

Special Soldier 1741

Chapter 1741: rescue researchers

Soon, Chen Ou's voice came from Ah Cheng's headset, and Chen Ou told him to stand up quickly and not be in a daze.

"Remember you are a soldier now, don't make such a cowardly look there, there is no need for mercy on the battlefield now, understand? If you don't take up arms, then your teammates, your friends will be in danger among."

After being yelled at like this, Ah Cheng also quickly reacted. He quickly followed up with his weapon in hand. Chen Ou now completely handed over his back to He Chenguang and the others.

Only now did he really understand that sentence. They are powerful, and they can cover them no matter what. You must trust the sniper behind you 100%.

The situation here is much more complicated than in the country. There will definitely not be conflicts among civilians in the country, but here these militants themselves are converted from civilians.

They have been entrenched in these villages all year round. Although those people seem innocent, many of them are also the instigators.

Qin Yuan was the fastest, he had already rushed to the front, he watched all the militants approaching the tent, and confirmed his guess, he kept attacking.

Soon, with their cooperation, they successfully entered the tent, and Chen Ou also followed behind. He saw those scientific researchers.

It's just that the situation at this moment is very different from what he imagined. In his imagination, these scientific researchers should be completely imprisoned, but at this moment, the militants surrounding them is more like a kind of protection.

And those militants saw horror on their faces, without any expression of hope.

This made Qin Yuan feel a little curious. At this moment, he smelled a dangerous smell, pushed Chen Ou away, and then jumped out quickly.

The two of them just jumped out of the tent, only to see a burst of flames erupting from the inside, which was a petrol bomb, followed by the entire tent burning quickly.

"No, absolutely don't let them go. If they leave this time, we won't be able to find them again. Hurry up."

Qin Yuan looked at the excited Chen Ou, pulled him tightly, and then turned around and killed the two militants, "You bastard, you are the captain now, figure out the situation, don't be so impulsive, all the gasoline is in front of you!" Bomb, do you want to die?"

Chen Ou didn't know what to say for a while, but Qin Yuan directly crossed the firewall in the next second, which surprised him very much. Qin Yuan's defense and performance in all aspects must completely surpass them.

He followed closely behind those militants, shooting non-stop, and at the same time he heard the sound of a car starting behind, these guys seemed to have been prepared long ago and could evacuate at any time.

Just as he was shooting, several women rushed out from the side alley, and these women all ran towards him wearing black veils.

The things in his hands are even more varied, basically there are no firearms, all of them are knives, hoes and the like.

He cursed secretly, this obviously pushed these civilians to the point of guns. For these civilians, especially those without weapons, he really couldn't do anything, so he could only temporarily release them from control.

But at the same time, it also took a lot of time. In the end, he only saw that the scientific researchers had boarded the car under the cover of the militants.

Just when he was about to chase, Li Erniu's voice came from the headset, "Brother Qin, it's not good, we are surrounded behind us, and there are a large number of armed men, and they are equipped with heavy weapons. manage?"

"Brother Qin, there are also a large number of armed personnel on our side. They seem to be rushing to the base. I don't know what happened."

He heard the voice of Wang Yanbing. Wang Yanbing was ordered by him to be in charge of breaking through and breaking out from the side. It seemed that they were completely surrounded.

And at the same time, a rocket hit directly from a distance, and directly blew up the car in front of Qin Yuan on the spot. The huge explosion overturned the whole car, leaving debris everywhere, and the car next to it. The earthen walls have completely collapsed.

Fortunately, those armed personnel did their best to take away those scientific researchers safely. Qin Yuan wanted to step forward several times, but when he thought of the team members behind, he could only curse secretly, and some retreated.

After all, it didn't look like those armed men were going to hurt those scientific researchers, and they gave priority to protecting them from leaving, so let him take the lead in rescuing his team members.

Chen Ou's bullets were completely exhausted. He took out the knife behind his waist and could only fight desperately. After all, there were too many armed men, and he didn't know where they came from.

Just as he was about to rush out, a bullet hit him from behind, killing all the armed men in front of him in an instant.

He turned his head and found that it was Qin Yuan, "Why did you come here? Where are the scientific researchers?"

"It's too late to say this now, I'll take you away first."

Because Chen Ou was hit in the abdomen by a bullet, and now he was bleeding profusely, and he was holding on. Chen Ou gritted his teeth and stood up. Qin Yuan made his own retreat plan while supporting him.

"Erniu, you are responsible for covering Dayong at the commanding heights, and Ah Rang and the others retreat first, and Wang Yanbing is responsible for breaking the rear."

"yes!"

When Chen Ou heard this, he quickly grabbed Qin Yuan and shook his head desperately. How could this be possible? Originally, Qin Yuan and the others were only here to help, how can they cover the retreat now, after all, in this situation, everyone knows that the ones who stay are the most dangerous.

"Captain Qin, this is absolutely not allowed. I can't let you take this risk. If I do that again, I will be inhuman."

"Stop talking nonsense, everything is up to me now."

Chen Ou was startled by Qin Yuan's aura. Qin Yuan was talking to him well before, but now the situation is urgent, so he has no time to say that.

"Everyone follow my footsteps and retreat from the six o'clock direction. I will go over and make a gap. Everyone pay attention to the six o'clock direction."

After Qin Yuan finished speaking, he directly picked up Chen Ou. He checked the wound on his abdomen by the way. It was not a serious injury, but it was scratched by shrapnel, and the wound was a little deep.

As long as there are no bullets in it, there is no problem. He brought Chen Ou to the place he said soon.

"You wait for me here, don't move around, and leave the rest to me."

After he finished speaking, he rushed out quickly. Cheng Ou was sitting in front because of the injury, so he couldn't see the situation outside at all. He only heard the intense gunshots outside.

After about a few minutes, I saw Qin Yuan rushing over with a gun, picked him up again, and took him out first. When he went out, he saw corpses all over the ground.

Those armed men had more equipment than they did this year, and the people on the side were even holding Tommy submachine guns. Qin Yuan took care of them all, and Qin Yuan took advantage of the opportunity to pick up a gun and handed it to him.

"See that building up ahead? You go to that place now, I'll go back and cover him, I'm going to make sure everyone gets out."

Chen Ou opened his mouth to say something, but he didn't say anything in the end. After all, he knew that his ability was nothing in front of Qin Yuan, so he just prayed silently in his heart that they would all be safe.

Several militants around were dealt with by Qin Yuan, so Chen Ou went relatively smoothly, and soon came to the building.

As soon as Qin Yuan came here, he saw the militants surrounding him again. He recklessly fired towards that side. The militants couldn't react at all, but felt that the people on the opposite side were too fast.

It was at this moment that Ah Cheng and Dayong felt their true strength. Under the cover of Li Erniu and Qin Yuan, they quickly ran out of the gap.

Qin Zhengyang was the last one to come out. Just after he came out, an incendiary bomb hit him directly behind him, half of his clothes were burned.

Qin Yuan quickly stepped forward and tore off his clothes, then grabbed a piece of cloth from the side and wrapped it around him, because now they can't reveal any identity, and all body marks can't be exposed.

In this way, several people ran out smoothly. After everyone arrived, Chen Ou hurriedly looked for Qin Yuan. Why did Qin Yuan not come back after everyone was there?

He Chenguang told him not to move, and was treating his wound, "Don't move now, I will treat the wound for you, don't worry, our captain is just going to solve the troubles later."

"Solve the trouble, shouldn't we just retreat now? Whose weapons are so advanced, much better than ours, and their ammunition is not a problem at all, have you seen it? Their cars are full of ammunition."

As soon as he finished speaking, he heard a huge explosion from outside. Even this place felt a shock, and the soil on the tiles kept falling.

Li Erniu was observing the situation by the window, and then he burst out laughing, "Hahaha, as expected of Brother Qin, he just blew up their car. It's a beautiful job."

"Captain Chen, you can stay at ease. I will treat this wound briefly for you first. When our captain arrives later, I guarantee that you will have no problems and will recover immediately."

"But what is your captain doing? He's the only one."

"Our captain must avenge his revenge. Since these guys were so arrogant just now, he has to go out and settle them now."

Chen Ou's team felt incredible when they heard this. It sounds crazy for him to deal with those militants alone.

The gunfire outside became more and more intense, and Chen Ou didn't know what happened. About ten minutes later, the sound of a car sounded outside, and Chen Ou was very nervous.

But then a familiar voice sounded, "Come down, we can leave now."

When Chen Ou and the others went down, they saw Qin Yuan driving an off-road vehicle. After opening the door, they found that the back was full of weapons.

"Don't just watch, I've dealt with the people over there. Go ahead and choose two cars that can be used, and tear off the logo scarves they wear and put them on us."

Dayong couldn't believe that those militants were suppressed with such fierce firepower just now. This strength was simply too terrifying. He saw that the base they escaped from just now was engulfed in a sea of flames, and he basically couldn't see it. What a living.

Qin Yuan squatted down to treat Chen Ou's wounds, and Dayong and Ah Cheng also hurried to help, after all, they had to make other disguises.

When they entered that place, they were even more shocked. The hit rate of the militants who fell on the ground was too high, all of them were head and chest, and there was no possibility of surviving.

Li Erniu and the others have long since realized the strangeness, and patted Dayong on the shoulder, "Don't worry, as long as our captain has dealt with it, there will never be anyone alive. Relax, just pick up the usable ones."

Only then did Dayong nod his head. Before that, they always thought that they could be regarded as special forces, but compared with Li Erniu and the others, they were not on the same level.

On the other hand, Chen Ou blamed himself a little. He felt that if he was faster, he would definitely be able to save the scientific research team.

"I'm really slowing down. I asked you to help, but we all became supporters, and we were dragging our feet. It's a shame to say it. What should those scientific research teams do now?"

"Don't worry, there will be no problem, and didn't you find out? The members of the scientific research team didn't want to go with us at all. They were terrified when they saw us, and they might have misunderstood our identities."

"How did this happen? Then what happened to these militants?"

Chen Ou stood up and looked down and saw only a small scar, and there was no sign of bleeding at all, which was simply amazing.

Qin Yuan explained to him next to him that he had heard the news over there that these militants died to attack this armed organization, but they didn't expect that all of them happened to rush together.

They were rescuing the scientific researchers, and the other side thought that the team in front of them had made the first move, so they also rushed forward, and this happened.

"I'm worried about whether those scientific researchers will encounter any danger, otherwise our tossing all the way will be in vain."

"This is absolutely no problem. According to what I observed just now, they care more about protecting those scientific researchers than protecting themselves, and they will never let them have problems."

After Qin Yuan finished speaking, he took out a piece of data from his pocket, "They should be researching some kind of war weapon. Look at the data on it."

Chen Ou took it and glanced at it, but it was not very clear, but the thing mentioned above, as well as the blueprint, seemed to be some kind of weapon.

"It seems that those scientific researchers are very cooperative, so I suspect that there should be some misunderstanding."

He intends to impersonate this attacking armed organization now, and then go to inquire about the news. According to his analysis, this armed organization has a very wide range of influence, and in this case, they will all be mixed together.

Chapter 1742: come to the border

Qin Yuan's strategy is very good, but this area is too big, and various forces are intertwined, which is very time-consuming.

Chen Ou and the others have also experienced a lot along the way, mainly because of this back and forth. If it wasn't for Qin Yuan, they probably would have suffered casualties.

"Captain Qin, I have been stopping you and opposing you before, but this time I really want to say something, I hope you can apply to the team again to replace us."

At this moment, Dayong and the others came back from looking for equipment, just when they heard what Chen Ou said, he threw the gun on the ground and strode over.

"Captain, what exactly do you mean? The brothers have been following you, but how can you say that now, isn't this making us deserters? I absolutely cannot agree."

Chen Ou ignored him, he just looked at Qin Yuan, and now he didn't want to care about anything, he just wanted to keep the remaining team members, because he saw the gap between himself and the opponent.

And he is very aware of his own strength, and Qin Yuan was able to escape so easily before, which shows that his strength is very strong, but he is dragged down by his own side.

Of course Qin Yuan understands his heart to be the captain, and everything is for the sake of his team members, otherwise he would definitely not do this. If he was asked to charge alone, he would definitely have no hesitation.

But now that two members of their team have sacrificed and dragged on like this, he really can't take the rest back, and it will lead to the failure of this mission.

