

## Special Soldier 1701

### Chapter 1701: Little Mao's plan

The identity card of Mao must be well protected, but if it is placed there as Buck, no matter how strong the little Mao country is, it will not dare to touch him.

On the outside, it might not be certain, but if they want to kill people inside, it is a big taboo, and outside they can be lawless.

As soon as Qin Yuan came back, Li Erniu hurried up to ask what was going on, "Brother Qin, you frightened us by your operation, don't you know that their responsible people came over batch after batch, especially We don't know what's the matter with Xiaomao country, they keep coming to our side to inquire about news."

"Oh, they're here too, can they come out now?"

"Yes, I heard them say that Matsushita Haotian from Xiaomao Country is the one who poisoned us, and they are all commanded by that person. Now their command leader has become another woman."

Qin Yuan sneered when he heard this, it was really funny, they dragged out a scapegoat at random, and now they installed a leader again, and continued to do evil, the data is definitely in their hands.

There's nothing tricky about it, he doesn't even believe that Xiaomao Country can still participate in the competition after it's turned into this look, according to the current organizer's requirements, they should be directly disqualified from the competition, although nothing can be found evidence.

But the influence has already spread out, and everyone is suspicious of Xiaomao Country, and even let them participate in the competition, the problem is not simple.

After thinking about it, he called He Chenguang, "I remember that they are very close to the public bathing pool, go over there and see who they have been in contact with recently, and remember not to let them find out, I always I think there are a lot of doors here."

He Chenguang nodded, and hurried out. He knew that what Qin Yuan explained was also very important. In fact, everyone was very curious about why Xiao Maoguo was able to participate this time, and why he could rise so quickly?

Qin Yuan originally wanted to do it himself, but the organizers kept watching his every move, making him unable to act at all.

It lasted until the next afternoon, and he had already held four meetings, big and small, which clearly showed that someone wanted to slow him down, and he didn't want him to investigate anything.

But in his opinion, the fox will show its tail one day, even if they clean up those things now, they will still be noticed later.

In the evening of the next day, there were finally no other meetings. The leaders in charge of several other districts gave a sigh of relief. Nothing is clear yet.

But today's meeting has already explained that they were asked to re-select the place to participate in the game the next morning, and then that was a brand new area, and all the maps had been completely disrupted. What a big way.

It's just that they have to re-develop tactics, because after the map is disrupted, there are a total of two large airports. The location of the parking airport is already very compact, basically it can be said to be in the position of the port, which means that the navy Together with the Air Force. ...

It will be far away from the army. Relatively speaking, the cooperation of the three armies is more important, especially the navy.

So after the meeting, everyone hurried back to discuss with their respective military ministers. Qin Yuan's side is special, as he has the final say on everything, and he didn't bring any military ministers with him.

After he came back, he was just in a hurry. Everyone passed the order, and now the map has been changed, and he is going to draw lots tomorrow, and then start the battle according to the ranking. There is nothing else to say.

The team's tactics were decided on a temporary basis. This is a fight that everyone is unable to defend against, and at the moment the other side is in the base of the Mi Army.

The top minister here, Tommys, analyzed the information delivered this morning. At present, all the maps have been changed. For them, this is also a good thing, after all, the combat effectiveness of their navy and air force has no effect.

What needs to be analyzed is the opponent. Currently, the two biggest competitors are Yan Country and C Country.

Speaking of which, he took out the picture of country c participating in the war before, and after clicking on it, he said slowly: "From this perspective, it seems that they have never made any speeches at the conference this time, so it feels very low-key, but they Their strength is also advancing by leaps and bounds, so far, haven't you noticed? They have already won four victories."

Hearing that an officer below here frowned, he didn't understand, "It shouldn't be, no matter how you calculate it, it's like they only went through three battles in Yan Kingdom, and we only had three battles. Played four battles?"

"Because of their previous ranking issues, you can see that they won two games within three days. This situation is unprecedented, but they have never announced it in a low-key manner. It is just that the ranking is slightly higher now. There have been some changes."

When everyone heard what he said, they quickly looked in the direction, didn't they? It turned out that they had another fight with Dongguo behind their backs, and Dongguo was defeated by them in just one day.

I didn't expect that country C would be so low-key this time, "According to their combat speed and plan this time, I can't see anything special, but it seems that the quality of their entire army has been improved. Look at the one just now How stupid the soldiers are to hit, they can hit from such a far away position."

Because every battle will be taken out to continue to replay. They have studied it many times on Yanguo's side, and they really don't see anything special. Qin Yuan basically has no fighting skills.

Fight whatever you think of, as for country c, it's different. In addition to their combat plan, it still depends on their soldiers' abilities.

"Especially this battle with Dong Guo, you can look carefully, they used the traditional pocket formation, this formation has a flaw, that is, when they are suppressed in the air, they have no way to dodge. "

But I didn't expect that their charging speed was so fast that the air support hadn't even had time. The bosses inside have all been wiped out. In this case, the air resources will be meaningless, so the battlefield will end early.

All the key lies in the soldiers this time, but no matter how they analyze it, they still don't have much clue at present. ...

The matter of transforming biochemical soldiers like this was first done by the masked man. Although he and Mi Jun have a deep relationship, many high-level leaders here do not know about this matter. The masked man was doing it secretly at the time. .

The main key problem is that the masked man wants to create an ace unit for himself. This is his last trump card. However, as the plan is sabotaged by Qin Yuan time and time again, many factories are destroyed. All measures were rejected.

Those leaders no longer spend money on his project, and can only conduct secret research, so many leaders of that project don't even know about it, and they didn't expect to be taken advantage of by country c.

When the masked man's economy was in trouble before, it was country c who extended a helping hand in time, and finally the masked man was eliminated, so they naturally mastered the core technology. This kind of transformation is what they dream of.

At that time, the core organizations that followed the masked man, especially the members of the core laboratory, were all accepted by country c, which gave them this opportunity.

However, the other parties don't know about this matter, and now everyone can only make an analysis. They don't know what kind of training methods they have used recently, which can greatly improve the soldiers' abilities.

Their greatest possibility is to fight with the two of them. In the end, they must decide on a ranking of 123.

From the beginning to the present, the United States has been ranked first, so it would be unacceptable for anyone to rush to second or third.

Seeing everyone's aura is a bit depressed, after all, after watching the video of country c, maybe there is only one opponent to consider, but now the two opponents they have to face are very powerful, and there is no need to say much about their abilities.

Seeing this state, Tommys patted the table, "Everyone, don't forget your mission. This time, my meeting is not to hit everyone's morale, but to let you go back to increase the morale of each army. From now on, we will Fight with all your might, I don't want to see us fall."

This kind of situation is basically impossible. Facing two such strong opponents is also a kind of consumption for them. If they really win against country C, they will have to face Yan country. It is more energy-consuming

After Qin Yuan came back from the meeting, He Chenguang was already waiting for him in the tent, and he got a lot of news from his inquiries.

It turns out that the little Mao country and the country c have been walking too close recently. They seem to have reached some kind of agreement. So far, he has seen it twice. The leader of the country c went to their camp in person.

"There's something wrong with this. Did they just go in so openly? Then the investigation team wouldn't be surprised. Now it is forbidden for the team leaders of various countries to have any private contacts, after all, to avoid unfair situations."

"That's right, what they did was relatively covert. Their leading officer was still wearing the clothes of an ordinary soldier, but I still recognized it. After all, we are sniper identification targets. That's a trivial matter."...

It turned out to be like this, Qin Yuan smiled, and then the explanation made sense. He knew about the ghost things that happened in country c, probably because of some data exchange with Xiaomao country.

It seems that he still has to go to find it himself to find out what is going on. After dark, the camp outside is pitch-black, except for the headlights in his own area, which illuminate the road outside. A piece of it, and after passing by, I encountered patrolling soldiers.

Since the incident happened in Panasonic Haotian, these soldiers began to strengthen their vigilance, also in order to avoid the leakage of data between countries, Qin Yuan hid behind a big tree and ran all the way, and finally came to the camp of Xiaomao Country.

There are obviously a lot fewer guards here, and it seems that the supervision on them has been relaxed. After Matsushita Haotian was caught before, the control on them was strengthened there.

In a blink of an eye, he personally said that he had already entered their camp. He would not be troubled by this kind of thing. He wanted to go into the office to take a good look. Nothing was found.

Qin Yuan looked at the big and small tents inside. The configurations on their side were slightly different, and there were constant guards and patrols by internal soldiers, which was indeed a bit risky for him.

At this time, Qin Yuan saw a familiar figure, which was the woman who came in before. He Chenguang also said before that the leader of Xiaomao Country is a woman, so it is likely to be this. I have seen this person.

This person seems to be called Reiko, and the person next to Reiko is dressed in the clothes of an ordinary soldier, but seeing that he feels different among beauties, it is very likely that he is a leader.

This is really interesting. A leader pretended to be an ordinary soldier, which made him more and more curious. He quietly approached the tent. Reiko walked to the door of the tent, turned to look at the soldiers next to him, and asked them to retreat to 3 meters away.

Because there are those soldiers guarding Qin Yuan, it is not easy to attack, but in this position, there are too many buildings, so it is not easy to hide. He can hear him hiding in this position, and his hearing is not a problem.

Through the conversations with the people inside, Qin Yuan realized that this guy is their external officer, and now he is here to discuss the tactical arrangement this time, because all the maps will change~[www.readwn.com](http://www.readwn.com)~ so they need to re- make plan.

Reiko didn't notice it at all, "Sir, what should I do now? Is our data still usable?"

"Hehe, we don't use it, but we can sell it to other people. Didn't H country accept our deal before? Then we can use them again."

Reiko felt a little puzzled, because they messed up this matter before, is it still like this now?

"Sir, I think this matter may be a little inappropriate. Their capabilities are too weak. If we are risking selling data to them now, there will be no rescue measures if we are discovered."

"Idiot! This data must be sold to them, and they have to take it if they don't want it. Do you understand what I mean? This will be a good way to throw things on their heads in the future, and then the data will have nothing to do with us."

Qin Yuan heard it clearly from the outside. These guys want to shirk all this matter to H country, anyway, they dare not refuse now, and they have the handle here.

Chapter 1702: explosion attack

The tactics of these people are very in line with their style. They are as despicable as ever. Anyway, in the end, when things are revealed, they will be pushed to others. Now even their own people can directly give up betraying. There is nothing they can't do.

Lingzi frowned and thought about it carefully. This is indeed the truth. Country H is now a grasshopper tied to them by a rope. They also got the data. If they use this data to threaten him, they would not dare say what.

"Sir, you really have a vision."

"Remember, you have to do like this in the future. If you are willing to see this situation, you need to use your brain more, and don't push yourself to a dead end. It is not convenient for me to come in now. If there is anything, I will try to let other people come in and report."

Qin Yuan could hear it clearly from outside, these guys are really quite clever, in such a tightly controlled situation, they can all sneak in, which means that outsiders are very likely to be bribed by them or use some special tricks method.

The two talked about some other issues, mainly their tactical arrangements, and finally brought the topic to Buck.

The mysterious chief of their little Maoguo pushed his glasses, "It's just a pity that this time he missed outside and let that Buck run back. You should pay more attention to this person, he has more things in his hands."

Reiko gasped when she heard this, and came back after letting go. She didn't know about this before.

"Long hair, what should I do now? Should I immediately send someone to monitor him at any time?"

"What are you panicking about? Think about it for yourself. He won't be able to get the evidence. I want you to pay more attention. I've already dealt with the data. You should pay attention to monitoring other things."

Reiko nodded, but she was still worried. No matter how cleanly she dealt with it, she would feel threatened if that person was alive.

The officer on the opposite side seemed to see her thoughts, "Don't think about those things so pettyly. Now you should think about the big picture and focus on the next battle. I will deal with the remaining problems. As for that Buck In the end, sooner or later, there is that Halson."

"Yes!"

The two talked for a while, and there was no other news. After a long time, I only saw the officer come out of the tent. He was wearing the clothes of an ordinary soldier and walked to the tent next to him. It looked like he must be out tonight. I don't want to go, I have to wait until tomorrow for him to find a way to get out.

