

Special Soldier 1721

Chapter 1721: 1 substitute

The Seeing the helpless expression of President C, Qin Yuan just smiled. He thinks his daughter is quite obedient. She has never caused trouble to anyone. They all love it.

"Okay! I will come back as soon as possible, but I don't think the matter over there will be resolved so easily. I always feel that there are other situations here."

He nodded, and then made a phone call to ask Qin Yuan to wait for a while. It would take at least 15 minutes for him to arrange a helicopter.

The president of country C was talking about it, but Qin Yuan, who was sitting across from him, didn't seem to want to talk to him very much, so he didn't say anything more, because Qin Yuan was thinking about a problem at this time.

He is really very worried about what will happen now, that is, the masked man has not died yet, and he is resurrected under that situation, or in a certain way.

He has already repeatedly recalled what happened that day in his mind, as if there was no special situation, and he definitely took care of that person, so he couldn't figure it out, but he just hoped that what he thought of was just a coincidence.

At this time, the president of country C inadvertently said, "Minister of Military Affairs was really not such a person before, and it has changed since last year, so this person has been hiding too deeply, at least in the previous 15 years Among other things, he never had any idea of such a coup."

what! Qin Yuan's eyes tightened when he heard this! Wasn't that a year ago when he eliminated the masked man? At that time, he had just completely disintegrated the masked man's organization.

Qin Yuan became very excited, and quickly stepped forward and grabbed him, "Aside from this, did he change anything a year ago? Tell me quickly, and where he lived before. I want to visit him." Check there again."

"Ah! Why are you asking this? Didn't you say that you don't need to investigate these things? You are going directly to the Amazon jungle now."

"No, now I have to know these things as soon as possible. You answer my question first, where does he live? I have to investigate."

Mr. President felt a little strange, but he still gave him the address. Qin Yuan turned over and jumped out just after getting the address. Mr. President shouted from behind:

"Hey, why are you in a hurry? Didn't you just tell me to prepare a helicopter? What are you going to say now?"

"Just let them wait there first, and I'll go there when I'm done."

The president is very helpless, what this guy wants to do is really unique, he only does it according to his own ideas, and he didn't discuss it with himself at all, but it seems that there is no need to discuss it.

Now Qin Yuan is running wildly, and the idea in his heart is eager to be verified, which means that he made a mistake at that time. He did not expect that old **** to escape another disaster, and countless pictures appeared in his mind.

No wonder that person knows himself so well, especially he is very cautious in every aspect. Everything in the base is aimed at him, including the use of restricted abilities.

The system will not give out missions in vain, and thanks to the system's previous reminder, it made him think of the meaning of this level. In a blink of an eye, he has arrived at the outer edge of the building where the military minister lives, and it is also quiet and scary here.

But it was not easy to reveal behind this quietness. Qin Yuan observed silently for a while, and there was actually a face recognition device in front of the building, including infrared scanning.

Unexpectedly, the things the Minister of Military put here are not simple. He doesn't trust anyone, but the crux of the problem is that this is just one of his offices, next to his living place, and he usually lives here temporarily.

In Qin Yuan's mind, he also recalled the time when he subdued the military minister there that day. At that time, there was nothing abnormal, and the system did not change in any way. This is what he found strange.

Qin Yuan cleverly bypassed these infrared devices, and used his own skills to successfully open the lock below, which was completely electronically processed.

He also noticed after he just went in that there were still a lot of security guards behind, but it was just because he was lucky that he happened to escape their patrol time.

Qin Yuan searched for a while in the office building, it was a very ordinary office, and there were no other particularly detailed clues.

At this time, he turned his head to look at the cabinet next to him, and opened the portrait behind, only to find that there was a hidden compartment inside. When he opened it, there was a safe inside. He thought there was some secret hidden in it, but when he opened it, there were some gold bars , and a pistol.

These things are too ordinary, and they are not really secrets. Generally speaking, this office gives him a feeling that it is too simple, which is not very similar according to the behavior of the previous military minister.

Now that that guy already has a rebellious heart, he will definitely absorb power as soon as possible, including the decoration of his entire office, but there is nothing now.

This office is really too clean, or he has cleaned it completely before, leaving no evidence at all, it seems that he can only go to the place where he lives to have a look.

It's just that when Qin Yuan came to the place where the military minister lived, he felt a little strange. The guards outside were very strict, but after entering the courtyard, there were no guards.

It stands to reason that although he is not here, he still has to have a normal duty, but no one enters this place, it seems to be completely isolated from the outside world, he felt a little strange, walked in slowly, and came directly to The position on the second floor, easily jumped up.

Opening the window, he jumped into one of the rooms. There was still no movement after a circle, but soon he heard an unusual sound, only another breathing and heartbeat, and there were other people in these rooms .

Thinking of this, he quietly blended into the darkness, and approached the other room all the way to the end of the corridor. That room was locked.

Moreover, the door of this room is completely different from other rooms. The door is made of another material, which is completely soundproof.

It seems that the owner is more concerned about the things hidden in it. Thinking of this, Qin Yuan stretched out his fingers and clicked, and the password was unlocked directly. Since he has this skill, he feels that it is too convenient.

It's just that when he opened the room, he saw a person curled up on the bed with his back against the wall and sleeping, but when he heard the door opening, he turned his head slightly, the expression on his face was very frightened, and he could feel it in the dark until he was trembling.

Qin Yuan looked at the wall next to him, and turned on the switch directly. As the light came on, he saw that the person in front of him was actually the Minister of Military Affairs, but this person's hair was messy, and the expression on his face was terrified, not at all like before. The person I met.

Moreover, his hands and feet were locked by long iron chains, and he couldn't leave the half of the bed at all. His range of activities is only in this small area, but the surrounding area is quite clean. It seems that someone will come here specially Take care of him.

"You? You are the real Minister of Military Affairs!"

Qin Yuan knew that it was definitely the masked man who had replaced this guy's identity, but for some reason, he couldn't let this guy die now, so he could only imprison him temporarily.

The person on the bed nodded desperately when he heard it. He was still very scared, so he quickly waved his hand to tell him to turn off the light.

Seeing his frightened expression, Qin Yuan could only do what he said first, mainly to appease the emotions of the people in front of him. After Qin Yuan closed the door, a deep sigh came after a long time.

"Look at this, although you came to rescue me, you probably broke in by accident, so you don't know what happened. I told you to turn off the lights quickly, but I just don't want others to find out."

"How? Don't you believe that I can rescue you?"

Speaking of the military minister suddenly sneered and said seriously, he couldn't believe it at all, "I've been here for a whole year, and I imagined that I could go out with nothing to do, but that guy is too capable, He injected me with a lot of messy drugs, and I couldn't get out at all!"

"And injecting medicine with you, what's going on?"

"Probably something that made me unconscious or lost my memory, but he didn't expect me to use self-harm to keep myself awake, to keep myself awake at all times, and not to let myself forget my identity, otherwise it would be too late ."

Having said that, he stretched out his hand, and Qin Yuan saw the bloodstains on his wrist with nails, which was shocking.

"Don't worry, I'm here to save you this time, but I didn't expect that guy to use such a method."

"I can't leave here. This electronic practice test must be opened with his fingerprint, otherwise he will receive a message soon if he is sabotaged in other places. I have other handles in his hands."

Qin Yuan thought for a while, and according to the style of the masked man, he would probably use his family or other things to threaten him, "You can choose to trust me, now I will take you to see the president, and I will find a way to open it for you. ."

"No! Don't! Don't bring him to this place. That man is a devil. He can do anything. I just hope you can protect him."

It seems that the person in front of him is the real Minister of Military Affairs. Qin Yuan didn't say much to him, but just stepped forward and stretched out his finger. The Minister of Military Affairs was desperately trying to avoid it, and he didn't want to be triggered.

Unexpectedly, the chain would be opened in the next second, and the military minister was completely stunned. He raised his head and looked at the person in front of him with a look of disbelief.

"Who the **** are you? Could it be that you are with him, or how would you know such an unlocking method? He said that only he can unlock it."

"Hehe, do you believe what he says? This thing is too simple, and it's not worth mentioning to me."

Qin Yuan grabbed the military minister and told him to leave first, but before he left, he dealt with him and put on a mask.

"I don't know if he has other eyeliners in this place. Anyway, you should keep a low profile. I will take you to see your Tong Boss first. That will ensure your safety and I can do other things."

Seeing that he was finally saved, how could he not agree? All the conditions were quickly nodded, and now he is willing to pretend to be any kind of disguise, and he is taken to see the president, so he is finally saved.

Just like that, half an hour later, because this guy couldn't keep up with his actions, Qin Yuan could only take care of his feelings, and he had to dodge the guards who came out next to him at will, wasting a lot of time like this, and they finally showed up Downstairs in the president.

"Okay, step on my shoulder, I'll take you up, it's on the second floor."

"Ah! How is this possible? It's the same kind of room. We have to go through the main entrance, and we have to wait for the notification from the people inside. We can only go in after we get the notification. Besides, it's already so late, it's almost dawn, we Wait a few more hours until he wakes up after dawn."

Qin Yuan glanced at him slightly, as if he was mentally retarded. Is this guy okay?

"I asked you to do what I said, and you didn't find out? In case there are people sent by that guy in this place, it will only make things worse when they are exposed. Do as I said now. "

Although the Minister of Military Affairs is very resistant to this kind of sneaky behavior, he can only do this for the sake of safety. Qin Yuan thinks it is quite simple to bring other people along, but this guy is actually a little afraid of heights. I dare not go up.

In the end, Qin Yuan had already climbed up, opened the window first, then found a rope from the room with the President in a dazed state, jumped down again, and finally pulled the Minister of Military Affairs up.

"Hey, I said, are you too familiar with yourself? You can come and leave whenever you want to my room now, which is too exaggerated."

As soon as he finished speaking, he saw a person being pulled up. Unexpectedly, it was the Minister of Military Affairs. At this time, the Minister of Military Affairs was very embarrassed. He was very thin and his hair was messy. and The one I saw before was nothing like heaven and earth.

"What's going on? You brought him back in such a short time."

Before Qin Yuan could explain, the military minister stepped forward excitedly and grabbed the president's hand, "It's a good thing you're fine, otherwise I really wouldn't be able to explain to other people, I should have protected your safety, but But this happened."

The president was actually very resistant, because this guy wanted to kill himself before, and when he was confused, he was willing to explain to him next to him, and the two of them suddenly realized after hearing this, it turned out that the guy pretended to be him .

The military minister was very indignant when he said this, he slapped the table fiercely, "I don't know what this guy will keep me in the end, he didn't kill me, and he copied it perfectly, I don't know how to do it, He is exactly the same as me in terms of height and voice."

"But who is this person? Why did he do this? Isn't this messing us all up, is it a spy sent by another country?"

Chapter 1722: pick team

The Of course, the two of them don't know about this, but Qin Yuan is very aware of that guy's means. It is estimated that he wants to use the economy here in country C, and let his previous laboratory rise again.

It's just that he still can't figure out how that guy came back to life. He recalled the scene over and over again in his mind, and he was really sure that the guy was dead.

The Minister of Military Affairs and the President kept smoking beside them, and only then did they know that they had been cheated by each other this year.

This real military minister is really dedicated to serving the people, and he is thinking about everything here. He has never thought about those messy things at all, so he also feels very wronged, and he was directly imprisoned.

And what Qin Yuan is more concerned about now is why he didn't kill the Minister of Military Affairs, "What I want to know is, is there anything you have to do in person, is there any identity verification?"

"You said this and that must be there. That is the verification of our treasury. To enter that, not only must the identity of my pupil be identified, but also the blood of my fingertips must be collected, so that I can enter completely."

Qin Yuan thought of this, and thought of the laboratory he went to before, which basically used this method. It seems that the masked man also adopted the technology here, and was more cautious than before.

The president looked at Qin Yuan with some doubts, "I hear what you mean, you seem to know this person, so what should we do now? Should we just sit like this?"

"Definitely not, it's just that this person is very difficult to deal with. Maybe even I am not an opponent. He was the only one who escaped from me before. Just think about how powerful he is."

Having said that, the two people next to him were all breathless. They had seen Qin Yuan's power before, and they didn't expect that guy to be able to escape in his hands.

"But don't worry, I will definitely solve this problem, and our people have already been taken away by him. I came here to find that team, and I will not let this matter go unnoticed."

It's just that he is not in a hurry to act now, because he has met a familiar opponent. Facing this cunning opponent, he must be more cautious.

"Also, I need to remind you that you must be careful in all your actions now. This guy is very powerful and has relations with the United States. I have not investigated the real relationship behind them before. Many relationships are very messy."

"It must be like this, otherwise, without their support, how could this guy infiltrate? This is completely playing us like monkeys."

The president was very angry. He kept all of them in the dark, and if it wasn't for this incident, he would have been assassinated. Then this country is really going to be completely replaced. I feel scared when I think about it .

