

Special Soldier 1771

Chapter 1771: thanks behind

It's totally impossible for just two teams. What they are thinking about now is security. After all, they directly launched a batch of large-scale attacks. There are at least four to five hundred pirates in the nearby area.

They were all killed just like that, even the regular troops would not believe it, and it was absolutely impossible for the two small teams to do it.

However, the person in charge still conducted a surprise review of the remaining pirates, and found some problems during the review process. They did not see a large-scale team.

And not two, but only one team attacked them, they couldn't bear it at all.

People from Qin Yuan's side have not returned yet, and his reputation has already spread. He cleared the payment once in Somalia, and now he is in this area again, making everyone even more frightened.

It was very easy to go back, and basically I didn't encounter any problems, but because the journey back was relatively long, the rest of the journey would still take seven or eight days.

Just as they were passing through the country of America, Qin Yuan asked everyone to dock the boat at the port, just to take a rest. It has been floating on the sea for so many days, and they can go back directly in a few days.

This is a port in the United States, a small town close to them. The scenery of this small town is relatively good, so Qin Yuan let everyone just have fun and relax.

These crew members were relieved from the danger of being hijacked before, otherwise they had been too depressed, but after everyone came out, they still didn't see the tall man.

Qin Yuan just smiled slightly, expressing that he wanted to rest inside, adhering to a responsible attitude, the captain on board felt that these were all his crew members, so he had to go and have a look to avoid any accidents.

Qin Wukong nodded and told him which room he was in, and let him go and see for himself. When the captain entered the room, he did find the tall man, but at this time the man was in a very bad state, and he made a slight movement I was terrified and panicked.

"Liu Zipeng, what the **** are you doing? I haven't seen you out for so many days. I thought something was wrong with you."

He just shook his head and sat on the bed without saying a word. God knows what he went through. Qin Yuan directly released his aura at the beginning. The aura like a king oppressed him, making him dare not say anything. .

Looking at the person in front of him like a cash puppet, the captain didn't want to say anything, he just left a sentence, now he is docked, if he wants to go out, he can go out to take a breath.

The other side has just docked, so the crew members should not go too far. Anyway, they will gather here at 6 pm and they are ready to go back.

Everyone also went down to relax, and Qin Zhengyang and the others ran out in a swarm, all wanting to buy some food. They have been eating compressed biscuits in bed these days, and they almost vomited.

Qin Yuan looked at Long Xiaoyun next to her and told her to relax a little. A few people were left on the boat to guard them, and they could go down for a walk.

"Let's go, the two of us haven't taken a walk like this for a long time, I'll take you out to play, after all, there are too many tasks in normal times, and there is no chance."

Long Xiaoyun's expression froze. In fact, it was rare for her to completely relax like this. She would indeed behave like this around Qin Yuan, so the two of them got off the boat together and wandered casually towards the street opposite the pier.

"Actually, the mission is almost over now. If you can **** them back safely, you should relax yourself and don't put too much pressure on yourself."

Long Xiaoyun nodded, she had really put too much pressure on herself recently, and now she just took this opportunity to go shopping, and she walked into a jewelry store in front of her with her hands behind her back.

Looking at a doll in front of him who was in a daze, Qin Yuan walked over and said with a smile on his face, "I never thought that you would like such a cute doll when our Captain Long was still so girlish."

Long Xiaoyun blushed at what he said, and could only give him a blank look, "I don't even look at people as old as me, would they like this kind of thing? I want to take one back for Ranran, who is like you So heartless, I didn't see any gifts for my daughter when I came out."

This surprised Qin Yuan, Long Xiaoyun really regarded himself and A Ran's children as hers.

But when it comes to the child problem, Long Xiaoyun really can't help it. Her body really can't conceive, so she has never had a child. This is also related to her previous high-intensity training. At that time, in order to improve her combat effectiveness, she used Tried all kinds of ways.

It can be said that the body was completely overdrawn in advance, and now thanks to Qin Yuan who has been giving her merit points to enhance her physique, she just didn't realize it, or she was really injured all over her body.

When the two were choosing gifts for their lover, a few people walked up behind, Qin Yuan subconsciously felt that they were coming for him. After all, if they were just passers-by, they would not approach so suddenly.

But these few people didn't make much noise. A man on the left wearing a hat was very polite. Looking at the gift Qin Yuan and the others were holding in their hands, he stepped forward and paid the money without saying a word.

But Qin Yuan directly refused, "I'm sorry, I'm still used to giving money by myself, especially in this unclear situation, I don't know what you are going to do."

After all, there is no free lunch in the world, Qin Yuan knows this very well.

"Mr. Qin, this is a little thought from my husband. He also wants to thank you for your help in the Kashen sea area."

Qin Yuan didn't know anyone before, but later he said that he went to that sea area. Could it be related to those pirates? That's really interesting.

Qin Yuan also withdrew his hand and asked them to give the money, but he smiled slightly, since he loves giving money so much, let him give enough.

"Xiaoyun, I remember, should I bring something for your team members and Er Niu? Why did we forget about them?"

Long Xiaoyun immediately understood that this Qin Yuan is really a master who will not suffer, no matter what he does, he will take advantage of it.

Just like that, the two of them went shopping in the store, buying whatever was expensive or good-looking. Originally, Qin Yuan was not short of money, but he just wanted to find out who was behind it, and he wanted to see his reaction. how.

After a while, a mountain of presents piled up in front of the two of them, and the clerk was stunned. The purchasing power of the two of them was too exaggerated, they just bought it for the money.

Qin Yuan, on the other hand, was very relaxed. He glanced at the man, who still had that smile on his face, stepped forward to swipe his card, and paid the money in one go.

"By the way, we have to go to other places to play now, and send these things to our beds, you should know."

"Mr. Qin, don't worry, we will definitely send the things over now, you and your wife have a good time."

Long Xiaoyun's face was a little red when he said this, Qin Yuan just chuckled, and then grabbed Long Xiaoyun's shoulder.

"These guys are still very discerning. Seeing that we are a couple, it shows that we are a good couple."

"Can you guys be more serious?"

The man talked and laughed and walked towards the front. After a while, he was carrying large and small bags of things in his hands. After all, someone gave money behind him. Qin Yuan didn't even look at the price. He just pointed to the man, and he immediately understood and went to buy it.

Because the two of them still bought a lot of things, the man specially called a flatbed truck to pull things for them. After a while, the flatbed truck was almost full.

Only then did Qin Yuan stop. After all, there was really nothing to buy. This is a small town. Since he likes to give money, Qin Yuan usually gives enough.

"Mr. Qin, I think you and your wife are almost having fun. Would you like to go to see our husband with us? The husband said that you can't disturb your interest, so let me stay with you all the time."

These people are quite calm, Qin Yuan is very satisfied with this, at least he has changed several ways in the middle, and the other party did not get angry.

They have already given such a big face, if you don't go, it will be a little unruly, Long Xiaoyun doesn't care, anyway, with Qin Yuan around, she never felt that she encountered any danger.

In this way, under the leadership of the man, the two of them walked into a coffee shop. The second floor of the coffee shop is a private seat, all of which are compartments, which are very convenient for conversation.

When Qin Yuan walked up, he found an old man with a white beard sitting on the seat, and a doctor and a nurse were standing beside the old man, monitoring him at any time, and there were some instruments hanging on his body. Good guy, it's really grand.

Just when Qin Yuan was puzzled, the old man became agitated, "I really don't know how to thank you, ahem... I can promise you whatever you want, whatever conditions you want."

"I'm curious what's going on with you? And have I helped you with anything before?"

It took a long time for the old man to speak clearly. Qin Yuan was really impatient to wait. He stepped forward and took out the silver needle. The doctor next to him was startled. What does this guy want to do?

And the bodyguards around him hurried forward, seeing their nervous state, Qin Yuan said that he just wanted to save him.

The doctor said from the side, "Sir, I advise you not to do such a dangerous move. I don't know what you want to do, but Mr. Barr is now in the terminal stage of lung cancer, and he can try his best to maintain his life."

Qin Yuan smiled disdainfully, and then pushed the doctor away. Before anyone else could react, the silver needle in his hand had already been stuck.

The bodyguard next to him was even more taken aback. This guy dared to assassinate his master in front of him. He rushed forward. Long Xiaoyun reacted quickly and knocked down the bodyguard.

Everything happened very quickly, and the old man was also a little puzzled. People outside ran in after hearing the movement, and took out the guns in their arms when they saw this scene.

At this time, the old man often breathed a sigh of relief, and he spoke very sharply, "Stop it all, who told you to come in? Get out."

After such a few people left, the old man was able to breathe. He felt that his breathing was smoother than before, and he tore off the oxygen tube on his nose.

Now he doesn't need this kind of oxygen to maintain it anymore, he can just rely on his own breathing, and he doesn't suffer as much as before.

"Mr. Qin, I didn't expect you to be so powerful. I heard two friends mention you before, but I am very honored to have your help."

The old man has always been very polite. Only after his explanation did Qin Yuan realize that the old man's friends had also been helped by Qin Yuan, but it was all many years ago. Qin Yuan helped too many people. To be honest, he also wanted to It may be a matter of time if you don't get up.

But this time he wanted to thank Qin Yuan because the pirates killed his son and grandson.

But he has spent a lot of money trying to send people to solve this problem, no one dares to go, his grandson and son were killed by those pirates during the delivery process, and they also blackmailed them for 6 million.

The old man was very emotional when he said this. He said that he had money, but he just hoped that they would release him.

So this time Qin Yuan killed all these pirates by mistake, isn't this just revenge for his family? The old man tried his best to find Qin Yuan and thanked him face to face.

After the old man finished speaking, he glanced at the bodyguards around him and motioned them to go down first. The whole room fell silent, and he took out a bank card from his pocket and handed it to Qin Yuan.

"Mr. Qin, I know that although you didn't intend to help me, you did avenge me. I said before that whoever avenges my son and grandson belongs to him. This is all my net worth. "

After the old man finished speaking, he still coughed a little. After all, Qin Yuan only controlled it a little, and if he wanted to cure it completely, he still needed to use his recovery ability.

How could the money not be in vain? He put the bank card in his pocket and walked over to give the old man a new injection.

"Don't worry, I won't ask for more of your things. Since you gave me the money, in addition to avenging you, I can also restore your body to you."

The old man was surprised when he heard this. At first, he just thought that Qin Yuan helped him unblock it, which was much better. He didn't expect that since his lung cancer could be cured.

After 20 minutes, Qin Yuan took Long Xiaoyun and left. When the doctor walked in, he was also surprised, because the old man could stand up and move independently.

Moreover, the old man's complexion is rosy at the moment, and there is nothing wrong with him. He doesn't seem to be sick at all. The old man feels that he has met a noble person. He stands in the private room and looks at Qin Yuan's figure in a daze.

This more than 10 million is too much in the eyes of outsiders, but it is worth it to him, not only for revenge, but also for his illness.

At this moment, on the cargo ship on the other side, Li Erniu and the others have already returned ahead of schedule, watching people keep sending things, and then directly sending up a cart of things, all kinds of small gifts, food, drinks Yes, play.

Chapter 1772: Be a guinea pig once

"I'm going, what's the situation? Why are you constantly moving things towards us? Don't really treat our place as a cargo ship."

Just when he was about to step forward to stop it, Qin Zhengyang came back early. With a wry smile on his face, he took out the list next to him.

"Second brother, please stop talking about it. These are all our things. Brother Qin bought them for us. After he and Long Jie went out, the two of them really bought like crazy. I heard from this person just now, and later they bought them for us. Have."

[It has been running stably for many years, comparable to the old version of the book chasing artifact, and the old bookworms are using it to change the source, huann.]

Everyone was surprised. They walked forward and looked at the loads of things. They all felt that Qin Yuan was too arrogant. He bought so many things without blinking his eyes.

Qin Yuan originally thought it was just a small episode this time, but later he didn't expect that it was because of this rich businessman that he had a breakthrough in finding the masked man, but that's all for later.

The rest of the journey was also very smooth, and they didn't encounter any problems along the way. They finally arrived in Yan Country a week later.

After returning back, Qin Yuan didn't have much to do. At this time, they just focus on training, especially now that a brigade has been established, so the tasks of other special forces cannot be left behind.

Qin Yuan felt that life was a bit too boring. He usually ran around when he was on mission, but now he was suddenly idle, which made him a little uncomfortable.

In the afternoon, he lay on a chair and watched the players outside training under the sun. Everyone was full of energy. Li Erniu next to him came up panting.

"Hey, let me go, the sun is too big, let those young people continue to move, I am old, why do I feel a little too tired?"

Qin Yuan turned his head and gave him a blank look. This guy was only a few years old, so he said that he was old, and he was counting just now.

"I ran 10 kilometers, and now I say that I am old, and I really deserve my reputation."

"Hey, Brother Qin, I really can't hide anything from you. By the way, I actually want to tell you something. I want to go home in two days. It's my mother's birthday. I didn't go back much because of the mission, look at the situation..."

"You kid still follow me like this, go back, even if there is a mission, it's okay if you can't come back by then, just pay attention to safety when crossing the road."

"Hahahaha, don't worry, I originally wanted to find an opportunity to take my brothers back together, but it seems that this is not allowed. It is almost the end of the year, and everyone is grasping the task indicators."

Qin Yuan said he could understand, and even sent him a red envelope. Li Erniu was stunned when he received the notification from his mobile phone, "Brother Qin, what do you mean?"

"Since we can't go, let the old man celebrate his birthday and have a good time. This is a little bit of my heart for the old man. Don't talk nonsense. Hurry up and accept it. Don't force me to beat you."