Also as the captain, Qin Yuan was very understanding and patted him on the shoulder, "I am very clear about this, don't worry, I will let my team members pick you up, there is another special warfare team in our brigade, I will notify them immediately."

What Qin Yuan was talking about was the Wolf Warrior squad led by Long Xiaoyun. They could come to the border area here and take them out first. This is the key issue. As for the scientific research personnel, just let them take care of them.

Ah Cheng, who hadn't spoken before, couldn't take it anymore. He felt that this was really unfair. He had already reached this point, why should he give up?

"Captain, I have just entered the brigade from the very beginning, I respect you very much, I choose to obey all your command actions, but this time I really can't understand, just because you were injured, did you back down? And put us down."

"Stop talking and get ready. Captain Qin has already contacted them. This time, all tasks will be handed over to them, and we will no longer participate."

"No, it's absolutely impossible. Why do you say you won't participate if you don't participate? We still have a lot of things to do and we've reached this point. I really didn't expect you to give up. I'm really disappointed in you as the captain."

Chen Ou didn't say a word, but silently picked up the equipment on the ground and helped Qin Yuan and the others tidy it up. At this time, Qin Yuan was contacting Long Xiaoyun.

Dayong felt very uncomfortable. He wanted to avenge his brother, and he also wanted to bring those scientific researchers back in person. This is the real mission to complete.

Xiao Mao is his best comrade-in-arms, that was the mission that Xiao Mao carried out before, he wanted to complete this last mission for Xiao Mao, so no matter what, he wanted to stay, but Chen Ou didn't say a word now, just sat silently next to the car.

After making the phone call, Qin Yuan walked over there. He had already made arrangements, but it would take some time for Long Xiaoyun to come over. The most important thing now is to send the three of them out first.

Chen Ou originally thought it would be better if he could go back sooner, but if he had to wait, it would only be a waste of time.

"Captain Qin, let's do this. We'll wait here for your response. As for the researchers you're going to find, go ahead. We won't disturb you."

"This is not a big problem. It will be a matter of time to find those scientific researchers, but they will always be in this area and will not leave the organizations here. They only dare to occupy here, and then slowly move towards us before Saw downtown penetration."

So they are very safe during this period, Qin Yuan does not need to make other measures, the most important thing now is to **** them there first, and take them to the border area.

After solving the problem here, he can also look for those scientific researchers with peace of mind. Seeing how confident Qin Yuan is, Chen Ou nodded. car.

"Dayong, what are you two still doing? Hurry up and get in the car."

"Hehe, get in the car! I won't drive for a coward. I really didn't expect you to become like this now."

After Dayong finished speaking, he pulled away the car behind him and walked up. Ah Cheng was also disappointed for a year, shaking his head, and the car behind him didn't want to ride in the same car as Chengdu.

Such an atmosphere was really embarrassing. He Chenguang walked over and persuaded the two people to obey the order and take them to the border now.

Things have become like this, and the higher-ups have notified them. It is useless for them to object, and they can only vent their anger silently.

Qin Yuan waved back and let Chen Ou sit in their car. Li Erniu and He Chenguang followed them to the back, and the car set off towards the border.

On the way to set off, Dayong cursed silently, and then punched the seat cushion in front of him. He regretted more and more. If he had known earlier, he would not have joined this so-called special forces team.

"Brothers, to be honest, I really admire you, and now I am more envious of you having such a **** captain."

"That's right, it's really not our wish. I can't wait to fight with you right now, but we can't help it."

Dayong and Ah Cheng kept complaining that they were venting their anger, full of dissatisfaction with their captain, after all, no one could accept this situation.

After they finished speaking, He Chenguang threw over a bottle of water, "You guys are too excited, so calm down a bit. In fact, think about it carefully, your captain is doing it for your own good."

"Hehe, let's lie to ghosts for our own good. If he is really good for us, will he do such a thing? We are not the kind of people who are greedy for life and afraid of death. Our teammates have all sacrificed. Don't we complete the task? , just go back in such a gloomy manner?"

It can be seen that Dayong is really angry. He Chenguang explained to him that it is precisely because of this that he wants to keep the remaining players, and he does not want others to sacrifice here.

"You are not afraid of sacrifice, but what about your family members? He saw the gap in our strength in this battle, so he made such a decision. It is also very difficult for him."

Speaking of this, Dayong was stunned. He really didn't think about it, but He Chenguang felt that it was the most difficult to stay or make this decision.

There is always someone who wants to be the bad guy. Looking at it this way, Chen Ou really looks like someone who is greedy for life and afraid of death to run away, but he only wanted to keep the remaining team members alive, and he saw clearly the gap in strength between them.

On the way to the back, neither of them said a word. Several people are now going to drive to the border. This time they went very smoothly because of the logo on their car. The logo of this armed organization is very conspicuous, it is a pattern of an eagle .

And it can be seen that the influence of this armed organization in the local area, basically the local people avoided after seeing it, and no one dared to look at them.

Even the passing vehicles made a detour, which allowed Qin Yuan and the others to have a smooth journey. They successfully left this place and planned to go to a place called Axel ahead.

There is the border line closest to them. There are a total of three border crossings here, except for the one they came to before, which is the current one.

But it's not so easy to get out now. After driving for more than three hours, they finally came to Axel.

After everyone got out of the car in a hurry along the way, when Chen Ou stepped forward and was about to open his mouth to speak, Dayong directly bowed his head and apologized.

"Captain, what I said just now is too inhuman, and I didn't mean it, it's just that my personality is like this, and I can't turn my head around."

Chenggong didn't say anything, but just patted them on the shoulders. These players finally understood his good intentions. Although his behavior was not particularly good, and he escaped as a battle, but he really just wanted to let himself team members survive.

Although he led the team to take part in several missions before, such intense face-to-face confrontations are really rare. After all, there are very few such large-scale gun battles in China.

After he personally experienced it this time, he felt that the gap between them must send everyone back.

But after they came down, Li Erniu stretched his waist, and just took a sip of water, then turned his head and asked, "Brother Qin, aren't we going to their border checkpoint? Why did we stop here?"

"Look at it, kid, it's here, this is the tail of the queue, and the front door is the gate."

When everyone heard this, they all looked in the direction he was pointing at. Good guy, the queue is too long. There is no end in sight. The gate is the place with the most people in the distance.

And the vehicle in front really can't drive in. There are interceptors in front, so they can only go this way. Qin Yuan is going to take the money as before to see if he can open up a road. Unexpectedly, after a few minutes, he Back in disgrace.

The guards on the border here are even more difficult than he imagined. They don't care about these things and don't accept them. They just want to ensure the safety of their own country. After all, this is their real last line of defense.

"Don't look at me, what else can I do? Go in line."

Even if Qin Yuan arranges for Long Xiaoyun to pick them up, it still has to go through the normal process, which is not as easy as those places before.

Everything had to be registered. This endless line made Chen Ou feel a little annoyed. This was a complete waste of time.

"Captain Qin, if it doesn't work, you can take them with you first. We'll line up here for registration. You go to deal with the matter over there first, and I'll hand over to the other comrades later."

"It's okay, everything is under my control, you can just line up here with peace of mind, I'm waiting to send you all out, otherwise I don't want any accidents to happen, and then I won't be able to take care of both ends."

Although what Qin Yuan said was harsh, it felt like they were unarmed, but it was true. The border is now the most important pass.

People outside want to come in, people inside want to go out, making a mess, so accidents are most likely to happen in this situation.

In addition, he also got some information before, even if it is not so easy for those militants to investigate now, it is better to let them relax their vigilance first, and then investigate later, there will be no problem.

Two hours have passed, the team has not moved at all, and there is no sign of movement at all. Dayong is looking at the equipment they took off in the car, and is in a daze.

"Captain Qin's team is too long, or else follow our previous method, let's put on this equipment."

Qin Yuan felt that this guy was really another copy of Li Erniu, but after several years of training, Li Erniu had completely mastered the essence, and he would not say many things so nonsensically.

"You kid, think about where this is. Isn't the clothes we are wearing delivered to your door? They don't talk to you at all, just shoot and shoot."

In this situation, they could only line up honestly, and it was completely dark like this. They finally saw the gate of the border, but the gate of the border had a heavy handle, and there was a door on the side, and a small number of people were passing through.

Most of the others were trapped in the courtyard and the open space outside, trying to recollect the evidence they needed.

Qin Yuan and the others finally entered this humble office, UU reading www.uukanshu.com. The officials in front of the com just entered didn't say much to them, they just reached out and asked them to hand over the materials.

He quickly handed over the passports of Chen Ou and Dayong, but the official frowned, "No, no, you are not qualified, we don't need this, in addition to passports, we also need your local certificates to prove that you are. Because what do you come here for? Why go back?"

Qin Yuan felt dizzy when he heard this, what are these? He could only explain with a smile, "We just came here to travel, so we don't have any certificates. If you guys fight, then we must go back. We don't know where to get the certificates."

Such a sentence can fool the past. I didn't expect that the official would not accept this at all. He was still very serious and business-like.

"Then where did you come from at that time, go to that place to print your proof materials, and ask the staff there to prove that you came in from that place as a tourist."

I didn't expect it to be so strict. No wonder so many people outside were blocked in the yard.

Chapter 1743: direct attack

The main reason is that the official here is not humane at all. No matter what he says, he doesn't agree with it, and makes everyone have to complete the certificate before they can come for the test and pass again.

Qin Yuan originally planned to buy this official with money and ask him to be more flexible, but in the end, there was no way to let them go out directly, so don't waste other people's time here.

And he has other methods, but he can't implement them here. He saw that Chen Ou was still standing by, and it was not easy to attack him, so he let Chen Ou go out first.

"Well, you go out first and leave your passport. I'll let him type out those proof materials."

"what are you going to do?"

"Don't worry, I won't do anything impulsive. I'm sure about this matter. You go out and wait for me first."

Chen Ou was dubious when he heard it, so he had to come out first. There was no movement inside for a long time, and within a few minutes Qin Yuan came out with the material stamped by the official.

He looked surprised. When they went in before that, the official's attitude was very bad. There was no chance of any accommodation. How could he change his attitude in just a few minutes?

"I'm really curious about how you did it, or maybe your communication skills are too strong."

"It's nothing. I just took a little trick, but don't worry, I can solve this matter. No matter what, I've got it now."

In fact, Qin Yuan was very simple. He used his own charm skills. Without knowing it, the official directly stamped them, and he didn't need to worry about other things.

Chen Ou was also at the scene just now. He couldn't use his skills well, but other things must be fine. Just like that, several people came out with proof materials.

Long Xiaoyun and the others had been waiting at the border for a long time, and they came early, as long as they were successfully escorted back, they also had to go to Xiaomao Country to settle the rest of the matter.

Although Dayong and Ah Cheng felt a little bit reluctant, they also wanted to stay, but now that the proof materials have been stamped, and the order is like this, they can only go back first.

Unexpectedly, when he passed the customs, Chen Ou chose to stay. He waved his hand and let the two of them leave. After Dayong went out, he realized that something was wrong. When he turned around, those soldiers had stopped him, and he was not allowed Re-enter.

"Captain, what are you doing? That's not what you said before. You said that if we want to leave, we will go together, and if we want to stay, we will stay together. What does this mean now?"

"Open the door, we still have someone who hasn't come out, send that person out."

But the soldiers next to them didn't care about this at all. They were only responsible for stopping people who wanted to go out and people who wanted to come in. The two sides didn't care about anything else.

Qin Yuan didn't expect Chen Ou to make such a choice, "As the captain, I can't abandon my comrades-in-arms, but now I just want to keep them safe, and I will solve the rest here."

"Actually, you don't need to do this. I can also complete this task for you. There is no need for you to follow along."

Chen Ou smiled helplessly, "Captain Qin, I know you are very powerful, but no matter what, you have to give me face, I can be considered a captain no matter what, if I really go back like this, I am sorry to die Brother, I'm sorry for the leaders above."

Qin Yuan nodded without saying anything, while Dayong who was on the opposite side was still shouting non-stop, Long Xiaoyun went over and pulled him, telling him not to move.

Long Xiaoyun and the others still have other tasks this time, and after following them to Xiaomao Country, they still have to investigate the problems there.

