eradicate. They thought they were doing business, but it turned out that it was not the case when they arrived.

But no matter how interrogated now, this guy just refused to admit it, saying that he didn't know that there was nothing he could do to spread the matter. After all, there were two special operations teams, so he could only be arrested temporarily.

It can be seen that this poisonous dragon is very indifferent, sitting on the opposite chair with his legs crossed, looking at the staff in front of him provocatively.

Seeing Qin Yuan walk in, he even sneered with disdain, "I have said many times, regarding this matter, I really don't know what you are doing. I have nothing to do, and I have to ask other foreigners to interrogate me. It's hilarious."

Qin Yuan didn't pay attention to him at all, didn't even make extra movements, and directly invaded his consciousness in the next second. In the eyes of outsiders, he only saw the dull eyes of the poisonous dragon, and didn't know what happened.

Ars next to him didn't know what happened, but He Chenguang stopped him when he was about to ask.

"Don't move around, our captain is hypnotizing him. This is his unique interrogation method. Don't worry, there is nothing he can't ask."

Als was taken aback when he heard this. He didn't expect such an interrogation technique. He became more and more curious, and about five or six minutes passed.

Only then did Qin Yuan let go of the consciousness of the person opposite him, only to see Dulong's panicked expression, he didn't know what happened to him, he stared at the man in front of him in horror, just now he felt like he was being spied on.

"What did you do to me?"

"You can deal with this person whatever you want It doesn't make any sense anymore, we already know what we need to know."

When Du Long heard the constant yelling from behind, Qin Yuan ignored him and led the people out. Now he has grasped the clue.

After he got out, he connected with Als. This guy has been reluctant to say it until now, because the criminal armed who pretended to be their organization gave him a lot of hush money. As long as he can persist, the money is enough He will spend the rest of his life here safely, as long as he can get out.

So he has been supporting, and although the mysterious criminal armed Qin Yuan did not find out the specific name, he did find out the place where they were connected.

Chapter 1654: Meet another team

Ars also admired it very much. He didn't expect that Qin Yuan would solve the matter after reviewing it for such a long time, but Qin Yuan only took a few minutes.

However, on the way there, he also had some precautions against Qin Yuan. This person's ability to hypnotize is so strong that he directly hypnotized him in just a few seconds without the other party's knowledge.

This ability is really terrifying, will he suddenly attack himself at any time? As soon as this thought came to him, he quickly shook his head.

Qin Yuan, who was sitting in the back, suddenly patted him on the shoulder. Als was startled, turned his head, and stared at him with an unnatural expression on his face.

"You don't need to be so flustered, don't worry, I won't do anything to my own people, especially my friends, but in the face of that situation, I can only take some special measures, all for the mission, I hope you understand ."

Als didn't expect Qin Yuan to see through his thoughts directly, and he was a little embarrassed for a moment. He scratched his head, expressing that he was thinking too much.

But the more this happened, the more he felt that Qin Yuan was too capable, and it was best to stay away from such a person, otherwise he would never know when he would be involved and how he would die.

Qin Yuan smiled helplessly. This is the reason why he seldom shows his ability in front of others. When his ability is too strong, it is easy to draw others' guard. Although he knows that they don't have any conflict of interest now, he will still Make others feel intimidated.

And at this moment, Qin Yuan also understood that since they had no news from the country, they might be able to find some clues by grasping the news from here.

According to the information provided by the leader of the organization, they soon came to a building where many traces could still be seen.

They found a lot of leftover utensils, basically garbage bags of convenience food, and because the ground was sandy, there were still many footprints, and it seemed that there were not a few people.

Qin Yuan stood on the abandoned building and looked outside, only to see a few buildings in the distance, which seemed to be residents living nearby.

Als immediately understood what it meant, and he hurriedly took people to investigate. After a while, the person he investigated came back, saying that the residents over there had indeed seen people coming and going here, and the last time they saw them, I saw them leaving in a car.

Following the clues provided by the residents, everyone chased in the direction the car left. Although it had been a long time, this area was a barren area, and the vehicles they used were off-road vehicles, which left deep scars on the road. wheel prints.

Als explained that in their area, they are still on the same level. Most people can't afford vehicles at all, and basically rely on motorcycles or bicycles for travel.

Therefore, the traces of this vehicle are extremely large. It may be the traces of fights and folds left by those criminals before. They tracked all the way, and finally saw the abandoned vehicle at a mountain pass.

The vehicles are covered by the leaves, mainly because they need to climb the mountain and enter from the mountain here, so the vehicles are inconvenient, so they can only be left here first.

Everyone also found some equipment in this car. Als only took a look and immediately determined that it was the equipment carried by their missing team members.

"This kind of camouflage clothing is more suitable for the terrain on our side, so we all use this color. It seems that they were taken away from here."

In this way, the clues were finally found. Everyone chased all the way in the jungle without missing any whereabouts. The jungle was not finished until dark, but traces of them could be seen along the way. After all, people More, they have no time to clean up.

It must be no problem to follow this trace. Everyone has been tracking for a day, and they are quite tired.

The equipment on their side is not as good as they were before. Most of them don't have night vision equipment, so they can only rest for the time being and wait until dawn before setting off.

Qin Yuan still insisted, and walked for a longer distance until it was completely dark. This is not a difficult task for everyone, after all, there are so many people coming from you, so you don't have to worry.

Ars was very tired, but he still sent two guards, and then asked everyone to go out to find dry wood to make a fire, and they will stay here tonight.

At this moment, Qin Yuan suddenly smelled an unusual smell. He quickly made a gesture to remind everyone to be vigilant. The few people who were far away from him did not notice the operation he had performed, so he could only remind him in a low voice. .

"Attention everyone, there is a situation."

Als was a little nervous. Could it be that he was facing those people? He quickly moved over, squatted down, and began to ask carefully.

He said that he could smell a flame, and Als was relieved when he heard this, and he joked with a smile: "Captain Qin, I think you are just too nervous, we are just about to live, maybe it will be later smell."

Qin Yuan snorted coldly, told him to keep quiet, and pay attention to the smell, it floated from the front, and their people were still looking for firewood behind, how could it have risen?

It was only at this time that Ars noticed. He squatted down and smelled it carefully. He could indeed smell a faint smell of fireworks in the air. There were other people in the jungle!

Everyone became vigilant. After all, they were following them along the way. If there were other people in front of them, they might be the ones who took their team members away.

Qin Yuan looked at their equipment, and in order not to startle the enemy, he asked Als to stay behind. If possible, try not to make a sound, and followed him from a distance and led his team to the front.

Before Ars agreed, Qin Yuan strode forward. Ars also knew that the strength of his team was relatively weak. If he would clean up the golden snakes at this time, he could only watch them go away.

But they could only vaguely see the figure of Mohu in front of them, and they followed up quietly. The players on Als' side were a little dissatisfied.

"Captain, I think this is too much. This is obviously our own business. I feel that this person is too disrespectful and has such a cold attitude towards us. What kind of thing is he?"

Als quickly turned his head and scolded the team member very sternly, "What are you talking about? Be quiet and don't let them hear you. We're just begging others to do things. Besides their abilities, wouldn't you do you know?"

This team member immediately lowered his head when he was told this. Although he knew it well, he was still unconvinced in his heart. Why should these people receive special treatment compared to them?

Qin Yuan didn't think much about it at all, he didn't want to take credit or anything, he just wanted to catch the clue as soon as possible, and he didn't want to be delayed by others.

The red blood cell team cooperated very tacitly. They did not make any sound one after the other. Training in this jungle was a piece of cake for them.

Like ghosts, everyone slowly approached the direction of the flames, and soon they saw a flame.

Qin Yuan looked into the distance and immediately discovered the problem. These people were quite organized. There were guards on the left and right sides, but they were far away, so the guards didn't notice that he told everyone to squat Down.

He lowered his voice and explained the situation to He Chenguang who was next to him, "The people on the other side don't seem to be simple either. They are all guarded in a triangle."

Anyone know what this means? Much like their traditional routine of standing guard, the triangle can completely see all the front, rear, left, and right positions. It can be said that there are no dead spots at all, and it is basically all the traditional ways of standing guard in their team.

If it was an ordinary leader, they might not be able to imagine these things. This is all meticulous and standardized training, so the people in front should not be simple. Qin Yuan suspects that they are probably mercenaries.

He started to disperse everyone. At this time, Li Erniu had already set up the sniper rifle, and it was absolutely no problem to shoot from this position.

"Brother Qin, as long as you give the order, I will shoot immediately."

Qin Yuan thought about it, but don't be so anxious now, after all, they haven't figured out what the identity of the other party is, so solve this problem first, and then don't hurt others by mistake.

"Well, don't do anything, I'll go and have a look."

Everyone was stunned when they heard this. Qin Yuan actually wanted to go forward alone. There seemed to be a lot of people on the opposite side. If something went wrong, what should we do?

"No, it's too dangerous. Otherwise, hit them first. Don't worry, my marksmanship is absolutely fine, and it won't hurt my life."

Li Erniu was also very confident in his marksmanship, and Wang Yanbing also echoed, saying that it was too dangerous for Qin Yuan to go up alone, and it was not worth it.

Qin Yuan always felt that this approach was more risky. If he accidentally injured other people, it would be a little unclear, and this was abroad. Every time they fired a shot, they had to be responsible for themselves. They were not representing individuals now, but It is the country behind oneself.

Even though everyone was against it, Qin Yuan still insisted on his opinion. He looked at several people and said, "I won't let my reputation be ruined here. Don't worry, I'm sure."