Qin Yuan originally planned to start with this person, first to find some key evidence, he can directly hypnotize this person, and let's talk after getting the data.

He looked around the tent. It was really not easy. There were eight soldiers standing guard around him, but it was not difficult for him. Everyone is fine.

He observed it again, except for the soldiers on the periphery, that area could not be affected, but it was no problem, now he can move in the dark without attracting anyone's attention.

After making the decision, Qin Yuan was about to act when he suddenly heard a siren sounding from the outside. He was also attracted by the siren, and all the soldiers looked in that direction.

Chapter 1703: side effects of super soldier

There was such a sudden change in this incident, so we all want to deal with this matter as soon as possible, so that the subsequent games can be carried out normally. In fact, many countries can't afford to continue to go outside like this.

Yan Guo still photographed Gao Shiwei, and at present, no matter what, he is the most suitable for this identity.

Gao Shiwei was very excited when he received this order, but he didn't show it. Fan Tianlei actually saw the documents on the table when he reported to him.

"Captain Gao, have you heard? It seems that you are going there this time too? Who are you going to be in charge of?"

"It seems that you brats are better informed than I am! I wonder if you can't hide any secrets now, why did you know the news just after it came out?"

Fan Tianlei chuckled, he knew that Gao Shiwei was not angry, he was just teasing here, so he hurried over on the donkey down the slope, and obligingly got a cup of tea.

"Team Gao sees what you said. Besides, we are a special warfare team internally. We must have first-hand information. We can't miss any news."

"It's true to say that, but my identity used to be a bit embarrassing. No matter what, I would rather be the general manager of the Special Operations Brigade now, and after careful calculation, I became his subordinate."

The two were talking and joking here. The news of Qin Yuan's victory this time spread to the country one after another, but they always reported the good news but not the bad news to the outside world. is around them.

Gao Shiwei knew all these things, so he was sent this time. He had the title of being unselfish before, and basically there would be no major problems with him there.

In this way, the leaders of various countries came in a hurry. This time, a big reshuffle was carried out. The leaders above were changed, but the troops below were still as usual, and the people in charge were changed again.

Now the division is more detailed. All the previous management teams are broken up, and then divided into areas, so that they are responsible for their own areas. If there is a problem, they will directly find the leader in charge. The leader in charge also has a clear goal. .

If you do it like this, it will be more standardized than before. Before, everything was a mess. No one knows who is now distinguishing all the responsibilities.

Qin Yuan and his team have also re-divided the patrol team in this area. They all ensure the safety around the camp. Although there are people from various troops stationed there, the surrounding areas are still relatively far away and need someone to patrol.

Gao Shiwei came to the camp just after the meeting. He wanted to know the details. Although Qin Yuan had reported it before, many details had not been revealed yet.

Qin Yuan didn't hide anything, and told all the things that happened during this period, mainly around the data.

Gao Shiwei frowned when he heard this. This situation is not good for them. He hurriedly asked: "Then does our data have any impact?"

"Hahaha, this is even more of a problem. Basically, I have never really disclosed our data. Everything is in my mind. As for the things given to them, it is not surprising."

"It's really thanks to the fear of your boy. If we send other people, maybe we will really suffer this time."

"Anyway, from now on, we really have to cooperate with each other. Xiaomao Country will definitely not let it go. I hope you can pay more attention internally."

"Don't worry about that. This time I came here for this matter. I knew it was not that simple, so I will be responsible for all the subsequent matters. You just need to be responsible for the battle."

The battle ranking this time is no small matter. Everyone is very concerned about this ranking, but because of various unexpected circumstances, this matter has been delayed again and again, and there has not been a specific result yet.

Now the headquarter has re-assigned the person in charge, and everyone has made adjustments since then, and everyone is actively dealing with the problem, and soon the previous normal mode was restored again.

The countries that were eliminated in the past are now continuing to make battle rankings. Qin Yuan and the others need to wait for the final rankings to be over, and then come to the final ranking for the final competition.

The soldiers became more and more nervous as they went to the back. Everyone was discussing which country they would fight with. In fact, judging from the current situation, they would eventually have a battle with country C and the United States.

Qin Yuan is very relaxed. In fact, he has already considered these things. It is definitely no problem to talk to the country of Mi. The country c is too mysterious, mainly because it is too far away from their residence, and they have to cross several districts. Even with his ability, it is relatively difficult not to be discovered.

And at the same moment, the military minister of country c couldn't sit still anymore, and the president of country c transferred an unfamiliar military chief to them.

After the military chief came, he began to plan randomly, and even wanted to interfere with the plan he had deployed before, including the plan he wanted to use, which made the military minister very unhappy.

The person sent by the president was a former veteran named Mei Sen. After the meeting, he came to the camp arrogantly and began to direct the soldiers' training. Everyone was very dismissive of this person. Yes, they will not follow orders from this man at all.

After all, these soldiers are all specially treated, so they only obey the orders of the military commander, and they don't listen to others.

Mason originally wanted to test it, and even wondered if they didn't hear it just now, so he could only clear his throat. This time, he didn't ask the soldiers next to him to give an order, but said loudly:

"All of them! Gather to me!"

However, those soldiers were unmoved at all. The patrols they should patrol, the training they should train, still did not obey his orders. It was very embarrassing for him to stand beside him at this time, including the few soldiers following him.

The few soldiers who followed him were originally dominated by him. Seeing this situation, they hurried forward and grabbed a small leader in front.

"What do you mean? Didn't you see the officer give the order? Are you deaf or what?"

When the team leader saw his hand approaching, he grabbed the soldier's wrist with his backhand, and then threw the soldier to the ground with a single grab.

The people behind also reacted quickly, and everyone raised their guns one after another. Although they were all training guns, no one was afraid of anyone. Under the oppression of this kind of momentum, although Mei Sen is holding a real gun, after all, he brought real guards, but the momentum is obviously much weaker.

I didn't expect this to happen suddenly, and the atmosphere was very embarrassing. At this moment, the military minister came out.

"Officer Mason, I don't know what's going on when you come to the camp. You don't want to send someone to report in advance, so I can prepare."

Hearing this guy's hypocritical question and answer, Mason felt disgusted. He understood that he wanted to show him off. How could these soldiers have the guts to disobey him? It wasn't him, the highest officer, who ordered them.

"I don't see what you are trying to do. Don't you know who I am representing? I am representing the president. I want to buy a review here, but the result is so uncooperative."

"Oh, so that's the case. I think you must have misunderstood. After all, my soldiers are very busy every day. Besides completing their own training, they also have a lot of other things to do. There is no need to follow someone's orders. Blind command."

When Mei Sen heard this, he immediately understood that this guy was talking about himself. "What do you mean? Who is here to direct? Say it again."

"Don't be so excited. I'm just saying that someone is directing blindly, not you, and these soldiers of mine are obviously very obedient."

After he finished speaking, he cleared his throat and shouted loudly: "Everyone gather facing me!"

In an instant, those soldiers moved as fast as an arrow on the string, and even the soldiers standing guard behind had already run over and assembled.

This speed and momentum are indeed unstoppable. Seeing this situation, Mei Sen was even more angry. This is completely insulting himself. His military rank is obviously higher than this military minister, but this \*\*\*\*\* is still like this pressing himself down.

"How is it? You can see that my soldiers have no problems. I can pass on any orders you want to give."

Under such circumstances, how can Mei Sen stay any longer? He just snorted coldly and asked him to figure out who he was working for, and not to be like his soldiers. These soldiers belonged to the country.

After he finished speaking, he turned around and left. The military minister touched his nose and sneered, "Of course I know they belong to the country. Of course, the premise is that the country belongs to me."

This guy's words were not heard by Mei Sen. At this time, Mei Sen came directly to the accommodation arranged for them by the headquarters. Normally, they would live together, but he really didn't want to be there to see that The guy's stinky face.

As soon as he entered the place where he lived, the guards he followed also ran in and began to make the bed for him. Generally speaking, this side is better.

The guard didn't understand. Logically speaking, with such a strong identity, the military minister would save face no matter what. Why didn't he care about anything this time?

"Sir, I think the attitude of the military minister is really problematic. If he doesn't want to take your face into consideration, he should also think about Mr. President."

"Look, even you little soldiers can think of this. He has already thought of it. It is obvious that he wants to fight against these soldiers. Now these soldiers are in his hands. This matter is getting more and more difficult."

Speaking of which, after the soldier finished tidying up the room, he waved his hand and asked people to leave first, and soon sent a message back to the country.

He is reporting the situation here with the President, and now he is more and more regretful about the former military minister. In fact, he values it very much. This person is very capable, but he did not expect to end up like this. This operation of his is really making people more and more incomprehensible.

The ability of country c is also very outstanding. In their previous rankings, they were also ranked behind. They have to wait for the final battle with powerful countries such as the United States and the Yan State.

But now there is still the most critical problem. All his soldiers have been remodeled, but when they took over from the inside of the mask bar, the core of the laboratory has been almost broken up.

In other words, they haven't fully mastered many of the core technologies, and now they are just conducting the remaining research, so there is still a flaw, these soldiers need to take an enhancement drug every once in a while to maintain their super strength physical fitness.

The book chasing app recommended to me by an old book friend who has known me for ten years! It's really easy to use. I rely on reading and listening to books to pass the time while driving and before going to bed. You can download it here..】

Originally, according to the time calculation this time, they had brought enough, but they didn't expect that there would be so many accidents on the way, and the situation continued to delay, causing some losses to his medicines.

The rest of the medicine is now too strictly inspected, so he can't tell it at all. He is worried that this medicine will be discovered. After all, because of the previous explosion, every item that comes in has to be carefully investigated.

Just as he was thinking, a soldier ran in hastily~www.readwn.com~Sir, come and take a look, something is wrong over there, all the soldiers in one of our squads fell down. "

Hearing this, he quickly put down his glass and ran out with the soldier, only to see a group of people in the distance. When he came over, the crowd automatically parted and made way for him. When he approached, he saw people on the ground. Several pale-faced soldiers lay there.

"How is this going?"

The captain next to him looked embarrassed, and quickly explained: "The medicine that the officer gave us before is really not enough, so I didn't distribute enough to them for the soldiers behind, because it really couldn't be distributed. Only took half the amount."

The military minister was very angry when he heard this, and grabbed the captain and asked who made him tamper with his opinion so privately.

"I said before that all things must be allocated, and the amount is the same. How dare you change it without permission?"

The captain was also very innocent, "Sir, it's not enough at all. If I don't spread out like that, then our soldiers won't be able to hold on at all, and more people will fall down."

In fact, everyone also knows that their current powerful state is also obtained through forced transformation, but the research has not been thorough, and they need to rely on drugs to maintain it.

Although they don't know what that special drug is, once they don't take it stably, they will become like ordinary people, and even because of the excessive energy consumption before, they will appear in this situation and become lethargic.

## Chapter 1704: strange wine

The military chief was also a little anxious seeing this situation, but the worse situation was yet to come. This situation happened one after another in the team, and soon the soldiers became panicked.

On the one hand, everyone doesn't know how long this situation will last, and the medicine has not come in, will it have any impact on their condition?

The most important thing on the other side is that if someone finds out, what should they do? In the eyes of outsiders, they are simply monsters, their bodies have been transformed.

At this time, the military chief yelled to make everyone quiet, and then he quickly directed the people next to him to send the unconscious soldiers in first.

Soon one tent could no longer fit, followed by the second and third tents. Most of the soldiers had already had this problem. The military chief was extremely irritable, so he had to come to the main battle to find a solution.

He kept calling to inquire about the situation outside, because now he needed people from outside to bring in the medicine, but this kind of medicine was not ordinary, it was all medicine type, and it needed to be injected.

The military chief was on the phone, but the person on the other side had no choice, "Sir, we have thought of many ways to use other things to secretly transport them in, and even put them in books, but they have seen through them before. It's even harder to explain."

The military chief cursed secretly, telling them to find a solution as soon as possible, no matter what, he must see the medicine come in within three days.

Just as he was talking on the phone, a small team leader below also ran in in a panic.

