

## Special Soldier 791

### Chapter 791 Biochemical Weapon Appears

Jin Xiong limped and ran out while clutching his injured leg. Qin Yuan quickly came to him and threw him back into the room after a shoulder fall.

He wants to torture one of these people slowly, and he doesn't intend to let it go. Where did Jin Xiong have been beaten like this before, rolling on the ground and screaming.

Jin Wei also ran out of the room upon hearing the sound, and saw Qin Yuan, shocked, how did this person find himself here?

At this time, the old Liu ran up and said in a panic that all the thugs arranged below them had been knocked down by Qin Yuan.

Jin Wei picked up the baseball bat next to him and waved it towards Qin Yuan. Qin Yuan shook his head. This person really thought too much. At this level, he still wanted to hit someone.

Qin Yuan kicked him aside, grabbed him by the collar and lifted him up, "I want to know who made the palm print on her face?"

Jin Wei was already very frightened at the moment, and kept shaking his head. Mu Qingmei inside said loudly, "It's him!"

Qin Yuan slapped Jin Wei directly with a slap. This slap was so powerful that half of Jin Wei's face instantly swelled. Then there was another slap. Jin Wei lay on the floor and kept begging for mercy.

He thought that this person was just a poor boy, but he didn't expect to be so powerful that he would solve all their thugs and still find this place. He should be no ordinary person.

Jin Xiong looked at his prodigal son even more viciously. He was really going to be killed by his own son sooner or later. He didn't know where to provoke this great god. Looking at his moves, he probably came from the military, such a person. , They can't afford it even more.

"I think you were arrogant before? Do you want me to call the police?"

Hearing the police, Jin Wei shook his head frantically. It seems that the father and son have other ulterior secrets. Otherwise, in this case, they would not call the police, and there are so many thugs in the family, and look at Jin Wei. Looks like, I don't know how many people have been harmed.

He kicked Jin Wei's stall, and Jin Wei howled on the ground in pain. This person repeatedly harassed Mu Qingmei. The most important thing was that he dared to kidnap directly this time, which was very damn.

Jin Xiong trembled and said, "Brother, please let us go, we know we are wrong, we have money, how much do you want? We can all give you!"

"Money is such a tacky thing, I mainly relieve my qi, do you understand? How about you father and son have a sparring, I am too lazy to do it!"

Qin Yuan ordered the father and son to slap each other face to face. The two of them are not good people anyway, so they should be treated for the people.

"Oh! It seems that you really can't beat people! Do you want me to teach you?"

The two of them were just playing, Qin Yuan slapped Jin Wei's face again, Jin Wei's face was completely swollen, and he gritted his teeth and slapped his dad on the face.

"Damn, you stinky boy, it's really the opposite, you really dare to beat you Lao Tzu!"

After Jin Xiong finished speaking, he slapped Jin Wei's face with a slap. Qin Yuan didn't expect that the father and son would get more and more fierce, and the slap from the beginning turned into a fist.

But he didn't want to watch such a big show. He walked out of the room holding Mu Qingmei, and kept whispering sorry, because he caused Mu Qingmei to become like this.

Mu Qingmei was like a wounded kitten at this moment, snuggling tightly in Qin Yuan's arms.

After Qin Yuan went downstairs, he reported to the police directly. He didn't want to participate too much. This father and son absolutely had an ulterior secret. Let the police investigate these things in detail. Just rely on the bad things done by the thugs he raised. Enough for him to investigate.

When Qin Yuan walked through the living room, he saw a report from the Jinxiong philanthropist on the table and threw the newspaper directly into the trash can beside him. I don't know how many people were harmed by this kind of rubbish, and the philanthropist is really too hypocritical.

In the next few days, Mu Qingmei Hospital took a leave of absence. After all, such a big thing happened. Qin Yuan played with him for a few days. An Ran had been frightened before, and it took a long time to recover. .

Unexpectedly, Mu Qingmei recovered relatively quickly. She had learned the capture technique with Qingyuan last time, and she felt that her capture was still too bad. Qin Yuan also let her, and was subdued by Mu Qingmei with a few moves.

Unexpectedly, Mu Qingmei sat up and pouted a small mouth, "You are really annoying, you can't let me. I have to practice grappling, specifically to clean up those perverts, or I don't want to practice grappling, I want to practice. Fight, teach me quickly!"

Qin Yuan felt funny and scratched her nose gently, "You don't need to practice fighting anymore. This time it is just an accident. I will protect you from now on. Don't worry!"

"You said, I blame you this time. I don't care. Anyway, I have to strengthen myself. If you don't teach, I will find a way."

It's not that Qin Yuan didn't teach her, but these basic fighting training. Mu Qingmei had actually done it before, but if she wanted to be strengthened, she had to undergo a complete system training. This kind of suffering must be something she would eat. Not coming down.

And he will definitely not let this happen again in the future, and he won't hurt his important people again.

Within two days, the news of the collapse of the Jin Group began to be reported on TV, and the reports were accompanied by the corruption and bribery of the Jin Group, embezzlement of public funds, and training thugs for many illegal activities.

And many college students have also stepped up to expose the true face of Jin Xiong, a pseudo-philanthropist, with a total of more than 20 charges.

This time the matter was solved without any risk. Mu Qingmei also started to work normally. Gao Shiwei called to ask Qin Yuan to go back, and the task was dispatched.

It had been a long time since Qin Yuan had no task, and Qin Yuan was going to be moldy. He said goodbye to Mu Qingmei and explained her some precautions before returning to the military area quickly.

Unexpectedly, it was the peacekeeping force this time, but not where they went last time, but a request sent by a small city on F State. Normally, their peacekeeping force would not conflict with the local armed forces.

This time the incident happened suddenly. Those militants took the initiative to attack and wounded many peacekeepers. This is also the first time that there has been a large number of casualties among peacekeepers in the world.

These militants blatantly wanted to provoke international provocations and confronted them. Those peacekeepers and local armed forces had violent clashes, but they did not expect that the militants hijacked some civilians.

Taking advantage of these civilians, they retreated into the primeval forest to take refuge. These people killed so many Duowei and fighters, and they certainly couldn't let them go in this way. Therefore, the mission sent from the world requested a small team to lead the battle.

Yan Guo resolutely took on this task. After all, in this conflict, Yan Guo had three peacekeepers and sacrificed for it. One peacekeeper was seriously injured.

Gao Shiwei asked Qin Yuan to go this time. One was to destroy those militants, save local civilians, and most importantly, bring back the ashes of the local peacekeepers. They are all martyrs and heroes of the Yan country.

"You must complete the task and eliminate those militants!"

Qin Yuan had close contact with the peacekeepers before, and he even knew that they were not easy. They were stationed abroad almost all the year round. It was really sad for him to die abroad. He wanted to bring all these brothers back.

There are also those damned militants. Qin Yuan talked about the situation with He Chenguang and others on the plane. Everyone was enthusiastic and vowed to eliminate all those militants.

In this way, Qin Yuan and the others came to the land of F continent. The small town where the peacekeepers were located had no airfield. They could only stop in their city center and drove to that place later.

At this time, Qin Yuan and the others knew how barren the land was. The poorer the land, the more war broke out. There were refugees everywhere. Children in tattered clothes were lying on the street, and old people who had died sitting on the side of the road.

This place is full of deaths, and Qin Yuan shook his head. The situation here is worse than any place he has been to before. It is their city center at any rate. The situation in the city center is so bad, not to mention the area where they are located.

The common people did not see the signs on the vehicles, and even saw the soldiers with guns in the military vehicles all lying on the ground, raising their hands in a gesture of surrender.

The journey here is very far away. It can even be said that some sections of the road have been destroyed by war, and the roads that have been destroyed are not counted as roads. Aircraft missiles and bomb craters are everywhere, especially on highways, and bridges have also been broken.

Qin Yuan and the others had no choice but to detour. When they arrived at that place, the sky was already completely dark.

Because there has just been a war before, all the civilians and these peacekeepers now live together, and peacekeepers from several countries have sent teams to patrol.

The captain of Yan Guo's team is called Li Yunfei. He is from the Northeast and his character is relatively bold. He is also very sad at the moment because of the three comrades sacrificed by the team.

"Captain Qin, I have heard of your reputation before when I was in the army. You are the ace of the trump cards. I hope you will avenge our dead brothers!"

"Don't worry, I will give my brothers an explanation!"

Li Yunfei and Qin Yuan introduced the situation of those militants. There are about 40 militants, and they are indeed superior in number. The main reason for their fiasco this time is that these militants used biological and chemical weapons.

what? biochemical weapon!

This is forbidden internationally, they dare to use biological and chemical weapons openly! No wonder the international requirement for this mission is that it must be killed. After all, everyone has a consistent attitude towards biological and chemical weapons, and they firmly cannot tolerate it.

As Li Yunfei said, he took Qin Yuan and the others into the tent. Before entering the tent, he asked Qin Yuan and the others to put on chemical protective clothing, and took out two masks to explain that everyone should wear more protection carefully.

After entering the tent, the inside of the tent was even more horrible. Seven or eight people lay in the small tent. These people were infected by biochemical weapons. They had pustules of various sizes. Some people's pustules were ruptured and their wounds were infected. Liquid is being poured beside it.

The most terrifying thing is that there are several serious cases that have undergone mutations. The head is very swollen, the blood vessels and nerves on the scalp can be clearly seen, and some are swollen and high belly. Makes scalp numb.

These people are civilians, old and young. The damage caused by these biochemical weapons is irreversible, and they have no way to treat them. They can only relieve their pain to a certain extent. If the wound is broken, take medicine, and fight if it is too painful. Analgesic needles.

But there is no way to remedy those injuries. To put it bluntly, these civilians can only wait to die.

Li Yunfei said with emotion: "These injured are local civilians. Those militants dropped biochemical weapons directly into the village. We rescued these people. The first group of people in the village who were infected has died. Up."

Li Yunfei was still quite fortunate that there were no soldiers injured in Yan Nation. The most hateful thing was those militants who even attacked unarmed civilians.

After Li Yunfei introduced the situation, he took out a map. After their confrontation, the militants were left with more than 20 people. They fled frantically and also hijacked 9 civilians, and then went through the virgin forest behind. One was worried about them. There are biological and chemical weapons on the site, and the virgin forest is relatively large, so they did not rush into it.

Qin Yuan felt a little strange. Since it is a primeval forest, where does the map come from?

"There are several primitive tribes living in this virgin forest' they went in before doing academic research. If you encounter these tribes, try to avoid them!"

"Is there anything to say about this? I don't see it on the map."

"Because this map is a crude version, we can only find this. According to the scholars who entered, the tribes in it are primitive cannibal tribes, and they will also hunt humans, so you must be careful!"

"What, cannibal tribe, it's okay, we have guns, and they will come up and give them a shuttle when that time comes!" Li Erniu said in a naive way.

Qin Yuan gave him a white look. In this case, he still didn't want to conflict with those primitive tribes. After all, they belonged to the intruders. They were originally people's territory. If they are living well, you suddenly broke in and disturbed them. It must attack you.

Without further ado, they decided to set off that night. Li Yunfei suggested that they set off at dawn the next morning. It is not easy to move in this virgin forest at night, and there are many dangerous wild animals.

"No, we must act fast. I am worried that those militants who escaped the primeval forest with biological and chemical weapons will be more troublesome, and it will be more difficult to find them later."

"Captain Li, don't worry, these things are commonplace for us, and running at night is not a big problem for us!"

Li Yunfei thought for a while, planning to lead his team into the virgin forest with Qin Yuan. Qin Yuan declined his kindness. The red blood cell team has undergone special training and there is no problem in the virgin forest. To be honest, he does I don't want to consider other things during the battle.

## Chapter 792 Entering the Aboriginal Tribe

Li Yunfei is a refreshing person. He saw Qin Yuan's worries, "Captain Qin, don't worry, this person will never hold you back. I'm just worried that those people are holding biochemical weapons, and many of us have more strength! "

Qin Yuan knew that if he said it too bluntly, it would hurt his self-esteem, so he changed his way of speaking.

"Captain Li, I know your kindness, but the most important thing now is that these militants don't know if they will run out of other entrances. Then you have to be the last guarantee here. If we all go in and get back from the enemy, then compare It's dangerous!"

Li Yunfei thought for a while. This is indeed the truth, and once again asked Qin Yuan and the others to pay attention to safety. He didn't want these brothers to have an accident.

Qin Yuan is not afraid of biological and chemical weapons. He was immune to bacterial and biological weapons before, mainly because he was worried about other members of the red blood cell team.

And when he was dealing with Basad before, he absorbed his bacterial weapons. Now he has a protective film on his body. This kind of biological and chemical weapons should not be able to hurt him.

The rest of the red blood cell team put on night vision goggles, and they rushed through the jungle quickly. Those militants took hostages. Although they would disguise, the hostages could not.

So their course of action is very obvious. This kind of jungle is a primitive jungle, with almost no roads, only trails stepped by some animals.

Looking at the trajectory of these people, Qin Yuan felt that the biggest threat to this group of people was only biochemical weapons. Their abilities were really too poor, and there was no basic direction to distinguish them. They all belonged to random chaos.

This primitive jungle is indeed very large, and the group of militants set off in the morning, and Qin Yuan and the others only came in at night, and they would have a certain distance. In this way, everyone continued to track for another half an hour.

Qin Yuan saw that there seemed to be someone in front of him and made a gesture to remind everyone to be vigilant. He moved quickly and found that it was a corpse.

This dress should belong to that group of militants, with an assault rifle hanging on his shoulders, but why did this militant die here?

Qin Yuan asked everyone to check the surroundings first. In this case, everyone could only turn on the flashlight. Under the illumination of the flashlight, they discovered that there were very messy footsteps around. There should have been fierce fighting and the surrounding bushes were overwhelmed.

There were bullet shells everywhere, and Qin Yuan turned the militant over, only to find that the militant had an arrow in his chest, and corrosion had occurred around the wound.

It seemed that this was a poisonous arrow. After he pulled it out, the arrow was not made of iron, but made of sharp bamboo. This primitive weapon seemed to be a local indigenous tribe.

Before, Li Yunfei told him that the indigenous tribes here are all cannibals, so why did they leave this militant here alone, because for them, this is food.

These militants were attacked by the indigenous tribes here, but these militants had guns in their hands. They should have successfully confronted and escaped.

He Chenguang squatted down and looked at the militant in front of him carefully. The militant had tattoos on his chest and face, and he looked densely packed.