Because Qin Yuan felt that it was not that simple for these scientific researchers to be taken away. There must be some changes in the local area, and she was asked to solve the problems there.

But it would definitely be safer to be there, at least not in such a big danger. Dayong even slapped himself in the face. He regretted that he said those ugly words to his captain back then.

Sitting in the car, he kept meeting, and could only leave with his eyes open. He vented silently, punching the seat cushion in front of him one after another, and his entire right hand was completely swollen.

Long Xiaoyun didn't have time to comfort him, but he couldn't stand it anymore, "If you want to fight, don't care about my business, just don't damage my car. This car has been with us for a long time ."

Hearing this, Ah Cheng was a little harsh, and felt that it was too unkind, "Anyway, you should let him vent, his personality is like this, and our captain has done so much for us, we are regret."

"Who are we? We are members of the Special Forces, and you are still acting like a housekeeper. When you regret it, go and complete the mission with us immediately!"

Long Xiaoyun didn't give them any face at all, and explained that the task this time was cold and without any emotion, and shocked Dayong with time.

In her opinion, these are just two different missions, they are handling it in Xiaomao Country, and the rest Qin Yuan leads them to rescue the scientific researchers there.

Qin Yuan also set off with the team, and they returned to the previous place, planning to start searching from here.

Chen Ou didn't say a word along the way, he just held his gun silently, ready to attack at any time, because he wasted a lot of time at the border, and it was already past 10 o'clock in the evening when they came back, It was pitch black everywhere.

The car was driving all the way Qin Yuan stopped suddenly, he saw the flames in front of him, "Get ready, let's play a little game, remember our current identities, put on all the veils, don't let them see our faces."

Chen Ou was very disturbed. He didn't expect Qin Yuan to say the attack was so easy, but he didn't know how Qin Yuan judged that a fight was going to happen ahead. What if the refugees were there?

Qin Yuan sorted out his equipment, and then put the hat on his head, "Everyone will shoot at ease later, it is absolutely impossible for civilians, only militants dare to light fire under such circumstances, and they are still outside."

It was only when Chen Ou heard this that he suddenly realized that he slapped his head and made the problem more complicated. The common people at night wanted to hide quickly, and it was impossible to wander outside, so there were only these militants.

Qin Yuan asked them to keep the leader as much as possible. He also needed to interrogate other information. Among these militants, they all obtained information from each other, so they must be able to know something.

Li Erniu couldn't wait a long time ago. He nodded with his equipment and started to head forward. At this time, several people in the firelight also noticed them.

But from a distance, they saw that they were dressed and had no intention of shooting. After all, the conflict between the two sides would not be so fast. However, Qin Yuan shot directly before they were ready.

Qin Yuan took the lead in the charge, and his speed was very fast. In an instant, four pretenders fell in front of him. He kicked away the tent next to him, only to see an armed leader sleeping inside, and a woman next to him.

The woman's face had already turned pale from fright, and gunshots rang out everywhere outside. The armed leader quickly tried to reach for the gun next to him, and Qin Yuan directly pierced his wrist with a single stab.

Then Qin Yuan dragged out the armed leader. He looked at the clothes on several people and frowned.

"What's going on? We don't have any conflicts with your organization. Why do you want to attack us? You are deliberately creating conflicts. We said that the common enemy is not us."

Qin Yuan smiled. He already spoke fluent local dialect, so this person didn't notice anything. Qin Yuan took out the photo and threw it directly in front of him.

"Do you know these people? Do you know where their organization is and where they were taken? Are there any other organizations?"

The man was directly held to the head with a gun, so he dared to say nothing, he could only explain in detail, he did know this organization, at first they were a local security group, and gradually there were their local tissue penetration.

Most of their organizations are mercenaries, but because of the sudden outbreak of war, their personnel are somewhat scarce, and they have also begun to arrest local civilians to make up for it.

This person doesn't know about other things, but he also provided an important clue, which is their general base. Generally, they will go to a place called Aditya in the south, and that place is their general base.

"I've already told you everything I know. The details of this organization are all over there. Their power is very large, and they can be regarded as an organization that stands in a neutral position."

Qin Yuan smiled slightly, but he didn't intend to let the people in front of him go. These guys are doing all kinds of evil anyway. After speaking, a throwing knife pierced his throat directly.

Chen Ou felt that the blood next to him had already splashed on his body. He had indeed participated in several operations before, especially shooting yesterday, but this kind of face-to-face death still made him a little uncomfortable, and he just felt nauseated.

Qin Yuan picked up the clothes on the ground and wiped the knife, then put it back into the scabbard, then waved for everyone to get in the car, and go to that place now.

Looking at the corpses on the ground, the others did not feel any discomfort. They have long been used to such scenes. There were many more serious ones before. They entered those armed organization bases and those criminal groups. This is more.

Not long after the vehicle drove out, it stopped suddenly. Chen Ou quickly ran out of the vehicle and vomited beside him.

After a long time, Qin Yuan came down, handed him a bottle of water, and patted him on the back, "Relax, the four of you will not be able to bear this kind of situation at close range for the first time, but there is a process, this time You should come to our red blood cell team to study."

Qin Yuan said it very easily, he could only nod his head repeatedly, and in this way, at dawn, they finally reached the south, where all the armed groups are really connected with the local villages.

It is said that it is their general base, but it is actually directly hidden in the village. Those civilians and these armed groups are all together. These armed groups appear to protect these civilians.

In fact, they are all fighting for their own strength. They need supporters and fresh strength. These civilians are the best source.

As soon as Chen Ou came down, he thought that Qin Yuan would discuss with them the specific method of attack and how to attack, but Qin was willing to throw the grenade over, blowing down the earth wall next to him, and a big hole was exposed in an instant out.

Then he walked in with people and heard a burst of gunshots from inside. He also quickly reacted and went in with him. He shot and killed those militants without saying a word, just like a **** of hell. .

The reason why Qin Yuan didn't do anything before was because he was concerned about his identity. He was worried that this identity would bring trouble to the country, but now that he has put on a disguise, he won't be afraid.

The militants in front were swearing, and a rocket hit them directly. Li Erniu quickly hid to the side, and the buildings on the side were completely blown down.

"Hahaha, this is too enjoyable."

Chen Ou just felt that these guys were all monsters, and it was fine to have no fear in this situation, and he was so excited that Li Erniu rushed out with guns in both hands.

In his opinion, this was an act of courting death, because there was no cover in front of him, but the next second he knew why Li Erniu was so confident. He Chenguang, who was next to him, set up a sniper rifle to **** him, Get rid of all the dangers around you.

At this time, Qin Yuan had already rushed in, and the inside was even more chaotic, with gunshots everywhere, and he couldn't tell the difference for a while, but fortunately, Qin Zhengyang ran over to take him.

"Captain Chen, don't worry, Brother Qin told me to follow you, and I will cooperate with you if there is any problem."

It is said to be cooperation, is actually protecting him, Chen Ou felt a little embarrassed, he also wanted to prove himself, and quickly fought back.

Qin Yuan had already reached the base camp. He was looking for the whereabouts of those scientific researchers, so he grabbed someone at random and hypnotized them on the spot.

Now the inquiry is the least whereabouts, so he directly hypnotized, and soon he found the whereabouts of those scientific researchers. It was in the building behind, a small earthen building behind that, and several scientific researchers were trembling behind the wall. .

The militants next to him were struggling to fight back. At this time, an old man with white hair came in, "Bring all the materials, we have to transfer them, and they are here again."

At this time, the slightly older researcher felt that something was wrong. He didn't know what was going on, and why he was being attacked all the time?

"Mr. Hall, I think you should give us an explanation. What is going on? You promised to give us safety before, and why is this situation different from what you imagined?"

Chapter 1744: the conspiracy

What the scientific researcher said was to the old man who just walked in, but the old man forced a smile.

"Mr. Chen, our current cooperation is also very good, and don't worry, we will definitely prove your safety. Which extremist organizations are too cruel, don't worry, we will definitely protect you."

"I always feel that something is not right here. Why don't we go back to China? Before we received the situation that someone would come to pick us up and return to China, but why are we always in these places?"

"Mr. Chen, you should not push yourself too far, and now is not the time to discuss these things. I will give you a reasonable explanation later. Let's go now."

At this time, a burst of gunshots came, and Hall did not turn his head in surprise, only to find that a heavily armed man had rushed in and shot at the people in front of him.

"Don't be dazed, hurry up, don't worry, I will give you a perfect explanation later, you should trust us and the country now."

Although the scientific researchers in front of them were a little hesitant, they didn't think too much. They turned around and wanted to go outside, but this time they underestimated Qin Yuan's speed.

Qin Yuan's goal was for those scientific researchers to quickly deal with the surrounding people. Unexpectedly, a militant on the side was so desperate that he pulled away the grenade in his hand and ran towards Qin Yuan.

Qin Yuan's eyes were quick and his hands were quick. Two throwing knives hit him on the leg. The militants emphasized that a grenade rolled beside him, causing a huge explosion. Half of the small building was blown down.

However, the old man who had been urging these scientific researchers to run together just now left them behind, picked up the things on the table, and ran outside.

The scientific researcher who was talking to him just now sensed something was wrong, stood up and wanted to chase after him, but a burst of gunshots came from behind, and he was so scared that he said back, the two sides were fighting fiercely behind.

A stray bullet hit the old man's arm directly, but the old man didn't flinch in the slightest, and continued to run outside, rolling directly out of the rear window of the building.

Qin Yuan quickly dealt with those militants, and then came to those scientific researchers. They all raised their hands with terrified expressions on their faces.

"What are you doing? Don't kill us."

"Don't worry, I won't kill you, I'm here to rescue you, follow me first."

These scientific researchers felt a little curious when they heard this, and turned their heads to look at it. There was something wrong. Qin Wukong tore off the veil slightly to let them see his face clearly.

"Don't worry, I am indeed here to rescue you, and our team has already arrived, don't worry, you will not be in danger."

"But what's going on? Why do you attack your own people?"

Qin Yuan felt a little strange when he heard this, what did he mean by this? Chen Ou also ran in, but he was more embarrassed, and when the researcher saw the tower, he was also stunned.

"Captain Chen! I didn't expect you to be alive. Didn't they say you were dead? That's why we left with the rest of us."

This made everyone more and more muddled. Later, with the explanations of these scientific researchers, they knew the real situation. Before Chen Ou led the team, they had already conducted some docking with them.

So it's not surprising that this scientific researcher knew Chen Ou, but at that time they came in batches for the sake of safety. Something went wrong.

It is accurate to say that these scientific researchers did not see the approaching people at all, but another group of people rushed in directly, and said that the base has been targeted and will immediately start the self-destruct procedure, so they need to be taken away quickly. Walk.

The person who took the lead at that time, he was very sure that he was from the Yan Kingdom, and he was still wearing a uniform uniform, so these scientific researchers followed them and evacuated without much thought.

Everything corresponds to Qin Yuan's previous deduction. He was not coerced to leave, but was completely deceived. They didn't even know that it was actually a group of extreme armed criminals in disguise, and then asked them to hurry up. leave.

Originally, according to their previous plan, they brought the research materials and returned to China with everyone. This was correct, but the people who came to listen to them at the time said that there was a problem on the road, and they could not go back now. They had to be transported to other places.

They encountered such ambushes along the way, in fact, it was Qin Yuan who was rescuing them, especially the last time, but they didn't know it at all, and thought they were attacked by militants.

Chen Ou felt a little strange, then where did the news leak out, "After I contacted you at that time, did you meet anyone else?"

"Yes, it was a local official who came to inform us that he wanted us to hand over the research plan as soon as possible, but how could we give them this thing? It's just such a small episode."

Qin Yuan reassured Chen Ou that Long Xiaoyun had been asked to investigate over there, and the results of the investigation would be found out soon. The most urgent task now is to bring these researchers back as soon as possible.

At this time, when he was a little older just now, all the scientific researchers slapped their foreheads and grabbed Qin Yuan's hand, "It's not good, if that guy just now is a fake, it's over, all our research materials are in that In the computer bag, if he takes it out now, then our years of research will be in vain."

Qin Yuan cursed secretly, these guys are really cunning, he turned his head and glanced at Chen Ou, and ran out a little uneasy, he said hello to He Chenguang in the distance.

