

## Special Soldier 1811

Chapter 1811: Reaction beyond ordinary people!

This migrant worker is also in his 40s. He has relatively many experiences, but when he talked about this issue, his body was shaking. It seems that he really experienced a very terrible scene. roundabout

The migrant worker took a deep breath, he repeatedly adjusted his emotions, and made sure that other people around him were not looking in his direction.

"Then you continue to talk about what happened next? Those corpses seem to be alive according to your meaning?"

Qin Yuan also followed his will. To be honest, he was a little curious now. The migrant worker took a puff of the cigarette in his hand, and then nodded vigorously.

He was sure that when he was alive, not many people dared to raise their heads. Everyone heard gunshots, but he was different. His country had experienced wars before, and he was very familiar with gunshots. It was impossible to fight from that direction. come over.

He clearly saw that the two corpses on the stretcher were struggling violently. When the leg of one corpse fell off, he found something different, it seemed to be a prosthetic limb.

Qin Yuan repeatedly asked about the details, especially the prosthetic limb. He felt that if experiments were to be done, there was no need to use these disabled people for experiments. Could there be any hidden secrets in this?

The migrant worker was very afraid that he could only describe the situation in this way, and he said that since that incident, the other experimental entrance of the fortress has been completely closed. Before that, they sent supplies from there, basically some life supplies. roundabout

It's just that after these things are delivered, they will be taken away immediately, and they won't be allowed to stay here too much.

So even if he went to deliver things before, he never saw what was inside. He just felt that it was very tall, and all the people inside were wearing masks, so he couldn't see what it was at all.

In addition to this one thing, another thing happened, that is, when the first shooting happened, everyone in that mine was called out to talk and asked if they had seen What.

These migrant workers were just ordinary people, and in that situation, they could only say what they saw before. Except for the person in front of him, he still knew what it meant.

So he concealed a lot of things, and said that he didn't see anything in the innermost place at that time, but it didn't take long for all of them to be called together.

It was obvious that the people in this team didn't believe them, and felt that in order to eliminate all potential safety hazards, all of them should be removed, which is why today's situation happened.

These migrant workers have been called to work in this place for so long, and they have never contacted the outside world, and it seems that the envelopes they sent have been intercepted.  
roundabout

There is no privacy at all, even where they live is monitored. On the surface, it is to ensure everyone's safety, but in fact it is more like a kind of surveillance.

In addition to these, the salary is relatively high. They will transfer money to everyone's card at least every month. This is a point that makes everyone more gratified. Now that they are suddenly told that they can go back, most of them are very happy of.

Only this migrant worker knew exactly what happened. He held his head in pain, "I know that everyone will not live long. These people's methods are very cruel."

The migrant worker started to cry when he said this. He knew that he would not come to this place. At that time, he also thought that he was recruited by the army. not going.

Qin Yuan patted him on the shoulder, and roughly understood the situation, "The news you provided is very good, don't worry, I will definitely rescue you all."

The migrant worker raised his head. What he said just now was actually because he wanted to tell the story, and because of his trust in Qin Yuan, but now he doesn't expect this person to rescue everyone.

The guards here are heavily guarded, and there are soldiers escorting them on the periphery. It doesn't look like they are escorting them home, but they want to kill them halfway. roundabout

At this moment, the soldiers next to him began to urge them to

Everyone stood up and started to set off. The road outside was getting farther and farther. In the jungle in front, if they were really killed here, no one would know.

Qin Yuan was also patient and did not act rashly until they entered the jungle in front of him, and he noticed that the speed of the soldiers began to slow down.

Moreover, the soldiers shuttled among the various teams before, as if they were escorting them, to ensure that no one in the entire team would fall behind.

Now these soldiers are slowly moving back, and they are all standing at the back of the team. It looks like they are going to prepare.

The migrant worker himself was quite vigilant just now, and he also noticed this scene, and the fear in his heart was getting higher and higher. When he turned his head to look for Qin Yuan, he realized that this person had disappeared.

At this moment, he heard a sound of fighting from behind, followed by a burst of gunfire. The migrant worker didn't care about anything, and ran forward. He didn't want to die in this place.

He turned his hair while running, and found that there were no soldiers chasing up, but those soldiers were all shooting in one direction, could it be that person just now? roundabout

The migrant worker was a little puzzled, but he didn't dare to stay longer. He speeded up, and at this time Qin Yuan was attacking those soldiers.

Although these people shot, their speed couldn't keep up with Qingyuan. His figure was too fast, and he kept shuttling in the darkness. He could only see a black shadow clearly, but he couldn't lock the target at all.

Because of fear, a soldier shouted loudly: "How many people are there on the other side? I can't see clearly, I can't lock it, we need reinforcements, we need reinforcements now."

As soon as he picked up the walkie-talkie, he felt a pain in his hand, and when he lowered his head, he realized that his hand had been pierced by a knife without knowing when.

This increased his fear even more, the person on the other side was really too strong, inexplicably reminded him of the "things" they transported before!

Thinking of this, he suddenly yelled, and Qin Yuan also noticed the soldier's emotions at this time, and the soldier ran and shouted: "They are not human at all, they are back, they are back!"

When Qin Yuan was wondering, he heard a burst of gunshots passing from the side of him, and in a blink of an eye, he saw that the soldier had fallen into a pool of blood. When the soldier fell, his eyes were wide open, and his eyes were full of with fear. roundabout

The person who shot just now was the soldier's captain Qingyuan frowned, which was even more strange. What did this guy just say? It seems that it should refer to the people that the migrant worker saw and were used for experiments by them.

In this kind of chaos, the captain was able to shoot quickly and directly deal with the shouting soldiers, but at this time the others didn't notice, they thought it was the opponent on the other side who fired.

Qin Yuan quietly hid in the darkness, watched them sitting in a mess, and then quietly untied a smoke bomb. The captain was also relatively calm and calm. There was a scar on his right eye, which made him very fierce. , in which case he often backed away quickly, bypassing the smoke.

But he didn't know that there was a person behind him staring at him all the time. This person was Qin Yuan. The speed of this guy was really fast, at least much faster than the reaction of these ordinary soldiers.

At this moment, the captain suddenly turned his head, his eyes were very cold, he looked in Qin Yuan's direction, and Qin Yuan was even faster, leaving quickly the second he looked over.

After Qin Yuan jumped away, he observed coldly. This man's insight was relatively strong, and his agility far surpassed these soldiers. He quickly let the system detect it.

Ordinary people must not be able to reach this level, and I have a guess in my heart, is it the kind of soldier who has been transformed before? roundabout

However, after a systematic test, the person in front of him did not have a system, Qin Yuan also sighed in his heart, what is going on? Is that really normal human speed?

The main reason is that his reaction ability in all aspects has been far exceeded, which made him feel very strange. He quickly threw two throwing knives to test it out. His knife skills are very fast.

Among them, the speed of the flying knife and the bullet was comparable. However, when the two flying knives were shot out, only one hit the captain's shoulder, and he dodged the other one.

At this time, the captain also realized that something was wrong, and he quickly wanted to escape outside. Qin Yuan didn't care about those ordinary soldiers now. The captain in front of him was the most dangerous, and he was absolutely not allowed to go back.

Those soldiers basically don't have much ability to resist now, most of them have been dealt with by him, and the rest are still messing around in the smoke.

So the current captain is the one he needs to solve the most. The captain is also aware of the danger. He can't see the opponent. It should be no problem with his ability, but the opponent is too strong.

He kept shuttling through the jungle. In the darkness, Qin Yuan narrowed his eyes and stared at the prey in front of him. This guy's speed was too fast, and without lighting, he shuttled very quickly through the entire jungle. roundabout

This aroused his interest even more, what was the origin of the person in front of him, he exploded with his own speed, flashed directly in front of the captain in the next second, and then punched him on the injured shoulder.

The power of his punch was very powerful, the captain flew out on the spot, and a tree trunk on the side was directly interrupted by the middle.

Unexpectedly, after being knocked down, this guy struggled to get up. He staggered and shot quickly. His reaction ability was indeed not like that of ordinary people. Qin Yuan dodged sideways, and then pointed directly at his legs. To attack, first incapacitate him.

Taking this opportunity, Qin Yuan stepped forward and pulled up his trouser leg, only to find that his leg was real, unlike what the migrant worker said.

But when Qin Yuan wanted to check further, he found that the captain in front of him was dead. He felt a little regretful, the strength just now was a bit too strong.

This is a bit strange. The person in front of him is not systematic, but his physical fitness is very strong in all aspects. He squatted down carefully to check. Although this person's legs are not prosthetics, his upper body and right shoulder are completely different.

When he pulled off his jacket, he was instantly stunned by the scene in front of him. The guy's right half was actually made of machines, and those machines were completely integrated with his flesh and blood. roundabout

This looks very shocking, half of it is flesh, the other half is machinery, and more importantly, the machinery is completely embedded in his body, including the position of his right neck, but the neck is still wearing a camouflage scarf.

This camouflage scarf seems to be used for camouflage, no wonder his reaction is so strong, Qin Yuan turned the whole body over, only to see these machines inserted into his spine, completely controlling his body nerve.

The things in this are really getting more and more interesting, so he can't act rashly now. Originally, he planned to train this time. After the selection, he went out to let Anbina expose this matter.

Looking at it like this, it is not suitable to do anything, otherwise it will alarm these guys, so the top priority now is to go back as soon as possible, so that no one else can find out his whereabouts.

After the smoke dissipated, several other soldiers also began to react. At this moment, a few more throwing knives were thrown towards the distance. Before the soldiers had time to react, they fell into a pool of blood.

The rest of the people have all been dealt with. Qin Yuan, wearing a black mask, shook his head seeing a small number of migrant workers who hadn't escaped.

In any case, these people are just ordinary people, and they dare not even move when they are in danger. roundabout

"Okay, don't wait here, it doesn't make any sense, take the money and bring your things, run quickly, go as far as possible in the direction you came from before, this matter has nothing to do with you from now on ."