"Well, I will send the guards to assist you right now. Aren't they in the Amazon jungle? Just kill them all."

"Hehe, people in the security class? It's not that I look down on you, it's just that these people are not even as good as a finger of mine."

Hearing Qin Yuan's ridicule, the president could only lower his head. What can he do? Now the best shot is the guard class on his side. Although they are guards, they have all undergone various special trainings, and in his opinion, they are relatively capable.

"Then what do you think we should do now? I can't just go and find you a team. After all, if you go alone, the strength is too great. I know you are very strong, but you didn't mean that guy also has a team." ?"

The president's words suddenly reminded Qin Yuan, that's right, find a team. If this method doesn't work, then find one.

"Well, if you trust me, give me a team. In about 15 days, I can train them and let them get started quickly in a short period of time."

Before Qin Yuan could not completely kill that ***** relying on his own strength, this time he must make the final fight.

Originally, he wanted to directly transfer the members of the red blood cell team here, but he didn't want to involve too many people. It would be very troublesome for the red blood cell team to come here and have to get various approvals.

It's better to command a team on the spot. The president said just now that his guard squad is very powerful. He wants to see how strong these people are.

"Now you gather those people and let them show off. I'll see what their abilities are. I will select a small team from among these people and give them special training."

Seeing that there was finally hope, the president immediately became interested and ran to the door without stopping, but he stopped in the next second.

"See if it's too early at this time, let's wait a little longer, or wait until dawn?"

"What I'm talking about is now, and I want to call them up by means of emergency assembly. I want to see what the abilities of these guys are like."

He wanted to test their reflexes, so Qin Yuan followed them out the door after dressing up a bit. As for the Minister of Military Affairs, he stayed in the room again, and it was inconvenient for him to see other people now.

After all, I don't know where the guy's eyeliner will be. It is relatively safe here. The security outside the door has no idea what the **** they are going to do. This night is already enough.

And there was a guy wearing a mask next to him, who looked very mysterious, and everyone didn't know what was going on, so they could only follow him silently.

The president brought Qin Yuan to the place where the guard squad lived. They lived not very far away from where he lived, but only a dozen meters away.

After all, they have to be ready to protect and sprint at any time, so they live very close to each other.

"They live in this back yard, do you mean to wake them up now?"

"Haven't you all done such a test? I want to see what it is like, how many people are there, you guard class."

"I remember the last time it was reported that there were 270 people."

what! All 270 people are in this? Seeing Qin Yuan's puzzled expression, the president hurriedly explained, "That's not the case. There are only more than 50 people living here, and the rest are all outside. In case of emergency, they can rush to the hospital within ten minutes." Arrived."

Ten minutes, that is simply too slow, Qin Yuan did not show it, after all, this is a requirement for their country, five minutes is a timeout within them, the standard is three minutes.

He couldn't help sighing, the guy in front of him doesn't know whether it's luck or luck, and it's not easy to survive in this situation according to their slow-moving ways.

He didn't see Qin Yuan's expression, but let the officer next to him run over, and then blew the emergency whistle.

Then I remembered the sound of footsteps. Everyone assembled quickly from the yard. The speed was quite good, after all, it was relatively close. Generally, this kind of emergency assembly can also let them know that there will be emergencies.

Qin Yuan is still very satisfied with their speed, as for other aspects, it has to be investigated, everyone is about to complete the assembly, staring at the people in front of him with some doubts.

"Okay, now take them to the training ground. I have to see their personal abilities. Security guards like them basically focus on fighting and close-quarters assassination. How about marksmanship?"

"Don't worry about this, the marksmanship is definitely no problem, they are agents recruited from various places, and the marksmanship is secondary."

The officer next to him introduced that he was very confident in his security, and his usual training was among the best.

It's just that the officer was very puzzled, why their kind seemed so humble on this masked man, and he seemed to be asked about everything. Could it be that he was so unconfident in his own people?

Thinking of this, he even introduced, "To be able to come to us as Mr. President's personal security, there is a very strict process, their abilities can be counted on the rankings, and everyone has won countless awards. The least That guy has six awards."

Originally, he thought that he would be a little surprised when he said that a bunch of people next to him. You must know that it is not easy to get the award under such circumstances, and they are all ranked first.

Qin Yuan didn't care at all, and said that he would first look at their personal abilities before talking about it. As for winning prizes and so on, they were all fake things.

This made the officer very angry, where did this guy come from, and how could he have such arrogant capital?

Thinking of this, he hurriedly brought them to the training ground, and explained loudly, asking them to show all their strength, so as not to embarrass others.

Soon there will be marksmanship training, and their marksmanship does not have particularly rigid movements, because the training is different, mainly depending on hitting the target.

Qin Yuan kept observing from behind. Although everyone's goals were very precise and the frequency of hitting them was high, everyone in the first group had completed their goals.

The officer nodded very satisfied, this is the effect he brought out.

Unexpectedly, Qin Yuan waved his hand to ask him to change the batch. This batch was not good, which not only shocked the officer, but also stunned the security guard just now.

"I don't know what you mean by that, they all accomplished their goals."

"This kind of target is too rigid. Although their movements were not uniform just now, do you think they will stand there and hit them when they encounter problems? Change to mobile ones!"

The officer has been patient. It turned out that this guy meant this, so why didn't he just say in advance that he is very confident to his own people.

He waved his hand, and hurriedly asked someone to replace the moving target. This time, the moving speed was also very fast. Qin Tao glanced at it again, not satisfied, and continued to the next group of people.

The president didn't say anything of the same kind from the beginning to the end, which made the officer a little impatient. What does this guy mean by being an outsider pointing fingers? Even though they are already so good, they seem to be worthless in his eyes.

"Sir, I don't know where you are from, but what you said really chills me. Why don't you recognize our strength? Do you think you will be stronger than this?"

The officer's tone also tried to maintain a respectful attitude. He didn't know who was next to the president, so he just tried not to offend him anyway.

"Don't tell me that those are useless. In my opinion, it is not good, and in my opinion, I am really not satisfied. The people I want to choose are not among them. Let's move on to the next batch."

Qin Yuan's voice was very loud, and it all fell into the ears of the team members next to him. This made everyone very unconvinced. Who the **** is this guy? Came here to point fingers.

The president coughed twice, "Just follow what he said, you can go in as he says, let the people on the outside can also come in, let him choose them all, and bring all the security guards over."

"Yes, sir."

Although he didn't want to, but since the president had already delivered the goods, what else could he say? He could only make a phone call and ask everyone from the outside to come over.

It's really aggrieved to say that everyone has already hit the target and their performance is perfect, but in the eyes of this guy, they can't do anything.

After changing two groups of people in a row, the officer finally couldn't hold back anymore. There are not many people left. What the **** is he doing?

At this time, Qin Yuan finally picked out two pleasing to the eye, pointing to two people, "I really have no choice, I can only choose two out of so many people, let's continue with the rest."

The two selected people don't know whether they are lucky or unlucky, this person is too arrogant!

The officer next to him kept holding his breath, Qin Yuan couldn't bear it anymore when he denied his team members again.

"Sir, I don't know what your standard is. If so, you can show us a demonstration. I want to see how you do it. "

Qin Yuan has long seen that he is impatient, but people have directly said that he wants to demonstrate, it is impossible for him not to make a move, and he has to let them see what is really strong.

Qin Yuan didn't reach the training ground after receiving the gun, and stood behind him all the time. The distance to the shooting range was too far, and the range of the gun was simply not enough.

The officers next to him felt that he must be joking. It's fine if the range is not enough. Is it possible that this guy is playing assassination?

So he has been staring at Qin Yuan very vigilantly. Standing beside the president unconsciously, if this guy dares to make any moves, he will be the first to stand up.

And Qin Yuan took out the bullet and rubbed it on the ground next to him, and then poured out a little gunpowder. Everyone was stunned by this operation. What is this guy going to do?

When he loaded the bullet again, he shot without hesitation, and a scene that shocked everyone appeared. Unexpectedly, the bullet actually hit the bull's-eye.

Chapter 1723: Negotiation terms

The officer who was still talking just now shut his mouth instantly. How could this be possible? He hurriedly picked up the gun and checked it carefully. There was something wrong. The range of this gun could not hit such a long distance at all.

Hitting at this distance is completely a deviated route, and it is impossible to hit the target at all. What kind of operation is this?

Then he didn't believe it, he picked up the gun and fired two more shots. Unexpectedly, he didn't reach the target, but hit the iron barrel next to him.

The surrounding guards stared at each other, and the officer just now was a little confused, and he watched it with his own eyes. If he wanted to exchange money, it would be absolutely impossible.

At this moment, Qin Yuan also stood up and explained that the reason why he rubbed the bullet just now was to make the front end of the bullet sharper, so that he could block a certain amount of wind force when he hit it, and also to reduce the weight of the bullet by reducing the amount of gunpowder everywhere. Can make the range longer.

The officer gasped when he heard this. This was something he had only seen in textbooks before. It was real theoretical knowledge, but no one had ever tried it.

"But in this case, aren't you afraid of bullets exploding? If something goes wrong, just stand inside, and everything will be over."

"I know enough about these firearms, why am I afraid of exploding, and this is also for emergencies. What if you don't have suitable bullets around you when you are performing missions? How about using this method? I am persuasive enough Alright."

This officer admired him very much. He was silent just now, but now he took the lead in applauding. No wonder this guy was able to come here with Tongzhong. It is also a well-deserved reputation, and it is really a master who hides his secrets.

After seeing Qin Yuan's demonstration, no one complained. Everyone began to show off one after another, hoping that they could be selected. If they can be guided by such a person, their abilities will definitely be greatly improved in the future.

As for the president, it's even more of a problem. He wished Qin Yuan could choose more powers that could improve himself, but Qin's azoospermia had very high requirements. There were more than 100 people to choose from, and only five people were selected in total. .

This kind of choice didn't end until dawn, and the president yawned next to him, "It's really been a toss here all night, what do you say now? Or let's go back first, and we will deal with them after the rest." Let's train."

"I won't go back, you can go back first, remember to take good care of my daughters, I will give them special training recently, and try to make changes to them within 15 days."

He spoke so loudly that the guards next to him could hear him, 15 days! How could this be completely too embarrassing?

It sounds incredible that 15 days can make them stronger, after all, many things are uncertain.

Afterwards, the president also had many questions. He quietly took Qin Yuan to the side and asked if that guy would come back during the process, that is, the fake military minister.

"Now we have to think about countermeasures. Although you have been training here for 15 days, it is not very long, but what if that guy comes back? Wouldn't he be discovered?"

"Don't worry, I've made all the preparations. I found something in his computer files. He should have gone there to establish another organization, and he won't be back until at least a month later."

"Huh? Why didn't you tell me about this before? It made me worry for a long time."

"There are some things you don't need to know, just turn a blind eye and close your eyes. Besides, I am the one who actually implements it."

Always very helpless, but what can he do, the man in front of him may finally fulfill their hope, and Qin Yuan also put forward another condition.

"But I won't train them now, let's talk to you about something first. The business must be negotiated, and this cooperation can continue."

Hearing what Qin Yuan said, the president immediately had a bad feeling in his heart. This guy is always so mysterious, and he tricked him a lot last time.

"Otherwise, in order not to delay your training, you should train first

, we will talk about it after the training is over. "

"This is not acceptable. I am a businessman. To do business, I have to discuss in advance what is going on, and then we will continue."

The president was very helpless. It seemed that he couldn't hide from this situation, so he could only nod his head in agreement. Soon the two came to the office. Qin Yuan was still very formal, and the president next to him was almost too sleepy to keep his eyes open. After all, it's been a toss all night.

"I said big brother, can you hurry up? I really want to go to bed now, and your daughter didn't worry last night."

"I have to write it down clearly for you in black and white, and you will do it when you understand it, right?"

President always felt that he might have to do a bloodletting, how could this guy not be like this?

"By the way, I remember that there is more natural gas in your country?"

"What! You want to get my idea of natural gas, which is absolutely impossible. Besides, what reason do I have? After dealing with it, can it be said that it will be given to you for free? You must have thought that there is no such good thing."

"Oh, calm down, don't be so excited, I'm just asking, besides, we must spend money to buy it."

They do have a lot of natural gas in country C, but now they have a complete fallout with the country of America, and now their natural gas is very sufficient.

In this case, even if it is distributed to Yan Country, it is not a problem, it just depends on the negotiated price.

Qin Yuan didn't have any other ink marks, so he directly got into the topic, "Well, you can sell us the natural gas, but the price will be 50% lower. Isn't this in the name of being friends?"

what! The president was about to vomit blood when he heard this, this guy wasn't joking with himself, he actually said that.

"You know our price is already very low, if you lower the price, how can we make any money?"

"Then if this is the case, I have to talk to you. You want me to help you, especially this one, to help you solve these problems. Isn't my price worth the gas?"

Qin Yuan began to count directly, especially when he rescued their military minister yesterday and discovered those situations, the things he has in his hands are worth the value.