Turning his head, he looked at Li Erniu and the others, feeling a little worried, so he confessed that if there were any problems, they would have time to make a move later, so that they could trust him.

Everyone had nothing to do, seeing him so persistent, they could only follow his arrangement. After Qin Yuan finished speaking, he began to walk forward quietly. He didn't make a sound, and his figure and darkness were completely integrated.

Qin Yuan's speed was extremely fast, and he came to the armed soldier standing guard in the blink of an eye, but the man didn't notice anything.

He turned sideways and jumped directly in front of the fire where several people were sitting around. Everyone was stunned by this sudden scene.

Everyone didn't want to understand how this person came out. Just as they were about to point their guns at Qin Yuan, he quickly made a gesture to show that he had no malice.

But in the face of this sudden scene, the people next to him were a little nervous, and they still pulled the gun in their hands. Qin Yuan turned sideways and dodged the bullet.

At this moment, Qin Yuan could also see their clothes clearly. They were not armed with other brands, but they were actually soldiers from country A.

On the opposite side, Li Erniu and the others didn't care so much when they heard the gunshots, they rushed up with their guns up, and the two sides confronted each other in time, Qin Yuan quickly shook his hand, indicating that he belonged to the Yan Kingdom.

After saying this, the talent assistant on the opposite side, and the officer on the other side seemed to be reasonable, so he hurriedly scolded the subordinate just now why did he suddenly shoot?

When he knew that it belonged to Yan Kingdom and confirmed his identity, he breathed a sigh of relief. After all, there was no conflict of interest between the two parties.

At this time, the Ba people who heard the gunshots also rushed up. Before Ars could figure out the situation, he saw the people on the opposite side raised their guns at them. The main reason was the sudden change. It is these Pakistani people.

Qin Yuan quickly explained that they were all together, so that the few people could relax, and the captain of country a opposite was also his own person, put down the gun, and don't cause too much conflict.

And Als is even more confident. After all, this is their territory. Why people from country A would appear on their territory with guns is somewhat unreasonable.

Qin Yuan originally wanted to adjust it secretly, but it was his business after all, and any more words he said would increase his suspicion.

Als looked at the captain in front of him coldly, "I think you should give me an explanation, what is going on?"

The captain of country A also knew that if he didn't explain it, the matter would be too big and it would not be good for him. He quickly took out a document from the backpack behind him, which was stamped with the highest seal of the country's Ministry of Defense.

"I don't want this matter to be misunderstood, but I have already obtained the consent of your highest officer. We are here to find our team members this time."

Qin Yuan was immediately interested when he heard this. They also came to look for the team members, but it's not easy to ask more questions now. We have to let Als and the others understand the situation clearly.

In the face of national security issues, Als is very cautious. He immediately confirmed the authenticity of this incident with his superiors. Half an hour later when he got an accurate answer, both were relieved, and he also started to shake hands and express his apologies for his impolite behavior just now. As long as you get the consent from above, there will be no problem.

The captain of country A also breathed a sigh of relief at this time, "I really didn't expect that we would meet in this place. To be honest, if it was me, I would definitely be misunderstood by this situation."

Seeing this, Qin Yuan knew that the misunderstanding had been resolved, and he couldn't wait to ask, "Just now I heard you said that you came to find the team members. Are you also the team members who disappeared?"

Hearing that the captain of country A was a little surprised, but he had already reported to them, so there was no point in hiding it, and he also told them the purpose of his visit.

Chapter 1655: find clues

[One-click recovery since I am a special soldier] 【】

, since I am a special soldier, one-click recovery

They did indeed have a member of the special operations team missing, and after investigation all the way, they found that all the clues pointed to this side, but their identities were special.

At that time, I investigated for a long time, and I had to apply to the higher authorities. It took more than a month to come here for investigation.

Hearing this, Qin Yuan couldn't help but have some doubts, meaning that their people also disappeared here, but it is far away from country A, and the two countries are not very close.

The captain of country A knew that it was hard to hide things now, so he told the specific details. It turned out that their team members were performing training tasks in the neighboring country C to cooperate with them.

And as far as he knew, there seemed to be special forces members missing in country C, but the other party didn't care too much about the situation, so he couldn't help it. After all, whoever's family is looking for it.

Hearing this, Qin Yuan finally understands, and with whom the exhibition is related, then this matter is not so simple. He vaguely wonders if it has something to do with the semi-mechanized soldiers they mentioned before, do they still want to bring these people To do an experiment?

Thinking of this, he thought about it carefully, then he might as well confess to them that there are also members missing in his own country, and if we share the information, we may be able to find out the crux of the problem earlier.

After his confession, Als was completely stunned. This guy is often really too deep. At this time, he didn't reveal anything about the situation. They have been kept in the dark.

But now I don't care about that much. The most important thing now is to find the missing players. Since so many players are missing, it is not a trivial matter.

The strength of the special warfare team in country A is not bad, so everyone is very curious about what is the situation that allows them to quietly take away a special warfare team like this?

Qin Yuan suspected that they were coerced before, but based on the current situation, it is very likely that they were planted with some kind of poison.

Because according to Qin Yuan's analysis, no matter what, they are also special forces members, and compared with ordinary soldiers, their combat capabilities will be stronger.

But judging from the current situation, there has been no conflict between them. In the place he investigated before, the armed police did not hear any gunshots, and then the person disappeared. Country A is even more exaggerated. During the process, what they held in their hands were guns, not fire sticks.

So the biggest possibility is poisoning. In this case, someone has infiltrated it. Special forces members are also very careful about their diet. This situation can only be caused by the people around them.

This kind of poisoning is too common, and it is very likely that some kind of toxin is contained in their food or in the air.

The captain of Country A also agrees with Qin Yuan's statement, but they only found out that one criminal group had been active in this forest, but according to their description, it is not the same team as Qin Yuan's previous one in their country.

The two sides also quickly exchanged information. At present, the people from country A came from another direction. They have been investigating in this jungle for three days, but there is no whereabouts.

Now that the two sides meet together, there is only the outermost direction left. Everyone looked at that direction in unison. Qin Yuan took out the map and glanced at it.

If he remembers correctly, this border seems to lead directly to country C. Looking carefully on the map, it is indeed so. However, there are officers and soldiers patrolling their border, so it is impossible to let so many people pass.

It's just that it's not easy to investigate now that it's dark, and everyone can only act together after dawn.

Qin Yuan and the others sat together, and Li Erniu looked at the person opposite, then lowered his voice and said, "Brother Qin, why do I think this matter should not be that simple, could it be that people didn't go out at all, and still Lurking in their country of Pakistan."

"Oh, did you find any clues?"

This made Qin Yuan quite gratified, because Li Erniu is a person who is quite thorough in his work, and he seldom considers these details, so it is helpful to be able to find something now.

Unexpectedly, Li Erniu said that the border area has always been patrolled by officers and soldiers. How could it be possible for so many people to escape? If people from country A and Pakistan are taken out from here.

There are too many officers and soldiers. It is impossible for them to not notice for such a long time, so Li Erniu thinks that they must be lurking in their Pakistani country.

Qin Yuan gave him a blank look. If they had been lurking in the Eight Kingdoms for the past few days, they would have noticed it, and they would have gone back.

And according to Qin Yuan's judgment, if they were in Yan Country, this matter would definitely not happen. Their enforcement is very strict, but now they are in Ba Country, so it is not certain.

However, at this moment, the conversation of the few people was overheard by a soldier from the Ba Kingdom. He was already a little dissatisfied with Qin Yuan, and felt that this person made his own claims every time, and he always had a particularly arrogant look. manner.

So regardless of their captain's objection, he stood up from the team indignantly, "Captain Qin, I think you may be a little unfriendly when you say this. This is completely destroying the relationship between the two of us. Why do you deny our relationship?" ability?"

Qin Yuan raised the corner of his mouth and smiled, "I'm not denying it, I'm just stating the facts!"

Saying these words made the surrounding atmosphere reach a freezing point in an instant. This was completely ignoring the power of their Pakistani country. The people from country A next to them were watching the fun, and they didn't make a sound.

The captain of the Chin country couldn't sit still anymore. No matter what he said before, it was more tactful, but he said directly in front of him that their domestic military strength is not good. Isn't this an open and aboveboard ridicule?

Qin Yuan didn't bother arguing with him, but just looked at his watch. It was already more than 1 o'clock in the morning, and there was still about four or five kilometers away from the border area.

If they go there now, it's pretty much a look at the current state of their border.

Originally, everyone decided to set off again the next day, but after being told by Qin Yuan, the captain of the Ba Kingdom was very unconvinced, and he wanted to see what was going on.

Just like that, everyone originally planned to set off again the next morning, but now they can't take care of that much, so they went to have a look in the dark, he wanted to see what Qin Yuan said.

Although it was night, they didn't encounter any danger along the way. In addition, they had done night training like this many times, so everyone was fine.

The captain of Country A is completely watching the excitement, since it's none of his business anyway, so this time he'll follow along to have a look.

They arrived at their border soon, but at this moment, the captain of Pakistan's face is getting worse and worse. It is very strange that they are now less than 200 meters away from their border. In such a short distance, even a None of the patrolling soldiers saw it.

Not only that, but their team is relatively large. After all, there are three special operations teams, and they are constantly shuttling here. No one came to check on such a big commotion.

Now the captain of Country A knew what the problem was, and the person was brought out from them, otherwise, how could the investigation fail?

Having said that, Ba Guo's captain couldn't hold back for a moment, feeling that this was a great shame, and angrily walked to the front security post to check.

Everyone had already walked in, only to realize that the touched video was dozing off. He was so angry that he shot directly at the soldier's place. In an instant, several people around were awakened. Everyone hurriedly Be vigilant in this direction.