The military chief was already very irritable, hung up the phone, and shouted at the people running over, "They're all a bunch of trash, I'm trying to figure out a solution, there's no need to show such a flustered attitude, the military spirit is the most important thing now ! Pass my order now, if anyone dares to shake the morale of the army! Don't blame me for shooting immediately."

After saying this, the captain's face was a little uneasy, and he really wanted to calm down, but something went wrong now, and they had passed the test before the death, and after superhuman transformation like theirs, the body has reached A peak state, speed, and strength have reached the extreme.

There will be no injury or death at all, but the three soldiers who were the first to report the situation in the tent just now were out of breath in an instant.

The military chief was also taken aback when he heard this. How could this be possible? When he was in the laboratory before, he had never heard of such a situation.

But think about it, at that time, they gave a lot of follow-up medicines in the laboratory, and there was no such shortage.

He hurried to the tent. Fortunately, the team leader dealt with it in a timely manner, and the news was blocked. Only the two doctors in the tent knew about the situation, and those two doctors had just arrived with them. status.

The doctor standing on the left was a little older, and he was very flustered. After all, he had never seen such a situation before, and he thought that a large number of people falling down like this might be some kind of infectious disease.

If this is the case, it will be troublesome, especially in their camp. If this disease breaks out, the consequences will be unimaginable. ....

He trotted forward and hurriedly reported, "Sir, this matter is too big. I suggest reporting it to the higher authorities immediately. After all, if the number of dead soldiers continues to increase, it will affect the healthy soldiers outside. I don't know until now. what happened."

Of course the military officer understood that this was definitely not an infectious disease, so he just gave him a cold look, waved his hand, and told him not to worry about it.

"You need to worry about other things. What you need to do now is to keep them alive. Aren't you a doctor? Can't you do it?"

"But...but their physiques are very strange. Many of the things I use, their heartbeat and blood pressure are abnormal."

The doctor was even doubting himself. He had never seen such a situation before. He died too quickly. Before, he was just in a coma, and he died instantly within a few minutes after he came in.

So the doctor was very worried that it was some kind of infectious disease. He once again expressed his thoughts to the officer in front of him.

This matter really cannot be ignored. Everyone needs to be isolated. The competition is not important now. With so many people brought out this time, if something goes wrong, he cannot be held responsible.

He immediately asked his assistant to call in all his medical teams. Now he had to take all measures and contact the medical team at the headquarters. Many things had to be prepared now.

However, just as the doctor opened his mouth, a knife was directly stuck in his back. He turned his head in horror, only to see the military officer staring at him viciously.

To the end of his life, he couldn't figure out what was going on, why he would attack him, but one knife after another, until the doctor was completely out of breath, and the assistant next to him was so scared that he didn't dare to move.

The military minister wiped the blood on the knife indifferently. To him, it was just a doctor who died, as long as he didn't ruin his plan.

"Just remember, you haven't seen anything here, these things have nothing to do with you, and you don't understand these things?"

The assistant next to him nodded quickly. How could he dare to say anything, but because of the need to employ someone now, otherwise even this assistant might not survive. The Minister of Military Affairs walked over and looked at the few people who were still unconscious.

Let this assistant must find a way to ensure that there will be no more deaths among them, otherwise more and more people will die, and he will definitely not be able to hide it.

I didn't expect such serious consequences after stopping the medicine. Even the military minister didn't expect that the most important thing was that the medicine still couldn't be delivered.

In the end, he decided to use the most risky method, which was to transport the batch of medicine himself. The people patrolling outside the door might relax for his sake, otherwise he had no other choice.

Now that it was imminent, he didn't have time to take care of the previous things, he just tried to find a way to get out quickly, but as a military officer, it was not so easy for him to get out.

In this case, everyone is prohibited from doing anything and must stay inside the camp. He wants to manage those people outside, but this time it is not so easy. This time the person in charge was originally replaced. ....

They are all brand new leaders, and these people only follow the arrangements of those leaders. After all, it has been said before that where the problem lies, it will be all responsible for the person in charge of the perimeter security, and everyone will be punished. and implicated.

Just when the military chief was in a hurry, Mei Sen came to the door. He thought that this guy had heard something, turned his head and stared fiercely at the secretaries next to him, it wouldn't be these people who went to complain ?

The few people were too frightened to move, and quickly indicated with their eyes that they didn't say anything. Mason felt that the atmosphere was quite strange after entering, and he didn't know what was going on.

The military chief forced a smile, "I don't know why you came to my place. No battlefield has started yet, and we are still in the preparation stage."

Mason looked at this guy with this attitude again. Although he was not convinced in his heart, he couldn't show it. This guy really disrespected him.

"Can't I come here? This is our team, I can't come to patrol, and don't you know what's wrong?"

The military minister looked puzzled, and then Mason explained that it was because he had been trying to find a way to go out and do various RBI these two days, and people directly sued him, the person in charge.

"See for yourself what you are doing. Why do you want to go out? As the person in charge here, I will definitely come to give you some advice. You'd better not cause me any trouble."

The Minister of Military Affairs is not a vegetarian either. Hearing this guy's tone, he was very unconvinced. He dared to talk to himself in such a tone.

"I said that everything I do is for this country and my affairs. I don't need you to point and point. Even if someone sues behind my back, you just need to deal with those complaints!"

"Haven't you understood what I mean? I want to see what you're doing, and what else can you hide."

"Some things you don't have

Grid knows, and I am warning you, you pay attention to your attitude towards me, otherwise it will be very difficult for you to get out of here safely. "

Mason was shocked when he heard this. This guy really wanted to rebel, so he directly touched the gun at his waist. However, just as he made a move, the people behind rushed up quickly and pressed him directly on the table.

The guards he brought were shot down by the people next to him in an instant. Mason was so angry that it was too exaggerated. Are all the guards behind him vegetarian? He couldn't do other people's work with homework in his hand, and he was shot down in a few seconds.

He stared fiercely at the person in front of him, "You bastard, you actually dare to attack me. What kind of identity am I? You are too courageous. You will definitely not let you go when you wait for me to go back."

"Whatever your identity is, it has nothing to do with me whether you let it go or not. I don't want anyone to sabotage this plan, and I'll warn you again, don't challenge my patience."

After a long time, seeing that Mei Sen finally gave in, he waved his hand, and the people behind him released him.

This is just a small trick for him, and Mason is isolated in this place, and no one will stand by him at all. ....

He rubbed the shoulder that was twisted just now, and he was very unconvinced, but he had already made up his mind that he would definitely warn the president when he returned.

It was just a small fight in this place. Thinking of this, he turned around and wanted to go outside, but the military chief stopped him.

"There are some things that you don't need to leave in such a hurry. I just want to remind you that if someone complains again, then you should deal with it instead of coming to me to say these things. If you can't even handle this matter well, it is likely to be replaced, we don't raise waste here."

After finishing speaking, Mei Sen and the two guards behind him were released. The sun was shining outside, but he felt chills. If you are not careful, you will really die in this place.

He didn't know what was involved that made this guy care so much, and at the same time, Qin Yuan also noticed the action here.

He has a special status, so it is not convenient for him to go out. Usually He Chenguang and the others go out to inquire about news, and He Chenguang comes to report in the afternoon.

"Brother Qin, there seems to be something wrong with the other country. They didn't move so much before, but today they suddenly became alert and didn't let anyone get close, including those patrolling guards who retreated more than 100 meters."

"Oh, it seems that they really want to make a big move. I said before that they are not easy. There is a problem with this victory. You continue to observe, but be careful not to be discovered. Now they should be very vigilant."

He Chenguang nodded and walked out. Qin Yuan thought about it, but was still a little worried, and asked Wang Yanbing to watch at the entrance and exit.

Wang Yanbing always looked curious when he came to the entrance and exit. There are also a lot of soldiers here. They are all patrolling people, and there is no chance to go out.

He didn't know what he was willing to let him come here to guard~www.readwn.com~ He found a relatively secluded big tree and lay down on it quietly.

It wasn't until late at night that he hurried back to the camp and found Qin Yuan with an excited face.

"Brother Qin, you are really good at predicting things. At first I didn't understand why you asked me to go there. I didn't expect that I found something unusual."

"Okay, don't be a fool, you kid, tell me what it is."

It turned out that at around 8 o'clock in the evening, members of the Air Force outside the country suddenly sent some things, because this area is relatively large, and they are all small troops of the army stationed here.

Most of the rest are at the air force base, where there are larger dormitories and more space for activities. They can indeed send things in, but they have to go through the inspection of outsiders.

It's just that the things they sent were different this time, and they were all wine. Although there is no rule that drinking is not allowed here, it is a matter between countries, but at this juncture, I always feel

strange.

Qin Yuan looked at him and asked, "Then did the soldiers inspecting over there find anything unusual? Is it really all alcohol?"

"Each box was opened, the inspections passed, and then the wine would be brought in, but not in large quantities."

This sentence caught Qin Yuan's attention. If it was to deliver wine to the people inside, according to the number of soldiers there, it would have to be at least one hundred and eighty boxes, but Wang Yanbing said that there were only ten boxes in total. .

Chapter 1705: disagreement

This is too little! Is there something wrong with these wines? Wang Yanbing shook his head. He said that the soldiers guarding over there did not open it for inspection, but he heard from a distance that it seemed that they were delivering wine to their officers.

"It's not good for them to open all the people below for inspection, but if they send ten pieces of wine, it seems that it's not too much to drink only for the officer."

The specific situation is not clear now, the main reason is that Wang Yanbing is not easy to hide in that place, and now is a special period, Qin Yuan is getting more and more curious, and he plans to go out now to find out what's going on.

Country c is too far away from them, and it has to cross several parks, so it is really easy to be discovered. In order to be able to investigate and make mistakes, Qin Yuan is willing to go all out.

This time, this kind of competition was really interesting. Everyone made small moves, and before the small Mao country stopped, the c country started again.

The reason why Qin Yuan paid so much attention to them was because he hadn't forgotten the missing member of the special operations team. That team member disappeared inexplicably.

There is absolutely no problem with Qin Yuan's movement skills, he has merged into one body with him throughout the night, he clings to the big tree, and leans against the surrounding tents to keep moving forward.

Not long after, he came to the camp of country c. It was really the same as the news that Wang Yanbing and the others inquired before. Now it is too difficult to get close to their area.

They pushed the guards to the outside. Although there were no people in the middle, the security on the periphery was very strong.

The purpose of their doing this is not only to prevent the guards on the periphery from seeing what's going on inside them, but more importantly, to prevent other people from approaching.

This more and more shows that they are quietly playing tricks, and at this time Qin Yuan saw a few patrolling soldiers who had already walked towards him. There is really no place to hide in this place, mainly because there are too many patrolling people.

He had no choice but to use his charm skill to show off the few people in front of him, passed quickly, and then quietly approached the inside.

As soon as he got close to their line of defense, Qin Yuan noticed it. Good guy, the defense is too tight. Fortunately, he hid in the earth pit next to him. Soldiers are patrolling back and forth.

It took a lot of effort for Qin Yuan to get in, but after he got in, he was stunned by the scene in front of him. They were very strict outside, but there were not many soldiers inside.

This made him a lot more convenient. He shuttled among these tents at the back position, and he felt a little strange when he saw that the front of the tent was full of people, and there was a clanging sound beside it.

After a while, someone came out of the tent, and the obvious mental state of the soldiers surrounding them was not right. They were all listless, hunched over, and their faces were full of pain.

But the people who came out of the tent immediately became full of energy, and they looked completely different. The system also issued a notification sound, saying that these are soldiers transformed with super powers. Qin Yuan smiled slightly, and it was exactly as he guessed.

It's just that the state of these soldiers is different from the batch made by the masked man before. The batch made by the masked man has no shortcomings, which doesn't look right.

Taking this opportunity, he quickly stepped forward to grab a soldier and dragged him behind the tent. Before the soldier could react, Qin Yuan stared into his eyes and immediately hypnotized him.

Under Qin Yuan's questioning, he realized that there was indeed a big problem with their unit. It is impossible for these soldiers to go into battle now. They need to be injected with this medicine continuously, otherwise their body functions will not function properly. would be completely paralyzed.

It turns out that this is the case, Qin Yuan will not be so bored as to expose this secret, after all, what this thing is about is to grasp the evidence, with the current technology, even if you want to test it, you can't find anything, but he thought of another strategy.