"You are at a disadvantage compared to buying and selling. No, you are such a big country. I have to sell it. Once the contract is signed, I will suffer too much."

Qin Yuan made an expression of indifference and asked him to think for himself. Anyway, whenever he thinks clearly, he will go there.

"The time is that if he comes back from that month to the end, then I can't control it. Anyway, I told you about this person before. I have had some entanglements with him, but it didn't work. How much do you have?" Power, think about it."

After Qin Yuan finished speaking, he stretched, stood up and walked out. At this time, the same species did not let go, because he felt that Qin Yuan would definitely lower his head first. After all, what he asked for was still his team members. A special warfare team can be in the hands of others.

So this is also the bargaining chip for him to be able to negotiate successfully, and he can use this to convince Qin Yuan that at least he will not let himself suffer such a disadvantage, otherwise there are too many things to risk.

As time passed by, the president was so exhausted that he leaned back on the chair and took a nap for a while, and it was already noon when he woke up.

Seeing him awake, the security next to him cautiously stepped forward and asked, "Mr. President, it seems to be a guest in your room, and now I want to see you."

The president was very happy when he heard this, he knew that the guy's tone was definitely softening, so what else could he use to compete with himself, he had plenty of strength, besides, he must take the lead this time, and he couldn't be led by the nose by that guy Walk.

"Okay, wake him up, I'll wait for him here."

The president at the moment is very proud, he wants to see what Qin Yuan will say after he comes in, and he can talk about other things further down.

Just as he was plotting carefully, the man outside walked in. Although he was also wearing a mask, he immediately

Do you recognize that this is not the Minister of Military Affairs? Not Qin Yuan.

"Wait, let me tell you what's going on with you? Why didn't Qin Yuan come here? It's a very risky thing for you to come here. He told you before that you can only stay in that room."

The military minister smiled wryly below, if it wasn't a last resort, could he come to this place? He knew that the same mistakes they made before the presidency had recurred, which is called losing the big because of small things.

At present, it is best to win over Qin Yuan as soon as possible. No matter what conditions he puts forward, satisfy his request as soon as possible. He has never seen the terror of that person. Otherwise, no one can deal with that guy, only this person can.

"Sir, I have been following you for so many years. To be honest, that person's city is very deep. More importantly, the United States also has a very complicated relationship with him. If we miss this opportunity, the consequences You can imagine."

"What? Even you came here to help that guy. Have you forgotten what our identities are? I was threatened by him once before, and I have given them a lot of things."

The Minister of Military Affairs shook his head. He said that doing so now would only result in a small loss, and Qin Yuan had already said that he didn't care about that team at all.

"Impossible. He came here this time to save the team. Why did he say he doesn't care about it? It's the capital of our negotiation."

"Sir, why do you think I would speak for him? That's because I've already found out the situation, and if he really cared, it wouldn't have dragged on for so long."

This president is quite cunning, he wants to rely on his own ability to win, at least such a high negotiation standard, otherwise so much natural gas has been sent out, which makes him feel a little distressed.

But after thinking about it, I felt that doing this was really a small loss. In the end, I had no choice but to ask someone to call Qin Yuan, but this time to call Qin Yuan, he didn't come.

The guard was a little bit hesitant to speak, but he still hesitated to answer, "Sir. I don't know what he is doing. No matter how we knocked on the door, he wouldn't open it. In the end, he just said that he was sleeping. Let us not disturb."

what! This guy can really sleep. Now it's the president's turn to be anxious, so the time passed by. When the president arrived in the room, he saw that Qin Ran had already woken up, and the little girl was groaning. hungry.

"Hurry up and get me something to eat, or I'll beat you up."

Seeing the helplessness of the little girl in front of her, she could only quickly order someone to bring her something to eat, and she wanted to eat all kinds of snacks, just like that, the time came to night in a blink of an eye.

This child has a big heart, anyway, he will play after eating, and continue to sleep when he is tired from playing, until the next morning, Qin Yuan did not come out of that room.

This father and daughter are really like the other one who has been in charge of tossing the president, while Qin Yuan is only in charge of sleeping, anyway, he left the child to someone else to take care of.

In the end, the president couldn't take it anymore, so he had to invite Qin Yuan again, and asked him to come out and think of a way, and stop making such troubles, otherwise no one would be able to afford it.

Qin Yuan just started to prepare for training. Anyway, he is not in a hurry. He is very confident in his ability, and there is no problem in training such a small team. The main thing is to let them solve the problem. That's fine.

And the reason why Qin Yuan agreed so quickly was because he lowered the price a little bit, which made the previous president regret it. He knew it earlier and agreed to him according to the previous price, and now it has been lowered so much.

But the better point is that Qin Yuan finally started training with those guards, This is also a fortune for him.

Those who have been trained later can let other people continue to train, which can be regarded as learning some of Qin Yuan's abilities, at least his training methods.

In fact, if this kind of tossing is made, it is no different from calling the red blood cell team, but calling the red blood cell team will lose almost 10,000 merit points. Now he urgently needs merit points, and this is a good opportunity.

After all, he has to quickly upgrade his system. Some of the tasks he completed before are almost done, and he has also successfully upgraded the Minister of Military Affairs.

The identity was investigated, but the reward from the system has not arrived, which made him feel very strange, after all, he could no longer find the real military minister.

When he checked the system, he realized that the investigation was two-way. Not only did he have to investigate the real military minister, but he also had to investigate the fake identity, and finally the merit points would be credited.

This task is not particularly difficult, he thinks there is no problem, get points as soon as possible, and then upgrade the system to make himself more capable, and more importantly, everything he is now is speculation, guessing that the person is the masked man.

Chapter 1724: ready to enter coordinate point

All the methods are very similar, and the more important thing is that the real person behind it has not yet been found out. When Qin Yuan first investigated, he thought that the last person was the masked man.

But later he discovered that the masked man was just a ***** being used by the people above. Could there be other people who basically did not escape under his hands?

Just as Qin Yuan was thinking, someone outside called him, "Sir, our training has reached its limit, and now the temperature outside is too high, and some team members have fainted, should we continue now?"

The one who came in to speak was the officer who was very disdainful next to Qin Yuan before, but now he respects Qin Yuan very much. Since Qin Yuan showed his hands a few times, it's just that this man has been wearing a mask, which makes the officer curious about his identity.

"The current temperature is nothing, and there is only half a month. Training must be strengthened to let them adapt to this temperature. The place we are going to is worse than this."

"Ah? Where are you going? I haven't been notified yet."

"It's not you who go, but I will lead it personally. You don't need to know about this matter. Your president has already explained it. I will follow this process for everything."

The officer heard this and walked away silently. These 15 days were really too much for the President. After all, Qin Ran was with him all the time.

Moreover, Qin Yuan also discovered that many of his daughter's skills are stronger than his own evolution, and he was slowly enhanced through recycling before.

Now he finds that his daughter can directly contact him, and then there is a situation of replication, which may be discovered by the child unconsciously, but he has no judgment.

Moreover, something that worried him happened during this period, that is, his daughter had no control over her abilities, and when she was playing with a security team member during the day, she almost dropped that person off the third floor.

A six-year-old child doesn't understand these principles at all, she just thinks it's fun, and she is watching cartoons, just like usual, at this time Qin Yuan walked in, and Qin Ran quickly ran towards him.

"Dad, you're back. You've been so busy recently that you don't have time to spend with me."

Unexpectedly, Qin Yuan ignored her acting like a baby, and looked at her seriously, "You know, I have said many times that you are not allowed to show these things in front of outsiders, especially if you deliberately show off. I don't like this very much. behavior."

"Dad... I, I didn't..."

"You don't have anything. Are you afraid to admit what you have done now? I don't like this kind of lying child. You know that your ability is almost enough to kill someone. Do you understand?"

Qin Ran was stunned. She didn't expect her father to be so angry. She usually seemed to respond to everything she asked for, but now this trick didn't work, and her tears flowed down. Seeing such a serious Qin Yuan.

"Don't cry for me, hold back your tears. I can't understand this. It's obvious that you did something wrong. I'll teach you the truth now."

At this time, the president also hurried up, "Oh, that's not the case, the child was still young, he didn't know, and although I couldn't understand what you were talking about, the child didn't mean to Yes, your daughter is quite special."

However, in the next second, the love was directly on his face, he didn't talk, and he really educated the child. Although it was a trivial matter, she didn't take human life seriously at all, and didn't know death at all. Maybe it was because everyone let her go before. .

They all protect her too much, and her identity, especially Qin Yuan's identity, everyone values her very much, and everyone is pampering her, which makes this child a little arrogant.

After being told by Qin Yuan in this way, the child also lowered her head. She seemed to realize her mistake, and finally went to apologize to the security guard in person under the leadership of Qin Yuan. This was the beginning that the President did not expect. The guy is always so arrogant. I didn't expect that he is quite strict in education.

Qin Ran was indeed taught a good lesson. She understood what it meant to make a real mistake. In this case, her so-called super powerful abilities would almost kill or injure others.

On the other side, Qin Yuan, watching his daughter fall asleep, fell into deep thought. He must speed up, get all the points as soon as possible, and upgrade the system so that he can control the system better. At least let the child be sensible. Let her system open later.

Otherwise, it is really a very dangerous behavior in the society or in the school, and she will hurt others unconsciously.

Qin Yuan came to the training ground and saw that their effects were almost the same, but now he had just trained for 13 days, and he felt that he couldn't wait any longer, he had to go now, he had to figure out the situation.

Now there is no need to worry about one more day or one less day, anyway, let's set off directly, thinking of this, Qin Yuan directly took the five team members and set off secretly.

According to the previous coordinates, they arrived nearby in a helicopter and landed a little bit, and then went on foot, but Qin Yuan looked at the current situation and had to adjust the distance further. If it was a masked man, he had to be cautious.

The helicopter was driving normally, and according to Qin Yuan's remarked coordinates, it would arrive in ten minutes.

At this time, the driver in front found that something was wrong. According to their previous test, there must be no problem, but the weather is not particularly good now.

The pilot hurriedly called Qin Yuan, "Sir, hurry up and take a look. Now our plane has completely yawped and the situation is not very good. It seems that we can only land nearby, but there are no landings." Place."

The landing point that Qin Yuan chose before would be closer, because he thought he was the Minister of Military Affairs, and it would be no problem for ordinary people like that.

After thinking about it, he still made a risky decision to let everyone parachute here. With such a strong wind, several team members looked at each other in blank dismay.

"Sir, are you sure you want to parachute here? The wind is not particularly good now. My suggestion is to land in a safe place, otherwise we will also miss the target."

Qin Yuan didn't say much, and put on the skydiving equipment directly, and motioned for them to go down first to position them, and the rest followed.

Several team members were cursing on the plane, watching Qin Yuan jump down, they had better do something, they could only act according to his coordinates.

"I am really not afraid of death. In such a strong wind, he dares to jump first. If there is any problem below, no one can save him."

"Forget it, this is his choice. Anyway, let him go down to find the way for us first. This guy is really desperate."

After a few minutes, I only saw a general sign on the landing below. The circle was safe, but there were a little low bushes, so the problem was not too big.

This is the Amazon jungle, and Qin Yuan is more cautious. If one of them falls directly on the swamp, the whole person will fall into it.

Qin Yuan is waiting for the team members to parachute, while Qin Ran is sitting in the room watching TV in a daze. After the last lesson, she is not as naughty as before.

This made the president a little uncomfortable, "It's uncomfortable for you to be so obedient all of a sudden. What do you want to play? Let me play with you, so you won't be bored here."

"I don't want to play. I just want to wait for my dad to come back. He should be very dangerous. I can feel his nervousness."

what! The president was stunned when he heard this. If it was other children, he would definitely feel that he was bragging.

But this is Qin Yuan's child. With such a long distance, they are very far away from the Amazon jungle, so they can feel the tension.

He asked again uncertainly, "What do you mean? Can you feel his emotions now?"

"Yes, he's a little nervous. He should be worried, as if worried about other people."

The president opened his mouth even more in surprise. Could this be the legendary blood connection, but it's too exaggerated.

The current relationship is tense because one of the team members made a mistake in parachuting. The wind in the air was too strong. One team member deviated completely and landed directly in another lake. He looked down and found that the lake was fine. question.

However, in the next second, they saw a surge in the lake. Unexpectedly, there were crocodiles. The team member quickly cut the parachute rope with a knife and quickly swam towards the shore.

But the crocodile was even faster than him, Qin Yuan frowned, and now the team could not suffer any losses, his speed was so fast that it exploded almost instantly.

Before the people around could figure it out, he had already rushed to the middle of the lake, and then punched the crocodile directly on the mouth.

The team members who fell into the water just now were completely stunned. This kind of power is too terrifying. Just one punch completely knocked out the crocodile, and the crocodile turned over on the spot with bare hands.

"Why are you still standing there, hurry up, you don't think there is only one crocodile here, do you?"