These migrant workers also knew that things were not that simple, mainly because the people in front of them didn't have the idea to do it, so they speeded up, ran forward.

Seeing those figures getting farther and farther away from here, Qin Yuan also heaved a sigh of relief. He also saved these people. As for the rest, he has to look at it later.

Two hours later, he returned to his tent, and the soldiers guarding outside had nothing to do.

Noticing that they are still vigilant around.

But at this moment, in Yukkin's tent, there was a rush of phone ringing, and after he answered the phone, his eyes instantly became vigilant.

This guy didn't even have time to put on his clothes, so he ran out quickly. The guard at the door was also very curious when he saw it, what he was going to do in the middle of the night.

You Kejin didn't care so much, grabbed a guard and asked, "Qin Yuan didn't make any movement tonight, did he? Did he leave?"

The guard nodded reassuringly, and said that they had been here all night, and Qin Yuan hadn't come out since entering the tent, so he should be sleeping now.

Chapter 1812: still alive?

Yukkin definitely didn't believe it. Although these guards said this, he always felt uneasy. If he didn't guard well and caused any problems, then he really couldn't bear it and walked around.

In addition, he had also seen Qin Yuan's ability before, this person was elusive, thinking of this, he stood at the door and yelled a few more times.

But there was no response until the guard next to him reminded him that it might be useless for him to shout like this in the middle of the night, it would be better to let everyone gather so that he could see clearly.

Yukkin was a little embarrassed when he heard this, mainly because he was too anxious, because a big incident happened at the construction site, so he wanted to come over to confirm in a hurry, but he forgot about it unexpectedly.

"I know in my heart that it was just a test, what do you know!"

The guard still wanted to remind him, but he was scolded for no reason, and he felt very uncomfortable. He felt that this person was making too much fuss. Came here to question.

Yukkin rang the alarm in the camp. This was an emergency assembly. At this time, everyone ran out in the middle of the night.

But his eyes were fixed on Qin Yuan's tent. It wasn't until Qin Yuan came out that he was sure that there was no problem. Moreover, Qin Yuan's state was sleepy. Could it be that he was thinking too much?

Qin Yuan knew that there would be such a result just after he came out. That guy stared at him from the beginning to the end, but he had already dealt with everything, and he couldn't find any evidence.

Youkejin really had no choice but to sigh helplessly. It seemed that Qin Yuan had no problem. It was because they investigated in the wrong direction all along.

This one can only find an excuse to fool around, which is equivalent to an emergency training. The next morning, the captain of the United States rushed to find Yukkin.

"I want to know what happened last night? It's inexplicable."

"Haven't you received the news? Didn't your team come here to monitor the movements of these people, and what are you doing? All the people I sent out are on duty."

The captain of the United States snorted coldly when he heard this, this guy is really courageous, what is his identity? What is your identity? How dare you yell at yourself here.

"Please pay attention to your tone, you don't need to control what I do, and why don't you see that we are patrolling and monitoring, you are not the only one working hard, all of us are working hard for this thing."

Yukkin looked at the other party with a very helpless attitude. These Americans are like this. What can he do? Coupled with the suppression of another identity, he can only swallow his anger and explain properly.

Although he is also the person in charge of the United States, their identities are completely different. He is just a temporary person in charge transferred from above, while the other party is officially from the army.

These people had already heard about the attack on the factory, but at the beginning, all of them suspected Qin Yuan, but now it seems that it is not.

"Our side has already ruled it out, and you don't have to worry about these things. I heard from the factory that the last surviving one has been rescued. Let's see what happens later."

Yukkin was relieved to hear this, since it has nothing to do with him anyway, he has almost completed the supervision on this side.

Now he only has one idea, that is to quickly end the training here, so that he doesn't have to act with these people every day, and if he is worried here, he can change to another way.

At this moment, Qin Yuan had already heard their conversation clearly, and when he said this, his heart skipped a beat. He didn't expect these guys to have a backup.

The main reason is that last night that person was very sure that he would never be able to survive if he made a move. How did he come back to life? Or have these guys discovered what is defrauding them?

Qin Yuan was sitting in the tent, thinking carefully about what happened before, whether he had made any mistakes in everything, except for those migrant workers, he had already dealt with all the soldiers who were chasing him at that time, and he was wearing a mask at that time. may be found.

In addition, after the solution, he also cleaned up the scene, so this kind of leftover situation is unlikely to happen.

It seems that I still have to ask Yu Kejin, he wants to hypnotize this guy directly to see if what he said is true or not, and what happened during that period.

At this time, Yukkin had just come out of Captain America's tent. He was humiliated by those people, and now he was suffocating a fire in his heart. He didn't know where to send it. He just wanted to finish this \*\*\*\* job quickly.

He didn't expect to run into Qin Yuan just after he came out. At this time, Qin Yuan greeted him with a smile, and he always felt a bad feeling in his heart.

This person is like a tiger with a smiling face. He wanted to avoid it, but he ran into it directly. It is not good if it goes on like this. In addition, there are other guards around him watching. No matter what, he is still the person in charge here. , more or less show a little majesty.

"Captain Qin, it seems that you are so leisurely today, didn't you go to rest at noon? You can rest at this time, and hurry up the training in the afternoon."

"This kind of training is simply a child's lesson for me, so I came out for a while when I was a little bored. I didn't expect to meet you."

Qin Yuan talked to him a few words first, and then immediately changed the subject. The two walked towards the side hillside, and the guards behind were muttering.

"Do you think we want to follow? This guy said before that we should follow Qin Yuan every step of the way. Why don't we pretend to patrol over there, and then we'll take a look."

They were very responsible and remembered Yukkin's explanation, but a guard next to him shook his head. This guy was scolded in the morning.

"I think it's better to forget, who is right about this guy, we will be scolded by him when we follow up, and he doesn't look like calling us, if he wants to call, he will definitely give us a signal ."

Having said that, several other people also think it makes sense. If they follow up rashly now, they may not get any good results.

Then what they didn't know was that Yu Kejin didn't want to make gestures, it was too late, he was almost taken away by force, Qin Yuan's aura radiated, he couldn't even move, he could only follow him Go obediently.

When the two came to the hillside behind, they could still see the guards, but they were far away, so they couldn't hear what they were saying at all, and everyone could see it in this range.

A few minutes later, Yukkin came back in a daze. He really didn't know what happened. He always felt a little uncomfortable just now, as if some of his privacy had been spied on, but he was very convinced that he would never say anything. .

When he just came over, he saw the small captain from the country of Mi coming over, and he complained in his heart, what kind of luck did he have today, why did they come one by one, this is very bad for him, after all, these two people Neither are easy guys to deal with.

Although he was complaining psychologically, he still greeted him with a smile on the surface.

"Captain Hal, what's the matter with you?"

"I don't want to go around with you either, so I just said it directly, what did he ask you for just now, I always feel that there is something wrong with you."

"What do you mean? Are you doubting me? Just now he just asked me about the end of the training. After all, we have delayed for too long, and the level of training is too simple. It's not like his previous training." What he encountered, so he has doubts now."

The captain of the American country stared at Yukkin's eyes closely when he heard this. He was really curious about what this guy said, to see if he was lying, but he didn't see any flaws after watching for a long time.

In the end, he could only comfort himself, maybe he was thinking too much, and there is a high probability that such a person would not say anything.

On the other side, Qin Yuan has already obtained what he wants to know. Youkejin did not lie just now. The person he attacked last night did indeed come back to life. This is also the instruction given to him by the superior.

That person had close contact with him yesterday, and it is very likely that he will describe his specific appearance, which is relatively dangerous. Thinking of this, he must act as soon as possible, but there will be selection training in the afternoon. If he is not here, It is easy to be exposed.

Thinking of this, he quickly analyzed the current situation. The afternoon is a cooperative training between the teams. They have to enter the jungle, find the target in the jungle, and then quickly bring the target back. The main reason is that the team with the shortest time can score. Follow-up Points will be deducted, and the players will be eliminated after the points are deducted.

This is the recent selection rules. It is really relatively simple to say. Since the team is dispatched together, there is still an opportunity to take advantage of it. He can use this opportunity to go out.

He quickly returned to the tent and started to prepare. There are still 20 minutes before the start of the afternoon game, and he will use this time to leave.

In this place, the captain's clothes are different from those of other team members. Qin Yuan handed over his clothes to He Chenguang, because He Chenguang's body shape is similar to his own in all aspects.

"Now I still need to investigate what happened that day, so from now on you have to keep calm, cover and gate for me, you put on my clothes, and other people cover each other, try to cover up as our team has been Case."

He just said that everyone understands, and this is also a tacit understanding for many years.

"Brother Qin, don't worry. If you don't have enough manpower, we can help you. Just leave it to us."

He Chenguang has been staying in the tent all the time now. He quickly changed his clothes and put on the mask in the camp. It really doesn't look much different from Qin Yuan.

As for Qin Yuan changing into the clothes of ordinary team members, he mixed in with the team. When they came out of the tent, the tourist Jin really noticed this side again. Not only him, but also the American team, it seems that the previous actions have been completed. It has aroused their vigilance, but there is no full evidence now.

Li Erniu deliberately walked over angrily, and pushed away the American soldiers in front of him, "I said, what are you looking at, is there a flower on my face or something? Why do you stare at us as soon as we come out?"

"What? Can't you just look at you?"

"Is this what you read, sir? If I say no, I won't. I think you just want to fight. You haven't beaten enough before, have you?"

This time the conflict between the two sides was about to happen. The captain of the American country stood up at this time. He pulled the players away with a smile, and then said that everything was a misunderstanding.

First of all, he didn't want to have a conflict at this time, and secondly, Qin Yuan and the others were indeed capable. If they were irrational to fight with them at this time, he still remembered the beating at that time.

No one noticed anything unusual. Just like that, the competition in the camp started. Everyone quickly entered the jungle at almost the same moment. After entering the jungle, Qin Yuan left from the side.