Qin Yuan suddenly thought that he seemed to have read in a book that these natives believed in gods very much because of backwardness, and this person had tattoos on his body. Could this be the reason? Those natives did not drag him away.

The earth arrows made of this kind of bamboo pieces do not have much damage power. The most damage power is the venom on the arrow. These indigenous people on the Internet will not go out. After all, there are more beasts outside, and they still follow the rules of the jungle.

So at present, Qin Yuan and the others are safe. I hope they will follow the trail for a while, and when they reach the open area ahead, they find that the footprints here are more chaotic. From this look, it seems that everyone has run away.

What is the situation? Seeing the footsteps lead in all directions, should they also pursue them separately?

Li Erniu put forward his own opinions. He felt that the two were pursued separately as a team, anyway, their individual combat capabilities were good.

Qin Yuan immediately rejected this idea. The biggest threat to the hottest militants is biochemical weapons. After all, biochemical weapons are prohibited in the world, and they have not been trained in this area.

The most important thing is that they are not wearing chemical protective clothing. If they are attacked by biological and chemical weapons, they will have to wait for death just like the local civilians.

Qin Yuan thought for a while, it was time to let the Erniu mouse come out to move, he let everyone rest in place first, taking advantage of this gap, he let the mouse out.

"You are in this kind of jungle, can you summon others of the same kind?"

Er Niu Mouse nodded desperately.

"Yes! Then you call out the same kind, search for these footprints separately, you will be my vision in front."

After getting the order, Er Niu Mouse quickly set off. After a while, the sound of brushing came to mind.

Everyone got up vigilantly, only Qin Yuan knew that this was the Erniu rat summoning other similar species, and those rats act together.

With these mice, it saves a lot of effort. The temperature in this jungle is very low and humid. At this temperature, there are even mosquitoes.

The rest was almost the same, the Erniu Mouse ran very far, it was tracking towards the place with the most footprints, and Qin Yuan also led the team to keep up.

After a while, through the mouse's vision, he saw seven or eight people living in front of a pile of fire sitting around the fire and sleeping, and it seemed that the militants were not civilians.

The Er Niu Mouse ran very fast. Qin Yuan estimated that it was about four to five kilometers long, and he took a closer look. There were no biochemical weapons around these people.

Insert one sentence, [\Mic\Mic\Reading\app\\] It's really good, it's worth installing, even Android and iPhone support!

It seems that at the intersection just now, they should have had another war with the local natives, because there are several tribes here, and everyone has escaped. This is one of them.

Since there is no biological weapon, then take the opportunity to destroy them all.

"Brother Qin, are you running too fast? We can't see the trace!"

Qin Yuan took out a reflective strip and stuck it on his back, "Don't worry, you just follow me, don't let it go, I have traced the smell of the group!"

In this way, everyone worked hard to keep up with Qin Yuan's footsteps. When they were about to get closer, Qin Yuan signaled everyone to lower their voices and pointed to the flames ahead.

I go! Qin Yuan really found such a large virgin forest, and Li Erniu quietly gave a thumbs up. As expected, it is Brother Qin, who has always been so powerful.

"Remember, one will be left alive later, and all others will be killed! All cold weapons are used and no shooting is allowed!"

Qin Yuan was still more cautious. He didn't want to disturb the natives at night. After all, he must be very familiar with the natives of the terrain, and he didn't want to confront the natives.

Qin Yuan just finished talking, everyone started to take action. He took the lead in using the Throwing Knife skill to kill the two outermost people. It was easy to escape there. He didn't want everyone to track down in the virgin forest at night, it would be easy to walk. Disperse, so first cut off their escape route.

He Chenguang and the others rushed forward and killed them with a saber. A few militants just woke up and were thrown out by Qin Yuan to solve them.

At this time, only one person was left. The militant pulled off his clothes, took out a grenade, and tremblingly said: "Don't come here, or I will sound the grenade, and everyone will die together!"

After Qin Yuan took a look, he thought of a strategy. This militant looked very young. According to his gun gesture, he should be a novice.

Qin Yuan didn't have it at all, fearing that he would approach step by step, he was cruel, gritted his teeth and pulled the string of the thunder away, holding it tightly in his hand, his hands trembling.

He closed his eyes and waited for the explosion of the grenade, but after three seconds passed, the grenade still did not explode, and Qin Yuan had already walked to him.

He was very puzzled, could this be a dud? No, he was so unlucky that he got a dud as soon as he got it.

Qin Yuan took off the grenade in his hand and placed it gently on the ground, "Shhhh, don't make any movements!"

Then a standard grappling hand over the shoulder was to directly press the militant to the ground.

The explosive power of this kind of grenade is very strong, so the designer made a special device for safety reasons, that is, this kind of grenade needs to be knocked once after the string is pulled, and then thrown out to explode.

Seeing that his cards were gone, the militant was so scared that he hugged his head and begged for mercy. After Qin Yuan's persecution, he said that they were indeed separated after being attacked by the indigenous people.

The other group of people fled with biological and chemical weapons, which they used to save their lives. He originally wanted to follow that group, but did not catch up.

And in his description, those indigenous people are very scary.

"I said, why are you kidding me like that? Anyway, you are militants. Can you look a little armed? Is the gun in your hand a fire stick?"

"No! You don't understand! The aboriginal people are very fast, we can't aim at all, I even suspect that they are not human! We already have six or seven brothers who died in their hands!"

"Then all of your people died in the hands of these natives. Are those hostages taken away by those with biological and chemical weapons?"

When asked about this, the militant's eyes were a little dodge, and he didn't speak any more. Qin Yuan kicked him on the back before he slowly said that they were so busy running away that they couldn't take care of the hostages and characters. It was taken as prey and taken back by the local natives.

At this time, Er Niu Mouse sent new information, but still did not find the few people with biological weapons, but found an aboriginal tribe with some civilians \*\*\*\*\* in a small house.

After Qin Yuan heard the militants finished speaking, he was dealt with in one stroke. For these people, there was no need to be merciful.

Previously, his primary goal was to deal with those with biological and chemical weapons, but now it seems that it is more important to save the civilians first. After saving these civilians, he can let Li

Erniu and the others take the civilians out first, and he will go alone. Deal with the few people with biological and chemical weapons.

This way everyone is not in danger. He can act better alone. The most important thing is that he feels that this biochemical weapon is definitely not simple. After all, in this remote small city, according to the material situation of these people, they simply don't have the financial resources to develop the weapon. .

You have to investigate the background carefully. These militants are probably just being used as guns.

Taking advantage of the dark night to rescue those civilians, this was the best opportunity. Everyone believed in Qin Yuan very much and followed him along the way. The most important thing now was speed, and it was difficult to handle it at dawn.

When they rushed to the tribe, they squatted around and looked around. The civilians were locked in a wooden fence like cattle. There were two guards outside. These people were wearing animal clothing but were already asleep.

This tribe is surrounded by a circle of thorns, there are some simple wooden fences, and a raging fire burning in the middle. These things should be used to prevent large beasts.

Qin Yuan led everyone to move quietly and opened a wooden fence. After they entered, they saw some clothes and bones left on the south side of the road. From this look, they were all militants during the day.

These militants were really eaten by them. Passing by the fire, there were some clay pots beside them when they were talking. Li Erniu glanced curiously and almost threw up.

They are all leftover meat, Cannibals like com are really terrifying, and Li Erniu thinks he might not want to eat meat for the next week.

Unexpectedly, when Qin Yuan and the others were about to approach the civilians, torches were lit up in an instant, and the indigenous people rushed out of the tent, holding the torches and banging on the drum next to them and shouting.

I go! There was no movement at all from these natives, which surprised Qin Yuan very much. His hearing and agility, but world-class, didn't even notice these special circumstances.

Li Erniu quickly picked up the gun and aimed at the indigenous people, he didn't want to be the food in these people's jars.

Qin Yuan tried to listen for a while, and he could understand it. These 6,000 languages are really not covered, and this skill has really grown.

Next, a man with an animal skin cap and various decorations came out and said a lot. The natives took up poison arrows and prepared to launch them.

At this time Qin Yuan suddenly raised his hand and said loudly, "Don't do it, we are our own!"

And this sentence was also babbled in Li Erniu's ears, and it was exactly the same as these indigenous words.

Li Erniu looked at Qin Yuan in shock. He said before that he knew the local language, just because he checked the local dictionary, but how did these natives explain?

And what Qin Yuan said seemed to be really useful, because the leader had already made a pause gesture towards the person next to him.

"Who are you? How can we speak the language of our tribe!"

Qin Yuan thought for a while, but he had to fudge these people. He looked at the totems around the tribe. The animal looked very like an elephant.

Chapter 793 Pet mouse lost contact

Combined with what Li Yunfei said before, it seems that these tribes all have their own beliefs. Could it be that what they believe in in this tribe is elephants?

He thought for a moment, pointed to the jungle behind and said, "Because I am sent by the idol to save you!"

The leader of the tribe was a little skeptical. This person knew the language of his own tribe. In this primeval forest, there were three tribes with different languages. their totems.

However, this leader is still a bit smart. He looked around and wondered if it might be this person, guessing based on the pattern on the drum.

"But you are dressed in the same clothes as those intruders before. How could you be sent by the idol? I hate cheating the most. I am the head of this tribe. If you deceive me, our tribe will eat you alive Festival!"

Li Erniu and the others didn't understand what they were talking about, but seeing the chattering of the tribal leader getting more and more excited, it seemed that the conversation had broken down, so he opened the insurance.

Qin Yuan stopped him from the side, "Don't conflict with these tribes, they are also innocent, just the aborigines here!"

Li Erniu nodded, and Qin Yuan felt that the most important thing was that the enemies with biochemical weapons could disappear out of thin air. The same kind sent by Erniu and Mouse have not found their traces until now.

Moreover, the few people who got the biochemical weapons were orderly based on the line of sight provided by the mouse, and they didn't choose to escape in a panic. He had a bold guess in his heart that there might be a biochemical weapon base in this primeval forest.

If so, it would be terrible, but they are not familiar with the terrain of this forest at all, and the map they got is just a rough draft, just a draft, with a few points drawn, mainly marking the main points of several tribes. location, and nothing else.

So he wondered if he could find a breakthrough from these aborigines. After all, they had been living in the jungle and were very familiar with the environment in the jungle. They would be able to detect any foreign intruders.

Qin Yuan took two steps forward, and the tribal leader immediately signaled everyone to shoot poisonous arrows at him.

"Don't get excited, I just want to prove to you that I am the messenger sent by the idol."

The tribal leader was a little puzzled, but he still chose to see how he would prove it next? After all, the idol is something they cannot desecrate. If this person deceives him, then he and those people will all die without a burial.

Qin Yuan just felt that these aborigines really didn't have much contact, and the outside world was really naive and easy to deceive.

There is a big tree with a thick waist in the middle of this tribe. Qin Yuan has world-class armor mite power. He hopes that he can still bet right this time. It seems that his luck has always been good when he got the skill of the king of thousands of kings before.

Since these people worship elephants, and the biggest advantage of elephants is their absolute strength, the tree in front of them is the best proof for themselves.

He bent down and made a tree pulling motion.

This time, not only the aborigines, but even He Chenguang and the others were a little shocked. This tree is not a dead tree, and the dead tree must be relatively better. The roots of the tree are intertwined.

No matter how strong Qin Yuan is, how can the strength of an adult resist him?

Everyone was staring at Qin Yuan closely. He took a deep breath and concentrated all his strength on his waist and arms. Originally, he thought he would use a lot of force to swipe, and the big tree connected to the tree. The roots, carrying a lot of soil, were just pulled up by him.

Instead, he was forced too hard by himself and almost fell to the ground. I will go, and I will be ashamed if I fall. I thought it would be so difficult to pull it out. Didn't I expect it to be so easy?

The aborigines next to him were completely shocked, and He Chenguang and the others next to him were also shocked, this! ! It's too exaggerated!

"Brother Qin, when did you secretly carry out training behind our backs? You pulled up such a thick tree!"

Unexpectedly, Qin Yuan just smiled and said to them: "I was bored a while ago, so I practiced weightlifting. I didn't expect it to be quite effective."

Is it really that simple?

Maybe they are completely different from Qin Yuan's weightlifting.

At this time, the tribal leader immediately put down his weapon, knelt on the ground and worshiped Qin Yuan, and the surrounding local residents also immediately kowtowed to Qin Yuan.

"It turned out to be true. He is really a messenger sent by the idol, and his power has been passed down by the idol!"

Those aborigines kowtowed their heads and then yelled, which represented a kind of welcome to Qin Yuan.

Let me go, this is too majestic, Li Erniu is very envious, although they don't understand, but looking at the actions of these natives, they regard Qin Yuan as a god.

"Brother Qin, I didn't expect you to have such a hand. It seems that your ability to fool people has improved again."

"You brat, do you know how to talk properly? What are you talking about? I'm telling them the truth and reasoning with them. It's just that these aborigines are too enthusiastic."

Li Erniu and the others have black lines on their faces, presenting the facts and reasoning? It's really bullying them because they don't understand the native language, but the current situation has indeed eased. Qin Yuan's method is also better. After all, when it comes to combat effectiveness, these native residents are indeed not their opponents.

But think about it in another way, these aborigines are innocent in the first place, this is where they live, if outsiders break into this place, they will definitely fight back, and they can't identify good people, as long as bad people break into this place, they will definitely be wiped out in one fell swoop .

Qin Yuan was a little embarrassed for a moment. This situation made him look like a cult organization, but this is the tradition of the family, and the drama that should be performed must continue to be performed.

The tribal leader kowtowed and said, "Respected God Envoy, please forgive us for our rudeness, and don't use mana to punish us. If you want to punish, punish me alone, and don't hurt the people of the tribe."

Qin Yuan did not expect that this tribal leader is quite responsible. This tribal leader is much better than some leaders outside. This spirit is really noble, but it also shows that this place has not been completely disturbed by the outside world. Did not bring in.

Qin Yuan walked up with his hands behind his back, and helped the tribal leader up, "The idol is tolerant, and I am the same, and I will not blame you."

Qin Yuan now has to find a way to rescue these civilians first. This primeval jungle is really huge. He plans to stay alone and let Li Erniu and the others take the civilians back to the peacekeeping base first.

Li Erniu and the others only saw what Qin Yuan was chattering with the tribal leader, and the tribal leader already respected Qin Yuan very much. With a wave of his hand, the people next to him stepped forward to open the gate and let the civilians go. come out.