The reason why Qin Yuan didn't use the knife was because he didn't want to smell blood, and it would attract more people, which would be more troublesome. He was fine, but the one next to him was a burden.

After a while like this, the two finally reached the shore. The team member wiped the water off his face and said thank you.

"You don't need to thank me, you have to pay attention to your own body control, as long as you don't drag your feet later, you can do it according to the goal we asked for this time."

After Qin Yuan finished speaking, he stood up and sorted out his equipment, and everyone hurried over to get the team member to start off.

In this primeval jungle, everyone walks more carefully, except for wild animals.

The more important thing is to worry about getting lost, but the team members in front found that Qin Yuan was leading the way, and they never looked at the map or any indicators.

This made him very curious about what this person used to judge the direction, especially after they entered the Amazon jungle completely, the whole jungle was very dense.

Some places could not even see the sun, and everyone walked in the jungle like this for more than an hour, Qin Yuan signaled them to rest for a while, the closer he got to that place, the more cautious he was and had to observe carefully.

During the break, one of the team members couldn't help it all the time, "Sir, I can't figure it out, how did you do it? You don't have a map, so you just take us away like this?"

"Who said I don't have a map? The map is all in my head. I don't need that kind of paper thing at all. I remember all the routes and all the coordinates."

what! A team member who was drinking water was also surprised, his memory was already strong enough, but the person in front of him was even more exaggerated.

It is easy to get lost in this kind of dense jungle. Even the team members who are amazing in combat have to stop and re-observe, but they walk very fast along the way.

Qin Yuan's judgment is indeed strong. He said that if they walk at their current speed for another two hours, they should be there.

Everyone followed him and continued to walk forward. When they got closer to that coordinate point, Qin Yuan's speed began to slow down.

And let them pay attention to the movement around them at all times. Just when they stepped into another jungle, Qin Yuan turned around and threw the throwing knife out. The people behind were stunned by his operation.

After all, from their perspective, it felt like Qin Yuan was throwing knives at them, and in the next second he saw something falling directly from above.

I only saw a drone the size of a palm. I didn't expect that there was such a thing in the same name. Several people surrounded it curiously. Qin Yuan immediately conducted a systematic analysis of this thing.

This is a small nano-drone with a unique chip inside. This chip can be used for identification. It has a professional value for identifying relatively large animals, such as humans.

During this value period, it will be detected by the chip inside, and then uploaded synchronously.

This masked man is really very cautious. Electronics have been arranged in this place, but Qin Yuan's speed is very fast, and he destroyed the chip immediately before he was discovered.

"Sir, but you just said that this thing is for uploading data. If we destroy it, wouldn't others also find it?"

"There is nothing wrong with this situation. I just destroyed its chip so that it cannot be uploaded, but its positioning has always been here. It will be fine to make a disguise later."

After Qin Yuan finished speaking, he took out the nearby branch and inserted it into the chip hard, erasing all the traces just now.

Then they climbed up a big tree and hung the drone in the middle of a tree branch. The team members were stunned. They didn't dare to do this kind of number. Unexpectedly, Qin Yuan would have no problems after going up.

Chapter 1725: meet squad members

What he did was more realistic. Even if the man behind the control found it, he just felt that the drone had hit a tree trunk, or was hit by a flying bird.

Because the tree trunk is so brittle in this case, normal people can't climb it at all, and it's still placed at such a high position. Qin Yuan took out the chip in his hand and told them to be careful. I don't know how many more.

This time he found that this opponent was more difficult to deal with, many things were more cautious, and more high-tech things were added, so he could only keep on guard.

Qin Yuan led his team members towards the front. According to his previous speculation, it would take an hour and a half to get there. However, after walking for more than three hours, they still hadn't arrived. He felt a little strange.

He has repeatedly confirmed the coordinate points, but there is nothing there, except for the coordinates marked before. He took out the instrument and scanned it. There is indeed no problem, but something is wrong.

So I took the team members to go around some roads to investigate around, but no matter how I walked, it seemed that I could return to that coordinate point, but the position on the coordinate point was wrong.

Repeatedly like this, the team members have become a little impatient, in their view, this is completely tossing, everyone said from the beginning that they don't need the map, but now they confirm it again and again, causing so much trouble for everyone .

"Sir, I think it's better for you to confirm first. We have been walking for so long. From the time we first parachuted to entering this place, we have been walking for more than five hours. Why haven't we arrived yet?"

Qin Yuan shook his head. He said that he didn't know. According to the coordinates on the computer, it was near here, but it was wrong. No matter how he searched, he couldn't find it. At first, he wondered if it was buried underground, just like before. .

But at the coordinate point, he basically excavated all the suspicious places, and there was nothing, that is, it is impossible to build a base on ordinary land, and there are no traces of life around.

If the fake military minister wanted to establish a military base in this place, he would first have to use a lot of manpower and material resources. As long as people live here, they will definitely leave traces, but there is nothing.

He looked impatient with some players in the team, so don't let them wait there, go out and have a look by yourself.

And these players didn't have much relationship with him at all, they were just brought here to join the team forcibly. Although they had undergone special training for a few days, their relationship was not that deep.

After a day of tossing around and taking the helicopter again, everyone quit after hearing this. Some people would rather go alone, while the others sat down on the ground and prepared to rest.

A team member with a beard was swearing. Although the sun can't penetrate in the Amazon forest, the surrounding humidity is very heavy. After walking a few steps, the body is already wet with sweat, and the clothes are completely attached to the body, which is very uncomfortable.

"Damn, I really don't know what this guy is thinking. He took us around on purpose. Did he think we were here for a tour?"

"Forget it, let's not say a few words, that guy is also very powerful, have you forgotten the consequences of someone provoking him before? He left, and even his own father couldn't recognize him."

"But the point now is that only he knows the way. If we don't follow him, we won't be able to get out from here at all."

"Old Hei, I think you are really obsessed with ghosts. Are you on his side now? You can figure out the situation. We are a couple."

The person called Old Hei raised his head and looked at them, then shook his head helplessly, because he knew what a real strong man was. Although he didn't know the identity of this officer, his ability was really so outstanding.

And Lao Hei found that they didn't deviate from the direction along the way. This kind of situation is absolutely impossible to walk randomly. He can only record all the maps in his head as he said. Such a person's memory is too scary.

He had no choice but to stand up and let the others take a good rest. He went to stand guard and be on guard. This was the rule set before. No matter how many people rest under any circumstances, there must be someone standing guard.

A team member named Inch Tou next to him was a little dissatisfied with Old Hei, "You are the only one who thinks about you all day long, and you always like to be the first bird. Since you like standing guard so much, then you go alone."

Lao Hei shook his head helplessly, what they said is that they are in the wild now, in order to ensure everyone's safety, everyone must work together.

Qin Yuan didn't know the situation on their side at all. He was still searching for this coordinate point, but he almost ran half of him from Lin. Without the burden of those team members, his speed was very fast. Shuttle between the big trees non-stop.

But let alone what kind of base it is, he hasn't even seen a living person, so he wonders if the coordinate point is a lie.

After searching for any clues, he couldn't find any clues, so he could only give up and go back. Just after returning, he heard several team members complaining. After all, it was almost dark now, and they still didn't find any coordinate points.

Qin Yuan was not used to them either. Although he said he brought them out, he said there were a lot of them and that he was leading the way indiscriminately.

As soon as he walked over, he heard the voices of several people stop abruptly. Old Hei was standing not far from him, on guard. Hearing the movement, he looked over vigilantly.

Among these few people, he was most optimistic about this old black man. He was a taciturn person, and he would not say too much about anything. He basically followed orders and was very strict with himself.

Old Hei saw that Qin Yuan had come back, and greeted him, and the two of them walked back together. He looked at the people sitting across from him and briefly explained the current situation. At present, he has not found the exact coordinate point. So I have to live in this jungle tonight.

The backlog of the one who talked the most just now broke out at this moment, "I don't know what the **** you are doing, you have to figure it out, this is the Amazon jungle, you let us all stay here tonight, then how should we live!"

"Everyone must obey orders and arrangements. I brought you out, and I will definitely take you back."

Qin Yuan simply left a sentence, didn't talk to those people, just found a big tree to lean against, and was about to close his eyes and rest his mind. What he saw was a few people stunned. What does this guy mean?

From the beginning to now, I haven't told them the specific tasks, and I don't know anything, including what they are going to do this time, and I don't even have an action code.

Although some things are absolutely confidential to them, the current situation should not be like this. The few of them feel that they are probably lost. The more this situation is, the more they have to speak out so that everyone can face it together. .

A few people were discussing countermeasures in a low voice. As the sky was getting darker, Qin Yuan was actually very irritable. He didn't know where the guy was, and he was hiding in the jungle like a ghost.

It was that cropped head again, he looked at the people around him, touched his belly, and then smashed the compressed biscuit in his hand on the ground.

"Fuck, I really don't know what you guys are doing, do we have to eat this broken biscuit here? There must be some game in such a big jungle, I'll go get something."

Qin Yuan just glanced at him slightly and said in a cold voice: "Sit down! Don't move around, if I were you, I would never do that."

"I think enough is enough. I think you are simply lost and lost everything. Don't tell us anything now. We must have a right to know, and this night, the temperature drops at night, You won't let us light a fire."

"I found out that you don't have any common sense. Isn't lighting a fire at night exposing yourself? Sit down immediately. This is my last order."

Cun Tou was frightened by Qin Yuan's aura. He didn't realize that the person in front of him was a real dangerous person. These security personnel had actually undergone special training. They knew what was going on, but they just wanted to provoke them now.

He wanted to see if he could leave. After all, if he really lost his way, he didn't know how long he would stay in this place. In his opinion, it was a waste of time, and he didn't know the specificity of the task.

As the night fell, Qin Yuan began to disappear into the darkness. He knew that these people would not be too far away from here. If Lao Hei was around, he would feel at ease. Now he has to go and see at night, maybe he can Find any clues, after all, even drones can find them.

However, after searching around, there were no clues. Qin Yuan suddenly thought of the drone in the daytime. It would be better to go there and find some clues from the person who recovered the drone.

But when Qin Yuan came to the place where the drone was during the day, the drone was still there without any trace of being moved, which made him feel a little strange, why no one came to recover the drone, the first time If the problem is patrolling near the base, they should find it.

The whole jungle was very quiet, he didn't see any other clues, and he was willing to stay here and wait for the rabbit. It wasn't until dawn that he heard a movement in the distance.

When he saw the people walking over clearly, he was stunned for a moment, because he remembered the faces of these people very clearly, it was the missing team, especially the leader in front, he remembered He Jun.

He has been looking for this team, but at this moment they came to the tree leisurely, and then took out the equipment to start testing. After a while, they found the drone hanging on the tree.

These few people did not communicate too much. Instead, they were not familiar with each other like a temporary team. Qin Yuan took a look and found that there were four people in total, and the system also issued a reminder alarm. They all passed remodeled.

Just when Qin Yuan was about to make a move, he suddenly thought that this side is so cautious, could it not be a trap in this place, if he moved one of them, would there be any problem?

Thinking of this, he was not moving here, but silently lying beside him, waiting for them to take down the drone. The tree trunk was very fragile, and he was careful enough when he went up.

However, these have also been modified, and their physical fitness is also super strong, so they quickly got the drone.

This person did not communicate at all, and did not give any action instructions to each other. They glanced at the channel, and the drone carried out a detection later, and then left. Qin Yuan quietly followed behind them.

The team on the other side had just dawned, and Lao Hei had been standing guard at dawn, and he also dozed off a little. When he opened his eyes, he found that it was already dawn, and he was shocked for a moment.

This is the Amazon jungle. Many criminals will trade in this place. If they are not careful, they will be silenced by others, especially the tactical camouflage they wear, which is simply too conspicuous.

Lao Hei hurriedly woke up the other people. He was basically on guard this night, and he couldn't hold back until dawn and fell asleep.

After several people got up, they checked that there was no special situation, but Qin Yuan was not there.

Cun Tou yawned, and continued to lie beside him, "You don't care what he does, who knows where he's going, and the feet are growing on him, so we can't control him."

"That's not the case, do I think I will encounter any danger?"

Lao Hei usually considers things based on the analysis of the situation. Qin Yuan is very cautious, and usually he will not leave without saying hello, and in this case, he does not know how long he has been away.

It's all broken pots, since the chief didn't come back, let's continue to rest until the sun is fully out, and Lao Hei looked at his watch and it has been more than half an hour.

Qin Yuan hasn't come back yet, He is getting more and more worried that the team members next to him plan to search together, but no one pays any attention to him.

Cun Tou was gloating beside him. There are many unknown dangers in the Amazon jungle. Who knows what he encountered when he went out last night, or this morning. After all, no one knows.

Old Hei can only cheer them up, that is the leader of the team, if the leader is not there, they have no way to explain it, and more importantly, no one knows how to get out. Once this is said, everyone will take action , and began to search separately.