Qin Zhengyang quickly took his place, so it didn't make much difference, and there was nothing to follow in the whole process.

Therefore, the camp did not notice any changes in their team members. Qin Yuan quickly crossed the ravine and shuttled through the entire jungle without looking back.

When Ruan Ruan came to the factory again, he found that the number of soldiers around him was increasing, and he found that the gate of the previous factory was now closed, and drones were dispatched to patrol.

He originally wanted to move forward, but only then did he notice that the drone had a thermal imaging sensor on it, so the sound of the entire drone starting was very loud.

As long as he has just passed by, the alarm will definitely be raised, so the problem of the drone must be solved before he can pass.

It seemed that these guys really took it seriously. Now, in order to protect the injured person, that person was able to speak out about key issues. Under such circumstances, they dispatched a large number of people to patrol the surrounding area.

Qin Yuan took out the electronic watch that he carried with him, He could install a small hacking device, and then took out the electronic chip inside the watch, and then he tied the chip to a rabbit.

The hare on this mountain runs very fast. In this case, it can buy him time. Moreover, after it is installed with a chip, the thermal image of the rabbit will change, and it will appear under the monitoring of the machine. Humanoid.

As soon as he let go of his hand, the rabbit quickly ran out like a frightened bird. The commotion was not small, and it instantly attracted the attention of those guards. They quickly dispatched the drone, only to find that it turned out to be a humanoid object.

What's more, everyone was surprised that the drone could barely track it. It seemed that it was the person from yesterday.

"The first and second teams dispatched quickly, we must catch that guy."

Unexpectedly, after they had made enough preparations, that person would dare to come, he was really brave, and this time they had more people staying in the factory.

Chapter 1813: successfully entered

Compared with before, they are well prepared. After all, they have experienced a lot of losses after going through these few situations.

More importantly, until now, they have not even found out who the other party is, which makes the people at work very annoyed.

With so many people dispatched to a factory base, no one knows whether the situation inside has been leaked, so he dispatched more people this time.

The captain who led the team to chase was even more confident. This time they used high-tech weapons and drones to track them. No matter where the guy hid, they would be able to find them. The main thing was in this jungle. The other party will be more familiar.

But while running, he felt that something was not right, this guy's speed was too fast, the speed of the drone had already reached the top speed.

"Captain, what is going on here? Could it be that this guy is born to be good at running, but his movement speed is too fast, and the drone has reached the fastest speed to capture his figure."

"That's definitely no problem. That's it. Think about that guy's ability. He knocked down Norma before. You have seen that guy's ability. Such a person is very scary."

Hearing this, everyone became more vigilant and started chasing in that direction. The soldier who spoke just now turned his head and looked around while controlling the drone, only to see that the drone had locked on, and the man stopped. 懷

"Captain, according to the evidence, that person is hiding in the ravine ahead. We can split up and outflank it. We must not let him escape this time."

"I know this for sure. The rest of the people began to batch up and move in that direction. Remember to shoot only when it is absolutely necessary. First, don't hit the vital point. You must keep alive."

Hearing this, everyone is quite nervous. The horror of this person has spread throughout the camp. In the beginning, this person was able to kill so many guards safely.

Moreover, the identity of the migrant workers who are still released around is not simple, and they can fight against it on their own.

The important thing is that he was able to knock down all the soldiers who had been transformed. He could even deal with that kind of terrifying thing, let alone other things.

Everyone's hearts were already in their throats. The soldier standing at the front took a deep breath and approached slowly, and the captain behind followed closely.

When they were about to reach the ravine, the soldiers behind the drone issued a warning again, indicating that the person had moved again, but the soldiers standing in front only felt a white thing passing by quickly.懷

At that time, he was very sure that he was definitely not a human being. Although the bushes on this side were relatively tall, how could he not even be able to see a human being? If you read correctly, it should be a rabbit.

The captain stood at the back and didn't pay much attention. He quickly stepped forward and only heard a sound of brushing, but the movement was very light. He also felt a little strange, grabbed the soldier in front and asked:

"You stood at the front, did you hear anything just now? What does that person look like?"

"I didn't see anything, just a rabbit, like a rabbit."

"I don't want to hear the word like now, have you forgotten the rules here! You must get a definite answer?"

The soldier shook his head. He carefully recalled the situation just now. He was very helpless, and he didn't see it clearly. The main reason was that he was too nervous at the time, and something suddenly jumped out, but he was still 90% sure that it was not a person. Bigger is right.

The captain just grabbed his collar, and then threw it aside fiercely. He felt that this guy was really useless. He was clearly standing in the front, but he didn't find any clues.懷

The soldier was rudely pushed and shoved beside him. After everyone left, he silently picked up the gun and complained in his heart. Although the captain said so, he didn't dare to go forward when he encountered that situation. Instead, he stepped forward.

At this moment, he also felt very strange. Could it be that what he saw just now was not a rabbit? Anyway, the movement of people will definitely be bigger than this, let alone in such a tense situation

, this person is also running very fast, why is his voice so quiet?

He had these questions in his mind, but he couldn't say any more. After all, the officers behind him wouldn't listen to him talking about it, so they all ran towards that side at a faster speed.

On the other side, Qin Yuan had already found an opportunity. He found a vacancy. Although the vacancy was not very big, it was enough for him. He used his short-term confusion ability to quickly pass through the so-called soldiers, and then successfully entered the camp.

This camp factory has changed a lot compared to before. Except for the soldiers guarding around the fort, there are not many people patrolling in other places.

After all, they can't send a large number of people here, the more they send, the more serious the leak will be, so the less people know about it, the better.

In this case, all the soldiers who were on duty inside before were dropped to the periphery, and now there are basically no major problems inside. 懷

Qin Yuan searched everywhere and found an infirmary in the distance, but there was no guard at the door. He felt a little curious. When he approached the infirmary, there was no one there except two doctors.

It seems that the injured person is not here. At this time, he turned his head to look at the fortress, and it should be inside. If according to what he said before and his speculation, that person was transformed through experiments, then he can only explain a problem.

Ordinary medical methods can't do anything about that person's recovery. It seems that he can only enter the experimental area again, so that person is definitely inside the fortress.

Ten minutes later, Qin Yuan successfully entered the fortress. This time it was easier than last time. The main reason was that there were fewer soldiers patrolling this time, only those standing guard at the gate. He could easily confuse these people.

After coming in from this side, he heard a roar coming from inside, which made him feel a little strange, and the guard at the door was gone.

Before entering the fortress, there was a long passage. Inside the passage, there were heads, but now they are all gone. It seems that they should deal with the affairs over there. Qin Yuan randomly found a suit of clothes and put them on.

Just as he was looking for the source of the sound, a man in uniform hurried over, only to see that the man's chest was covered in blood, but judging by the way he ran, the blood should not be his, after all, he was not injured. 懷

"What are you doing here? Hurry up and help Area A, it's out of control there, I'm going up to call someone now."

Qin Yuan looked at the several passages next to him for a while, intending to choose one at random, but he did not expect to choose the right one, but the person who was talking to him just now had a frightened face, looking at his slow look, a little Not too happy.

"What the \*\*\*\* are you doing? Hurry up to Area A and you can't control it anymore, and if you see those guys, shoot directly, don't hesitate."

After the soldier finished speaking, he ran towards the top, probably looking for support, Qin Yuan nodded and ran towards the passage of Area A. When he was halfway running, he heard violent gunshots, except for this , also heard a burst of grenade blasting.

After the grenade exploded, the entire ceiling shook, and then a lot of soil fell, but the good thing is that the overall structure has not been damaged. It seems that there should be no problem. Qin Yuan continued to run forward. When he ran to the end At that time, I finally saw the chaotic side.

I only saw the soldiers inside holding guns in horror and shooting at a room continuously, and when there were bursts of noise in the room, and at the door, we could also see the corpses of several soldiers, as well as some people in overalls. staff member.

Qin Yuan also rushed up, and saw a staff member whose left hand was completely broken, and was leaning against the wall, howling non-stop. 懷

He was also taken aback when he saw the situation in the room clearly. This was the first time he saw this situation. He only saw that the person inside was now in a completely berserk state. The

person's eyes were red, but his muscles were very developed. It has completely exceeded the scope of normal people.

The facilities inside have been almost destroyed by him. What is more shocking is that a big hole has appeared in the wall in the middle of the room.

According to the current situation

What's more, the big hole must have been punched out by that guy, and there were a few soldiers in it who were dealing with him, and those bullets hit him like they were useless.

Seeing this scene, Qin Yuan frowned tightly. This state was even scarier than his state with skills. The main reason was that his ability was too strong, and his destructive power was astonishing. Totally out of control.

I saw that guy punched, and a soldier on the left was hit by him on the spot. The soldier flew heavily around the big hole where a steel bar protruded and was pierced on the spot.

Whether it's his explosive power, strength, or the speed of his punches, they are all amazing. Qin Yuan quickly analyzed, what is the situation? Could it be their new experimental product?

The captain standing outside kept commanding, but he had no choice but to let all the soldiers withdraw, and now he wanted to destroy the monster in front of him. 懷

Because he couldn't let these soldiers come forward to make trouble anymore, he only saw a few corpses lying horizontally inside. If this continues, he doesn't know how many people he will die at the hands of this guy.

"Get all out, the snipers are covering the outside, and the howitzers are brought out, I don't believe that this guy can't be killed!"

[In view of the general environment,

At this time, the captain leading the team was already in a state of anger, and now he wanted to completely destroy this terrifying thing, but at this moment, a voice came from behind.

"Who are you to kill my experimental product? Did you get it and forget it? Your orders above are to obey absolutely. Now I just let you control him, not let you kill him."

Hearing this, Qin Yuan also turned his head, only to see an old man with white hair walking towards this side with a cane, and a few people followed him, Qin Yuan quietly used the system to scan.

None of them have a system, but the state of these few people is very similar to the people inside just now, except that the people inside are in a state of berserk.