If he exposes this matter, it will not be of any benefit to him. Country C can't find any evidence. It can only prove that their current soldiers are indeed better than average, but when it comes to high technology, most people I won't believe it.

Since it's because of the potion issue, it will be easier to deal with in the future. After all, they still have to fight, and it will be a matter of time before the battle. He doesn't allow such an unfair situation to happen. If this is the case, then directly tamper with the potion .

"How often do you need to inject this medicine?"

"It needs to be injected every other week, otherwise we have problems with our physical skills."

The soldier's eyes were blank, and he answered his question directly without any sense of resistance. Qingyuan continued to ask a few more questions. In a week, it seemed that the medicines they brought in were indeed enough. After all, every Soldiers only need a little bit.

Then just focus on destroying his things later on. Their injection of this medicine is also very strict. It cannot be injected in advance, and must be injected within that time period.

At this point, Qin Yuan let go of the soldier, and then went into the darkness again. When he returned to his camp, it was already more than 3 o'clock in the morning.

Li Erniu and the others heard the movement in the bed next door and knew it was Qin Yuan. They couldn't wait to run out, wanting to see what news he had found out. After all, his behavior recently was really very mysterious.

If it was said to be aimed at the small Mao country before, it would be reasonable, but now it seems to be related to the c country again.

Qin Yuan brought several people into the tent, and also wanted to tell them about this matter. There is no way to hide this matter.

Everyone watched him in the tent for a long time, but they didn't see him speak. They couldn't help feeling a little anxious, and Qin Zhengyang couldn't wait to ask: "Brother Qin, what's going on? I feel that you've been very busy recently, and you've been in a bit of a state since you came back today." Something is wrong, is there something wrong?"

"Yes, something went wrong, now you have to remember what I told you, everything is true, and you have to take it seriously."

Seeing that Qin Yuan didn't seem to be joking, everyone nodded seriously. After speaking, Qin Yuan told them what happened tonight.

The members of the red blood cell team all stared wide-eyed after hearing this. This is impossible within their cognition, since human body transformation can still be carried out.

"Is it really possible to do this? The technology is so advanced now?"

"Yes, actually, I was investigating this matter a long time ago, but at that time, many clues were broken. I thought it was over there, but unexpectedly, it came back again. All their soldiers have undergone genetic tests. Transformation, very powerful."

He Chenguang also suddenly realized at this time that they were actually analyzing the recent situation. No wonder country c had no problems. Their recent battles were really smooth, and they basically resolved the battles quickly.

"Brother Qin, if this is the case, it is a violation of the regulations. It would be too unfair to fight against us. Do you need to report this to the higher authorities immediately?"

Qin Yuan shook his head and told them that even if they wanted to report it, no one would believe it, even now, there was enough trust among their team members, but everyone was still very surprised when Qin Yuan said this.

But he also reassured everyone, telling them that he just asked them to take more precautions, and later he would personally lead the team members to destroy the medicine they needed.

"It's impossible for me to let my soldiers have such an unfair confrontation with them. It looks like they want to use this opportunity to rush to the world power and reach the first level."

Everyone felt even more puzzled when they heard this. If this is the case, aren't they afraid that their affairs will be discovered?

In fact, it is also very understandable. The reason why they are not afraid of being discovered is to give this reputation to the public. When the time comes, they will all be ranked first. Who will care about these people? The stronger the power, the more fearful people outside will be.

He told the team members that these are just for them to be ready at any time. He has to look at the rankings that will come out later. After all, they will draw lots in a few days. The competitions of these countries are almost over, and the next one is the last real fight.

On the other side, the military minister of country c finally felt relieved now that these soldiers had gradually recovered with the help of the medicine, so he was completely relieved.

Although Meissen was threatened before, this matter is of great importance. They will draw lots in a few days. According to the current ranking situation, the countries they are fighting against are tough and difficult to fight.

Even if that guy's attitude was too bad before, but for the sake of the country, he has to emphasize it again to see what he thinks, after all, he is now the person in charge sent over there.

But he didn't expect that this time the military minister didn't even let him in. He was completely stopped outside, and said that he knew all the actions and commands well, and left them all to him.

Mei Sen didn't know what the \*\*\*\*\* this \*\*\*\*\* was going to do, so he could only curse, and finally left. Now he has nothing to do with the guy outside, even if he wants to file a complaint, there is no way for the President to send someone over directly .

Soon the day of the lottery will come, and everyone has their own ideas, and the ones left now are the elites, who will use it as the final duel to rank the final victory.

At present, only ten countries are left to draw lots, and they will start to draw against each other to determine the final ranking.

Qin Yuan didn't even look at it and stepped forward to draw lots randomly. He didn't expect that country c was the first one to be drawn. This really surprised him, but country c didn't expect the situation to become like this.

In fact, what they wanted to solve at the beginning was the country of Xiaomao. After suppressing the country of Xiaomao, they will talk about it. In the end, their goal is the country of America.

He still has some fears about Yan Guo, the military minister, but he believes in the ability of his soldiers very much. The date of this battle is too close. Today, the lottery will be held tomorrow, but the time since their last injection of medicine has just passed. Four days, not yet the injection date.

The military minister of country c looked relaxed. He felt that everything was under his control, but Qin Yuan could only use another method. He knew that it was impossible for these ordinary soldiers to fight against them.

This time I can only use some special methods. Since they are unfair, I can't control so much. I can only let him come forward and fight them directly, and let them consume their abilities first.

After returning from the lottery, Gao Shiwei specially called the company commanders below for a meeting, mainly to discuss the battle plan, because the ones left behind are all powerful countries, so we must be more cautious.

The book chasing app recommended to me by an old book friend who has known me for ten years! It's really easy to use. I rely on reading and listening to books to pass the time while driving and before going to bed. You can download it here..】

However, Qin Yuan didn't say a word during the whole meeting. Gao Shiwei was explaining the whole process. After all, he also went to today's meeting.

Gao Shiwei was very enthusiastic, and kept analyzing the current situation of country c, which plan they should use, the plan of the navy, the air force, including the army's offensive plan, he each recommended four sets.

At this time, he turned his head to look at Qin Yuan, only to find that frowning, he coughed slightly twice, he had finished talking for a long time, why didn't he respond at all?

"That's the plan on my side. What's your opinion? After all, it's you who will be in charge of the battle this time~www.readwn.com~ Let's see what you think."

Only then did Qin Yuan come to his senses, but he stood up and said calmly: "The combat situation this time is very special. I decided to completely change the plan. This time, the red blood cell team will be the main one. I will lead the team members to infiltrate first." Get rid of their command post, the others are figuring it out."

what! The several leading company commanders who were working were dumbfounded when they heard this. What's the situation? Will he still talk about individual heroism at this time?

The captain of the Air Force Brigade really couldn't bear it. To be honest, he had been helping Qin Yuan to speak up before, because he felt that this person had his own plans, but their purpose this time was not only to win, but also to let other countries see to their strength.

Although I have seen their tactics in the past few times, many things have not been highlighted. Is Qin Yuan going to engage in personal heroism at this time?

"Chief Qin, I know you are very capable, but you also have to consider us. Our air force has only dispatched a few times in total, and their navy seems to have dispatched once in my impression."

"I can't control these things now, because we have to win this time. After we win them, we can play against the Mi army. Otherwise, we won't have this chance. They will always be ranked first! This time I want to be number one!"

Gao Shiwei also couldn't understand what this guy was talking about. After co-authoring the analysis just now, he didn't listen at all, and why was he so unconfident about himself, would he definitely lose to country c?

Chapter 1706: live

The main reason is that their identities will be a little different this time. Gao Shiwei is a little embarrassed to stand on top. This time, after all, he came here on behalf of the person in charge.

And listening to the tone of the soldiers below, they are also a little dissatisfied, which is actually understandable. After all, the ones who really contributed the most to this airport battle are the willing ones. Everyone wants to get performance.

He hurriedly winked at the side, coughed a few times, and wanted to remind Qin Yuan, but he didn't expect that guy to not buy it at all.

"I know what everyone thinks now, but I also stick to my idea. I don't know how to tell you about many things, but this battle will be very difficult, so we must go all out for this matter. We can only follow the Do what I said."

Jiang Xiaoyu and the others also sat beside him on behalf of the Marine Corps. He had always supported Qin Yuan's ideas before, but he didn't say anything now, he just thought that everything should be done under command anyway.

But the person next to him didn't think so, he patted the table and immediately stood up, "Mr. Qin, I have never said a word of no from the beginning to now, but what you did is a bit too much. After you come out, everyone You are the ones making the decisions, you are engaging in individual heroism, so where are we? If this happens, we simply don't come here."

Jiang Xiaoyu hurriedly told the soldier beside him to stop talking. This situation is already embarrassing, and he said it so directly.

In addition, it is impossible for Qin Yuan to be the kind of person he said. This kind of situation will not happen, but this soldier has already opened his mouth. He feels that he is right. If there is a problem, he has to bring it up. , we can't keep procrastinating like this.

Qin Yuan didn't back down at all, and let him stick to his point of view, and the people from the army next to him also hurriedly stood up to smooth things over.

"I think everyone should stop arguing, and what the officer said is right. Now this battle is very important. We will follow what he said and wait for the next one. We still have to fight every day. Everyone has Don't fight for opportunities."

The representative soldier of the navy that Jiang Xiaoyu pulled just now was Yang Hu who came with them. This guy had also worshiped Xiang Yu as his teacher before. Anyway, he was more or less an old acquaintance, and he knew Qin Yuan quite well, but I didn't expect to be so excited this time.

Yang Hu was very unconvinced when he heard this, so he stood up straight away, pointing to the person opposite, he said: "You don't stay here or muddy, who doesn't know that your army takes the

lead, what does this have to do with you? That's because you were not involved, so you don't feel back pain when you stand and talk, when did you not charge?"

For a while, the two sides quarreled, and the army representative who spoke just now was not happy. He originally wanted everyone to stop the quarrel, but he was accused by others instead.

There were quarrels in the entire tent, and Qin Yuan got a little impatient with the quarrel, so he shouted loudly to tell everyone to shut up.

"It's all right. The decision I made this time is entirely my personal opinion. I didn't bring anyone with me this time. I will lead the red blood cell team to infiltrate. After capturing their command post, the other three armies will continue to attack." cooperate."

This time, not only Gao Shiwei, but also everyone in the audience was stunned. You heard me right, he took the red blood cell team with just a few people to attack the command post.

"Qin Yuan! This matter is very important, why didn't you discuss it with me, did you just make a decision on the spur of the moment?"

There is also a reason why Gao Shiwei is so angry. After he got here, he didn't know anything, and he couldn't make a decision. What Qin Yuan said was basically what he had already determined, and he would not give any more Opportunity to rebut.

Qin Yuan just patted Gao Shiwei on the shoulder helplessly, then turned his head and said that this meeting is over like this, and he will send the specific combat plan to everyone in the form of a document, and see his signal collection later.

After all, the battle is going to start the next morning, and they have to hurry up and set off to the high ground where they drew lots.

The people in the tent were all in a state of bewilderment. The meeting went on without end. Many people didn't know what was going on, so they had to leave in a hurry after being sat down.

Gao Shi

Wei hurriedly chased him out, what kind of medicine was sold in this kid's gourd? He had to ask clearly, he didn't expect that Qin Yuan was already waiting for him outside just after he came out.

"This is not your style. Usually you are careful and bold. I know you have the courage because you have enough self-confidence, but this time you guys are going to fight against the command post with the three armies. You are not fighting with me. Are you kidding?"

"We've been working together for so many years, don't you still trust me? What kind of person do you think I am? I think you know better than them."

"This..."

What Gao Shiwei said made Gao Shiwei not know how to continue. He must know Qin Yuan very well and believe in his personal ability, but there is still a difference between a training match and an actual combat. Happening.

In actual combat, it can be solved directly with headshots, but this kind of training competition is different. They rely on the sensors on their bodies. If the sensor is not hit or the sensing device is not triggered, then that person can continue to fight. Unexpected situations happen.

As the core of the entire command, Qin Yuan must not fall down. Taking these few people to other people's command post is completely nonsense, because it is the command post that is judged. command?