Soon the sentinel notified the team behind that someone actually came to upload their territory.

But the captain of the Ba Kingdom was not jealous, he stepped forward and slapped the soldier on the face, because it really let everyone witness how weak their strength is, and they can't even defend their own borders, so what can they do? guard what?

The soldier who was beaten was still confused at first, but when he saw the clothes on the person who came, he was stunned for a moment. This is not something that can be offended. This is not the highest military officer of their special operations brigade. ?

Soon the captain in charge also hurried over with people. It was not a trivial matter to cause trouble on their border, but when he got closer and saw the people coming, he was instantly stunned.

The captain of the Ba Kingdom didn't give the slightest face, and asked what was going on on the spot, why there were no soldiers guarding the border, and they just opened the door to them?

However, the person in charge next to him was also a little embarrassed, and he quickly explained that this was an order from above.

Ba Guo's captain didn't like this, and immediately called the higher-ups. How could he make such a wrong decision? Besides, it is even more unlikely that there will be a withdrawal of troops on the border.

After getting an affirmative answer, the person in charge was dumbfounded, and he knelt on the ground directly, expressing that he really didn't know anything.

And he said that he did receive an accurate order a month ago, and that person also brought an order from the highest officer, and drove a carload of supplies, so that all of them were here to guard the supplies, and there was no need to patrol.

Ba Guo's captain was about to get angry, so Qin Yuan quickly stopped him. Now getting angry is not the point, but to investigate the truth of the matter quickly.

However, there are too many things involved in it, and Qin Yuan is not easy to participate in it, so he just gave him some suggestions and asked him to quickly go and see what was going on with the substance inside.

Everyone is still in a state of confusion, but Qin Yuan has already understood that this is definitely because country C is experimenting with these special warfare soldiers. Their physical fitness is better than ordinary videos, but they don't know what despicable things they are going to do. Experiment, this time under such a big hand.

The reason why it is country C is because what he learned before is related to country C, and all the evidence has pointed there.

Half an hour later, Ba Guo's captain came out with a sad face. It could be seen that the expression on his face was very unnatural, and he should have lost his temper inside.

The few soldiers who followed them just now were like eggplants beaten by Shuang, and their words were not as tough as before.

Up to now, because the missing team members are involved, the captain of the Pakistani country can only tell the situation of his investigation.

It turns out that the problem did appear on this batch of supplies, and the people on it are really not simple. It should be the same group of people who took their team members away before. They forged a military document, and there was nothing important in that car. Substances are just for bluffing.

They also claimed that as long as they guard the area for two months, they only need to focus on this side recently, and they will arrange other people to guard the patrol line.

These soldiers originally took obeying orders as their bounden duty, so they didn't think too much about it. Everything was done according to the above, so this situation happened. The captain of the Ba Kingdom was very annoyed when he heard it. hit the ground.

It can be said that the official seals made by these ***** are really fake, and there is no trace of forgery at all. This is definitely something wrong with them internally.

Unexpectedly, it turned out to be the same as Qin Yuan guessed. Now all the clues point to country C, but the crux of the problem is that they have no evidence. It is impossible to bring so many people to country C. Not only will they scare the snake, but they will also be here. Make a big fuss about things.

Speaking of this, everyone lost their minds for a while, and the captain of country A said that he needed to consult with his superiors. He was just a small captain and couldn't make many decisions.

He Chenguang couldn't sit still watching them consult with the chiefs of both sides. He asked Qin Yuan what should he do now?

"What? They ask for instructions from the superior officer because they don't have the ability. Do you think I still need to ask for instructions?"

He Chenguang also smiled awkwardly, "Then what should we do now? Should we go back or continue to investigate here?"

Of course, Qin Yuan had his own way, but he just waited for their consultation to be over before discussing with them. If they were willing to cooperate, then they would go together. If not, he would go alone.

After waiting for more than half an hour, the request for instructions from both sides was finally over, but there was still no result, because the officers of both sides were still considering it.

Qin Yuan saw that they had no idea, so he also expressed his own opinion. His strategy was very simple. These people not only captured these special forces, they must have a target, so it is better to sit on the sidelines and wait for rabbits.

This time they found out about things on the border by accident, because everyone got together, and according to the previous person's account, they needed these border soldiers to take care of the supplies here for two months.

Chapter 1656: risky plan

"Captain Qin, I think your method is really good, but it's also very risky. Isn't this putting us in danger again?"

Qin Yuan smiled disdainfully when he heard this, "Anyway, this method is here. If you are willing to do it, then do it. Besides, as a special operator, there is nothing that is not dangerous."

Having said that, everyone understands that what Qin Yuan said is indeed the truth, nothing they do is not dangerous, they are all rushing forward, and now it has been such a long time, who knows what will happen. The accident happened, so it is better to solve it as soon as possible.

The captains on both sides were very embarrassed. They didn't get a specific answer after asking for instructions just now. They just asked them to wait and see how the above could solve it.

Qin Yuan said that they would only be given one hour to think about it, and if there was no reply, they would have to act, but after they acted, they would definitely focus on their own team members first, and they would not be able to take care of the others. up.

Although this may sound unpleasant, it is the truth. Why should I care about the life and death of others? Everyone takes care of their own players first.

After finishing speaking, Qin Yuan also looked at the time. According to his previous speculation, these people should come again, so the thing to do now is not to startle the snake.

Als, the captain of Pakistan, expressed his understanding, and he hurried to hand over to the captain on the other side of the border.

Now that they are hiding in the bushes, there is no problem at present. According to Qin Yuan's deduction, they will definitely come up through this gap.

Als has been waiting for the reply from above, and now he also feels a little strange, "Captain Qin is not that I want to question you, but I just feel a little curious about this gap, don't they worry about being discovered by others?"

"The plan they made is flawless. To be honest, it has been so long. If I didn't come here to remind you, how long do you think this situation will be hidden?"

"This..."

Als didn't know what to say for a moment, he knew what Qin Yuan meant, and it was indeed their comfortable management, mainly about the connection between the top and bottom.

So it is very certain that these people will come from the gap, and the captain of country a will immediately put forward his opinion when he hears this, so it is better for them to sit here and wait for those people to come and catch them all.

In his opinion, this method is the safest, and it doesn't require them to go deep into the tiger's den, and it can also directly catch the people who come.

Qin Yuan shook his head, why doesn't this guy have a little brain, he didn't have the slightest chance, so he turned back on the spot.

"I thought that if you were able to lead a special operations team, you would be somewhat capable! Why do you feel like you can't think about problems?"

When Qin Yuan said this, the captain of country a couldn't hold back for an instant, and the team members next to him were also a little unconvinced, and stood up and questioned him loudly.

"What are you? I admit that you do have some tricks, but why do you say that about our captain? Our captain is thinking about everyone's safety."

"Hahahaha, safe? I think it's a group of cowards acting, and if the problem here is not resolved, the matter will only be delayed more and more."

According to the method that the captain of country a said just now, it would only scare the snake away, because the team they sent dared to arrest people everywhere in such an upright manner, it meant that they didn't know much about the internal situation at all.

In this case, if they arrest the team, the people behind will definitely find out the danger and stop completely. They are in the dark and they are in the light. When there is no clue behind them, what can they do?

The team member was still a little unconvinced when he heard what Qin Yuan said, "Captain Qin, are you thinking of people too kindly? As long as they fall into our hands, isn't it so easy for us to know what we want? "

Qin Yuan knew what he meant, wasn't it torture? He stood up and asked, "Then we can change the meaning. If you don't know about this operation, and I arrest you and beat you half to death, what do you know?"

"This...how is this possible? Since they were able to come out to carry out the mission, they must have some clues."

"Oh, according to the clues you said, let me make an analogy now. I send you out to help me catch people and send them to a certain place. Do you know what I'm going to do?"

This time, the other party was really speechless. It seemed that no matter what they said, Qin Yuan had a reason to refute it. The main reason was to think carefully, what this guy said really made sense.

Qin Yuan has analyzed all the problems, he will not do that kind of unsure thing, he must achieve absolute success if he wants to do it.

The reason why they didn't pay much attention to it was because they didn't know where these soldiers were taken to do what kind of experiments. Qin Yuan knew a little bit about it, so he was very worried now.

Qin Yuan couldn't say clearly about that kind of experiment. He still didn't fully understand whether it was harmful to the human body or not, and what the specific experimental process was like.

As time passed by, the red blood cell team was very calm, chatting indifferently, anyway, they set off as soon as the time came, and everyone just obeyed their captain's orders.

As soon as the time was up, Qin Yuan stood up, patted the dirt on his body, and then gave the order to lead the team to prepare for inspection.

Seeing that this guy came for real, the two captains next to him were also a little anxious. They were also very worried. This guy Qin Yuan might really do what he said. If he really went in, he might just put his own people rescued.

The two didn't want to miss this opportunity, but they also felt that the risk was very high, and there was no response from the top.

At this time, Qin Yuan looked at him and said slowly: "By the way, I need to remind you two that we are going to hide at the border now, and I hope you don't startle the snake."

Ars quickly caught up and asked Qin Yuan what his specific plan was? He thought about it, "Are you planning to follow up directly?"

Qin Yuan smiled, this method of tracking wouldn't take long at all, he was planning to throw himself into his arms. Now because of the disappearance of special forces members, all countries have begun to be on alert.

So it's not so easy for them to catch people again. If they happen to appear by chance at this time, wouldn't they just go up to the point of the gun? In the eyes of those people, they are prey, and they don't think much about it.

