

Star of Space 146

Chapter 146 It's really not easy

Since Lin Laogan could push his wheelchair by himself, the thresholds of the main room and his room were removed to make it easier for him to enter and exit.

When no one is home, I am not afraid that he will get caught in the rain because he is in the yard.

When Lin Lu saw him leaving, she took a deep look at Lin Caihe and followed him.

"Uncle and aunt, the food is ready to eat. You wash your hands, and my eldest brother and I will bring it to you." Lin Caisang pulled Lin Changhong, who was still confused, towards the kitchen.

Everyone in the yard was gone in an instant, leaving only Lin Caihe, who looked aggrieved and had tears in his eyes. He had no idea why he had made his family angry again.

...

"Sang Sang, what's going on with Third Uncle? Cai He just wants a silk flower, can't I just sell it to her?" Lin Changhong looked at Lin Caisang in the kitchen and asked.

For him now, the money needed on Menghuang Mountain is not enough, so he reaches out to his sister to ask for it. The money to buy a silk flower is really not a problem. The cheaper silk flower only costs three to five copper coins.

Hearing this, Lin Caisang raised his eyes and glanced at Lin Changhong.

"This is not about a silk flower."

It was the third uncle who was so disappointed with Lin Caihe's daughter that he didn't like her everywhere.

"That is....."

Lin Changhong still didn't understand.

"Brother, why do you have no memory at all? Have you forgotten how He'er targeted me before?" Lin Caisang reminded him.

"Just because Caihe is targeting you, Third Uncle won't..." After all, she is Third Uncle's own daughter, and Sangsang is just his niece. There is still a difference between the two.

"It's not because He'er is targeting me." Lin Caisang shook his head again.

"ah?"

Hearing what she said, Lin Changhong was even more confused.

"Brother, the third uncle does carpentry work every day just to pull things to sell for money. It's really not easy. These days, He'er and Qing'er didn't go to the mountains to help, so they helped the third uncle. They are I can see how much effort my third uncle put into these things."

Lin Caisang explained, using his grandma as an example.

"Look at grandma, when you went hunting in the mountains, she spent the money she earned from collecting bird's nests. She wanted to break it in half with a copper plate and spend it. Not to mention buying silk flowers, she was reluctant to even buy some rice. You know why? ?"

"My family is poor." Lin Changhong replied without hesitation.

"This is only one of them, there is another one."

Lin Caisang opened the lid of the pot, put all the rice into a wooden basin, covered it with a wooden lid, and handed it to Lin Changhong, who took it.

"Grandma knows that you earned all this money at your own risk, so when the money comes into her hands, she will spend it as little as possible. Even if it is for food and clothing at home, she will stick to you and me first. Because you earned the money, and at the same time, she also hopes that she can save some money. You can take less risks in the mountains, and go there less once if you can.

But look at He'er, the third uncle has just earned a lot of money. She didn't think about adding some rice to the family. The first thing she thought of was to buy silk flowers. If one was not enough, she bought two. This is like a daughter. What should I say to my hard-working dad? "

In fact, when she was interrupted by Lin Caihe just now, she wanted to say that her uncle and aunt had worked hard and went to the main room to drink some water and rest.

"Brother, tell me, you come back from Menghuang Mountain every day. What do you say first when I see you?" she asked Lin Changhong.

"Let me wash my hands and eat." Lin Changhong said matter-of-factly.