Li Erniu was very moved in his heart. Qin Yuan has really taken good care of him for so many years. If he wanted to ask for leave in other companies, it would be impossible, but there is no big thing here that can make him go back. .

He said that when he came back, he would definitely bring them some specialties from home. Li Erniu had just asked for leave, and He Chenguang came in.

....

This guy smiled obsequiously, and took out a can of tea from behind, "Brother Qin, try my tea. My former comrade-in-arms brought it to me."

"You kid has nothing to do to be courteous, and if there is anything else, just talk about it."

"Hey, it's like this. My family is trying to introduce that girl to me. They want me to go back and have a look. It's not a big deal. I'm thinking of asking for a leave of absence."

This is a major marriage matter, Qin Yuan immediately agreed, and asked him to tidy up a bit, and then go to see the other girl properly, so as not to scare her.

However, just after He Chenguang agreed to go out on leave, Wang Yanbing came in again in the afternoon, and Qin Yuan frowned. What do these guys want to do? However, the reasons for asking for leave given by several people are indeed quite reasonable. One is for my mother's birthday, and the other is going on a blind date.

"Did you two agree to ask for leave and come here directly, and split up here

What does ***** with me mean? "

Wang Yanbing raised his head in doubt, "Brother Qin, what do you mean by that? I don't understand. Could it be that the two of them have also asked for leave?"

After Qin Yuan finished talking to him, he nodded his head, a little bit tangled, if this is the case that there is not enough manpower in the team, he must not be able to invite any more, and he can only be very helpless.

But Qin Yuan still asked what was the matter. Wang Yanbing just said that the neighbor's grandmother who had been taking care of him before passed away, and he wanted to go back to help. After all, the neighbor's grandmother had been taking care of him since he was a child. At that time, his father's situation was special. , he grew up eating a lot of food.

"But now that both of them have asked for leave, if I ask again, there will be too many people. This is not suitable, forget it."

"You kid, if you didn't tell me to get out earlier, you still have to show your conscience. They were not mean to you before, so go ahead."

Wang Yanbing was surprised. He didn't expect Qin Yuan to agree. It's just that three people were invited out of the team at once, which is not enough.

"You don't need to worry about these things, and there's nothing to do now. Even if you want to go out on a mission, you should let those new team members practice their skills. You can't just rely on us all the time."

Wang Yanbing nodded, and left just like that. Qin Yuan felt a little emotional for a while, everyone seemed to have their own things to be busy with, and now he was just like that vagrant.

At this time, the door of the office was knocked again. He called in and found that it was Qin Zhengyang. Could it be that this kid has something to do?

"Didn't your kid also come to ask for leave?"

"Ah? What's your leave? Brother Qin, I'm not that. Sister-in-law An Ran came to see you, and she's in the reception office now."

"You kid is really funny, since you are all your own, why don't you bring them to the office here?"

"Brother Qin, listen to me, sister-in-law didn't come alone, she was accompanied by two people, it seems that she came to do some business, that's why I can inform you."

Qin Yuan nodded, and then went out with Qin Zhengyang. When he arrived at the office, he saw An Ran sitting on the sofa with two people sitting on the side, one on the left and one on the right.

As soon as he entered, he said directly: "You are too out of touch, can't you just make a phone call if you have something to do? Why do you come to the office to find me so formally?"

....

An Ran blushed slightly, "It is indeed a matter of work to come to you this time, so I have two comrades to accompany me."

Hearing this, Qin Yuan also adjusted his attitude a little, and walked forward to shake hands with the two people. After An Ran's introduction, Qin Yuan realized that they were sent by the General Military Region.

They are all experts in military exercises. This time they have developed new products in terms of design and acting, and they need someone to conduct physical experiments.

For this kind of experiment, the main thing is to wear the products they developed to see whether the real-time tracking position is accurate, as well as the accuracy of the trigger, including adjusting some animation screens, etc., all of which require real people to complete.

The main reason is that the scene simulation this time is very dangerous. They are also to simulate a more realistic battlefield. They are divided into three areas in total, one is a minefield, the other is a nuclear leak area, and the other is a relatively ordinary rainforest swamp Area.

Relatively speaking, it is not particularly common. After all, there are various dangers in the swamp, which they arranged in advance.

They only designed this exercise on the computer, and have never put it into a real exercise game. Now they need to pass the test of real people, and they can judge the specific danger and practicability.

If you are looking for an ordinary company, the risk of this kind of experiment is still relatively high. I am worried that something will go wrong, so I decided to find a special forces team to conduct the exercise.

Qin Yuan suddenly realized when he heard this, anyway, in front of An Ran, he didn't have any scruples when speaking.

"Oh, I know this, don't you just treat us as guinea pigs?"

The man next to him was called Sun Hongming, and he coughed slightly, "It is not necessary to be so clear, Chief Qin, we just feel that

Your abilities are outstanding, and if you encounter any dangerous problems, you can easily resolve them, and we can stop losses in time. "

Compared with special operations forces, their agility and responsiveness to emergencies are quick to respond, which can greatly reduce damage in this case.

"Hahaha, I'm just kidding. Anyway, everyone is on their own. It's okay. It's okay. How many people do you need? Let me know when and where. As long as you confirm it, I will arrange it right away."

Sun Hongming was completely relieved when he heard this. At first, he thought that Qin Yuan would not agree. After all, Qin Yuan's reputation is so great now that even the leaders above him can't do anything about him. They could have come here directly according to the orders of the leaders.

I asked him to cooperate with the document, but the above felt that it was not good to do so, so I came to him to discuss it and ask his opinion first.

Since they discussed it on their own, they found An Ran. Everyone knew the relationship between the two, so it was easy to do things with someone of their own.

Even if there is no An Ran, Qin Yuan will agree. This kind of thing must be based on them. He doesn't want those ordinary people to encounter some kind of situation. There is no way to deal with it. Casualties, that's not good.

Sun Hongming stood up and shook Qin Yuan's hand excitedly, "That's really great. Let's go down and make arrangements right now, this week at the earliest. We will implement it as soon as possible and then notify you."

....

"Okay, when the time comes, I'll take my staff over there, just to let our people experience your training in advance."

The two sides talked relatively harmoniously. An Ran originally wanted to be a lobbyist when she came this time, but before she even opened her mouth, Qin Yuan agreed to everything.

When sending them away, the other two also understood what it meant and glanced at each other.

"Director An, then the two of us will go back there first, let's go to the office to discuss, and I will report to you as soon as possible."

The two are also smart, so let's leave the space for the husband and wife, they don't want to be light bulbs here.

After the two left, An Ran felt a little embarrassed, Qin Yuan teased from behind and said: "They are really good enough, in fact, it was just a phone call, and it was so grand that they dragged you here too. "

"After all, this business is a business, and a private matter is a private matter. They are also thinking that they will not agree, so they call me an extra layer of insurance."

At this time, Qin Yuan suddenly leaned forward and sat beside An Ran, "Let's talk about our private affairs now."

An Ran blushed, this guy! It was broad daylight, but soon a different sound came from the room.

At around 6 o'clock in the evening, He Chenguang went to pack his clothes and saw Qin Zhengyang standing downstairs in the dormitory, "What are you doing here, kid? You are on guard here."

"Brother Chenguang, that's not true. Brother Qin and sister-in-law have been in the dormitory all afternoon. I wonder if this is lunch time? Should I ask them to eat? It's already past 6 o'clock."

"You kid is not sensible, don't just stand here, go wherever you should go, don't worry about him, they will come down to eat naturally when they are hungry."

Qin Zhengyang nodded and left, which made He Chenguang a little at a loss for a while, should he go up or go up?

After all, his dormitory is next door to Qin Yuan. After thinking for a long time, he still walked up, even opening the door carefully, but Qin Yuan still heard such a small movement.

Qin Yuan opened the door and looked at him viciously, "You brat, you made such a big commotion, An Ran is sleeping inside, if you want to wake her up, I won't let you go."

He Chenguang nodded quickly, then covered his mouth, as if he didn't even dare to breathe, quietly took his clothes and hurried down.

If Qin Yuan wanted to beat someone up, he really couldn't resist it, but An Ran was also complaining endlessly, who could bear it all afternoon.

Didn't she just fall asleep when she heard some movement, Angrily, she picked up the pillow next to her and threw it over to hit Qin Yuan, "Okay

, can't you guys let me take a good rest? My waist is almost broken. "

Qin Yuan hurriedly stepped forward and rubbed her waist with a smile, telling her to take a good rest. His fighting strength is indeed extraordinary.

After An Ran returned, he was also considering the current situation, he didn't know which special operations team to send to complete this mission.

In the past, he could just lead the red blood cell team to set off. Now, on the one hand, there are not enough staff to ask for leave, and on the other hand, he also wants to give others a chance to exercise.

After thinking about it, he came to the brigade and called out the Blade Squad. This is a new team member recruited last year. They have also sent out several missions this year, but they are all relatively small domestic missions.

It just so happens that this opportunity can give them a chance to exercise. He is still very confident about the special forces trained by his side. As long as he carries a little bit with him, there will be no major problems. Although this is a drill, it is still dangerous. Yes, they were the first to experiment.

Chapter 1773: Exercises on the island

Five minutes later, the captain of the Blade Squad walked in. This captain was personally selected by him. He personally poached this captain from the Marine Corps. This guy is quite capable.

Yang Haokang, the captain of the blade team, has always admired Qin Yuan very much, and it was his dream to join the special forces team, but he did not expect that Qin Yuan really took a fancy to him.

"Captain Qin, what do you want from me?"

"It must be a good thing. How is the training performance during the recent period? You can probably report to me if any personnel have asked for leave."

Then he thought about it and said, their training results are relatively good at present, there are too many talents in the brigade, and they can only be ranked in the top three, and they have not been able to reach the first place. Can't blame them.

Qin Yuan's selection criteria are all very high. Putting all the masters together, it is really difficult to distinguish the superior and inferior. Being able to reach this level is already much better than many people.

At present, they have not asked for leave, and they are fully staffed. Their Blade Squad has a total of eight people. After listening to the report, Qin Yuan felt that it was about the same, so he asked them to make preparations and take them to a special training base tomorrow.

Yang Haokang was very excited when he heard this, and Qin Yuan personally took them there, which is too much face, which shows that their captain values them very much.

"Okay, you kid, don't be happy here, hurry up and make arrangements, tell all the team members to rest early tonight, don't let me lose the chain."

"Captain Qin, don't worry, this is definitely impossible. With me at the scene, there will be absolutely no falling behind."

Not long after Yang Haokang left, Qin Yuan received a call from Sun Hongming, and there was some apology in his words.

There was an error in their statistics before, and they were targeting a relatively large number of people, so one team must not be enough. I want to see if Qin Yuan can send another team.

Sun Hongming was very sorry. He felt that this matter should have been notified in advance, because the special forces were definitely different from ordinary companies. They had to be on standby at any time, and if something happened, there would be a conflict with the time.

"Captain Qin, can you see if it's convenient for you? If it's not convenient, we can wait. This time it was indeed our mistake."

"Damn, is it just such a small matter? I thought it would be a little easier to deal with something big. I'm not as scary as I imagined. I will arrange this matter. Wouldn't it be enough to call another team?"

Sun Hongming didn't expect the matter to be so simple, so he hurriedly went online to express his thanks, and Qin Yuan felt that there was no problem.

Now there are a lot of teams that can go out in the brigade, so there is no problem in this point. In addition to the Blade Squad, there is also the Wild Wolf Assault Squad with good results.

These two teams were recruited last year. After such a long period of training and missions, they have almost gotten used to it.

It's just that Qin Yuan, the captain of the wild wolf assault team, is not familiar with him. He Chenguang has always been in charge of this team. They were all separated before, and each was in charge of a team.

[The problem of the slow update of new chapters has finally been solved on the app that can change the source. Download the xbyuan change source app here, and view the latest chapters of this book on multiple sites at the same time.]

Qin Yuan only saw that they had trained before. He picked up the information on the table and saw that the captain of the Wild Wolf Assault Squad was called Li Tianbo. This captain was very young, 25 years old, but he was also a 6-year veteran in the team.

There is no big problem with the experience, just like that, Qin Yuan set off with two commando members the next morning, and the team members were very excited. After all, it is not clear what task they are going to perform. Conveyed the task situation this time.

"This time the task situation is like this. If you have any questions, you can start asking questions now."

"Qin team, I didn't expect that we were going to practice. I thought it was some kind of mission. This exercise is too boring. Will it be a bit overkill for us?"

"Our Special Forces are all

With the backing of someone, we will be there whenever we need it. The tasks are regardless of size, and you should not underestimate this exercise. "

What I just said is very clear, because the report Sun Hongming sent to him also fully explained that these areas have been specially divided, and the things inside have been set up, so they can definitely be restored to the real.

Including the area full of nuclear radiation, everyone was slightly surprised when they heard this, "Huh? Team Qin, are we really going to directly enter the radiation area?"

"Nonsense, if a war like this really breaks out in the future, we will stand behind the people. If you don't go to anyone and remember to join the special forces, our lives have already been handed over to the country."

Only then did the people below start to pay attention, but they were willing to comfort them, not just putting them in casually like this, but because they were also wearing specially-made clothes, so there would be absolutely no problems.

These costumes have been tried before, and this time they need to wear the costumes to fight in a specific area.

Everyone was relieved to hear this. As long as there is protection, there will be no major problems. Everyone is looking forward to this exercise even more, although this exercise is unknown to everyone.

After traveling for four hours, everyone came to the pier, because this time the experiment was quite special, and the safety of the surrounding people must be fully guaranteed. First of all, the minefield they wanted to enter was on a specific small island.