Cun Tou was forced to be in a group with Old Hei. He just wanted to be lazy, but Old Hei was very strict, not only monitoring everywhere, but also squatting down from time to time to find clues.

"Can you stop being so serious, everyone is just pretending, and you insist on being the boss here."

"I just want to know that my behavior is to ensure that I can survive. He is the only leading officer. Without him, we can't get out. Without a map in this Amazon jungle, it is equivalent to losing our way."

Chapter 1726: Mask Man's Conspiracy

Even if there is any danger, his submachine gun can delay a lot of time, and even if most of them are pretending to be criminals, they will probably take a detour when they see them, because they don't know the exact number of people.

Thinking of this, Cuntou was even more proud, and pretended to look for it at the side, but as time passed, everyone returned to the meeting point, and no one was missing.

Cun Tou immediately stated that they could return to the team immediately, "Look at the current situation, we don't even know whether the captain is alive or dead, and the leader of the team has never told us about the mission situation from the beginning to the end, we can directly choose Return to the team."

"What you said is simple, but who will take us back to the team, we don't know the route at all."

"Hehe, is it possible that it can still kill people? If you find out the direction, you will always get out of this jungle. What's the big deal?"

Cuntou didn't think so, and the others couldn't do it when they looked at the situation, but Lao Hei kept telling them not to act rashly. The most direct way now is to stay where they are and wait, and lead the captain to go out with them. Maybe he will have other things. arrange.

Cun Tou had already disliked Old Hei before, this person had been doing things against him, and now he took the opportunity to retaliate, because the other people were completely listening to his arrangements, and everyone didn't want to follow him for a long time.

Now taking this opportunity, they all plan to go back, "Old black, I don't even know which side you are from, you should think about it for yourself, maybe he just left us and left, we all can not say it clearly."

"That's absolutely impossible. Don't forget, he was sent by Mr. President himself."

Cun Tou was a little worried when he heard this. Anyway, he was still worried that he would be scolded when he went back. After all, he didn't do anything now, and he just made it like this. Whoever it is, he can't accept it.

Especially after going back, it is not easy to explain. Although he is not convinced, he can only sit on the spot and wait here.

At first, he was quite patient, but when the time reached noon, everyone was impatient, and Lao Hei was also very anxious, but he still insisted on that principle and waited here for the officer.

Cuntou really couldn't take it anymore, thinking of going back to be punished, it's better than being in this broken jungle, he just turned around with his equipment and was about to go outside, but Lao Hei held him tightly, telling him not to move around You are very dangerous inside.

"Don't give me this trick, that trick is still effective for you to deceive children, look at the guy in my hand, and what is the waist?"

He did bring a lot of equipment this time, which is also his confidence. Seeing that Lao Hei couldn't persuade him, he could only let go. Seeing this state, several other people also followed the inch and left. They felt that they would stay here tonight. Doomed to be frozen again.

The last few people met and left together. Only Lao Hei sat there and waited for Qin Yuan, and Qin Yuan also followed those team members. They went through the jungle completely, and then came to an open place, where they called through the walkie-talkie Headquarters support.

Qin Yuan thought that the base should be nearby, but he didn't expect that they sent helicopter support. Several people came here to pick up the equipment of small drones. This is also the strategy of the masked man, probably for monitoring.

Seeing this, Qin Yuan is very sure that he is definitely being tricked, especially the things in his data. This guy is too cautious and redoes everything. The real and the fake are mixed together.

Fortunately, when he was working on the drone yesterday, he deliberately saved his hand, otherwise there would be nothing he could do in case of an emergency, and the masked man would definitely know about his actions.

If they used other means of transportation, Qin Yuan could still keep up, but this helicopter could not do anything. In the end, they could only see a general direction, and finally left with a sigh. It seems that if they want to find the masked man, they still have to wait for the opportunity. Wait for the fake one to show up.

Going back and forth like this wasted a lot of time, so when Qin Yuan returned, he found that Lao Hei was the only one in the entire meeting place, and Lao Hei was also very excited when he saw him.

"Sir, you are finally back."

"What's going on now? Why are you the only one, where are the others?"

He hesitated, and originally wanted to excuse the other team members, but he couldn't escape Qin Yuan's eyes. This was obviously a desertion behavior, completely disorganized and disciplined, which was absolutely forbidden in Qin Yuan's career.

Lao Hei was also thinking about his team members, he looked at Qin Yuan, "They didn't mean it, they should have set off to find you, I'll stay here and provide information."

"Who do you think will believe this kind of deception? It's very dangerous from within you. It's best not to break this group of guys. If my good deed is discovered by others, no one will be able to save you."

Qin Yuan didn't talk to Lao Hei anymore, but asked about the direction they were going before, and started to set off there, he wanted to take those guys back before they were found.

His speed was very fast, Lao Hei followed behind almost at the speed of a trot, Qin Yuan deliberately slowed down, otherwise Lao Hei would not be able to keep up at all.

Just as the two of them were looking forward one after the other, there was a burst of gunshots from the depths of the jungle, and Qin Yuan secretly screamed that something was wrong, these guys really shot, and this completely destroyed his own body plan.

He didn't care about Lao Hei now, and rushed to the place where the gun was shot at a very fast speed. When he came to that place, he was also shocked by the scene in front of him. He only saw a dead body lying on the ground beside him. It was the few teammates he brought.

But at this moment, Cuntou turned pale with fright, and stood still, not daring to move. The corpse of the person next to him could be the militants nearby after seeing the equipment.

Talking personally, he stepped forward and pulled a team member, "What are you thinking? Have I told you not to shoot, and if you still shoot in this situation, are you afraid that you will not be exposed?"

But the team member shook his head. He said that when they came, the body was already here. They just shot to determine the location of the mine, because there was one under the foot of the inch head at this moment.

Those guys are also a bit back, they just started to strangle together after they left Qingyuan, the Amazon jungle is full of armed criminals, this is their natural trading place, so they will also set up some minefields to avoid .

The few of them just entered the minefield by mistake. They didn't know it at first, but when Bunny stepped on it, he noticed something was wrong.

Because he heard a sound, which was the sound of the mine being activated, and it would explode completely as long as his foot moved a little.

At that time, Bunny only discovered this situation when he went to check the corpse. He wanted to see what was going on.

Qin Yuan didn't even bother to look at it. After all, it was their own mistake and they should pay for it. He took out a dagger from his bag and threw it in front of them.

"Do it yourself. You should have no problem with mine clearance. This seems to be one of the things you must learn."

"Sir, but the mine he stepped on is not simple. According to my analysis, it should be that you had a fight with Aite in country D. The leftovers are basically wreckage. The sensitivity is too high. There are many things. are all corroded."

Qin Yuan heard him say such a long list, and glanced at him slightly, "I don't want to hear the rest, I just want to know if you can sort out this thunder?"

The team members all looked at each other. The best deminer was the little man in the team. He shook his head. He would definitely not dare to touch this kind of mine.

Seeing the attitude of his team members, Cun Tou was already standing on top and cursing, "No matter what you do today, you have to discharge this mine for me, otherwise I will let go of my feet now."

The guy actually started to threaten his teammates, holding a certain idea, Qin Yuan snorted coldly when he heard this, he was not very capable, and he was threatening his teammates, but it was a routine.

All I saw was that Qin Yuan took out the knife, then squatted down, carefully scraped the dirt on it, and then confidently pried the knife down.

It took only a few seconds, and then he stood up confidently, clapped his hands, "It's all right, it's resolved, you can move now."

Cun Tou was dumbfounded when he heard this, this guy is not suitable for him, just kidding, just saw him squatting down for a few seconds, and he got rid of the thunder, how is this possible?

"Let me tell you, I know you are very dissatisfied with me, and I have contradicted you before, so you want to take revenge on me like this, don't you?"

"I don't know what you mean by saying this. I have cleared the landmines. You can leave now."

Seeing that he didn't look like he was joking, Cun Tou was a little hesitant, and the next second Qin Yuan kicked him directly in the waist.

His body rolled forward involuntarily, and then panicked, and several people behind him ran away at the same time, but there was no explosion sound after a long time.

It was replaced by Qin Yuan's sneer, telling them to leave quickly and not to stay here. Fortunately, there are other criminals' corpses. If he really delays his plan, he will not let any of these people go.

Now Qin Yuan didn't get any clues. Instead, he saw the transformed team member. They became disrespectful and completely devoid of any emotion, just like robots.

This time the mission ended in failure, because nothing was found. Originally, he had made sufficient preparations this time, and even set up such a small team, but found nothing.

After he went back, he saw that the military minister took the lead and asked him to go back to the hut. Although the military minister was not happy, he knew that the problem of Qin Zongzi had not been solved and could not be exposed, so he had to go back there again.

The president is worried. After all, many things have been changed after the military minister was replaced, especially the videos below. I don't know what they were brainwashed into, whether they are still loyal to him, and a series of questions.

Originally, he thought that he would never fail to talk this time in person, but he didn't expect that even Qin Yuan didn't catch that person, and he became more and more flustered.

The moment he saw Qin Yuan, he got angry for no reason and threw the cup on the table.

"As far as your business is concerned, do you still want me to deliver natural gas to you? Let's think about that later, and if you want to get natural gas, then give this person to me completely."

Qin Yuan didn't know how this guy had the confidence, he didn't have to help with this job.

"Please figure out your own attitude. I'm just helping out, otherwise I don't want to take care of your affairs at all. When the time comes, I will take my teammates and leave, and you can do whatever you want."

"you!"

The president was speechless for a long time when he heard this, and he shook his head after a long time. He just felt that what he had done was a failure, especially during this period. After their verification, the fake military minister had already A lot of money was embezzled from the treasury.

The whereabouts of the money cannot be recovered now, because most of it is used to build laboratories, but the problem is that such laboratories themselves violate ethics and morals.

The transformed soldiers couldn't bear such high-intensity skills at all, so they had to use drugs to maintain them continuously, and the side effects were even greater than before.

One of Qin Yuan's more distressing problems now is that he is still short of 20,000 merit points. He used a hypothetical method to guess in the system. He guessed the masked man, but the system decided that this answer was not suitable, so he asked Qin Yuan to answer the real one. behind the scenes.

If this guess is successful, then there is no problem. You can basically get this merit point. He took the lead in upgrading, and then shut down the child's system.

Recently, he has been waiting in country c, as long as the fake military minister appears, he will directly start here, but this time is different, that is, he is more worried about the fact that the child is with him.

Qin Yuan thought that the child's safety was the first thing to be guaranteed here, so he could only explain to Qin Ran that if he encountered any dangerous situation later, let her take the lead in protecting himself.

Qin Ran looked at his father in bewilderment, because he said before that skills should not be used under any circumstances.

"This time I allow you to use skills. When there are special circumstances, I told you that you can only trust me. There is also an exclusive code between us. If you don't match this code, it must not be me."

After all, Qin Ran is only a six-year-old child. She understands what she hears, and doesn't know what it means. The two of them decided on an exclusive password. If they can't answer, then they must not be their real father. It was what Qin Yuan explained.

Qin Yuan was worried about some special situation later on, he couldn't care about his children, so he could only do this, and with his daughter's system ability, it was more than enough to protect himself.

Chapter 1727: thread break

Qin Yuan was busy explaining to his daughter, but the team was a little restless. They didn't know what they were going to do before, but they were required to take confidentiality measures, and everything could not be disclosed to the outside world.

But this position is different. Although he is a security guard here, he is also a drinker. He usually likes to brag when he drinks. He didn't encounter anything in the Amazon jungle, but this guy couldn't help being questioned by others.

In a few words, this matter was revealed. The next day most people knew that the place where they were going to perform the mission was in the Amazon jungle, which was very different for most security guards.

After all, they have always been with Mr. Tong, and they have no chance to go out. They didn't expect that the place where they went out to perform the mission was in the Amazon jungle.

So they all asked a few more questions, and Cun Tou even added fuel and vinegar, telling what happened to them.

The next morning, this guy was lying drunk on the bed when he heard the door being kicked open. He was very unconvinced. Since the period of training by Qin Yuan, their team can be said to be completely independent .

The President said that they are given special privileges, and they are completely under Qin Yuan's management. Now that Qin Yuan doesn't look for them, they basically don't have much training.

"Who is it? Are you looking for death this early in the morning?"

After yelling these words, the people behind Qin Yuan were a little surprised. This guy must be too courageous. He dared to scold him even if he didn't see who was coming.

Cun Tou was lying on the bed with half-closed eyes, a pair of shoes were thrown directly at him, Qin Yuan was not used to him, he turned sideways to dodge, and then stepped forward to tear the person off the bed.

This guy was about to swear, when he looked up, it was Qin Yuan who was so frightened that he didn't dare to say anything, and hurriedly got up from the ground.

"Drink some dog pee and you can't control your mouth. It seems that you don't need to stay here any longer."

"You! What are you talking about? Who do you think you are?"