Now those people are waiting quietly, the captain who spoke just now can only turn his head, he said indignantly: "Professor, I am only here to respect you, of course it is because of this crazy thing, he has already harmed me A lot of soldiers died, so many lives, why don't you let us do it?"  
Wu

Looking at the old man, he felt that there was nothing wrong with it, but what he said was astonishing, and he looked indifferent.

"Remember how much your ordinary people die has nothing to do with him. You have to know how much value this thing has been spent to create. Even if all of you here die here, it is not as precious as him."

What he said made the surrounding soldiers feel very uncomfortable. After all, it is a monster that cannot be controlled at all, and it is able to receive such attention, and how many of them died here.

The captain just now wanted to give an order to attack forcefully, but was stopped by the professor.

"If you carry out those orders brutally here, believe it or not, I will call the supreme officer right now, and I can immediately dismiss you and replace me with an obedient one. I am the supreme authority here, understand?"

The captain just now was stunned when he heard this, he sighed helplessly, he had to take back the order just now, the soldiers around were very angry, but what could they do?

Qin Yuan observed all this silently from the outside, and then kept looking at the time. According to the calculations of their selection exercise on that side today, four or five hours is absolutely no problem. 懷

So now he has to hurry up and see what's going on here first. After the professor himself did the captain's action, he asked other people to come forward and cooperate with those few people beside him very tacitly.

And the speed is very fast, Judging from their jumping movements, Qin Yuan is no different from human beings, but when a man lands on the ground, he sees that the exposed part does not seem to be skin, but skin. It belongs to the steel frame material.

Several people cooperated tacitly, all holding iron chains, trying to control the violent guy inside, but the things inside didn't buy it at all, and they were in a state of anger, directly slamming the iron

The chain was torn.

"One won't work, just two and give me a few more, I don't believe I can't control him, and then I will be given a sedative!"

The professor was directing from the outside. The captain looked very anxious. He didn't expect that the four people, and those who had been transformed like that, couldn't control the guy inside. He had already told his subordinates to be ready. As long as the thing rushed out, he would Shoot immediately.

"Professor, I really don't understand what you are thinking. This guy has already killed our most important witness. That person could have provided the face of the attacker, but now it seems that it is too late."

"You don't have the right to speak here. You don't have the qualifications. What we are doing here is scientific research, not your rude things."

Chapter 1814: Urgent recall!

The captain who spoke just now shrugged his mouth when he heard this, and didn't say anything else. He was also very helpless. This professor really represents the highest authority here. Since he received the order, he has been guarding this fortress. You have to obey the professor in front of you.

However, there is a problem in the laboratory. The people who are researching and reforming suddenly have a frenzy state. This kind of frenzy state usually lasts for 24 hours, but they have been well controlled by them before, but this time I don't know why. .

It is very likely that they increased the dosage crazily during the transformation, trying to make the transformed person stronger, which made the transformed person completely out of control.

This guy is very crazy. At that time, Norma was seriously injured and was finally dragged back here to be rescued, but now it is completely useless.

Qin Yuan listened quietly outside, a smile appeared in his eyes, it seemed that he didn't need to solve it by himself, that guy had been perfectly shoveled out.

I only saw the four people in the room cooperating with each other, and finally used four iron chains to control the violent guy, but it was only controlled.

The iron chain that Qin Yuan was looking at probably wouldn't last long, but the professor stepped forward unhurriedly, took out the authentic handwriting in his arms and gave him an injection.

After the injection, the person in front of him slowly calmed down, the blood red in his eyes had completely receded and turned back to a normal color, and finally fell into a coma.

The captain just now was a little unhappy when he saw this scene. This guy is still playing this trick. He had a solution before, why didn't he show it earlier? Now that he is dead, there are so many people doing this.

What's more important is that this person can handle it easily. Thinking of this, he couldn't stand it anymore, and angrily stepped forward and asked:

"Although you are the highest authority here, what the \*\*\*\* is going on with you now? You want to kill so many of us for something you can do in a lifetime. We are indeed ordinary people, but without you It's so worthless."

The professor just took the needle back silently, every drop of liquid in it was very precious to him, and at this time Qin Yuan noticed that only half of the liquid in the needle was used, the professor was very careful.

"Hehe, what do you know? Do you know how expensive the stuff inside is? 1 milliliter of this is enough to earn your entire lifetime of money."

As for this professor, human life is indeed worthless and the cheapest. He can change it at any time, including the captain in front of him. He will immediately report to his superiors that a new person will come and replace him.

These words made everyone speechless in an instant. Although it was hard to hear, it was true, and everyone had no way to refute it. In the end, the captain waved helplessly and asked everyone to go in and pull out the corpses of those dead soldiers first.

Qin Yuan looked to see that the time was almost up. Anyway, now that he was sure that the person was dead, there was no point in his side, and if he stayed any longer, he might be discovered, so he might as well leave first.

But at this moment outside, the drone finally found the clues. After all, so many people were chasing it, the rabbit finally had nowhere to go and jumped out. At this moment, the drone also successfully captured its figure.

....

Let them chase the thing for nearly an hour, but they didn't expect it to be a rabbit. The soldiers looked at the display on the thermal imaging repeatedly. Could it be that something went wrong?

But nothing was found anywhere else, the rabbit was stuck in the tree fork, unable to move, and at this moment the human-shaped object on the display was stuck in place.

The captain was very angry. He didn't expect that they were played by a rabbit after a long time. He grabbed the rabbit angrily, and the rabbit kept struggling. Only then did he notice that there was a chip tied to the rabbit.

Who the \*\*\*\* is fooling so many of them? He tore off the chip, and the soldier next to him was about to remind him, but it was too late, followed by a powerful explosion sound from a distance, Qin Yuan With a slight smile, it seems that he has been discovered.

He shook his head and left gracefully, only feeling that the reaction of these soldiers was really too slow,

It took so long to find it, but he turned it around, this may be used in later training, if there is a chance in the future, he can use this method to train other newcomers.

Now he actually still has a problem in his mind, that is, these reformed soldiers and the things that guy is holding in his hand, but today's time is too late, otherwise he must ask what is going on.

That kind of thing is the key to control, even that professor is very precious, you must know that this is something that the United States invests in research.

But the professor was very careful in using it. This thing should not be measured by money. Although he said this to the captain, the captain could understand it when he said this. It is estimated that the value itself is already very high.

There was a burst of wailing at the place where the explosion happened just now. The captain who was first affected was blown to pieces, and several people on the side were affected. I didn't expect this small chip to have such a powerful power.

Qin Yuan didn't want to care about the movement here anymore, he was fast, shuttled non-stop in the jungle, and finally successfully entered the team, and everyone changed their clothes as if nothing had happened.

"There was nothing unusual after I went out just now. How about the current game?"

"Brother Qin, don't worry, it's actually just to wait for you. If we didn't wait for you, we would have gone out a long time ago, but the competition here is meaningless, and we don't want to waste time here, just let them go."

Qin Yuan nodded, led the team and began to walk towards the periphery. After going out, he found that the US team and those from country A were already waiting outside.

The captain of country a said in a strange way: "It's really strange, don't some people fight for the first place every day? Why are they so slow today? It seems that the strength is not as good as others, after all, it was just luck before."

He was deliberately provoking Qin Yuan. He wanted to see how Qin Yuan reacted, because they had also received a notice just now, and there was another problem there. Country A, as a team that cooperated with the country of Mi and knew about it, they all shared the responsibility. monitoring tasks.

But this time Qin Yuan didn't pay attention to him, but walked past him swaggeringly, "The training you have come up with is too childish, I don't even bother to say, I don't want to participate in this kind of mentally retarded game ."

....

The most embarrassing thing was actually You Kejin. To be honest, all these plans were sorted out by everyone. I didn't expect that they were nothing in Qin Yuan's eyes.

The captain of Country A shook his head after Qin Yuan walked over, but he didn't find anything unusual, and he was here the whole time, and he didn't have time to pass by. It took them four hours to get from here to there. , not to mention round trips.

After the selection training in the afternoon, in a tent, the captain of Country A slapped the table and stood up.

"I think it's all a waste of effort, because you have mistaken the target, Qin Yuan is not our primary surveillance target at all, now we stick to all the focus here, but where is the real murderer? do not know either."

"Hehe, it's really funny for you to say that. You guys brought it up in the first place, and we all monitored it together. Besides, the suspicion of this person cannot be completely ruled out."

Listening to the speeches of the Americans on the opposite side, the captain of country A couldn't bear it any longer. Every time they were the ones commanding randomly, this time he felt that it was the same.

"First of all, we are just a cooperative relationship, there is no need to follow your orders, and I really think your direction is completely wrong, we should focus entirely on how to find the real murderer, instead of wasting time here! "

"Anyway, you can think whatever you want, but don't forget your identity, and remember what happened to the Yuan Kingdom, you know better than anyone else."

The captain of country hammered the table angrily when he heard this, what the \*\*\*\* is this guy trying to do? Now that's nothing short of a threat.

You Kejin didn't want to make a big deal out of it, and sitting in the camp, if there was a real fight, it would be bad for others to see, especially Qin Yuan, so he could only stand up and persuade the fight.

Yukkin thinks one head and two big, why?

Every time he has to do such a troublesome thing, Qin Yuan has just resolved it, and now the two are arguing again, it is really not easy to offend anyone, his position is too embarrassing.

At this time, Qin Yuan explained the situation of his investigation to everyone in Qin Yuan's tent. Now that he has discovered the things they modified for the second time, he can only go in and have a look at the next opportunity.

"Brother Qin, I think if this is the case, it's better to apply to the higher-ups to see if the Dragon Team can come to help."

"This won't work. It's too dangerous over there. They can't handle the situation here. In fact, they should have come here to participate in the competition if they knew it earlier. I can cooperate with it and then investigate. It's just that I didn't expect the situation to be so serious at the time. ."

It's not a big problem to let Long Xiaoyun and the others come over, but the whole process is quite risky, especially for those reformed soldiers. Qin Yuan has fought against one of them before, and knows how powerful that guy is. a feeling of.