That's awesome, it's such a quick deal! Li Erniu jokingly wanted Qin Yuan to talk to the tribal leader again, so that they could have financial and trade exchanges in the future, just because they wanted to provide domestic mustard instant noodles or something.

Qin Yuan rolled his eyes at him and told him not to talk nonsense, then he came over and explained to everyone, he asked He Chenguang and the others to lead the team, and these civilians escorted them back first.

He planned to stay in this tribe to investigate the matter of biological and chemical weapons. He always felt that this matter was not that simple.

He just proposed it, but he was opposed by everyone, "No, Brother Qin, this is a tribe of cannibals. You see, you have a good relationship with them now, but these people may give you medicine at some time in the middle of the night, and you will be dizzy for a long time." How about unloading eight yuan?"

Qin Yuan kicked He Chenguang's ass, "Can't you just wait for me to order something? The main thing now is to take these civilians out. As for me, don't worry about it. If there are biochemical weapons Message, I will send a signal to you."

"Before we said that good brothers broke in together, we can send these poor people back to each other, and then come back to investigate the biological and chemical weapons. Anyway, we can't leave you here alone."

"Aren't you listening to my orders now? You didn't listen to me at all. We came out mainly to rescue missions. I'm sure I know my own strength."

The civilians saw that they were arguing, but they didn't dare to say anything, for fear that the soldiers would leave them behind.

He Chenguang looked at some civilians and sighed, forget it, let's take these civilians back first, and now is really not the time to talk about this.

Watching He Chenguang, they took the civilians out, Qin Yuan also breathed a sigh of relief, at least he had completed one item, otherwise it would be very burdensome to bring so many people, especially these civilians.

Qin Yuan also has his own plan. If there is a biochemical experiment base in this primeval forest, then he can use his physique to destroy it for safety first, and then let He Chenguang and the others finish it.

As for the residents of these primitive tribes they said, they don't have so much thoughtfulness, and the people here still maintain a very simple folk custom, just like they just showed their hand just now, they believed it was true and called themselves a true god.

Even if there are other unexpected situations, those poisons with my constitution can't help me.

The most important thing now is that Erniu Mouse didn't know what was going on, and suddenly cut off contact with him, because he mainly paid attention to this side just now, and this situation usually doesn't happen!

Qin Yuan thought about it. When he was communicating with the tribe leader just now, the second-rate mouse saw an ordinary bush, and suddenly lost his vision.

Now he tries to call the mouse back, but there is no response from the mouse, what's going on? Is the mouse out of control at a long distance?

"System, what's the situation?"

"Answer the host, you can click on the pet's basic situation to view it. If the pet's blood bar turns gray, it means the pet has lost its life. If the blood bar is still red, it just means that the pet is locked up somewhere and temporarily cut off its life." Got in touch!"

Qin Yuan felt that something was wrong, if the connection was cut off, then her four would not be hindered, she quickly clicked on the health bar, and checked that the blood bar had turned gray.

I'm going, who actually killed his pet mouse! This mouse is not ordinary, because after its upgrade training, the speed and strength of this mouse have been improved. The general snakes are not his opponents. As for the ones in the sky, let alone the eagles in the jungle, they can't fly down. !

Qin Yuan clicked on the system and checked the final field of vision map. He planned to go to this place to have a look later. Who killed his mouse? No wonder he couldn't see anything in the end, because the boss who controlled the other mice was dead, so those mice couldn't be manipulated, and they all disbanded.

At this time, Qin Yuan's actions looked a little strange to the tribal leader, because he seemed to be emptying himself, and the tribal leader suddenly understood, could it be that the messenger was communicating with the idol?

Therefore, all the people in the tribe were quiet, and everyone dared not show their anger, and stared at Qin Yuan closely.

Qin Yuan withdrew from the system and saw that everyone around him was staring at him, only then did he realize that he had indeed been idle for a long time.

Relieving the embarrassment, he said: "Don't worry, I have already communicated with the gods. Your tribe will definitely have a smooth sailing this year, and more lives will be born!"

The reason why Qin Yuan said this is because he observed that there are about 40 people in this tribe, but there are only two or three pregnant women. Looking at their swollen bellies, and those pregnant women are placed in the innermost protected in a hut.

This shows that this tribe is very short of new life, and is very eager for the arrival of new life. After all, the expansion of the tribe is inseparable from reproduction.

Qin Yuan planned to ask about the biochemical base first, "Have you seen people wearing strange clothes recently?"

The tribal leader pointed to Qin Yuan and the people who had just been let go, "They are all wearing strange clothes!"

Qin Yuan was in a dilemma for a while, how should he communicate? After all, the term "experimental base" is very unfamiliar to this kind of tribe, and they don't understand it either.

Qin Yuan talked with comparisons, but the tribal leader really didn't understand what he meant, because in his eyes, they were all intruders and outsiders.

"No, then, have you ever seen that kind of person who is very tightly wrapped and whose face cannot be seen?"

At this time, an aborigine in the tribe rushed out and said excitedly that he had seen such a person.

But it is very, very far away from their tribe, and he also encountered it by chance when he was hunting before. In his description, those people are very evil.

"There is no prey there, and there are many dead animals around. I smell the smell of death, so I dare not approach!"

Qin Yuan was shocked when he heard this place, it must be that place, where his mouse suddenly lost contact, Qin Yuan originally planned to ask this native resident to take him there to check.

The aborigine pointed to the outside, "It's very dangerous now that the sun is setting. Let's go when the sun comes out."

#### Chapter 794 Finding the Biochemical Weapons Base

It was only then that Qin Yuan noticed that it was actually still dark, and it was only midnight. He had thermal imaging vision, so he didn't have much sense of day and night.

But these natives are different. They are very awed by the night. After all, there will be many wild animals in the dark, and the jungle is also the most dangerous.

The tribal leader asked suspiciously: "Shenshi, why did you go to that dangerous place?"

It turned out that apart from the strange situation that the aborigine saw, there was also this primitive forest. There were originally three aboriginal tribes, but at present only one of them exists, and the other two tribes have disappeared inexplicably.

Moreover, there is no living person in the whole tribe, so this tribe is also very nervous. When they encounter outsiders, they will take the initiative to attack. In the past, when food was scarce, they would still go hunting at night, but now they dare not go out.

They always felt that this was a punishment from the gods, because they did not obey the rules of nature, so the whole tribe was taken away by the gods.

Qin Yuan thought it was a bit funny, but after all, they had no access to orthodox education, and within the scope of their cognition, if all the people in a tribe disappeared out of thin air, only God could do that.

Qin Yuan understood somewhat. If there really was a biochemical weapon base here, it is estimated that the aborigines of those primitive tribes had already been taken away by those people to do biochemical experiments.

These chemical weapons are all to be tested on the human body. I am in this primeval forest. If these indigenous people suddenly disappear, no one will find out. In addition, this environment is a natural barrier, which is also a good thing for them. cover.

Qin Yuan smiled and said: "Because I am the emissary sent by the idol to protect your safety. If there is such a risk factor, I will deal with it first!"

Just as Qin Yuan finished speaking, the tribal leader clapped his mouth with those natives and let out a cry.

"Thanks to the great envoy of God!"

If Qin Yuan hadn't experienced it himself, he might have felt that this was just like filming a TV series.

These natives also specially prepared a separate house for her to live in, covered with thick leaves and mats woven from grass.

They let Qin Yuan take a good rest first, and they will take him to find that place at dawn. He will go to see what kind of animals are there tomorrow. People of all ages and sexes have experimented with them, which is really inhumane.

When the sun rises, drums sound outside. These aborigines yearn for the sun very much, and every day the sun rises and they will play drums to welcome it.

Qin Yuan even thinks that this kind of life is quite good, without the secular disputes outside, but here needs to fight against the harsh natural conditions, otherwise it is really a paradise.

Yesterday the native was already standing at the door waiting for Qin Yuan, and the two set off together. The tribe leader originally wanted to send the strongest man in the tribe to go with Qin Yuan, but he refused.

Along the way, Qin Yuan finally understood why those militants said that these aborigines were terrifying. His own speed was world-class, and his endurance was also very good. He would not get tired at all. Most people rarely catch up with him. of.

Unexpectedly, the aborigine not only ran very fast, but also had a very good jumping ability. Qin Yuan didn't know how they could tell the direction, and they didn't have a map. This person took Qin Yuan to the jungle all the time based on the direction he remembered. Shuttle inside.

Qin Yuan clicked on Er Niushu's last route view yesterday, which is the same as the path taken by this aborigine. If this situation is followed, the front is almost there.

At this moment, Qin Yuan heard slight footsteps coming from the side, and immediately stopped, the native running beside him.

This aborigine has lived in the jungle for a long time, and he is also aware of the dangerous atmosphere. He said in shock: "No, Shenshi, we have encountered a black panther! We can't run with the speed of the black panther! But don't worry, I To attract it, you just go where you want to go."

After Qin Yuan heard about it, he didn't know what this native thought, and he didn't have any beliefs. It might be a kind of responsibility to the tribe and awe of the gods, but he was willing to die.

At this time, Qin Yuan quickly rushed into the bushes. He had already locked the prey, which was an adult black panther. Qin Yuan was faster than the black panther, and grabbed the panther by the tail. Now he needs to make a quick decision. , after all, she has more important things to do.

He lifted up the hundred-jin black panther and smashed it against the opposite tree.

The black panther, who was still vicious just now, froze in an instant. The person in front of him was not something he could provoke at all. He was just about to run away, but he was already in front of him before he could catch him. Qin Yuan punched the black panther on the top of the head.

The black panther screamed and fell to the ground dead!

Qin Yuan mentioned the black panther, walked up to the native, and threw the panther to him.

The native was completely stunned, is this the power of life? It is too strong! They usually have no way to deal with the whole team of black panthers, and they have to cooperate with the trap to escape temporarily.

Looking at the admiring eyes of the natives, Qin Yuan asked, "Can you afford this black panther? It will be enough for you to eat when you bring it back to the tribe!"

The native nodded frantically, even if he couldn't carry it, he would drag this food back. This is a reward from Lord Shenshi.

After coming here, Qin Yuan also knew the way, because Er Niumo still had the last vision, so he asked the aborigine to take the black panther back first, and leave the rest to him.

The native didn't have any doubts, he believed in Lord Shenshi's strength, and dragged the panther away quickly.

Ahead is the place where the Erniu Mouse's signal disappeared. Qin Yuan also slowed down his pace, so he had to be more careful. After all, the mouse was trained by him, and it was able to kill in an instant, which showed that there was a danger here that should not be underestimated.

Only when he was in front of him did Qin Yuan know what the smell of death is. With a tree as the center, there is an open space next to it, where no grass grows. There are dead animals around these plants.

There was a circle of these animals, all of whom seemed to have fallen dead as soon as they approached the place.

Qin Yuan also saw his own mouse, and he would definitely avenge it. If he dared to kill my pet, who would it be?

Qin Yuan could already smell the strong chemical smell around him. Could it be that there are biochemical weapons here? Seeing that these animals were all killed instantly, it shows that the poisonous gas is really very strong, and it should undoubtedly be a biochemical weapon.

Qin Yuan raised his head and looked around. Looking at it, he felt that the tree in front of him was a little abnormal, because there were no bare plants around it, and even the soil had changed.

But this tree was extremely lush. Because of Qin Yuan's physique, he didn't have any uncomfortable symptoms. He strode forward and touched the big tree at close range, only to realize that it was a fake tree at all.

It was like a switch, he kicked the root of the tree casually, unexpectedly a big hole opened in the trunk in the middle, and a capsule-shaped object appeared in front of him, the capsule-shaped object was placed on the middle of the trunk.

That smell came from this capsule. Qin Yuan reached out to touch the capsule, only to find that there was a protective film on his body, and then he remembered that when he recovered the bacterial weapon before, the gas of the bacterial weapon was in his body. A protective film is formed around it, which cannot be penetrated by ordinary poisonous gas.

Qin Yuan directly reached out and took down the capsule. He wanted to recycle this kind of good thing.

He put the capsule in the system grid.

"Ding! Congratulations to the host for successfully recovering the third-level biochemical weapon! The system is synthesizing skills, and the host can make a choice."

"1. World-class biochemical serum, get super defense skills!"

"2. World-class detoxification skills, everything can be detoxified!"

"3. World-class infection skills, becoming a pathogenic mother and infecting wildly!"

Qin Yuan was very speechless, and this infection skill was also used when he recovered the bacterial weapon before. This forced him to go on the road of crime!

Fortunately, I am a good young man with good roots, and I don't even bother with this kind of shameless ability.

System: "Don't make yourself so great!"

"To shut up!"

"System, let me choose the second detoxification skill! After all, I already have defense power."

This detoxification skill should be good, after all, it is synthesized by biochemical weapons, and if he catches up in time, he might be able to rescue those civilians outside who were infected by biochemical weapons.

At this time, Qin Yuan heard movement underground, said quickly, and hid in the bushes next to him.

After a while, the big tree trembled, and a dark hole appeared, and then two people in chemical protective suits poked their heads out.

"Strange, why is there an alarm in the system, what's the matter?"

"Stop talking nonsense, go up and see if the thing is still there, this system is very sensitive, someone must have triggered the thing."

Sure enough, there is a secret biochemical weapon research base below. In order to prevent people or animals from getting close by mistake, these people directly put biochemical weapons on it.

When people or animals approach, they will die immediately, and the surrounding plants are also severely damaged by this biochemical weapon. Some plants are already dead, but some plants have even mutated.

Fang Tian hid in the bushes next to him. He thought it was just an ordinary bush. When he looked closely, the leaves had changed. These people are really harmful.

The first thing is the air in this area, and secondly, these plants have been biochemically and weapon cleaned for a long time, and those herbivorous animals will also be infected and die if they eat this plant.

These bastards, he was going to eliminate harm for the people today. After those two people came up, they immediately checked the big tree, but found that the things inside were gone!

The people next to it were shocked. Are you kidding? This is a biochemical weapon. The chemical protective suits they wear dare not touch it, and they all need to use special things to grab it.

"Could it be that the military sent someone here? Only military experts can do it with special tools!"

"No, if the military came, it would have attacked right away. It has been so long since the alarm was issued, and there is no movement around. It should not be a large army of the military!"

"It must be the special forces! What should I do? Hurry up and report to the boss!"