The people in the camp had already started to make preparations, and the whole area was full of chaos. The captain of the Air Force and the Marine Corps got into the car together, and now they were going to set off.

In the car, Yang Hu was cursing, he punched the seat in front of him, Jiang Xiaoyu cast him a glance.

"I said that if you really have the ability, there is no need to find these things here. If you have the ability to talk to the captain, what is the ability to swear here."

"Jiang Xiaoyu! Don't think that you are from the special operations team. I'm afraid of you. You formed the special operations team because of your previous luck and participated in several competitions. After you came back, you became a special operations team. What's the big deal. "

Jiang Xiaoyu was driving, and when he heard what he said, he stepped on the brake and opened the door.

"I'm very dissatisfied with what you said. Then let's fight one-on-one and see who is stronger and whose fist is stronger."

The captain of the air force next to them hurried forward and pulled them to stop the fight. Isn't this a fight for others to see as a joke?

"What's the joke? Is there anyone else here? Didn't this kid see me annoyed for a long time? And the way he talked here along the way made people upset."

Yang Hu sneered, "Don't think I don't know the relationship between you and Qin Juan, because you have such a good relationship, you didn't say anything just now, but now you are angry at me, do you think I am a vegetarian? "

While talking, the two immediately started fighting, Yang Hu also held back his anger, the few people beside him could only watch silently, no one dared to step forward to start a fight, neither of these two people could afford to offend.

Jiang Xiaoyu was quite clever at first, seeing that he couldn't do anything with his footwork, he just hit him with the next three lanes. Yang Hu didn't go up at all, and was kicked and fell into the ditch behind him.

At this moment, the people next to him hurried up to help him up, which was embarrassing, Yang Hu was thrown into the gutter behind him, and he was even more angry, this kid didn't play his cards according to the routine.

"I'll go, why are you making a sneak attack?"

"If you lose, you lose. If you don't have strength, that's how it is. Let me beat you. I'll tell you what ability is. To beat you to the ground is called ability and strength."

A few people are still making noise here because of this incident, while Qin Yuan has already set off with the vanguard on the other side. He has to go to the high ground to check the situation first, and then arrange them.

In the car, Gao Shiwei asked again, Qin Yuan still gave the same answer, he would stand still, and this time the situation would be very complicated.

"I still say what I said before, just trust me, I can't explain many things one by one, but this is my choice, and I also want everyone to win the final victory."

Gao Shiwei was a little confused, but he didn't know

How should I put it, is it really necessary to trust the person in front of me? But this time the competition was very rigorous, and he was also worried that there might be some mistakes.

Two hours later, they arrived at the venue drawn by lottery with the vanguard. Because a lot of time was wasted before, the subsequent game was relatively tight, mainly to test the combat command ability of both sides.

Now the following competitions are very interesting, and a live broadcast has been launched. Qin Yuan just came to the high ground and failed to grab it, and some reporters appeared. He frowned slightly. What's going on?

Li Erniu understood immediately, and hurried forward to stop the reporters, not letting them come up.

"I said, what's the matter with you? Isn't this place tightly controlled? You are in a military area. How did you come to this place?"

"This officer also hopes that you will understand that we want to interview your commander now. How does he feel about this battle? I hope he can say a few words."

For a moment, the reporters next to him hurriedly handed over the microphone. Before Qin Yuan could figure out what was going on, a person in charge ran down anxiously.

Only then did he explain that this interview was normal, based on their current situation, this time the battle between them was quite sensational, and a live broadcast was also set up.

Before, they could only see these things internally, especially some battle scenes, but now they have all spread out, and everyone is paying attention to this battle competition.

Qin Yuan walked forward with his hands behind his back and straightened his clothes. Since this is the case, he should accept the interview openly, otherwise he doesn't know how he will be misinterpreted by them.

Because the interview here was broadcast live in real time, a connection was established here soon, and country C was still on the way to set off, so they saw this interview video.

I only saw Qin Yuan in the picture in high spirits. He put on his equipment and said to the camera: "I am here to play number one this time. No matter what, we will rush to the number one level. No matter who the opponent is, they will all be defeated by us."

He had just finished speaking, and the reporter next to me wished that things would get bigger and deliberately guided the interview beside me.

"Sir, as far as I know, the United States is now the top of the world rankings, and their performance seems to be good. Are you so confident?"

"I don't know where you got the news from. Are their results not bad? Then I didn't realize that this time we will play against him, so that everyone can see our true strength."

The military minister of country C who was sitting in the car closed the video without even watching it. This guy is really arrogant.

On the other side, the domestic president kept sending him messages, and even made a direct video connection, because this time they were fighting against the Yan Kingdom.

There are still some clues in other people's hands, and he is very worried that something will be seen, especially because Qin Yuan has already reminded him before that he also knows something about the leading generals this time.

But the point is that they don't trust each other. The more the president persuades, the more the military minister feels that there is no need for the president to stay. After he wins this time, he plans to go back and completely overthrow that guy.

In his opinion, he was completely an unknown idiot, who was somehow pushed into that position, and led everyone to remain tepid.

At this time, the secretary sitting next to him also received the secret letter. The secretary looked a little flustered. He didn't know whether to report it to the person next to him, but this was news from the president.

The Minister of Military Affairs seems to be aware of the slight frown~www.readwn.com~What's the matter? Did that guy send something over again? "

"Yes, sir, Mr. President said that he hopes we can stay still and observe their motives first. Don't make it too obvious, and don't let them find out that our soldiers have other things..."

He interrupted me before I finished speaking, "Now I'm leading the troops outside to fight, and he has the final say on how to command. He's a person who doesn't understand anything, so there's no need to listen to him." , what to do is to follow our previous plan."

Although the secretary didn't quite agree, he could only nod his head, how dare he say anything.

He had already calculated the time completely, and it only took two days to completely resolve the battle, because after three days, their soldiers would have to inject that medicine again.

But now even if he gets the injection, he is not afraid, he has already prepared everything, all these things are within the scope of his consideration, and two days is enough for him to solve the battle, before their battles were all within one day .

Chapter 1707: take the team deep

Thinking of this, the military minister of country C is about to go to his high ground, and there are probably reporters interviewing him, so he has to remember well, tidy up his clothes, and maintain a good image.

However, when he came down, he was completely ignored. Although they had been rushing forward this time, because of their bad reputation, no one paid attention to them at all.

He kept that posture with his hands behind his back, and stood at the bottom of the high ground, waiting for the reporters at any time, but as time passed, no one came up.

The military minister was a little unhappy. He waved his hand and called the secretary, "Go and ask what's going on. How long will these reporters have to wait?"

The secretary nodded and ran down. He had to ask the person in charge over there. The secretary came back after ten minutes, but the expression on his face was a little unnatural. Looking at his hesitant military, otherwise he would be a little angry.

"What's going on! Tell me directly."

"Sir, it's like this. They said that those tactics were not arranged by them. They were voluntary interviews, and now it's a form of global live broadcast. They will interview whichever side is more popular. Now they have interviewed the United States. over there."

The military minister swears a dirty word directly, this is completely playing tricks, and today is the battle between him and the country of Yan, why is the country of Mi involved?

"A bunch of \*\*\*\*\* who don't know anything. Do they know that they are about to miss an opportunity to interview the world's number one?"

But now the facts are like this, no one comes to talk to him at all, and here he can only withdraw his previous emotions, and then lead people down.

This time he must win, the thought is stronger than before, this kind of thought must be suppressed, he feels that no matter what, he must not lose face again, this time he has already won the battle.

Qin Yuan also began to arrange after the interview. Although he did not allow other armies to participate in detail, he also completely divided orders. His current task is to directly attack the headquarters.

After the headquarters was captured, the Air Force began to act, the Marine Corps also used anti-aircraft guns to provide long-range support for them, and the Army began to charge.

Jiang Xiaoyu and the others were very excited when they received the order. Jiang Xiaoyu stepped forward and slapped Yang Hu on the back.

"How is it? You were quite angry just now, and you were still cursing there. Did you see that the order has come down, and we will follow Qin Yuan's request now."

Although Yang Hu was very happy in his heart, no matter what, they had a real and practical arrangement, but in a blink of an eye, after hearing the arrangement, he continued to hold his head in his hands and lay down on the chair next to him basking in the sun .

"Hey, let me tell you, are you deaf? The order has already been issued, why don't you make preparations? Hurry up and stop dawdling here."

"Look at you, it's really funny. Although his order has come down, how much chance do you think we have to do it? This kind of situation is simply impossible."

Jiang Xiaoyu probably understood what he meant. After entering that place with Qin Yuan's ability, not to mention destroying the command post, it might be possible to solve everything.

So there shouldn't be anything wrong with them. This is the first time everyone has seen Qin Yuan give an order to put everyone on standby, waiting for their group to act.

"See for yourself if this counts as personal heroism. After returning home, he will be a hero again, and what are we? It's just a foil."

"Don't say that, Brother Qin is not that kind of person, he has his own considerations, and haven't you noticed? Although Country C is keeping a low profile now, their battles are wonderful one after another."

However, Yang Hu couldn't listen to anything at this time. He felt that Qin Yuan was completely showing his ability to bury everyone, and even if he wanted to attack later, it didn't seem to have much to do with them.

At this moment, Qin Yuan has already made preparations and started to analyze. To be honest, facing such a hacker player, he is really worried, but his ability is very strong.

, But other players don't necessarily need to achieve super cooperation.

In the tent, he held a meeting again, explained the seriousness of the matter to everyone, and strictly planned the specific situation.

"You may not have come into contact with these soldiers before, but I can say that their abilities are far beyond ordinary people."

"Brother Qin, don't worry, we are not vegetarians, if you have any problems, we will go together."

Qin Yuan nodded. He has no problem in this regard. The reason why he brought the red blood cell team is because the team members have been given merit points by him before, so they are relatively excellent in all aspects, and it is easy to fight against them. .

Soon the battle started, Gao Shiwei was only in charge, he could only watch this battle in front of the big screen, and even set up a live broadcast.

There are people swiping the screen non-stop on the barrage, some support Yan country and some support C country, and at the moment on the side of the Yan country air force, the captain is really bored lying on the playground, he doesn't know when he will wait Command to attack.

It can be said that both sides are waiting for this battle that everyone is paying attention to, and it has been in a state of peace from the very beginning, because neither side has moved.

In order to avoid leaks, although it was broadcast live, when the live broadcast went out, it would be half an hour later than what the audience saw.

This live broadcast is carried out live in the offices of several officers in the interior, in order to let everyone see this battle better.

Although Shi Guo didn't move at this time, Qin Yuan had already set off with the members of the cell team.

Seeing that Qin Yuan had only a few people with him, the American side couldn't help laughing, "Hahaha, I really didn't expect you to play this kind of tactic? This is not a confrontation between

small teams, and you still have such a few players." , this commander seems to be nothing more than that."

Gao Shiwei didn't say anything, but just gave that person a cold look. It's meaningless to say anything now, and it depends on the result in the end.

And Qin Yuan also has his own plan this time, he wants to find the missing players through this operation, and he has never given up on those missing players.

Their speed is very fast. Country C plans to launch a tentative air force attack on them the next morning, and then use the army to keep up. They are also remodeled soldiers with very strong capabilities.

The reason for the two-day delay was that they didn't want others to see too many clues. In any case, they took two days to finish it, which was within the normal range.

Inside the tent, the military chief of country C was smoking a cigarette leisurely. In his opinion, this battle was destined to be won, but he didn't notice that Qin Yuan had arrived at the periphery where they were waiting.

Qin Zhengyang didn't understand, they were too far away in this direction, there were still 3 kilometers away from their cumbersome place, but some figures could be seen from a distance on the top of the mountain, but this position was too far away.

"Brother Qin, just like before, we all break through. With our ability, we should not be discovered. We will leave at night."

"I just said that you are too young. You can see for yourself that those soldiers are not ordinary people. We could pass through the eyes of ordinary people before, but they can't. And have you seen drones? There are several corners, That's infrared sensing."

Qin Zhengyang was taken aback by what he said, and then raised his head to look at it, didn't he? He really didn't notice this before.