"I made it very clear that I am your team leader this time, and all actions must follow my orders, but now you are making your own claims and spreading all the things, do you think I am looking for you? doing what?"

Cun Tou was a little flustered when he heard this, and he quickly recalled that he did drink a little too much last night, so he didn't quite remember what he said, and he had just sobered up until now.

But even though this guy knew that he had made a mistake, he still looked unrepentant. After all, he felt that only himself could punish him here.

"Okay, even if I said something wrong last night, you are not qualified to manage me here. I also have my own captain. You are nothing, just leading the team for training."

"Then I'll show you what a team leader is."

The captain next to him is going to grow big when he hears this. If this guy wants to die, don't drag himself into the water, because he knows that the president was already furious when he found out about this this morning.

All the people around were implicated, especially those who drank with him. The news was immediately blocked. I just don't know how many people spread it last night. This matter is not trivial. I heard that this was originally a secret operation.

As a result, it was completely exposed by this group, and more importantly, it seemed to affect the subsequent actions.

Cun Tou was a little unconvinced, relying on himself as an old player, when he was dragged out, he was still yelling that he wanted to appeal to the captain and needed to see the captain.

The captain next to him lowered his head, how could he dare to speak, this guy didn't even see himself when he went out, and in this case, he had better avoid it.

This guy kept yelling when he went out, "Isn't it just going to Amazon City? What's the big deal, take us there, and I didn't even figure out the route..."

Before Cun Tou could finish his words, Qin Yuan slapped him on the neck, and the guy passed out on the spot, but at this time he had been dragged to another room, and now he had to be interrogated clearly.

He walked into the room and saw the captain sitting next to him, "I've already brought you here, what should you do with yourselves?"

I know about this matter, and the president is very angry, anyway, it is your own business, you can see how to arrange it yourself! "

The captain in charge of the interrogation nodded again and again. Even the boss above had been notified about this matter, so he dared to say nothing. It is estimated that Cuntou really couldn't get out alive this time, because there were too many things involved.

Qin Yuan was also very helpless. When he was looking at people, he really had no choice. That's why he chose this team. It would still be useful for him to stay behind. Now it seems like this is completely cumbersome, and he even exposed the matter.

Because the fake military minister hadn't come back yet, Qin Yuan picked up the real military minister that night, just to see what their opinions were. He really couldn't handle this matter himself, after all, he could only wait.

When the military minister heard that the other party said that the people on their side had exposed this matter, he panicked instantly. He must know that the Amazon jungle is very confidential. Will it affect him? He is very worried now.

"What do you think we should do now? If that guy finds out, none of us will be able to go around. He is very capable. He will definitely set up defenses in advance. Will he kill me directly?"

Qin Yuan rolled his eyes at him, this guy is really timid, and he has already prepared everything, "It's too late to say anything now, he definitely doesn't cover his eyeliner, but he probably won't put this Thinking about it that way, this person is very vigilant, at most, the laboratory has shifted, and he should know that I have appeared."

"That's the problem. You have no problem with your ability, so what should I do? If he wants to kill me directly, what can I say?"

I can also understand this guy's mood. He was imprisoned in that place like a lamb being slaughtered. Although he can't come out because of the plan, now that the plan has been exposed in advance, he is also struggling.

The president next to him still has a deep affection for the Minister of Military Affairs. After all, they didn't have too many grievances before, and they basically cared about the country wholeheartedly.

"Qin Yuan, see if you can take the lead in protecting him. His safety is definitely more important."

Even the President couldn't help standing up to plead for mercy. At this moment, Qin Yuan was indifferent, holding a Rubik's Cube and Qin Ran were studying it.

"You guy, I'm talking to you, did you hear me? I want you to protect the Minister of Military Affairs."

"I know what you mean, but I'm not your bodyguard. Since you want me to protect him, you have to pay more. Do you know what it means to add money?"

[Recommended, @

For weeks, there was no news of the military minister's return. On the contrary, An Ran had already made several phone calls to urge him, asking when he would go back.

Qin Yuan thought for a while, and he really couldn't let the child stay here all the time. Should he send it back or send it back this morning to avoid other accidents, but he didn't want to give up on this side, and planned to wait a few more days, if he didn't come back , it means that the plan has completely failed.

The Minister of Military Affairs felt that there was no hope at all. That guy just wanted to starve himself to death. Usually he would come back at a certain time to feed him. After all, he was imprisoned.

From the looks of it, he should have completely given up, or his identity has been discovered, and he simply left, not planning to come back.

Several people held their own opinions, and the president definitely didn't want to give up. Qin Yuan's staying here could completely guarantee his safety, so he wished that Qin Yuan would stay forever.

However, three days later, things completely exceeded everyone's imagination. Unexpectedly, the fake military minister did not come back, and took away most of their reformed soldiers.

This shocked the president very much. Their entire security system is almost empty. Many things were set up by that guy before, and now they need to be changed again.

Qin Yuan has not caught any clues so far. He has already guessed that it is definitely the masked man. Only this guy can do it. He is very cautious, smelling a little danger, and retreating immediately. That is because of his previous experience.

So now he has to prepare to leave. This guy should be the eyeliner who had been planted before, and he has already noticed some clues.

And when Qin Yuan rushed to the previous laboratory again, he found that it had completely turned into nothingness.

All the clues, all the things that were investigated before no longer exist. It seems that it is too difficult to find this guy next time, and this time is the only system task that Qin Yuan has not completed.

When he left, he always felt as if he had forgotten something this time, but he hadn't grasped it all the time. Too discreet to notice.

Qin Yuan calculated the time. It has been so long since he completely solved him last time. He probably is researching his own system skills, and he is guarding against some things.

This really knows him too well. Just after Qin Yuan got on the plane, he suddenly realized in an uproar, remembering what he had forgotten.

Because the task given by the system at the beginning was to kill the masked man, and the system had already determined that it was successful at that time, how could the system make mistakes, such mistakes occurred twice.

There is only one possibility, the masked man was indeed killed, and another person appeared. Such a person is even more terrifying. Qin Yuan doesn't know him at all, but he just stares at himself tightly in the dark.

Forced to be helpless on the plane, he couldn't contact the president in time, but he called him as soon as he got off the plane and told him to pay attention to all suspicious people around him, but no matter how he contacted, the The edge is already in an unconnectable state.

There was a vague feeling in his heart. If anyone's past president would be changed, the consequences would be unimaginable. How big is the power behind this? He can only speculate that it has something to do with the United States.

After he couldn't get in touch with the President, he could only quickly take Qin Ran back. What he has to do now is to upgrade the system, and there is still a difference of 20,000 merit points, which is more important than this, that is, what he wants Find out who's behind it.

When he returned to country C after such a toss, he found that everything had changed. He wanted to enter that place, but he didn't expect that the president's address had been moved away, and no one else knew about it.

The speed is too fast, this is what he did not expect, he can only ask the surrounding security guards, these security guards here create an illusion, making others mistakenly think that the president is still here, but In fact, the building has long been empty.

Qin Yuan knew that it was unreasonable to explain to these security guards, and he also carried out a systematic scan.

Since transfer, he thinks it is more likely to be a replacement.

He stayed here for another three days, but there were still no clues, and he could only return in vain. The problem and the few special forces who appeared at the end kept surrounding him.

He didn't know what the connection was, how those players were controlled, and what worried him even more was that the people behind it knew his skills very well after the man in the mask, so he really couldn't figure it out. Who the ***** is this person.

This kind of system ability has advantages and disadvantages for him now, just like there are many disadvantages now, that guy has made a research dedicated to confrontation. .

Chapter 1728: Southern Special Forces

When Qin Yuan came back, he found that there were special guests in the brigade, and their license plate numbers were deliberately changed.

This is also to hide their identities, so the people who came must be not simple. Qin Yuan just came to the playground when he saw Li Erniu trotting all the way, running towards him.

"What's the matter with the people in the office? As I said before, I don't like to touch these things. Shouldn't they go to the big team?"

Because the special operations team is now divided into two brigades, Qin Yuan generally doesn't deal with these matters dealing with the higher-ups, so the dealings are all handled by Gao Shiwei, who is usually in charge of training and execution. Task.

"Brother Qin, you don't know that they have already come from Dui Gao, and they are here specifically to find you."

"Oh, do you know what it is?"

"I'm really not sure about this. They haven't said anything since they came here. You know, we don't have the right to ask, but I think those people have a very aggressive attitude."

Li Erniu is usually not good at speaking ill of others, but now this situation surprised Qin Yuan, he turned his head and looked.

"Hey, what is the origin of these people? Even you are a little dissatisfied, don't you know anything about it?"

"How can we not know the details of their arrival just now, and we knew it was from the special forces team from the south. When we came, we thought they were here to kick the gym, but it turned out that it was not like that."

Qin Yuan walked towards the inside while talking with him, and when he came to the office, he saw these three people in total, wearing the same uniform and hairstyle, and the man sitting in the middle stood up after seeing him.

He only felt that this person was somewhat familiar, but he couldn't remember where it was for a while, as if he had seen it before, but he was not sure.

Before Qin Yuan could speak, the man who stood up just now greeted first, "Hi, Captain Qin has heard your name a long time ago. I am Chen Ou, the captain of the Tianxin Special Forces in the south."

It was only then that Qin Yuan remembered, no wonder he felt that the people in front of him were so familiar, he had been to the tank brigade in the south before, and he had heard that there was also a special warfare brigade there, but he never had the chance to go there.

At that time, he deliberately inquired about the name of the captain. This captain is not simple.

Moreover, Gao Shiwei wanted to poach him before, but this guy only wanted to set up a special warfare brigade there alone behind his old army, which was not easy.

First of all, you have to get the approval from above, and you have to make achievements you are proud of in order to get the approval from above.

Qin Yuan also reached out his hand to say hello to the other party. The other party was rather tanned, and the outside line on the southern side was already stronger, "It's nothing, I've heard your name before, but I didn't know you came to my place. What do you want to do?"

"It's like this. This time we have something we want to ask the captain to ask. There are many things we can't handle, and we have a conflict with the superior. They asked me to come directly to you. If you agree, sign it immediately."

Qin Yuan felt a little curious that his superiors had to wait for his confirmation before signing anything. He asked him to look at it first. Chen Ou didn't have any ink marks, and immediately took out a document from the file bag next to him. .

The title of the document is a code-named 602 plan. The specific content of this plan is all at the encryption level, so the above is completely omitted, and it only shows the mission goal of this plan.

The goal of this mission requires them to reach Xiaomao Country and bring back the three scientists about the 602 project safely, including the secrets and formula in their hands. They all know this formula, and what they need to ensure is the safety of the formula. There is safety of personnel.

Qin Yuan roughly glanced at it, and then looked at the date below. He felt a little confused, so he asked directly:

"I find it a bit strange. Your affiliation dates are all from last week. What exactly is the task like now? You have tried it, did it fail?"

Chen Ou was a little surprised when he heard this, and the two people beside him also raised their heads to look at it. After all, they didn't expect Qin Yuan's reaction to be so fast.

"Captain Qin, it seems that you are really good at predicting things. We have indeed tried it, but just after entering the territory of Xiaomao, three of our team members disappeared completely. There are those scientists."

Speaking of this, Chen Ou looked embarrassed. He would definitely not come to Qin Yuan unless he had to. Everyone was in the Special Forces, and no one was convinced. It's a secret rivalry.

Now he can't push too hard, and said that he will only give them a week, and if there is no result, he will hand over this matter to Qin Yuan and the others. Cooperating with each other, he wanted to see what was going on.

"I have a few questions to ask now. Don't you send follow-up team members to follow up? And what's the situation in the Little Demon Kingdom now? Where is the last place they lost contact?"

Hearing this, Chen Ou felt that Qin Yuan was reliable, at least he didn't take too much time to do things, he was very straightforward, and he didn't hide too much, and told everything he knew.

They are in Xiaomao country, and there are still three team members on duty there, at the place where they disappeared last, but the crux of the problem is that there is an open land on that side.

At that time, according to the plan they indicated, too many people passed by, which would increase the risk of exposure, and there would be no problem in that open area. They needed to go to the opposite experimental base.

Take the three experimenters over, the remaining three are defending the opposite side, ready to evacuate at any time, and the other three are going to pick them up.

Qin Yuan nodded. This arrangement is indeed very reasonable. They must ensure that they can advance and retreat, and they must have a way out, so this arrangement is no problem.

"So did they disappear in that open area or something? Since it's an open area, there won't be any other problems."

"We thought the same way at the time. We didn't expect such a thing to happen. We waited on the opposite side for 15 minutes, but still no one came out. Next to that open field is the experimental base, and behind the experimental base is a cliff."

This really turned into a fantasy. Under such circumstances, several big living people disappeared without a trace, which made them all feel very curious.

Chen Ou couldn't figure it out until now, he didn't know what was going on, those big living people disappeared like this, no one came after waiting for 15 minutes, and they didn't find any clues with the headset.

