

Star of Space 233

Chapter 233 Let her work to pay off the debt

"Sang Sang, please give me an idea. Is there a way to pay the money? Grandma has been thinking about it for a whole afternoon and can't figure out what to do?"

You see, you and Chang Hong can talk easily, but Qing Yatou and Chang Yi are still young. There is also Chang Feng. He still needs to study. How can he afford the money? And He Yatou, tsk, she won't say anything. .

She had been thinking the same way before, calculating the pay per person and paying for food and drink every month on time, so she wouldn't have to complain about this and that every day.

But.....

As a result, a good home became less like a family, which she really couldn't stand.

"Grandma, you just think too much." Lin Caisang chuckled.

"Look at Qing'er, she is a good hand when it comes to work. Who dares to say that she is slow when planting seedlings on the barren mountain? I thought about it, so I paid her the same wages as other people in the village. He Zhangyi is sure that he can pay enough for it. As for Brother Changfeng, since his third uncle and his third aunt want to support Brother Changfeng's education, they will naturally have to pay for it. "

"Well, you're right."

Lu Qiubo nodded, very satisfied with what Lin Caisang said.

"Then let Qing Yatou and Chang Yi work for you, and you will pay their share of the money."

Anyway, she alone has the final say whether the money is paid or not. In this way, she can save Sang Sang a lot of money, as long as Sang Sang doesn't tell anyone.

"But there's also He girl. This girl is really..." It's not easy.

If it weren't for her, why would the family be in such trouble? I just want to make her, my grandma, angry to death.

"If she wants to make money, let her earn it. If she can't make money, then let her work to pay off the debt. She can be paid for the work of chopping wood, carrying water, washing and cooking at home."

Lin Caisang said directly.

Over the years, Lin Caihe's problems were caused by being spoiled by her family members. From now on, if she doesn't get used to this problem, she has to work if she wants to eat. It's the same for everyone!

"That's a good idea."

Hearing this, Lu Qiubo's eyes lit up and she clapped her hands, but the next moment, she felt worried again.

"But how much should I pay..." She couldn't make up her mind.

"It's about the contribution money, grandma. I remember that there are several households in our village who pay the contribution money. You just have to pay them whatever they want."

Lin Caisang reminded Lu Qiubo.

"How can it be the same? How many meals of meat can those people eat throughout the year? It's not like our family, where we can't open a table without meat for a day." Lu Qiubo said angrily.

Recently, it is true that there is meat on the table every day, and no matter how bad it is, there is still broth. It is really not comparable to other people's homes.

When Lin Caisang heard what her grandma said, she understood that her grandma was angry because Lin Caihe acted like a monster. She didn't want that girl to have an easy time and wanted to collect more money.

"Then how about two copper coins more than other people's money per day?" she suggested.

Let Grandma vent her anger and teach Lin Caihe a lesson.

"Okay, it's up to you."

After hearing her words, Lu Qiubo immediately nodded in agreement and felt relieved.

...

Soon, Lin Changhong came back, and Lu Qiubo gathered all ten members of his family in the main room, and asked everyone for money with a straight face.

"What? One hundred and fifty cents per person per month, grandma, are you..." robbing money? !