Because the two men were wearing heavy chemical protective suits, they didn't notice the movement behind them at all. Qin Yuan jumped out and threw two throwing knives. The force of the flying knives directly penetrated their chemical protective suits.

Before the two of them could react, they had already turned into two corpses. Qin Yuan threw it into the nearby bushes, and jumped in from the hole where the two of them came out just now.

Below is a space similar to an air-raid shelter, a long passage, very large, and the sound of someone talking in front.

However, those people were playing cards without raising their heads. They heard the movement and asked loudly, "How is it? Why have you two been away for so long? What's the situation?"

Qin Yuan quickly threw out the throwing knife, and the four people in front fell down in response. These people were wearing the most basic chemical protective clothing, and it seemed that simple isolation was done on them.

The gas in that capsule should not be able to penetrate. Qingyuan took out a chemical protective suit in the duty room next to her and put it on casually. After all, she is not yet familiar with the situation below.

It's better to do it quietly first. The buildings here are not complicated, and they all extend in all directions. Looking at it like this, it seems to be an underground military base a long time ago. '

At this time, there was another voice coming from the front. Qin Yuan listened carefully, and it turned out to be the language of Xiaomao Country. Sure enough, this biochemical weapon still has something to do with them.

There was a problem with the bacterial weapon before, and he should have thoroughly investigated it at that time, but the mastermind at that time had also been killed, and at that time, the most important thing was that Long Xiaoyun and the others were also there, and this matter was not in a foreign country. It's a good investigation, and it's over.

Qin Yuan walked in towards that passage, there were three or four people inside, pushing several big boxes, Qin Yuan enthusiastically ran up to help.

"Brother! Thanks! Which team are you from?"

Why didn't these people play their cards according to the routine this time? Shouldn't you ask yourself first? This is embarrassing. I don't know what team it is, so I can only say perfunctorily: "I don't know either, I'm new here!"

"No, where are we newcomers here?"

Just as they were about to react, Qin Yuan had already thrown a throwing knife, and the two people next to him fell down in response. The remaining person was trembling and leaning against the wall. He looked at the alarm in front of him, and wanted to rush forward and press the alarm device.

Qin Yuan stabbed his wrist with a flying knife, "You'd better not make those little tricks! I just want to ask a few questions, answer me honestly!"

The man shook his head in pain.

"How many people are there in your experimental base?"

"Five hundred people."

Qin Yuan sneered, and stabbed another throwing knife in his thigh, "Do you really think I'm easy to fool? Just this broken base, 500 cards, I don't think you have 50 people! Since you don't answer sincerely, then I There is no need to save your life!"

Chapter 795 Obtaining a world-class protective film

The militant waved his hands desperately, "No, no, I was wrong, I told you all not to kill me!"

Qin Yuan pressed the tip of the knife against his chest, signaling to him that if he told a lie, the knife would be inserted directly into his heart. The militant stared nervously at the sharp knife on his chest, worried that the man would slip his hands.

Swallowing saliva nervously, he said slowly: "Even if there are about forty people with experimental doctors, we belong to the outermost group, and they are all doing experiments inside."

"Which way is the lab going?"

The man raised his arm tremblingly and pointed to the passage on the right, then Qin Yuan directly plunged the sharp knife into his heart.

The militant stared wide-eyed, as if he couldn't believe it. Qin Yuan threw his body aside and quickly moved in the direction he pointed. He had to deal with it quickly. He didn't know if there was another exit for this underground passage. These people cannot be allowed to escape.

He will not soften his heart at all for these animals that use humans for experiments. Now one is to prevent these people from escaping, and the other is the indigenous residents. He doesn't know if there are any survivors.

Just as Qin Yuan entered the passage on the right, there were harsh sirens all around, \*\*\*\* it! He was fooled!

After a while, he heard footsteps, and some militants in chemical protective suits rushed towards him with submachine guns.

He quickly threw the throwing knife, and then bounced backward to avoid the bullet. At this moment, a huge iron cage fell from the sky and directly covered Qin Yuan inside.

Qin Yuan tried to kick out. The iron cage was made of unknown material, and the iron rods were emitting fluorescence. He used enough strength for this kick, but it didn't damage anything.

What is the situation?

There is still something that I can't break, and I tried to kick it from other sides, but there is no other response from the strong cage, I'm going, what is this thing?

But I really underestimated myself. Since this kind of thing can't be opened by force, then I still have world-class corrosion ability, and I can use the corrosion ability to destroy this cage. After all, the system said that everything can be corroded.

At this time, a man's voice came in, "Don't shoot, leave me alive!"

"Yes! Doctor!"

The person who came in was wearing a chemical protective suit and a mask and couldn't see his face clearly, but Qin Yuan always felt that this person's voice was very familiar, but he couldn't remember it for a while. He must know this person.

After the surrounding militants got the order, they just pointed their guns at Qin Yuan.

The doctor walked over and looked at Qin Yuan in the cage very excitedly, "Perfect, you are simply the perfect human body for my experiment! When I knew that you also came to this country, I concluded that you must be able to find this place, after all You are always meddling in your own business!"

"Hehe, do you really think this kind of thing can trap me?"

Qin Yuan grasped the railing with both hands, and used world-class corrosion ability. The railing made of special material instantly emitted black smoke, which slowly began to melt in Qin Yuan's palm.

The doctor turned pale with fright, and quickly ran outside, shouting, "Do everything I can to stop him! All of you!"

The monster is simply a monster, but it's true, this monster didn't die after falling from a height of three thousand meters, not to mention this kind of thing, the doctor ran out while thinking.

He must get this person. He wants to study his physique and how to do it. After his long-term investigation, he found that Qin Yuan not only completed various tasks, but also performed various tasks that normal people could not do. , he can complete it perfectly.

This doctor was one of Baron's former subordinates. To be precise, he was the doctor of biochemistry hired by Baron. He was also related to Barsad's bacterial weapons.

This doctor of biochemistry was lurking very deeply. At that time, he sneaked into the inspection organization and inspected Qin Yuan and the others. At that time, he asked Qin Yuan some information and communicated with him, so Qin Yuan felt that the voice was familiar.

At that time, he was very shocked. How did this Qin Yuan escape? He didn't believe that it was his own bacterial weapon. There was no problem. In the previous experiment, the lethality of that bacterial weapon was very strong.

And he also checked, but the dead bodies were all killed by the bacterial bombs, only Qin Yuan survived and was not infected.

At that time, he had great doubts about this person's physique, and gradually became interested. Could it be that this person's physique has an innate anti-venom serum, or some kind of anti-drug substance? take away.

But it was discovered that this person was very capable. If he took him away rashly, not only would he expose himself, but he would also be killed by this person.

He waited for the opportunity until Baron came out. Unfortunately, this Baron was also an idiot. He was already in sight of victory and turned himself in. But before that, he knew that Qin Yuan had indeed fallen from a height of 3,000 meters .

The point is that when this person stood in front of him, he dared to believe that someone really survived from a height of 3,000 meters. At that time, he even doubted whether his research really had supernatural power.

He had been researching chemical and bacterial weapons before, and gradually he studied how to deal with Qin Yuan. This cage was also made of the hardest diamond in the world for Qin Yuan's physique.

Unexpectedly, he actually melted the diamond with his hands. What kind of monster is this man?

Hearing the dense gunshots coming from behind, he quickened his pace and fled. He knew that these ordinary weapons could not do anything to him. According to Qin Yuan's previous battles, if he used the first-level biochemical weapon developed by Chaser.

Qin Yuan was dodging the bullets while swinging the throwing knife. In this small space, the bullets were too dense and kept dodging. Qin Yuan was very irritable and opened his hands to release black gas. These black gas It is the ability to corrode.

This black gas quickly surrounds the bullets fired in front and dissolves!

Those militants were stunned!

What kind of monster is this? It actually melted the bullets!

Then Qin Yuan exhaled forcefully, releasing more gas. For a moment, the militants in front were surrounded by this gas. When the gas touched the hands of the militants, he felt that his hands were swallowed by something.

On closer inspection, it was actually corroded, as if a strong acid had been added, and in an instant, only bones were visible in one arm.

"Ah! Help, monster monster!"

Seeing this situation, those militants didn't dare to fight back. They dropped their guns and ran out in all directions.

Qin Yuan also quickly chased them out. As for these biochemical weapons, they should be solved with biochemical weapons. These inhumane guys used living people for experiments, and how many innocent lives were killed.

It just happened to corrode everything here, at this time the militants running in front suddenly stopped, turned around and ran towards Qin Yuan, and knelt in front of Qin Yuan, begging to let him go.

Qin Yuan felt strange, what's going on?

At this time, the militants in front screamed and knelt on the ground. Regardless of the horror just now, the militants quickly passed through Qin Yuan to escape.

Qin Yuan jumped forward while releasing the gas. Wherever he went, those militants were wrapped in black gas and slowly dissolved.

Qin Yuan jumped to the front, only to realize that it was the doctor of biochemistry just now. The chemical protective suit on his body was damaged at the moment, and he looked very embarrassed. The most important thing was that he was carrying something like a rocket on his back.

Bring a doctor of biochemistry, a little crazy, press the switch towards the militants in front, and a blue liquid is sprayed out of it. These people are just like the people who were infected by the bacterial weapon before, and instantly developed abscesses on their bodies.

But what is more serious than bacterial weapons is that these people lost their ability to move instantly when they came into contact with this blue liquid.

This is the first-generation biochemical weapon developed by that doctor of biochemistry. It is more contagious than the one above, and those who come into contact with it can lose their ability to move instantly. This is the country C that gave him a huge investment and asked him to conduct research. Use these biological and chemical weapons to eliminate some low-level countries first.

At the beginning, they had already conducted experiments, and the physique of these latter people was too poor to satisfy them, so he pretended to send these biological and chemical weapons to the local armed organizations, and asked them to deal with those troops.

The condition for giving it to them is that it must be kept secret. With this kind of enhanced weapon, how can these people reveal it? After all, they would spend a lot of money to buy ordinary weapons, and this person gave it to them for nothing.

And these people were unknowingly used as guns by the doctor of biochemistry. He kept recording data and improving the weapons.

He shouted at Qin Yuan: "I want to see if your monster physique can withstand my first-level biochemical weapon!"

Qin Yuan is not afraid either. He has a protective film of bacterial weapons on his body, which should be impenetrable by biological weapons.

"That may disappoint you. My monster physique is designed to punish you inhumane criminals. If you name the mastermind of country C, I may consider letting you die easier."

"Hahaha, you are really crazy. I have no intention of getting out alive. I have already planned to use my last life to complete my best work."

At this time, the blue liquid had already been sprayed towards Qin Yuan. He stretched out his hand to block it at will, but found that something was wrong with the liquid, and it was slowly corroding the protective film around him.

Damn, what the \*\*\*\* is this!

"System, what's the situation, can it be recycled?"

"Ding! Answer the host, this is just a biochemical fluid and there is no way to fully recover it. The host needs to touch the body of the biochemical weapon to fully recover it."

I go!

Qin Yuan believed in the system's ability too much before, but he didn't expect that he couldn't recover it now, mainly because he seemed to have some symptoms of infection.

He quickly threw the throwing knife at the doctor of biochemistry, but found that he could no longer lift his arm. The throwing knife made some mistakes and deviated from hitting the doctor's shoulder.

"Hahaha, give up! It's useless, you escaped from my bacterial weapon before, this is an upgraded version of my bacterial weapon, just wait, you can be my superplasma, wait for you to change. When it becomes a corpse, my people will; Hey, a more powerful virus is taken out of your body!"

"you are dreaming!"

Qin Yuan turned over and jumped back, the biochemical doctor kept spraying the biochemical liquid on Qin Yuan, Qin Yuan was already a little unsteady, this time he was careless.

"Hint! The host's body is being invaded, it's dangerous!"

He had no choice but to fight. Qin Yuan used all his strength to rush towards the doctor of biochemistry. Unfortunately, he was almost exhausted, and he was completely paralyzed on the ground.

It is also fortunate that he has a strong will in some words, otherwise he would have completely lost his will. Now he only feels pain like being burned by a flame, and he can feel those biochemical weapons are invading his body.

Is it really over like this? He was a little reconciled, calling the system frantically, searching to see if there was any ability to fight against it, but found it was useless.

The doctor of biochemistry stood in front of Qin Yuan, "Hahaha, no matter what monster you are, you will be used by me today!"

Qin Yuan thought of a way, "Really? Then I admit it too, but I just want to see if your biochemical weapon is really so strong, and what is it made of?"

Seeing that Qin Yuan was interested in his research, the doctor of biochemistry immediately became interested, and told Qin Yuan loudly about his own research, how ' uses those people for experiments and how to use human bodies for cultivation.

Qin Yuan only felt that this man was an inhuman lunatic, who even said such a cruel thing as a great cause.

He raised his hand and touched the weapon on Doctor Biochemical's chest, the corner of his mouth raised.

"System! Recycle!"

At this time, the doctor of biochemistry didn't know about it. He thought it was Qin Yuan who was so interested in his research. It's a pity. This person is indeed a rare talent who appreciates his research so much.

"What a pity! Forget it, let's choose again in the next life!"

"haha, really?"

"Ding! Congratulations to the host for recovering the main body of the biochemical weapon. The biochemical weapon is ineffective against the host, and the host can make a choice."

"1. World-class biochemical research, proficient in the manufacture of all components of biochemical weapons."

"2. World-class immune ability, immune skills have reached their peak."

"3. World-class protective film, natural skin barrier, the strongest protection mechanism."

Qin Yuan thought for a while that these three are good. If he knows the composition of biochemical weapons, he will be able to know the weakness of biochemical weapons when he encounters such a situation in the future. It is better to choose the third one, which is more reliable.

"System, I choose the third one!"

"Ding, congratulations to the successful selection of the host and obtaining a world-class protective film!"

At this time, the doctor of biochemistry discovered something was wrong. Why did this person stand up, and his mental outlook was slowly recovering. What is the situation, it is impossible! It is impossible for your own weapons to fail!

He frantically sprayed the biochemical liquid at Qin Yuan, Qin Yuan just threw a throwing knife at his wrist.

Chapter 796 Mr. K from Country C

The biochemical fluids he sprayed out had no effect on Qin Yuan at all. A thick protective film had formed on Qin Yuan's body, and these biochemical fluids could not penetrate.

Moreover, for Qin Yuan, these things have already been recycled by him, so they can't do him any harm.

The doctor of biochemistry also had to pump out all the biochemical fluids. He couldn't believe how the person in front of him did it.