And that guy wasn't in a berserk state at that time, he had already witnessed that guy's berserk state today, and he had to use that special drug to control it, even bullets on his body didn't work.

After all, those bullets did not hit their bodies. Their bodies had completely changed. When he was struggling, he saw Yukkin running over panting.

....

"Captain Qin Yuan has an urgent letter, it seems to be sent from your country."

domestic? Qin Yuan also felt strange, what are they looking for in China at this time, because now they are all closed for selection and training here, and all things can only be notified first in the most traditional way before.

After Qin Yuan opened the letter, Youkejin turned his head knowingly, knowing that he shouldn't read these things by himself.

But when he saw the content of the letter and frowned slightly, everything completely disrupted his plan. There was an urgent mission in the country, and he was asked to take the team to Sabriel immediately to carry out the mission there. The specific situation of the task will be notified when he leaves the camp.

As for this side, on the one hand, it is for him to make a choice, whether to give up the current training and selection, or they will send a new team to take over. Obviously, the second situation is impossible.

Here they can choose to give up. Qin Yuan couldn't turn his head to look at everyone, and then handed over the letter. It is necessary to let everyone know about this situation.

"Brother Qin, what's going on now? Don't worry, tell us, no matter what, we will follow your arrangement."

It's just that at this time, I was recalled urgently. I could have checked it once, but there will be opportunities in the future. Anyway, he has remembered that place. If they go again now, their vigilance will increase instead. Too much profit.

Qin Yuan could only tell Yukkin about the situation here, expressing that he wanted to give up the game.

After hearing this, Yukkin was actually very happy in his heart, but this guy is also a fake enough, he can't expose this emotion, he can only pretend to be very regretful and ask:

"Captain Qin, I think you should not give up halfway. This is really a pity. Although I don't know what mission you are going to perform, if you stay, you can still get the first place steadily."

These words sounded too false, Qin Yuan also intentionally teased him, and just looked at him with a slight smile, "It really makes sense to say that, now I'll go talk to the above first, and see if there can be any relief. I don't want to give up this opportunity, after all, I am number one."

At this time, you can clearly see the corner of Yukkin's mouth twitching, they have been busy for a long time, is all for Qin Yuan, as long as he can send this guy away, it will be much easier for him.

At this time, Yukkin regretted it very much. If he had known that he would not have said those two sentences, why did he say those useless things?

"Okay, you don't have to say that anymore, I know what you guys think, maybe you wish I could leave early, I know it's cheap this time, you don't want to play with you anymore, I'm leaving."

Yukkin didn't expect his true

It was a little embarrassing that the idea was seen through. When the country of Mi and country A heard the news that Qin Yuan was leaving, they applauded and applauded. Now they can finally relax a lot.

Qin Yuan just got on the helicopter and made sure there was no problem, so he directly contacted the General Military Region. What is the mission this time? Long Xiaoyun and the others are actually pretty good now, and they can deal with it directly. Why should they be called back?

The head of the general military region has a very serious expression on his face. This time is his highest order, so there should be no hesitation.

Chapter 1815: don't want to get in trouble

Because the situation was more urgent, the two sides held a temporary video conference, only to see the leader of the General Military Region seriously introduce the specific mission situation this time.

"Originally, I didn't want to disturb you guys participating in the competition over there this time, but it's more important than that, and only you can do it."

"Chief, what's the situation this time? Don't worry, no matter what the task is, we can complete it."

The chief turned his head and glanced at the people next to him. The people next to him who did not leave the country were Gao Shiwei and several important heads of the military region. Everyone was actually very worried.

"This mission can be said to be close to death, so you sent your red blood cell team. Usually I ask you to come back safely, but this time I hope you can do your best to complete the mission."

Hearing this, everyone understood in their hearts. Although his words were not too clear, it also explained the importance of this mission. This mission can cost lives and must be completed.

Then Qin Yuan found out that he had received a document. He clicked on the head next to the document and continued to introduce. There were a total of six people on the document.

According to the introduction above, these six people are from the national military base. This time, they carried important confidential research documents and then fled. They have already contacted spies abroad. They want to sell all these confidential documents abroad. .

Hearing that everyone here is frowning, this matter is no small matter, Qin Yuan immediately asked them when they escaped, "I think we should be able to make it in time with our speed."

"The reason why we notified you so urgently is because we found that they escaped for three hours. I'm not sure if the other teams can complete the mission, but I hope you can completely intercept them."

Qin Yuan nodded to express his understanding, but at the same time he had another question, "Chief, what I want to know is how to deal with these people? Do we need to bring them back alive?"

"The person named Yang Ziming on the document must be brought back. He is the main leader among these people. If the rest can be brought back as much as possible, if the conditions are not ripe, they can be killed on the spot."

Having said that, everyone understands, and it seems that the above does not want to expand this matter, and those who know the matter can solve it on the spot as much as possible.

But thinking about it, Qin Yuan felt that this matter was not that exaggerated. Although they were indeed fine in terms of speed, why did the chief just now say that this was a mission of a narrow escape?

At this moment, the chief on the other side hesitated to speak. He took a deep breath, and finally explained the most real situation. He said that the members of the overseas organization are very powerful, and many international organizations have nothing to do with them. This time They got in touch with that foreign force.

"And that force launched a violent terrorist attack some time ago. Terrorist operations have been launched in countries a, c and other regions. Those terrorists can be said to be completely reckless thugs."

No wonder this is the case. After listening to Qin Yuan, he was very relaxed. He felt that there was no problem, "Since they are some militants, then I can just let go and do it. I don't want to leave any harm, so I just treat it as cleaning up garbage." gone."

"Qin Yuan, what happened this time is no small matter. The power of those overseas organizations is really huge. After you enter, you must not reveal your identity. You must disguise yourself. This time, the action should not be too big. Don't let any international suspicion. After all, we are other countries conducting military activities."

"Chief, I have done so many tasks for so many years, don't you feel relieved? This is not a problem for me, especially for our red blood cell team."

"I am very clear about this, but I still have to tell you one thing, remember that you must not hurt innocent civilians over there, otherwise many things cannot be explained clearly."

This is also the principle of the red blood cell team. It is absolutely impossible to hurt innocent people. This meeting ended in a hurry. After all, the video signal in the high altitude is getting weaker and weaker. Many signals cannot be received. In the end, we can only use file transmission The way.

Seeing that the signal over there couldn't be contacted for a while, Gao Shiwei sighed helplessly, and he didn't have time to say many things.

The chief who spoke just now stared at the screen tightly. He felt that they should be able to successfully intercept it. This was their major mistake, and those military secrets involved too many things.

"Do you think they can successfully intercept it?"

Gao Shiwei didn't know what to say for a while, what is needed now is not words of comfort, but to make the most effective analysis based on the current situation.

"Chief, according to the current situation, they have fled for three hours. Now it should be suitable for overseas organizations to get in touch. Although we found out at the first time, it was still a bit late, so I think the situation may be worse."

The chief nodded, and he also understood what it meant, and then sent another message.

Gao Shiwei was very surprised when he saw it. Do you really want to do this? This would really push Qin Yuan and the others to a dead end, because they would have no way out, unless they had to complete the task, but there were only a few of them.

"Chief, this is a little inappropriate, and they only have one small team, and there are a lot of people from foreign organizations over there. Will this cause..."

Before Gao Shiwei finished speaking, the chief interrupted him directly.

"You have to remember who you are now, and who they are. They are just a handful of profits, and they have to make sacrifices for the country at any time. Do they have to understand at the forefront? Now is the critical moment!"

The chief is also under great psychological pressure now. If those things are completely leaked, it will not only be a huge loss for them, but more importantly, they will completely expose their internal information to those people.

The first thing that comes to Gao Shiwei's mind is An Ran and the children. It is hard for him to imagine how this mission will be, but it is definitely full of danger. The case of the overseas organization is still unclear. How many people there are, only know that their scope is very large.

Moreover, Qin Yuan and the others were very restricted this time. They had to act secretly so that their identities could not be discovered by them.

In other words, if they really had an accidental death, it must be resolved in an extremely quiet way over there, and there should be no too much movement.

Thinking of this, Gao Shiwei felt an inexplicable sadness in his heart. The chief next to him had already made a decision, and he was unwilling to face this one, but he had no choice but to minimize the loss now.

"You have to understand what your identity is like now, and we used him in exchange for those things. In fact, it's almost the same."

In this case, although it is somewhat unsatisfactory, those secrets represent the future of the country, so if Qin Yuan, a small team, is used in exchange, it is also possible for the upper class.

Gao Shiwei was not talking, what could he do now, the only choice he had was to obey, and the orders had already been issued.

At this moment, Qin Yuan and the others on the other side also received that message. When he saw it, he also understood the intention of the leader above, and could see that the document this time was indeed very important.

The last message of the order was to tell them to wipe out everyone who knew the inside story, especially the armed criminal.

In the beginning, they just asked them to intercept these people and bring the things back, but this was a leaked plan. It seems that the worst possibility has been pushed to the top, and the things are already being traded.

That is, as long as it is related to this matter and people involved in this matter, it must be dealt with. Qin Zhengyang was stunned when he heard this, and he asked suspiciously:

"I have an idea, what if civilians know about this and get involved?"

This question really caught everyone by surprise, but Qin Yuan's expression was very serious. He said that he would deal with it no matter who it was, as long as he knew the news.

Everyone was not talking, Qin Zhengyang listened to it, although he felt a little bit rebuttal, but think about it, this thing is very important to the top, if it is not handled well.

They don't know how many times they have to delay here, and these secrets don't know how many people's lives were paid for before.

They all misunderstood Qin Yuan's meaning. What he said was not the way to deal with it. You must know that Qin Yuan has the ability of the system, and he can easily erase it. For those innocent civilians, if they are really involved accidentally, then there must be his way to deal with it.

The situation in foreign countries is very complicated. Like those armed terrorist organizations, many of them are involved with local civilians, so everyone is silently preparing for it.