Soon He Chenguang came to this building, there were traces of burning everywhere, and there were bursts of gunshots outside, it was Li Erniu and the others who were dealing with the remaining people.

"Brother Qin, what do you want from me?"

"Remember now, stay close at every step, you must protect the three of them, they are alive, you are alive, understand?"

"Brother Qin, don't worry, leave it to me."

After finishing speaking, Qin Yuan picked up a submachine gun from the ground and chased him out. He would definitely chase that guy back, and let him run away before, this time it was absolutely impossible.

There were no cars in this area, so they couldn't run very far, so Qin Yuan looked at the distance intently, only seeing a burst of yellow sand rising in the distance, it seemed that the car had just passed by.

Qin Yuan's speed was very fast, while Hall, who was driving at the moment, was cursing on the phone.

"Damn, what's the situation now? The people you sent are too weak. They'll be dealt with after a few shots. How can you ensure safety like this? I won't leave things to you in the future."

The person on the other side was also very surprised when he heard this, so he quickly explained.

"Mr. Hall, this shouldn't be possible. We sent today's team, and we have cooperated with you many times. This situation should not happen."

"Don't talk nonsense now, I'll tell you my coordinates, now I'm being chased..."

Before Hall could finish his sentence, suddenly you ran out of bullets and hit the rear windshield directly. The windshield shattered instantly, and he turned his head in horror.

He only saw Qin Yuan chasing towards him on a motorcycle. He felt that the person behind him was a lunatic.

"Did you hear that? I'm being hunted down now. I need your rescue. Send the top team to rescue me immediately."

The person on the opposite side smiled, and the voice was full of sarcasm, "Oh, so that's the case, but Mr. Huo, we are not your private corps, we are the security group."

Hall cursed secretly, this guy is really too greedy, he gave so much money before, he just wanted to buy insurance, but in the end he got nothing, instead he was chased into this embarrassing state, and now he is ashamed to talk to him Ask for money yourself.

But following the gunshots from behind, he didn't dare to hesitate any more, so he could only gritted his teeth and said, "3 million dollars, hurry up, I must send someone over now, I should have a tracking number on my phone." !"

"Hahaha, we are all in business. Of course we understand this. We will meet all the needs of customers. Don't worry, I will give you priority in sending air support now."

After hanging up the phone, Hall kicked the accelerator and rushed directly to the earth wall next to him. The earth wall was completely hit, and he kept running around in the alley.

Qin Yuan kept chasing after him. This guy was really not good at driving. He suddenly hit the electric pole in front of him and stopped completely. The whole car started to catch fire from the front. Jumped out of the car.

There were civilians everywhere on the street. They didn't know what happened, they only heard the powerful collision sound, and they all ran towards the house.

So the street was chaotic for a while, Qin Yuan could only leave the car behind, jumped on the earth wall next to him, and kept chasing the people below.

At this moment, there was a roaring sound in the sky, Qin Yuan raised his head, it turned out to be several drones, and the drones were obviously targeting the fleeing man in front, he felt a bad feeling in his heart.

In the next second, the drone started to shoot indiscriminately. As long as people or any buildings appeared around the man, they kept shooting, and then a drone on the side even threw a small missile.

Civilians fell everywhere, and the screams continued. Qin Yuan stared fiercely at the man in front of him. They were really a group of beasts, and he could attack these unarmed civilians.

He rushed forward to mention the crying child on the street, and taught him into the hands of the woman next to him.

Now he can save only one. He took out the throwing knife and pointed it at the drone. First, he shot two throwing knives. The drone that was shooting just now didn't notice that someone would suddenly attack the one in front and was completely knocked down. Come.

However, the UAV that launched the missile at the back flew relatively high, beyond Qin Yuan's attack range.

Taking this opportunity, he quickly fled into the alley. There were people everywhere, which gave him a lot of cover. He took out a gun from his waist and kept shooting at the people in front, yelling and getting away.

"Damn it, they're all a bunch of untouchables. If you want to stand in front of me, get out of here if you don't want to die."

After being disturbed by such a commotion, the civilians in front hurriedly gave way. This guy is a lunatic, while Qin Yuan in the back is doing his best to save the people around him, especially the drone is still attacking.

Qin Yuan jumped straight onto the building next to him. He kept climbing, and the drone seemed to have locked on to him and was attacking him. The windows on the side were completely smashed, and crackling sounds rang in his ears.

His speed made it impossible for the drone to aim. The next second he stood on the balcony and fired at the drone in front of him. The drone carrying the missile was shot down instantly, and there was an explosion in the air. sound.

He quickly squatted down to dodge, but to him, this little damage was nothing at all, he shook the mud off his head, and he jumped down again, and the whole street was full of screams.

He will definitely catch that bastard, and won't let him run out like this. At this moment, Hall was running for his life, and soon he received a call.

"Mr. Hall, I'm curious who you offended? This guy is so powerful that he even killed our drones."

"You guys are ashamed to say that your drone hit my scalp just now. If I wasn't agile, I would have been beaten to death by you!"

"There is nothing we can do now. After all, we have to ensure your safety first, and we have to solve the dangers around you. Besides, our support must be in place as soon as possible."

"I don't want to hear this. That lunatic is still chasing me. When will your men arrive?"

"Ten minutes! We have sent the nearest team to pick you up. UU Kanshu www.uukanshu.com is really tough, but we have other things."

The man on the opposite side smiled even more when he said this, he still had some reservations, Hall immediately understood that this guy just wanted to increase the money.

"Enough, I know what you think, as long as my safety can be guaranteed, I will double this money! Five million dollars."

"make a deal!"

Hall hung up the phone. He didn't know when the so-called support would appear. He kept running, just wanting to get rid of Qin Yuan behind him.

At this time, Qin Yuan also locked onto his figure, and just about to catch up, he heard several children crying nearby, and one child's leg was covered with blood.

He really couldn't bear this situation, so he could only go over to check it first. Just when he just squatted down, a burst of system notifications had been sent. It was an extremely dangerous reminder. He subconsciously flipped back, directly dodged in the past.

Chapter 1745: another conspiracy

He just dodged, turned around and saw a woman holding a broken knife and slashed towards his head. This woman looked very extraordinary, Qin Yuan didn't hesitate too much, the flying knife in his hand pierced directly woman's chest.

The woman's eyes widened just now, and the broken knife in her hand fell to the ground. At the same time, the child next to her seemed to know that the plan had been leaked, and started running towards various alleys.

Qin Yuan frowned and looked at the people around him. Some of these people were terrified, some were running away, and some were injured because of the chaos just now.

The armed forces in this place are more troublesome than he imagined. At least these militants have been completely integrated with the local people. Their forces are mixed together, and the local people will cooperate with them.

It was only after such a short effort that he stood up and chased after the man just now, but the man before had completely disappeared, but he did not give up. Shuttle in the streets and alleys non-stop.

Qin Yuan kept running in the alley. At this time, several unarmed civilians appeared in front of them. Their expressions were very fierce. In the blink of an eye, the civilians in front had been knocked down by Qin Yuan.

Before the person on the side could react, he let out a scream, with a flying knife stuck in his right hand.

The other person just turned around and wanted to run away. He knew that he was no match for the person in front of him, but the next second his body was out of control and he froze in place.

Qin Yuan hypnotized him. He wanted to see who was directing them. As long as he could dig out the person behind him, he would be able to find the location of the man who ran away just now.

The order they received came from a house in the southwest, where they received the order and began to act.

He wrapped his turban and continued to head inside, kicking open the door. When he entered the room, he only saw three people inside turned their heads in unison, staring at him in surprise.

The man sitting in front of the computer was manipulating it, and he could see a cursor moving on the map. Before he could take a closer look, the man sitting at the door just now walked over cursing with a gun in his hand.

Qin Yuan didn't show any kindness, and shot straight to the head, and the person next to him was about to make a move, but he shot through the palm of his hand.

The man was lying on the ground screaming. Qin Yuan walked over and kicked the chair away to check. If he guessed correctly, the cursor on the map was the location of the man who ran away just now.

"I didn't expect you to be really generous, and you have attracted so many people for this person."

"Who the **** are you? You dare to provoke us. You know that once your identity is found out, you won't even be able to get out of here."

Qin Yuan sneered, and then shot him in the head without hesitation. Threats against such people are useless, so they simply wiped out all the evidence. Besides, they couldn't find themselves even if they wanted to.

He checked in the computer, and it seemed that he was not in a hurry to chase the fleeing people. After all, the clues were all in it, and he had to figure out what organization was behind it.

According to the information in the computer, they all belong to a security company called Hongan. This security company is a mercenary group. Qin Yuan doesn't know anything about this group, and he didn't have much contact with it before.

Moreover, Qin Yuan also found another clue. They have sent reinforcements to meet the fleeing person. The fleeing person is called Huoer. Originally, Qin Yuan thought there might be some connection between them. It seems that they are simply hired. relation.

If this is the case, then it is easier to solve. After all, those mercenaries are also for money, and there is not much information about the others. They can only be found here. It is not clear who is behind Hall.

Qin Yuan glanced at the position of that coordinate point slightly, this guy was running away really fast, while Hall on the other side was running away non-stop, he was on the phone while running.

"Where is the person you are responding to? Didn't you say ten minutes ago? He hasn't appeared yet, and that lunatic will definitely catch up."

"Mr. Hall, don't worry, we have been following your location, then you parked a black off-road vehicle, you can just get in the car."

Hearing this, he was slightly relieved. No matter what, let's escape from this place first. That guy should be the one who wiped out the entire organization that hunted them down last time.

He learned some news. Although they escaped, all the militants who came to chase them were dead, but he has never been able to figure out the identity of this person, and until now he has no information at all.

But fortunately, he has already obtained this information. It is a pity that those scientific researchers have not transferred the remaining 10% of the information. That bit of information is nothing to him, since most of them are with him anyway.

When Hall ran to the intersection, he saw an off-road vehicle, and there were several armed men standing beside him. He waved from there, and several people rushed over.

"Mr. Hall, don't worry, we will **** you safely. Where do you want to go now?"

"As long as you leave this ghost place, you can go anywhere."

Just as he got into the car and sat down, he heard the sound of a motorcycle coming from behind, and he felt a bad feeling in his heart, could it be that guy?

Sure enough, just as he turned his head, he saw the guy with the black veil again. Fear was revealed in his eyes. people drive.

"Damn, what are you still doing? Hurry up and drive away from this place."

"Hahaha, sir, you are not joking with me, just such a person, you want us to leave like this, since he is a threat, don't worry, we will deal with him now."

The captain sitting in the co-pilot straightened out the clips, then jumped down, and quickly fired in Qin Yuan's direction. The team members in the back didn't even think about it. They thought that this gun would definitely be able to deal with the person on the other side.

However, Qin Yuan stepped up the accelerator and directly slammed the motorcycle into the direction of their car. The huge collision almost caused the car to roll over, and the driver cursed secretly.

It has to be said that these guys cooperated closely. In the next second, someone threw a grenade to make up for it. Qin Yuan's speed was too fast. In the blink of an eye, he was not seen amidst the explosion.

The captain just now was very cautious, he just stared at the opposite direction of the smoke, it was so strange, he was sure that the grenade should not have hurt him.

But the team members in the car were very proud. He felt that the explosion range avoided such a powerful impact, and the steel **** that exploded just now could definitely beat that guy to a pulp.

"Captain, we should go too, that guy should be dealt with, if not, I'll throw it away..."

Before he finished speaking, he stopped abruptly, but when the team members behind saw him, their eyes revealed panic, because there was a throwing knife stuck in this guy's head.

"Not good! Up there! Be careful."

At this time, Qin Yuan was on the roof of the car. His speed was very fast, like a ghost, he kept attacking them around. The captain was a little bit collapsed, and they kept shooting.

When everyone was in a mess, Hall held his head tightly, "Stop the fight, find a way to drive the vehicle away and throw him off, he is a lunatic."

But how is it possible to drive in such a situation now, the captain is behind to provide support, the team members in the car suddenly vomit blood, only to see that he has been shot in the chest.

Five minutes later, the captain just now fell into a pool of blood, and he still had a trace of breath. He could only watch helplessly as Qin Yuan walked towards him and stepped on his shoulder.

"You... who the **** are you?"

"Kill your people."