Please help me, [Mimi Reading App] can steal book tickets like stealing vegetables, come and steal books voted for by friends' book tickets.

"You! What kind of monster are you? Has your physique been researched and modified before, otherwise I wouldn't believe it!"

The doctor of biochemistry is very confident in his own research. After all, so many people were used for experiments, and in the end these soldiers were the same. No one can survive in this state.

Qin Yuan directly stabbed him in the neck with a throwing knife. The doctor of biochemistry fell down unwillingly, and he was still repeating the impossible in a low voice before he died.

What Qin Yuan has to consider now is what the biochemical doctor said just now. His chemical protective suit has been damaged. He is determined to die and wants to use his own body for the final experiment.

Then someone will come to collect his body and take those viruses. It seems that he can lurk well and wait for the mastermind behind the scenes to come down completely. At this time, the whole underground space is filled with the smell of biological and chemical weapons.

Qin Yuan wasn't worried either. They couldn't escape those armed groups before. In this case, that kind of weak chemical protective suit was useless.

Qin Yuan was lying next to the biochemical doctor, waiting for the people from the behind-the-scenes organization to arrive. No matter how difficult it was, he would definitely find out. If these biochemical organizations are not wiped out, more innocent people will be persecuted by them.

Qin Yuan lay on the ground and waited quietly. An hour passed, but still no one came down. He was a little bored waiting, and planned to get up and check the situation of the indigenous people first.

He hoped that those natives were still alive, so that he could heal them.

Just as he was about to get up, he heard movement from above. It seemed that someone had come down. He quickly laid down on the floor and lay motionless on the floor.

After a while, there was a sound of footsteps. These people were all wearing heavy chemical protective clothing. The leader was very surprised and held an instrument.

"What's the situation, is the doctor crazy! The biochemical value of the entire underground base is about to explode. Once this lunatic leaks the biochemical breath, the military will definitely find out!"

"Okay, now is not the time to find what we want quickly. It is very unsafe to leave here as soon as we get it. I don't know if these chemical protective suits are useful at this level of biochemistry. We have never been at such a high level before. concentration tested."

"Hey! It seems to be the doctor's body in front of him. What's the situation? Who is it, who is not even afraid of biochemical weapons, and the doctor was killed?"

These few people quickly stepped forward to check, only to find that the doctor was hit in the neck with a knife, and it seemed that he had just died not long ago. They took out the photos provided by the doctor before and looked for Qin Yuan.

He said that this person is a super strong person, so he used this person for experiments, and everyone will find the original problem in him, and then take it back for other research.

A soldier found Qin Yuan and ran over excitedly. This was a good opportunity, and he finally found it. He quickly extracted the pathogens and left as soon as possible. Looking at the values reported on the instrument, he was also very scared.

He signaled everyone to come over quickly, because they were wearing heavy chemical protective clothing and did not feel the body temperature of Qin Yuan. Hexane worked together to lift Qin Yuan to the table next to him.

At this time, they had already determined that Qin Yuan was just a corpse and could not pose any other threats at all.

He took out the prepared needle tube and planned to draw blood from Qin Yuanting. The member of the biochemical organization pointed at Qin Yuan's arm and was about to inject the needle, but found that the needle was missed!

what's the situation?

He wondered if he had read it wrong just now, the corpse seemed to move, and then a terrible thought spread in his mind, could this person not be dead? Okay, let him pay attention, don't make such low-level mistakes.

He made sure again that it seemed that he was thinking too much, and it was impossible to survive in this situation.

At this moment, Qin Yuan suddenly sat up, and kicked a few people next to him with his legs. Those people were wearing heavy protective clothing, and their reaction ability was already slow to be attacked by such a sudden attack. He was kicked to the ground by Qin Yuan.

Qin Yuan jumped on the person who wanted to draw his blood just now, snatched the needle from his hand, and quickly stuck it on his arm.

"Damn it, you inhuman garbage, for your own benefit, randomly experiment with others, completely ignoring life, I want to see today, will you be afraid?"

After he finished speaking, he tore off the man's chemical protective suit. The man let out a terrified cry and backed away again and again, but it didn't work. In such a high concentration of biochemical air, he fell to the ground in an instant, bleeding from all seven orifices. , twitching non-stop.

Then there are the remaining few people. These people should be very confident in the doctor's biochemical weapons. They are not even issued the most basic weapons, and they seem to be just researchers.

The force value is too low, not as good as those organizations before.

Qin Yuan punched the only survivor, "You should know why I kept you here. If you have no other use value and can't get what I want, then your end will be the same as theirs!"

"Ahem, no! I'll answer whatever you say. I'm just a researcher, not those militants anymore. Please spare my life!"

Qin Yuan sneered in his heart. He wanted to kill these researchers. The most hateful thing was that these people who researched chemical weapons clearly knew that such things were banned in the world, completely deviated from ethics and morality, and used fresh life to do it. experiment.

These people are 100 times more hateful than those militants, and he will kill this person directly after the questioning is over!

"What organization do you belong to, and where is the best place to send the blood after the blood draw, please tell me clearly!"

The researcher typed very small, nodded his head desperately, looked at the corpses around him, and this person was not wearing a chemical protective suit, just exposed to the air like this, such a high concentration of biological and chemical weapons could not kill him, It's just like a monster.

The researcher began to narrate intermittently.

It turns out that this deepening organization was originally a joint research between Baron Bassad and a company called Fengchun Medical Co., Ltd. in country C. Baron provided financial support, and Fengchun Medical trained a large number of biochemical personnel.

They plan to develop destructive biological and chemical weapons and sell them to countries at war. Baron is mainly doing it for the economy. He knows that once this weapon is sold, the financial resources will be doubled, and he also wants to use this weapon to eliminate , Block those who betray themselves.

The boss of Fengchun Medical Co., Ltd. simply wants to destroy some countries and bring irreversible damage to the world. After all, these biochemical weapons cannot dissipate in the air for a long time.

In the next three, five, or even ten years, these biochemical gases will seep into the surrounding trees. The land is equivalent to this area, and even food cannot be grown. Even the food grown is infected with biochemical weapons and cannot be used at all.

The boss of Fengchun Medical is Mr. K. This researcher can only describe his boss as a lunatic. For this kind of experiment, he even pushed his pregnant wife into the laboratory, which became crazy to a certain extent.

This Mr. K was originally a well-known doctor of medicine. Before that, he had a seven-year-old daughter, but her daughter died in an accident, so he frantically researched the biological mechanism. Before, he believed that these biological and chemical weapons could revive his daughter. .

But the experiment failed. It is impossible for a dead person to come back to life. After Mr. K accepted this fact, he became crazy.

He was doing experiments crazily every day, because his daughter was killed by militants in a terrorist attack. Those militants didn't care whether they were civilians or not. As long as they saw anyone, they would shoot and kill them.

So Mr. K has hatred for these terrorists. He wants these people to die in the most painful way, so he leads people to study chemical weapons. This is just one of their experimental bases. The largest experimental base is still in C. , The technical defense over there is more mature than this side.

"Oh, where exactly is your experimental base?"

This researcher is also a little smart, he knows that if he tells the accurate geology, Qin Yuan will definitely kill people.

"I can take you there, but you have to promise not to kill me. I'm really forced to do so. I'll take you there. If you have the strength, then fight them!"

Qin Yuan has already seen through this person's psychology, but that's okay, since this person offered to lead the way, he is not afraid at all, but it is quite troublesome to go to country C.

Now he needs to deal with the matter in front of him first. The biochemical gas here is already very thick. Qin Yuan raised his hand and knocked the researcher unconscious and tied him to the table next to him with a rope.

He used the previous bacterial weapon to try to see if he could absorb the gas here.

"System! Since I have a protective film on my body, can I absorb these gases this time?"

"Answer the host, this gas can be absorbed, but the concentration here is too high, it may not be able to absorb it all!"

This is fine, it counts as much as it can absorb, and it's good to reduce a little damage here.

Qin Yuan opened his hands and frantically absorbed the biochemical poisonous gas. After a while, the system indicated that the absorption had reached its peak, and there was no way to absorb it any more.

Qin Yuan picked up the test instrument that fell next to him. If he remembered correctly, the number displayed on the instrument report just now was 180, but now it is only 40.

Then Qin Yuan ran to the inside of the tunnel, ready to check if the aborigines were still alive. After entering, they were quarantined several times, and the biochemical gas should not have come in completely.

This should also be the research of a Ph.D. in biochemistry, and there are isolation measures, so the chances of those indigenous people surviving are still very high.

After entering it, there are transparent experimental spaces similar to wards. Some of the aborigines in front have lost their breath and have various pipes inserted into their bodies. They look very scary.

After passing by, he saw a few indigenous people curled up in the room. It seemed that these people were the only survivors. He used thermal imaging to look deep into the depths, and there was no other life.

This place is like a \*\*\*\*\* on earth, with death everywhere, these insane people use these innocent lives to conduct experiments indifferently.

As soon as Qin Yuan entered, the natives said that they were shivering together.

Qin Yuan tried to communicate with them in the tribe's language before, but at this time someone gradually responded to him, and after that person spoke, Qin Yuan mastered his small language.

"Don't be afraid, I'm here to rescue you! Those bad guys outside have been killed by me."

These natives were dubious, but seeing that this person didn't do anything to hurt them, and he was at least convinced of their language, Fang Tian lifted the researcher just like that.

The members of these primitive tribes escaped from another exit. These people have been infected, because they were used by the doctor for experiments before, is full of needles.

They don't know what will happen after they come out, they just think it's good to go home, Qin Yuan can only try later to see if he can relieve them of this biochemical constitution.

Everyone plans to go back to the tribe first and then talk about it. At this time, a little girl walking in front suddenly fainted on the ground, with nosebleeds all over her nose.

The thing that worries Qin Yuan the most happened, these people have been biochemically infected. The physique couldn't touch the outside air at all, and after a while, those people all showed different symptoms.

They were exposed to the sun, and blisters began to form on their bodies, and one person even developed difficulty breathing.

Qin Yuan touched the indigenous people with his hands, and instantly found that he could use the biochemical serum to hit them in the body, and fight against the previous virus.

And the biochemical serum recovered by his own system is specially for detoxification, Qin Yuan instantly saw hope, so the civilians outside could be saved.

He quickly used the biochemical serum to remove the virus from these people. These tribe members felt very unwell just now, and they had died as they understood.

Unexpectedly, he was treated by the person in front of him with some special method, and a native shouted loudly: "You are actually a high priest!"

What high priest? Qin Yuan didn't understand at this moment, but after they explained it later, Qin Yuan realized that the high priest is the role of a doctor in the tribe, and anyone with this special ability will be admired by the tribe.

They have no way to explain it, they only know that people with this ability are sent by God

Violet faint

Chapter 797 Crossing the River and Destroying the Bridge

Qin Yuan didn't know how to explain it to them. It's hard to talk about this situation in modern times. Those aborigines who were rescued already kowtowed to him frantically, insisting that he was sent by the gods to save everyone.

Fang Tian asked two aborigines to carry the remaining biochemical researcher. Halfway through the researcher, the researcher had already woken up. After the aborigines found out, they picked up a wooden stick and hit him \*\*\*\*\* the head.

These natives hate these people wearing chemical protective suits very much, and they don't know what's going on. The weapons used by these people are very powerful, which can make them lose their strength in an instant.

So the entire tribe was taken away, and these aborigines didn't know what they were going to do after they were taken away, but residents died every day, people of all ages, men, women and children were not spared, even pregnant aborigines were taken away to do experiments.

Qin Yuan could also imagine the viciousness of those researchers. After all, after hearing what the researcher said, their boss, Mr. K, was not a good person.

A pervert can only bring out a group of perverts, and he will definitely bring him to justice for these people. This is the choice that has appeared twice in the previous lottery draw.

In fact, he can also choose a strong infection ability, but he really thinks differently. Qin Yuan just wants to save more innocent people, and doesn't want them to continue to suffer this kind of pain.

As for Li Erniu who was outside at this time, they had not received the signal from Qin Yuan, and they planned to go into the jungle to search for them. After all, those biochemical weapons were really dangerous.

They had already put on chemical protective suits, because when they arrived at the camp, weapons and equipment had already been distributed. These biological and chemical weapons were unusual and had to be dealt with by special means.

There are only seven or eight people left in this tribe. Qin brought them to the tribe he was in before. Since the other tribes have been destroyed, it is difficult for these few people to live without a team in the jungle. The tribe leader over there knows It was brought by the envoy of the gods and there was no objection, so I readily agreed.

When Qin Yuan was about to leave, all the people in these tribes knelt down and wanted Qin Yuan to stay, especially the leader of the tribe. He said that he knew that Qin Yuan was very capable because he was an envoy of God and wanted Qin Yuan to stay and protect everyone. .

Qin Yuan explained to them many times that those outsiders had been eliminated by him, and the danger had been eliminated, but these people just didn't let him go and surrounded him heavily.

Qin Yuan can actually escape by force, but he is unwilling to do so. These are also innocent people. They want to stay by themselves only because they are frightened. They want to be protected.

At this time, an elephant's call came in, and the tribal leaders were very panicked when they heard it. Although the elephant was revered by them as their tribal totem, the elephant was also very dangerous, and they had no way to communicate with the elephant. , I only know that every time this kind of creature comes, it will \*\*\*\* their food, and some will die because of it.

The tribal leader asked everyone to quickly take out all the food and put it in the open space. As long as the elephants were full, they would leave. Before that, they only heard the roar of the elephants, but after a while, Qin Yuan saw the real wild elephants.

This wild elephant is really tall and has long tusks. The wooden fences built by the people in the tribe can't beat these elephants at all. They crushed the walls with their feet. The people in the tribe They were all trembling.

This is the power of nature. Human beings are actually very weak in front of nature, and this is also linked together.

These elephants are a group of elephants, there are about six of them, please be willing to be quite shocked, these wild elephants shake their long trunks, step on the ground, and the ground shakes a little.

Where do the residents of those primitive tribes have so much food. A small pile was piled up on the open space, and Qin Yuan took a look. An elephant couldn't get enough to eat, while the aborigines all lay down on the ground and kowtowed.

This is the case, why are you still kowtowing, shouldn't you run away quickly? No wonder they are usually attacked by elephants. These elephants must not be satisfied if they are not full. They will attack when they see humans.

When the tribal leader saw Qin Yuan standing in front with his hands behind his back, he was very flustered. This envoy was too exaggerated. He didn't even bow down when he saw the elephant himself.