Surrounded by the sea, so that there will be no intrusion of other people, and the safety can be guaranteed to the greatest extent.

In order to save time, they didn't delay too much, and went directly to the small island where the exercise was performed. It was only after everyone disembarked that they realized what kind of small island it was, and it was too big!

There are several military tents in the back, where the organizers of their game are having a meeting, and a few sentries are standing guard on the side. When they saw them coming, they rushed to report.

Sun Hongming came out to greet them personally when he knew they were coming, and stepped forward to hold Qin Yuan's hand, "Captain Qin, you are indeed a special forces unit, you all came an hour earlier than our agreed time."

"One hour in advance is mainly to see what your customized plan is. This hour is enough to complete all the formations and how you should arrange them. Then we will directly start the exercise at 8 o'clock."

Qin Yuan entered the military tent, everyone stood up, he smiled slightly, waved his hand, told everyone to sit down, don't be so nervous.

"Everyone, relax a bit. Now you just need to tell me the plan, how we should go, where we should enter, and the things we distribute."

Sun Hongming took out the plan he wrote, and then clicked on the computer screen next to him. He said that this is mainly based on land, and the densely packed mines are random configurations.

Moreover, this type refers to the various mine formations collected from various countries in the world, so the terrain is very complicated, which requires them to conduct the first batch of experiments.

On this entire island, they released a total of 50 militants and six hostages. This time their goal was to rescue the hostages and kill 50 gangsters.

This problem is not a big one, it is indeed completely simulated, "Okay, no problem, we can set off at any time."

"That's really great. The gangsters we arranged haven't left yet. They are preparing outside. After they enter, you can enter too."

Sun Hongming took these materials for acting as bandits, "By the way, Captain Qin, see if you want to familiarize yourself with their materials again. These are elite members I selected from various troops."

"Hahaha, there is no need for this. After all, we want to be closer to reality. If we are in a real situation, we don't have time to understand the abilities of these gangsters. We can only cross the river by feeling the stones."

Sun Hongming nodded, and then walked outside the tent, followed by Tingyuan, only to see a few people playing the role of bandits on the side and wearing equipment.

After all, this is a drill, so everyone has a map in their hands, and the map is detailed

Record the location of the mines carefully. Although they have practiced several times before, this map is also essential to avoid real injuries.

At this moment, a soldier playing the part of the gangster ran down, and he looked at Qin Yuan excitedly, "Captain Qin didn't expect it to be you, I was thinking who they would send to participate, if it was you, Then what can we call the odds?"

"Don't say that, everyone is doing their best, we are doing a better simulation, remembering your identities, you must go all out."

The little soldier nodded, his eyes full of admiration, Qin Yuan's reputation is well-known in the army, he is completely an idol-level figure.

Not long after that, many people ran over to Qin Yuan's side, and they kept urging them to officially enter the minefield.

Yang Haokang, the captain of the Blade Squad, looked envious, "I don't know when I will be able to become such a character, look, this is an idol."

"Okay, don't be poor, you kid. They have distributed equipment over there. As the captain, we have to go and get the equipment. Let's get it first and then talk about it."

In this way, the two of them used to get the equipment together. The current batch of equipment on them was all sensor-set. Qin Yuan stood beside him and could see everyone's movements on the computer.

Sun Hongming is very confident about this research, and he is eloquently introducing, "With research like this, we can realize the research of dynamic robots and use dynamic machines to replace human soldiers. In this way, our military technology is also one step ahead."

He felt that his research was already in a perfect state, but Qin Yuan directly asked him a question.

"There's nothing wrong with what you said. Just install a fixed program on our soldiers and put it on the machine. But you overlooked one problem, and that is the reception of the signal."

Sun Hongming smiled slightly. He had thought about this question before, "Captain Qin, it seems that you don't understand it. We can now fully achieve signal coverage through technological means, so it is absolutely no problem, and it can even reach remote places. The purpose of manipulation."

"But if the signal is blocked, what kind of signal do you use? Just like the current military signal, even radar can detect it. Are you sure it will be blocked?"

"this..."

Sun Hongming didn't know what to say for a while. He really didn't think about this question. Could there really be such a jammer?

Qin Yuan patted him on the shoulder and told him to practice well now, and then he can discuss it with him later, and he has seen this shielding abroad before, and it is very easy to block the signal.

After Qin Yuan walked out of the tent, Sun Hongming was still standing there in a daze. This is too awesome. He thought he was just the captain of the special warfare brigade, but he didn't expect to have such a high foresight in scientific and technological research.

The secretary next to him stepped forward with a smile, "Director Sun, you don't know this, Captain Qin is very powerful, but also very low-key. He was responsible for the design of our guns and the research on several weapons before." from."

"Ah? I've heard of this before, but the person behind it seems to be anonymous, as if for protection! It turned out to be him!"

"And he can modify the program by himself, completely adjusting the distance of the anti-aircraft gun. The setting of the anti-aircraft gun was quite troublesome in the past. After his adjustment, it only takes a few seconds."

Sun Hongming was even more admiring that this man was so versatile, and staying in the special warfare brigade felt too condescending.

He secretly vowed in his heart that after this exercise is over, he will have a good talk with his lover to see if he can be recruited to the research institute. They are currently conducting research on technological weapons. After all, the future will mainly be based on technology-based.

The two teams have put on their equipment and are ready to set off at any time. Qin Yuan looked at his watch, said that he would give them another half an hour, and give the people above a chance to hide first, otherwise they would If you go up, everyone will have nothing to play.

After a while, depending on the time, Qin Yuan was the first to dispatch the drone. According to the usual practice, they had to first

Use the drone to shout to persuade the gangsters to surrender.

As soon as the drone was dispatched, it only shouted a few words before being knocked down by the people inside, and a roar was heard from the depths of the jungle.

"This is impossible. You must meet Lao Tzu's conditions, otherwise we will not surrender. We will shoot the hostages right now."

Yang Haokang couldn't help laughing when he heard this, the brother who played the gangster this time is really good, and he just got into the play just now.

Qin Yuan thinks the kid this time is very interesting. After all, if you want to play, you have to play with authentic things, so everyone set off together, but for the sake of safety, they are still equipped with minesweepers in front of them. First, they need to clear mines to determine which side is safe.

According to Qin Yuan's plan, they were divided into two teams, one on the left and one on the right, and started towards the jungle of the island, while Qin Yuan was alone in the middle section.

Chapter 1774: strange mine pattern

At this time, the gangsters hiding on the mountain also saw that Qin Yuan was walking on the middle road alone. He was a couple. And so many bandits.

If he really wanted to shoot him, although it wasn't real, it would be unreasonable to be eliminated in the first place.

At this moment, the bandits on the mountain couldn't bear it any longer. This is an opportunity right in front of them. You must know that if you can hit Qin Yuan, the probability of that is simply too low, and once you hit it, you will really be completely famous. that level.

The snipers next to me couldn't hold it any longer, and a sniper named Lei Zi looked at the others with a smile, "I declare in advance, don't compete with me, I should give you this opportunity today, I will This is the best opportunity for sniping."

"You really have the guts to say, I think my place is the most suitable, so don't shoot rashly."

"Why are you two going to shoot? I haven't even said anything yet."

For a while, several people started arguing, and the team leader on their side came over. At this time, he had already put on the gangster's costume and a black mask on his head.

"What's the fuss, the big deal is shooting at the same time, you don't think you can hit him, you hit him first, don't talk big here."

Several people felt a little unconvinced when they heard this. Although they knew that Qingyuan was very powerful, they were condescending in this position. They were an excellent sniper position. What's more, there were all mines below.

Now Qin Yuan has been attracted by the mines below, he walked very carefully, and there are many places where he can't walk at all, so he can only squat down to clear the mines, this is an excellent shooting opportunity.

It would be too embarrassing for people to completely expose this kind of miss. Lei Zi took the lead in attacking, "Several people shoot at the same time, and if they hit at the time, I don't know who to count. Let's do it according to the order of the competition. Come on, I won the quarterly championship of the entire military region before, this should be given to me."

In this way, although the others were not convinced, there was nothing they could do about it. There was no problem with his allocation, so Lei Zi became the first shooter.

Just when he was about to shoot, the person next to him stopped him, a little impatient, after all, the shooting was interrupted, and he had already prepared everything.

"Aren't you annoying? Don't you know that when you are facing a sniper and shooting, you must never disturb him?"

"Leizi, I think we haven't finished talking about you kid. We haven't decided yet what kind of shots you shoot indiscriminately. If you miss the first shot, what should you say?"

"How is it possible? I have won the quarterly championship of the military region for three consecutive years. Has any of you won it like this? Stop talking nonsense and don't bother me."

"Since you don't say anything, let me say that if you miss, then it will be my turn next, followed by Chen Yang, and finally Wang Zimo."

His arrangement is indeed quite reasonable, and if you think about it carefully, it is distributed according to the strength of the high and low. These snipers have all participated in the competition in the military region before.

So we also know each other's strengths. There is not much difference in their strengths. In the end, they are divided according to the results of the word competition.

Lei Zi was already very impatient, so he could only deal with it quickly, because he felt that this was such a big goal, and he could achieve it with his eyes closed. If he couldn't achieve it, he might as well go home and farm.

At this time, he was full of confidence. Just when he was about to pull the trigger, Qin Yuan, who was squatting on the ground with a face serious about clearing mines, suddenly raised his head and smiled at him, and the bullet flew out in an instant.

But Qin Yuan's reaction speed was faster, and he jumped away with a sideways move. Everyone was completely shocked. Although it was an empty bomb, the speed had a certain proportion. Since he dodged it!

Lei Zi's eyes widened even more, he couldn't believe it at all, and was about to fire the second shot when the person next to him pulled him.

"Let's just say that you kid is the best at playing tricks. I just agreed to shoot one shot per person. Now you are not qualified. Get out of the way. You can't do such a thing well. How can you win the championship with your speed? I don't think so. totally just laughing

talk. "

Lei Zi could no longer hear what the people next to him were saying. He didn't expect that someone could actually dodge the bullet.

Moreover, Qin Yuan was very calm, as if it was just an episode just now, which had little effect on him. Lei Zi thought to himself, if he could dodge the bullet like this, he would probably have to show off for a few days and nights. Unexpectedly People are so calm.

Just as he was thinking, the second shot went out without any bullets. It was the person next to him, but Qin Yuan still did the same action as before, this time he did it more perfectly, and directly did a backflip.

Dodging two shots in a row is simply too exaggerated. The remaining few people saw that the situation was wrong, and they were no longer one-on-one, so they all shot at the same time.

Because they knew that the two people in front of them were also very strong. In this case, Qin Yuan seemed to be able to predict the position, which was too exaggerated.

Chen Yang glanced in the scope, and then told Wang Zimo on the opposite side, "Let's shoot together later, in two directions, and I'll see how he hides."

[In view of the general environment,

Wang Zimo gestured an ok gesture, and the two shot quickly. Basically, no one could dodge this angle. More importantly, the speed of the bullet was faster. This time, they did not intend to dodge. He took out a throwing knife from his sleeve and threw it at the bullet in front of him.

As for the bullet on the side, he dodged all the flowing water with a slight bend, and everyone was stunned under his operation. This is too exaggerated, the bullet was actually shot out by his throwing knife.

"I'm going! This is simply the **** of the gods, and it's too exaggerated. Did you see how the bullet was shot out just now?"

"I didn't see it at all. I felt it hit, but it only hit his knife. How did his knife do it so fast?"

"What's more important is that he can attack at the same time, and he can also dodge the bullets I shoot. This speed is too exaggerated."

Everyone is talking about it, because this is indeed completely beyond the imagination of ordinary people! Qin Yuan just stood up and stretched, then shouted over there:

"You guys have been shooting. If I followed my previous personality, I would have dispatched immediately, but now I want to give others a chance, so you are lucky."

Everyone was puzzled when they heard this. There are so many landmines in front of him. Even if he wants to go up, it will not be so easy. Qin Yuan chose this road, which is the most difficult one. After all, there are no trees here to cover him. The vision is exposed.

But at the same time, he also created opportunities for others, especially the teams on both sides. The captain of the Blade Squad led the team to the halfway up the mountain, and they also heard gunshots just now.

He is very confident in Qin Yuan, he has seen too many operations by Qin Yuan beyond his gods, this situation can only be said to be trivial.

"Everyone started to move forward in batches according to the previous plan. Don't make any noise. Follow the previous formation and wait for the team on the right to arrive. We will act together."

Almost at the same time, Li Tianbo, who was facing him, had also arrived at the designated position. The strength of both sides is the same, comparable.

Li Tianbo answered his position on the walkie-talkie. After the report, he asked again: "Captain Qin, should our side attack first? I have already seen the bandits."

"Calm down, report your current situation first, and describe your current environment accurately."

Li Tianbo took a look, and then looked around, "Report to Team Qin, there is a pine forest in front of us, which is already close to their territory, and it is currently impossible to determine whether there are landmines."

"Since you can't be sure, let's detect the mines first. This is the standard for every mission I perform on you. Whether it's a drill or an actual combat mission, you must first ensure your own safety, understand?"

Hearing what Qin Yuan said, Li Tianbo could only hide the people around him, and then he carefully took out a small drone and started to go to detect mines. After all, if people passed by, they would definitely be found.

When the drone flew over, he saw many red dots appearing densely on the display screen, and he gasped in surprise. This is too exaggerated, they are all land mines.

And this number is too much to arrange at all. After all, it seems that they are connected one by one. As long as one is triggered, it is very likely that all the others will be triggered.