Qin Yuan took back from them, and just left with his team. After walking away completely, Li Erniu turned his head and looked at the two teams who were standing there.

"Brother Qin, will we really only save people from our own team?"

"Stupid boy, don't worry, don't watch, they will definitely follow."

Li Erniu was a little surprised. Just now he saw the attitude of the captains of the two teams, but they were very determined. He probably wouldn't follow them, after all, they didn't want to take risks.

But he didn't think too much about it. Everyone quickly arrived at the previous border crossing, but it took only 20 minutes to see that the two teams were also able to keep up.

Li Erniu looked at Qin Yuan in admiration, and asked their captain to confirm, "Brother Qin, you are really good at predicting things, they really came, but we are so many, won't we be discovered?"

Qin Yuan smiled slightly, and he knew how these people could miss such a good opportunity. Everyone has something to gain, and everyone was worried that they would lose out, so they wanted to hurry up to get a share of the pie.

And whoever said that they will always be lurking here, they can't wait for anyone here, it's just a show for them to watch.

He Chenguang turned his head and glanced at Qin Yuan's squinted eyes. This guy is really an old fox. To be honest, even all of them were deceived.

Seeing the captains on both sides approaching, at this time the captain of country a also lowered his posture and spoke very sincerely, expressing that he was willing to obey Qin Yuan's arrangement in everything.

"Captain Qin, I thought about it carefully just now, and I think what you said is very reasonable, and among us, your ability is the strongest, so we are willing to follow your arrangement."

"Captain Qin, we also mean the same thing. I will bring the players from Pakistan to cooperate."

Seeing that they have all expressed their attitudes, Qin Yuan smiled, still maintaining the official attitude, "We all help each other, there is no need to say these polite words, since you all joined in, it seems that we have to Change your plans."

The two stared at each other, what's going on? This person really had an idea for a while, didn't he just say that he was going to lurk here?

At this moment, Qin Yuan also told them his most real thoughts at present. In fact, what he said was also very reasonable. If the current strategy is to be carried out smoothly, it still needs the help of Pakistan.

They need to release a message, which is to hold a special training match in Pakistan, and write the time and place very clearly.

The captain of Ba Guo couldn't understand, when will such news be released?

But he couldn't refute it. Qin Yuan was always very mysterious in doing things, and he had his own opinions. Every time he did it, it seemed to go smoothly, and everything was exactly as he said.

Qin Yuan knew very well in his heart that this kind of situation can happen on the border of Pakistan now, and there must be something wrong with them internally, so such news is the most appropriate.

As for the information has been released now, all they need to do is to wait. Fishing always requires patience.

Moreover, a training base was specially allocated for them. After all, they had said before that everything was under Qin Yuan's arrangement.

There must be nothing to say on Ba Guo's side. They were originally invited to help. The person in charge of A's side also felt that it was no problem after knowing it. As far as Qin Yuan's ability is concerned, if he is to lead the team, he can find it. More likely.

Everyone was completely away from that training ground, and when they went out, they said it was a training ground, which was on the top of a big mountain.

This is really a piece of fat right there, but it may be a threat to others, but for those who really want to come to them, it is a piece of fat.

Everyone just waited quietly like this. It has been three or four days. Have you found anything unusual around you?

The captain of Country A felt that if he stayed like this, he would be moldy. He had been checking in the rainforest for another week before, and now he was waiting again and again.

On the other hand, Qin Yuan was very calm, and even caught fish in the training base. There was a pond behind the hillside, and there were many small fish in the pond.

This guy actually lived his life like a vacation, usually fishing some fish, grilled fish, and fish soup.

Ars could hold his breath. Anyway, everything was according to Qin Yuan's arrangement. After another four or five days like this, the captain of country A watched the video of sending him to

stand guard every day. He couldn't understand it, shouldn't it be A little more slack to make it easier for them?

And Qin Yuan's explanation directly refuted him back, the other party is not a fool, don't make it so obvious, they are training and special forces now, so of course they have to be more formal, otherwise it will be easy to be seen by others, Then how to act.

Qin Yuan stripped back the successive opinions put forward by the captain of country a. Although he was a little upset, he still felt that what he said seemed to make sense.

In this way, everyone set up the tent that night as usual, and the people who were about to rest and stand guard were also released. Qin Yuan showed an imperceptible smile inside the tent, because he heard some movement.

His hearing is unusual, and even the soldiers standing guard outside didn't notice it at this position. He sat inside the tent and observed the surroundings through the narrow gap.

It seemed that those people couldn't wait any longer. They had received the news, but they didn't dare to act rashly. After all, they had three teams.

So they still need to observe, Qin Yuan can feel that there are not many people, only four or five people, UU Reading www.uukanshu.com should only be their vanguard coming to inquire about the situation.

The main reason is that this area is too quiet. The next morning Li Erniu walked over yawning. Last night he was the last guard on duty.

Still nothing happened, he just went back and prepared to rest for a while, when he saw Qin Yuan sitting on the bed holding the current map for analysis.

"Brother Qin, I don't think you need to bother. Who knows when these guys will come."

"Why don't I know, everyone came last night."

This sentence completely shocked Li Erniu, and Wang Yanbing next to him was also full of surprise. This is absolutely impossible. He was on duty in the first half of the night, and there were soldiers from Ba State on the opposite side. None of them noticed anything unusual.

Qin Yuan is very confident, "You don't have to be so nervous, people are just here to sniff out the news, you just follow the normal situation, with me here, I will notify you, probably in these two days."

Li Erniu's back broke out in a cold sweat when he heard this. If it wasn't for Qin Yuan's reminder, something might have happened last night. It seems that these people's skills are really good, and none of them noticed.

Chapter 1657: Unauthorized action by country A

It's just that he doesn't understand what their captain is going to do now. He has already found the person on the other side, so why don't they let them do it?

This made everyone a little distracted, and kept looking around. Although everyone knew that they were doing a show, some people appeared around them for no reason, and they didn't even notice it.

Qin Yuan can only comfort them and let them relax. He has his own plan, and he can't expose it like this now, otherwise he will really scare the snake. These people are very vigilant.

From the way they handle things, Qin Yuan only noticed it from the system. Thanks to the system's reminder, some mechanized soldiers entered his range, otherwise he would not have been able to find out.

So this can't be blamed on Li Erniu and the others. They didn't find it normal. After a while, Wang Yanbing walked in.

"Brother Qin, how's it going over there? Shall we communicate with the captain of Country A and talk to them about this matter?"

After all, Qin Yuan has only communicated with their own people now, and they haven't managed it yet, mainly because they want everyone to pay more attention.

"It's not necessary. Talking to them will only increase their panic. To be honest, their combined abilities are not as strong as our team's, so I don't want to bring these people in."

This is also Qin Yuan's self-confidence. Among these teams, his red blood cell team has not yet been able to compete with them. Even if it is a real battle with these semi-mechanized soldiers, his red blood cell team thinks it is no problem.

Looking at Wang Yanbing, he was a little worried. He mainly wanted everyone to cooperate together. There are more people and more strength.

She stepped forward and patted him on the shoulder, and said comfortingly: "Don't worry, I have a measure of these things, and I know what to do."

He nodded, and then walked out. After walking out, he noticed a gaze, and saw the captain of country A walking towards them.

No need to think about it, this guy can't arrange it anymore. After all, after waiting for so long, there is no clue at all. He is worried that he will be completely exposed.

After a while, the captain of country A came out of the tent angrily, just because the strength is really inferior to others here, otherwise he really wanted to curse, no matter how he went in and asked Qin Yuan, it was always the same. A nonchalant attitude.

This made him really aggrieved, and they were indeed the ones who said they would follow, so he didn't want Qin Yuan and the others to take advantage of it for nothing.

But the people in his team couldn't sit still anymore. After he came back, one team member saw his attitude and understood one, and probably knew what was going on.

"Captain, I think this is too much. We have wasted a lot of time here, and it has been a month now. There are no clues here, should we continue to mess around?"

The captain of country A is the same, I scolded, what can he do, "I know what you said, it is because we have wasted so much time, and now we give up halfway, can we just watch them get benefits?"

What he thinks now is that he is worried that he will not be able to catch the fish, and he is also worried that the fish will run away, so he is very entangled now.

The team member also understood his thoughts, mainly because the pressure from above was too great, "Captain, but I'm worried that if we keep waiting like this, if there is no result, nothing, what should we do?"

"Then what can we say now? Are we going to quit halfway?"

The team member smiled mysteriously. He felt that it was really not worthwhile to quit halfway, so it would be better to act secretly. The captain of country A looked at him and instantly understood what this guy meant, and the two secretly plotted for a while.

At this moment, Qin Yuan didn't know what these people were planning. He only hoped that they would be honest. Now that those people are about to be hooked, they are probably studying what kind of plan to use to catch them back.

After all, these are three special warfare teams, and they are a piece of fat in front of them, but even if they are very capable, these three special warfare teams are not soft persimmons.

Therefore, without absolute certainty, they would not act rashly, as this would expose their whereabouts.

All that needs to be done now is to wait quietly. Two days later, Qin Yuan noticed that there were more and more people moving around, and the system kept reminding him.

The more this happened, the happier he was. It seemed that the net was about to be collected, especially on the morning of the third day, Qin Yuan had already noticed that the number of people on the other side had doubled.

He also specially notified Li Erniu that they will pay attention later and be ready at any time. They are likely to fight, but what Qin Yuan is most curious about is what kind of method they will use, just like this Unknowingly, the special operations team was willing to follow them.

When he was thinking about countermeasures, he suddenly noticed a different aura. The mysterious forces outside were all approaching them. He could hear the system's prompt, but in the afternoon, he unexpectedly noticed that those people were retreating. .