Qin Yuan just smiled, opened his hands, and exuded the ability to confuse those elephants. In an instant, the roaring elephants became quiet.

Seeing that the elephants were not moving, the tribal leader could only quietly raise his head to take a look, but saw Qin Yuan walking towards the elephants, and said to an elephant in front, "Squat down!"

The elephant half-kneeled on its front legs, and Qin Yuan stepped on its trunk and climbed directly onto the elephant.

The aborigines below were stunned, why is this elephant so obedient, usually elephants will attack, they can only escape if praying is useless, but they will still be injured, because elephants are very destructive and have a bad temper Not good, every time I come here, I almost tear down the whole tribe.

So they could only keep changing places. They didn't expect these elephants to be so obedient today, and Qin Yuan stood directly on the back of the elephants.

At this time, Qin Yuan rode the elephant and ordered the elephant to leave. Only then did the indigenous leader realize that Qin Yuan was not the elephant's envoy. He was simply a god, and everyone worshiped him one after another.

Until he couldn't see Qin Yuan, Qin Yuan really didn't want to leave in such a big jungle, and it happened to be more convenient to ride this elephant.

Let me add a word, [\Mi\Mi\Reading\app\\] is really good, it is worth installing, and even Android and Apple phones support it!

Qin Yuan originally wanted to keep the elephant as a pet, but after thinking about it, it seems impossible. After all, this thing is too big to take out at all. When he thinks of his own two cows and mice, his heart aches, and he has finally been promoted to such a high level. , died like this.

It seems that I have to find some other pets, otherwise it will be difficult to inquire about the news in the future.

The members of the red blood cell team had already walked into the jungle. He Chenguang walked in the front and kept vigilant. At this time, he heard very heavy footsteps in front of him, and the ground was trembling slightly.

He Chenguang immediately raised his hand to warn everyone, and after a while, they saw a few tall figures, which turned out to be a herd of wild elephants. He Chenguang shouted in a low voice: "Everyone, retreat quickly, we can't mess with this kind of wild elephants." Get up, move lightly, don't disturb them!"

Everyone also knew that the wild elephants were powerful, so they retreated quietly. At this time, Li Erniu looked up and saw that there seemed to be a person sitting on the back of the elephant. This person was quite familiar.

He stopped to watch carefully, Gong Jian came over and slapped him on the head, "What time is it, why are you in a daze, why don't you hurry up?"

No, instructor, do you see if there is a person sitting on the elephant's back, and that person seems to be Brother Qin! "

After hearing what Li Erniu said, Gong Jian stopped and turned to look, as if it was really Qin Yuan.

Qin Yuan had discovered them a long time ago, and just wanted to see when these boys would see him.

"I said, what are you \*\*\*\*\* still doing? I told you not to come in, look at this dress like a zongzi!"

Li Erniu pulled off the mask of the chemical protective suit and took a breath. He was suffocated on the way. He ran towards Qin Yuan excitedly. He actually rode an elephant, which is too awesome. .

"Brother Qin! I knew it was you, how did you make the elephant obey, these are all wild elephants!"

"It's nothing, just fed a few bananas and he became obedient."

Hearing Qin Yuan's easy explanation, Li Erniu didn't believe it at all, but since he didn't want to say it, he had his reasons, as long as he came back safely, but he noticed that there was still a person tied behind Qin Yuan's back.

Qin Yuan threw the researcher down. With such a big commotion, this person still hasn't woken up. It seems that the aborigine knocked really hard.

Now that he had met Li Erniu and the others, Qin Yuan didn't intend to take the elephant any further. He jumped down and directed the elephant to go deep into the jungle.

Qin Yuan roughly told Li Erniu and the others about the encounter and extermination of the biochemical organization.

"What! Brother Qin! You actually wiped out a biochemical organization! But you didn't even wear a chemical protective suit. It stands to reason that the inside should be infested with biochemical weapons. How did you do it?"

"Who said I didn't wear it? I stunned them when I lurked in. A researcher wore his chemical protection suit."

Qin Yuan could only quickly change the topic. After returning, he asked the local government to give special treatment to that piece of land. After all, this primeval forest is very large, and many animals will run there. If these biochemical viruses are leaked, That's more serious.

Most of the biochemical gas has been absorbed by him, and the local government only needs to deal with a small part. He thinks that these small parts of the local government should have no problem.

Unexpectedly, the leader of their Ministry of Foreign Affairs had a sad face.

"I'm sorry, Chief Qin, don't talk about dealing with this small amount of biochemical poisonous gas. Our country is currently in a war, and there is no way to spend any more money. Moreover, we have never touched this kind of biochemical weapons, and we don't know what to do. deal with!"

Qin Yuan is also very helpless, it seems that he can only ask for help from the international community, and he has tried his best. These small problems are still left to them to deal with the biggest problem, which is Mr. K.

After all, biochemical weapons are not a trivial matter, they will affect the development of the entire human race, and the international community immediately dispatched a professional team to deal with it.

A special investigation team was established internationally to collect information with Qin Yuan. This investigation team is dedicated to the research of biological and chemical weapons and bacterial weapons. To be precise, they are the anti-biochemical team.

I am also very experienced in dealing with these, and I would rather tell them the general situation, and also the situation of Mr. K, the mastermind behind the scenes of country c.

Qin Yuan handed over the researcher. Since a special investigation team has been sent internationally and they have their own experience in dealing with biological and chemical weapons, he will go with them to destroy this biological and chemical organization.

After all, the red blood cell team has no such combat experience, and it is also a good time to take them to observe, so that they can learn how they deal with these biological and chemical weapons.

Before Qin Yuan had a recovery system, the bacterial weapons were directly recovered, and the same is true for the biological weapons this time. But what to do if your team members encounter this situation next time, you still have to learn from these professional personnel.

Unexpectedly, the captain of the investigation organization just detained the researcher and rejected Qin Yuan's request.

Qin Yuan was stunned, what's going on? I took the initiative to provide clues, and even gave them the researcher. Are these people trying to cross the river and tear down the bridge?

"Hey! What's your attitude? Why don't you let us participate?"

The captain of the anti-biochemical team was very arrogant. He looked at Qin Yuan and smiled and said: "Because we are professionals in this area, and I am also very grateful for the clues you provided. If I want to reward you, I will ask your leaders." explained!"

When Qin Yuan heard this, he immediately became angry. This person thought of him for something. He was not one of those who wanted fame and fame. Relatively large, the abilities of these people may not be completely wiped out.

At that time, the clues that I have finally obtained will be destroyed by these people, and I will startle the snake. The reason why these biochemical organizations can exist for such a long time without being discovered is that they must have their own way of survival.

"Hehe, you guys are really loud. If that's the case, please return the researcher I captured, and I will lead the team to find that biochemical organization!"

Li Erniu and the others also rushed forward to argue with these people, ' This opportunity was originally fought for by Qin Yuan, to be honest, it is really unreasonable not to let them participate.

Unexpectedly, the captain said very disdainfully: "Captain, please don't make fun of your soldiers' lives. This is a biochemical weapon. You have never done research on this aspect, and to be honest, I really I'm afraid you guys will drag me down, I don't want to bring a bunch of oil bottles with me!"

I go! It has been a long time since Qin Yuan has been ridiculed that he is an oil bottle. This captain is too arrogant.

In this way, there was a fierce quarrel between the two parties, but after all, it rose to the international level, and everyone restrained it, but the verbal quarrel did not actually take action.

This matter was very tense, and Qin Yuan was very unhappy. He already regretted handing over the researcher. He didn't expect that this group of people would really cross the river and tear down the bridge.

After a while, the staff of the embassy came over to mediate after learning about the situation. He still didn't want any conflict between people from his own country and those from other countries.

I talked a lot with Qin Yuan, and his suggestion was to give in. This matter is so dangerous, let them solve it if they want to solve it, and this matter is the normal task of their anti-biochemical team.

"Captain Qin, after all, this is a matter within the scope of other people's responsibilities. I suggest not to participate."

Qin Yuan was very dissatisfied with the staff and Si Ni's attitude. This is not a matter of responsibility or irresponsibility. To put it bluntly, he discovered this situation first, so let's talk about it on a first-come, first-served basis.

#### Chapter 798 Qin Yuan's Weakness

The most important thing is the arrogant attitude of those people. They are professional and they are non-professional. Even if I provide clues, I don't see how grateful these people are.

The staff of the embassy lowered their voices and said to Qin Yuan: "Leader, please calm down. The people in the anti-biochemical team are all high-achieving students, basically post-doctoral. Anyway, they are very good in the world. Even if the foreign minister comes Now, you have to be polite to them."

"Hehe, it's really a big spectacle, so let them do whatever they want, I wish them peace!"

Qin Yuan was very upset at the moment, so he let this group of so-called high-achieving students to toss about, and he didn't care about it. Anyway, this biochemical organization couldn't threaten the

Yan Kingdom, so he didn't care what they did, no matter what happened in the future, he wouldn't care about it.

Qin Yuan didn't say anything at first, but he didn't expect the leader of the anti-biochemical team to say, "I said that Captain Qin of yours seems to be young and has a rather aggressive temper. It's a good thing for young people to be aggressive. , but it's okay if you're too stupid, after all, the division of labor is different, and biochemical weapons are not like other things, as long as you just fight and kill, this thing pays attention to technology."

"Damn! Who are you talking about beating and killing? You can't spit ivory out of your dog's mouth."

Li Erniu was not happy when he heard what they said, and immediately rushed up to argue with them. The staff of the embassy felt dizzy for a while, and they had already calmed down just now. Why does this person have to talk too much?

He is not easy to offend people on both sides, especially the anti-biochemical team is still international, so the influence is really bad. On balance, he can only come to persuade people in his own country.

Qin Yuan pulled back Li Erniu who was still arguing with them, "It doesn't make sense with these people, but there are always times when they beg me!"

"Hahaha, did you hear that? He said that I would sometimes beg him. This is really the funniest joke I've ever heard."

"Human, don't talk big, I told you to remember my name, my name is Qin Yuan, you will really beg me later!"

"Hehe, don't worry, even if I die outside, I won't beg someone like you, we are not at the same level!"

Qin Yuan took the red blood cell team and left directly. He planned to check on the situation of the villagers, and it would be a waste of saliva to keep talking to these people.

Seeing that Qin Yuan and the others came back safely, Li Yunfei was very happy to rush forward and said with concern: "Captain Qin is really a young talent, and he has made a great contribution

this time. Those militants have been completely wiped out, and the biochemical organization has also been controlled. , really helped us to a great extent!"

"Captain Li, don't be so polite. We are all brothers. This is what I should do. By the way, what about the villagers who were infected by biochemical weapons before? Take me to see how they are doing."

At this time, Li Yunfei had a sad expression on his face. Could it be that something else happened?

"Captain Qin is not that I won't take you there, but that these villagers are already dead."

what's the situation! This is impossible. Now that he has absorbed biochemical weapons, he is still quite clear about the performance of biochemical weapons. After this kind of thing invades the human body, it will be latent for at least a week, and symptoms will appear one after another within this week. Seriously, people are tortured to death slowly, not suddenly.

Li Yunfei pulled Qin Yuan and the others into the tent, looked outside, and found that no one was paying attention, so he whispered to Qin Yuan what happened next.

It turned out that after Qin Yuan discovered the biochemical organization and asked the government to deal with the small piece of biochemical gas, the local government asked for help from the international community, and this group of people came.

After these people came, they immediately quarantined and disinfected the camp. Those who were infected by biological and chemical weapons were taken to another tent, which they said was used as a separate first-aid station.

Everyone thought that after all these people were professionals, and they saw that their equipment was better than their own, and all kinds of chemical defense facilities were very complete.

I feel relieved, hand over those villagers to them, and they don't know anything about in-depth treatment, but those doctors say that there is no way to treat this kind of thing.

As a result, the villagers who were infected by the biochemical weapons went in less than an hour, and the anti-biochemical team came out and announced that these villagers were dead.

This is really too fast. Everyone can't believe that although these people were suffering a lot an hour ago, at least their thinking was still clear. Looking at the mental head, it is impossible for people to die in just one hour.

Regarding everyone's questions, the captain of the anti-biochemical team only said that the time of their death was aggravated because the biochemical virus in their bodies had mutated.

But these people's rhetoric was just fooling the local people. They didn't believe it. After questioning at the end, they found out that they had directly euthanized these villagers.

They said that these people belong to pathogens, and they cannot be cured at all. If they continue to let them go, they will only drag everyone down and cause other people to be infected. Therefore, after they were euthanized, their bodies had to be cremated.

Li Yunfei also went in to take a look at the condition of the corpses. They talked about euthanasia, but in fact they directly killed them with cold weapons.

Qin Yuan knew that euthanasia should be injected with a drug. In this way, the patients would not suffer. However, this group of sad and mad guys directly killed these unarmed patients with cold weapons.

"Damn it! This group of people is too arrogant. They don't deserve to be scientific researchers. They just use this title, and they still do those outrageous things. What's the difference between what they do and those terrorists?"

Qin Yuan had already planned it out. With his current ability, he could save those villagers, because those people from the indigenous tribe had fully recovered after his treatment.

But he didn't let him wait for this opportunity, those people had already slaughtered these villagers like livestock.

Qin Yuan shook his head. The international anti-biochemical team was also invited by the local government with his opinion. For a while, she didn't know whether her decision was right or wrong. He walked out of the tent, wanting to breathe a sigh of relief.

I saw those villagers kneeling on the ground praying for their dead relatives, because they couldn't take the corpses away, and those corpses were parked in the tents and guarded by special personnel.

Qin Yuan felt a little sad in his heart, but this was the first time he was so powerless. He didn't know how to change it, because some things were too profound, just like a random conflict just now, it would immediately rise to the international level. The ambassadors of both sides The staff of the museum will come out to negotiate.

Seeing the helplessness of those villagers, he really wanted to help them, obviously he could make their relatives recover again, but he was still a step too late.

But in the final analysis, the most hateful thing is the personnel of the biochemical organization. They have researched this kind of harmful thing, which has caused so many families to be torn apart.

Now he sincerely hopes that this anti-biochemical group can catch Mr. K and completely destroy this biochemical group.

Gong Jian came out. He saw Qin Yuan looking at those villagers, and he felt the same way. Although this is a foreign country, the people are always the ones who hurt the most in war.