Qin Yuan's simple sentence finally ended his life. At this time, Hall in the car was already frightened. He walked over and kicked the door of the car, took a slight look at the guy inside, and then directly He lifted the computer bag from the seat.

It seems that all the information is in this, but he still has a problem to solve now, that is, how did these guys do it? Where is the information leaked out?

Hall was full of horror, Qin Yuan didn't even bother to ask him, and directly invaded the information in his mind, wanting to find out more, when he invaded, he discovered another bigger conspiracy, not just the current information This is simply a drop in the bucket.

Half an hour later, Qin Yuan drove the car in a hurry, then opened the door, and kicked the person in the car off. This person was Hall, and the scientific researcher next to him rushed forward. He just saw that guy's His face was instantly relieved.

"That's right, it's this guy! Is the information in there? That information is the painstaking effort we've been studying for several years."

"Don't worry, the data is still there."

After Qin Yuan finished speaking, he raised the computer bag in his hand. Li Erniu and the others cheered happily. After all, this meant that their mission was over and they could go back now, but Qin Yuan took everyone inside first. room for a short meeting.

"Let's not go back in a hurry. By the way, have you contacted the Dragon Team? What did they say? How is the progress of the investigation?"

He Chenguang quickly retrieved the information from Long Xiaoyun. Long Xiaoyun had already called before, and they went to a local organization office according to the last clue, but unfortunately the building was empty.

When I investigated further, I found that all the relevant personnel were completely dead, and there was no fight at all. If it was Qin Yuan, at least some other clues could be found. His ability can be invaded at any time. But Long Xiaoyun and the others had no choice but to find out these situations.

"Dragon team just called to ask what to do next? The body over there has been processed. By the way, Captain Chen and the others have already gone back."

"Well, let them reach the border area, we will send these three scientific researchers there, and let them pick them up first."

He Chenguang nodded, but he quickly realized, "Brother Qin, what do you mean? Are we still going back?"

"That's right, they didn't find any clues. That's because the person who knew about it has been murdered. The clue I have now is an organization called Black Hawk."

Everyone didn't expect Qin Yuan to go out and not only retrieve the information, but also grasp so many clues, and Qin Yuan also told them a conspiracy.

From the beginning of Chen Ou's actions to the final scientific research personnel being taken away, everything is inseparable from the Black Hawk organization. All of this is under their control. They installed monitoring equipment in the original laboratory.

It is to take these scientific researchers away. Although the information has been obtained now, the original weapon information has been transmitted.

And the weapons developed by these scientific researchers will be used by them in a project in cooperation with Yan Guo. In fact, not only Yan Guohe, but several countries have such cooperation. This is a cooperative project of their local government.

In order to profit from it, these militants want to disrupt normal transactions and then completely monopolize the local market, so they want to use this top-secret weapon.

According to the time from the beginning to the present, that top-secret weapon has definitely been manufactured by them. After all, he didn't intercept too much information from this guy's mind.

Even Hall doesn't know about the latter part of the situation, so he still has to go to the Black Hawk organization to find out the specific situation.

Qin Yuan immediately asked He Chenguang to look for cooperation projects in the past two years, especially in natural gas or oil. After all, these two are the key points. Who knows where they will destroy, this is also a local characteristic.

Everyone knows that this matter is not trivial, UU Reading www.uukanshu.com After all, the domestic side is probably still in the dark, who knows what harm will be caused by the things that have passed through their black hands?

He quickly found clues. He said that in recent years, Yan Guo and their cooperation projects have only been natural gas, and he doesn't know if they want to use that secret weapon on this natural gas.

Qin Yuan looked at Hall who was trembling on the ground. After all, he didn't know why he didn't say anything. The other party had already grasped so many clues, which made him very scared. If the organization above him found out, it would be an act of betrayal. .

I really don't know about other things, but Qin Yuan is sure that the possibility of natural gas is very high. It is still useful for this guy to stay. He is like a middleman. This time he just wants to bring these materials to the branch below.

So what yuan wants to use this opportunity to sneak in directly, and then completely disintegrate them internally. No matter what, he has to learn more information to see if he can stop this conspiracy.

Now they don't know the specific implementation time, but this guy is so anxious to send this material down, it should not be implemented yet, they still have time.

Chapter 1746: Escort researchers

Now Hall is already overwhelmed by fright. Compared with him, he is more afraid of punishment from the organization, which is very terrifying.

"No! You kill me directly now, and I won't follow you back."

This guy actually made such a request, Qin Yuan walked over and kicked him on the shoulder, telling this guy to shut up.

It seems that the organization is very terrifying, it can make them so afraid that they would rather die than go to the organization, but this is the only clue.

How could Qin Yuan miss this opportunity, and knocked the person in front of him unconscious with a single punch. He turned his head to look at He Chenguang and said, "This guy is very dangerous. You and Er Niu stay here. You must keep an eye on him. He has a cell phone." There is a chip in it, which has been destroyed by me."

Now Qin Yuan wants to send these researchers to the border, hand them over to Long Xiaoyun first, and then come over here to join them in that organization. They must stop this time, and he has already talked with him. The situation is explained above.

Long Xiaoyun also got in touch with the country and got the latest progress. He just knew that there will be a natural gas cooperation project in three days. This project has always been carried out with this side, and the oil will be next month. thing.

That being said, it is very easy for them to tamper with natural gas and use that super weapon to sneak into natural gas. Qin Yuan does not know exactly what kind of conspiracy is there, and he can only find out by entering the organization first.

Wang Yanbing whispered beside him. He felt that since he already knew that it was a natural gas problem, wouldn't it be fine if everyone didn't come to cooperate with them after three days?

"Your boy is really simple-minded and has well-developed limbs. Don't even think about it. This is an international cooperation. Can you not cooperate if you say you don't cooperate?"

Wang Yanbing was a little embarrassed when he was told, he scratched his head, he really didn't think about it, "Okay, you guys are amazing, I really didn't think about this, but it's not their problem, after we explain the situation, let them make preparations too Is that enough?"

"You brat, think about it carefully. People ask us how we know this news. How can we say that our armed forces have quietly infiltrated?"

Before they could tell about this situation, they probably would have been arrested directly. Their team is now hiding their identities when they enter here.

If it was discovered that they were from the Yan Kingdom, the situation would be unclear. In addition, the various organizations in this place were also distributed in various places, and the influence was too wide and very chaotic.

In this way, Qin Yuan went outside to check the vehicle, let the three researchers get on the vehicle, and sent them out first.

At this time, the researcher who had been leading the conversation just now turned his head. He looked at Qin Yuan, "What do you mean? Just let the three of you **** us? Wouldn't this be a bit too hasty?"

"Why do you think it's sloppy? In fact, I was able to **** alone, but for other safety reasons, I called the two of them, and Captain Chen had to go back."

Chen Ou originally wanted to refute a few words, he wanted to stay and help together, but seeing Qin Yuan's resolute attitude, he felt that staying would be a disservice, so he might as well take this opportunity to go back first.

But the researcher was very unhappy, he felt that Qin Yuan didn't pay much attention to them.

"Captain Chen, as for the Captain Qin you mentioned, I have never heard of it, but you are very unprofessional. You told us that those are militants, but those militants are more caring than you. They are all right We protect it, so we don't know what's going on with you."

Qin Zhengyang was unhappy when he heard this, Qin Yuan didn't bother to argue with them, got into the car first and urged them to hurry up.

"I don't think you should look down on our captain. Our captain can be said to be one against one hundred. No matter how powerful those militants you saw just now, they were still solved by him."

Having said that, the researcher didn't know what to say for a while, and could only follow their arrangements, and just like that, the few people finally got into the car and drove all the way.

It's still a long journey from here to the border, and Long Xiaoyun's side should arrive later, so they went there in advance to make preparations.

I just didn't expect that several armed forces were crossing on the road, and the bridge on the side was completely blown off. They could only venture through various small towns, and these towns were also the most dangerous.

Qin Yuan couldn't help being a little annoyed. These scientific researchers are too weak. If they can't do it, they won't be able to catch up. Moreover, there are more dangerous factors along the way. Only driving is the fastest way.

But he will soon enter another town, and he is very reluctant to enter these areas. The civilians he saw before really impressed him, and they can be united with the local armed forces.

When he was about to reach the town, Qin Yuan took out some sets of clothes from under the cushions at the back and asked the three of them to change first.

"Remember, don't show your faces, just keep your eyes."

Qin Yuan had to drive along the way, and he had to think about too many issues. He also had to consider whether the surroundings were safe, and various problems surrounded him all the time, so his attitude was a little cold.

The person who led the team among these scientific researchers was called Chen Qiang. He was always short-tempered, and he was not happy to see Qin Yuan's attitude. They are all very respectful.

This time the vehicle finally entered the town, but it was not so easy after entering. The entire town was full of civilians. They were queuing up to receive relief items issued by the government, so the entire street was blocked.

It's approaching noon now, the temperature here is higher than the sun directly shining on the vehicle, the whole vehicle is like a steamer, making everyone a little out of breath from the heat, Qin Yuan and the others are used to it.

But these scientific researchers were different. They had been beaten and suffered these crimes before, and Chen Qiang, who was next to him, suggested that he could buy them two bottles of water first.

"You keep us from showing our faces, and you can't go down. You have to provide us with something to drink now."

Qin Yuan didn't speak. In this place, he is the only one who is relatively proficient in the local language. He doesn't want to have other exposures, but he can't get off the car casually like this.

"Captain Chen, come here and drive. I'll buy water. If there is any emergency, just drive and leave. Don't worry about me."

Chen Qiang pouted at the side, thinking that Qin Yuan was just playing with his leadership style, and he didn't know why these team members insisted on listening to him.

As soon as Qin Yuan got out of the car, he couldn't help complaining, "After Captain Chen went back, I've already agreed with you Captain, his name, and the location of the army. I have to make a complaint about him. The attitude is simply a big problem."

Qin Zhengyang exploded immediately when he heard this. This guy had the nerve to say that he had been displeased with him all the way, and now Brother Qin just went down and started talking bad things here.

"I don't know what you think, and at your level, you still want to complain about Brother Qin, and you don't care about your own weight."

Chen Qiang was originally a relatively senior researcher, but now he was wronged by a kid in front of him. He didn't know Qin Zhengyang's ability, and he didn't look very old, only eighteen or nineteen years old.

So I must be unconvinced in my heart, "Hey, you little comrade, it's not good for you to talk like this. I'm expressing my opinion. Your captain doesn't know how to say it. He exploded at one point, and his words are also very bad. Be polite, and you too."

"Then if you are really that powerful, don't wait for our rescue if you are capable. Wouldn't it be better if you can go back to the country by yourself."

"you!"

Chen Qiang was so angry that he couldn't say a word. When he adjusted his glasses and was about to speak, Chen Ou, who had been silent beside him, spoke.

"Professor Chen, don't talk about it. It's not easy for us to come here this time. Two of our team members have died because of this incident. They also have families and parents, so Captain Qin wants to ensure our safety. Take all of us back home."

After saying this, Chen Qiang, who was extremely arrogant just now, was speechless for a while. After all, someone sacrificed, and it was for them, so he couldn't say anything more.

Chen Qiang didn't say anything, but the person next to him was not happy, so he said something directly.

"This is your job. You didn't finish the job yourself, and now you want to talk about moral kidnapping on our heads. Do you think this is past?"

When Chen Ou said this, his eyes were red. He was immersed in the picture of his former comrades-in-arms. Unexpectedly, when this guy said this, his eyes were red and he stared fiercely at the researchers behind him.

"Hey, what's your attitude? It's impossible for you to hit us. Let me tell you, you don't have the qualifications."

Just when the conflict was about to erupt, Qin Yuan came back and patted the car door, "Didn't Captain Chen see that the car in front has already left? Let's go quickly."

Chen Ou sighed silently, and suppressed the fire forcibly. Qin Zhengyang wanted to say something, but Chen Ou didn't say anything. He also felt that it was not good to expand the contradiction, and several people closed their eyes. mouth.

But when they saw the water that Qin Yuan brought, Chen Qiang had another opinion, because the water that Qin Yuan brought was in a bottle, not the kind of packaged mineral water.

"Captain Qin, I'm not making a fuss over a molehill. In this area, you also know the unpackaged water. Who knows where they get it from? Whether you can drink it or not is a matter."