The main reason is that the distance is too far. He can only rely on the prompts from the system, and the sound of the prompts is getting weaker and weaker. He feels that something is wrong. What are they going to do? With their numbers, they can definitely come up now.

Qin Yuan had a bad feeling in his heart, he stood up quickly, and then he couldn't control so much, he couldn't let these people run away.

At first, he thought that these people might have a plan to delay the attack, and they were planning a certain plan, but something was getting worse and worse, until the system's prompt sound almost disappeared, and it seemed that they had gradually retreated.

Qin Yuan rushed out of the tent, roared loudly, and then took the red blood cell team to tidy up their equipment and rushed out. Als and the others on the side of the tent were all in a daze. What kind of tricks is this guy doing? ?

"Captain, are they doing some kind of assault training? Why did it happen so suddenly? Wasn't he quite relaxed before?"

Ars also felt strange when he heard the questions from the team members beside him, but he looked at Qin Yuan's movements and the direction they were chasing. It didn't seem like he was training.

"Good guy, there seems to be a problem, hurry up!"

Country A's reaction was the slowest, mainly because they didn't have any hope at all, so they didn't pay attention to this side at all. They only reacted after the two teams rushed out.

Qin Yuan was the fastest, he just wanted to quickly track down the last person, everyone didn't know where the target was, they just followed Qin Yuan all at once, and they could only see Qin Yuan's back when they got to the back.

This guy's speed was too fast, and he came to the opposite cliff in an instant, and saw a few heavily armed people.

Sure enough, as he guessed, the people on the opposite side were also surprised when they saw him, but a few people smiled at him, as if they knew that he had already caught up.

Then just like Long Xiaoyun back then, they carried special equipment, leaped directly from the cliff, and then disappeared completely. No matter how fast Qin Yuan was, in this situation, he would not dare to take risks without equipment .

In the end, he only grabbed a broken cloak, cursed secretly, and watched those people getting further and further away. When the red blood cell team caught up, they only saw figures in the distance.

Qin Zhengyang was panting at the beginning, he really didn't know what he was chasing, but after seeing it clearly, he still felt very strange, who are these people, even their captain can't catch up.

"Brother Qin, what's going on?"

"To be honest, I'm also very confused now. I don't know what's going on. They retreated suddenly. My plan should be seamless."

Speaking of this, the captain of the Ba Kingdom also chased after him out of breath, and when they came, they only saw a few black spots on Mohu completely disappeared from their sight.

Als was very shocked when he saw this scene. Before he could react, Qin Yuan next to him changed his face, and his mind was spinning extremely fast.

"Ars, I really want to ask what's going on! When I asked you to notify me of the plot, I agreed that only the highest military officer would know about it. Does anyone else know?"

"Chief Qin, I don't understand what you're talking about. Do you mean that there is a traitor or something on my side? Has our news been leaked?"

Qin Yuan snorted coldly, even though this guy still understands something, because at present, it seems that their news is leaked and the situation is very serious.

Als shook his head. He said it was absolutely impossible. He handled this matter very carefully. He knew what it meant, so it was impossible for it to leak from him.

This caused both parties to argue, and Als patted his chest to assure that he personally supervised and handled everything, and those who wanted to infiltrate must not infiltrate their senior management.

Everyone has been working in vain for so long, Qin Yuan clenched his fists, he knew what it meant, these people are very cunning, just like the previous face-to-face men, it will be too difficult to find them next time .

So now he can't take care of that much anymore. What he hates the most is that others ruin his plan. He is very strict in doing things, and it can be said that this has never happened before.

When the captain of country A ran up with his people, he was also very confused when he saw this state, because he only saw that the two sides were arguing, and he didn't know the specific situation.

However, this guy was originally a spectator, and he wished that the quarrel would be as fierce as possible. It's really aggrieved that they have been here all this time, and it's just a good time to see what Qin Yuan came up with.

Seeing that Als of Pakistan is getting less and less the upper hand, because he is really unreasonable. Qin Yuan's plan is seamless, but there is a problem in this link.

The captain of country A couldn't help standing up and saying: "Captain Qin, I'm being fair, I don't think you need to blame us all!"

This guy really doesn't think it's a big deal to watch the excitement. He feels that Qin Yuan is completely throwing the blame now, because the plan he said has not been fully implemented, and everyone has not figured out the situation.

Especially since they didn't know anything after they came up, they only saw them arguing, and then Qin Yuan kept saying that the mission had completely failed, and asked everyone to go back and explain to their respective chiefs, which was the most unacceptable to him.

He was very worried about this situation at first, but now when he goes back, how should he explain to the chief above that they just stayed in this place for a week? Didn't do anything, just dawdle every day.

Faced with the aggressive attitude of this group, Qin Yuan can't control that much anymore. What he can't stand the most is doubts, especially with such stupid people. He directly stated that he has found out that there are people who came to monitor them in the past two days up.

And they were also chasing just now, why these people retreated suddenly, it means that their current plan has been leaked out, these people know that this is a trap, so they retreat now, the last hope has disappeared.

Ars hadn't figured out the situation just now, and now he was shocked when he understood it. He didn't expect it to turn out like this. After all, it seemed that the problem was indeed on their side.

Qin Yuan originally didn't want to make a big deal out of this matter, but it seemed that the guy wasn't showing mercy at all, so he simply broke the matter to let them know where the problem was, and it wasn't in his plan.

Originally, he made it clear that there was nothing left to do in the future, but the captain of country A was disdainful. This was an opportunity he managed to get.

"Hehe, Captain Qin, I felt that there was a loophole in the plan you mentioned before. How did you know that someone was coming? The most important thing is that you knew that someone was approaching, but you didn't even tell us what your purpose is."

Qin Yuan was already in a fit of anger, "What purpose do I have, it's just that some people are too weak to know the news."

This sentence just uttered directly made the captain of country A almost vomit blood in anger, the atmosphere between the two sides became very delicate in an instant, and the person on the other side was not easy to mess with, everyone has endured it for more than a week.

Seeing that the situation is getting worse and worse, the captain of Pakistan quickly stepped forward to stop the conflict between the two sides. No matter what, if there is any problem in their country, they will come to them of.

And he said that he will investigate what is going on in this matter, and that there will be a problem at any step. The result of the investigation must be obtained, and it will not take everyone's efforts during this time.

Qin Yuan knew that the current investigation had no results at all, mainly meaningless, those people would not be caught.

But the captain of Country A is like a mad dog, biting him non-stop. No matter what he says, there will always be refutations, and for Qin Yuan's idea of going back, he also feels that he is completely shirking responsibility.

He didn't want to embarrass the matter so much, since they want to investigate the results, they should wait together to see what the problem is.

Chapter 1658: re-enter the space base

In this way, Als took them to another military base, where some of their basic squads trained.

Now he doesn't know how to arrange them, so he can only put them here first. After all, he doesn't want everyone to have other problems. He must choose to believe what Qin Yuan said. Qin Yuan's ability can definitely find those people.

It is relatively safe here. He is mainly worried about whether those people will make a comeback, kill the carbine and take the rest away. People are on their borders. If something goes wrong, they will definitely be looking for them.

Als was so smart once in a while, he was finally enlightened in these areas, so this time he did a good job, and the person in charge of the flash party was also very satisfied with his approach. Now he needs to investigate layer by layer and give everyone a result of the investigation.

On the other side, Qin Yuan and the others were brought into the room. Although they ate and drank here, they always felt aggrieved.

Li Erniu couldn't stand the captain of country a for a long time, that guy was always arrogant, mainly because he didn't have much ability, so he shouted in front of them every time.

"Brother Qin, I don't think that idiot captain has much ability. Is there something wrong with them this time?"

Qin Yuan thought that Li Erniu had some clues from his own side, but after careful questioning, he realized that this guy was just guessing.

Everyone was very anxious, especially He Chenguang. They were delayed for too long because of this incident. He kept pacing back and forth in the room. If you can't go, it's better to be quiet.

Because Qin Yuan knew that if he missed this opportunity, no matter how hard he tried, it would be useless. He didn't know when the people behind him would show their feet.

At the same time, he also lamented that if he had been faster back then, and rushed up directly when he received the system's prompt, he might have been able to catch useful people.

But thinking about it this way, he shook his head, what's the use of catching those people? It's still not the same as what I thought before. What I caught was only some small characters, and it was not so easy to dig the people behind.

Three days later, Als came to find Qin Yuan with two dark circles under his eyes. He patted his chest and assured that it was definitely not his problem.

He also brought some top-secret documents. It seems that he really believed in Qin Yuan. All these documents were stamped by their top officials. It can be said that only the three top officials of their officials knew about this operation. .

This is an order not directly issued by the chief, and it is impossible to leak it. As for the soldiers on the border, they have no idea what they are going to do.

Then this is strange, how did the news leak out? Tapping his fingers on the table, looking at the document, he was also puzzled.

"It's not that I doubt that the things you are investigating now have come out, I'm just curious, will there be any leaks during the transmission?"

Regarding this, Als shook his head. He has been doing this kind of review work these days. After multiple investigations and verifications, it can be said that they have no chance of leaking.

To be honest, some of their domestic forces are indeed relatively weak, so they have adopted the most traditional method, just like this time the tasks they need to perform are all top secret.

Generally, they don't use electronic transmission of this kind of top secret, mainly because only those few people are contacted with paper documents.

According to the investigation results of the past few days, there is no possibility of leaking any secrets at all, which completely aroused Qin Yuan's interest, so where did this question come from?