"Captain Qin, there are some things we can't do perfectly. In fact, you've done a good job. Your ability is very strong, but don't put too much pressure on yourself!"

Qin Yuan nodded, because there was a war here before, and most of the villagers lived in temporary buildings. Taking advantage of the interruption of the war, the peacekeepers and the local villagers planned to rebuild their homes.

But because of the previous explosion, the bridge on the main transport road was blown up, and a lot of wood could not be transported in. We had to rely on manpower to go into the jungle to cut down trees. Everyone used the most primitive tools, carried them on their shoulders, and carts. This efficiency is simply too slow.

Qin Yuan walked into the virgin forest again. Since this efficiency was too slow, he asked some friends who could speed up the efficiency to help. Qin Yuan went into the virgin forest to find those wild elephants.

At the beginning, everyone saw that the wild elephants were very panicked and fled in all directions. The peacekeepers from several local countries raised their guns and asked the people to evacuate first. After all, they all know the power of the wild elephants.

"Don't be so nervous, these are all I invited to help."

Li Yunfei opened his mouth in surprise, what is the situation, these wild elephants listen to him so much, I encountered a herd of wild elephants on a patrol mission before, those wild elephants were very arrogant at that time, they rushed up and trampled the team .

But now he is very obedient, obediently standing beside Qin Yuan, everyone still dare not approach, Qin Yuan doesn't think so.

These elephants are very powerful, and these numbers are a piece of cake. He commanded these elephants to transport the felled trees down with their trunks, and their efficiency was greatly increased after a while.

Seeing this scene, everyone applauded one after another. This kind of elephant training skill is really amazing.

"Captain Qin, you are really hiding your secrets, and you can even tame elephants."

"This is what the indigenous tribes here used to do. I learned a few ways to tame elephants from the locals."

System: "Host, you really think they don't understand the language, let's brag about each other!"

Qin Yuan could only ramble a few words casually, and hurriedly broke the topic, after all, if he asked further, the lie would not be able to be substantiated.

After the wood was enough, everyone started construction. The local villagers thanked Qin Yuan very much for bringing the best local fruits to everyone.

On the anti-biochemical team, they are still cleaning up the leftover biochemical gas problem, and they haven't left yet.

Seeing that Qin Yuan is so loved by the local villagers, he was very dissatisfied, especially the captain. He felt that he was the hardest person. After all, he was risking his life to do this. clear.

"Hehe, I also said that there is something wrong with their beating gongs and drums. They just let a few beasts move some things down. These villagers are really ignorant, and the scientific and technological personnel are left here in the cold!"

Qin Yuan felt very uncomfortable listening to the captain's sour words. This person came here every time to gain a sense of presence. He always felt that he was a high-achieving student. The scientific and technological personnel were not at the same level as them, and they were always superior to them.

Those villagers couldn't understand what he was talking about at all. The villagers knew who was good to them, like Qin Yuan, and those peacekeepers who actually helped them.

He Chenguang stared at the captain very dissatisfied and said, "Brother Qin, let's go back after this is over. I really can't stand this guy anymore. He can be found everywhere. Every time he comes out to say a lot."

"The more people talk like this, the more they don't have much ability. I really hope that they can solve that organization, and don't let us wipe their \*\*\*\*\* again."

In this way, Qin Yuan and the others went back after they settled the matter here. Before leaving, Li Yunfei gave Qin Yuan the letters written by everyone in the team to his family, and asked them to take them back and hand them over to their relatives. After all, there is a war here, and these letters have not been sent for a long time.

Qin Yuan said that he must live up to expectations. After returning home, he talked to Gao Shiwei about the biochemical organization and the arrogant attitude of the anti-biochemical organization.

"Qin Yuan, you have been wronged this time, but a man can bend and stretch. After all, these people are international. Now when it comes to biological and chemical weapons, all countries are very tense."

"Captain Gao, I can understand this, but I'm worried that these people are not strong enough, and ' will scare the snake when the time comes."

"You brat has too many things to worry about in a day. Even if the sky falls, we will take care of you, right? What you should worry about now is to go back and spend more time with your family. Don't think about whether you can't do these tasks all day long." Finished."

Qin Yuan also thinks it makes sense, anyway, this matter is not in his own hands now, and it is useless to worry about it here, just let it take its course.

In addition, An Ran's grandmother is sick, and Qin Yuan happened to have time to take An Ran back to his hometown to visit her.

Grandma is already living in the hospital at the moment, and An Ran's parents are there. After seeing Qin Yuan coming, grandma is still very happy to ask him to sit beside her.

An Ran knew that Qin had an ancestral acupuncture method, which was very powerful and could bring the dead back to life, so she planned to ask Qin Yan to see how her grandmother was doing.

Qin Yuan took a closer look at grandma. This is not an external disease. It is just that some things naturally decline with age, and he has no way to save it. This is a natural law, and people have normal birth, aging, sickness and death.

He winked at An Ran, the two found an excuse to go out, Qin Yuan told him about the situation, this was normal, and he couldn't intervene even in life, old age, sickness and death.

An Ran's eyes were red, but he was quite acceptable. After all, he had lived in the army for so many years, and this parting of life and death was just a moment of sadness.

"Then how long is grandma left? We can also prepare."

Qin Yuan shook his head, expressing that he didn't know, in fact, he had already seen that An Ran's grandmother had at most three months left, this was a normal law of nature, there was no way.

Chapter 799 Grandma's Wish to Marry

Seeing An Ran's sad state now, he really had no way to tell her the news. After the two entered the ward, grandma sat on the hospital bed in a daze.

An Ran walked over, took grandma's hand to comfort her and said, "Grandma, don't worry, follow the doctor's order. I asked the doctor just now, and he said that this time you are just a small cold that the elderly often have. We will return to you in a few days." I can go home from the hospital."

"Really? That's pretty good, but grandma doesn't know why she got sick this time, and she feels more and more powerless, but I haven't seen you get married yet, grandma is really worried."

Grandma is still very worried about An Ran's marriage. Although Qin Yuan is a more reliable person, the two of them are not married after all.

For the next two days, grandma kept talking about her marriage until she was discharged from the hospital and went home. In this case, she just went home and waited.

It was the first time for An Ran to see her grandma being so persistent about this matter. Before she said she would not get married or something, she passed it with a few perfunctory words, but she did not expect her grandma to be very persistent this time.

After An Ran came out of her grandmother's room, she quietly wiped her tears on the balcony, Qin Yuan walked behind her and hugged her, An Ran took a deep breath and made a decision.

"Qin Yuan, let's hold a wedding. Even if grandma's last wish is fulfilled, just treat it as a favor for me. Would you like to?"

Qin Yuan nodded, how could he not agree to this matter? After all, An Ran said this to him with red eyes now, and grandma treated him pretty well.

Knowing that Qin Yuan agreed, An Ran burst into tears and laughed, and then she asked with some concern: "Then how do you explain to Qingmei and Xiaoyun?"

Qin Yuan smiled and asked An Ran to accompany grandma first, he would definitely explain these things himself.

After An Ran entered, she told her grandma that she was going to marry Qin Yuan. Grandma was very happy. He felt that Qin Yuan was a really nice person and An Ran was a perfect match, so he could find someone to take care of her before he left. , I feel relieved.

In fact, grandma also knew about her physical condition, so this time she was so strong that she asked An Ran to get married quickly so that she could have a result.

Qin Yuan went out and called Long Xiaoyun and Mu Qingmei separately, but Mu Qingmei didn't say anything, he knew that such an excellent person as Yiyuan was definitely not his own, but he could tell himself calmly. Knowing this matter, she felt nothing.

But Long Xiaoyun's side was different. Qin Yuan had just finished speaking when he hung up the phone.

Qin Yuan's face was dark. Long Xiaoyun's violent temper really followed Long Zhanjun. He was thinking about how to explain to Long Xiaoyun clearly, and continued to call Long Xiaoyun, but he didn't expect that he would not answer. .

Qin Yuan had a headache. At this time, grandma had already changed into a new suit and came out. She happily pulled Qin Yuan to ask him to call his parents out to meet him, have a meal together, and set a good date.

Qin Yuan thought for a while that it was Grandma Sun. Grandma Sun also wanted to get married before, so she made it clear with Grandma An Ran that Qin Yuan would drive to pick up Grandma Sun.

After coming to the orphanage, she said that grandma was a little upset when she saw only Yuan coming alone. What did this kid do? He even brought his girlfriend here before. Could it be that he was talking about it?

Unexpectedly, Qin Yuan came over and told her about the situation. He wanted to take him to talk about marriage with An Ran. Grandma Sun was very happy. it is good.

She happily went to the room to change clothes. She planned to dress grandly and formally, after all, she was going to meet her future in-laws.

Qin Yuan sat on the sofa below and was about to fall asleep. Sure enough, women have no distinction of age. Half an hour has passed, and Grandma Sun has not come down yet.

On the way, he called Long Xiaoyun a few more times, but he didn't answer, and Long Zhanjun, how should he talk to Long Zhanjun about this matter? With Long Zhanjun's violent temper, he might be able to catch up with him Fight throughout the camp.

At this time, Grandma Sun came down from upstairs. She was wearing a purple cheongsam, very dignified, her hair was pinned behind her ears without any dye, neat and very elegant.

Qin Yuan stepped forward, pulled Grandma Sun and said, "Grandma, your temperament is really not for you. Dress up casually, and you are simply a beautiful woman!"

"You brat, you're still poor-mouthed. Look at the way you're dressed. After all, today is a formal wedding occasion. You've known that you're wearing this camouflage uniform all day. Let's go. I'll take you to buy two pieces of clothing. I can't give it to you." We are ashamed!"

Qin Yuan said with a smile that he would let grandma arrange whatever he wanted, and today he obeyed everything.

Grandma Sun picked out a very slim suit for Qin Yuan, which looked very handsome. He drove Grandma Sun to Grandma Anran's house in a car, and Anran's parents also came back.

He didn't expect to see Long Xiaoyun just after he entered the door. He was sitting on the sofa, chatting and laughing with An Ran's grandmother, but he didn't see An Ran.

Said that grandma gave Qin Yuan a blank look when she saw Long Xiaoyun, and whispered: "Stinky boy, look at what you have done!"

At this time, An Ran's parents also warmly greeted Grandma Sun, and An Ran came out of the kitchen, carrying a plate of cut fruits.

Long Xiaoyun took the fruit, sat next to her and said, "You didn't inform me about An Ran's wedding, so I don't care. Anyway, I'm going to be a bridesmaid."

An Ran smiled and continued: "There is also Qingmei, I called her too, she will be here in a while, you two are my bridesmaids."

Qin Yuan was stunned, what's going on? Did Long Xiaoyun reconcile so quickly? And when these three people became so close, he really didn't know at all. After all, he usually had to go on missions, and he seldom took care of things here. He just went to find the three of them separately. All right.

Then everyone chatted enthusiastically, completely ignoring Qin Yuan who was next to him, and An Ran's grandmother even wanted to recognize Long Xiaoyun as her god-granddaughter. After a while, Mu Qingmei also came, and the three girls took out their mobile phones, Looking excitedly at the things to be prepared for the wedding.

They discussed that they would go to see the wedding dress in a few days, first take photos of the wedding dress, and then go out for dinner together in the evening, and then set a date for the wedding. .

Seeing everyone chatting enthusiastically, Qin Yuan interjected, "Um, is the wedding day too close, should we discuss it again?"

Grandma Sun gave Qin Yuan a blank look, "Shut up! You don't have the time to talk now!"

Then An Ran's parents went outside to look at the dining place, Long Xiaoyun and the three of them went hand in hand to look at the bridesmaid's dresses, and finally looked at the wedding dresses, and brought the two old people with them.

In an instant, Qin Yuan was the only one left in the family. Qin Yuan was very speechless. He was the one who got married, so why can't he have his own opinion? Make it look like you're at a wedding.

Before leaving, An Ran ran back again, and asked Qin Yuan to go downstairs to buy some food, and wait for them to prepare a meal later, after all, they can eat casually at home for lunch, and go out for dinner at night.

"Also, Xiaoyun said that she wanted to eat braised fish, and Qingmei said that she wanted to eat braised yellow chicken. I don't want to pick, I want to eat crab, and you can do whatever else you like." An Ran left without looking back after speaking. up.

Qin Yuan was stunned for a second, then reluctantly picked up the key and went out to buy vegetables, but this kind of harmonious scene is really very good, isn't it what he has been looking forward to?

He just said that the day of the wedding has no other meaning. What he is most worried about now is that Mr. K of the biochemical organization. Still a little worried.

During lunch, An Ran's parents praised Qin Yuan's craftsmanship, and felt that An Ran would be blessed in the future, and was very satisfied with Qin Yuan. .

In the afternoon, they also went to see the wedding dress, and then planned to take a family portrait together. Qin Yuan felt a little strange, "Didn't you go to see the wedding dress in the morning, and haven't seen it yet?"

"How can it be so fast? After all, this is the most important thing in a girl's life. We need to look at a few more and compare."

When taking a family portrait, An Ran enthusiastically invited Long Xiaoyun and Mu Qingmei to come in together, and a very harmonious family portrait was taken.

During dinner in the evening, everyone discussed the date of the wedding. After looking at the recent days, they all looked good, and planned to set the date at the end of the month.

Qin Yuan didn't have any objections, because the army hadn't been notified yet, so there shouldn't be any tasks. Everyone went to take wedding photos together the next day.

Long Xiaoyun and Mu Qingmei were very beautiful in bridesmaid dresses. While their parents were away, the three of them quietly put on a wedding dress and took a group photo with Qin Yuan.

The wedding photos were also taken, and the date was set. There was nothing to do here, so Qin Yuan went back to the army first. After all, it took a long time to come out. There was nothing to do with Mu Qingmei. She planned to stay and accompany An Ran to choose the back Marriage stuff.

Qin Yuan took Long Xiaoyun back to the army first, and looked at Long Xiaoyun with his eyes closed in the car, Qin Yuan didn't know how to speak for a while.

After struggling for a long time, I still said: "Xiaoyun, thank you for your understanding. Grandma Sun and the others are very happy this time."

"Hmph, you have the nerve to say that the first marriage is not for my old lady? So I definitely want to participate, even if I am a bridesmaid."

Qin Yuan smiled, Long Xiaoyun's temper has not changed, and what she said means that she is not angry.

"Then what should our father say?"

"Hehe, you playboy, you still have the nerve to mention my dad, just wait, I'll tell him when I get back, and let him break your leg."