And for a more realistic experience this time, the mines used this time are the most real ones. They also excluded some before, but they are all mines that they usually see. Now this situation makes everyone a little embarrassed.

After Li Tianbo reported the situation, Qin Yuan asked him to wait for him to come to check. After all, they usually come into contact with many types of landmines.

After the intercom ended, the soldiers behind Li Tianbo also squatted down and looked, "Captain, I don't think this will happen. After all, there are no mines that are all connected together."

"But that's what's on the monitor right now. There's no way to sort out this kind of landmine. Let's wait for Team Qin to come over."

At this moment, love came from their headsets again, asking the blade team to attack from the left first to attract their attention, and then he came over here.

This time, the members of the Wild Wolf Commando were a little anxious. After all, they had already launched an attack, so they could only wait on the spot, and they had to wait for Qin Yuan to come over to check.

"Captain, this is embarrassing for the brothers. We are all from the same brigade. Everyone has already eaten soup and meat over there. Let's just wait here."

"What are you talking about, boy? Wait carefully for Captain Qin to come over and check. If there is no problem, let me tell you, these are all real mines, and there can be no mistakes."

In this way, everyone calmed down. After all, orders are the highest indicator. After a while, Qin Yuan came over.

Li Tianbo showed him the drone. To be honest, Qin Yuan saw this kind of landmine for the first time. It's the latest technology from the US."

"Qin team, what should we do now? Is this thing real? Why does it look like it is connected? Even if we want to line up, we can't line up here. If it doesn't work, just take a detour."

"You kid, take a good look and analyze the current situation. Where do you think you can go around? And don't be impulsive, have you seen it? They deliberately exposed it there to let you relax your vigilance."

And this time the exercise is still very different, because they want to test the current landmines, the equipment they wear, the specific protection power, and the maximum power of the landmines.

They are recording everything, so don't be negligent. Their records are the best textbooks for the future.

Speaking of which, Qin Yuan put down the drone. He squatted down to check carefully, but did not check the data on it. Suddenly, Qin Yuan made a movement, which shocked the people behind him, because he took out the drone without warning. The dagger began to clear mines.

After all, all the landmines are connected together, once one of them is triggered, there will definitely be problems.

Thinking about it this way, everyone subconsciously wanted to back away, but Li Tianbo stepped forward. When he came to Qin Yuan, he also knelt down and watched the movements of his hands.

"Others are retreating, what are you doing here?"

"Qin team, I really want to study hard. This time you are here, you can take us with you, but if we meet next time, there is no way. I want to learn from you."

"Okay, as expected, He Chenguang brought it out, take a closer look, my movements will be slower."

At the same time, Li Tianbo also raised his own question, isn't it all connected together? Why was Qin Yuan so sure that he could expel a thunder?

Qin Yuan's explanation for this is very simple. said that it is impossible to have that kind of landmines all connected in a row, and with so many connected, it is impossible to release the mines first.

So this can only be an illusion, he is only opening one of the landmines now, first research a

Let's figure out what's going on, and then we can figure it out.

"In the future, when you encounter such a situation, especially when you are not sure, you can open it tentatively. After all, the research speed of various weapons is too fast now."

The speed of updating also represents their learning ability, and the special forces must be exposed to these things as soon as possible to ensure safety.

Qin Yuan carefully peeled away the soil, and then saw the landmines buried below. Only then did he notice that both sides of the mines were hung with iron wires.

No wonder the drone's infrared detection can see that it is connected together, and it is really connected with wire, which surprised him a bit.

"Qin team, this is too exaggerated. So many mines can be discharged. It seems that this person is also a master."

Chapter 1775: give a chance

At this moment, Qin Yuan made a gesture, "It's not that difficult. If it were me, I would do it too. Look carefully, is the wire different?"

Li Tianbo observed him carefully when he heard what he said, but to be honest, he didn't react after watching it for a long time.

Seeing his confused appearance, Qin Yuan approached the wire with a dagger, but unexpectedly the dagger was sucked up, "Ah! This turned out to be a magnet."

"But how should we arrange it like this? They are all sucked together, which is too difficult, no wonder it can be put in, as long as he puts it in the first one, it will naturally be able to **** in the second one, and this kind of The touch of a magnet will not cause an explosion."

"Right, so that's the reason, but if we want to rule it out, touching one will definitely involve the following."

This kind of landmine makes my lover feel more and more interesting. Now that the update is too fast, he should also let the soldiers learn as soon as possible. He has been completing various tasks before, and it seems that they should also be systematic. train.

But at this moment on the other side, the scene of their demining has been projected on the data screen behind.

Everyone was sweating, especially Sun Hongming, "This Qin Yuan is really messing around. He didn't even wear an explosion-proof suit. The power of this explosion is not small."

"But Director Sun, you know about the explosion. Even if they wear explosion-proof suits, it doesn't mean much."

Everyone's expressions were very solemn, because someone really needed to do this job, and they didn't know the success or failure. At this time, Sun Hongming picked up the walkie-talkie.

"Captain Qin, the mines you are rowing now are newly developed by the military in the United States. We have finally obtained this kind of mines. How about I tell you about its detailed characteristics?"

"No, if this is on a real battlefield, no one will explain it to me."

"But this is not a real battlefield. The life of each of you is very precious. I must explain it clearly to you so that you can be sure to experiment with others."

Qin Yuan smiled slightly. His strong self-confidence represented his strength. He stretched out his hand, touched the landmine slightly, and quickly formed consciousness in his mind to recover the things in his hand.

At present, his skills have reached the full point, so recycling will not gain any skills, but it can quickly analyze the entire shape of the mine.

After the analysis was over, he smiled slightly. It turned out that this is the case. Although the magnets connected all the mines together, there is a way to dismantle these mines directly.

This method is more troublesome, but there is no way to deal with this kind of landmine. It seems that the research institute on Mi Jun's side has indeed spent a lot of money, which makes Qin Yuan also feel that research must be put on the agenda as soon as possible, otherwise the research on this One piece fell a lot to others.

To crack this kind of landmine, first of all, it is necessary to plant more landmines. When the last landmine is found, it is the last to play the role of connection.

Otherwise, the entire magnet cannot be formed, and this connection will only appear after the mines are arranged in a specific formation.

Because the magnets attract each other, the last one is the key role, and the first one buried and the last one should be the end to end echo.

Qin Yuan turned his head and looked at Li Tianbo, "I'll give you a chance, do you want to? This is a rare learning opportunity."

Li Tianbo was very pleasantly surprised when he heard this, he must do it, although it is very dangerous, but if they encounter this situation next time, there is no way to solve it, so he must complete the experiment as soon as possible.

In this way, under the guidance of Qin Yuan, he began to run cautiously. The soil beside him had to pull out all the landmines on it, exposing the upper part, so that Qingyuan could judge which one was the last one.

"Qin team, but if this is the case, will there be a mistake?"

"Are you stupid, kid? How can there be false touches in this situation? I'm sure it's fine. You go and follow the instructions on the drone. You are responsible for the area on the left, and I'll start on the right."

Li Tianbo almost forgot about this, smiled, and then controlled the drone to carefully clear the mines beside him.

Seeing this scene, Sun Hongming's heart was already in his throat. After all, if they made a slight mistake, a chain explosion would be triggered, and everyone here would be reduced to ashes. It was a very terrifying thing to think about.

After all, there are nearly 30 landmines buried in this area. When they bought this landmine, it took them a full four hours. It is also very laborious to bury this landmine.

However, according to Qin Yuan's method, it is indeed feasible. After all, if those buried too deeply walk from above, they will not trigger the organs below.

The power and disadvantages of this landmine are similar, it is very powerful, but at the same time, as long as the upper part is removed and the lower part is not touched, it will not have any effect. The upper shallow surface layer can buy up to seven or eight landmines, mainly relying on These seven or eight mines detonated below.

Li Tianbo was already sweating profusely. He didn't know how Qin Yuan did it, but at this moment, Qin Yuan was full of confidence, and he observed with his hands behind his back.

He raised his head and glanced slightly, only to see that Qin Yuan was already standing behind him observing him.

"Qin team, I'm really nervous, but I will definitely speed up."

"Don't worry about the battle over there. They're fighting over there. I've already asked them to attack over there. It's also a delay for us to clear the mines. The most important thing to remember is not to be so impatient. Take it easy and take your time."

It is true that the influence of the outside world is very large, because the Blade Squad has already fought the bandits in the exercise, and they are about to launch the first wave of attacks, which makes him feel more tormented all the time.

In addition, this is a real landmine. Once it explodes, the consequences will be unimaginable. They did not wear any explosion-proof equipment.

In fact, even wearing explosion-proof clothing in this case is not very meaningful, so I don't wear explosion-proof clothing at all.

After all, wearing heavy explosion-proof clothing will affect the overall observation, and the side vision will be affected, and if many operations are slightly improper, it may cause chain explosions.

Li Tianbo's sweat dripped down drop by drop, and the soldiers behind were also very nervous. Qin Yuan patiently guided him and told him how to observe. After ten minutes, all the surface mines were finally cleared.

"Qin team, I'm sorry, I wasted too much time, I feel a little sorry for the brothers, they have been waiting here all this time."

"You have to remember that it doesn't matter whether you win or not, but this is a very good opportunity for experimentation. This time is a drill for you, but the next time you face it is likely to be an actual battle, so you must be more vigilant."

In other words, even if they lost this time, but they got the chance to operate this time, there is no problem. If it was Qin Yuan, he would have completely solved it in a few minutes.

He also knew that he would never be able to replace these soldiers, and he should let them learn to grow. Many things had to be solved by themselves.

After the whole mine was exposed, Qin Yuan asked him to observe to see what was different. This time, Li Tianbo calmed down and observed the mine carefully. He only saw a mine in the middle that was very different.

"Captain Qin, look at the mine in the middle. The other mines only have two wires, but they are all surrounded by wires."

"Your observation ability is still good, I didn't try to clear that mine. After all, there are too many wires, and it is easy to touch, so only a small part is exposed, and you still saw it."

After being praised once, Li Tianbo was a little embarrassed. Qin Yuan patted him on the shoulder as encouragement, telling him to relax, don't make him so nervous, and treat it as an experimental class now.

He also wanted to relax at first, but the fight over there was so intense that the Blade Squad was completely delaying them, which put a lot of pressure on him.

"Put your heart in your stomach, kid. Now focus on clearing mines for me. I will teach you how to do mines. If the Blade Squad can't hold on to this, there's no need for them to hang out in my team."

This is Qin Yuan's self-confidence, and he personally selected the captain of the Blade Squad. At the moment, the Blade Squad on the other side is indeed playing very well. They maintain a complete formation and constantly harass the enemy.

Under this kind of attack, the opponent did not advance rashly. After all, there were mines in front of them. This was confirmed by Qin Yuan before. The mines on both sides were different and could only be used for long-range attacks.

At the same time, the captain of the Blade Squad saw that he couldn't move forward, and felt a little anxious.

"This exercise seems to take longer than we expected. I thought that the battle would be over in an hour at most, but it looks like it is far more than that."

"Captain, we have enemies in front of us, so we can't do it. It seems to be different from theirs. We can only wait for Team Qin to come and see."

"I know this, so everyone must hold on, buy time for them, and remember that our two teams are helping each other."

At this time, the gangsters on the mountain also noticed something unusual, and the right side was completely silent, which meant that they were quietly clearing mines.

There was also a team leader on the side of the gangsters. He took out his binoculars to observe, but he couldn't see any movement. Everyone was hiding in the dense forest ahead.

"The first team will come with me to attack them now, and we cannot let them clear the mines successfully."

The bandits behind were a little surprised when they heard this, "Huh? Captain Chen, are we really going to do this? After all, this is just a drill, and everyone depends on their demining situation, so make good data."

"The leaders at work this time, including his game office, are looking at real data. If this is the real situation, what will you do? Do you think the gangsters will foolishly wait for their success?"

Having said that, a few people stared at him, although they were a little reluctant in their hearts, after all, they were doing such a dangerous job, and they still wanted to attack him now.

However, there was no other way with the captain's order, and they had no choice but to set off. At this time, the captain turned his head and told them solemnly that they must go all out.

There was a young soldier whose goal was to enter Qin Yuan's special warfare brigade, but the special warfare brigade recruited them very strictly, and only recruited once every six years. He didn't know if he would be able to wait for such an opportunity.

When he joined the army, the timing was not too good. He had just encountered the recruitment of the special operations brigade, so if he wanted to enter the special operations team, he would have to wait for the next six years.

He admired Qin Yuan very much, he had heard a lot about him outside, and he admired him from the bottom of his heart when he actually entered the army.

So now he is very dissatisfied with the captain's actions, and feels that this is the kind of landmine that no one has seen before. Add fuel to the fire?

So when the captain led them to the designated location to launch an attack, no one in the team was willing. At this time, Qin Yuan also noticed the movement.

"It's finally started. Otherwise, it wouldn't be difficult at all, and it wouldn't be close to actual combat at all. This exercise would be meaningless."

Qin Yuan asked the soldiers behind him to prepare for a counterattack, and left two people to come with him. They were here to clear the mines, and the others had to do their best to cover.

The captain on the opposite side also ordered to shoot directly at this time, and was completely blocked by the number at this position. Although they couldn't see the situation on the other side clearly, they were definitely in that position.

However, after firing a shot, the captain discovered the problem. These guys didn't operate at all, and the fight over there was messed up instead.

"What are you doing? You can't even reach the level of recruits! Where did I ask you to shoot? Where did this go?"

"Captain, you know , we are not stable at all, and besides, who knows how we got there."

Hearing what the team members said, the team leader actually understood what they were thinking.