Just after he finished speaking, Qin Yuan took the kettle directly, raised his head and took a sip without saying a word, and then threw the kettle to him.

"How is it? It's okay this time. I've tested it myself. I'm fine. You can drink it at ease."

"Your behavior is really too barbaric."

Qin Yuan sent his eyes directly, and Chen Qiang, who was talking just now, immediately shut his mouth. There was murderous look in the guy's eyes, and he really didn't dare to say anything.

These scientific researchers had no idea that it was a period of war, and even the local civilians had nothing to eat, let alone them. Everyone was queuing up to receive relief supplies from the local government.

It is not easy to have this kind of water. It doesn't mean that you can buy it with money. Under the current situation, these materials are more expensive than anything else, and you really can't buy them with money.

Chen Qiang was a little disgusted. After all, Qin Yuan took a sip just now, and he didn't touch the water in the kettle. Qin Yuan glanced in the rearview mirror, and didn't want to argue with him.

Anyway, there is still a long way to go. If he doesn't want to drink this water, he can continue to be thirsty like this. There is no mineral water in the back, and he won't put it on these guys, because the situation will only become more and more complicated.

Vehicles are driving very slowly in these crowded streets, the streets outside are full of people, and gunshots can be heard from the side alleys from time to time, and gun battles are taking place in the side streets.

[Recommended, changing the source app to chase books is really easy to use, download it here and try it quickly.]

But just passing another street, everyone wanted to continue doing their business as if nothing happened. The local people are completely used to this model.

At this moment, a child ran towards the car, Qin Yuan asked everyone to roll up the windows quickly, the city wall was a little curious, after all, he had never seen the thing in the child's hand before, and it was still hanging on his chest. With some colorful flower-like things.

"Damn, I told you to close the window, are you deaf or something?"

Seeing that the child was getting closer and closer to them, Qin Yuan roared angrily, Qin Zhengyang quickly rolled up the window, and Chen Ou was not to be outdone, he directly raised the gun in his hand, the child showed timidity in his eyes, and then stood in place.

This time Chen Qiang quit. From the very beginning, he was fed up with Qin Yuan's irritable pattern. He felt that Qin Yuan was completely irresponsible captain.

"Can't you talk well if you have something to say? Besides, he's just a child. What do you think will be a problem?"

"Hehe, I don't want to talk about this with a bunch of nerds."

Qin Yuan was too lazy to argue with them, and kept honking the horn to urge the people in front to go faster. In this kind of street full of crowds, he became more and more uneasy, so the main thing is that any of these civilians Could be an instant enemy.

Chen Qiang was yelled at and felt very upset, so he simply closed his eyes and didn't care about the outside affairs. In this way, the vehicle finally drove out of this small town, and they needed to continue walking around the mountain road behind.

After getting out, it was much better. There were not too many vehicles, so they were unimpeded along the way. Chen Ou's tense emotions before had eased a lot. Not long after driving out, a researcher patted the seat.

"Captain Qin, stop the car, I want to go to the bathroom."

After the endless coma, Shi Yu suddenly got up from the bed.

He took a big gulp of fresh air, his chest trembling.

Confused, puzzled, all kinds of emotions came to my mind.

Where is this?

Afterwards, Shi Yu subconsciously observed his surroundings, and then became even more at a loss.

A single dormitory?

Even if he was successfully rescued, he should be in the ward now.

And my own body...how could there be no injuries at all.

With doubts, Shi Yu quickly swept his gaze across the room, and finally settled on a mirror by the bedside.

The mirror reflected his current appearance, he was about seventeen or eighteen years old, and he was very handsome.

But the problem is, it's not him!

My previous self was a handsome young man in his twenties who had been working for a while.

But now, no matter how you look at it, this appearance is only the age of a high school student...

This change left Shi Yu in a daze for a long time.

Don't tell him that the operation was a success...

The body and appearance have changed. This is not a question of whether to have surgery or not, but a fairy art.

He turned into a completely different person!

Could it be... that he crossed over by himself?

In addition to the mirror on the bedside which was obviously placed in a bad feng shui position, Shi Yu also found three books beside it.

Shi Yu picked it up and took a look, the title instantly silenced him.

"Necessary Beast Breeding Handbook for Novice Breeders"

"Postpartum Care of Pet Animals"

"Guidelines for Evaluation of Alien Beast Ear Girls"

Shi Yu: ? ? ?

The names of the first two books are quite normal, What is the matter with you in the last book?

"cough."

Shi Yu's eyes were serious, and he stretched out his hand, but soon his arm stiffened.

Just when he was about to open the third book to see what it was, his brain suddenly felt a sharp pain, and a large amount of memories flooded in like a flood.

Icefields.

Pet breeding base.

Trainee pet keeper. The website is about to be closed. Download the Xingxing app to provide you with one-click recovery of the great ***** Zilan Youyou from the beginning of I am a special soldier

Beastmaster?

Chapter 1748: Forced landing order

Seeing that the communication failed, Qin Yuan originally wanted to get another certificate, but he didn't expect that when he approached the office building, his body issued an early warning, no, a bomb had already been planted.

As Qin Yuan rushed out, he yelled at the civilians around him, because they were all looking for cover and desperately wanted to rush into the building.

In this situation, no one would listen to him, he cursed secretly, it was too late, he had no chance to go back and dismantle it, so he quickly grabbed the two people and ran outside, and then a burst of explosions sounded in the next second.

The surrounding buildings were shaking, and the building on the left completely collapsed. The power of the explosion can be imagined, and the soldiers on the side were completely blown away by the shock wave of the explosion.

The explosion had not stopped yet, and the armed men on the opposite side were already carrying rocket launchers towards this side, and they wanted to cover the retreat of the rest of the people.

It was very chaotic for a while. It was obvious that the situation was about to be reversed just now, but the situation changed again because of the bomb.

The whole scene was very chaotic, with bullets flying around, explosions and people crying, it looked like **** on earth, mainly because of the people around, they had nothing.

Chen Ou was really worried about that girl. After all, that child was so young, she didn't know what it would mean to stay. Those militants really killed anyone they saw.

He wanted to take a risk and see if he could rush over. After all, the situation was chaotic, but suddenly he felt a burst of warmth.

When he lowered his head, he saw that the little girl in his arms was covered in blood. He was a little surprised. What's going on? He just noticed when he was rushing forward with the child in his arms.

There were constant explosions around, and it was the fragments from the explosion that directly cut the child's throat. The child was twitching non-stop in his arms. He was a little panicked, and stretched out his hand to hold the child's throat tightly. .

I don't want the blood to flow out, but the child has been injured to the main artery, and the blood is gushing out, which is uncontrollable.

The researchers in the back frowned when they saw this scene. They didn't expect it to happen. Everyone wanted to come up to help, but they were still powerless. The child had gone through so many wars before, but he didn't expect to die in this place. the door.

Chen Ou's eyes were red. This child is only three years old. He just wants to live. What's wrong? These bastards! Thinking of this, he clenched his fists, turned around and wanted to rush over to fight those pretenders desperately.

Qin Zhengyang, who was behind, kept pulling him tightly, because now is not the time to be impulsive, "Captain Chen! Now is not the time to worry about these things, send the scientific researchers to each other as soon as possible, this is our task, have you forgotten?"

Hearing what Qin Zhengyang said, he turned his head and saw that the scientific researchers were all lying on the ground, holding their heads in their hands. Faced with such a tragic war situation, ordinary people are very afraid.

Now he is very helpless, he can only pull up the scientific researchers on the ground and **** them out first. Now he is covered in blood and looks very embarrassed.

And Qingyuan's side has been completely **** off. If these guys have conflicts with the local armed forces, then they can do whatever they want, but these civilians are innocent. These **** really thought of this when they saw people, and he didn't do it How kind.

He didn't care about the others, he took out his turban and wrapped himself up completely, without seeing any changes at all, and then rushed over with a submachine gun on his shoulder, the militants in the opposite car saw him shoot a rocket directly The bullet hit.

Those militants stood in the car and laughed. After all, in their opinion, that guy would never survive with this level of firepower.

However, what they didn't expect was that a figure jumped out of the flames. Before they could react, the submachine gun bullets hit them directly, and the laughter just stopped abruptly.

The driver of the car backed up crazily, wanting to retreat outside, but the willingness was so fast that he jumped directly to the roof of the car, stood on the roof, and gave the driver a fatal blow.

Several militants on the side wanted to rush over to save people, but Qin Yuan started working from left to right, submachine guns and throwing knives combined, and in a blink of an eye, the vehicle lost control and rushed directly to the fence behind.

He didn't want to cause any trouble before, but now these guys don't spare these civilians, and he can't bear it anymore.

In addition, Qin Zhengyang has successfully escorted those scientific researchers out. After all, they have certificates, and the soldiers on the opposite side also let them go.

Long Xiaoyun and the others were also very anxious seeing the panic on the other side, but there was nothing they could do. They couldn't get through now, and now the gate here had been completely closed, so it would not be so easy for them to come in.

Qin Zhengyang could only shout at Long Xiaoyun from a distance: "Captain Long, our love brother told you to ***** them back, and there should be something hidden about the matter over there, and we need to cooperate."

Of course, Long Xiaoyun understood that from the time Qin Yuan investigated the conspiracy, she knew that there must be some internal problems here, and now she is helping to investigate from the outside, since the organization has infiltrated from the small Mao country.

They must investigate together, and will never let anyone go, otherwise this time they only solved the superficial safety hazard, and it will definitely appear again next time.

In addition, it was only discovered by accident this time, and it would be too difficult to find out next time. Long Xiaoyun pulled Chen Ou, mainly because this guy stayed where he was, and kept looking outside.

"Don't look, hurry up, leave this place first!"

"But the opposite side is fighting, don't you ignore them?"

"Now that they're all here, what else do you care about, go away quickly, don't worry, take care of yourself, it will be the greatest help to them."

The researchers who followed behind frowned, why did the people who came to pick them up this time have such a temper, he watched for a long time before he recognized that the person in front of him was a woman, after all Long Xiaoyun had a neat short haircut.

And it's not so easy for them to go out from here. You're just at the border of another country, and you don't know how many dangers you will encounter along the way, so it's a long way to go.

Qingyuan's ability is relatively strong, and he is also very confident in himself, so he will let them go down to get some fresh air and buy water for them, but from the time they got in Long Xiaoyun's car, they only dealt with it in the car along the way, including going to the toilet. .

Long Xiaoyun didn't shy away from this at all, for the sake of everyone's safety, and her team members followed closely behind, dividing into two cars.

In this way, she was escorted all the way to the airport. Looking at the helicopter in front of her, Long Xiaoyun did not let go of any vigilance. It is too dangerous to be abroad, and various situations may happen. She will feel at ease only when she goes to a place she is familiar with. .

After boarding the plane, the previous researchers kept emphasizing that the computer files they got were all top-secret and must not be touched by anyone, but now the file package is being carried by Fan Tianlei.

After getting on the helicopter, he knew it was safe, so he glanced at it slightly, and said, "Give me that document, it will be safer for me to keep it."

Everyone laughed out loud when they heard this, where did this guy get his confidence? Did he really think it was safe to get on the helicopter now? When they pass through another area, it is still in the no-fly phase, and they have to change cars before they can really reach a safe place.

"You are in a state where you can't protect yourself, and you still want to say that you want to keep such an important thing. It's not that I don't trust you. You are all under my protection."

Chen Qiang was so angry that he couldn't figure it out. Originally, they were all very respected people, and they were very polite to them, but he didn't know why these people in front of him were like this.

While several people were chatting and laughing, the person in the cab in front said loudly: "Team Dragon, something is wrong, their conflict seems to have spread to this side, we must immediately find a point of input, now this area is also It's been declared a no-fly zone."

"Understood, can you see if there is any landing point nearby?"

Long Xiaoyun was very calm, and then picked up the map and began to study the route. As long as they parked, they would start directly. Experts can't help it.

So there is still a need for a car. Just like that, the driver searched for a while, but there was really no open space around, and notifications kept coming from the radio, asking them to make an emergency landing immediately.

There is really no better emergency landing point nearby. At this time, Long Xiaoyun walked over and grabbed the walkie-talkie on the radio. The voice of the person on the other side was very rigid, and it was in the form of orders.