"If my father-in-law did it, then I will definitely not fight back, but if my leg is broken, then the three of you will have to be widows in the future."

Long Xiaoyun blushed and said loudly: "Why are you so annoying, there is no time for seriousness."

Now Long Zhanjun is the basic unit below, and they are not very well informed about the news above them. Long Xiaoyun still doesn't plan to tell him about Qin Yuan's marriage. Let's talk when you find out.

After Qin Yuan came back, he told Gao Shiwei about his situation, and he might take a few days off at the end of the month to go back to get married.

Gao Shiwei was a little shocked, "Why didn't Long Xiaoyun tell me, when did you two say you were going to get married?"

Qin Yuan could only explain to him that it wasn't Long Xiaoyun but An Ran. After explaining all this clearly, Gao Shiwei looked at Qin Yuan with contempt on his face, "You are really blessed! You tidy up obediently, and you are so obedient, this is also your kid's ability."

"Hey, I have to invite you to a wedding banquet then, but I don't want Team Dragon to know about this, you understand."

"Don't worry, I won't tell him. You young people can solve their own affairs. It's not good for me to interfere. As long as there is no task, I can join in."

Qin Yuan nodded with a smile, said a few words to Gao Shiwei, and then came out to consider the matter of the best man. He went back and talked to the red blood cell team about the situation. Everyone was scrambling to be the best man, especially Li Er Niu is the most active.

He Chenguang slapped Li Erniu on the head, "What are you thinking about all day, kid? You are already married, so you can't be the best man, do you understand?"

"Hey, didn't I forget it as soon as I was happy?"

Qin Yuan decided to take the whole team of the red blood cell team with him. ' will be regarded as a solo show at that time. He is the strongest best man team. After all, there is also a link of snatching a bride. They are professional in this regard.

The most important bridesmaid is Long Xiaoyun, who will definitely think of various ways to rectify herself, so it is better to ask a few more people to be careful.

Qin Yuan and the others were full of happiness, discussing various marriage matters, Qin Yuan had no time in the army, so An Ran bought all the wedding candies outside and sent them to Gao Shiwei.

Seeing that the wedding day was getting closer and closer, only three days away, Qin Yuan didn't know what was going on, and he was inexplicably nervous. He Chenguang told them, what should they do when they go to pick up the bride? When everyone was talking happily, Gao Shiwei asked Qin Yuan to go to his office.

Li Erniu prayed silently, don't come on any mission, even if the mission is in the country, it is fine to arrive before the wedding.

But things backfired. Sure enough, what Qin Yuan was worried about happened. It was the matter of the biochemical organization. They were very arrogant. After the international anti-biochemical department went to the base, all members lost contact.

Immediately afterwards, a video was uploaded internationally. In the picture, the captain of the biochemical team was kneeling on a stool, his hands were tied, trembling constantly, and the team members next to him were kneeling on the ground.

There are no other outsiders in the picture, the captain should be looking at the things on the opposite blackboard, and he slowly read out:

"You guys really \*\*\*\*\* me off this time. Three days later, I will launch a biochemical war in Little A as a warning to punish you!"

Chapter 800 Shocked Doctor of Biochemistry

The captain of the biochemical team had just finished reading this sentence when a figure of a man broke into the camera. The captain was already trembling at the moment, and the camera only recorded half of the man. Then, the man raised his knife and chopped off the captain's hand directly. Down.

The whole video ended with the scream of the leader of the biochemical team.

Qin Yuan asked later: "This person said that he will launch a biochemical war against small country A in three days. How long ago was this video?"

"It has already happened. This video is from a week ago. A few days ago, a biological and chemical war broke out in Xiao A, and these biological and chemical weapons were directly dropped into civilian areas. They used small drones to launch them."

Gao Shiwei frowned and handed a document to Qin Yuan. He opened the document and took a closer look. It recorded the specific situation and the number of people injured.

The scene was quite tragic. After all, these are biological and chemical weapons, which spread through gas and air. This is the reason why the world opposes the development of biological and chemical weapons. These biological and chemical organizations only dropped two poisonous gas bombs.

But in that entire area, more than 200 civilians were attacked by the poisonous gas, and more than 30 civilians died on the spot, including nine children. Seeing such astonishing statistics, Qin Yuan clenched his fists tightly. Innocent people.

Although Country A received this notice before and immediately took measures to prevent and control it, Country A has more than 30 urban areas, more than 20 counties, and some regional towns. They have no idea that these biochemical organizations choose to Where to put it.

Now the international community has issued a high-level early warning. The senior researchers of the anti-biochemical team have just disappeared, and the international community has sent personnel to search for them. However, there is no news of these personnel being sent.

Then a biochemical organization sent this videotape to the door of the United Nations. They were very purposeful, just to let everyone see this videotape, and they were very arrogant, directly specifying that they would launch a biochemical war in country a.

These people were in country c before, and now they are mainly targeting country c in the international arena. They searched all over the country, but there is no clue at all. The international community is also very tense now, and all countries are very worried because they can do something to small country a. Birth and chemical wars can also be used against other countries.

They are now in the dark, so it is impossible to guard against, and the damage caused by biological and chemical weapons is really huge. Except for the dead and injured people in country A, the most important thing is that the area is isolated, within a radius of 200 kilometers. Entry is prohibited.

Although Qin Yuan was very indignant about this incident, he also thought of the arrogant attitude of the previous anti-biochemical group, which was also because these people were too self-righteous, which led to the failure of this operation and completely angered these biochemical organization personnel.

"Hehe, aren't they the so-called high-achieving students? They are superior to us. They think they are very good!"

Gao Shiwei knew that Qin Yuan was angry. Before, because these people were all international, he couldn't say too much, but now each country has sent its own special forces, and three groups of people have been sent one after another. , but to no avail.

The last group of people is the most famous Snow Leopard commando in the United States. Their entire team of 13 did find the biochemical organization, but they should only find one of their bases. The 13-member team was finally attacked by biochemical weapons, and only seven people came back alive. , and their captain was seriously infected and died after returning.

The international community is now calling for capable military representatives to fight, and several countries have recommended Strictly. After all, Qin Yuan's international reputation was quite warm before.

Qin Yuan didn't expect that he really hit the mark. The leader of the anti-biochemical team had been sneering at him all the time. At that time, he said that he would beg himself to save him when the time came, but he didn't expect it to come true.

Gao Shiwei said seriously: "Qin Yuan, I know you were wronged before, but this matter is no longer just a matter between you and the anti-biochemical team, it has risen to the international level, threatening the integrity of each of our countries. Safety."

"Captain Gao, I, Qin Yuan, am not that stingy yet, don't worry, I understand all of this."

"And this time the situation is special. Originally, you only got married in three days. I had no choice but to choose. For this mission, you can choose people at will in the whole region, and I can satisfy you."

"I don't need the team members, I am enough alone!"

what! Although he knew that Qin Yuan was very powerful, but this time he was facing a member of a vicious biochemical organization, and this biochemical weapon was very dangerous, how could he handle it alone?

"Captain Gao! I can always do what I would like to say. I know how strong I am. I can definitely solve this problem by myself, but I have to take other people with me, and I have to take their safety into consideration."

In fact, Qin Yuan's main consideration was that if he brought the members of the red blood cell team with him, he didn't know whether these biochemical weapons were stronger than the batch in the primeval forest.

It shouldn't be a problem for him to have a protective film, after all, it has been strengthened by bacterial weapons and biochemical weapons, but if other people are infected, he is not sure whether he can treat them again. The risk is too great, and he is unwilling to bring other brother.

Gao Shiwei also understood that Qin Yuan was not arrogant, but was really thinking about his own safety, but it would be too risky to let him go alone, and Gao Shiwei was also caught in a tangle for a while.

"Team Gao! Now is not the time to talk about this. The longer these biochemical organizations exist, they will pose a threat to everyone. Don't worry about this mission, I will definitely complete it beautifully."

Gao Shiwei paced back and forth in the room, willing to have good overall strength and quality, very strong, and he has also experienced this kind of biochemical warfare twice. After thinking for a while, he said firmly:

"Yes! I approve, but you must come back safely. Even if you haven't completed this task and killed the boss of the biochemical organization, you must come back safely!"

"Yes! Guaranteed to complete the task!"

After Qin Yuan came out of the office, he quickly went back to pack his luggage. Unexpectedly, the people from the red blood cell team had already assembled outside.

"I said, what are you \*\*\*\*\* doing? This time, Lao Gao only let me go alone."

They didn't know the specific content of the action, but they knew that Qin Yuan was going on a mission again, so they had to go with him, after all, they were a group.

"Qin team, what mission is only for you to go alone? Is the mission too dangerous, and you want to take this risk behind our backs?"

This group of boys have really followed me for a long time, and their reaction speed has become faster. They were quite easy to fool before. How come they are so smart now? As expected of the soldiers he led, Qin Yuan was quite proud in his heart.

"You guys are thinking too much. I will definitely take you on a dangerous mission. I am not so righteous. This time it is just a simple latent mission. I may go for a week and come back. There is no need. Take you with me, if you don't believe me, ask Lao Gao!"

At this time, Gao Shiwei also came down from the office. He put his hands behind his back seriously, and watched Qin Yuan wave to him. After receiving the order, Qin Yuan greeted everyone and quickly boarded the helicopter behind.

The members of the red blood cell team felt a little puzzled, did they really think too much? Is this task so simple?

On the helicopter, Qin Yuan quickly sent An Ran a message, telling him that he had a temporary mission and that the wedding might be postponed. He originally wanted to make a phone call, but the helicopter was too noisy and he couldn't hear anything clearly.

When An Ran received a text message from Qin Yuan, to be honest, she was a little disappointed at that moment. After all, there was only one time in her life when all relatives and friends notified her of a wedding. And the missions that Qin Yuan can perform are basically big missions.

Although An Ran was a little unhappy, she still sent him a text message, telling Qin Yuan to pay attention to safety, and she would wait for him.

Mu Qingmei was next to An Ran, and she also comforted An Ran, telling her not to worry too much, Qin Yuan's promise would definitely be fulfilled, it was only a matter of time, this time it was also delayed by the mission.

Qin Yuan opened the file bag on the plane and carefully checked the contents. This time, the US special forces found that their small biochemical base was on the border of the Yuan country. When they arrived with a large army, the place was already empty.

It can be said that there is no clue now, and Fang Tian plans to go to country c to investigate again. He has always had a hunch that this biochemical organization is within the territory of country c.

The staff of the embassy in country c is already waiting for Qin Yuan, and there are several biochemical doctoral scholars who are here to provide Qin Yuan with some special protection plans.

But when they saw that Yan Kingdom sent only one person, they were very surprised, and the soldier in front of them was very young, what are you kidding?

A doctor of biochemistry was very angry. With his hands behind his back, he asked loudly, "What the \*\*\*\* are you strictly doing, are you just perfunctory us like this?"

The staff of the embassy hurriedly explained that Qin Yuan was a God of War figure in Yan Kingdom, and one person was equivalent to a special warfare team.

"Doctor, please don't get excited, our captain Qin, he has experienced a bacterial weapon before, and he retreated safely after a biochemical weapon!"

After hearing this, the doctor of biochemistry suddenly became interested and was able to safely escape from the two biochemical weapons without being infected. Is there anything special about this person's physique?

But they still feel a little unreliable, Yan Guo has always been very strict in doing things, why is it so unreliable this time.

Qin Yuan smiled. These people seemed to disbelieve his strength. After all, these biochemical doctors spend all day in the laboratory, and it is normal that they have never heard of him before.

He took out the pistol on his body and quickly fired two shots at the back of the biochemical doctors. Those biochemical doctors who had never seen such a scene were so frightened that they all crouched down with their heads in their hands.

After a while, a gray-haired doctor stood up and looked at Qin Yuan angrily, "You! You lunatic really disrespects people. What are you doing?"

The staff of the embassy also didn't know, so they were frightened by Qin Yuan for a while. Qin Yuan just spread his hands helplessly. These people are really ordinary people and don't know anything.

He went to the place where he had just shot, and threw two bodies from behind the trash can.

Those Ph.D.s in biochemistry were frightened and backed away in an instant. What's going on? This was near the embassy, and both of them were headshot accurately by Fang Tian.

The doctor of biochemistry said loudly: "You are simply crazy, how can you kill people indiscriminately?"

Qin Yuan was very speechless. The reaction of this group of people must have been too slow. He reached out and unbuttoned the coats of these two people, revealing a bundle of bombs, "Doctors, do you understand now?"

In an instant, everyone gasped. They didn't expect that these two people were really militants with bombs strapped to their bodies. If Qin Yuan hadn't discovered and killed them, they might have rushed over directly.

In an instant, the doctors who were still complaining about their willingness just now hid behind Qin Yuan, and asked tremblingly: "Captain Qin, is there such a person nearby?"

Qin Yuan thought it was funny, these people changed their faces too quickly, "No more, I observed, the surroundings are safe now."

Hearing this, the doctors of biochemistry at ' breathed a sigh of relief. The staff of the embassy immediately sent an application to send soldiers over. They should protect these doctors of biochemistry first. How did these people get the news? of?

Qin Yuan looked at the corpses on the ground and said slowly: "It seems that there is indeed a problem with this country C. They received the news just after I arrived here, and it is obvious that they are here for these biochemical doctors."

The embassy staff nodded, "Could it be that they have internal problems?"

"This is not something I should be in charge of. Now I want to investigate the issue of biochemical organization. By the way, doctors, do you still have any doubts about my ability?"

These doctors were stunned just now. They stayed at the embassy for so long, and they didn't find anything unusual at all.

Just as Qin Yuan came over, he saw someone in an ambush, and quickly fired his guns to deal with it. This was the first time they had seen them at such a speed, so how dare they have any doubts.

"Captain Qin, you're joking. I never thought that Yan Kingdom would have such a talent, with such great ability at such a young age. I admire you."

The doctor of biochemistry handed Qin Yuan a set of chemical protective suits, which were specially made by them, which could resist the biochemical gas for 12 hours, and they also explained some precautions for being willing to come into contact with the deepening gas.

The doctor mentioned that this chemical protective suit was very proud, and he patted his chest and assured that as long as Qin Yuan put on this chemical protective suit, he would definitely be able to come out safely.

Qin Yuan saw that the chemical protective suit was very thin. Because it was designed to resist gas, it was a one-piece chemical protective suit and also wore a small set of oxygen generators. This is not bad, but it is a pity that he will not need it.