"Although this is an act, we must do our job well. You are gangsters now. Do you think it is good for them to release water now? If we don't do a good job in acting, it will put our team members in danger instead. What do we do after that?"

The captain patiently explained that because it was a drill, they still had a chance to save them. If it was a real battlefield, others would never give them such a chance, and it would harm everyone instead.

"Now you have to do what you are. This is the real help to them, understand? This is what we should do."

"But they are clearing mines. Our shooting really put them in danger. What should I do? I really can't do anything to my own people. Although it is a drill, those mines are not fake."

Chapter 1776: good study material

"Let me emphasize again, now is a drill, and there is still a chance for them. If this happens, do you think the gangsters will be merciful to them?"

The few people next to us bowed their heads in silence, grabbed the guns from us, and said that if they couldn't do it, they would do it themselves, because this matter is not just a matter of saying or not doing it.

This is all for the good of everyone. The purpose of their special forces is to step on the thunder for everyone first, first to see how the current results are, and how they will deal with this situation in the future.

Without further ado, the captain shot directly towards that side. Qin Yuan had already expected this situation, and he told everyone to find cover quickly. Before that, everyone was ready, so no one was eliminated.

Li Tianbo was already clearing mines, but now he is sweating profusely from nervousness. After all, this is related to the lives of so many people, and there are countless landmines below.

After being shot suddenly, his hand trembled, and Qin Yuan quickly pressed his shoulder, almost causing trouble if the handful of soil fell to trigger the mechanism.

Li Tianbo was also taken aback. He wiped the cold sweat off his forehead, feeling very unhappy. He stood up and was about to yell at him. After all, the other party has gone too far. Isn't this just taking advantage of others?

"What is this guy going to do? I just said continue to dismantle, just do your own thing, and leave the rest to your teammates to cover. Now you have to hand over your back to them, understand?"

"Qin team, but they went too far. They just shot at us. This is a real land mine. There are so many people, let alone us, they will probably be affected!"

"Then what is your identity? What are their identities now?"

"But isn't this a drill? It's necessary for them to do this. What if someone dies?"

"It's really easy for you to say it. It's just because it's an exercise that we have to make it more realistic. Otherwise, it will be more dangerous when we face actual combat later."

After saying this, Li Tianbo also understood, he didn't speak, Qin Yuan told the team members behind that they must resist, go around from the rear and start attacking them, attracting all the firepower.

Then he transferred to the Blade Squad to speed up the speed and intrude as soon as possible, and then attract the firepower from this side to buy them time.

The captain of the blade team expressed his understanding. He put down his backpack and started to control the drone. This was originally their secret weapon, and now they can only use it first.

Soon, the drone hovered in the opposite cave, and several gangsters were about to kill him, when suddenly the drone released a lot of smoke.

They can't make too direct investment now. Firstly, there are landmines in front of them, and secondly, they have hostages in their hands. According to the normal situation, they really can't record them now and can only deal with them.

And according to the normal situation, the gangsters would not kill the hostages at will at this time, but when they encountered no way out, the hostages were their last bottom line.

Facing the attack from the Blade Squad, the gangsters were a little out of shape for a while. Under such interference, they successfully attracted their firepower.

The captain of the Blade Squad is a smart man. He knows that all he needs to do now is to act out a show. What he pays attention to now is a technological confrontation, so he uses these things very well, and soon a mechanical gadget flies out, staying on the trunk of a tree more than ten meters away.

Then under the control of this side, the mechanical gadget kept shaking the branches, creating an illusion for people, as if they had already broken through.

At this time, on the side of the gangsters, they also noticed that something was wrong. What's going on? Why does it seem to have broken through?

"Can you receive the first team? Hurry over to support, they seem to have rushed up."

The captain was also in a dazed state when he received the signal. This is absolutely impossible. He is not worth it to himself. He is very confident. There are no mines on both sides, and they are of different types. How could he break through in a short time? go up?

"You're not kidding, right? They absolutely can't fight in this situation."

"They rushed up after more than two hundred meters. I have already seen them coming. Hurry up and support them. Don't let them break through. Such a short time will be too embarrassing."

Hearing the other party's report, the captain of the first team frowned. What's going on? They had already dismantled the mines so quickly.

Several team members who were still attacking just now turned their heads to look at the captain when they heard this, "Captain, what should we do now? Should we stay here and attack?"

"Leave two people, and the others will follow me. Go to support there first. Don't let them complete the breakout. I don't know what's going on. Their speed is too fast."

This is the captain of the Blade Squad. First, he created an illusion for them, making them think that they have successfully broken through. This is the real attraction of firepower.

He turned his head and glanced at the players behind him, telling everyone to get up to 12 points. Now they have to show their vitality, support all the enemy's firepower, and buy time for them.

Li Tianbo heard that the gunshots were getting less and less, and most of them had been transferred. The pressure in his heart was getting bigger and bigger. He also accelerated the movements of his hands. Finally, under Qin Yuan's guidance, he actually cracked the gunshot. Opened the first mine.

It was the first time he had cracked this kind of landmine, so he was very happy. Qin Yuan encouraged him and asked him to continue.

"It's a very good job, but let's work harder and line up all the surrounding ones, then we can all rush up. In ten minutes, can you?"

This time, Qin Yuan is completely in command. After all, he wants to give these team members a chance to practice, otherwise everything depends on him, and it will not work if this continues.

Speaking of this, Li Tianbo felt a little nervous. He looked at the two players behind him. If the three of them stayed together for ten minutes, it should be possible.

"Captain Qin, I think there should be no problem."

"I don't want you to think that I want to get an affirmative answer. You are the captain now, do you understand? Don't take them out to perform missions because I interfere with your judgment. What do you do in such a situation?"

After being told this, Li Tianbo became firm instantly. He nodded, expressing that he would definitely be able to complete the task, and it only took ten minutes.

"You kid, remember what you said. Let's put it this way, if you can really finish it in ten minutes, I will treat you to roast lamb legs when you go back. But if you don't finish it, go back and give me extra practice. It's a bunch of waste."

All the team members were working hard, and the people behind were not idle at this time. They started to attack the gangsters in front. There were only two people left, so the firepower was completely suppressed for a while.

And at this time, one of the gangsters was still smoking, he was shot and eliminated, and the other saw that something was wrong, so he could only retreat towards the back, temporarily retreating first, after all, it is not so short for them to crack the mine It can be done.

As time passed, the pressure on the Blade Squad was very high, they had already been beaten back, and the gangsters also felt that something was wrong.

But because of the smoke made by the drone, they did not dare to rush forward, and the two sides have been confronting each other non-stop.

Yang Haokang, the captain of the Blade Squad, also kept looking at his watch, because the smoke can only last for eight minutes at most, which has reached the limit.

So he hoped that the wolf commando on the opposite side could finish as soon as possible, and he was also a little worried that it would not be able to delay. Going on like this is a waste of ammo.

"Liu Shuai, aim your sniper rifle at a distance from above, attack them from above, and try to disperse as much as possible when others shoot."

This is also to save ammunition. When their commandos do this kind of mission, they don't have a lot to bring, and there is no way to get timely replenishment, so he has to consider many things.

Qin Yuan watched from a distance, and then watched Yang Haokang's operation. He was very happy in his heart. This shows that the commando team has hope. The teams that will grow up later are very powerful. no problem.

Li Tianbo here finally completed all the demolition work. He was completely relieved and completed it within the stipulated time.

It's just that he is very uncertain now, how to conduct the experiment, after all, what Qingyuan said just now is just reasoning, no one knows whether it will affect the people walking past or not.

The main reason is that the locations of these landmine burial sites are relatively scattered, and all the mines below have been dismantled, and the bottom is buried relatively deep, because the iron wire needs to be covered again.

Qin Yuan walked over with his hands behind his back, and after a slight glance, he said that there was nothing wrong with it, and everything had been dismantled. Before Li Tianbo could react, he strode up and surprised everyone behind him.

There was a red camera flashing on the tree behind. Behind the camera, Sun Hongming was taken aback.

Just when everyone was in a hurry, Qin Yuan had no problem at all, he not only walked up, but even jumped up on it.

Seeing everyone's nervous expressions, he said comfortingly: "Look at your appearance, how decent are you? After all, you are all special forces members, and you have to go through big winds and waves. What is this? It's okay to go."

After all, they dismantled it by themselves, so you have to have confidence in yourself, otherwise it will be hard to believe later, and at this time, one member of the team is a little embarrassed.

In the end, he still reported: "Qin team, I don't know if I can go there. My weight is higher than all of you."

Qin Yuan turned his head when he heard this, only to see that he was indeed a little fat man, but compared to what Li Erniu said, he said, "Don't worry, it's fine, you can't touch the mines below

with your little vibration, he The lead wire is very long, mainly due to the fact that the wire has been removed by us, so there is no problem."

Although Qin Yuan said so, the soldier still hesitated. Qin Yuan had no choice but to let the others go first. Then he grabbed the soldier by the shoulder and pushed him forward violently. This force was enormous. , this soldier couldn't control his figure at all, and almost fell to the ground.

When he raised his head, he had successfully passed, and he was instantly relieved, he did not expect to succeed.

But at the other side at the monitoring room, Sun Hongming and all the staff were cheering. He was very excited because they had tested many methods.

In the end, the only way is to use robots to dismantle the bomb, and there will be damage, because it is difficult to find a breakthrough point. I didn't expect Qin Yuan to actually do it.

Excitedly, he asked the people next to him to quickly save this material, "This is the only learning material, copy it right away, and then let all soldiers start learning, this is the new method of dismantling landmines."

And Qin Yuan and the others have successfully dismantled the mines and have touched them, "Now you should have no problem dealing with the bandits inside, don't wait for me to teach you."

"Qin team, don't worry, they have given us so much time just now, let's see what we do next."

"Okay, but you have to control your speed a little bit, you have to save some meat for the blade team to taste."

Qin Yuan's words were very clear. After all, the gangsters inside were definitely not their opponents. It was like taking hostages to kill the gangsters, leaving a few people behind for the Blade Squad to play with.

Yang Haokang watched the time go by, but there seemed to be no movement there. Just when he was hesitating what to do, Qin Yuan appeared from behind.

"Captain Qin, why are you here?"

"Of course the landmines over there have been dismantled. I let them go up first. Your performance here is also very good. This is an unprecedented cooperation. Okay, now let me take a look at this side I will teach you what kind of landmines are there."

But they can't do anything yet, and they have to wait a little longer. After all, the opponent hasn't started fighting yet, so they need to attract the firepower there.

As the smoke dissipated, those gangsters realized that they were in the brain, and they didn't break through at all. They just hit indiscriminately.

When they knew they were being fooled, gunshots suddenly came from the entrance of the cave where they were lurking on the right, and a voice calling for support came from the walkie-talkie.

"They have already broken through, asking for support!"

The walkie-talkie is completely silent, which means that this person has been eliminated, and once eliminated, all equipment will be in a state of complete failure.

The captain of the first team just now couldn't figure out what was going on. Are they so fast? It has been completely disassembled! There is no way, he can only take some people to rush over there to support, and the rest of the people still stay here.

Chapter 1777: Demining Demonstration

After all, this small island is relatively large. Although there are many kidnappers, the small island is too big, and they can only run back and forth due to the dispersion caused by the number of people.

Qin Yuan squatted down, and patiently glanced at the mines in front of him. It was still the previous plan, asking them to find a few people to fill up the positions, mainly to cover the mines here.

The main reason is that the mines here are really different from the previous ones. After they scanned, they found that they were indeed separate mines, and this mine was a bit different.

Yang Haokang and Qin Yuan explained that they hadn't tried it yet, mainly because everyone still couldn't figure it out, "Captain Qin, take a look at this thing that we've never seen before, and it always feels like it's suspended in the whole soil."

Qin Yuan nodded, what he said was indeed correct, this thing felt a little different, he slowly approached the mound, and then carefully picked up the soil layer.

At this time, the team members behind were all discussing in low voices, except for the one who was supporting in front, there were two more following behind.

They looked at Qin Yuandu's cautious appearance, and the two of them felt a little fussy. After all, the problem of the landmine is not that serious to them now. In fact, there is no need to make such an exaggeration. The sooner they go, the sooner they can pass.

"You said that the captain and the captain are too fussy. They have already fought on their side. Our side has been covering for a long time. I have seen this mine before. There should be no problem. It is similar to our ordinary ones. "

"That's what I said too. It makes our Blade Squad seem to be inferior to their Wild Wolf Commando. At that time, they will take all the credit and we will become a foil. Where is the reasoning?"

The conversation between the two was heard by Yang Haokang. He turned his head and gave a warning with his eyes, signaling the two people not to talk nonsense.

But Qin Yuan still heard it. He stood up and glanced at the two people behind him, and spoke to him seriously, which was also a lesson for them.

"No matter what, first of all, as your captain, you must be responsible to you. This mine is indeed not ordinary, but an anti-infantry mine."

The two people behind couldn't believe it when they heard it. After all, jumping mines are usually buried in shallow places. How could they be buried inside? If it is buried a little lower, there is no way to take off at all.

They have also been exposed to that landmine before, mainly because when they guess correctly, they will jump into the air and explode in the air, and countless steel ball fragments will burst out.

This is mainly set for infantry, but it is obviously not the right place for them to buy. In this case, because there is dirt on it, the injury rate of bouncing up will not be very high.

"It seems that you two guys still understand quite a bit. Of course, I came here to take a good look. This is a brand new renovation, and everything around is like this. He didn't jump up, but went down to trigger the mines below. It's different."