Qin Yuan saw that everyone was under a lot of psychological pressure, and it would indeed be too difficult for them to take action against those civilians.

So he made a statement in advance, "Everyone is also an old player. I don't need to say anything else. You can think about what the current situation is like. We have experienced it before. Do you think those civilians really Is it innocent?"

Most of these armed terrorists come from among these civilians, and the relationship between them is intricate, and there is no such thing as completely innocent.

In this way, they can relieve their own psychological pressure. At this time, the helicopter pilots in front reminded them that they can no longer fly forward in half an hour. In half an hour they will be ready to start skydiving.

Qin Yuan understood that after half an hour, people started skydiving. This is a mountainous area, so there was no problem at all. Everyone jumped down skillfully, and then began to change their clothes.

All guns and ammunition are camouflaged, and everyone is carrying a large travel bag, just like a tourist here.

There is still a camera hanging on He Chenguang's chest. This is a necessary hidden skill. Qin Yuan looked at the map. On the map, he can reach the city center by passing through three villages. They can take a car from the city center and track him to the end. s position.

According to the instructions on the mission, that Yang Ziming was the most important leader, and a monitoring device was installed on him at that time.

However, there was no monitoring equipment here, and he disappeared completely after arriving at Asory, which was also his last disappearance place, so the above suspects that he should have been monitored there, and the things on his body were removed.

This time they need to rush to Asory first, and then make the next step. To investigate there, Li Erniu couldn't help but said after listening to the analysis of the task:

"It's been so long, could it be that they have discovered the monitoring equipment and deliberately led us to that place?"

"This situation is not ruled out, but we have nothing to do now. We can only go over there to check the situation first, but I think this possibility is unlikely. If he finds out from the beginning, he should put the monitoring equipment on the way out. Just remove it completely, not at this time."

After all, after coming abroad, he knows the strength of his country and will send a special operations team, which is also very dangerous for them, so the monitoring equipment should be canceled unintentionally.

Qin Yuan looked at the people in the photo with a straight face, a slightly longer eyebrow on the left side, a high nose bridge, and a little small eyes. These people were all wearing work clothes for the photo, but they didn't expect them to make a picture. Something like that, or they were spies in disguise in the first place.

This guy named Yang Ziming is very unique. Because he was worried about being watched, the team chose to parachute here. Their walking speed is also very fast. It only took more than an hour to climb over the mountain here. is about to reach the village, and now they need to go through the village.

Qin Yuan didn't want to enter the village at first, it would be better if he could avoid it, but the terrain here is more complicated, if he wants to pass by here, he has to pass through the village.

After they came here, they could see that the land here was very barren. There were basically no people working in the fields, especially when strangers like them entered the village, they quickly attracted the attention of the villagers. Everyone gathered together curiously. Point at them.

Li Erniu felt a little uncomfortable being looked at, and secretly cursed, "Damn it, it's really like being treated like a monkey in a zoo just after we came here, it's really uncomfortable."

"Okay, don't talk too much, get out of here quickly, I don't want to pay too much attention to this place."

At this moment, a villager in front suddenly stood in the middle of the road with a \*\*\*\* in his hand. Qin Yuan silently hoped that he would not do that. innocent people.

However, this guy had no intention of leaving, and the surrounding villagers followed him.

Chapter 1816: find clues

"Brother Qin, I think they are trying to ask us for money. This is the routine we used to encounter before."

"If you really want money, that's fine. Just send it away. I don't want anything to happen."

All the villagers gathered together, the villagers in front chattered a lot, fortunately Qin Yuan could understand

It probably means that it is similar to what they guessed. These people just want the right of way. This is clearly bullying tourists from outside. This would definitely not happen in China.

But it is different in this place. There are relatively few villages in this place, and the law and order in the city is also very chaotic, and no one will take care of it.

The so-called troublesome people come out of poor mountains and rivers, even if they are beaten to death by these villagers in these places, no one will care.

Qin Yuan expressed that he could understand, and then took out some cash from his pocket. The villagers' eyes lit up instantly when they saw it.

This money can be said to be enough. Some ordinary families here have spent a year, but the villagers are still not satisfied. After all, there are so many people who can get so little money, so they stretch out their hands and continue to ask for it.

Qin Yuan asked everyone to take out all the money they had on their bodies, and they would find a way to go there later, anyway, it was just a matter of a long way.

Just like that, everyone took out all the money on their bodies, and the villager who took the lead just now nodded in satisfaction, confirming that there was nothing wrong, and then forced everyone to leave with a smile.

When he came out, Li Erniu felt very uncomfortable. These guys are completely robbers, and they will pass by two villages later. Do they have to be in this way?

"Brother Qin, if you want me to tell you that you just took out the gun just now, I don't think anyone of them would dare to say anything. If they just rushed over, no one would dare to speak after firing a gun."

"I think you are doing such reckless things, you don't want to think about the current situation. We came here to keep a low profile, and why don't you know that there are those militants here? Once discovered, wouldn't all previous efforts be wasted?"

So now they have to keep a low profile as much as possible. As for Qin Yuan, he will find a way in the future. Things that can be solved with money are trivial matters.

Unexpectedly, when they passed through the second village, it turned out to be very smooth. No one made things difficult for them there, and not many people seemed to respond to their arrival.

However, it can also be seen that this village is relatively withered. There were a lot of young and strong laborers in the previous village, but in this village there are no more. Basically, it is mainly the elderly and children.

"The distribution of these villages is really strange, and I always feel that their number is a bit strange."

"It's also very good to understand this place. There was a large-scale riot a while ago, so where do you say those rioters and those who participated in the reaction came from? They are all from these grassroots people, because they are very It's easy to be incited."

As for those villagers who want money, it is understandable. Without money, there is no way, and the country doesn't care about them, so it can only take such an extreme method.

Fortunately, they passed through the two villages behind, not as bad as the previous village, but a lot of time wasted passing through these places, and the road here is relatively long.

Everyone didn't rest along the way, but it took nearly three hours for them to arrive at the market near the village. He Chenguang was also quite anxious. As time went by, information was probably already being traded there.

"Brother Qin, I think this task may be too difficult to complete. Even if we go there at such a fast speed, there is absolutely no way."

"Do you think the intelligence has been sold?"

He Chenguang nodded. He was a little disappointed with this mission. If the time was faster, it should be fine, but the current situation is not what they thought.

"Don't worry, this kind of situation can be said to be very rare. After all, what do they want to exchange for these things? It's the glory and wealth of the rest of their lives, as well as peace, so these things are life-saving talismans. Do you think he will Hand it over easily?"

It is indeed reasonable to say so, and even if he wants to hand it over, he won't hand it all over, and will keep some of it in his hand. This guy is actually able to go out with such important military information, so he is also a very scheming and intelligent person, such a person cannot make such a hasty decision.

Several people came to the market, and Li Erniu had already gone out to search for it first. They needed to take a bus here to reach the urban area over there.

"Brother Qin, I've found the car, hurry up, it's in the square in front."

When everyone arrived at the location mentioned by the driver, they were instantly dumbfounded. The bus in front of them was dilapidated, filled with all kinds of goods, and the people sitting inside had reached a crowded state. , not to mention overloading, this is simply serious overloading.

But the driver was still standing at the door, constantly soliciting passengers in the car.

"Let's go, Brother Qin, we don't pull pigs like this. Anyway, the pigs know whether to overload. There are too many people, and we probably won't be able to sit inside, I'm afraid we'll have to sit on the roof of the car Come on."

Li Erniu's crow's mouth really came true. In the next second, he saw several people sitting on the roof of the car, and they set off together with various goods.

However, compared to being on the roof of the car, this is considered a golden VIP position, where the air is still fairly circulated! Passengers in the compartment, that is tolerable, all kinds of things, people are all crowded together.

As the vehicle set off, Qin Yuan's patience was also close to the limit, because the car broke down three times in just half an hour, mainly because the road surface is too exaggerated, there is no road at all, all of them are That dirt road.

Not long after driving, there was another problem with the vehicle, either the tires or the front engine, and all the passengers had to wait.

Now the tire on the left side has a problem again, and it can't get out of the silt at all. The driver let all the passengers get off and can only push the cart, but Qin Yuan saw the long road ahead, how long will it take?

An old man next to him saw Qin Yuan's anxiety, and he said with a smile: "Young man, it seems that you are here to travel, it's still early, you can take a rest first."

"Old man, I'm just curious, how long would it take to get to the city from here?"

"The better thing today is that it didn't rain. In this case, we should be able to arrive before 8 o'clock in the evening."

What! Qin Yuan was stunned when he heard this. He heard it right, the distance from this road to the urban area is more than 50 kilometers, and they will have to drive for a day.

And it still said that it wasn't raining, so we arrived before 8:00 pm. If it rained, then no one knew when it would be. Hearing this, Qin Yuan shook his head. He decided to choose the car, and they might as well walk.

The old man just shook his head when he saw it, "The young people nowadays are just too impulsive. Can they really reach such a long distance on foot? Or is the idea too simple?"

And because Qin Yuan and the others wasted too much time here, almost all of them ran in the second half of the journey, but overall it was much faster than that car. Although there was no good road along the way, walking was indeed Much faster.

In this way, they arrived at Asoli. Qin Yuan took out the previous equipment and started monitoring. They followed all the way and set off together, and finally came to the place where the positioning disappeared.

When they came over, they found that it was a relatively lively market. At this moment, Qin Yuan noticed that the red dot on the instrument in his hand started to move again. He was a little excited for a while, could it be that the other party didn't notice it at all.

This will allow them to find that person as soon as possible, and according to the display on the instrument, a few people are around them and dispatched quickly. At this time, as the red dot on the instrument is getting closer, Qin Yuan notices that the person in front is wearing a red jacket people.

He moved out quickly and grabbed the man, but when the man turned his head, everyone was stunned, because the man in front of them was not the Yang Ziming they were looking for, it was obviously a foreigner.

