

Star of Space 215

Chapter 215 Are you happy to raise a tiger?

"What?"

Lin Changhong was so shocked that he could fit a whole egg into his mouth. After a while, he swallowed a mouthful of saliva, stared at the female wolf dimly, and asked Ya Molian.

"Raised... raised here? My sister said so?"

His girl is too cruel. She actually wants to raise wolves in the deserted mountains. This is a rhythm that wants to scare people.

Ya Molian didn't speak, just nodded, and carried the cubs to a wooden house to put them there. Naturally, the mother wolf followed them in a swaggering manner, as if she was in charge here.

Lin Changhong quickly took a bite with his slightly opened mouth and followed.

"Brother Mo Lian, are you serious... No, Sangsang is serious. Do you really want to raise wolves in this mountain?"

"Otherwise, you're guarding Manghuang Mountain?"

After settling the mother wolf and the cubs, Ya Molian walked out and turned to ask Lin Changhong.

"I....."

Lin Changhong opened his mouth, but didn't know what to say.

How could he have been guarding the mountain? Besides, could he guard the three hundred acres of mountain land by himself? After thinking about it, I think it would be better to raise something. However, raising wolves...

"Can't we raise some dogs? We have to raise wolves."

"Are you happy to raise a tiger?" Ya Molian asked.

Lin Changhong: "..."

What kind of tigers are there? Raising wolves makes him panic. Why raise tigers? Is this a way to drive the villagers crazy?

"Then let's raise wolves." He flattened his lips and said.

"To make the wolf den, call a few more people, plant all the seedlings, and sow all the seeds that need to be sown. Little Sangzi should have told you what crops are to be planted there, right?"

Yamolian asked him.

"I've said it before, but my sister doesn't know what kind of medicine she took..." She got nervous.

There are so many things to plant at once. Corn, rice, potatoes, sweet potatoes, etc. are quite common. You can plant as many as you like, and you won't have to worry about not being able to sell them after harvesting them later.

But the girl was not interested in these. She only planted two to three acres of each type.

The most common ones are peanuts, sunflowers, sorghum, cowpeas, etc. Even fruits and vegetables are grown on ten acres. I really don't know what to grow them for. Are they going to be used to sell vegetables in the town?

If that was the case, then they would be busy.

"If you ask me, it would be great to grow more rice, corn, wheat and so on. If you have to grow vegetables, will you be able to eat them all or just waste the land? This is not a waste of land."

"Is this barren mountain yours or Sangsang's?" Ya Molian asked him.

After hearing Ya Molian's words, Lin Changhong was speechless and could only speak flatly.

"Of course it's Sangsang's."

Even if it's his, he has to listen to Sang Sang. He can do whatever Sang Sang says. Even if he has to pay for the whole mountain, he is willing to make the girl happy.

"Before the rainy season arrives, plant it quickly. It's time to plant the rice seedlings, right? Call a few more people then." Ya Molian explained again.

"Um."

Lin Changhong responded.

Originally, there was no such thing as transplanting rice here. The rice was sown directly and scattered and allowed to grow naturally. This was the first time he had heard of such an idea as Sangsang.

When he heard Sang Sang explaining how to plant rice seedlings, he thought that this girl was crazy. The rice seedlings had already been pulled up. Would they survive if they were planted again?

Even he felt this way, not to mention the other people in the village, who all regarded Sang Sang as a monster.

However, I have to say that according to Sangsang's method, this rice was planted a month earlier than other people. When the rice grows, it will really avoid the huge damage caused to the rice during the rainy season.