Qin Yuan did not take the risk of asking them to eliminate this mine directly. After all, he wanted to do a demonstration first. He got down on his body and carefully scraped away the soil. Soon the entire mine was exposed. This mine was like a small iron can.

Then Qin Yuan opened up the surrounding soil again, and only then did everyone see clearly that there was a very thin eyeliner underneath, and this was what triggered the bottom, and the bottom was the real lethality.

"Believe it or not? As long as this explodes, everything below will detonate, and then cause a chain reaction. You can't run at all, and everyone standing around here will be affected."

The two people who spoke just now have been dumbfounded by surprise. They are indeed freshmen. If they had just arranged rashly just now, they thought that there would be no problem if they were arranged at the top, but the lead wires were still connected at the bottom. This is simply too cunning up.

"We have never seen this kind of landmine before. Could it be that the outside is updated so quickly now?"

"I remember giving you a class before. As I said, the update speed outside is also very fast. No country is stagnant. I think these weapons are being developed every day."

The two nodded and didn't speak any more. Qin Yuan carefully demolished it. He checked with his eyes and found that there were about seven or eight people around.

He turned his head and looked at Yang Haokang next to him, telling him to prepare to attack, or he could call two team members to join him. He had done a good demonstration just now, and now it's up to them to deal with it.

Several people were a little nervous, Qin Yuan frowned, a little dissatisfied with their reaction, but Li Tianbo's speed was quite fast, so he went straight to it.

Why was he so hesitant when he came here and saw them here, and he was a little unhappy that he brought it here himself.

"This is an on-site assessment. Can you do it? If not, the special operations team doesn't need such a person. If you don't have this kind of courage, then don't stay here."

Having said that, a few people hurried forward and squatted on the ground, and carefully began to scrape away the dirt. Qin Yuan was beside him, and he taught them patiently, telling them not to be too nervous, and took this as an assessment, a training.

On the other side of the monitoring room, Sun Hongming was also very surprised, because he felt that Qin Yuan's teaching method was really too strong, he didn't hide these soldiers behind at all, and let them take action when it was time to do so.

This also gives a great opportunity to practice. It is better to say something good 100 times than to move once. Only when they make a move can they truly remember and become a real fighter. Otherwise, they can only hide in the back and rely on their own battles.

"Look, in fact, we have contacted many army officers, but there are indeed very few who are so relieved to let the team members get started directly. They are all worried about problems. Treating soldiers as treasures often leads to more serious consequences. They I don't know anything on the battlefield."

"The main reason is that you can't take the responsibility if something goes wrong. Don't you know that in the last exercise accident in the military region, a soldier's ligament was broken, and as a result, the military commander above was implicated and punished. "

"This question still has to be reflected with the above. The main thing is to pay attention to speed, so why can he do it? Many things still vary from person to person."

Although Yang Haokang and the others were very hesitant at first, after clearing a landmine, they began to be handy, and Qin Yuan was also very satisfied. Their behavior just now may be because they were by the side, so they were somewhat affected, and they would always give them Create some stress.

Seeing that they have successfully cleared all the landmines, the entire monitoring room is already cheering. In fact, the entire island is not full of landmines, but these two mines are the most difficult, and other kinds of mines are also very difficult. have.

As long as these two places are broken, other places are no problem. The monitoring room feels that this should be used as a teaching video, and all things must be disseminated so that everyone can study hard.

The Blade Squad and the Wild Wolf Commando were not restricted by landmines, and their attack speed was very fast. The gangsters who thought they had a geographical advantage just now were at a disadvantage in an instant. They could only retreat continuously, planning to retreat to someone's place That one, using hostages to threaten.

At this critical moment, Qin Yuan actually backed out. He had already appeared outside the monitoring room. Sun Hongming was a little surprised. Now was a critical moment, and he, the commander of the team leader, was not there.

"Captain Qin, what's going on with you? Why did you come here suddenly? And this is a leak, you can't check the situation in the surveillance."

"Why don't you believe me? Come on, search me but there is nothing, and I don't plan to go back."

What? This confuses me even more, what is the situation?

Qin Yuan walked over to pick up the mineral water on the table, unscrewed it and took a sip, "It's nothing, I just got a little thirsty after exercising for a while, so I came here to drink some water, and take a rest here, and I'll leave the rest to them."

There was even more silence in the tent, which is too exaggerated, so the battlefield was handed over to the team members, and he, the commander, came to this place.

Qin Yuan was very confident about the upcoming battlefield, so he didn't want to worry about that. He just took out the map and asked Sun Hongming where the other places were. After the bandits were solved, he would personally demonstrate.

Sun Hongming seldom saw such a calm commander, and he was able to be so calm when the fight outside was fierce.

But soon he knew why, Qin Yuan just came to sit down, only six minutes later, all the fighting was over, the hostages had been rescued, and notifications were sent out there.

Qin Yuan looked at his watch, but he was a little dissatisfied. The members of the Wild Wolf Commando and the Blade Squad all came down. The first time they got down, everyone lined up neatly, and then started to work on the ground. push ups.

The others were all taken aback, and Sun Hongming hurried forward to ask what was going on.

"Director Sun, don't worry about this. This is also a punishment. I stipulated that all the gangsters and hostages should be dealt with within five minutes. But after one minute, they are punishing them."

Hearing this surprised everyone even more. This requirement is too harsh, and everyone will be punished after only one minute.

But it can also be seen that Qin Yuan led the troops here, and everyone obeyed his management. Even if they were punished, no one complained, and everyone obeyed the command very much.

The soldiers who played the role of bandits came down and felt a little ashamed seeing this scene. They won the battle, and they all won. In this case, they still feel that they have made a mistake and are being punished, so what is it for them?

It can only be said that the special operations team is really different from them, and has different requirements in all aspects. For the special operations team, this requirement has completely exceeded the standard.

Sun Hongming took the map, and finally took Qin Yuan and the others to various mine placement sites, and took 360-degree shots without blind spots.

"Captain Qin, it won't affect anything if I shoot like this. I just want to make an educational video for everyone. This is a very valuable material for the people below to learn from."

"No problem, since you guys want to shoot, then my movements will be a little slower, otherwise it will be too fast, and you can't see clearly."

Now some people in the crowd think that Qin Yuan is definitely bragging, can the camera make up for it? This is too exaggerated, even if his grades are really good, but these words are a bit too much, and the cowhide is blown to the sky.

But in the next second the person who discussed it was speechless, because he was watching it with his own eyes and didn't know what was going on. Qin Yuan's knife went in, and the next second he said that the mine had been dismantled.

"Okay, this one has no security risks, the next one."

Sun Hongming stayed where he was. He turned his head and saw the cameramen next to him staring at each other. To be honest, he really didn't see clearly, so he could only click to play back.

When it slowed down to 15 times, he finally saw his movements clearly. After his knife went in, he found the position accurately and directly carried out the demolition.

"Captain Qin, can you slow down a little bit, or else it will affect the viewing effect."

"Yes, yes, I didn't think carefully just now, so you can take the picture again this time, and use the one here as a demonstration."

Qin Yuan had deliberately slowed down the speed, but the demolition process was still very fast. There was no other way. Sun Hongming could only adjust the frequency as much as possible, and slow it down later, so that everyone could watch it.

He did a few demonstrations in the front, mainly because he only did the initial demining, and left the rest to the rest of the team.

He also had to give these team members a chance to perform. After more than an hour of demolition work, all the mines were finally cleared.

There were no safety hazards during the whole process. This exercise was very successful, and they also prepared all the data here.

After everything was clarified, Qin Yuan still did a demonstration. He wanted everyone to see how powerful the lightning jump he just mentioned was.

This can be regarded as a warning to everyone. asked them to observe carefully before clearing mines to see what it is like. He used the mine jumping just now as a demonstration, but this is a kind of A new form, mainly detonated below.

Sun Hongming felt that the discharge time was too long. They placed the landmine carefully before, and it took about half an hour for that small area.

There are quite a lot of people on Qin Yuan's side, everyone quickly dug holes, and within a few minutes, they were all placed.

Sun Hongming gave a thumbs up in admiration, "Captain Qin, the team members on your side are really awesome, the speed is really too fast, I admire you."

"It's nothing, let everyone back up now, and then back as far as possible."

Sun Hongming nodded, picked up the walkie-talkie and asked everyone to move away, and then he was about to send out a robot to start the field. This robot was specially used for experiments. Unexpectedly, Qin Yuan reached out to stop him. There is no need to waste this.

Chapter 1778: swamp drill

Sun Hongming said that this problem is a necessary loss for their usual training, and it will be enough to report it when the time comes.

"Director Sun, I just don't think it's necessary to waste this thing. Keep it for your own use when the time comes. I'll do the experiment."

He was surprised when he heard this. This is too dangerous. It is impossible for people to walk over it. It's fine if the machine blows up, but if something goes wrong with people, no one can afford it. The responsibility is too great.

Qin Yuan smiled and said nothing, telling everyone to get ready, and then he threw his throwing knife directly, hitting the landmine just now with precision.

The speed was so fast that everyone didn't see how it happened. They only saw the flying knives go out. No one knew how they touched it. Then they heard a booming sound. Very quickly, the entire area was detonated in an instant.

The place where the landmine was laid just now has fallen into a big pit, and several big trees around have been affected and fell down one after another. One can imagine the power of the explosion.

And it's not just this side. After confirming that the safety is correct, everyone walked forward. At this time, the soldiers walking in front suddenly lost their feet and almost fell. This can be said to be within a range of 500 meters, and all of them were affected. .

"The power of this explosion is too strong. If it is a person, it is impossible to imagine it."

After all, the surrounding trees and sides are full of broken shrapnel, which all exploded from the mine, and the steel ***** inside are also very damaging.

The captain of the Blade Squad was also secretly relieved when he saw it. Fortunately, he had made a decision before and did not act rashly, otherwise he would not be able to bear the responsibility if something went wrong.

"Director Sun, I'm really curious, where did you get these grenades?"

Sun Hongming was a little proud, he said that these things can be bought at any time, as long as you enter the military field, you can find everything.

"That shouldn't be cheap, right?"

Speaking of this, he smiled awkwardly, "It's really not cheap, just a few boxes of landmines, and their price is 800,000 US dollars."

After all, this is the latest one, and Mi Jun has their allocation rights, so the asking price must be relatively high. After listening to it, I feel that all financial expenditures are estimated to be on these, but they have to study it. After all, if they don't study it , then you can only suffer.

If they encounter this kind of problem in the future, there will be no solution. If they can develop such a powerful landmine, then other things must be researched.

Director Sun had no choice, he said that the money had to be spent, "Besides, we had some disputes with others when we bought these boxes of landmines. Country C also wanted them, but we booked them in advance. ."

Qin Yuan nodded, expressing that he understands that this will never happen again in the future, he will study everything by himself, and the money should be used wisely, thinking about those soldiers on the frontier and other heroes who went to the front line .

It is most suitable for them to use this amount of money to subsidize them. Although they also have it, if they enter the research by themselves, they can save a lot of money.

Today's exercise was very successful. Director Sun expressed his thanks again and again, and said that he would continue to arrange the remaining locations of the exercise after returning. He can arrange it in a maximum of two days so that everyone can get ready.

"Actually, it can be done directly tomorrow."

Director Sun was a little embarrassed, "I wanted to let everyone take a rest first, after all, we have carried out such a charge today, so..."

"That's unnecessary. It's nothing. The daily training of our special forces team is much more intensive than this, so we should finish it as soon as possible. I don't want to miss our training."

This time, Sun Hongming finally told the truth. He said that his side hadn't done layout research. After all, there were still many things that he hadn't finished. This time they had to face the terrain in the swamp area.

In the swamp area, what they need to experience this time is the equipment newly developed by the research institute. They need to wear this equipment and perform various task indicators in the swamp. They need to measure the current situation.

Qin Yuan still asked for a few landmines and started to go back to do research, mainly to demonstrate to the team members below, so that they can understand more clearly.

Because the terrain on the other side of the swamp was still being arranged, they waited for another three days and finally got a call from Sun Hongming.

This time they were in an area near the border, where there was a large primitive jungle, and there was a swamp in the center of the jungle.

This is very primitive, they haven't undergone any processing, and they don't even have a map. This also caused great difficulties for Sun Hongming and the others. They originally wanted to install surveillance equipment, but it seems that there is no way.

None of their internal personnel can enter it. It is really dangerous. There are many wild animals besides the swamp.

When Qin Yuan and the others came to the vicinity of the swamp, they had already set up a tent outside Yuanyuan. Sun Hongming's left hand was swollen and tall, and he was still holding half a cigarette.

His eyes were red, and it looked like he had stayed up late yesterday. When he saw Qin Yuan coming, he quickly put down the cigarette and greeted him warmly.

"Captain Qin, you guys are really timely. You come early every time. It's a bit embarrassing. We're in too much of a hurry here, and we haven't prepared anything yet."

Qin Yuan reached out his hand to greet him, and then stepped forward to stamp out the cigarette butt, "No matter what, you still have to pay attention to fire prevention, after all, this is a primitive jungle."

Sun Hongming smiled awkwardly. He said that he was too tired and simply forgot about this matter. Only then did Qin Yuan notice his left hand.

"Director Sun, what did you do?"

Before he could answer, the secretary next to him sent two more documents, mainly to analyze the surrounding terrain. It was seen that the secretary's condition was worse than that of Director Sun. The secretary's head was already swollen, especially its eyes.

Seeing them in such a mess, Qin Yuan was also a little curious about what he had experienced. Only then did Sun Hongming explain that it was really hard to live in this primeval jungle, after all, there were too many mosquitoes in it.