Moreover, this guy was surrounded by a group of strangers, and he wanted to yell on the spot. Fortunately, Li Erniu was quick and covered his mouth.

Several people dragged this guy into the corner. This guy was already trembling with fright. Qin Yuan probably understood what was going on. He tore off the guy's coat. After all, it didn't match his clothes. All the shoes and trousers on his body are very worn out, but this coat is brand new.

The man thought he was being robbed, and he felt strange that these people were after him even though he had no money, so he quickly took out all his pockets, this guy was cleaner than his face.

Qin Yuan just asked him where the coat came from, and the man could only explain everything out of fear. He said that he picked it up in the front and finally brought Qin Yuan and the others to that place.

The place where the man picked up the jacket was an alley. He happened to pass by this place and saw a few clothes inside, but the other things had already been snatched by those people. He only snatched this red jacket in the end.

This time, all the clues were cut off here. After all, it is not known who took him away, or whether they joined forces here. This is just one of the branches, and all questions revolve in Qin Yuan's mind.

At this moment, the man just now unintentionally revealed another clue.

"I advise you to leave as soon as possible. We just took the risk of grabbing clothes in this place. He is the location of the most famous gang in our area."

Hearing this, Qin Yuan became interested. Since they are in the position of this gang, and they can appear here, it must mean that they are inseparable from this gang.

Sure enough, with the investigation, Qin Yuan also understood that this gang is also very famous in the local area, called the Lanqi Gang, and he successfully found out the address of this gang.

Although this gang is very arrogant in the local area, in Qin Yuan's eyes, they are just a group of hooligans, and there is nothing to be afraid of. To deal with such people, they should use tougher methods.

At this moment, there was the sound of drinking and punching in a small independent building. Several people with weapons on their backs were drinking, playing cards in their hands, and shouting excitedly.

Looking up, I saw a few bosses playing with women in their arms. The environment of this place can be described as smoky, and the smell of all kinds of tobacco and alcohol filled the whole small building.

There are a few people standing guard at the door, but they are all listless, sitting casually beside them.

So before they could react, they were directly dealt with by Qin Yuan. Several people came upstairs with ease and just entered the door.

Those who were drinking just now turned their heads with strange expressions, but Qin Yuan's attack was faster, and he immediately killed them all with throwing knives.

At this time, the boss upstairs heard the movement, and several people came down with guns cursing. They were shocked by the scene in front of them. The people in the hall downstairs were almost dealt with by Qin Yuan and the others. At this moment, Qin Yuan He raised his head and looked coldly at the boss in front of him.

The boss saw that the situation was not good, and started to run up with the people around him. There is a passage behind the corridor, they can run out from there. This guy knows that although his gang is the largest, he can be regarded as a provocation in the local area. Many enemies, maybe someone came up to seek revenge.

But how could willingness let him go? The speed of these people can't compare to him. In a blink of an eye, he came to the second floor, kicked and smashed the fence, and the boss's road was completely cut off. He could only raise his gun to resist. He just raised his gun. , Qin Yuan's throwing knife shot out.

The boss screamed, clutching his wrists and fell to the ground in pain, the people behind him were also completely surrounded.

"You! Who are you?"

"You don't need to worry about this, I just want to know who you picked up in that alley this morning and where they sent it. You just need to tell me this."

The boss' face changed drastically when he heard this. He thought he was looking for revenge, but he didn't expect to ask about this news. He couldn't tell this even if he was killed, because the other party was something he couldn't afford to provoke.

"I can not understand what you say."

Qin Yuan didn't talk nonsense with him, he raised the knife, only to see the boss screamed, his left hand was cut off by Qin Yuan, the people around were stunned, and one of them was even more frightened trembling.

They are more ruthless, but the person in front of them is more ruthless than them. They look ordinary, but they are a hundred times more ruthless than them when they strike.

"I'll give you one last chance. I don't know if anyone knows. Those who know can live. Those who don't want to talk, then I can send you away now!"

Qin Yuan played with the flying knife in his hand, his relaxed appearance made everyone feel even more scared, this man is a murderer without blinking an eye, and the main thing is that it is impossible to live so easily, he will only make people die in pain .

Chapter 1817: Windfall

So with such a threat from him, the people beside him didn't say anything more, especially a little brother on the side, seeing that the situation was wrong, he knelt down with a plop, and explained everything in detail.

"I can say anything, but I just beg you to let me go now, I really don't want to die in this place."

Unexpectedly, when the boss heard this just now, he was so desperate that he picked up the gun next to him and was about to shoot. This guy's right hand had already been stabbed by a flying knife, so he was trembling very badly. Before he could shoot, he was shot by Qin Yuan. He found that he was kicked and fell to the side.

The boss didn't care about this at all, and shouted desperately over there: "I tell you, if you dare to tell this matter, all of us will be finished, not only us, but the whole gang! Brothers from the branch, None of them survive, do you understand?"

But the person on the other side only wants to survive for himself now, he has been frightened by Qin Yuan, "I don't care about those people, I only care about my own life and death now, people are selfish, do you think if they encounter this situation, will you think about us?"

Qin Yuan felt that the boss in front of him didn't have much hope, so he stabbed him in the throat with a flying knife. The guy whimpered and said a few words, then fell down on the spot, out of breath.

When he was about to die, his eyes widened and he stared straight at the subordinate, hoping that he would not tell these things, but people don't care about these things in order to survive.

This subordinate explained that the reason why their gang has become so powerful in the local area is not only that they have a large number of people, but also that they have the biggest umbrella.

The WS organization is their umbrella, which is Qin Yuan's target this time, a terrorist armed organization. This organization is also relatively powerful. First of all, their sources of information are these small gangs in various regions.

They can get news from these small gangs, and things that are inconvenient for them to come forward are all done by these small gangs.

Like today's mission, they are responsible for responding and sending the few people from Yan Kingdom to the designated place.

"It seems that you still have some value. Do you know everything in it? If you know, you are useful, and others are useless."

The others tried their best to express it when they heard this. After all, someone had spoken out, so they no longer hid it. Anyway, they all had a beginning, but Qin Yuan didn't give others a chance anymore.

His throwing knife shot out in an instant, and those people fell down on the spot, leaving only this man kneeling in the middle and trembling.

"Don't think that you alone can completely take us. I can know your thoughts every minute, but I don't want to do such a laborious thing. The best way is for you to go directly now."

This little brother is also a smart person, and he immediately said that he could take them to that place, and they escorted him, because he just came back after the \*\*\*\* and got a relatively large reward.

On the way there, the younger brother told them that the reward was given by the escorts.

It seems that this Yang Ziming is quite generous, buying people's hearts everywhere, but this guy's luck is not very good, the guy who bought him is as timid as a mouse, and he sold him out in a blink of an eye, without any reservations at all.

Under the leadership of the man, Qin Yuan and the others came to a base, which was closely connected with the village. From a distance, there were several men with weapons and headscarves standing guard at the door. They surrounded the fire Is smoking.

It seems that the patrol is relatively strict, and there are several jeeps parked around. There are also people holding weapons on the jeeps, and there are people with heavy weapons on the side.

The more troublesome thing in this situation is that there are civilians who keep coming in and out from the side. These civilians seem to have long been used to the existence of these people. They don't have the slightest fear. Looking from the inside of the village, there is a relatively small market inside. , someone is selling things there.

The man who brought them here just now explained in a low voice that this village is a relatively large one around, so people from nearby villages will come here to sell things, and the situation in this village is also very complicated.

These local armed forces are protecting the local people, so there is no conflict with them.

Li Erniu just thought it was funny when he heard this, it was really ironic, the case in this place is really unclear, these militants even protect the local people.

Qin Yuan didn't want to know more about these situations. He just wanted to solve the problems in front of him as soon as possible. He wanted to find those six people.

"Let me ask again, are the six people you brought here placed in this position?"

"Yes, I brought them in personally. As for the other circumstances, I really don't know, but I'm sure they didn't leave this place. After coming out of here, it's easy for them to be here because they don't have any power. The place is in danger."

Qin Yuan waved his hand and told this guy to leave directly, which was fulfilling his original promise. Qin Zhenyang held up the gun in his hand, ready to give him a blow from a distance later.

"Forget it, don't aim, let this person let him die, it's useless, he's just a kid."

Qin Zhengyang silently put away his gun and began to observe the situation in front of him. After a while, he only saw a small vehicle driving in with a lot of vegetables and fruits. It seemed that they were preparing some kind of celebrate.

After repeated confirmation, Qin Yuan decided to sneak in quietly. Anyway, the surrounding villagers would be operating in this place, and he also noticed that those villagers would not be interrogated at all.

He had to go in to find out the situation first, and he didn't want to scare the snakes. The geographical location of this place is really special. The passages in the whole village extend in all directions.

They haven't figured out the internal situation of this organization yet. Whether these six people have been transferred, or where they are, is very complicated.

Qin Tao made a simple disguise. The robe he put on looked a bit like the locals. "How about it? Look at my temperament, I should be the same as the locals."

He Chenguang looked at it carefully, and always felt that something was missing, and suddenly he thought of it, it was a beard.

Qin Yuan smiled slightly, and then took out a fake beard from his backpack. With such a set, the disguise will be completely completed in the future, and there is no clue at all. It is too similar.

All the camouflage has been completed, Qin Yuan asked everyone to wait here, he went to check the news first, when he walked over, those militants didn't have any doubts about him, they just chatted on their own.

It seemed that his disguise was indeed very successful. After he walked in completely, he realized that this decision was really wise, because the step after entering was more complicated than he imagined.

Except for the bazaar above, the entire village seems to have been re-arranged and assembled, and there are armed guards guarding each passage.

And if he read it correctly, there is a tunnel on the side, especially the well. There are a few people standing randomly at the well, all holding weapons and chatting on their own, while the children are playing beside them.

The situation in this place is indeed more complicated. The more troublesome thing in this place is that besides the armed guards standing guard, these villagers are the best eyeliners, and they can supervise outsiders at any time.