I almost made a mistake. I didn't expect there to be drones in the distance. With that infrared scanning device, in addition to solving the problems of the people around, I also had to solve the problem of drones.

Qin Yuan immediately made deployment arrangements, and it is indeed best to act at night.

"Chenguang, you will be in charge of the drone directly intruding into their elimination system, and then control the drone to attract the attention of that side first. We will act from the back, and I will deal with the four soldiers standing guard on the side."

Qin Yuan still took the lead, He Chenguang and the others attracted attention and then covered him.

Before this move they were dealing with other companies

In fact, high-tech weapons often have weaknesses. Relatively speaking, humans don't know it, because people's alertness is a temporary reaction.

Qin Yuan took advantage of this. At the moment, the synthesis gate was crackling input to the computer. He wanted to find the main circuit to control the drone, and then directly enter the invasion.

Now he is very relieved to hand over this job to He Chenguang, and he only needs to focus on solving the people in front of him. At this moment, he has quietly come to the peripheral position. The soldiers on the opposite side of this place have not responded yet, so he dare not Then rush forward.

About seven or eight minutes later, He Chenguang made a concealed gesture at him, and he kept observing his every move, which meant that it was done.

In the next second, the drones they were circling in a few corners rose from mid-air, and the two drones fired at the surrounding woodland, crackling.

The military minister in the tent at this moment reacted quickly when he heard the movement, "What's going on? Why are there gunshots outside?"

He was pacing back and forth in the tent anxiously, this shouldn't be, his soldier request is very high, if there is any situation, he will report to him as soon as possible, why did he suddenly shoot?

The main reason is that Qin Yuan is a little unclear to him. Although his ability is very powerful, he always feels that he is a little at a loss when facing this person, so he should be more cautious.

After a while, soldiers outside ran in to report, "Sir, there is no enemy attack. It is our drone. It seems that there is a problem with the system. It is not controlled by the host computer and is scanning the outside world."

"What! What are those guys from the military department doing? They can't even control a drone. Isn't that exposing ourselves? Don't let that thing continue to fly around. Isn't this exposing our defenses?"

Although the team led by the military minister of country C is very strong, they are indeed lacking in some aspects of combat command. For example, the decision he is making now is to let Qin Yuan take advantage of it.

Originally, Qin Yuan was still thinking of a way, just to create chaos. Unexpectedly, this guy simply shot down all the drones forcibly, because they had no way to control them, and they were worried that their defense line would be exposed.

Taking advantage of this chaotic opportunity, Qin Yuan quickly stepped forward and directly dealt with the four soldiers in front, with the throwing knife in his hand on their sirens.

Before the four people could react, they were about to shoot, but found that the gun could no longer be activated, because it was connected to the controller, and if the controller failed, they would be dead.

"Don't yell, don't yell, don't break the rules, this time everyone is watching the global live broadcast, don't lose face then."

These four people were very unconvinced. Where did this Qin Yuan come from? They hit up in an instant, and their physical reflexes were high enough, so they all made mistakes.

A gap has been opened here, and they are lined up one by four for each position. After opening the gap here, Li Erniu and the others successfully entered.

Li Erniu didn't take it seriously. After seeing Qin Yuan easily dealt with these people, he felt a burst of pride in his heart.

"I don't think we need to send other teams, as long as we can directly turn them upside down, these people are nothing more than that."

Qin Yuan glanced at him, "Be careful when you say the wrong thing, and your tongue flashes, these people are really not simple, let me remind you again, don't make any fools when the time comes."

Li Erniu nodded quickly, he knew that Qin Yuan was not joking, several people kept shuttling through the darkness like this, but they still underestimated the vigilance of those soldiers~www.readwn.com~ After all, they were remodeled .

Soon they were discovered that although Qin Yuan was fast, the people on the other side were not vegetarians, so they immediately realized that they had already shot.

A burst of coded gunshots came to mind in the woods, and soon, the Minister of Military Affairs realized that the drone incident just now was definitely not accidental, someone came in, and he knew before that Qin Yuan likes to do these small tricks the most.

"Hehe, did he think he was here to sneak attack on us? After I let him come, he can't go back."

This guy can have such self-confidence because his soldiers are really powerful. After the battle, Li Erniu and the others found that the opponents on the other side are really not simple. Their evasion and attack abilities are very strong.

The two sides actually drew a tie, and only under the suppression of Qin Yuan's firepower did they have some hope of breakthrough. For Li Erniu and the others, the soldiers on the opposite side were indeed better than them. Li Erniu's marksmanship was already accurate enough, but But unable to aim.

"Damn, what the \*\*\*\* did these guys do? Can they still have eyes behind their backs?"

Chapter 1708: usefulness of the air force

All of you concentrate, and try to keep a distance from them, don't fight at close range, these soldiers are not simple."

Qin Yuan reminded again, and then rushed to the front, taking the lead to deal with the people in front. The soldiers on the opposite side have been transformed. Although this ability is not up to Qin

Yuan's level, they are very responsive in all aspects. , Li Erniu and the others missed, which is understandable.

Afterwards, the Minister of Military Affairs calmed down and sat in the tent, waiting for them to wipe out the team. Unexpectedly, the soldiers who ran over reported that the situation was very bad.

"Sir, it's not good. Our team responsible for increasing personnel has also been blocked. Their ability is too strong. We have already eliminated one team member."

The military minister couldn't believe it when he heard this. He stood up and eliminated a team of members. There were 27 people in total, and they were eliminated just like that.

The main problem is that his soldiers have all been transformed. How could this happen? He was the first to think that there might be some problem here, mainly because there is something wrong with the medicine?

He hurriedly called the accompanying doctor over, but so far the tests showed that the soldiers had not been affected in any way.

"Since there is no problem with your test, why did we eliminate so many people? Could it be that some soldiers did not inject the medicine as I asked?"

"Sir, usually this kind of situation will not happen, and those soldiers will not make fun of their own lives. If they don't inject medicine, they will really die."

The Minister of Military Affairs frowned when he heard this. Could it be that the person on the other side has also been reformed?

If this is the case, then he knows his weakness. After all, in his opinion, the only ones who can fight against these super soldiers are stronger reformed soldiers. He doesn't believe that ordinary people can do this.

Thinking of this, he murmured a few words in the doctor's ear, telling him to prepare things, and then called his guards, who had been by his side all the time, including those who were in the laboratory before. contacted.

I don't know what kind of plan this guy is going to come up with. At this time, Qin Yuan is struggling to fight back. Of course, his ability is the strongest. The soldiers on the other side are also very puzzled. What the \*\*\*\* is this guy doing? Unexpectedly, some players around them were eliminated.

But as the number of people behind increased, Qin Yuan could only quickly lead his team members to retreat. Even if he could retreat by himself with his current skills, these team members could not.

There was a constant red light around, and those eliminated soldiers felt at a loss. This is the first time I have seen this situation. He has not been eliminated since he entered the battle at the very beginning. He did not expect to appear here. This situation.

What Qin Yuan needs to do now is to determine the command post as soon as possible. He knows that he has no way to completely deal with the people here. He must let the other three armies cooperate. This is also the plan he said before.

"Er Niu, can you hold on? Can you hold on for 20 minutes? I will find the command post as soon as possible and notify the other teams."

A few people took a look and understood what Qin Yuan meant. The soldiers on the opposite side were really unusual. According to their traditional methods before, that would not work. They could only find the forces commanding the three armies to destroy them together as soon as possible.

"Brother Qin, go quickly, let alone 20 minutes, if you persist for a day, I'm fine."

Qin Yuan saw more and more people around him. If he doesn't leave now, it may be difficult for him to get out. These soldiers are really very physically fit.

In the end, under the cover of He Chengguang and the others, he directly killed a path and rushed out quickly. Now he wants to find the command post. According to the direction these soldiers came from, it should be not far away. As long as he finds the coordinate point, he can give Message from the Air Force.

However, just as Qin Yuan left, Li Erniu and the others couldn't hold on anymore. They didn't expect the opponent's strength to be so strong. They were completely suppressed by Qin Yuan's vitality just now. Now that Qin Yuan left, they could not hold on. Can't stop.

The team leader who led the team also found that Qin Yuan had actually broken through, and that he was able to break through under such circumstances. He quickly took the walkie-talkie and asked people to chase him from that direction. Although a team member was assigned, he stayed behind. more people.

He Chenguang used a sniper rifle to cover them at the back, but he couldn't do it in the back. The speed couldn't keep up, so he could only switch to a submachine gun. When he switched, a soldier rushed up, and the speed was very fast. He Chenguang and He fights together.

He Chenguang's fighting ability is also very strong. He didn't expect to have a tie with the person in front of him. What's more, the number of people on the opposite side was several times that of theirs. The fight between the two sides was inextricable, and two more soldiers came up to make up the knife .

At this time, He Chenguang saw the light on his chest light up, and everything was lost.

He gave a helpless wry smile, turned his head to look at Li Erniu, and told them to persevere, because he was eliminated now.

He couldn't help but think, these soldiers are really too powerful, their body reaction has already surpassed that of ordinary people, the soldier just jumped and reached a height of more than two meters.

In this case, not to mention their well-trained soldiers, even ordinary soldiers couldn't handle it at all. If they really launched a frontal charge with such a team, the consequences would be unimaginable.

"Two cows! Be careful behind!"

There are too many of these people, they can only keep retreating, on the other side Qin Yuan is also hurrying, he shuttles quickly in the jungle, although he meets many soldiers who come to support, but his figure and Merging together in the darkness.

He did make some mistakes this time. He should have only sent himself here at the beginning, so this situation would not have happened, but he also wanted everyone to experience the true power of these super soldiers.

But if he came alone, without these covers, it would be really difficult to get in. The speed of these superhuman soldiers was faster than the batch transformed by the masked man.

Soon he came to a mountain nest, and he looked at the cover set up below. The specification of the tent was definitely at the level of the command post, and there were soldiers around him who were taking strict precautions.

But I have to check the specific situation. Is it just that he is slowly approaching the front following the darkness? Even though his movements have reached the lightest level, he was still spotted by the person opposite.

The soldiers on the opposite side were not vegetarians, so they reacted immediately and shot towards this side. As soon as the military minister in the tent realized it, how could they hit the tent so quickly.

A captain rushed in and hurriedly reported the situation. The military minister felt that they were all rubbish, and even a few people couldn't stop them. What kind of reform was there? He didn't know what the \*\*\*\*\* these guys were doing.

"Where's the captain just now? I told him about it. Did he handle it well?"

"Sir, our captain has already done it, but it will take time..."

"Asshole, let him hurry up!"

Now he is very sure that Qin Yuan and the others must also be reformed soldiers, but he can't figure out where the flaws in this thing are, why can they accept the reform?

At this time, Qin Yuan saw the specifications inside and the clothes of the soldiers, he knew that this was the command, and said that he quickly notified the Air Force, this guy basically arranged all the army here, the number of people was too large too much.

In fact, it would be fine if he directly took over his command post at this time, but today this is a global live broadcast, he has to show his military strength, the main purpose is not to win, but also to let everyone see their military shocking power .

The Air Force dispatched quickly after receiving the order. After waiting for such a long time, I thought he would not be used anymore. Unexpectedly, Qin Yuan still gave them this opportunity, and this time he did not have too many worries. Let them send out drones one after another.

Originally, this drone was the last one they used to fight against the United States. I didn't expect Qin Yuan to use it at this time, but it was Qin Yuan's order after all.

It's really not that easy to defeat Country C. Qin Yuan's order has just been issued, and their air force has already set off.

At this time, the military minister in the tent couldn't come out either. He stood below and stared at Qin Yuan coldly, surrounded by his soldiers.

"I really admire your courage. You dare to break into this place alone. You are indeed very powerful, but I think you should know what I mean."

"Hehe, I should ask you this question. Are you afraid that people will not discover the crooked ways you practice? You think I won't expose you. That's because I don't have any evidence, but it doesn't mean I won't be the first to eliminate them. You, will not let this unfair thing happen to other teams."

The military minister laughed out loud when he heard this. He just felt that the words of the person in front of him were too exaggerated. After all, he felt that the other party was also a despicable guy.