"Captain Qin, you don't know how powerful this mosquito is. It's itchy and painful after a bite, and it swells up immediately. No medicine will help."

Sun Hongming was very helpless. Speaking of this, he took out mosquito repellent water and sprayed it on the side, but it didn't seem to work, and it was still daytime. He said that he didn't even dare to turn on the lights at night. If he turned on the lights, let alone mosquitoes, Many moths and insects are flying towards this side, which really makes them miserable.

Seeing them in such distress, Qin Yuan couldn't bear it, and told them that if they had to do something, there was a solution, "After all, we have been active in this kind of rainforest for a long time, and I also took them for special training before. I have an effective method."

"Ah? If so, that would be really great. I'm still thinking about how to sleep tonight. After all, we want to conduct two batches of training this time. One is for the daytime and the other is for testing at night. of."

Qin Yuan said to himself, he asked Yang Haokang to take out the special medicinal herb they had prepared before, and burn it around first.

The soldiers who were still busy all stopped one after another. Everyone felt a little curious, does this herb really work? They have advanced mosquito repellent water in their hands.

When the smoke slowly burned up, a faint fragrance could be smelled around, which smelled very pleasant. Within a few minutes, the smoke spread throughout the camp, but soon the surrounding mosquitoes had disappeared.

Sun Hongming was very excited. What kind of miraculous thing is this? He stepped forward and grabbed a handful. There were several kinds of herbs mixed in it, but he couldn't recognize it.

"You don't know these things. This is a special medicinal herb made by our captain. It is specially used for playing. The effect is particularly good. We will use this medicinal herb to take a bath before every action. After washing, basically mosquitoes will not come close."

This thing is indeed too useful, and at this time Qin Yuan entered the depths of the jungle again, and after a while, he was holding a large bag of green things in his hand.

Sun Hongming was a little curious, stepped forward and pointed and asked, "Captain Qin, what are you doing? Isn't it enough to have herbs?"

"Herbs do work, but these things are used to smoke the surroundings to keep mosquitoes away, but you have already been bitten on your body, this thing must be dealt with as soon as possible, otherwise it will only swell and get worse."

Generally, there are such poisonous mosquitoes in this place, so there must be something to restrain them around. This is the experience of surviving in the wild.

As Qin Yuan said, he started pounding on the big rock next to him, and the green plants in his hands also began to ooze juice.

Just when Sun Hongming felt that it was ready, he suddenly grabbed a handful of soil from the side and sprinkled it on, so that it was officially completed. Seeing the green juice covered with soil again felt a little too disgusting.

However, Qin Yuan said that the effect was particularly good, but they had to try it first. Sun Hongming stepped forward and smelled the herb, it was too pungent.

He could only give it a try first, he just felt a refreshing feeling when he applied it on his hands.

Before, his entire left hand felt like it was about to be broken, and it was always accompanied by needle-like pain. Now the pain has gradually disappeared, and after a few minutes, the hand he was standing at has completely disappeared.

"It's really amazing. We didn't expect to lose such a good medicine before. It's really different."

"This is our true wisdom. As for those western medicines, they are nothing at all, and if you spray toilet water in the jungle, the smell of toilet water is very pungent, and it is easy for the enemy to find out."

As for smoking this kind of herbal medicine, it will soon be fused in the air, able to restrain mosquitoes, and will not be found for a short time, but this toilet water mouth is different, it lasts for a very long time.

"This thing is also suitable for you, and people who usually have some adventures can also use it."

Sun Hongming was a little embarrassed by what was said, so he had to quickly divert his attention. He took Qin Yuan to the nearby tent and pointed to the equipment on the ground.

"It's all these things that we need to experiment this time. You wear such equipment first, and we need to see how the gravity is. This is specially designed for walking on the ground, and it can enhance some auxiliary functions."

After Qin Yuan and the others entered the swamp, they needed to complete a total of six levels. The first was to complete the basic shooting in the swamp, and then carry out a complete walk through the interior.

In fact, to put it bluntly, Conglin's major elements are basically all taken up, just to see the applicability of this suit and equipment.

From the appearance, this clothes is a normal camouflage color, but its material is different, the upper body is nothing special, but there is an extra pocket on the left side, especially the shoes are different, the shoes are waterproof rubber shoes .

Sun Hongming introduced that this is the latest product developed by their laboratory.

"If you are unfortunately trapped in the swamp, this is the only chance for the jacket to save you. The left pocket of the jacket can launch a rope. As long as it can hook nearby plants, will have a chance ."

"Then what's special about these shoes? It looks like ordinary rain boots."

"This rain boot is also uniquely designed. It is harder than what we usually wear, but its plane is more complete, so that it can support enough to walk on the ground alone and have a certain degree of buoyancy."

After Li Tianbo heard it, he felt that this thing was too exaggerated. The shoes can also be buoyant, and is it really possible in the swamp?

He stepped forward to touch it, and the shoes almost fell to the ground by accident. These shoes are too heavy!

"No, are you sure this thing won't sink in? It's so heavy now, let alone us wearing it."

"This is an anti-gravity design. When the gravity reaches a balance, it will form a force, and it can float under the relative force."

Li Tianbo listened with a half-knowledge. He didn't know what the situation was, but he was curious about it.

In addition to this, the equipment they need to wear at night is a brand new night vision equipment, and it can also prevent interference. This time it can be said that the test is mainly technological.

Qin Yuan understood at this moment, then this time it will depend entirely on their equipment, he let the blade team stay first, and he led the wild wolf commando team to enter the daytime experiment first.

The blade team was in charge of the evening training, and soon everyone put on the equipment, and everything else was fine, but the shoes were a bit heavy, which made everyone somewhat uncomfortable.

But they adjusted it soon. After all, the special forces will also have increased loads in their daily training. This is a small problem for them. Qin Yuan is also using these shoes in the later stage. You can try it out then. He put himself at risk.

Chapter 1779: Availability of equipment

He wants to see if he can really float up after entering the swamp area, after all, the more it sinks, the faster it sinks.

"Director Sun, I'm a little curious, have you guys tried this before?"

"In reality, we haven't tested it specifically, but we have specially set up in the laboratory to imitate materials like swamps, and we have tested it without any problems."

In this case, it shouldn't be a big problem, so Qin Yuan set off with the wolf commando team. The road ahead was fine, after all, it was just an ordinary jungle area, but they needed to walk for an hour before reaching the swamp area. , to conduct experiments in swampy areas.

The jungle vegetation here is very dense, because the climate here is relatively humid and it is a wetland. The plants get sufficient water and grow densely together, completely blocking the sun.

The front is basically a state of no road at all. After all, this belongs to the original jungle series. Qin Yuan used a machete to open the way in front. After more than ten minutes of hacking, Li Tianbo behind him couldn't help but eager to try.

"Are you sure you want to try it, kid? It's only been ten minutes since the beginning, so don't think it's easy."

Li Tianbo said he didn't say anything, but he felt that this thing was nothing, after all, it was just opening the way ahead, and he couldn't help seeing how easy Qin Yuan was chopping.

The wild wolf commando team has not received any salary blessings, so it is quite difficult for them. Qin Yuan also wants to see how these guys are physically fit. Now he just let go and handed over the machete to Li Tianbo .

At this moment, the intercom informed them, hoping that they would speed up a little, after all, they wanted to test the usability of this equipment.

After all, according to their tests, this equipment can reduce the burden. For example, they are all in a weight-bearing state now, but this special equipment can reduce the burden after adjustment and make them feel less tired. They want to see What's it like to be faster.

Some people in the team couldn't help complaining. Their speed can be said to be very fast. After all, there is not even a normal road here. Although Qin Yuan used a machete to open the way in front, he just cut the thorns in front of him.

There are also those branches blocking the way, all kinds of plants, all the way past are sticky lakes and lakes, and everyone can hear the voices of the people in front of them.

"This is really exaggerated. They don't treat us as human beings at all. They need to speed up. If they drive the road as fast as they want, I can do it."

"Don't say a few words, you kid. You didn't see that even the Qin team can only go up to this speed when they open the way, let alone when we go up."

"Although I haven't done this before, I don't think it's a problem. Forget it, follow the command. Isn't it just to speed up? I can do it too."

Several people complained quietly. Qin Yuan in front didn't respond, but handed the knife to Li Tianbo, asking him to speed up according to this time.

The moment Li Tianbo took the cut, he felt something was wrong. After all, Qin Yuan was so relaxed just now, but this knife is not that simple.

Seeing that his expression was different, Qin Yuan smiled and said, "Do you know why my knife is so fast? It is made of pure iron. If I remember correctly, it seems to weigh about two kilograms."

Although these two kilograms don't sound particularly heavy, you must know that swinging a knife with one hand is really a test of arm strength, and when you cut down, you have to lose your own gravity.

The moment Li Tianbo received the knife, he actually regretted it a bit. It was too costly, and they would have to pass through the swamp later, so it wasn't their other agility that was tested in this area.

What is tested is their endurance and physical fitness. There are difficult places to walk everywhere, which consumes too much physical energy for them.

But what he said just now, he could only bite the bullet and take it. In this way, he took the knife and started to open the way in front. It was okay at first, but gradually he fell behind, because it was too difficult. Just swinging the knife, he has now used both hands.

The equipment on his body seemed useless, Qin Yuan also reported the situation here immediately, and they also recorded the equipment situation on the other side in time.

Each of them is equipped with a real-time monitor, which mainly records their breathing and heartbeat. Judging from the data from the beginning to the present, it seems that it is really useless.

Frowning, the small man sitting next to him is the developer of this batch of equipment. He really can't figure out where the problem lies. Backpack, why is it useless to use it here?

At the same time, Qin Yuan also took out the walkie-talkie, and responded to another question with them, "At present, not only does it not reduce the burden, but it will also increase the risk of exposure for us."

"Oh? What does this say? Why does it increase exposure?"

"This backpack can move up and down. I guess he was inspired by those backpackers abroad, so he developed this kind of backpack. The up and down movement of this backpack can indeed reduce the burden on people to a certain extent, but it is not suitable for us soldiers."

In other words, they used drones to take pictures, and indeed found that although Qin Yuan and the others were already maintaining a stable figure, the backpack on their backs was moving up and down. It used the impact of the movement to counter the gravity of the backpack. .

In this way, it can reduce the burden a little, but it seems that it is really not suitable according to this situation, and it is very easy to be exposed in the jungle.

The developer next to him was a little unhappy. He felt that Qin Yuan didn't say a word about the advantages, and all came to complain about the shortcomings of his backpack, which was a little too unhuman.

"Sometimes the user is also very important. I don't agree with his point of view. After he comes down, I will explain it to him. You can't be a bad person. Let's say it's a matter of things."

Sun Hongming quickly pressed the intercom, always worried that Qin Yuan on the opposite side would hear, this guy is really outspoken, what is he? He belongs to the Special Forces, and he is the captain of the Special Forces, so he has never seen anything.

"You should pay attention to yourself. When he was developing new weapons, he didn't know where you were, and even the special operations team couldn't handle things. You think that other people can handle things. This is indeed true."

The two guards who followed were also from the base unit, and Sun Hongming didn't care too much, so he called them over to ask what was going on. After all, this is the special forces team, and the opinions of the soldiers of the base unit are also very important. .

"The two of you came over to check on the situation. According to the pictures on the monitor, what do you want to say?"

The two guards stared at each other, isn't this a joke? People's special forces didn't dare to say anything in front. They threw me out to talk.

Sun Hongming was originally in the research and development office, and he just wanted to determine whether this thing is useful and what its actual effect is, so that it is beneficial to their development.

"Just tell your feelings about the specific situation. You don't have to worry about it so much. Don't worry, no one will embarrass you."

The two thought about it, and the guard on the left still spoke. After all, it was good for them to tell the truth. This thing will be developed and used on everyone in the future.

"Although I am not in the special operations force, I have been in the company before. This situation will indeed expose the target. If there are snipers in the distance, this kind of movement is easy to detect."

The developer next to him was named Liu Yongtao, and he stood up immediately when he heard this, "I am a Ph.D. who returned from overseas. After so many years of research and development, I was rejected by you. Have you really tried it? What qualifications do you have to say such a thing?"

Listening to his aggressive attitude over there, Sun Hongming couldn't stand it. Originally, this research and development was agreed upon by everyone, and we had to see its applicability first, otherwise some messy things would be developed.

Not only will it deplete the country's funds, but it will also push soldiers into the abyss, as if this thing is completely useless.

"Can you calm down, don't always use your identity to oppress others, I can say that anyone sitting here has a higher degree of education than you, and even more experience than you, but no one said such a thing."

Several other people also silently stared at the computer screen without speaking. Everyone knew in their hearts whether this thing was useful or not. The truth was in the eyes of snipers, and this was a moving target.

This is just the suitability of the backpack, and the clothes have not been tested, these things will have to wait until later.

But at the moment on the team's side, Li Tianbo led the team to chop in front for more than half an hour, his arms were completely sore, this really reached the limit of his physical fitness, it was too exhausting.

Qin Yuan didn't step forward to help, but just asked a team member to replace him. At the beginning, Li Tianbo was relatively strong, and he didn't choose to ask others to help.

Later, Qin Yuan reminded him that as the captain of the team, first of all, he relied on his mind, and he had to quickly analyze the current situation instead of blindly trying to be brave.

As for physical fitness, it needs to be shared. If the captain falls down, it will be difficult for others to make the right decision.

This is the role of the captain. The team members need to share the burden. In this way, he still handed over the machete in his hand. The moment he handed it over, his hand couldn't help shaking. It's so easy, it's really not the case in my own hands.