Li Erniu was eating melon seeds next to him, and he really felt at ease when he came, so he couldn't help but say, "Since there is no problem with both of us, have you investigated country A? I always feel that their captain's mood is a bit too much." Excited."

After all, Ars seemed to have reacted, but would it be bad to investigate them casually like this, mainly because no other evidence was obtained.

But now Qin Yuan is already interested. He didn't want to pursue it before, but now he must figure out the problem, so that he can't be blamed for not knowing it. His plan will always be within the controllable range.

Als knew that there were still many places to rely on them in the future, and this side must not be offended.

Going on like this and conducting an investigation first, Qin Yuan is becoming more and more sure that the problem is estimated to be in country a.

The investigation here went very smoothly. As soon as it was dark, Als came to the room in a hurry.

It can be seen from his expression that he is very angry. After all, everyone has been waiting for this plan for a long time, and after such a long time of tossing.

Unexpectedly, Li Erniu really guessed it right this time. It was indeed a problem with Country A, and they really couldn't sit still.

A team was quietly sent from their country, intending to lurk outside the border of Pakistan. The main thing is to monitor whether anyone enters.

Because Qin Yuan was unmoved at all and asked all of them to stay here, which made the captain of country A very dissatisfied. He felt that he would not get any clues if he continued like this, so he sent another team to the border on-line.

Everything was clear, Qin Yuan kept a cold face after he came out of the room, then stepped forward and kicked open the door of the room where the captain of country a was.

The commotion was not small, and the surrounding guards all turned to watch, but they didn't dare to say anything when they saw the captain of Ba Guo beside him.

At this time, the captain of Country A was lying leisurely on the bed. He didn't know what happened. He was even more dissatisfied when he saw that it was Qin Yuan who came.

"You are..."

Before he could finish speaking, Qin Yuan stepped forward and grabbed him and just uttered two words, "Idiot!"

Although the words are relatively short, they are extremely harmful. The captain of Country A blushed with anger. He didn't know what this guy was going to do against him again and again.

Until the captain of Ba Guo threw the evidence directly in front of them, saying that all of this was their plan to sabotage, he didn't expect that this guy was thick-skinned enough and didn't see the point of the matter.

Instead, he turned around and asked himself the captain of Pakistan, why can he investigate him? Not everyone around him can investigate, and with someone's consent.

Qin Yuan is too lazy to entangle with these pig teammates here. This time, the matter is probably fruitless, because those people are very vigilant, and even he can't find out. It will take too long to investigate.

Even though his ability is strong, there is nothing he can do about this kind of pig teammates. The plan was completely destroyed by them, and now he can only go back and talk about it.

As for this time, he will write a special document and hand it in, which is none of their business.

When Gao Shiwei saw Qin Yuan who had already returned from the team, he actually found it very strange. This was not Qin Yuan's character. He would definitely investigate and reveal the truth about what he usually did.

"Actually, I also know about the training of the fire brigade after you. The matter over there is not so urgent. The opposition means to let you continue to follow this side of the investigation, and this side is the focus."

Qin Yuan shook his head, he came back in such a hurry, not because of the fire brigade's training.

"Because these people are too cunning, if we continue to investigate now, it will only make them hide deeper, and no clues will be exposed."

"Then what should we do now? Will the members of the special operations team be in any danger?"

Qin Yuan shook his head. He probably couldn't say anything dangerous, otherwise they wouldn't go back with them alive. Although he didn't know much about it before, he knew that the experience of this kind of experiment failure was very low.

It's just that he doesn't know what these guys are going to do, and it really confuses him to seek out special forces members so blatantly.

In addition, there are a lot of things recently, he has been busy with training and completing various tasks, and he hasn't been to country C for a long time.

After the training at the fire brigade is over, it is still necessary for him to go to country c in person, so it will be easier to hide his personal ability.

Gao Shiwei knew that he was very measured in doing things, so he didn't ask too much. The next day, Qin Yuan came to the fire brigade non-stop to give them final training.

During the recent period, everyone has strengthened according to his training plan, which is indeed different from what they did before.

This manual is really unusual, it can strengthen different arms and different occupations, according to this kind of training, they can completely improve their foundation to another level, and then receive other high-intensity training, then there is no need problem.

Qin Yuan stayed in their fire brigade for half a month, and also passed two assessments. After their results came out, the problems on this side were considered to be over.

What's more, this training didn't know what was going on, and the merit value given by the system actually exceeded three times.

This time he got 60,000 merit points, but he knew very well that he only trained one team.

Just when he was puzzled, the system also gave an explanation. This kind of fire protection system is quite special, and there will be no independent actions, and it will all be teamwork.

So judging from the current situation, they will only train more teams after they go back. If they come in batches like this, the meritorious value will be higher and higher.

Qin Yuan touched his nose, if he did the calculations like this, wouldn't he be at a disadvantage? He brought so many people, and if more than 40 were divided out, then there should be more teams.

"System, you are a bit greedy, we have to count this thing well, these forty people, is this meritorious value too unfair to me?"

The cold voice of the system sounded in his mind.

"Ding! At present, the system is estimating the follow-up development, and the estimated result is a total of 60,000 merit points."

Qin Yuan shook his head helplessly. Now this system is really not easy to fool. It is completely electronic. It can perceive risks for itself, and it can also predict the future. It predicts based on the current training situation.

Since there was no other way to do this, 60,000 honors was considered acceptable, and it was better than nothing. He had completely resolved the matter here, and after a hasty end, he returned to the Special Operations Brigade again.

Originally, he wanted to go to country c alone after explaining everything, but he didn't expect a task to fall on his head.

It was Mr. Zhang who was at the aerospace base who contacted him before. Qin Yuan thought that Mr. Zhang was going to tell him to go on a mission again. After all, it has been a long time since the last collection mission, and he is still regarded as a key target. .

But Qin Yuan is not very interested in that kind of collection task now, he still has a lot of things to do.

He was a little hesitant when he received a call from Mr. Zhang, and he just wanted to hurry over. This old guy was worried about the center of the country, so his attitude was relatively good. Although he was impatient, he kept listening.

Unexpectedly, Mr. Zhang didn't ask him to do the collection task, but said that there has been too much movement in country c recently, especially their chip manufacturing.

The chip manufacturing on their side was unique before, mainly due to their special technology and a unique substance.

It is absolutely impossible for this kind of material to be available in country C. They need to buy materials from Yan country at a high price.

But recently, there was a problem. They terminated the purchase, and even stopped the subsequent cooperation. This is indeed a relatively big loss for Yan Guo.

The current situation is that it is not known whether these guys already have the technology to make chips, or where they have been dug out from. Someone needs to investigate this.

Mr. Zhang knew Qin Yuan's ability before, he was able to bring the chip back without making a sound, so the first thing he thought of was Qin Yuan, hoping that he could investigate this matter.

Since this is the case, it really kills two birds with one stone. It just so happens that he also wants to go to country C, so let's investigate together by the way. It's really interesting to say that, the recent movement in country C is really too big , they are all developed in various aspects.

This trip really belonged to him, he must go, and after preparing everything, he set off. Before setting off, he still made a certain basic disguise, which was very easy for him.

Because he has been to the space base in country C before, he plans to focus on chips, which is the key point, and he is slowly investigating other things.

Coming to the aerospace base in country C again, it can be said that it is completely like entering their own home. Their pattern has not changed, but after the loss of the previous chip, they have strengthened their vigilance, and the surrounding security has also increased.

It's just that Qin Yuan didn't expect that he was investigating the chip, but found that there was a building next to the aerospace base, and the power grid was pulled up around this building.

Qin Yuan remembered that this place didn't exist before, and after the surroundings were completely plunged into darkness, he could only see a pair of eyes staring blankly at the opposite building, and the security guards inside were patrolling around.

The dark night is Qin Yuan's best disguise. There are groups of people patrolling in front of him, basically there is no gap.

Chapter 1659: new experimental base

He also wondered what happened to this base that appeared out of nowhere. At this moment, a patrol car caught his attention. This patrol car was completely mechanized.

The whole process was controlled by people on the periphery using radio, and if he read correctly, there was an infrared perspective instrument on the mechanical car, which was mainly used for inspection.

He looked at his position about a few hundred meters away from the vehicle, but he didn't expect the vehicle to come straight towards him. He could only keep backing away, completely submerging his figure in the darkness.

The vehicle seemed to be aware of the abnormality and approached non-stop. Within two minutes, footsteps came from behind.

A small group of people came towards this side. Qin Yuan reacted quickly and quickly jumped onto the top of the wall, and then jumped into the previous ravine. He hadn't entered yet, but he didn't expect to encounter problems at the beginning.

After the leader ran over, he began to guard around, and dispersed the team members, telling them not to miss any corners, and began to check carefully.

Qin Yuan has now jumped behind the power grid and hid in the ravine, so there is no problem at present.

"It's strange, the machine has clearly issued an alarm just now, could it be a wrong detection?"

"This is not the first time the captain has seen such a situation. It is likely to be a wild cat or a wild dog that has run away. This has happened before, and we can't find it later. It should not be a person. We have such a high-level grid person here. You shouldn't be able to jump in."

"Forget it, everyone be more vigilant and let the second team and the third team all come to Jinan and find something abnormal, then strengthen the vigilance here."

This made Qin Yuan never expect that these people were waiting for something that they valued so much.

Before he even had time to go in, he was directly blocked outside. That thing is really interesting, and the detection range is getting bigger and bigger, too sensitive.

The more this happened, the more he felt that it was necessary to enter the base. The more people there were, the more lively it would be, because there would be problems if there were too many people, just when the second team and the third team assembled.