Seeing that someone seemed to have noticed him, Qin Yuan could only squat down and look at the goods on the ground, but at this moment, the stall owner suddenly grabbed his hand.

"Brother, don't move around, they are already watching you, the situation here is very complicated."

Qin Yuan was secretly surprised when he heard this. He was careful enough, but he didn't expect to be discovered. What's going on?

The stall owner didn't intend to expose him, but laughed loudly, and happily discussed the business with him, the two cooperated seamlessly, back and forth, Qin Yuan even pretended to give the money, and left with the goods satisfied .

At this moment, the team members outside waited for a while, and saw Qin Yuan coming out from inside, but Qin Yuan did not go directly in this direction, but took a long way around to make sure that there was no follower behind, and then And ran back around the road.

Everyone was anxious and kept asking him what was going on inside. Qin Yuan said that apart from the tunnels, other passages were well developed, and more importantly, there were some landmines installed in the village.

"Brother Qin, you are too powerful. You have already learned so much information just after entering. How did you find out?"

Qin Yuan spread his hands, only to see a map in the palm of his hand, which marked the location of the tunnel entrance and the distribution of some places, but the drawing was not very detailed, and many places were marked with question marks.

"This is?"

This was given to him by the stall owner just now when he was looking for money. The two of them were not found to have any clues. The stall owner told him during the transaction.

The reason why it is easy to be found in this place is that most of the villagers in the surrounding villages know each other, because everyone will go to the church to worship.

Therefore, people in the surrounding villages are very familiar, and it is impossible to have people who are completely unknown. From the moment he comes in, the villagers will start to communicate, so he will easily be marked as a stranger, and strangers. When people come to this place, they will arouse suspicion.

As for what the stall owner meant, Qin Yuan didn't understand, and he seemed to have seen through his own purpose.

Hearing this, Wang Yanbing felt that it was a little too risky. He didn't trust these local people very much. When he was on a mission abroad, he believed a local civilian and almost killed He Chenguang. That civilian was a local. The militants had bombs strapped directly to their bodies.

So since then, he no longer trusts anyone abroad, and those old people and children who seem to have no harm are the most dangerous.

Qin Yuan said that this person is absolutely trustworthy, because he has investigated that person since the first contact with him, and there is really no problem.

"Let's wait for a while now. What I can be sure of is that I have seen a place that is heavily guarded. The person we are looking for must be there. Don't act rashly now. The boss probably has two more. It will come out in an hour."

The other team members looked at each other when they heard this. They don't know why Qin Yuan made such a cautious decision this time. Normally, they would just go in. Why did he act so cautiously this time?

"Brother Qin, we shouldn't have said this. It's impolite to question, but what we want to say is, is this a little too careful?"

Qin Yuan didn't say much, but said that everything was in accordance with the above tasks. When he said this, the other team members couldn't speak anymore, and they all began to wait silently.

In fact, the reason why he was so careful this time was that he had that uneasy feeling in his heart, especially after he entered this base, that kind of uneasy feeling became more intense, and it always made him feel as if there were still people around him who had been transformed. people.

The main reason is that the system has no way to scan this kind of transformed people, because they belong to the mechanical transformation, not the addition system.

So he wanted to be more careful, and didn't want to cause other right and wrong, but he couldn't tell the players about this feeling, mainly because there was no basis for it.

And he always feels that this organization is a bit familiar, especially in the way they handle things, and they are too cautious, including tunnel mines. It doesn't feel like they are guarding against ordinary people, but they are guarding against him. .

After two hours like this, the stall owner closed his stall and came out. It was getting late. Qin Yuan was squatting by the tree. When the stall owner saw him, he ran over and looked vigilantly. There was no one there. people come out.

"I didn't expect that you would actually wait for me here, but I think our purpose is the same. I am also very straightforward. I wonder if you want to assassinate Pito?"

Qin Yuan also followed his words, and then continued, "Yes, what do you mean, do you want to report on me?"

"Hehe, if I want to report you, I just have to drag you on the spot. I don't want to do that, because my purpose is the same as yours. I want to avenge my wife."

Unexpectedly, there was such an unexpected harvest from it. When Qin Yuan reached out to shake hands with him, he took the opportunity to directly invade his consciousness. The man didn't feel anything at all, he just felt that he was in a daze. Qin Yuan has already understood all the information in his mind.

I didn't expect this humble stall owner to hold such important clues. He also knew where the six people we met this morning were because he was in charge of monitoring the surrounding areas, so he could see them clearly.

Chapter 1818 The American Squad Encountered

And he can be very sure that there is a person who has not come out since he entered, because if he enters or exits this place, he will be strictly controlled.

Although it felt that those civilians were not restricted, the six people who came out were different. After all, those six people were foreigners. Once they came out, they would definitely attract attention.

When Qin Yuan released the control, the stall owner just felt dizzy, as if something had been spied on, but he couldn't describe the feeling.

"You're very good, and I agree with you, how do we proceed now?"

The stall owner was a little surprised when he heard this, what did he say just now? Why does he have no memory at all, what happened this day? Could it be that he was a little dazed because of this matter?

But soon he also realized that maybe he was really thinking too much. He also told Qin Yuan his plan. Now he has a very good understanding of your situation. The one he wants to assassinate is the boss of this armed organization.

Because the leader of this armed organization is constantly brainwashing them, apparently protecting them civilians. Of course, based on geography, if there is a woman or something he likes, it will definitely be his.

Just like this man's newly married wife, they have been childhood sweethearts since they were young, and they finally got to this point, but they didn't expect to be robbed and defiled by this armed boss, and the bride couldn't bear such humiliation, so she committed suicide that night.

Speaking of this, the stall owner's eye circles were slightly red, and it could be seen that he was indeed a very emotional person. Faced with this situation, he only wanted to avenge his beloved woman.

"Didn't these militants say to protect you? If so, isn't he afraid of being criticized by others or being snatched away by others?"

"Hehe, those who disagreed with him have long been secretly executed by him, and we civilians have no power, so we can only keep silent in order to protect ourselves in this situation, and we are often forced to do nothing. "

When he spoke, there was sadness in his eyes, and his family was destroyed in this way. The boss of the armed organization directly took his parents away in order to better threaten and control him.

Only then did he become the boss' eyeline. He was also responsible for monitoring everyone's every move when selling things here. He would report everyone who came here to buy things or came to the market.

Sometimes it's about pushing honest people to the extreme, and they will do extreme things. For example, when Qin Yuan came in now, he had already been noticed by the stall owner.

So the stall owner was taking a gamble. He felt that normal people would not observe those movements, and it was very likely that his purpose was the same.

The stall owner is very familiar with the internal situation, at least he has figured out most of the landmine situation, but the places he marked with question marks are really out of reach. The boss is very cunning and will not let them get in touch.

"These places are only when I go to deliver goods to them. I can pass the other side. It is really unclear, and the villagers only know half of them. Only the people inside them know the specific geographical location."

"Then what I want to know now is whether there are many ways for them to escape, and where exactly does this tunnel lead to?"

The man held the map and pointed in a direction. After entering the well, the tunnels below were complicated. He only entered once, and was sent back halfway through, because he was only responsible for delivering food.

The location of the specific passage is at the back door of the village. From there, there is a road that leads in all directions. It is also the best place to escape.

Qin Yuan took out his binoculars and looked in the direction he said. There were also guards over there, and there were a few jeeps parked beside them, which seemed to be ready at any time.

When the stall owner saw Qin Yuan taking out such professional equipment, he couldn't help but wonder, what is the identity of this person? There are things on him that cannot be seen in this place.

Just when he was about to ask a question, Qin Yuan asked about his plan. Unexpectedly, the stall owner was even crazier. His plan was to die together. He had already made a liquid bomb, and he would live and die with the boss in the future.

It seems that this is also a person who has been driven to a dead end. As long as this person leads the way, and he is very clear about the time when the two sides change guards, they can use this opportunity to rush in.

He wanted to find those six people directly. According to what this person had thought in his mind before, after entering here, he would be able to reach a courtyard through about three paths.

Those six people were in that yard, so Qin Yuan's goal was that one. Qin Yuan turned his head and explained to the team members. Everyone felt that this method was very feasible. Since the man had already made such a choice, he would be the one to do it. Attracting attention, the others quickly rushed to that courtyard.

After all, they were in completely opposite directions. The armed leader the man was looking for was not on this side, but in a place on the side.

When several people were discussing the plan, they only heard a burst of crackling gunshots from the other side of the village.

Everyone was taken aback, , especially the man just now, he looked over there in disbelief, and within a few minutes, the gunfire over there became more intense, and the wall on the left completely collapsed. The guards who were standing at the entrance of the village just now also ran in one after another.

How is this going? Taking advantage of this confusion, Qin Yuan and the others also rushed in. When they ran in, they bumped into a heavily armed team head-on. Unexpectedly, they were so unlucky, and the team in front was about to shoot. , Qin Yuan was not inferior, and immediately launched a counterattack.

Qin Yuan fired faster than them. The captain who had just led the way and the team members next to him were all knocked down. The scene became more chaotic for a while. At this time, the militants behind also started to fight back.

A grenade was thrown towards this side, and the surrounding wall was completely blown down, and those civilians also started running around, and the scene was very chaotic.

"I'm going! What's going on here? Why did they suddenly start fighting? Who are these people on the other side?"

"Er Niu, I said that you still have time to come here and say that you should not rush to fight back. Isn't this what you are good at?"

"Yan Bing, what you said is wrong, am I not developing in an obscene way? When I find a link point, I will beat his grandson."

The two were still chatting and laughing here, but just when they turned their heads and saw the flesh and blood lake where the stall owner who had followed them in had been blown up, several people shook their heads helplessly. In this case, these civilians have no chance at all.

Everyone found a bunker and began to look for opportunities to counterattack. Qin Yuan observed that the surrounding team hadn't caught up yet.

"Brother Qin, what the \*\*\*\* is going on? Why did an armed group suddenly appear?"