Later, they could only choose to go in to find out what was going on. However, when they entered the laboratory building, no one was missing except for the experimental equipment, and no clues were found. Moreover, the monitoring system was blocked a minute ago. All destroyed.

Li Erniu originally accompanied Qin Yuan up here, but now that he had heard the general idea, he couldn't help saying:

"I see your situation. There must be a traitor among them. Otherwise, how could it be so timely?"

He had just uttered his words, and a tall man who had been sitting on the left just now stood up from the sofa in a jerk, without saying a word, stepped forward and grabbed his collar.

"You guy, I didn't like you just now. We kept telling you to help us notify, but what are you doing? Now you are still talking about these nonsense, I don't allow you to slander my teammates like this."

"What's wrong, you don't let people tell you what you did yourself, it's obvious that there must be a traitor."

Seeing that the two sides were about to fight, Chen Ou hurriedly stopped it, "Enough, don't you think the situation is not chaotic enough? Now we are here to ask others for help, not for you to come here to make trouble."

"Captain, I know, but you see if what he said is too ugly, why should he slander our teammates?"

"Don't say anything now, sit down for me immediately and shut up!"

Chen Ou knew very well that this was another person's territory, and this time he was here to ask him to do something, so of course his attitude should be better, and he must not conflict with others.

Qin Yuan also walked over and pulled Li Erniu away, the kid's temper was offended again, "I said you can't talk well? Listen to what you said, it's like if someone suspects Cheng Guang and them Betrayed, what will happen to you?"

"I..."

Li Erniu didn't know what to say when he heard this, Qin Yuan asked him to apologize immediately, although he didn't know the other party's special forces team, but no matter what, they belonged to the same department, and everyone knew It's really not easy for the members of the Special Forces.

Compared with these team members, the two captains got along fairly well. Qin Yuan said that he would immediately understand the situation and set off now if possible.

Chen Ou was very grateful in his heart, he knew that once this person agreed, there would be no mistakes, "Yes, we have all the maps with us, we can start now, mainly depends on your time , To be honest, we have been waiting here for three days."

Qin Yuan turned his head and looked at Li Erniu, "You guys, I usually tell you before we are gone, if anyone comes to see me, I must be notified, why do people wait so long."

Li Erniu curled his lips, expressing that it was indeed his own problem. In fact, he was thinking that it was not Qin Yuan who told them not to make any notifications before, and not to notify him of anything, especially when he was doing business outside.

What's more, when these guys came, their attitudes were too aggressive. Those who didn't know thought they were really here to kick the gym, so no one cared about this matter and was delayed.

Qin Yuan didn't delay too much, and immediately brought his team members with him. No matter what, there must be more people and more strength. If you have something to go to a foreign country, you must protect those scientific researchers.

In the car, Qin Yuan learned more news. These three researchers are not simple. What they developed is a technological chip.

This chip plays a vital role in technological warfare, so now they want to bring back all these scientific researchers, which is regarded as secret protection.

This time they did not complete the task, and the leaders at work were very angry, because the identities of these scientific researchers were very important, which put Chen Ou under great pressure for a while.

"Captain Qin, I heard before that you are very good at leading the team. As the captain, I have to ask other people for help. I feel really guilty and feel sorry for those team members."

"Actually, you don't need to say these words. We are all captains and know what's going on. The most important thing now is to find people and ensure their safety."

From chatting with this Chen Ou, Qin Yuan knew that this person is also very concerned about face, and he will definitely not ask for help unless it is absolutely necessary, and the pressure from above is indeed great.

There is still a certain distance from here to Xiaomao Country. They arrived at the airport first and then took a helicopter there. When they arrived at that place, they found that there were still two team members on duty there.

Chen Ou waved at them, and the two quickly ran over in the grass to report.

"How is the current situation? Is anyone close to this experimental building? How is the situation in the past two days?"

It is better for these two people to hide. Seeing Chen Ou and the others come back, the two team members also relaxed, and one of them turned on the kettle and started drinking.

"Captain, nothing happened these two days. No one came close at all. We observed very carefully and didn't even dare to rest at night. basically took turns."

"Then it's strange. I wanted to stay here to see if anyone came later, but we didn't find any clues."

Qin Yuan patted him on the shoulder, "It's okay, let's investigate together, we may be able to find other clues now, I'll go in and have a look first."

The two team members were a little unhappy when they saw Qin Yuan walking in front of their captain with his hands behind his back. After they walked in, the two team members discussed from behind.

"This seems to be the God of War. The red blood cell team of the special warfare team he leads is said to be very powerful, and they have already ranked in the world rankings."

"I think it looks very ordinary, and why should he walk in front of our captain? What is he? Isn't we mainly responsible for this task?"

The two were discussing in the front, and they didn't notice Li Erniu who was walking behind. He hated others talking here.

"I said, are you two big men annoying? How can you gossip behind others' backs? This kind of habit is not good, especially for those who are weak, and they have the nerve to talk about others."

Chapter 1729: find clues

Speaking of which, the team member who was drinking water on the left just now turned his head and stared at him angrily, "Who are you saying is weak? I don't think you have the ability, you are right."

"Of course, I will say whoever is weaker. We are here to help. It is your captain who will ask our captain for help to find out the situation."

"How is this possible? Our captain's strength is very strong. It must have been forcibly arranged by the leader at work, otherwise we will definitely be able to take over this mission."

"Forget it, I'm too lazy to talk about this with you, anyway, remember that we are here to help, and be polite to us."

After Li Erniu finished speaking, he walked towards the two of them with a gun in his hand, making the two next to him very angry. At this time, Qin Yuan didn't care what the people behind him said, he had already arrived at the laboratory.

The overall layout of this experimental base is also relatively simple. Except for some computers and office equipment, there is nothing else in it. Most of the information has been taken away. Qin Yuan checked it habitually, and the data in the computer was all taken away. empty.

The player behind Chen Ou was called Dayong, who had clashed with Li Erniu before.

"You don't need to look at that computer anymore. We've already checked for any clues before, and if there are any, we won't keep them until this time."

Before Chen Ou had time to stop him, he could only smile, expressing that his temper as a member of the team was sometimes quite irritable, and hoped that Qin Yuan would not mind.

"It's nothing, it's just that I check this kind of data habitually, and I can still recover it."

what! Several people turned their heads in surprise when they heard this, and looked at him. The data has been destroyed for such a long time, and it can still be restored. Isn't this a lie?

Qin Yuan said that it was useless to restore those data, and they couldn't understand it. The point now is that what he needs to restore is the monitoring data.

Chen Ou coughed twice in embarrassment, which sounded like too much of a joke, "Captain Qin, I said before that their monitoring data was completely deleted, and there was nothing left, and it took such a long time , it is impossible to recover."

"Whether it can be restored or not is up to me. If I say it can be done, I will definitely be able to do it. That's all right, you guys just stay by the side and give me a few minutes."

Dayong rolled his eyes, always felt that this guy was just trying to show off, and then walked away from the others. They had searched this place countless times, but they didn't find any clues at all.

And here Qin Yuan is running on the laptop crackling in his hand, he can use his own ability to recover, but it will take a certain amount of time.

Li Erniu and the others also rummaged around and Chenglou said that they had searched all these places, but they didn't find any secret passages, so they didn't know how the few people disappeared.

He looked around and said slowly: "Then have you considered walking from above?"

Dayong laughed unscrupulously when he heard this, "We have already thought of what you can think of. Besides, there were three of us on the periphery at that time. Didn't all three of them see it? The sound of the helicopter is so loud, How could we not hear it!"

"I'm not talking about helicopters, but don't you know another thing called wingsuit flying?"

The experimental base itself is not high, only one floor in total, but the crux of the problem is that there is a back door, and there is a cliff behind it. It is most likely to leave from the cliff. Flying or paragliding they can't hear any sound at all.

When he said this, he woke up instantly and realized that he succeeded, yes, why didn't they think of this at the time, how could people disappear out of thin air? They have been keeping all the clues inside the experimental base.

I didn't expect that people would directly ask questions just after they came here. The key point was that this made several people feel a little ashamed for a moment. They thought about it for a few days before, but they couldn't find any clues.

At the same time, the computer in Qin Yuan's hand also restored the previous monitoring data, but he said that the data restoration can only restore the last three days, and the previous data is too long to be restored.

They were able to recover for three days, which has already surprised several people. This can definitely hold a lot of clues, especially the scene of leaving at the end, which is definitely no problem.

A few people hurriedly gathered around the computer and looked at it. There were some experimental scenes in front of them, and there was nothing too important. Until the people from the special forces team came behind, Chen Ou pointed to the team members who came in and said:

"They are our team members, and you can see that they walk in the same way. The main reason is that we want to prevent people from outside. There are only these three researchers in the laboratory."

According to the current situation, it is true that at least Qin Yuan has not seen other people in here. However, on the monitoring screen, just after those team members entered, the door at the back was suddenly closed, and then a few people walked out from the dark. man with a weapon.

At the same time, those scientific researchers were also held hostage. It can also be seen from the monitoring screen that the equipment they were carrying was directly flying, and it was very likely that it was the cliff. Next, they were taken away.

There is a cliff behind, and it is very likely that it is there. At this time, He Chenguang was a little puzzled.

"I'm really curious. Although our team members were hijacked at the time, they were still able to quietly send messages outside. Why didn't there be any movement?"

"Pay attention to what the man in the beanie in front is holding in his hand. That's the signal jammer. He completely blocks the signal here, and all electronic equipment cannot be sent out."

Everyone looked in the direction Qin Yuan pointed, and there was indeed a man wearing a wool cap squatting in the corner, and the man was manipulating a small instrument in his hand.

At this moment, all the problems were explained. It seemed that they were taken away, but at the same time, it also explained that there was absolutely no traitor among them, but those guys had been waiting here for a long time.

After watching the monitoring, everyone immediately rushed to the cliff, trying to find some clues from there. Chen Ou was very grateful to Qin Yuan along the way, and he had already found such a crucial clue for them just after he came.

After arriving on the cliff, you can still see a lot of footprints, and there are some scattered equipment beside it, except for wingsuit flying, that is paragliding.

Dayong squatted down and inspected carefully, "Captain, look quickly, these military boots are definitely left by our team members. Ours left traces, and they will only be very light. It looks like they stomped here on purpose, trying to impress We leave traces."

"But it's a pity that there is only information about this footprint. We really don't know where they went."

But Qin Yuan next to him was very dull, there must be something that couldn't be investigated, in his eyes, everything was fine, so he planned to prepare a paraglider, and in this case, he would go all the way along their route.

"Captain Qin, are you kidding us? This place is so big, which direction do you think they will go?"

"This thing is actually very simple. If you think about the size of the paraglider, where can they land? First of all, it is an open place, and they can't take the paraglider away. We just need to look for traces along the way."

Chen Ou suddenly realized when he heard this. He didn't expect that there was still a huge gap between them and this special forces team. They could quickly think of a solution in a short period of time, but they would only deal with these things in the most primitive way before. No leads were found.

"If this is the case, it will be more troublesome. Our team members have not been exposed to any paragliding equipment and may need training."

"There is no need for this. It can be handed over to our team members. The team members here are very familiar with these things."

Chen Ou could only nod his head, expressing that he was going to prepare the equipment immediately, and everyone agreed to wait in the laboratory, while Qin Yuan checked the previous monitoring system while waiting.

He mainly wanted to see how these people appeared. He was in a hurry at the time, so he transferred the time of the day, but he didn't find these people on that day, so he adjusted the time of the control to the front again. For two days, you can only watch the last three days at most, and nothing else.

The monitoring showed that these people came in from the back door. From the looks of it, they also used the same method, that is, they used paragliders to come to the cliff and then left from here.

These people are all dressed in uniform, and the equipment on the paraglider wraps them very tightly, such as hats, glasses, and masks.

Basically, even men and women can't be recognized, but it can be seen that these people are very tall.

In the afternoon, Chen Ou had already prepared the paraglider equipment, and everyone looked at each other on the cliff. Although Dayong was particularly dissatisfied with them before, it is really not easy to see that this kind of altitude can control this kind of paraglider.

In any case, I hope they will be safe. Qin Yuan told everyone a general direction. Now that they go out, they will divide into several teams and start searching. Whenever they see a paraglider that has landed, they will notify them immediately.

Dayong asked doubtfully, "Then if they destroy the paraglider on the spot, won't there be any traces and you will waste your time?"

"This kind of situation is basically impossible. Look at the materials of the Huaqiang version, unless they directly use the form of blasting. If they explode, it will attract other people. Guns are completely banned in Xiaomao country."

That's true. After all, the gun is fully fired, not to mention such a loud explosion, so at present, the paraglider can only be abandoned, and it cannot be destroyed.

And most people don't think of this at all, so they don't have any worries. Even if they find it later, it will be a long time later, but they didn't expect Qin Yuan's speed to be so fast.

Qin Yuan took the lead first, took a few steps back, and then took advantage of the wind to jump forward. Everyone's hearts were in their throats, especially Chen Ou. He was praying in his heart that nothing unexpected would happen.