Qin Yuan took advantage of this gap and jumped in. Although the machine next to him responded, there were too many people, so the captain didn't take it seriously.

Taking advantage of this confusion, Qin Yuan rushed in, but after he entered, he was in a state of bewilderment, not sure what was going on, because after entering, it was an empty hall. Just now, when he saw them waiting outside, he thought it was What a secret base.

After entering, there was an empty hall without even a guard leaving, which made him more and more curious.

He squatted down and touched it tentatively. This is very likely. Is there some kind of mechanism?

Just when he was about to touch it, the system issued a prompt, "Ding! Alert! Please do not touch, the risk factor is ten!"

Hearing this, Qin Yuan took a breath. You must know that when he encountered some big crises before, his sense of crisis would be triggered, and he would know the general direction, but this time it turned out to be a reminder from the system. What exactly is there.

Just when Qin Yuan was still hesitating, he heard footsteps coming from outside. It was over now, because the surrounding was empty and there was no place to hide at all. He raised his head and looked at the sky, and it was all Empty, not even a plumbing.

He cursed secretly, turned over and jumped to the side, and at the same time the door was opened.

A man wearing glasses walked in, followed by more than 20 people, all of whom were escorting him with some boxes in their hands.

After entering, the man looked at the four, but didn't notice anything unusual. When he walked to the middle of the floor, he had an extra button in his hand. When the button was activated, the floor below slowly rose.

Qin Yuan watched this scene closely from the side of the wall. No wonder these guys could open it so easily. It turns out that there are lasers and something specially activated under it.

He also had no way to directly activate the stealth skill in the same class. He didn't maintain this skill for a long time. He originally wanted to stay behind, but now the situation is urgent.

The things here are really getting more and more interesting. Qin Yuan watched the operation of the man in front of him. After turning on the button, a person behind took out the box and took out a small black ball from the box.

After throwing the ball under the floor just now. It turned into a black hole slowly, and it looked like a staircase.

The man turned his head and told a few people to be on duty here, and then walked down with seven or eight people carrying boxes. Qin Yuan took this opportunity to follow behind them, and now his invisible time can still be maintained, so there is no need to go down. question.

After waiting for a while, the willingness is a complete eye-opener. The upper part is a warehouse-like space with nothing in it, but the lower part is divided into small rooms one after another. If you look carefully, all of them are various bottles in the laboratory. Bottles and cans, as well as staff in white coats.

Surveillance probes are everywhere around, and there are personnel on duty non-stop, and this place has been made transparent.

There are transparent glass everywhere, and there is no privacy at all. There are personnel on duty at the top, and they look very strict as they watch the bottom intently.

Looking at such a large size below, Qin Yuan also felt that it was not a disadvantage to come in this time, and thought he wasted an opportunity before.

Unexpectedly, they built such a large laboratory next door to the aerospace base.

Qin Yuan followed the people in the laboratory and continued to look forward, and he could roughly see what experiments they were doing. These experiments were carried out in different batches. The front ones seemed to be undergoing mechanical transformation, while the latter ones were still being used for chip research.

Because he has seen the materials of these things, and he has been in contact with them before, so he can understand after a little glance, but he doesn't know how country C can find so many people this time to make these things for them.

At this time, Qin Yuan also saw the chip that Mr. Zhang mentioned before. This chip was originally a unique technology of Yan Country, but now it is being developed here.

This surprised him a little. Could it be that these people suddenly became enlightened, able to know what they now mastered?

Qin Yuan took this opportunity to enter the laboratory. The chip next to him was placed on the laboratory table, and several staff members were hard at work.

No one noticed his figure, he was silent, trying to keep his footsteps as low as possible, although he was invisible, his voice could not be covered up.

After he entered, he picked up the chip on the table, and as soon as he touched it, he heard the prompt from the system, and he asked the system to recover and analyze it.

Unexpectedly, after systematic analysis, this chip is not as good as the one they made before. The waste system like this will not be recycled, just a reminder.

Hearing this, Qin Yuan finally understood. It turned out to be a replica of a sample, which would always be flawed and not as good as their original product. These people probably had no choice but to invest in researching the chip impatiently.

Choosing the laboratory inside, Qin Yuan looked over one by one, and it looked more like a large-scale production factory. At first, he thought that this kind of chip would be used on the space station.

But it seems that it does not follow this kind of pipeline development. There are various precision instruments in front of it, which are completely division of labor, and this chip is just one of them.

In the end, Qin Yuan saw that the chip appeared here because it was one of the main products used to make cyborgs.

I didn't expect this chip to have such an effect, and I couldn't help admiring the love, this country C really hides its secrets, and now I'm starting to study these things.

Qin Yuan took a good look at the whole laboratory. It felt like a small production-scale workshop, and there were soldiers doing experiments in the innermost part. They had become semi-mechanized and looked a little uncomfortable.

Qin Yuan originally suspected that these special forces from various countries were brought here for experiments by them, but there were no foreigners as far as he could see.

That's very strange. He didn't miss any details. He was searching carefully. After searching all over this laboratory, he found out that he had seen it before, and the mechanical car was also made here. This is a secret experiment. base.

With the passage of time, he knew that he should not stay here any longer, because it would affect his future development, his current ability has slowly dissipated, and if he doesn't go out, he may be exposed.

Qin Yuan finally brought a chip, and slipped out quietly.

At this time, several staff members in the laboratory also had a dispute. It was precisely because of the lack of this chip that each of them had it. How could the records disappear for no reason.

The man wearing glasses before heard the dispute and hurried forward. He stared at several people coldly, "What's going on? There's a lot of noise in the laboratory. What are you going to do?"

"Including the officer, we found that a chip is missing. This matter is no small matter."

The man wearing glasses walked up, and he looked around. It can be said that under the surveillance of this kind of glass room, no one can get out of here, and no one can come in.

It could only be someone from the inside. He immediately ordered people to go down to search, and the people who participated in the experiment just now were all arrested, but no matter how they searched, no chips were found on these people.

In the end, it was a big fuss, which can only be explained by misremembering, because no matter whether they called up the monitoring or checked other things, the chip seemed to not exist.

Qin Yuan always felt that there was a bit of weirdness in this experimental base, and he hadn't grasped the key points of many things.

It's just that there is not enough time today. After he came out, he lay down in the ravine before, still looking at the base in front, always wondering if he might be connected with the missing soldiers.

He looked up and saw that it would be dawn in a while, and it was not suitable to stay here, so he could only come out temporarily.

He has finally investigated the matter of the chip, and it seems that there is nothing else to be investigated here. He decided to change direction and go to the previous military base, where he found out that they were conducting experiments at that time.

Although that place had been exposed, he always felt that he had to give it a try.

The next morning he came to the military base he had discovered before. It was very martial law there before, but now it has been completely withdrawn, and the surrounding trees have grown up. It seems that since they left, the place has returned to its original state.

The surrounding traces were cleaned very cleanly. It may be that they evacuated just after leaving the military base. After all, it has been exposed.

After much deliberation, Qin Yuan really had no idea, so he went directly to the president of country C. These guys were always doing such messy things behind their backs, and he didn't have a good impression of that person.

And all the details point to the problem that is definitely on their side, and he also wants to solve it as soon as possible.

The president of country C was eating breakfast, and before he could react, he heard a slight sound of windows opening. Did he still notice how strong the wind is today?

He had just turned his head when he saw a person sitting on the chair behind him, tapping on Erlang's leg and looking at him cynically.

Even so, the president of country C was still taken aback. This guy really came and went more and more freely now.

"Why are you here again? What do you want to do in this place?"

"Hey, I thought you would ask some other questions. Since I have already come, there is no need to ask these."

He clenched his fists, but there was nothing he could do. This person was so powerful that he came and went without a trace, so he really didn't know what to do.

"Then what problem did you encounter this time? Why did you come to me suddenly! Don't you think it's very impolite to do so?"

"Is that why I'm going to hold a press conference for you to come to see me, otherwise I'll make something happen, as you wish."

This is a complete lunatic, looking at the person in front of him, the president still compromised because this person knows too much about them, and it would be bad for anyone if they make trouble.

He cursed silently. Since the previous incident, he has changed a lot of people. He has hired all kinds of excellent agents and top agents, but it seems useless in front of this guy.

He entered the place where he lived, just like his own home, very comfortable.

Qin Yuan didn't delay too much, and directly entered the topic, "Actually, it's a small problem to come to you. I also want to know if those missing special forces have anything to do with you?"

Qin Yuan's words sounded very impolite, so he asked directly. Although the person in front of him was unhappy, he still said, "I really don't understand what you mean? I don't know what special forces are."

He stared at the person in front of him, and easily invaded his meaning in the next second. He didn't even notice the person in front of him. He just felt that his reaction seemed to stop suddenly.

After a while, Qin Yuan completely let go of him. At this moment, Qin Yuan frowned. He didn't expect that this person really didn't know about the missing special forces.

Chapter 1660: Special file!

The president of country C has already reacted to the last incident. He knows that the person in front of him will be very powerful. Before the hypnosis, he knew something inexplicably, not to mention the momentary lack of him just now, and he feels something is wrong. up.

"What did you do to me just now? It's too much for you to do this. I've been enduring it before, but you don't want to think about who I am. Are you qualified?"

Qin Yuan looked at him disdainfully. For him, anyone is qualified in front of him, "Because my strength determines everything, even if you moved that military base to another place, do you think I won't know? ?"

"You! How do you know!"

The president of country C was completely stunned when he heard this. He fell to the ground. He really didn't expect Qin Yuan to be so powerful. This guy can threaten him every time, and he can grab his lifeline every time. He seems to know everything.