"You haven't been remodeled yourself, and your soldiers have been remodeled, otherwise, would you be so strong?"

Qin Yuan didn't understand yet, what did he mean? What do you mean there is also a transformation on your own side? This is completely impossible.

However, in the next second a bottle of liquid was thrown directly at him, and only then did he notice that all the soldiers around him were wearing gas masks.

Qin Yuan didn't care, he just avoided the bottle, and the liquid in the bottle quickly fell asleep on the ground and evaporated.

The military minister stood opposite and stared at Qin Yuan with a serious look on his face. This thing is the nemesis of these reformed soldiers.

This liquid is the medicine they need to inject before, but this medicine cannot exceed the standard. Once it exceeds the standard, it will be life-threatening. This liquid evaporates very fast and can penetrate through the skin.

However, after a long time, Qin Yuan didn't respond at all. Instead, he looked at him strangely, and started fighting with the surrounding soldiers.

He couldn't believe it, how could this be possible, he had done experiments before, and it would never be like this, even for a strong soldier, under the erosion of this liquid, it would never last five minutes.

However, after a long time, there was no reaction at all, and Qin Yuan continued to fight harder and harder. He felt that all this was impossible. At this moment, there was a booming sound in the sky, and the radar defense he had set up before was also on alert at this time. .

"You! You despicable guy, you came to find my command post on purpose and drag me down."

"Hehe, are you just realizing it now? Although I don't know what you meant just now, don't worry, I won't be as despicable as you."

Unexpectedly, the military minister in front of him is not in a hurry, because he still has his own trump card. Qin Yuan has planes here, so of course he does, and his soldiers will be even stronger.

But he didn't expect Qin Yuan's trump card to be his drones, which he personally participated in the transformation before.

On his side, the air defense alarm has been raised, and all the soldiers have begun to prepare for air defense, while his air force team has also started to set off on the other side, and they can arrive at this place in at most ten minutes.

So they only need to hold on for another ten minutes, and at this moment he is staring at Qin Yuan coldly.

"I admire your courage, you were able to break into this place, but it's a pity, I'm going to win today!"

The military minister left quickly under the cover of a few soldiers nearby. Qin Yuan wanted to catch up, but was held back by the soldiers next to him. These people are indeed very capable, who is going to enter the air-raid shelter.

And at this time, he didn't care so much, he could only quickly exit and go to this place, which was also dangerous for him.

This guy guessed wrong, he thought Qin Yuan was going to use planes to deal with his position~[www.readwn.com](http://www.readwn.com)~ so his air defense equipment was very good at the very beginning, leaving enough space for the air-raid shelters on the side to let All soldiers retreated first.

Just when he issued the retreat order, he was responsible for holding Li Erniu over there, and their team was also asked to evacuate.

"Captain, an order to retreat has been sent from the headquarters, asking us to enter the air-raid shelter immediately."

"Follow the requirements of the headquarters and withdraw quickly."

"But these few people are about to be eliminated by us, should we just let them go like this?"

"Hehe, as long as we go in, do you think they can survive the bombing outside?"

That is also something that will be eliminated sooner or later. In the captain's mind, they are no longer worth mentioning, so the whole team began to retreat.

This time the retreat was a bit more relaxed. Li Erniu and the others couldn't hold on any longer, and Qin Zhengyang and He Chenguang were eliminated.

It's just that these people didn't enter any air-raid shelters, but began to retreat down the mountain, because according to the plan Qin Yuan said before, their planes were not used to fight positions at all, but had other uses.

## Chapter 1709: Reiko's plan

Taking advantage of the chaos, several people quickly gathered at the foot of the mountain. Li Erniu was very helpless. The moment he saw Qin Yuan, he hurried to report.

"Chen Guang and the others were eliminated. This group of bastards, they are really too fast and there are so many people. We can't resist it."

"It's okay. I know this situation, and it's expected. Compared with the big loss, this is nothing. It's okay for us to hold them back."

They had just retreated, and the military minister who was hiding in the air-raid shelter at this moment realized that something was wrong, because he could detect that the plane above was circling non-stop, but there was no intention of attacking, which made him a little confused .

So they kept sending soldiers out to investigate, but after reading it several times, there was no response.

"Sir, the other party is really strange. They didn't attack us in any way, and even we fired shots below to attract them, but you didn't respond at all. There's something wrong with that."

"It seems that this guy wants to have an air battle with me. After all, our team will arrive soon, and he is too confident in his air force."

This is what the Minister of Military Affairs can think of. At this moment, he has become extremely confident. Qin Yuan's move is definitely lost. Within the scope of his determination, his military power is definitely stronger than his. On the one hand, weapons , on the other hand is the manipulator, can it be compared with super soldiers?

At this time, the air force over there has been hovering in the sky, and they are also looking for targets. After a few minutes, the leading captain has given an order to get everyone ready.

"Brothers, our purpose this time is to hold them back and buy time for our drones."

Qin Yuan had secretly told this captain before, telling him to keep his spirits up. This time, the Air Force is not easy to deal with. They compete not only in terms of military power but also in terms of operation. This is also a point that is difficult to surpass. .

When the air forces of the two sides compete, everyone can clearly feel the gap. The opponent's aircraft is comparable to them, but the key to the problem is that the controller is really strong.

At that speed, they can all shoot directly, and their own planes are also equipped with alarm equipment, and they will be considered eliminated after receiving a certain degree of attack.

Unexpectedly, within a few minutes of attack, they were knocked down, which was absolutely impossible before, and completely disrupted their formation.

At this time, the Minister of Military Affairs also came out of the air-raid shelter. He was very relieved to see the scene in front of him. If this continues, it will consume their ammunition, and it can also consume their strength.

However, he couldn't laugh the next second, and then a dozen drones hovered from above, and these drones began to attack their positions.

Even if these are super soldiers, they still struggle to face the drone attack. In addition, under the interference of their willingness just now, they couldn't form a formation completely, and they were also interfered by the aircraft.

It can be said that it was caught off guard by the drone for a while, and at this time, the army department that had already broken through from the other side of Yan Kingdom all rushed up in one go, and the entire hillside was engaged in scuffle.

At this moment, in the viewing room on the other side, everyone is cheering, because this battle is clearly visible to the naked eye, and it is definitely a victory.

Gao Shiwei stared coldly at the a\*\* officer who spoke arrogantly just now. Didn't that guy say before that he doesn't have much strength in air combat? That's what hit them all by surprise.

I have to say that Qin Yuan is really trustworthy, and according to his investigation, the strength of country c has inexplicably increased, and their strength in all aspects has reached the level of special operations. It's their ordinary soldiers.

No wonder Qin Yuan was so cautious before, he didn't listen to anyone's advice at all, and always followed his plan. If he really followed the traditional plan, he might really lose. Their strength is really too strong, not to say that they The military strength of the soldiers, but the personal abilities of the soldiers.

Of course, Gao Shiwei couldn't figure out what they did to make these soldiers so capable in a short period of time. Could it be that special forces are being selected all over the country?

The chief of the Ba Kingdom has come to congratulate, "I didn't expect it, this is really a very exciting battle, we can only be ranked at the bottom, but I have to say that it is really strong, and it is still the style of that big country."

When Gao Shiwei heard other people's praise, he quickly replied modestly: "You are exaggerating when you say this. We are all of normal strength, so we should respect our opponents."

The two were talking at first, but the officer of Country A on the opposite side couldn't stand it any longer. After all, they had lost to Yan Country before.

"Hehe, what's the big deal, isn't the battle over now? You really just concluded that you will win, I think it's impossible."

The people next to him heard him talking so bitterly, and began to refute, "I don't think this is necessarily the case. At present, their chances of winning are indeed very high. This side doesn't even have the strength to parry. After such a bombing, Can they still form? It's impossible."

Just when everyone was discussing enthusiastically, the situation on the battlefield really reversed. Qin Yuan led everyone to counter-charge non-stop. Unexpectedly, no one cut off their command post under such circumstances.

Under the cover of a small group of troops, the military minister of country c quickly retreated into the opposite mountain. This area belongs to them, but this area is too wide.

Qin Yuan cursed secretly, this guy is really cunning, looks like this, he also injected himself with that kind of thing, otherwise how could he keep up with those soldiers?

He Chenguang and the others were eliminated, so he could only withdraw from the battle silently. He lazily basked in the sun on the hillside, watching his brothers charge below.

"I'm really aggrieved. I've never seen such a situation. I would be eliminated. I can't believe it when it gets out."

"Brother Chenguang, I don't know what to say, but it is indeed the same as what Brother Qin said before. They are really too strong. This kind of transformation is completely against the rules. It is really despicable."

While the two were discussing and basking in the sun, they suddenly saw several figures disappearing into the dense forest opposite.

He Chenguang clenched his fists. Qin Yuan and the others must have not noticed the situation here, but they have been eliminated now, and they must not provide information. This is a violation of the rules.

"It seems that this guy is really not simple. Under such circumstances, he can even send other troops to interfere with our people. His soldiers are too capable."

"What should we do? Shall we quietly inform Brother Qin!"

"Don't worry, he can definitely solve this matter. If he can't solve this, Brother Qin will just sit in that position for nothing."

Even though he said this, he was still quite worried. These people's methods were relatively insidious.

The military minister led the team and quickly retreated into the mountain, the terrain here is more conducive to their concealment.

According to the previous rules, they must completely cut off the command post, or directly kill their commander, and then they can win, although according to the current situation, most of them are hopeless.

In particular, the navy on their side has not yet been dispatched, and the side has been completely decadent. The reason why they have not been dispatched is because the Minister of Military Affairs

made a wrong decision before. He felt that the navy was not needed at all. Called most of the people over.

Now Jiang Xiaoyu and the others fought a wonderful naval battle. Within 20 minutes, he was beaten and fled. Although the soldiers above them were powerful, but this was a high-tech weapon. It is also the result of elimination.

This naval battle was even more exciting, and everyone was cheering, but it was a pity that the command post was almost taken away, and it was a waste of time.

Officer A who made sarcastic remarks just now stood up and yawned, "Okay, I don't think this battle can be over today, it's already dark, they can't find it at all, let's talk about it tomorrow morning, I'll start Let's go, everyone."

This guy is really disrespectful. After what he said, Xiaomao country also left directly. The captain of Ba country was worried, because according to the previous assignment, they would fight Xiaomao country.

For Xiaomao Country, that was their last battle. If they lost this time, they would have no way to enter the top rankings.

Reiko was just going through the motions, and he still had to make preparations for a lot of things. The last battle was crucial to them.

Now she has to make other preparations. To be honest, it is easy for Ba Guo to deal with, but what he has to do this time is to win, and there must be no accidents.

At the moment, everyone in the venue is paying attention to the current game, and no one has noticed anyone leaving.

Gao Shiwei knew that the results would probably come out tomorrow morning. Those soldiers are so capable that it is not convenient to go out at night, and it is very likely that they will be eliminated in other situations.

But now he is still inseparable, always guarding in front of the screen, waiting for the latest battle situation at any time.

Reiko from Xiaomao country came out of the tent of country a after she came out. The commander of country a felt a little surprised by this person's arrival.

"I don't know what's the reason for you to come to me at this time? There is no friction between us. No matter how we compare, it's not the turn of our two countries."

"Hehehe, can't I come without other things? I also want to come to do business with you."

The commander of country a shook the red wine in the glass, raised his head casually, "I want to hear what to say, anyway, our rankings are about the same now."

The cooperation Reiko said is to hope that country a will fight against country o, so that after the rotation, they will be able to avoid changes in the ranking with Pakistan, and they will be assigned to country h, which is the weakest.

After hearing what Reiko said, the person opposite burst out laughing, he didn't expect this person to speak so bluntly.

"I didn't expect why you can't even defeat Pakistan? You have become so weak now."

The expression on Reiko's face didn't change much, she still had that smiling look. "Actually not. The main reason is that the Eight Kingdoms and the Yan Kingdom are too close. We also need to have some other considerations. This is our last chance. We must win."

"Then why do you think I should go to fight against country O, which is of comparable strength to me? Do you think I want to take this risk?"

The commander felt that the woman in front of him was a complete lunatic, who would make such a bad deal? Since it is necessary to discuss business, it must be beneficial to both parties, but this matter has no benefit to him.