The next minute, his paraglider slowly rose and flew forward with the wind, and other team members also started to set off one after another.

Seeing that several people are very proficient, Chen Ou couldn't help sighing: "Before I always thought that everyone was in the special forces team, and there shouldn't be any difference, but now I understand, take a look, this is Different."

"Captain, what's the difference? If they can train, we can train too. At worst, we can train well after the brothers come back."

"You kid, you better show me some humility. Look at what people said is true. Compared with us, we are really useless. I have been investigating for a few days, but there are no clues. In the end, they came, and now they are directly let's go."

What can they do now? Then we can only wait for the news here. Originally, they were the leading party, but now they have become a cooperative team.

As for Qin Yuan and the others, they were flying in the mid-air. Because this area was a cliff, the wind was very strong. After they separated, they began to look for targets everywhere.

Qin Zhengyang passed by easily. At this time, he saw several unusual things on the open ground in front of him. He deliberately lowered the height and looked down.

After seeing it clearly, he was very excited, and immediately sent a message to Qin Yuan and the others, and found the paraglider in this place.

Qin Yuan soon notified Chen Ou again, and when Chen Ou and the others rushed over, they saw that several people had already rested in place. Chen Ou said that the mountain road was really difficult to walk, after all, they were not flying like them.

"Captain Qin, what's going on now? Did you investigate any clues just now?"

"The current clue is that the paraglider was abandoned here, and broken branches were seen from the depths of the forest. They should have entered here."

"We have finally found a clue, so let's not delay, let's go now."

"Wait first, don't worry."

Before Chen Ou said anything, Dayong said beside him: "Why are you not in a hurry? We have to find them quickly. They have been missing for so many days. Will I be in any danger, especially our team members? After all, those scientific researchers are still useful to them."

"No, take a closer look at what is in front of you. My people are clearing mines for you, and you will pass after they are done."

After saying this, Chen Ou raised his head, and Dayong and the others also turned to check carefully, only to find that He Chenguang and Li Erniu were clearing mines ahead.

Demining is commonplace for them. Chen Ou and the others usually train, but their speed is not as fast as theirs, and they can still be so calm. After all, they have experienced Qin Yuan's thunder, and that is the real horror.

"Let's wait patiently. We're just sitting here to rest. We've changed a batch. I've already lined up a few just now. We'll go in after they finish lining up the back."

Chapter 1730: find missing team members

When Qin Yuan said this, he was very relaxed, and he didn't take the demining matter to heart at all. For him, it was as simple as eating.

"Look at this, they are definitely walking from this side, and they are walking very cautiously. That person is very familiar with the road, and he can completely bypass the minefield. Look at the traces next to it, but for the sake of safety, we still avoid it." Let's go after that."

Chen Ou is completely convinced now. He feels that the opponent's ability is really strong. Compared with him as the captain, he really can't do anything.

"Captain Qin, I really think that the people in your team are very powerful. Compared to many others, my negligence of duty as the captain caused today's situation. I should have followed in at the beginning."

"It's nothing, but I'm curious why you didn't follow. I don't mean to blame you, but I'm just curious."

Chen Ou sighed silently when he said this. He said that the identities of these scientific researchers are very special, and they need to be transferred in a sealed manner, so that no one else can find out.

So in this case, he had to make sure that the researchers inside the periphery had already got in touch with them, and there would be no problems.

At that time, he made a misjudgment, thinking that the most important position was inside the perimeter, and he just needed to pick up people. They fixed the perimeter, thinking that there was a cliff behind, so there would be no problem.

Unexpectedly, the problem appeared here, and his teammates also disappeared, which made him feel very guilty. While talking, Li Erniu came over and said that Lei had been completely cleared.

In this way, everyone continued to set off. Although Lei had already been queued by them, Chen Ou's team members were still a little flustered after following.

"Did you say that their mine clearance was really successful? Why do I feel so flustered, they are so sure that it will be successful?"

"Who knows, anyway, it's not us, just follow along."

"You didn't understand what I meant. Some landmines are not so simple. The person in front may not start when he steps on them. If the person who is unlucky in the back steps on them, there will be problems."

Having said that, the people behind began to be cautious. Qin Yuan heard their conversation and turned his head to take a look. These guys are really funny. I don't know what their usual training is like.

That kind of situation does exist, but the probability is very small, and it basically occurs on old-fashioned landmines. Now the new-style landmines are very sensitive, and they will be triggered directly when touched.

In this way, several people passed through the forest smoothly, and when they went out, they saw more traces.

Dayong rushed forward and found a necklace left by one of their teams. He quickly picked up the necklace and came to Chen Ou.

"Captain, look quickly, this thing seems to belong to Xiaomao."

"That's right, he should have left us a clue, quickly follow the direction of this necklace, and he will give us instructions."

In this way, everyone rummaged around and saw a very small scratch on the root of a big tree, which looked like an arrow.

Although the imprint is relatively shallow, it is enough to see, "Captain, look quickly, this must have been left by Xiaomao, he is reminding us, let's quickly find it along this way."

Dayong was very excited and turned his head to go there, but Qin Yuan stopped him and told him not to be so anxious. Dayong's character is indeed a little too impulsive. In this situation, he doesn't know what Qin Yuan wants to do.

"Captain Qin, I respect you very much, but you don't need to stop us like this right now! What are you doing? Are you stopping us from saving people? They must have been waiting for us."

"I don't want you to go in the wrong direction, you can see for yourself."

After Qin Yuan finished speaking, he only saw a clear footprint next to it. It was not obvious that there was no footprint and they were not satisfied with their military boots. You must know that if it was really left by Xiao Mao, he would definitely be very careful in this place. How could it be possible? Will it leave footprints?

"You can see for yourself what's going on."

But Dayong insisted on his point of view very much. He felt that it was very likely that other researchers left behind, but Qin Yuan kept all the details in his eyes. He said that it was impossible for researchers.

"You should have seen the surveillance footage before. The researchers wore leather shoes, and the footprints of leather shoes are not like this."

"this..."

So the current situation is that someone left on purpose to mislead them in the direction. It must not be their own, and most people can see this imprint at a glance. According to those guys' anti-investigation awareness, how could they not find it?

These people are too cautious, taking every step carefully, including using paragliders from the cliffs, all these things are under their control.

"Then what do you think? I found Xiao Mao's necklace before."

"It's true that you found his necklace, but are you sure that he left it? And these imprints here are what they misled us. I suggest that they can leave it to us before looking for it from other places. Footprints, that should provide other cryptic clues."

The team members on Chen Ou's side were still not at ease. They didn't want to miss this rare opportunity. Qin Yuan said that they could send someone over there to have a look first, but they should observe from a distance, especially pay attention to whether there are other traps on the road.

In this way, they separated two team members, and the rest continued to search here. After searching around, Qin Yuan finally found something.

A very shallow footprint was found in a bush area, the same as they had previously found on the cliff.

This is what their team members left behind. As for the others, no one can tell. I would rather look at the direction of the footprints. The bushes on this side are lower and easier to walk.

It's just that he is a little strange. In this kind of place, it is more difficult for those who have been trained like them to walk up, because there is no road at all. How do those scientific researchers walk?

He was a little skeptical, probably there were two directions, that is, the two successful team members should have been taken to the jungle side, and the researchers estimated that they would

have left by helicopter at the place where they landed on the glider, otherwise they would not only
Traces will be exposed here, and it won't go very far at all.

When Qin Yuan spoke out his analysis, Chen Ou also felt that it made sense. This kind of analysis is the most reliable, and it is impossible for scientific researchers to be in this jungle.

He thought about it, and immediately made a decision. He asked Qin Yuan to go back to the place where the paraglider was used to investigate, and leave it to himself.

"If this is the case, then I would rather ensure the safety of those scientific researchers first, they are the most important. As for our team members, we will find a way here."

"Well, it's faster to search separately, but you must pay attention to safety. I always feel that the people behind these are not simple, so be careful."

After Qin Yuan finished speaking, he saw two team members approaching from a distance, who had gone out along the arrow before. The eyes of these two team members looking at Qin Yuan changed after they came back. They were a little disdainful before, but now they bring With respect.

"Captain Qin, you are really amazing. Everything is just as you said. After we went over there, we paid close attention to our feet. I didn't expect that there were other traps besides mines, so we couldn't see them at all."

The two team members said that after they went there, the traps were very concealed, all of them were in the deep bushes, and they left traces on purpose to attract them to go there.

From this point of view, as long as they are triggered, there is really no return, so Qin Yuan's current analysis is the closest to the truth. If they continue to go according to the previous situation, it may really deviate from their direction completely.

Dayong, who had sworn before, didn't speak any more. He glanced at Qin Yuan. He wanted to apologize for his recklessness before, but he couldn't open his mouth. At this moment, Qin Yuan had turned around and left.

He led the team members to the place where the paraglider had been before again. Li Erniu had a relaxed expression and was very proud.

"Brother Qin, you were really awesome just now, all the analysis was in place, I see what those guys are still dragging."

"Actually, when you think about it in this situation, it's normal. The more you meet people close to you, the more flustered they will be. This time can be regarded as a training for you. You can see if you encounter this kind of situation in the future. How should the situation be handled."

Everyone nodded to show their understanding. After arriving at the place where the paraglider was located, they began to search separately. After a while, He Chenguang ran over and said that there were indeed traces of helicopters on the grass in the distance.

The grass over there was very dense, and most of them were pressed down by lodging, indicating that the helicopter hovered in mid-air and lowered the ladder to let them go up.

"Brother Qin, but what should we do in this situation? The helicopter is flying upwards. We don't know the exact direction. We can't find any clues here."

"We just need to make sure they leave by helicopter, and then I'll hack into their high-altitude radar software later."

After saying this, everyone will understand that after he invaded, he can find out the takeoff route of the day, because there must be records for flying over Xiaomao, and the route can be found based on the records of the day.

This kind of invasion is very smooth for him, as long as everything can be known after entering, they need to report every flight route to avoid other aviation accidents.

So he will definitely seize this clue, and now it is easy to confirm that there is a helicopter.

"Let's go, the problem here is almost solved, let's go to Chen Ou and the others."

When the few people walked to the previous location, Chen Ou and the others deliberately left clues for them to follow, but when they arrived, they saw Chen Ou and the others stop in front of a cave from a distance .

Qin Yuan had a bad idea in his heart, but he didn't dare to bring it up now. He could feel the heavy atmosphere in the distance. When he stepped forward, he saw Dayong squatting beside him with red eye circles without saying a word.

Chen Ou also came out when he heard the movement, he thought for a long time, and finally said, "We are still a step late, I regret it more and more now, if I went to you sooner, would you take us with you?" Can you save them?"

Speaking of this, Qin Yuan probably guessed what happened. He probably saw their bodies. Sure enough, after Li Erniu and the others went in, he saw a very tragic scene in the cave. The two team members had already been killed in the cave. among.

When their bodies were carried out, Dayong couldn't hold back anymore, he punched the big tree next to him and cried loudly, which also let him vent.

"Do you know? Xiao Mao is only 20 years old this year, he is the only child in his family, and he was recruited just this year."

His voice was so sad that the people around him felt the same way. Li Erniu walked over and patted him on the shoulder.

"Brother, what we have to do is to avenge them and catch all these criminals."

"I..."

Dayong was a little speechless, his voice was very choked, no one wanted to face this situation, especially such a young life.

Now everyone is holding a sigh of relief in their hearts. They must catch this group of criminals. Qin Yuan also told them that he found clues there.

Qin Yuan knew that Chen Ou, as the captain, would find it difficult to accept such a situation among his team members, so he squatted down and began to check carefully.

"I checked them just now. The injuries on their bodies are very professional. You can see the neck and the side."

The death conditions of the two people can be said to be very tragic, especially Xiao Mao, who was stabbed 13 times in total, all of them were tortured, first in the hands and feet, then in the chest, and finally in the neck.

Qin Yuan clenched his fists while analyzing Dayong. He vowed to avenge Xiaomao, and Ruanyuan came to an important conclusion. He felt that this must be something that only mercenaries can do, or a professional killer organization.

Their anti-reconnaissance awareness is very strong, UU reading [www.uukanshu. Com](http://www.uukanshu.com) makes people have no way to track at all, and the way they handle killing is also very unique, leaving no one alive.

Now they need to go back to the urban area, Qin Yuan needs to hack into the local network system, and then steal a certain route from their radar.

Chen Ou left two team members to deal with the corpses, and he went back with Qin Yuan. Although he is also very sad now, he must take up the responsibility of the captain and avenge the two of them.

When he saw that Qin Yuan's method was to steal secretly, he felt a little tangled.

"Captain Qin, is it not good to do this? Should we inform them and let them assist us in the investigation? After all, our people have problems."

"Captain Chen, sometimes you need to be flexible. Do you think these people will help us? They will only delay the problem indefinitely and cause us a lot of trouble."