"I now ask you to land immediately, otherwise we will regard your flight as a safety hazard and will shoot you."

Long Xiaoyun was furious when he heard this, what do these guys mean? She grabbed the walkie-talkie directly.

"Did you make a mistake? Look at our logo clearly. We are from the Yan Kingdom. You dare to shoot us. We have reported it before. Why do you want to shoot us?"

"Sorry, no matter which country you are from, you must abide by our local rules. At present, we don't know, and we can't rule out whether there are other safety hazards on your plane. Please land quickly, otherwise we will shoot directly."

Long Xiaoyun cursed and threw the walkie-talkie aside, she knew that these ***** really dared to do this, and the situation was already chaotic, they could use this as an excuse, so they had to find a place to break down quickly.

At this time, she noticed a green grass field on the side. "Although that place is relatively narrow, it should be possible to land. The main reason is that it is relatively flat and easy to land. Let's go to that place first to have a look."

The pilot controlled the helicopter to the top of the grassland. For the sake of safety, Long Xiaoyun jumped down first. After all, the top and the bottom are two concepts. She had to go down to see if there were any other safety hazards.

The helicopter stopped in the middle of the air, and then lowered the ladder. Long Xiaoyun put on her equipment and landed safely on the ground. She searched around, and there was indeed no safety hazard.

Soon, other team members also jumped down and began to watch around until the helicopter came to a safe stop. Then he took out the body armor from under the helicopter seat and put it on for the three scientific researchers, then urged them to get off the plane.

"Captain Long, what do you mean? Do you want us to walk out? This is very dangerous."

"You also heard what those guys asked us to do, so put on the body armor and set off immediately. I don't want to say more about the rest."

"Hehe, what a joke, then why don't you go to negotiate? You have to know that we are from the Yan Kingdom, and we also have certain rights. Do they really dare to do this? It's just to scare them."

Chen Qiang was very disapproving of the decision to let them walk. He felt that only walking would encounter danger. Although this country is better than the side they stayed in before, it is also a war-torn area, and various forces will also be entrenched in it. here.

Long Xiaoyun felt a little restless, too lazy to talk to these people, and just let the team members forcefully push them forward.

Chen Ou understood very well, he could only hurry up to comfort Chen Qiang, "Now is a special period, we still have to follow their arrangements outside, they have very rich combat experience, it must be right to listen to them, let's go ."

"Hehe, I have heard this sentence countless times. This is how you deal with it. I will definitely complain when I go back."

Having said that, he walked forward angrily, and just as he walked out, Fan Tianlei grabbed his shoulders and brought him back.

"Sir, you'd better not act rashly, follow our team, and stay with us now."

"You! Can I even go to the bathroom?"

"Oh, of course is fine, I'll accompany you now."

Chen Qiang was so angry that he felt that these guys were too barbaric, and they were always tossing people when making decisions.

But there was no other way, he could only follow Long Xiaoyun and the others. Not long after he left, Long Xiaoyun received a call from Qin Yuan.

"How is it? Those guys are safe, I heard Fan Tianlei said that you have encountered some problems?"

"Yes, there is no problem, it's just a forced landing. I can't take them now, and I will send them out when I find a car. Don't worry."

"I'm definitely assured of your ability, but those guys don't have to be too polite with them. Don't they keep complaining? Wait, just go back and let them come to me and report my name."

Long Xiaoyun nodded, she understood, and after struggling for a long time, she still said the sentence to tell Qin Yuan to pay attention to safety, then hung up the phone and continued to be vigilant, and waited for Chen Qiang to come back from the bathroom before everyone continued to set off.

Chapter 1749: Arrive at the Armed Branch

Long Xiaoyun led them to continue to set off. She was not as easy-talking as Qin Yuan, she was strict, she was what she should be, Chen Qiang wanted to be serious with her, but there was no way, now Chen Qiang would be protected by them after all.

In addition, Qin Yuan has brought Qin Zhengyang back here, he came and went quickly, the fight was so fierce just now, it was basically because of him that he had the upper hand and successfully repelled the militants.

Now that he retreated, the people on the border didn't realize anything was wrong. After all, in that chaotic situation, everyone was only thinking about themselves, and didn't even notice that someone would make a move.

Qin Zhengyang sat on the co-pilot, and heaved a long sigh of relief, "Finally, I have sent those masters away. These guys are really exaggerated. They act like masters, and they keep saying they want to complain, no I know if Long Jie can stand them."

"Hey, don't worry, you, Long Jie, have plenty of ways to deal with them. These guys haven't seen much in the world. I really think that any expert can be respected. In my eyes, they are nothing."

What Qin Yuan said is indeed okay. After all, he has been to the research institute. According to the normal situation, they would have to call Qin Yuan Professor Qin. After all, this is an internal peculiarity. Qualifications know.

It's just that there are too few assigned now, and everyone has completely developed towards the outside. It's normal for these people to not know the domestic situation. He has studied firearms before, and many star firearms were developed by him.

It's just that for better actions in the future, he basically used a pseudonym, and only the high-level internal officials knew his specific situation, so if something really happened, these guys wouldn't be able to take advantage of it.

Qin Yuan soon joined He Chenguang and the others. This time there were no experts. They traveled very quickly and without too much fuss. He Chenguang went out, saw them coming back, and carried the people on the ground. up.

"What? Isn't this guy pretending to be dizzy? I remember he was in this state when he went out, why is he still dizzy now?"

"This guy did wake up in the middle, but he yelled and yelled and said he wanted to commit suicide. Anyway, I could only understand a few words from the manager, and then I knocked him out."

Qin Zhengyang silently gave a thumbs up at the side, this is what he should do when dealing with this kind of guy, he is not a good person anyway, and the organization behind them has done this kind of sabotage more than once.

They have done other sabotage before, and they have business cooperation with this side. They have done some sabotage in the previous oil transportation, but they were all stopped by the local area.

This time it was too late to stop it because the various organizations strengthened their territory and resources, and then fought, making it very chaotic, so the local area simply didn't have the energy to take care of it.

Qin Yuan opened the plastic bottle and poured a bottle of water on the guy's head. When Hall woke up, he looked around in horror.

"Don't look, let's go directly now, I already know the location, I just want to wake you up, after all, you can be a shield in front of you."

"No! Absolutely can't go there, you don't know the cruelty of those guys, you kill me now, I don't want to go back, don't take me back."

Qin Yuan smiled. These guys didn't have such a good attitude when they attacked the civilians before. He picked up the briefcase next to him and threw it on him.

"Don't worry, I will protect you until then, at least you still have a little use value."

As for the route, this guy originally wanted to use this to deceive Qin Yuan, but Qin Yuan had already found the real route of action from his mind, so he was not in a hurry.

"It's enough to just stay here honestly. Now you are useless, just a tool."

Hall was very uneasy sitting in the car at the moment, he was very worried, because he didn't know whether what Qin Yuan said was true or not, and how he knew the route.

He quickly recalled it in his mind, and he didn't say anything. After all, he had received some training before, and it was absolutely impossible to reveal the address of the organization under such circumstances.

Because not only their own side will be affected, but even their family members will be affected during the year. dangerous.

Thinking of this, he couldn't help shivering in his heart. He didn't know how it was leaked, but he was sure that he didn't say anything. He looked at the routes around him. Anyway, wait a while, maybe a guy lied to him of.

Now he is caught in the middle, next to Li Erniu and He Chenguang, he can't move anywhere, but Qin Yuan, who is driving in front, knows the route very well, and successfully bypassed several checkpoints. After all, he is worried that this guy will There was a sudden movement outside.

Because of Qin Yuan's detour before, Hall still had a little fluke mentality. He felt that Qin Yuan probably didn't know the real route, but as the car slowly drove in, the expression on his face changed instantly.

This road is the route leading to their branch organization. His expression gradually became ferocious, and then he yelled in the car, and wanted to jump out of the car, but he was pressed tightly by He Chenguang, and he had no resistance at all. Chance.

"be honest!"

"No! I will promise you everything when I go down, and I will tell you everything you want, but let me go quickly, I don't want to go there."

He Chenguang couldn't stand it anymore, so he knocked him out with one punch, "Brother Qin, how far is it? I'm afraid that this guy won't wake up and will be exposed. I really didn't expect to punch him knocked him out."

"This guy is too scared, and you punched him with threats, he must have passed out immediately, it's okay, according to my investigation of him, there are at least 40 minutes to drive from here This guy can wake up no matter what."

In this way, everyone is relieved. You Erniu has already arranged the equipment next to him. He re-fabricated his face and put a veil on his face. This time he fixed the veil again. From the appearance, he looks similar to the locals.

Soon, Qin Yuan arrived at the place according to the address extracted from his mind before, and saw sentries guarding from a distance. Those militants were quite formal, and there were patrol cars around.

"Brother Qin, what should we do? Do you want to wake this guy up first?"

Qin Yuan suddenly thought of a better idea. If this guy can't control his emotions at all and yells there, it will ruin his plan. It's better to plan first, anyway, he was also in a state of being out of contact before.

After all, the chip in his mobile phone has been taken out by himself, and there is no way to contact him at his distribution, and there is no way to contact the employing organization, so now he can take advantage of this opportunity.

Just like this, Qin Yuan drove forward, and was stopped by soldiers standing guard just as he passed by. Seven or eight people came over with guns.

With a gun in his hand, Li Erniu was ready at any time, as long as Yisheng ordered him to rush out immediately and deal with all these guys directly.

The captain who came up to check was wearing a pair of sunglasses. He motioned to roll down the window. When he looked inside, he saw Hall who was unconscious and leaning on He Chenguang's shoulder.

"What's going on? Why didn't he say it before? What did you say?"

Thanks to Qin Yuan's fluent local dialect, even they couldn't tell the difference.

He communicated with the people opposite him chatteringly. Although Li Erniu and the others couldn't understand, they were also very nervous. After a while, the man nodded and waved his hand to release the gate to let them leave.

This is only their first assistant, and it will take a while to get in. After the window was closed, Li Erniu let out a long breath.

"Brother Qin, what did that guy say just now? What did you say all this time?"

"It's nothing. I explained our specific situation to him in detail, and told him that this guy has been injured. We are members of the Security Group, and he has no doubts."

However, those guys asked very detailed questions, and Qin Yuan answered them fluently. This was also thanks to his ability to respond. He had a vivid memory for everything, including any details.

"This is just a branch. We need to solve it from that step quietly, try not to make too much noise, and use cold weapons to solve it. The people on this side must be dealt with quickly, and then we will start from the headquarters."

Qin Yuan came here first to determine whether the so-called secret weapon had been made in this place, and whether there was any connection between this place and the plan at the headquarters.

The first checkpoint had been successfully passed, and they soon came to the second checkpoint. Qin Yuan did not expect that these pretenders were so strict.

And after entering this place, all the militants can tell from the aura that they are different from those outside. Those outside are probably local civilians who were temporarily captured, and their status is different.

So as soon as the vehicle came over, they were pointed at guns and asked to get out of the vehicle immediately for a comprehensive inspection and to hand in all their weapons. Although Qin Yuan repeatedly explained that they belonged to the security group, the people on the other side didn't care.

Qin Yuan signaled everyone with his eyes, telling them not to act rashly, as long as they don't reveal their identities, they can check them casually, after all, passports and other things have already been hidden by him.

During the inspection, he kept saying to the leading officer in front of him: "Sir, we are only in charge of the security group to deliver people to you. I just wanted to deliver them to the door, but the people on your side let us send it in, we can't do anything."

The captain standing opposite didn't say a word coldly, and didn't give Qin Yuan any chance to talk to him. He looked like an old fox and kept a certain distance.

When Qin Yuan turned around slightly during the inspection, he saw a few snipers on the tower next to him. It seemed that these militants were really professional, and they were different from the armed forces they had encountered before.

Just when Qin Yuan thought it was about to end smoothly, the militant suddenly stepped forward, ready to tear off Qin Zhengyang's veil.

Qin Zhengyang subconsciously dodged to the back, this action aroused the dissatisfaction of those armed personnel, they all raised their guns to point at Qin Yuan and the others.

"What the ***** are you doing? There is something shady, you have to take it off, let us check it all."

Qin Yuan explained with a smile, "Just because we belong to the security group, we all have our own reasons. We never show our faces, and this is also to avoid retaliation."