He had indeed removed that military base, and it was his own order, so it was absolutely impossible for others to know about it, but the person in front of him easily hit his sore spot directly.

It can be said that this is his last trump card. At this moment, Qin Yuan is also sitting on the chair and began to think. He checked it just now, and the person in front of him really doesn't know. He has such a great right, and he doesn't know the following situation. , Isn't this matter done by country C?

Now the problem is getting more and more complicated. Originally, he thought that he could solve it by finding country C, but it seems that there is not much hope.

First, the extra experimental base they created, and then these special warfare soldiers, really disappeared inexplicably, and the clues were all broken here.

As for the experimental base, they did not conduct experiments on people from other countries, as if they were all from their own country.

This one has to say, it really has nothing to do with him, he really stretched his hand a little too long.

The man sitting opposite him was already sweating coldly from the fright. He felt that Qin Yuan was a monster, a person who could know everything, it was really terrifying, as if nothing could be hidden from him.

To really count, in fact, what happened last time has nothing to do with him, so now the president of country A is very entangled, he doesn't know whether this person should stay, but he can't get rid of him.

Speaking personally that he had seen killing intent in his eyes, he just smiled.

In fact, based on the analysis of the situation just now, Qin Yuan has another idea, that is, there is only one possibility, the president doesn't know about it, and someone else did it.

This situation is more complicated, even this person does not know, it must be done secretly by his subordinates, this is their internal affairs, it will definitely be difficult to investigate.

He stood up, looked at the person in front of him and said slowly: "I hope that no one else will know about today's incident. We have never seen anything."

The president of country A was very angry when he heard this. What does this guy mean? Does he really come and leave this place whenever he wants?

He just turned his head and got angry again, no matter what, he must give an explanation for today's matter, but when he turned his head, the person disappeared, only the half-open window was seen.

He felt even more creepy in his heart, no, this group of people had to be replaced again, and he had to strengthen the security here again, otherwise his own safety would not be guaranteed.

Just like that, the guards outside in the middle of the night didn't know what was going on, and they were called together for no reason.

The leader of country A got angry in front of these people, and the people on the other side were puzzled, why did this guy go crazy in the middle of the night, they can say that there was no dereliction of duty.

But even though this guy got angry, halfway through the talk, he suddenly thought of a question, which the guy kept talking about just now.

What did he say about the disappearance of the special forces? Could there be something hidden in it? Thinking of this, he looked at the secretary next to him and asked, "Is there any military activity going on there recently, or something else I don't know about?"

The secretary's eyes flashed here, and he was a little surprised, but he still said calmly: "Mr. Tong, usually they will report to you as soon as they have any situation. It should be nothing like this. ."

He also breathed a sigh of relief when he got the affirmative answer from the other party. Could it be that he really thought too much, or that guy made a mistake, and he knew that the people on his side couldn't be like this?

It's just that he didn't see a trace of complexity in the secretary's eyes. He didn't know how this person knew. Everything they did was kept very secret.

On the other hand, Qin Yuan originally wanted to continue the investigation results here, but a phone call broke his investigation progress.

Half an hour later, Qin Yuan had already boarded the plane back home. The person who called was very important. He was named by the highest official of Yan Kingdom and had to see him.

Qin Yuan knew that when encountering such a situation, there was only one possibility, which meant that they couldn't solve a very difficult matter, or it was some kind of special task.

But this time the matter here has not been resolved yet, and he is also a little entangled in his heart, but soldiers take obeying orders as their bounden duty, so go over there first to have a look. Disappeared without a trace at all.

Although there were many doubts on Country C's side, he couldn't find any other new evidence, and he couldn't continue to attack.

But as soon as Qin Yuan returned to the brigade, he saw Gao Shiwei waiting for him on the playground in a formal suit. He stepped forward and said jokingly, "Old Gao, I'm not used to you being so formal." , Besides, my investigation over there has not made much progress, and this time the problem is very difficult."

Gao Shiwei gave him a blank look. Anyway, they cared about this guy's attitude and his ability. Now that they looked at the suit he was wearing, they could just let him go.

However, he still took the initiative to go forward and help him straighten his collar, "Okay, you better be serious now, boy, the inside is from the highest official department, basically all the big leaders from above have come."

Speaking of this, Qin Yuan noticed that there were more patrols on the playground, and more importantly, it was obvious that the playground had been cleaned, which was really unusual.

"Is the matter so big this time? Their top officials are also coming to ask about this matter, but this time I haven't found any results. The time is too tight, even if I have only been out for a day."

"It's not the disappearance of the special operations team this time, but other arrangements. I don't even know about it. Even their masters have come here. It seems that this is not a trivial matter."

Qin Yuan nodded when he heard this, even Gao Shiwei didn't know, he also put away his playful attitude before, the two walked in side by side, came to the office Gao Shiwei knocked on the door first, and then made a report .

As soon as I opened my mouth, I heard a burst of laughter from inside, "You brat, you are still doing this, aren't you? I said just now that you don't need to report, come in quickly."

Listening to the voice was very old, so the two walked in. After Qin Yuan entered the office, he looked it over a little bit, and there were four people sitting in it, but these four people were relatively casual.

The old man in the middle is over half a century old, you can see his gray hair, but what is more eye-catching is the medal on his body.

If Qin Yuan remembers correctly, this person seems to be one of the few first-level generals. These people have actually been on the battlefield of real conflicts before. Although their special operations team has also been on many times, their battlefields are mainly Conflict against small stocks.

Qin Yuan also admired such people very much. At that time, their weapons were not as advanced as they are now, and it was very difficult to make military exploits. It all depended on courage and infinite hard work.

The four people on the opposite side of him had been looking at him the moment he came in, and the general in the middle who was over half a century old laughed and walked up to him and patted him on the shoulder.

"Relax, young people should show their own attitude. I have seen you boy before, and every time you have that unconvinced expression, why are we so humble now?"

"Chief, I must keep a low profile in front of you. After all, your strengths are all here."

"You brat don't talk like they used to."

The main reason is that Qin Yuan was said to be a relatively arrogant person in the rumors. After all, he is the God of War. He has a bit of a temper, which everyone thinks is normal.

Gao Shiwei just smiled in response, he couldn't say anything in this situation, and the momentum of the person opposite was also very strong.

After a few casual jokes, several people quickly entered the topic. Qin Yuan saw a map spread out on the table in the middle, and they marked the borders of the map with red circles. This seemed to be some weak links. They It has been analyzed from the very beginning.

"Relax a bit, I've called you here this time to give you a task, but I think you kid should be able to complete it."

Qin Yuan couldn't help but look at the map when he heard this. The people on the opposite side were very satisfied with his reaction, and he could see the key points as soon as he came in. Such a person knows how to read the momentum.

Soon, a top-secret document was given to two people, "You two carefully read this document, except for the supreme commander, you two are the only ones of us who have read it."

Gao Shiwei took the document very carefully. It was a very important thing. When he opened it, he was instantly dumbfounded. There was no title on it, but an A-level early warning plan for the highest combat order.

This is no small matter. The two quickly looked down. Gao Shiwei actually had some expectations at the beginning. The surrounding situation is relatively stable, and if you want to fight, you won't be able to reach anywhere.

After thoroughly reading the content, both of them were relatively relieved. Gao Shiwei felt that he had thought too much before. It turned out to be a simulated battle. This time, a total of 24 countries participated in the simulated battle.

The location of the simulated battle this time is on the Eastern Continent, and the map on the table just now is also the specific situation there, but this time, after the discussion above, it can be regarded as a relatively large training, which can be said to be completely close to actual combat. Competition.

Qin Yuan thought there was some important task, but it looked like this, this kind of training was nothing to him, so he relaxed, and handed over this top-secret document unhurriedly.

The people on the opposite side were a little curious when they saw his attitude. This guy was not excited when he saw this, and raised his brows, "Oh, what do you think after reading it?"

Gao Shiwei glanced at Qin Yuan, and the boy stood up and said loudly: "Report to the chief! I don't think there is any problem. I have experienced many simulation battles."

"Are you so sure? This time is no small matter. If you want to lead the three armies, we will put the heavy burden directly in your hands. Although it is a simulation, don't let me lose too badly. I don't ask to be in the top three. At least it ranks well."

Qin Yuan was very confident, his eyes revealed an unquestionable taste, he said let alone the top three, he never thought about the ranking behind, this time he is going to take the first place.

To be honest, this competition is very meaningful, and it can be regarded as a demonstration for some other countries with evil intentions, so that they can see the military strength of each country.

Of course, their real playing card is still in their hands, which is the super weapon they were willing to bring before. That is their biggest trump card, and they will not easily expose other things. This time, Qin Yuan can lead the three armies and let him be the highest. commander in chief.

The greatest command power is given to him, and it depends on how this kid will perform because this simulation training is not ordinary.

It can be regarded as witnessing their military strength in front of everyone again, and all countries have dispatched their most elite troops to fight.

To put it bluntly, this is a worldwide simulated confrontation. It used to be like a confrontation between their various military regions, but this time it has risen to an international level. They need more professional and capable people to lead.

This time, it is a plan for the very beginning of the battle, and there are specific plans behind it. All countries are still studying how to proceed. This is not something they should worry about, and the people behind will deal with it.

The person on the opposite side looked at Qin Yuan's confident expression, and said emphatically again: "This time I want you to lead the three armies, you are not leading the special forces, their abilities are not like the special forces, I hope you can understand what I said what does it mean."

"Reporting to the chief, I am very clear, and I have sufficient experience in this area. I am confident that I can complete this task."

At first, a few people thought that the progress this time would be very difficult, after all, the task