The last part of the road is about ten minutes away. The team member in their team is a machine gunner, and he is in a very strong state.

Under such circumstances, he was panting as he walked, and finally opened a road, and just like that, they came to the swamp area.

Qin Yuan asked everyone to adjust and rest on the spot for two minutes. The team members took out water to replenish after hearing this, and after a little adjustment, everyone continued to set off.

What caught their eyes now was a vast swamp, especially now that the climate had entered autumn, and the withered grass next to it was too close to the swamp, and the whole person might collapse if they didn't pay attention.

Qin Yuan walked up first. Normally, he could use his ability to go quickly, but this time he needs to use these equipment.

When I helped him wear those shoes and stepped on the swamp, it really relieved a lot, and the whole shoe showed a bearing force, allowing his feet to be pulled out easily.

Even if it is a soft swamp when he steps on it, it doesn't seem to have much impact. It can reduce the buffer and let him pull his foot out quickly.

There is indeed no problem with this research and development. Qin Yuan also broadcast the situation here in time in the intercom, and the team members behind quickly followed up.

"It's a really good shoe, we haven't had any bogs so far, it's very buoyant."

Liu Yongtao was very happy to hear this, and couldn't help showing a smug smile on his face, "See, I said this thing is useful. I have worked hard for five years to create it. How could there be a big one?" question?"

This guy is really not boastful, just said a few words, his tail is going up to the sky, Sun Hongming didn't bother to argue with him.

After all, this is just the beginning, so everyone walked through the swamp easily, this thing is really good.

Next, Qin Yuan will test it himself. The clothes are all wrapped, which is the only way for him to save himself when he accidentally falls into the swamp.

He waved his hand, and the drone above quickly landed to take a close-up shot of him, mainly focusing on his operation.

Qin Yuan didn't hesitate, and jumped directly into the opposite swamp. At the beginning, because of his shoes, he was still in a state of not sinking, and the speed of sinking was relatively slow.

Since he was surrounded by ground and lacked a complete support point, his falling speed became faster and faster, and soon his legs were completely in the swamp.

When he was about to reach his thigh, Qin Yuan felt that the timing was almost right. He turned his head to find a more suitable throwing point, and there was a big tree opposite.

He pressed the button on the chest pocket, and soon a very slender steel cable flew out, quickly inserted into the tree trunk, and tied a knot after it circled around.

Qin Yuan tried to pull it. The strength is quite strong, and it will not be broken at present, so it is relatively good.

He pulled the steel cable and started walking towards the outside, and walked out quickly. Liu Yongtao stood up immediately after seeing it, applauding and cheering non-stop. The people next to him were embarrassed. Is this necessary for this group?

Before he could be happy, Qin Yuan raised his hands. The steel cable was probably designed to be very slender for the convenience of carrying.

In addition, the steel material is relatively sharp. If you want to get out of the swamp, you must use all your strength, and it is really easy to get injured.

Chapter 1780: impractical equipment

Qin Yuan didn't use his recovery ability this time either, because he wanted to truly show these things, and these things would be used on every soldier in the future.

In the monitor, it can be seen very clearly that Qingyuan's hands are covered with bloodstains, and in some places the wounds are very deep and dense, because this steel cable is not a joke.

He also gave his own answer in the walkie-talkie, "This thing does have a first aid effect, but it is too sharp and will scratch your hands. I don't think it is hypocritical. If it is in such a humid area, if there is no medicine, soldiers would be susceptible to tetanus infection because of this type of wound."

As soon as he uttered his words, Sun Hongming agreed and began to record them in his notebook. These were all the real situations, and he had to record them.

After Liu Yongtao saw it, he was very unconvinced. He stood up and grabbed the notebook, telling him not to write carelessly.

"Enough, don't write these things nonsense. You know that the so-called experts like you are behind everything. They only know to bring these soldiers to train and go through the process completely, but we need to deny our hard work."

The people around looked at Liu Yongtao strangely, this guy must be too excited, and what he did was not good, so why can't people say it?

Sun Hongming didn't get used to him, and asked the secretary next to him to record the situation, after all, they were responsible for these things.

Liu Yongtao was a little manic, at this moment he couldn't accept his failure, he felt that Qin Yuan was making a fuss out of a molehill.

"As a special operations soldier, he should know how to prevent this kind of thin steel cable. At least he should wear a special combat glove. I have already prepared these things, so he doesn't have to blame me."

Now Liu Yongtao feels that everyone is blaming him. They all look down on the things he has developed. After all, it took him five years to develop these things. All things are hard-won. How can they rely on their few words? Just overthrow it completely?

This made him really unacceptable, and he was very angry when he thought of this. At this time, Qin Yuan in the walkie-talkie also said that they had completed the other tests, and now they can come back. The next thing is the evening training.

And the sound of their quarreling in the tent just now was completely heard by Qin Yuan, but he only revealed his situation after the two of them had finished their quarrel.

Sun Hongming felt a little embarrassed. He forgot to turn off the switch just now, so he could only step forward and push Liu Yongtao away.

"I don't want to chat with you lunatic about these nonsense things here. Shut up now and don't make any jokes. He is from the Special Operations Brigade, and he is a celebrity in all military regions. Don't offend him."

"Hehe, it's really funny. You don't dare to offend him, so you just blame me for all these things, don't you? Then why? If that's the case, I'm not convinced."

The guy talked more and more vigorously, and almost overturned the table. The two secretaries next to him rushed up and followed his advice to stop making trouble. Sun Hongming gave him a look, and several people from the side also came up, and quickly dragged him down.

Li Tianbo was a little unhappy in the back, "Captain Qin, this guy is too rampant, listen to what he said, he is directly belittling us."

"The mouth grows on other people. What they want to say is their business. I can't control it. Just do our own thing. Remember, we are only responsible for testing this batch of products."

"But you are too generous. Listen to that guy's harsh words. They are all on us from beginning to end. I can't stand it anymore."

"Then go back and have a look later, I have to listen to what that guy has to say, and I will explain to him one by one."

Sun Hongming here was a little helpless. After all, this was really making a joke for others. After a while, Qin Yuan and the others also came out. Everyone was very embarrassed. Sun Hongming had already arranged for people to cook dinner at the camp.

"Captain Qin, you have worked really hard. I know that this primitive jungle is very difficult to walk. We have already prepared dinner. You can take a rest and eat right away."

"It's nothing, we just cooperate with the cause, and everyone is performing their duties."

Sun Hongming also specially called the doctor in the team and asked him to help check the injury on Qin Yuan's hand.

"Captain Qin, I'm really sorry that I hurt you this time."

"That's nothing. By the way, I heard someone on the walkie-talkie questioning us just now. He is the developer of this batch of equipment, right?"

Sun Hongming thought that this matter should be bypassed, but Qin Yuan directly brought it up, which made him a little embarrassed. Just when he didn't know how to proceed, Liu Yongtao appeared from the side.

Liu Yongtao is indeed very angry, because now the things about his designs have been completely rejected, and the following ones are designed by others.

"I really don't understand how you arrange this, do you know? Just because of your few words, I completely ruined my five years of hard work."

Qin Yuan looked at him calmly while wrapping the gauze around himself, "You have spent five years of hard work, but have you ever thought that if these things are not up to standard and used on soldiers, causing a young soldier to lose his life, What do you think?"

"This! Don't be alarmist here, this is absolutely impossible."

"Nothing is impossible, you have to know that it is deadly in the jungle, and I heard you just now, you want us to wear special gloves, you can look at the special gloves you made, in my eyes it is Rubbish."

After saying this, Liu Yongtao became completely angry. He could talk about the shortcomings of his own things, but he didn't need to belittle them like that. But Qin Yuan was not used to it. He waved his hand, and Li Tianbo came up.

"Take out our special combat gloves and his things for comparison."

Li Tianbo nodded, he had long been displeased with this guy, he just heard it so rampant on the walkie-talkie, he should clean it up.

I started to draw the knife and pulled it up. As the knife slashed, the gloves developed by Liu Yongtao were not protective at all. They were just a little camouflage design, which looked cool, and there was a little armor on the outside. .

But the next second is Qin Yuan's tactical glove. Li Tianbo scratched this glove twice, and he did it with all his strength, and the material inside was completely different. Even if he scratched it, he wouldn't do it. It completely collapsed, only a small opening appeared.

"See, our things are definitely not comparable to these rubbish."

Liu Yongtao was very angry. He squatted down and couldn't believe it. Looking at the glove, it was impossible. This is because he borrowed foreign experience. How could this happen?

"Don't read any more, I know what you're thinking. The experience you borrowed from abroad is just most of the outdoor climbers, because you can't find foreign military information. You need to know military and amateur are different."

In addition to this, Qin Yuan took off his equipment and threw it in front of him, "If you are sure that there is no problem, you can test it yourself, as long as you can survive and your hands are not scratched, I will personally apologize to you. "

Liu Yongtao didn't want to do it at first, but he immediately became energetic when he heard the word apology. He believed in his own things very much. He had also tested in the laboratory before, and this kind of problem would not occur.

So he made a decision right away, and he put on the equipment without hesitation. Sun Hongming, who was next to him, was a little embarrassed when he saw that this matter had become a big deal, so he stepped forward to persuade him to fight, but no one on both sides listened to him.

"Director Sun, you don't need to talk about this. If he is not the same today, he will not give up. He will even sue them all secretly, and then say that we have teamed up to bully him."

Sun Hongming originally wanted to say something, but he shut up decisively when he heard this sentence, because he knew that Liu Yongtao would definitely do this, and he kept threatening just now, such a person is really despicable.

Liu Yongtao felt that he couldn't get off the stage. He felt that there was something he couldn't wear, so he started experimenting directly, but Qin Yuan couldn't help laughing when he saw his posture.

"Tian Bo, hurry up and give us a big graduate student a good demonstration of what is the correct posture."

The people around laughed, which made him feel even more humiliated, because Liu Yongtao typed directly and parallelly, but you must know that this is not the case in real life.

"Then if you want to experiment, you must do it in a normal business, you can't follow the method in the textbook, right? What's the point of this?"

Under Li Tianbo's guidance, he squatted down, and then pointed the transmitter at the big tree in front of him. In this way, his position was slightly lower and higher.

After confirming that it was possible, he lay down on the ground and tried his best to pull it up, but he was still authentic, but the moment his hand touched the steel cable, he was strangled so painfully that he finally let go.

His hand touched it for a short time, and the sharp steel wire was drawn to blood. This time, he didn't understand what was going on until he knew the pain.

"Look what you are still doing in a daze. Hurry up and bandage our research professor, or the wound will heal later."

Everyone burst into laughter again, this time Liu Yongtao completely lowered his head, he knew that his research was indeed wrong, so he followed what Qin Yuan said, if something went wrong, wouldn't it kill other soldiers?

But this is just a small episode, and Qin Yuan just went to the end. He said that Liu Yongtao can wait. He will go to the research institute after a while. If he goes there, he will mainly focus on tactical equipment and some weapons. conduct research and development.

"If you are interested in the future, you can come and listen to my lectures, including some practical operations I did."

Sun Hongming must be very interested in this. He has heard of it before, but he has never had the opportunity to go, which is rare.

Moreover, Qin Yuan made the research so simple, as if he was going to play wherever he wanted, and he could go wherever he wanted, which is really admirable.

Li Tianbo and the others felt very happy. You must know that everyone couldn't understand what that guy said just now. He was too arrogant, and now he has been properly punished.

A few people ate at the campsite in the evening, and they set off after it was completely dark. Thanks to the medicine brought by Qin Yuan and the others tonight, otherwise the entire campsite would be surrounded by mosquitoes again.

This time they said they used the equipment, which was a brand new night vision equipment, and installed this night market equipment on the gun, so that it could be positioned and scanned accurately at any time in the future.

Qin Yuan aimed at the target outside as soon as he got the equipment, which is really good. He will give certain data immediately, such as the current temperature, wind speed, and everything will be displayed on their goggles .

The shooting of them, as well as their environment, is very suggestive.

And the whole set of equipment is not very heavy. If you wear it on your body, it is easier to take it off if you want to take it off. There is no big problem.

Before leaving, he praised this equipment, so he turned his head and asked, "Director Sun, who developed this It's really good."

"This is jointly developed by the entire research team of our 604 Research Institute. You are the first batch of troops to use it, so let you feel it first. Your feelings are very important."

"Hahaha, don't worry, I will definitely test it out later, by the way, do you want to get some wild game for you?"

"Huh? Can this thing be fixed?"

"Otherwise, how can we experiment? After all, we have to shoot, and there is no target inside, so we can't aim at the trees. Don't worry, I will make a supper for you tonight."

After finishing speaking, Qin Yuan set off with the Blade Team. This time, he did not take the road during the day at night. After all, he had to take everyone on the same road again. Every team had a chance to experiment, and it was still him who opened the way ahead. After walking for a while, he handed the knife to Yang Haokang behind him.

The swamp at night is also very dangerous. After all, there are alligators in this place. Qin Yuan just wanted to remind the team members behind.

He saw a snake falling from the tree on the left. He raised the knife and dropped it so fast that even the team members didn't react, and felt blood dripping on his face.

He raised his head slowly, and saw a dead snake falling down, and was instantly frightened.

Several people in the team laughed loudly, "Headlamp, I said you are really a cowardly dead snake, what about it? Fortunately, our captain shot quickly, otherwise you wouldn't be able to jump up now if you bite down!" ."

Da Deng disgusted the dead snake and was about to throw it out, Qin Yuan quickly stopped him, "Wait a minute, you kid is really reckless, you know it's delicious, when the time comes, let's make another pheasant and stew it together, It tastes good."