Qin Yuan said that he was actually ready, and he could shoot the throwing knife directly in the next second, first of all, the snipers next to him.

He has already fully thought out all the attack routes, and he can protect his players to the greatest extent. Moreover, Li Erniu and the others cooperate with him very well, knowing his next move.

Unexpectedly, when they forced the inspection, Hall in the car suddenly woke up. Hall opened his eyes and looked around. What's the situation?

Qin Yuan just turned his head to look at him and said seriously: "Mr. Hall, you are too rude, you agreed to let us ***** you back, and then you will pay us, but what is going on now? And the leather bag you mentioned, we also protected it very well."

Hearing what he said, Hall also began to make up his own mind. Now he must make a choice as soon as possible, either directly die with them and reveal their identities, or choose to stand with Qin Yuan, maybe it will be possible. There is a way out.

He pretended to hold his head, and the officer from just came over and started to care, after all, the safety inside was the most important thing.

"What's the matter with you? Is what he said right? You are really just a simple employment relationship, and why have you lost contact with us for two days? What have you been doing these two days?"

Hall shook his head, and then cooperated with Qin Yuan and the others, "That's true, they belong to the security group, I was attacked by those unknown militants, and I had no choice but to run away with the documents. Come out, they escorted me back."

Hearing this, the captain also heaved a sigh of relief. He was making the killing wrong. Since this guy has already confirmed it, and he also knows the power inside the organization, even if he has 100 guts, he won't dare to lie.

So they were asked to get in the car and go back first, and after connecting all the things, they could come out. After several people got into the car, Qin Yuan glanced at Hall from the rearview mirror.

"I didn't expect you to be quite clever and able to excuse us. Don't worry, I will give you a chance. I can save you."

Chapter 1750: headquarters disappeared

Hall was completely on the verge of collapse at this time, his face was pale, and his whole body was shaking. One can imagine how much fear he was facing.

He knew how cruel those people were. Once he was caught, his family members would have no way to live. He seemed to have thought about it for a long time and made a decision.

"Early in the morning I don't know how you got our address, but now I can make a deal with you."

Qin Yuan smiled slightly when he heard this. This guy still wants to make a deal with him. He knows everything about him. What kind of capital can he have to make a deal.

Hall was not in a hurry, he looked at Qin Yuan, "I know you are very powerful, but I can take you to the headquarters, you should also know the address of our headquarters, but we are very cautious here, we must take the lead to go out, otherwise no one can get in, do you understand?"

This is indeed another kind of threat, but Qin Yuan didn't take it seriously. He thought that the branch should be taken down first, but this guy really can't move.

During the conversation, they had already arrived at the office building where they were distributed. According to the normal escort, they ended here. The guard at the door also came over, but Hall said to the guard:

"You let them in first. They have the materials I brought with them this time. You have to show the boss first to see the situation."

Hearing what he said, the guard at the door didn't hesitate any longer, and just brought them in like this. Everyone passed through smoothly. After a few minutes, the guard at the door seemed to have heard some movement.

But he wasn't too sure. After all, there were still a lot of guards on the corridors inside. This was the branch of their organization, and their sphere of influence was relatively large.

After a while, I only saw Hall came out of the first place with a calm face, and felt a little strange. Are they so fast? It has all been resolved.

And at this time, Hall walked towards them and coughed slightly while standing on the steps.

"Boss has informed, let me come over and explain to you some things, all of you are coming towards me."

Some guards in the distance hadn't figured out the situation just now, and when they saw the people gathering in front, they ran over one after another, wanting to see what was going on.

However, just as they approached, a guard suddenly felt a pain in his waist, and turned his head to look at the knife in his waist in horror.

Li Erniu and the others have already started quickly. They cooperated perfectly, especially Qin Yuan. He raised his knife and dropped it, and four flying knives were dispatched at the same time. There was no chance for anyone to run out. They all become corpses of sentences.

Hall was in a cold sweat from being frightened at this time. Before, he felt that the way the organization treated his subordinates was very cruel, and they were also very resourceful, but seeing Qin Yuan now, he felt that the previous organization was nothing.

This guy is completely at the level of a demon, and he can shoot casually. After all, he has already solved all the bosses in their building just now, and Qin Yuan has also grasped some clues.

At present, the information Qin Yuan has obtained from the investigation of the boss's computer is that the secret weapon has been successfully developed by them. This plan is to directly cut and divide the natural gas pipeline they transport.

They want to mix another kind of gas into the natural gas, which will cause another level of explosion in the process, which is what they want to do to carry out violent and terrorist attacks.

When the concentration inside the natural gas changes, and it has been mixed for a long time, once the gas is completely transported out, it will explode, and it will be in other countries.

Especially like this time, Yanguo has already cooperated with this side, and the natural gas pipeline is the same, so when the explosion occurs, it is impossible to investigate which link is wrong.

After all, once the gas explodes, all evidence can be destroyed, and since they have completely completed their mission, no one will doubt it.

But such an explosive attack has no idea how many casualties it will cause. These people are completely crazy, just for their benefit, they want to use this explosive method to threaten the local government.

This is their plan. At present, they have sent various teams to the specific location of the pipeline for transporting natural gas.

However, there is a local army on duty over there. It is not so easy for these militants to get in, but now they have obtained the formula of the super weapon.

This weapon is a small unmanned aerial vehicle missile design, which can carry out long-range and large-scale attacks. With the design drawings, including design materials, this time they can be said to be a steady victory, so now that the target has been determined, it is time to wait for the lawsuit. The attack was launched immediately on the same day.

Qin Yuan asked Li Erniu and the others to deal with the remaining people. The people on the periphery didn't have to think about it at all. They could hand over the small garbage to them to clean up. He needed to hand over the report to Long Xiaoyun's side to see if they could understand each other. clues.

At this time, Long Xiaoyun and the others had already arrived in Xiaomao Country, but before that they had to take a car all the way, so they could only get to another airport from here.

Those three scientific researchers, as well as Chen Ou, had already gone back ahead of time, and the mission was considered to be over. Now Long Xiaoyun is also investigating in the local area, and soon she dug out the Black Hawk organization.

After her investigation, it was discovered that this organization called Black Hawk really has some tricks. They have a total of three large security groups under their name. These companies have direct contact with them. If there is any problem, these personnel will belong to them. deployment.

This is a bit beyond Qin Yuan's previous imagination. He only knows about the Black Eagle organization. They are divided into two branches. Now they are going to the headquarters. He did not expect that there are so many people in the periphery. .

And the other bad news is that they mainly hide among the civilians, and then use their instigation among the civilians. Coupled with the particularity of the local area, the situation has always been turbulent, so it is easy for these civilians to be forced to survive. to choose them.

Long Xiaoyun now controls the various branches of those organizations. They have two relatively large branches in Xiaomao Country. She has already asked for support from above to wipe them all out.

Qin Yuan nodded, and now he has almost understood the general situation. As long as it is the few scientific researchers and safety, there is no big problem.

"By the way, to solve the problem of distribution over there, you don't need to make a move. Just let them negotiate this matter locally and hand it over to the upper management for management. You are also ready to retreat."

After all, on the side of Xiaomao Country, if they do something, it will involve too many things, so they can only report it, and then let the people of Xiaomao Country solve it.

Speaking of this, Long Xiaoyun was also very helpless. If it wasn't for the regulations, she would have rushed in and wiped out those guys. It's a pity that this movement would definitely cause trouble.

"I know what you mean, but I think it's a pity, and I have a hunch that Xiaomao Country will definitely not handle this matter well. They still have a lot of collusion with the Black Hawk Organization. I can't find out now, because When we came here, a lot of archives had been deleted."

If Qin Yuan was there, the data could definitely be recovered, but among them they really couldn't do it, they could only do it for this sake.

Qin Yuan nodded and asked them to follow the current plan first. The main thing is to find him. Now we must organize the transportation of natural gas.

"Then pay attention to your safety and evacuate as soon as possible, and come back after our side is completed. After all, we can't expose too much of this mission."

After hanging up the phone, Qin Yuan turned his head and looked at Hall next to him. The gunfire outside had slowly ended, indicating that almost everyone outside had been killed. Hall's face was extremely indifferent. It was hard to imagine that this was him. The branch where I have been staying before.

"I didn't expect that since you can be so calm, anyway, you are also a part of this organization. Just now you cooperated with us to kill your boss, and your heart is really cruel."

When Hall heard Qin Yuan say this, his face became more indifferent, "Do you know what they did to me? My family is controlled by them! I didn't want to join this organization!"

Speaking of this, he was very excited, and he was also worried that Ren would do something to her, so he told these things in advance. He was forced to join this organization at that time.

In the beginning, he was just an intermediary in contact with the security company, and was responsible for introducing these employment groups to other people, especially those who wanted to come here to do business. He was a middleman, earning some intermediary fees back and forth.

But later on, he was favored by the Black Hawk Organization, because he was going to play in several countries, and he also knew many businessmen, which was very beneficial to the subsequent transactions of the Black Hawk Organization, so he was dragged into the water, but he I don't want to join this organization at all.

The Black Hawk organization has a lot of methods, directly leading people to arrest all his family members, and allowing them to meet once a month. The Black Hawk organization claims to protect them. In fact, the people who are loyal to them here, most of the family members It's all in their hands.

Hall can't control so much now, he broke the jar, now that he met Qin Yuan, he also wanted to use this opportunity to completely let his family come out, so he explained everything clearly.

"I don't care if you believe me or not, but you can try it, those guys won't listen to you at all."

Qin Yuan didn't like the feeling of being caught by someone, so he pushed him away and told him to roll back to the car and stay there. After a while, Li Erniu and the others cleared away all the people around him.

After this time, he also analyzed that what this guy said may be true. He has a very wide network of contacts. He used to be a middleman and had many contacts with those troops. So if there is him, they can make others believe it. Reliability will be higher.

But he still wants to give it a try, and he doesn't want to be completely mastered by this guy. If he is mastered, many things will be difficult to carry out later.

Qin Yuan took him and set off directly. In his opinion, there was no need to alarm the local army. He went directly to the headquarters and killed all the militants. I was dumbfounded.

"I think you are exaggerating too much. Do you think there are still so few people in our headquarters?"

Several people in the car laughed, Qin Yuan had even entered a military base with 500 people before, not to mention militants like this, how many of them could be stopped by himself.

Qin Yuan still didn't touch this person, no matter what, he always felt that this person was still useful to stay, so when they arrived at the headquarters, they found that this place had become an empty city.

The headquarters is connected to the nearby villages, but now even the surrounding villagers have all disappeared.

Li Erniu and the others rushed into the village to search, but found nothing. Qin Yuan walked over and noticed something cooking on the stove at the door. The fire had gone out, but the food was still warm.

Thinking of this, he walked over and grabbed the people in the car. Hall was also panicked, he didn't know what was going on.

"Now I need an explanation. What the **** is going on with you? Are you kidding us? You think you can really do this, what are you?"

Hall shook his head desperately, his voice was hysterical. After all, the disappearance of the headquarters meant that his family also disappeared.

"Do you think I'm crazy? I can disregard my own life, but my family is all here, why did they just leave like this? I remember my family is in the village in front."

Talking to himself like crazy, he rushed directly into the village. On this side, there are a total of three large villages connected together, with many trails branching out.

But now there was no one there, and when he rushed into the house he was familiar with before, there was nothing there, and a lot of clothes were scattered on the ground, looking like he left in a hurry.

Looking at the approximate time, is still warm after all, and it only takes a few hours. It is estimated that when they attacked the branch over there, they have already received the news retreated directly.

Hall knelt on the ground and wailed in pain. He felt that he had killed his family members, but Qin Yuan walked over and kicked him on the shoulder to tell him to shut up.

"Can you figure out the situation? Your family members are fine at all, and they don't know that you betrayed them. It is estimated that everyone was taken away because of the attack from there."

Having said that, Hall suddenly realized, that's right, no one can tip off the news, but he really doesn't know exactly how this side knows.

"It seems that this should be the matter of the boss above. Even you don't know it. It should be some kind of underground agreement reached between them. If there is any unexpected movement, they can receive it at any time."

Qin Yuan also analyzed calmly, this guy has been by his side all the time, and he has read consciousness before, so it is impossible to deceive himself.
