

Star of Space 214

Chapter 214 The cold hairs stood up again

"If you live in the mountains, my second uncle won't be able to coax my grandpa," Lin Caisang said.

"Um?"

Lin Changfeng was puzzled.

Everyone has gone out to work, and Grandpa is the only one at home. Doesn't Liu Baixiao have more opportunities to coax Grandpa?

Why would Sangsang say this?

"Yesterday when the second uncle came back, I asked the third uncle to help the second uncle to speak. Grandpa asked grandma to kick him out." Lin Caisang saw that he didn't understand, so she explained.

"My father speaks for my second uncle. It turns out you taught me!" Lin Changfeng said with a look of sudden realization.

He was just thinking, why did his father become confused before he was old? He actually helped his second uncle and wanted him to enter the family and disturb the peace of the family. It turned out to be Sang Sang's teaching.

Thinking of this, he nodded.

"Oh, I get it.

Because the second uncle came to the house to make trouble, I was forced to hide in Menghuang Mountain. My grandfather would be more attracted to us and disgusted with the things that the second uncle and the others did. On the contrary, the more we frowned at the second uncle and the others. Eyes, grandpa will feel that the second uncle is actually quite pitiful, and no one wants to see him.

In that case, grandpa's heart will be biased towards them. "

Thinking of this level, he understood. As the saying goes, things must be reversed when they reach their extremes. This is the truth.

"Um."

Lin Caisang nodded.

"It will still take some time before we can live in the mountain, but my second uncle will not be able to get the land deed. He will definitely be unhappy and will make trouble. Brother Changfeng, you should know what to do, right?"

"Pretend to be pitiful, right? You can't do anything else. This isn't simple." Lin Changfeng said.

He could imagine that in the future, Liu Baixiao would only become more and more hateful in the eyes of his grandfather, so why did he suddenly sympathize with Liu Baixiao.

"You girl are really getting better and better. It's not unfair at all for my second uncle to fall into your hands. But, Sangsang, do you really want to raise wolves in the mountains? Will this..."

Hearing the howl of wolves every day, people in the village will probably be afraid. Over time, they will become a boycott of Sangsang's wolf-raising behavior.

"Will not."

Lin Caisang shook his head.

"Brother Melian said that the wolf pups in Neilin are just a few days old. Take them home and raise them as little puppies. They won't become too wild when they are raised, but they will be an absolute deterrent."

How can our family manage the more than 300 acres of land in Menghuang Mountain? After all, Grandma and the others have their own things to do. If I don't raise a few dangerous wolves on it, it's my turn to worry. "

It is estimated that no matter when all the food is stolen, it will not be discovered.

...

Soon, Yamolian brought several wolf cubs over. The one who came to Menghuang Mountain with the cubs was a fierce-looking female wolf with sharp fangs. She looked at the people working on the mountain and her calves. They were all trembling.

But the she-wolf came here with Ya Mo Lian. For the most powerful young man in their Ya Village, no one else can say what he wants to do.

Therefore, everyone just avoided Ya Molian and continued to do their work.

"Brother Mo Lian, why did you get these guys here? You don't want to keep them, right?" Lin Changhong looked at those fluffy little guys with chubby breasts. They were so cute that people couldn't help but want to reach out and touch them. A handful.

But when he thought that there was a big female wolf next to him, her eyes fixed on him, who wanted to take advantage of her baby, the hairs all over his body stood up again.

"Well, keep it here."

Ya Molian nodded, touched the heads of the cubs, and finally glanced at the mother wolf as a warning, then looked at Lin Changhong.

"You and Enxi will make a nest for them later."