At this time, Reiko suddenly took out a combat map and put it on the table, "Then if you look at this, will you consider it?"

The commander was stunned for a moment when he picked up the map on the table. This is the combat deployment of Country O. All the plans were clearly marked, including their weapons and strength.

Seeing this, he couldn't help but become wary of the woman in front of him. No wonder Qin Yuan was so hostile to them before. These guys are really despicable. The main reason is that the previous organizer searched for so long and found no clues.

Everyone suspected that the data had been leaked, but they didn't expect it to be perfunctory in the end, and now the evidence is in front of them.

"Hehe, you are quite courageous to show me this thing, aren't you afraid that I will report you directly?"

"I don't think you will~ [www.readwn.com](http://www.readwn.com)~ This is a good deal for you. The strength of country O is similar to that of you, but it seems that you have been on top of you all these years. If you take this opportunity, you can defeat him, then your salary will be improved after you return to China."

The commander was not talking, and he thought carefully, what this woman said was indeed good, this is a great opportunity for promotion, and with this map, what else is he afraid of?

Although the terrain has changed now, he can understand the true strength of country o, but thinking of this, he suddenly looked at the woman and smiled wretchedly, then stretched out his hand.

"In addition to this map, there are other things. If there are other things as gifts, then I am willing."

After finishing speaking, he stretched out his hand and put it on Reiko's. Although Reiko was very annoyed, she smiled slightly, and then threw herself into her arms.

There are some things she has to do, and this is also for the sake of the country, and currently only country A has this option, they have already won before, and they can choose their opponents first.

What happened before made them have to be cautious, this battle must be won, otherwise the ranking will be out of ten, and they can be regarded as getting what they need.

Chapter 1710: hold the inside story

At the moment, the people in the venue still don't know the conspiracy of these two people, and the Pakistani side is even more prepared. They are going to fight Xiaomao, so he is very disturbed. Looking at Gao Shi who is paying close attention to the battle situation, Wei.

The person in charge of Ba State finally said, "Mr. Gao, I really want to ask you about your experience in dealing with Xiao Maoguo before. I want to ask what their weakness is? Although I know this is not suitable. Rules, I shouldn't ask you guys."

His attitude was very humble, and Gao Shiwei waved his hands with a smile, indicating that there was no problem.

"Let's all discuss it with each other. There is no problem. Moreover, there is already a huge gap in your strength. It is only because of Xiaomao Country's successive mistakes that they are allocated with you."

To be honest, if the strength of the Pakistani country really wants to fight with the small Mao country, it may not be able to win. Although they have risen somewhat in recent years, their military strength is still relatively weak.

So he can put down his figure and face directly to ask, which is also human nature, at least he can do his own part for his country.

Gao Shiwei also told him some account reconciliation experience that Qin Yuan had told him before, that Xiaomao country is mainly good at land attacks.

"Oh, so you mean we're going to attack them mainly by air and sea, don't you?"

"This is indeed the case. When we fought against them before, we also saw their air combat strength. To be honest, it is not a problem if you want to fight, as long as you pay attention to their army, so you have to change direction. , How to do it depends on your opinion."

The leaders in charge of Pakistan thanked them again and again, that was enough, they had already given them advice, and it was up to them how to deploy it.

And everyone on Qin Yuan's side felt that chasing at night was not a particularly good thing, and there was no great chance of winning in the end.

Although they now pay attention to technological warfare, they are training in simulation after all, and many things and equipment cannot keep up. Only a small number of soldiers are equipped with night vision goggles.

So it is not so easy to track down that team, at least it will be tomorrow morning, and the military chief of country c thinks so.

He just arrived at a safe place and hid in a mountain depression. This place is relatively dense, so it is not easy to be found.

This guy ran in a panic, and kept asking Ice next to him to contact the navy, hoping to get support from the navy, but he couldn't get in touch after a long time.

"Sir, I feel that something is wrong. It is very likely that there is a problem with our navy, otherwise it is impossible to fail to contact."

"What! How is this possible? Everything was done according to my deployment before, and our soldiers are very capable, how could they be defeated?"

This guy is still unwilling to accept this fact, until the soldier next to him reminded him that most of their navy soldiers have been sent here, and they have already put all their energy on this, so they must suffer in terms of naval battles of.

Only then did the military chief realize that he was too conceited before, taking everything for granted, which caused this situation, because he trusted the abilities of these soldiers too much.

"Sir, what should we do in this situation now? We are already trapped here, and it will be a matter of time before they destroy us."

"Hehe, I know, the victory of this battle has come out, but don't forget your identities, you have this ability, anyway, they dare not dispatch tonight."

This guy just has the idea of pulling a few more backs before he dies, because the number of eliminated people will be counted in the end. The specific situation at that time at least looks better in terms of statistics, and they can pull a few more people.

After running for a long time before, they had already fallen into an extremely exhausted state in the second half of the night, and by this time Qingyuan had already quietly tracked them down.

The soldiers standing guard in front just realized that Qin Yuan was about to shoot, and Qin Yuan attacked him first.

In front of Qingyuan, there is nothing that can stop him. His speed is getting faster and faster, running non-stop, and the soldiers in front are quickly dealt with by him.

Seeing that the situation was wrong, the military chief ran away. No matter what, he had to persist until tomorrow morning, and the soldiers behind him followed him all the time.

Unexpectedly, when he turned his head, he would swear and tell these soldiers Lu Yao to follow him.

"What the \*\*\*\* are you \*\*\*\* trying to do? Don't follow me, get out of this place quickly, you didn't follow me here, you go to attract firepower, at least separate, don't let them catch you."

Several people nodded and could only run away in batches, but what the military minister didn't expect was that Qin Yuan seemed to have identified him and kept following him.

The Minister of Military Affairs has also undergone transformation before. Of course, he hopes to get as strong as possible and get this kind of strong power.

So he also kept spraying wildly in front, and the two chased one after the other, and the distance between Qin Yuan and him became smaller and smaller.

In the end, the Minister of the Military Department was completely knocked down by the branches in front of him, and then rolled into the opposite ravine. He finally stopped, and Ruan Ruo also stepped forward and jumped directly on top of him, grabbing the back of his neck.

"I didn't expect you, an old boy, to be able to run. Why don't you run? Keep running."

"Do you think you can humiliate me by catching me like this? Just kill me, I'm no different from a dead person now."

"I know I can't really kill you, it's just a game, but let me tell you, I will dig out what you owe me."

Before the military minister realized what Qin Yuan said, his consciousness was completely invaded in the next second. Qin Yuan wanted to find the missing team member, as well as those from other countries.

There are really many secrets hidden in this guy's mind. Not only are there several laboratories, but more importantly, he has indeed found those missing team members, but they are still undergoing transformation in the laboratory.

Because of the defect of the modified gene, they need to use other people to continue the experiment.

These despicable bastards, Qin Yuan quickly checked the address of the laboratory, but he didn't expect that he couldn't find them until they were in country c, it was because their concealment was too high.

Fortunately, these \*\*\*\* did not do so well, mainly because the people they recruited were not easy to arrange, so they were relatively cautious.

At present, there are not many casualties. This is relatively safe. Even if Qin Yuan wants to leave now, he will not be able to leave, because he will have another stop with the country of Mi, and he is the commander. go.

But knowing the location anyway, he will find that place, and then rescue his own people.

After thoroughly digging out the secret of the military chief, Qin Yuan let go of his hand, and the military chief always felt as if he had seen through something.

There was a trembling feeling in his heart, and he always felt that the person in front of him was not simple, but he thought carefully that he didn't seem to have done or said anything, and lost consciousness at that moment.

And Qin Yuan had an expression of seeing through him. The feeling in his heart was getting deeper and deeper, and he couldn't help asking: "What did you do to me just now? I've heard about your methods. Do you know how to hypnotize? Could it be that just now?" ..."

After saying this, he didn't dare to continue down, because he didn't know what he said during the period when he disappeared for a while, which made him feel really scared. The secrets in his heart were absolutely cannot be known.

"Hehe, what are you talking about? I don't know at all, and what did you want to do in front of me when you threw that strange thing just now?"

Qin Yuan plans to act with him first, because he can't startle the enemy, and he can't rescue his comrades during this period of time, so he can only use this method first.

Sure enough, the military officer thought about it, even if hypnosis is really not so magical, he shook his head and waved out those bad thoughts.

"Then why should I tell you? You can kill or cut whatever you want."

Qin Yuan had already got the answer he wanted, so he didn't talk to him anymore, and hit his siren directly, and there was a red light on him in an instant.

Then the broadcast at the headquarters also started to sound, their command system has been completely destroyed, and I hope this side has won.

Although country c lost this time, according to the current ranking, they are also in the third position, because they have won four previous games, but lost this one.

This time, Yan Kingdom was advancing by leaps and bounds, and it was a wonderful scene for everyone to see the loss of the battle without exception. Everyone felt that the battle tonight would not come to fruition.

Therefore, the current battlefield situation is obvious. They will finally face the United States, and after the battle with the United States, they will be able to distinguish the first and second positions.

After observing the country for a period of time, the US side also began to be cautious about the Yan country. At first they didn't think there was anything special. In their opinion, their military strength is definitely ranked first, but it seems that This guy still has something left to show.

Their team leader this time is an old acquaintance of Qin Yuan. He met the guy in the previous special competition who was only a vice-captain, and now he has been promoted to the team leader this time.

Charles stared at the map coldly. This time was more important to them. The Yan Kingdom was really getting stronger and stronger at present, and it was very threatening to them.

The people below are also full of solemn faces. After all, they have seen this battle in their eyes. Country c did not know what tricks they used this time, and their capabilities have improved by leaps and bounds.

Charles tapped the map on the table, "Take this battle as an example. If we reconcile the accounts, what method do you think we should use to win this victory?"

Several officers around looked at each other, all of them frowning for a long time without giving any idea. To be honest, the defense of country C is too tight this time. There is no other way except to infiltrate with such a small team, and the small team The risk of infiltration is also very large.

"Sir, judging from the current situation, their strict strength is too strong. It seems that we have to use other technical weapons."

"What technical weapons do we have? We have already used everything that should have been brought out before, except for some wiretapping, but there is no time at all."

"This time we bring amphibious combat vehicles, why not use this to attack his navy first, so that he has no resources behind, and then use the air force to attack, and finally solve his army."

Charles just remembered at this time, yes, this is the latest research and development. This amphibious combat vehicle was originally there, but this is their latest modification. Its defensive performance and the number of ammunition it carries have been improved. strengthen.

Originally, Charles didn't want to bring this weapon out, but it seems that this solution is currently the most reliable.

Several people began to study other plans, but they couldn't completely prevent Qin Yuan's team from infiltrating. His team was too powerful. Once they infiltrated, they would control the main force.

"You can see that they fought against country A in the same way before, and they all used small teams to infiltrate. To be honest, we have no way to prevent this, so we can only divert our attention and directly attack his navy."

Charles nodded. This method can indeed be considered first, "Then this plan will be tentatively decided first, and we will discuss it~[www.readwn.com](http://www.readwn.com)~ to see if there are other better ones."

The latest battle plan is being discussed here, while Qin Yuan is just like a normal person, and they took the lead in celebrating when they came back.

The main reason is that this time he really achieved a great victory. As for the country of America, he didn't pay much attention to it at all. As long as the country c is brought down, everything else will be fine.

And at this time, the screen of Qin Yuan being interviewed was released on the live broadcast on the big screen at this time, which really corresponds to the present. He has that confidence and capital.

After losing the battle in country c, they were also preparing to evacuate, and now they had no choice but to go back, but this ranking was completely ahead of them.

Most of the teams withdrew, and the rest had to wait until the end for the awards, because the rankings would be determined at the end, and it was not easy to get to the third place.

Regarding this battle, the military chief of country C has been unable to figure out how powerful Qin Yuan is, to be able to achieve this level, and to break through all his super soldiers. Before, he thought that Qin Yuan had also been transformed. Yes, but that stuff didn't do anything to him.

What he didn't even know was that Qin Yuan had already fully understood other things about him, and he just waited until later to take him down directly.
